This provision in the Japanese Constitution was in effect a joint declaration of the Japanese and American people. Not only was it widely hailed in both countries at the time but it was a Japanese concept encouraged and accepted by the United States then occupying Japan.

Only 10 years ago, on January 1, 1950, General MacArthur, who had represented the United States in Japan at the time the Constitution was adopted, said in an address to the Japanese people:

"A product of Japanese thought, this provision is based upon the highest of moral ideals, and yet no constitutional provision was ever more fundamentally sound and practical. * * * In this historic decision, you are the first. The opportunity therefore is yours to exemplify before mankind the soundness of this concept and the inestimable benefit resulting from the dedication of all energy and all resource to peaceful progress. In due course other nations will join you in this dedication, but meanwhile you must not falter. Have faith in my countrymen and other peoples who share the same high ideals. Above all, have faith in yourselves."

The present effort to circumvent the Japanese Constitution is the joint responsibility of the Japanese Premier Nobusuke Kishi and the U.S. Government. There is no popular demand in Japan or in the United States for a military alliance between the two countries. In fact, there is widespread opposition in Japan to any military alliance and especially to any pact that would provide an entering wedge for the eventual introduction of nuclear weapons.

During his first years in office Premier Kishi indicated that the Japanese Constitution precluded any military alliance with the United States. About a year ago he suggested changing the Constitution. Realizing how unpopular and impossible this was he finally asserted that the Constitution permitted rearmament as well as a military pact with the United States.

The pressures for this treaty include the following:

1. The prewar Japanese industrial combines which were dissolved by MacArthur following the war have been resurrected. They profit from U.S. military aid and military contracts from U.S. forces in Japan who spend some $200 million annually for goods and services in Japan. They not only want to continue the presence of American troops in Japan but look forward to an expanded rearmament program by Japan itself. These economic pressures are exerted by leading industrialists within Kishi's own party as well as in other ways. (John G. Roberts, "Remilitarization of Japan," the Nation, Dec. 19, 1959.)

2. American economic interests such as Westinghouse, General Electric, Western Electric, Standard Oil, and Alcoa are business allies of the Japanese industrial houses. American investments in Japan have jumped from a prewar figure of $119 million to over $600 million. More than 800 U.S. companies have profitable tieups with Japanese firms. In addition, loans totaling more than 2 billion have been made in the postwar period. These loans were Government and World Bank loans. "The protection of this investment," asserts one authority, "is a sufficient incentive for encouraging Japan to rearm" (idem).

3. One reason Japan is so susceptible to economic pressure is the policy of the United States concerning trade with China. Even such trade as Japan might have had without strong objection from the United States was cut off by China in 1958 because of Japan's close support of American policy.

4. Beyond the economic pressures are the political ones. It was the complete destruction of Japan by the United States in World War II that created the power vacuum that in turn permitted the Chinese Communists to become the strongest power in Asia. In this day of rising Russian and Chinese power the United States has no powerful allies in Asia. The one hope for a great power in Asia allied to the United States is Japan. The United States, as a part of its policy of hostility toward China and its reluctance to work for disarmament, is concentrating on the rebuilding of a strong, militarized Japan.

In one sense the proposed treaty is simply the method of formally declaring and extending a policy the U.S. Government has pursued for some years. The Pentagon has not wanted American troops withdrawn from Japan. Therefore when the pressures for ending the occupation were mounting, we concluded a peace treaty with Japan which at one and the same time provided for withdrawal of occupation forces and for the right of Japan to retain foreign armed forces on her soil as a result of bilateral or multilateral agreements.

James Reston, in the November 19, 1951, New York Times, wrote:

"The Pentagon would like to keep most of its buildings, its hotels, its golf courses. It would also like to retain legal jurisdiction over its personnel at all times and, of course, it is concerned to see that the Army post exchanges are well supplied with everything from American golf balls to liquor, tax free.

"The State Department recognizes that the Army has an argument on all these points, but in the political field the United States has made a great play with the theme that it was restoring Japan's independence while the Russians were using their security treaty rights to dictate to their allies how they should live and serve the interests of the military authority.

"Mr. Rusk will talk with General Ridgway about trying to work out a compromise that will avoid suspicion that the United States is clamping a phony independence on Japan while at the same time preserving the facilities essential to the U.S. military command."

The proposed treaty and the policies it promotes have some dangerous and far-reaching implications for our own people, the Japanese people, and for world peace.

1. The treaty perpetrates the unsound economic policy of tying Japan both to the United States and to a military economy. Japan's natural markets and sources of raw materials should be with her Asian neighbors rather than a distant United States. Japan's economic base is such that she cannot support a huge military revival without becoming increasingly dependent upon the United States. This means further sacrifices for the U.S. taxpayer and a false economic base for the people of Japan.

2. The treaty of alliance and the rearmament of Japan will not increase the stature of either Japan or the United States in Asia. Instead it will reawaken memories of Japanese militarism and occupation during World War II. It will tar Japan with the brush of Western imperialism for becoming an economic vassal and a military subaltern of the United States. It will indicate that the United States is intent on the continued military occupation of Japan while calling it by more acceptable names. Asians do not want British, French, Dutch or U.S. imperialism influencing or manipulating their decisions. They resent Western bases in Asia as we would resent Russian or Chinese bases in the Western Hemisphere.

3. At the very moment when the Soviet Union has stated its readiness for total universal disarmament and has urged a relaxation of tensions, we are pursuing a policy that moves in the opposite direction. This policy will make it more difficult for both China and Russia to believe we want a relaxation of tensions. Already there is some indication that Khrushchev has had difficulty in convincing his Chinese ally of the value of relaxation of tension and the timing and value of disarmament when our Asian actions move in the opposite direction. Yet it is increasingly obvious that the world must begin to disarm and China must be included in such a disarmament program.

4. Even from the military point of view there is no guarantee that the Japanese armed forces we build up will be dependable. Presumably Japanese armed forces will be useful to the United States only if we are involved in war with China or Russia or both. But if Japan is threatened with nuclear bombs or missiles is there any greater likelihood that Japan will submit to atomic bombardment and stay in the war than she did after only two such bombs in World War II?

5. The imposition of the treaty upon the Japanese people may well lead to the vitiation of democracy in Japan. Only since World War II has anything like real popular democracy had a chance to flourish in Japan. Untrammeled by a military caste and with the big industrial empires broken by MacArthur's occupation staff, popular democracy was given a chance in Japan. Now, however, Premier Kishi's Liberal Democratic Party (which is the majority party), under pressure from the industrialists and disregarding the objections of opposition parties and public opinion polls, is insisting on the treaty. A communication from Prof. Iwao Ayusawa, chairman of the Fellowship of Reconciliation in Japan, says, "it is feared that the arrogance and tyranny of the majority which the government is indulging in may lead the people to a disbelief in democracy itself." If the majority party becomes the voice of the industrialists, who together with the military were the real rulers of prewar Japan, there is not only grave danger of a repetition of such behind-the-scenes control of a facade of democracy but also danger of undemocratic popular reaction to such control.

There are moral as well as political reasons for opposing the proposed treaty. In December 1951 a group of Japanese Christians said to John Foster Dulles: "No country can maintain its existence for long unless its foundation is based on moral principles. If you approve disarmament today and urge rearmament tomorrow, you will appear to differ in no way from Communists who say white today and black tomorrow."

By this treaty the United States will have repudiated finally the Japanese surrender agreement and the Far Eastern Commission's 1947 agreement that Japan will never be allowed to rearm.

What are the alternatives to this treaty? The major one is total world disarmament along lines proposed by Premier Khrushchev and British Foreign Secretary Selwyn Lloyd. If we are planning to enter serious negotiations for disarmament, we should at least postpone accepting this treaty which moves in the opposite direction.

The second alternative is to negotiate a withdrawal of our forces from Japan and, in conjunction with negotiations to recognize China, turn the preservation of peace in the Orient over to the United Nations.

The third possibility for us to pursue is to spend what we now spend on military measures in Asia on building up the economy of Japan and other Asian countries. If we can assist Asians in eliminating illiteracy, raising the standards of living and reducing the social tensions, we can thereby encourage democracy and at the same time make totalitarianism of the left or right far less likely.

(Signed by 400 ministers.)

ANNOUNCEMENT RE INCOME TAX TREATMENT OF NONFUNDABLE CAPITAL CONTRIBUTIONS

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. McCORMACK. Mr. Speaker, I desire to announce that tomorrow the gentleman from Arkansas [Mr. MILLS], chairman of the Committee on Ways and Means, will ask unanimous consent to take up the bill H.R. 7885, a bill relating to the income tax treatment of nonfundable capital contributions to the Federal National Mortgage Association. This is a bill which passed both branches of the Congress and was recently vetoed by the President because of a retroactive provision.

As I understand, the bill to be called up tomorrow meets the objections of the President.

Mr. MILLS. Mr. Speaker, will the gentleman yield?

Mr. McCORMACK. I yield.

Mr. MILLS. Yes; it does. For the full information of the membership, the bill to which the majority leader has referred is exactly the bill which passed the House unaltered. The bill was amended in the Senate retroactively, and it was the retroactive feature of the bill we were told that brought about the veto.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. McCORMACK. I yield.

Mr. GROSS. I assume the minority members on this side have been apprised of the action contemplated?

Mr. MILLS. Yes; that is true.

Mr. McCORMACK. I wanted to make the announcement so the Members would be advised.

A GERMANY UNITED IN FREEDOM—GEORGE MEANY COMMEMORATES THE JUNE 17, 1953, UPRISING

The SPEAKER. Under previous order of the House, the gentleman from Wisconsin [Mr. REUSS] is recognized for 10 minutes.

Mr. REUSS. Mr. Speaker, tonight over the ABC radio network, George Meany, president of the AFL–CIO, makes a nationwide radio address on "The Future of Germany—Free or Communist." Mr. Meany's speech occurs on the eve of the seventh anniversary of the June 17, 1953, uprising in East Germany.

I include the text of Mr. Meany's inspiring speech:

Tonight, the eve of June 17, we commemorate a historic event which still inspires the free world.

Seven years ago tomorrow, June 17, 1953, the working people of East Germany threw down their tools in a spontaneous revolt against their Communist oppressors. For days and weaks, these civilian workers, unarmed and unorganized, fought with their bare hands against the overwhelming power of the Soviet Army of Occupation. It was a desperate and unequal struggle. The uprising was crushed.

They proved—these unknown soldiers from the factories of East Germany—that the Communists had to rule by force because they could not command the willing allegiance of the people.

They proved that the love of liberty cannot be stamped out by fear or force or terror.

They proved that as long as people are ready to die for a great cause, that cause will never die.

The Soviet dictatorship still refuses to loosen its stifling grip on East Germany. Clearly, the Communists still are unwilling to let the people of East Germany and West Germany decide for themselves, in free elections, the future status of their country. Until such a decision is made, the world will continue to exist on the razor edge between peace and war.

I remember the stirring events of June 1953 very clearly because I happened to be in Europe at the time, attending the world congress of the International Confederation of Free Trade Unions in Stockholm. All of us at that conference were deeply moved by the plight of our trade union brothers in East Germany. We did what we could to send food and medical supplies to the survivors and to rescue some of those doomed to execution.

A few of the refugees were brought to Stockholm and gave us eyewitness reports on the reign of terror to which they had been subjected. They told us a story of wholesale exploitation by the Communist regime, of work speedups and stretchouts beyond the limits of human endurance. Human beings were treated with less consideration than machines.

Yes, the Red army smothered the uprising. But it could not erase the stain on the Communist record. The evil nature of the Soviet dictatorship was exposed for all the world to see. Here was the regime that promised to create a worker's paradise, stripped of its hypocritical camouflage and revealed as the arch enemy of free workers.

Throughout the world, the forces of freedom gained new inspiration from the heroic stand of the workers of East Germany. They were the first to revolt. The workers in Poland and Hungary were next.

Even in Soviet Russia itself, in the land under the heaviest yoke of Communist despotism, there are multiplying signs of disaffection. Among students and intellectuals a more critical attitude is stirring. Discontent again grips the peasantry. Industrial workers are openly manifesting impatience with pitifully low wages and heavier workloads. They are fed up with wretched housing conditions and the continued lack of consumer goods. In this land where strikes are outlawed and the merest protest by workers is punished severely, an unheard of thing is happening. Strikes are taking place. Recently, Soviet army tanks had to break up a strike of the Karaganda metalworkers.

The puppet regime, which insolently calls itself the German Democratic Republic, is encountering serious impediments in its drive to collectivize the East German farmers. The farmers know that when the Communists say collectivization they mean slavery and they want no part of it. The flood of refugees is steadily mounting—7,500 in January; 9,800 in February; over 13,000 in March and even a higher number estimated in April.

Khrushchev's explosive behavior in Paris must be viewed against this background to become even faintly comprehensible.

It must be remembered that the summit meeting was Khrushchev's own brainchild. He worked tirelessly for over a year to bring it about. At first he tried threats and ultimatums. He demanded that allied occupation forces depart from West Berlin before a specified deadline or face grave consequences. When that didn't work, he resorted to more subtle strategy. He negotiated with allied leaders. He flexed Soviet Russia's military muscles.

The Soviet dictator finally persuaded President Eisenhower to agree to a summit meeting. This was a clear-cut victory for Khrushchev. Why did he suddenly abandon it? He obviously had counted upon intimidating and humbling the free world by Soviet superiority in space and intercontinental weapons. He expected offers of appeasement as a result. When he discovered that the allied leaders were standing firm on both the German question and disarmament, he deliberately dynamited the conference.

Khrushchev's rage over the U–2 incident failed to carry conviction, especially when he boasted that he knew about such overflights at the time of his visit to America last year and never uttered a word of protest. The Soviet dictator declared the United States was due for a jolt and that he jolted us. As a matter of fact, he did. He jolted us right out of our national complacency. He made it crystal clear that all his talk of peace and friendship and coexistence was an elaborate propaganda trap.

Today there can be no more illusions in this country or among our allies about the real purpose of the Soviet Union. That purpose is worldwide domination. It is unchangeable. No matter what they say, the Communists will not deviate from this overriding objective. They are determined to achieve it, whether by war, by subversion, or by our default.

Once we face up to this harsh truth, we can prepare to cope with it.

There are encouraging signs of a sharpened awareness of the real nature of the Communist threat among our friends abroad.

In England, the powerful National Union of General and Municipal Workers has rejected a proposal for unilateral disarmament of Great Britain. Liberty-loving people everywhere salute the British Labor Party leader, Mr. Hugh Gaitskell, for his intensified efforts to strengthen NATO and broaden its scope of operations. We agree with him that NATO should become an effective instrument for international democratic progress in the economic and political as well as military fields.

In West Germany, the Social Democratic Party is moving toward joint efforts with Chancellor Adenauer's party in support of a common goal: to rally the full strength of the German people in behalf of their national reunification in freedom. The AFL–CIO stands shoulder to shoulder with its colleagues in the German Federation of Labor, in their efforts to build Germany into a bulwark of freedom, peace, and social justice.

As I emphasized earlier, Germany provides the key to world peace. Soviet Russia under Khrushchev, as under his predecessors, Lenin and Stalin, is determined to absorb all of Germany with its millions of skilled workers and its tremendous industrial wealth.

That is why the Communists beat down the East German revolution so ruthlessly 7 years ago. That is why Stalin attempted to force us out of Berlin in 1948, only to be checkmated by the American airlift. That is why Khrushchev today is insisting that the Allied nations withdraw the troops that have safeguarded the freedom and security of the people of West Berlin.

There can be no such retreat. We are in honor, bound to protect West Berlin and preserve the integrity of the West German Republic. To yield to Soviet pressure on these issues would be worse than appeasement. It would mean surrender.

The free world believes that there can be a peaceful solution of the German question. We have been willing and we still are willing to negotate such a settlement. It is not the province of Soviet Russia to dictate the terms, nor is the decision up to us. The German people themselves must be accorded the opportunity to determine their own destiny through free elections supervised by the United Nations. Soviet Russia, which is such an ardent advocate of self-determination in Africa and Asia, cannot consistently deny the same basic right to the German people.

This is the road to peace. Whether Soviet Russia will eventually choose to go along, only time will tell. Let us use the time we have to strengthen the free world in every possible way for the crucial test. If we do this and if we hold true to the spirit of the German workers who died for freedom 7 years ago, we need not fear the outcome.

Mr. Speaker, I believe that George Meany has expressed both the hopes and the determination of the people of the United States concerning the future of Germany. The people of the United States do not intend to yield up West Berlin to Communist domination. They do not intend to place their seal of approval on the present situation in East Germany, where a puppet government rules with the aid of Russian troops.

Above all else, we in the United States look to the day when human rights will be respected throughout all of Germany—the right to self-determination, to freedom of speech and press, to free elections, and the rest.

Of the two ideas involved in the concept of reunification in freedom, it is the idea of freedom that is most important.

The collapse of the summit conference, and the heating up of the cold war, tell us that the road ahead will be a rough one. It is here that George Meany offers us a sound guidepost when he says:

The free world believes that there can be a peaceful solution of the German question. We have been willing and we still are willing to negotiate such a settlement.

Of course, there must be a "peaceful solution of the German question." There must be some ray of light through the clouds, no matter how distant.

It will be the task of the Western democracies—the United States, France, Great Britain, West Germany, and the rest—to evolve and to table before the bar of world opinion the ingredients of such a "peaceful solution."

We know what some of these ingredients are. There can be no solution for Berlin without a solution for Germany, and no solution for Germany without a solution for Middle Europe. A viable strategic order for Middle Europe depends on general progress toward world disarmament between the great powers, linked phase by phase with disarmament in Middle Europe. A viable political order for Middle Europe must have as its cornerstone the meaningful protection of human rights as the best—and indeed the only—guarantee against totalitarianism from any quarter. A viable economic order for Middle Europe depends upon the extension to it of the kind of cooperative economic institutions which are now developing in the West.

June 17 can signal a new determination never to forget the spirit of German freedom.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to Mr. Bow (at the request of Mr. BETTS), from June 16 to June 18, on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. HEMPHILL, for 30 minutes, on June 20.

Mr. REUSS, for 10 minutes, today, and to revise and extend his remarks.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the CONGRESSIONAL RECORD, or to revise and extend remarks, was granted to:

Mr. BOLAND and to include extraneous matter.

Mr. BARR.

Mr. DORN of South Carolina and to include extraneous matter.

Mr. ADAIR and to include extraneous matter.

Mr. BERRY and to include extraneous matter.

Mr. SCHENCK and to include extraneous matter.

Mr. DENT.

Mr. DERWINSKI.

Mr. LINDSAY.

Mr. GALLAGHER, to revise and extend the remarks he made in the Committee of the Whole today and include extraneous matter.

Mrs. CHURCH.

(At the request of Mr. CURTIN and to include extraneous matter, the following:)

Mr. VAN ZANDT in two instances.

Mr. CANFIELD.

Mr. PELLY.

(At the request of Mr. MCCORMACK and to include extraneous matter the following:)

Mr. FEIGHAN.

SENATE JOINT RESOLUTION REFERRED

A joint resolution of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S.J. Res. 170. Joint resolution to authorize the participation in an international convention of representative citizens from the North Atlantic Treaty nations to examine how greater political and economic cooperation among their peoples may be promoted, to provide for the appointment United States delegates to such convention, and for other purposes; to the Committee on Foreign Affairs.

ENROLLED BILLS SIGNED

Mr. BURLESON, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a bill of the House of the following title, which was thereupon signed by the Speaker:

H.R. 12117. An act making appropriations for the Department of Agriculture and Farm Credit Administration for the fiscal year ending June 30, 1961, and for other purposes.

BILLS PRESENTED TO THE PRESIDENT

Mr. BURLESON, from the Committee on House Administration, reported that that committee did on June 15, 1960, deliver to the White House for presentation to the President, for his approval, bills of the House of the following titles:

H.R. 10000. An act to amend further certain provisions of the District of Columbia tax laws relating to overpayments and refunds of taxes erroneously collected;

H.R. 10183. An act to amend the Fire and Casualty Act regulating the business of fire, marine, and casualty insurance in the District of Columbia;

H.R. 10684. An act to amend sections 1 and 5b of the Life Insurance Act for the District of Columbia; and

H.R. 10761. An act to provide for the representation of indigents in judicial proceedings in the District of Columbia.

ADJOURNMENT

Mr. McCORMACK. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to.

Accordingly (at 4 o'clock and 58 minutes p.m.) the House, pursuant to its previous order, adjourned until tomorrow, Friday, June 17, 1960, at 11 o'clock a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2270. A letter from the Under Secretary of Commerce, transmitting a draft of proposed legislation entitled "A bill to authorize an additional Assistant Secretary of Commerce"; to the Committee on Interstate and Foreign Commerce.

2271. A letter from the Administrative Assistant Secretary of the Interior, transmitting a report covering all tort claims paid by the Department in the fiscal year 1959, pursuant to the provisions of the Federal Tort Claims Act (28 U.S.C., sec. 2673); to the Committee on the Judiciary.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. MILLS: Committee of conference. H.R. 9322. A bill to make permanent the existing suspension of duties on certain coarse wool (Rept. No. 1883). Ordered to be printed.

Mr. MILLS: Committee of conference. H.R. 9862. A bill to continue for 2 years the existing suspension of duties on certain lathes used for shoe last roughing or for shoe last finishing (Rept. No. 1884). Ordered to be printed.

Mr. MILLS: Committee of conference. H.R. 9881. A bill to extend for 2 years the existing provisions of law relating to the free importation of personal and household effects brought into the United States under Government orders (Rept. No. 1885). Ordered to be printed.

Mr. BONNER: Committee on Merchant Marine and Fisheries. S. 2669. An act to extend the period of exemption from inspection under the provisions of section 4426 of the Revised Statutes granted certain small vessels carrying freight to and from places on the inland waters of southeastern Alaska; with amendment (Rept. No. 1886). Referred to the Committee of the Whole House on the State of the Union.

Mr. BONNER: Committee on Merchant Marine and Fisheries. S. 3189. An act to further amend the shipping laws to prohibit operation in the coastwise trade of a rebuilt vessel unless the entire rebuilding is effected within the United States, and for other purposes; without amendment (Rept. No. 1887). Referred to the Committee of the Whole House on the State of the Union.

Mr. HARRIS: Committee on Interstate and Foreign Commerce. S. 1886. An act to amend the Communications Act of 1934 with respect to certain rebroadcasting activities; with amendment (Rept. No. 1888). Referred to the Committee of the Whole House on the State of the Union.

Mr. HAYS: Committee on Foreign Affairs. H.R. 12547. A bill to amend the Foreign Service Act of 1946, as amended, and for other purposes; with amendment (Rept. No. 1890). Referred to the Committee of the Whole House on the State of the Union.

Mr. O'NEILL: Committee on Rules. House Resolution 560. Resolution for consideration of H.R. 8860, a bill to stabilize the mining of lead and zinc by small domestice producers on public, Indian, and other lands, and for other purposes; without amendment (Rept. No. 1891). Referred to the House Calendar.

Mr. TRIMBLE: Committee on Rules. House Resolution 561. Resolution for consideration of H.R. 9996, a bill to amend section 402 of the Federal Property and Administrative Services Act of 1949, to prescribe procedures to insure that foreign excess property which is disposed of overseas will not be imported into the United States to the injury of the economy of this country; without amendment (Rept. No. 1892). Referred to the House Calendar.

Mr. MADDEN: Committee on Rules. House Resolution 562. Resolution for consideration of H.R. 12580, a bill to extend and

improve coverage under the Federal old-age, survivors, and disability insurance system and to remove hardships and inequities, improve the financing of the trust funds, and provide disability benefits to additional individuals under such system; to provide grants to States for medical care for aged individuals of low income; to amend the public assistance and maternal and child welfare provisions of the Social Security Act; to improve the unemployment compensation provisions of such act; and for other purposes; without amendment (Rept. No. 1893). Referred to the House Calendar.

Mr. O'NEILL: Committee on Rules. House Resolution 563. Resolution for consideration of S. 1898, an act to amend the Communications Act of 1934 with respect to the procedure in obtaining a license and for rehearings under such act; without amendment (Rept. No. 1894). Referred to the House Calendar.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. WALTER: Committee on the Judiciary. S. 2822. An act for the relief of Low Wing Quey (Kwai); without amendment (Rept. No. 1889). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BARR:

H.R. 12684. A bill to prohibit the use in commerce of motor vehicles not equipped with certain automatic warning signal and running light devices; to the Committee on Interstate and Foreign Commerce.

By Mr. BOSCH:

H.R. 12685. A bill relating to the application of the manufacturers excise tax on electric light bulbs in the case of sets or strings of such bulbs; to the Committee on Ways and Means.

By Mr. DORN of New York:

H.R. 12686. A bill to amend the Shipping Act, 1916, to confer authority on the Federal Maritime Board to disapprove agreements amongst common carriers by water where the rate charged thereunder on imports is noncompensatory and substantially contributes to the underselling of American manufacturers; to the Committee on Merchant Marine and Fisheries.

By Mr. DOWDY (by request):

H.R. 12687. A bill to authorize the Board of Parole of the District of Columbia to discharge a parolee from supervision prior to the expiration of the maximum term or terms for which he was sentenced; to the Committee on the District of Columbia.

H.R. 12688. A bill to provide for the establishment of a Juvenile Division within or in connection with the District of Columbia Youth Correctional Center, and to authorize the judge of the Juvenile Court of the District of Columbia to commit to such Juvenile Division, subject to the provisions of the Juvenile Court Act, children 15 years of age or older; to the Committee on the District of Columbia.

By Mr. FORAND:

H.R. 12689. A bill authorizing the Rhode Island Turnpike and Bridge Authority to combine for financing purposes the bridge across the west passage of Narragansett Bay with the Newport Bridge and any other project acquired or constructed by said authority; to the Committee on Public Works.

By Mr. IKARD:

H.R. 12690. A bill to amend subchapter S of chapter 1 of the Internal Revenue Code of 1954; to the Committee on Ways and Means.

By Mr. KING of California:

H.R. 12691. A bill relating to the determination of stock ownership of personal holding companies; to the Committee on Ways and Means.

By Mr. McDOWELL:

H.R. 12692. A bill to require full disclosure of certain expenditures of Government and counterpart funds by Members of Congress, and for other purposes; to the Committee on House Administration.

H.R. 12693. A bill to provide for the appointment by the Board of Commissioners of the District of Columbia of the appointive members of the National Capital Planning Commission, and for other purposes; to the Committee on the District of Columbia.

By Mr. DULSKI:

H.R. 12694. A bill to provide for the issuance of a series of special postage stamps in commemoration of flags of particular significance in the history of the United States of America; to the Committee on Post Office and Civil Service.

MEMORIALS

Under clause 4 of rule XXII,

The SPEAKER presented a memorial of the Legislature of the Virgin Islands memorializing the President and the Congress of the United States to authorize the Department of Defense to exchange a certain tract of land at John Brewer's Bay, St. Thomas, V.I., with the Government of the Virgin Islands, for a tract of land at Estate Bordeaux, St. Thomas, V.I., which was referred to the Committee on Armed Services.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. GRANT:

H.R. 12695. A bill to authorize the Secretary of Agriculture to grant an easement over certain lands to the trustees of the Cincinnati Southern Railway, their successors and assigns; to the Committee on Agriculture.

By Mr. METCALF:

H.R. 12696. A bill for the relief of Dr. Hermino Cabrera and his wife, Florea A. Cabrera; to the Committee on the Judiciary.

By Mr. MILLIKEN:

H.R. 12697. A bill for the relief of George Paraskeropoulous; to the Committee on the Judiciary.

By Mr. POWELL:

H.R. 12698. A bill for the relief of Peregrina E. Legayada; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

496. By Mr. CANFIELD: Petition of 650 residents of Passaic County, N.J., urging the enactment of the Forand bill, H.R. 4770; to the Committee on Ways and Means.

497. By Mr. SCHENCK: Petition of Burley Cottle and others, relative to a pension for World War I veterans; to the Committee on Veterans' Affairs.

498. By the SPEAKER: Petition of I. S. Svischov, Russian Anti-Communist Committee of Los Angeles, Los Angeles, Calif., relative to proposing certain amendments to Public Law 86–90 concerning the Captive Nations Week; to the Committee on the Judiciary.

EXTENSIONS OF REMARKS

Memorial Day in Hawaii a Soul-Stirring Occasion

EXTENSION OF REMARKS

OF

HON. E. ROSS ADAIR

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 16, 1960

Mr. ADAIR. Mr. Speaker, five members of the House Veterans' Affairs Committee, led by Chairman OLIN E. TEAGUE, had the privilege of spending the 1960 Memorial Day weekend in Hawaii for the threefold purpose of: (a) Holding hearings and meeting with various veterans' groups in our 50th State; (b) representing the Congress at the dedication of the beautiful new carillon presented by the American Veterans of World War II and Korea at the site of the Arizona disaster in Pearl Harbor, and (c) attending the Memorial Day services at the Punchbowl National Cemetery in Honolulu.

The last of these was an occasion which everyone present will remember as long as he lives and, in beauty and in depth of feeling, it recalled the colorful patriotic observances which used to be so much a part of American life and which have, unfortunately, fallen into comparative disuse in recent years.

The Punchbowl National Cemetery has been created in a huge, extinct volcanic crater overlooking the city of Honolulu. In it are buried almost 17,000 men and women of all races who fought to preserve our freedom, and the freedom of all men of good will everywhere on earth, during the hostilities in the Pacific theater.

The magnificent resting place for the brave which has been created here was a breathtaking sight on Memorial Day. On each of the 17,000 graves a small American flag was fluttering in the soft Hawaiian breeze, and on each was a lei of orchids which had been put together with loving care and placed in position by Hawaiian schoolchildren. The ceremonies, in which all branches of the armed services and all veterans groups participated, were brief and extremely moving. The principal speaker on this occasion was Mayor Neal S. Blaisdell, of Honolulu, and the chairman of the

proceedings was Spark M. Matsunaga, a leader of the 100 Club, a prominent Hawaiian veterans group.

World War II is a vivid and living memory in our 50th State and Memorial Day is an occasion of deep personal meaning. None of the visiting delegation will ever forget the sight of, literally, tens of thousands of Hawaiian citizens climbing the hill to the Punchbowl Cemetery in car or on foot, carrying their own flowers to lay upon the graves of the heroic dead. And, I am sure, that each of us felt a twinge of regret and remorse that here on the mainland the emphasis at Memorial Day has gradually been placed more and more on the holiday aspects of the occasion rather than on the sacred memories which it should arouse in every American heart.

Previous to these rites, the congressional group attended the ceremonies at the site of the *Arizona* disaster. This was indeed an occasion for heartbreak and deep thought. The platform on which we stood was erected upon a turret of the sunken battleship in which 1,102 American boys lie forever entombed. The outlines of the noble ship are still clearly discernible beneath the blue, translucent Hawaiian waters. Indeed, on a beautiful May morning such as was this Memorial Day at Pearl Harbor, it was difficult, if not impossible, to envisage the horror and the brutal savagery which ravaged this Pacific paradise on December 7, 1941, and which plunged the United States into 4½ years of global warfare.

The AMVETS carillon represents a first step in the construction of a magnificent national memorial at the site of the disaster. In presenting the carillon to the U.S. Government, Harold T. Berc, national commander of the AMVETS summed up the feelings of all veterans everywhere in the following address:

DEDICATION OF AMVETS MEMORIAL CARILLON OF THE PACIFIC, MAY 30, 1960

(By Harold T. Berc, national commander, AMVETS)

Men of the *Arizona*—we in AMVETS have come to memorialize your sacrifice on that infamous 7th day of December 1941. We commit ourselves to this act by the dedication today, aboard this gallant vessel, of a carillon. We devote ourselves to the language of its inscription, which says, "While these bells toll, safely rest; freedom lives."

In your moment of truth on that gray December morning about 19 years ago, you had already marked yourselves with the honor of serving your Nation's flag. But the swiftness of the enemy's assault prevented you from knowing the course of history which would flow from that day of surprise.

You could not know that your day marked the beginnings of World War II, and that 12 million brothers of yours would rise up to defend against the lust of Tojo, the avarice of Mussolini, and the madness of Hitler—that thousands of them would follow your devotion by being shattered in the skies, sunk below the seven seas, or lost on battlefields around the world—that thousands more would be returned to hospitals around our Nation, wracked in mind or broken in body, and that millions more of us on whom God's grace was shed would return with determination to atone your sacrifice—not alone by dedicating ourselves to concern for fellow veterans, their widows and orphans, but also to the highest acts of citizenship which would insure a healthful nation working toward a world of peace with justice.

You could not know, men of the *Arizona* that the days following World War II would be marked by the unlocking of the secrets of atomic energy revealing a force which could be either effectively used to accomplish men's destruction or used to bring the well-being of the peoples of the world to a state of peace and material good.

No, you could not know that the powerful nations of the world would gather in San Francisco for the organization of a body called the United Nations which would, for all time, commit the peoples of the world to an order of life which would minimize nationalistic abberations and provide a forum for help in bringing colonial peoples of the world into a day of independence, and which would cooperate in stamping out disease, in improving economic development, in advancing educational opportunity, and in making the elements of adequate food and shelter available to all.

You could not know that the Soviet Union which participated in the creation of this model tool, would fear and distrust the honest directives of that forum and would weaken its purposes by obstructionist vetoes, by belligerent declarations, by an inordinate hardness in provoking an airlift at Berlin, and finally by the sponsorship of a limited war technique resulting in the Korean war * * * that the substantial part of the world would unite for peace and under U.S. moral leadership would resist this aggression by piecemeal technique through the fielding of a U.N. military force. Nor would you know that Soviet Union political opportunism would cause her to inject herself into Hungary for the purpose of suppressing the free will of its people and then to exceed this cynical intrusion by an even more cynical refusal to accept an impartial inspection of the Hungarian scene by a properly constituted committee of the U.N.

You could not know that the Soviet Union would pursue a course of purposeful espionage, and by industrial advance bring itself to a position of high nuclear war potential, the effect of which has been to commit the world to life on a diplomatic tightrope of terror.

And so we find ourselves on this Memorial Day remembering your sacrifice in the wake of surprise and concerned that from such a repeated surprise, in this day of nuclear power recovery potential would be minimal.

We do not raise for you the detail of the events of today. But we do say that the act of overflight by the U–2 which caused such violent Soviet verbal reaction was a better reason for getting on with the summit conference than for torpedoing its potential. The cancellation of that conference was not an assault on the United States alone but on all the peoples of the world who looked hopefully to the summit conference as a means of controlling the dangerously mounting tensions of the world.

From the White House we have today received the President's Memorial Day Proclamation in which he asks all Americans to make this a day of prayer for permanent peace. We now make this prayer on this hallowed site and we let you know that we bear witness to your sacrifice by dedicating ourselves to the essence of the words "Eternal vigilance is the price of liberty," and we expect to perfect that dedication by insuring that our Nation's strength continue to be second to none in the world.

At the same time, the essential truths of our aspirations for a world of peace with freedom will continue to be sought by us through every honorable means available—not as a matter of lip service, but as a matter of reality; that we seek this world of peace with freedom not alone for ourselves, but for all those people of the world who look hopefully toward this goal. We declare in ringing terms our decision to stand fast to the principle that all such peoples be free of dictatorship, free of oppression, and free of attack because of race, color, or creed. The terrible lesson of surprise is vividly portrayed by your mighty *Arizona*. But for all time, rather than let this be a symbol of tragedy, we shall make it stand as a signal of freedom through vigilance. And it is with this lesson in mind that AMVETS formally tender this carillon.

Mr. Speaker, before laying a wreath on the site in the name of the Congress of the United States, Chairman TEAGUE of the Veterans' Affairs Committee expressed himself in the following remarks which, I feel, should be read by every American:

SPEECH BY HON. OLIN E. TEAGUE—DEDICATION OF THE AMVETS MEMORIAL CARILLON AT PEARL HARBOR, MEMORIAL DAY, MAY 30, 1960

This is really an occasion—not for speech, but for silence. It is an occasion for quiet memories, for prayer, for thanksgiving, and for great resolve.

Here, as we dedicate this carillon as a memorial to those 1,102 Americans who lie forever entombed within the shattered hull of the U.S.S. *Arizona*—we must be impressed by the fitness that lies in the fact that this has been made possible by the American Veterans of World War II and Korea. For the AMVETS are typically and completely a product of World War II—and, among all the battlefields and memorials of the world, Pearl Harbor is the most representative of the same war that gave the AMVETS birth.

I single out the AMVETS because of their part in making this memorial possible. However, the thoughtfulness and patriotism which motivated this gesture are typical of all our veterans' organizations. In my opinion, the growth and development of our veterans' groups has been one of the healthiest developments of 20th century America and we all owe a great deal to each and every one of them.

Pearl Harbor is unique. Few nations care to memorialize their military defeats. The French do not keep Waterloo green in the memories of their people; the English have no special reverence for Yorktown and Saratoga; Mexico does not glory in San Jacinto; the Spanish do not sing of the Armada.

But Pearl Harbor is different. It represents a physical defeat but a moral victory. It symbolizes the ability of free men to rise and conquer the forces of oppression, even when they have been crushed to earth.

Pearl Harbor will always serve as a reminder to future generations of the moral differences between freedom and totalitarianism. It will always serve as a perpetual reproach to all who would be slavemasters—and a testimonial to the invincibility of the human spirit.

And Pearl Harbor serves another essential purpose as a reminder that this must never happen again.

In all the history of humankind there has never been an instance in which freedom has been lost in a single day.

The positive act of snatching a people's freedom away from them may have been of short duration, but always the period of apathy and carelessness, of laziness, of complacency, and even of moral corrosion which made the act possible has been long and protracted.

This is something we must always remember. As we stand here today we are troubled—deeply concerned—by the reverberations resulting from the capture of the U–2. Certainly the conditions which surrounded this event are unfortunate in the extreme since they have given the Soviet demagogues a useful implement of propaganda. But we must remember that as long as we have for an international antagonist a closed society, such as that of Soviet Russia,

then espionage must be a way of life, a necessity for national survival. If we had been as vigilant in 1941—if we had known as much about what was going on in Japan as we know about Russia in 1960—we would not be mourning our heroic dead here today.

For the free world can never afford another Pearl Harbor. If we are ever again caught so unprepared there will be no ceremonies to be conducted by the survivors—there will be no buglers, no tolling of bells, no flags, no memorial wreaths—for there will be no survivors. There will only be the long silence of destruction and universal death.

I have just one thought to add before the bells of this carillon ring out for the first time over these historic waters. We mourn, with aching hearts, the 1,102 Americans who lie entombed before us—young men who died in a war before they even knew a war existed. We mourn all the others who have died in this and in every other war in which we have been engaged—those who lie, as these do, with an ocean across their hearts—those who died in mudbank or cloudbank or who lie with the jungle roots entwined about their feet in the green hells in which they were forced to fight.

But mourning is not enough. Not nearly enough.

A generation of Americans gave their noondays to us so that we might enjoy a handful of tomorrows. They have made us the trustees of their sacrifice, the legatees of their suffering.

They have been most generous.

It is not sufficient to mourn them. They will be satisfied only if we can give them assurance that their sacrifice has not been in vain, and that we are worthy of their sacrifice.

This calls for self-dedication—for a firming-up of our faith—for a regrouping of our moral forces. We are all faced with troubled years ahead. The maintenance of peace is going to call for many things from many people—courage, unselfishness, stamina, sacrifice, wisdom. The challenge is enormous now and it will grow greater. We must meet that challenge every day of our lives or we shall be overwhelmed by it.

So—when these bells throw their gentle message across the harbor today—let us rededicate ourselves to this cause of maintaining liberty—the cause for which these 1,102 Americans gave up their lives. Let us swear in our hearts that we shall devote our lives—each in his own way—toward making certain that liberty—that torn and tattered document, signed by Christ and His angels and a most impressive list of sponsors, great and small, shall never be committed to the flames.

Thank you and God bless you.

As I have said, Mr. Speaker, Memorial Day 1960 in Hawaii was an occasion to remember. I wish every Member of Congress and, indeed, every American had the opportunity to attend these dual ceremonies.

The Mexican Labor Program

EXTENSION OF REMARKS
OF
HON. GORDON CANFIELD
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES

Thursday, June 16, 1960

Mr. CANFIELD. Mr. Speaker, I present to the House a letter that I received today from Labor Secretary James P. Mitchell regarding H.R. 12176, to extend the Mexican labor program:

U.S. DEPARTMENT OF LABOR,
Washington, June 15, 1960.

Hon. GORDON CANFIELD,
House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN CANFIELD: I am informed that a vote may soon come up on a bill to extend the Mexican labor program, commonly referred to as Public Law 78. The bill for this purpose is H.R. 12176. I understand also that some question may exist as to the position of the Department of Labor and of the administration with respect to this bill.

In order to dispel any possible uncertainty on this score, I am writing to make it clear that the administration and the Department of Labor are opposed to passage of H.R. 12176. After mature consideration, the administration has concluded that improvements in the Mexican labor program are necessary, and that legislation should be delayed until the administration's proposals for improvement can be made available. The highly controversial problems in this field may be made even more difficult by undue haste in consideration and decision.

Since the existing law does not expire until June 30, 1961, there will be ample time for consideration of the administration's recommendations in the next session of the Congress. Please let me know of any further assistance that I may be able to offer.

Sincerely yours,

JAMES P. MITCHELL,
Secretary of Labor.

Tabulation of Annual Public Opinion Poll

EXTENSION OF REMARKS
OF
HON. MARGUERITE STITT CHURCH
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES

Thursday, June 16, 1960

Mrs. CHURCH. Mr. Speaker, at the request of many Members, I am happy to place in the CONGRESSIONAL RECORD today the tabulation of answers obtained through a scientific sampling of the current opinions within the 13th District of Illinois on 31 leading issues, as expressed in my 1960 annual poll.

Signed returns, representing a percentage of response of 17.4 percent, gave the following results:

Annual public opinion poll tabulation from Marguerite Stitt Church, Representative in Congress, 13th District, Illinois

[In percent]

	Yes	No	No opinion
1. Is it essential to balance the national budget?	81.2	13.8	5.0
2. If a budget surplus develops next year, do you prefer:			
(a) Payment on the national debt?	73.6	6.5	19.9
(b) Tax decrease?	29.5	23.9	46.6
3. If a budget deficit develops, do you prefer:			
(a) Tax increase?	15.5	29.5	55.0
(b) Increase in the national debt (now $290 billion)?	6.2	33.1	60.7
(c) Elimination of nonvital Government programs? (If "Yes," what programs?)	73.6	2.7	18.7
4. Do you favor gradual transfer back to States and local communities of complete responsibility for local needs (education, slum clearance, sewage treatment plants, etc.) assuming a transfer of some tax sources from the Federal Government?	78.0	16.7	5.3
5. To meet education needs, do you approve:			
(a) Continued reliance on local and State support of education?	74.0	9.0	17.0
(b) Federal grants to States for school construction?	25.6	39.2	35.2
(c) Federal grants to States for teachers' salaries?	17.6	45.9	36.5
(d) Federal aid for scholarships?	32.3	31.9	35.8
(e) Providing some method, perhaps through tax benefits, for individuals and business to finance expanded education?	50.0	16.8	32.7
6. If new programs increase Government spending, do you prefer:			
(a) Increase in personal income and corporation taxes?	24.0	38.6	37.4
(b) New Federal sales or manufacturers' tax?	43.3	29.1	27.6
7. Where economic changes cause less industrial activity and unemployment, do you prefer:			
(a) Federal funds to solve the problem (aid to depressed areas)?	25.3	34.5	40.2
(b) State and local efforts?	74.0	7.2	18.8
8. Would you prefer medical and hospital care for the aged through:			
(a) Private, low-cost medical and hospital insurance programs?	69.0	9.7	21.3
(b) Increased social security taxes on employees and employers to cover social security beneficiaries only?	14.6	42.9	42.5
(c) Federally supported voluntary medical insurance program?	22.2	37.2	40.6
9. With Government investment in farm commodities now over $9,000,000,000 and storage and other expenses approximately $1,000,000,000 each year, should price supports and controls be:			
(a) Increased?	2.4	39.8	57.8
(b) Decreased?	44.8	11.5	43.7
(c) Unchanged?	5.0	30.0	65.0
(d) Abolished?	55.3	11.9	32.8
10. Would you favor a plan to use surplus crops instead of cash to pay farmers for taking land out of production?	65.9	12.5	21.6
11. Should cooperatives be taxed on same basis as other businesses?	78.7	8.7	12.6
12. Should the interest rate on Government loans to REA cooperatives be increased from 2 percent to the higher rate paid on Government bonds?	64.3	9.9	25.8
13. To provide for adequate defense should we:			
(a) Attempt to match the Russians in every phase of defense, regardless of cost?	15.0	45.9	39.1
(b) Continue our present level of defense spending for a balanced deterrent program?	58.5	10.7	30.8
(c) Make every effort to reach a workable agreement with the Russians for disarmament?	66.3	9.5	24.2
14. Do you believe sufficient emphasis is placed on our missile and space programs?	64.3	22.5	13.2
15. Should United States transfer nuclear weapons and material to friendly nations?	25.0	58.8	16.2
16. Without guarantee of a reliable inspection system, should we permanently abandon atomic tests?	11.4	81.7	6.9
17. Do you approve a firm stand on Berlin at the summit conference?	88.6	4.9	6.5
18. Do you favor the repeal of the Connally amendment, which reserves to the United States the right to decide whether issues brought before the World Court are essentially within our domestic jurisdiction?	28.1	44.1	27.8
19. Do you favor diplomatic recognition by the United States of Communist China?	26.8	62.1	11.1
20. Do you favor an increase in repayable U.S. loans, rather than grants, for foreign aid?	84.5	6.7	8.8
21. Do you favor U.S. aid to Communist-satellite countries?	11.6	77.7	10.7
22. Should the buy America policy, adopted by the Development Loan Fund, be extended to other U.S. foreign aid programs?	46.1	18.6	35.3

Annual public opinion poll tabulation from Marguerite Stitt Church, Representative in Congress, 13th District, Illinois—Continued

[In percent]

	Yes	No	No opinion
23. Should the differential in wages and working conditions between this Nation and foreign countries be taken into account in formulating our foreign trade regulations and policies?	72.0	14.3	13.7
24. Should Congress change the Sugar Act under which Cuban sugar is now imported at above world market prices, so as to:			
(a) Reduce the commitment?	19.2	16.1	64.7
(b) End the commitment?	34.6	15.5	49.9
(c) Give President discretionary authority to make such changes?	55.6	12.3	32.1
25. Should more immigrants be allowed to enter the United States annually?	28.0	56.0	16.0
26. Do you favor stronger civil rights legislation?	52.6	33.0	14.4
27. Do you favor a change in the minimum wage law to provide:			
(a) Extension of coverage?	37.3	23.7	39.0
(b) Increase to $1.25 an hour?	33.4	28.2	38.4
(c) Increase to not more than $1.15 and hour?	20.1	28.6	51.3
28. Do you favor an increase in postal rates to put the Post Office Department on a self-paying basis?	65.0	27.7	7.3
29. Do you favor legislation to preserve wilderness areas in our national parks, forests, wildlife refuges, and other public lands?	90.6	4.4	5.0
30. Should the Federal Government be given greater authority to regulate radio and TV programs?	30.6	61.2	8.2
31. Should GI benefits be extended to our peacetime veterans?	20.5	71.5	8.0

President Eisenhower's Address in Manila

EXTENSION OF REMARKS
OF
HON. ALEXANDER WILEY
OF WISCONSIN
IN THE SENATE OF THE UNITED STATES
Thursday, June 16, 1960

Mr. WILEY. Mr. President, the withdrawal of the invitation by the Japanese Government for President Eisenhower to visit that country is a cause for deep concern to the free world.

We recognize, of course, that the Government of Japan maintains its friendly attitude toward the United States. Moreover, I am confident that a large majority of the people do not endorse the anti-U.S. activities—agitated and directed by the international conspiracy of communism.

Nevertheless, the fact that the long arm of Moscow and Peiping could reach into Japan, disturb internal affairs, result in riots that wounded many, and, yes, killed one student, and required the Government to reverse its diplomatic policy—this is indeed a serious matter.

Realistically, this is aggression by "agitation and subversion." We can expect, of course, that there will be gloating in the circles of communism.

The fact that this could happen—despite a postwar policy in which we have attempted to build up and reconstruct Japan, however, requires a need for a reappraisal of our policy.

The President's tour of the Far Eastern countries reaffirming our dedication to peace, as well as pledging cooperation and friendship to the people of Asia, will constitute, I am confident, a major antidote to the spread of Communist influence in that area of the globe.

As in the past, the President, wherever he goes, leaves a wake of good will toward our country.

Following the President's return home, however, I believe that we need to reappraise the effectiveness with which we are getting across, not only the ideas of freedom, but with which we are countering, or failing to counter, the Communist ideological offensive.

Yesterday the President laid the groundwork for realistic, ideological recognition, and countering the menace of communism to the Asian people in a speech in Manila.

At this time I ask unanimous consent to have printed in the RECORD at this point two items—first, a partial text of the Manila address, and, second, a splendid editorial from the Washington Post entitled "Nationalism in Asia"—reviewing the significance of the President's presentation.

There being no objection, the address and editorial were ordered to be printed in the RECORD, as follows:

PARTIAL TEXT OF IKE'S MANILA ADDRESS

MANILA, June 15.—The following is that part of President Eisenhower's address to the Philippine Congress which dealt with communism:

Communist leaders fear constructive nationalism as a mortal foe. This fear is evident in the continuing efforts of the Communist conspiracy to penetrate national movements, to pervert them, and to pirate them for their own evil objectives.

To dominate—if they can—the eternal impulse of national patriotism, they use force and threats of force, subversion, and bribery, propaganda and spurious promises. They deny the dignity of men and have subjected many millions to the execution of master plans dictated in faraway places.

Communism demands subservience to a single ideology, to a straitjacket of ideas and approaches and methods. Freedom of individuals or nations to them is intolerable. Free men, free nations make their own rules to fit their own needs within a universally accepted frame of justice and law.

Under freedom, thriving sovereign nations of diverse political, economic, and social systems are the basic healthy cells that make up a thriving world community. Freedom and independence for each is in the interest of all.

AIM OF U.S. ASSISTANCE

For that very reason—in our own enlightened self-interest, in the interest of all our friends—the purpose of American assistance programs is to protect the right of nations to develop the political and social institutions of their choice, rather than having to accept extremist solutions under the whip of hunger, or the threat of armed attack and domination.

We readily accept the fact that there is a great variety of political, social, and economic systems in the world; and we accept the further fact that there is no single, best way of life that answers the needs of everyone, everywhere.

The American way satisfies the United States. We think it best for us. But the United States need not believe that all should imitate us. What we do have in common with the free nations in Asia, Africa, Europe, and Latin America are basic and weighty convictions, more important than differences of speech and color and culture.

Some of these convictions are: That man is a being capable of making his own decisions; that all people should be given a fair opportunity to use their God-given talents, to be worthy heirs to their fathers, to fulfill their destiny as children of God; that voluntary cooperation among groups and nations is vastly preferable to cooperation by force—indeed, voluntary cooperation is the only fruitful kind of effort in the long run.

True enough, in a too lengthy period of history, some European nations seemed convinced that they were assigned the mission of controlling the continents. But always powerful voices within those countries attacked the policy of their own governments. And we of the American Republics—21 independent nations, once European colonies—denied in arms and in battle the validity of the assumed mission. Colonialism died there because true nationalism was a more potent force.

WHO ARE COLONIALISTS?

Since 1945, 33 lands that were once subject to Western control have peaceably achieved self-determination. These 33 countries have a population of almost a billion people. During the same period, 12 countries in the Sino-Soviet sphere have been forcibly deprived of their independence. The question might be asked: Who are today the colonialists?

The basic antagonism of the Communist system to anything which it cannot control is the single, most important cause of the tension between the free nations in all their variety on the one hand, and, on the other, the rigidly controlled Communist bloc.

One purpose of the Communist system's propaganda is to obscure these true facts. Right now, the principal target is the United States of America. My Republic is painted as an imperialistic seeker of limitless power over all the peoples of the world, using them as pawns on the chessboard of war, exploiting them and their resources to enrich our own economy, degrading them to a role of beggarly dependence.

The existence, the prosperity, the prestige of the Republic of the Philippines proves the falsity of those charges. You, as a people, know that our Republic is no empire of tyranny. Your leaders repeatedly have so testified to the world. But for a few minutes I should like to speak to you on what America stands for: what it stood for before I became President and what it will continue to stand for after I have left office.

More important than any one year, any one incident, or any one man is the role we have played through our whole history—the role we shall continue to play so long as our Republic endures.

Two hundred years, lacking 16, have passed since our forefathers proclaimed to the world the truths they held self-evident; that all men are created equal; that they are endowed with unalienable rights to life, liberty, the pursuit of happiness; that governments are instituted to secure these rights, deriving their just powers only from the consent of the governed.

SEATO IS CITED

Beyond the guarantees of American strength, we seek to expand a collective security. SEATO demonstrates what can be accomplished. Since its inception, not one inch of free southeast Asia territory has been lost to an aggressor.

Collective security must be based on all fields of human endeavor, requiring cooperation and mutual exchange in the areas of politics, economics, culture, and science.

We believe in the expansion of relations between nations as a step toward more formal regional cooperation. In accord with this belief, we support the initiative taken by the Government of the Philippines during the past several years in establishing closer ties with its neighbors.

Patience, forbearance, integrity, an enduring trust, must characterize our mutual relations. Never, I pray, will the United States because of its favored position in size and numbers and wealth attempt to dictate or to exercise unfair pressure, to forget or to ignore the Republic of the Philippines—its equal in sovereign dignity. And never, I pray, will the Philippines make a whipping boy of the United States. Each of us proudly recognizes the other as a sovereign equal.

And, my friends, at this point I just want to interpolate one simple thought on the cooperative efforts for our own security, for advancing the standards of living of peoples, for everything that we do together. There are of course differences in the ability of each nation to make contributions.

MORAL LEADERSHIP

Each of us as an individual is different from every other individual. Physically, mentally, and in the possession of the world's goods, we are somewhat different. But I submit, Members of the Congress, that there is one field where no man, no woman, no nation, need take a secondary place, and that is in moral leadership.

The spirit of a people is not to be measured by its size or its riches or even its age. It is something that comes from the heart, and from the very smallest nation can come some of the great ideas—particularly those great inspirational ideas that inspire men to strive always upward and onward.

Therefore, when I say that our two nations are sovereign equals, I mean it just in that spirit, in the sense that you have just as much to contribute to the world and to yourselves and to freedom as the greatest and the most powerful nation in the world.

In the great cause of peace and friendship and freedom, we who are joined together will succeed. The eternal aspirations, purposes, ideals of humanity inspire and hearten and urge us to success.

But we face repeated challenges; endless temptations to relax, continuous campaigns of propaganda and threat. Let us stand more firmly together against them all.

With God's help we shall march ever forward toward our destiny as free nations and great good friends.

[From the Washington Post, June 16, 1960]

NATIONALISM IN ASIA

President Eisenhower's speech to the Philippine Congress was a pointed reply to the noisy elements who are trying to distort the nature of his good-will mission to the Far East. His thesis was the antithesis of the imperialism everywhere attributed to the United States by Communist agents seeking a cover for their efforts to impose a new form of tyranny on mankind. The President found only satisfaction in the fact that 33 lands once under Western control have peacefully achieved self-determination since 1945. Americans of all political faiths like to think that, in some measure these liberated peoples are following the U.S. example of 1776.

The President made it unmistakably clear that the United States has no interest in imposing its way of life on any people. On the contrary, it recognizes that freedom for all peoples is the only sound basis on which peace can be built. The hullabaloo that has arisen in Japan is based on the Communist-trumped-up charge of American domination over friendly countries in the Far East. Actually, the United States welcomes diversity in the free world and encourages genuine nationalism that respects the dignity and rights of the people.

History and bitter experience fully sustain the President's assertion that communism is the real enemy of national aspirations. It is Moscow that is trying to sap the freedom of young countries striving for independence and higher standards of living. "The basic antagonism of the Communist system to anything which it cannot control," the President rightly said, "is the single, most important cause of the tension between the free nations in all their variety on the one hand, and, on the other, the rigidly controlled Communist bloc."

The first tragic error of the rioting Japanese students lies in their failure to see that the only hope for a tolerable future lies in freedom and respect for the individual. Their second tragic mistake is in assuming that national aspirations, freedom and better living conditions can be attained, in the face of the Communist threats and pressures, without cooperation among the free peoples. The basic truth of our age is that the forces of freedom and human dignity must be organized and work together in order to survive the assaults of the monolithic force that is trying to destroy them.

In a spirit of candor the President also acknowledged that many evils still persist in the free world. Sometimes free men are misled; sometimes they dissipate their energy; they bicker over trifles; they may be fearful when they should be bracing themselves for more vigorous effort. Nevertheless, he maintained, "the resources of free men living in free communities, cooperating with their neighbors at home and overseas, constitute the mightiest creative temporal force on earth."

The message is one that should have an appeal throughout Asia. The choice of the millions who have been disadvantaged in the past is not between communism and colonialism but between the new imperialism of the left and a mature nationalism that can be harnessed to the general welfare and disciplined to the necessities for survival in the atomic age.

U.S. Army

EXTENSION OF REMARKS

OF

HON. W. J. BRYAN DORN

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 16, 1960

Mr. DORN of South Carolina. Mr. Speaker, it was my pleasure, at the invitation of the Secretary of the Army, the Honorable Wilber M. Brucker, to attend a most memorable ceremony in honor of the Army veterans in the 86th Congress on June 12, 1960, at the Washington Monument grounds, at which the U.S. Army presented the 1st Battle Group of the 3d Infantry—"The Old Guard" in a retreat parade.

An Army retreat ceremony, for the benefit of those Members of Congress who have not been privileged to attend, is a most moving and traditional display from the furling of the U.S. flag to the "pass in review." It portrays the symbolic "all is well" as another day closes.

Under Secretary of the Army, the Honorable Hugh M. Milton II, acting as host for the occasion paid tribute to those Members of Congress who have served in the Army.

Senator THEODORE F. GREEN of Rhode Island acting as spokesman for the many Members of Congress present was most eloquent in expressing his appreciation for the honor paid. He was on the reviewing stand with Senators THOMAS E. MARTIN of Iowa and RALPH YARBOROUGH of Texas, and Representatives CARL ALBERT of Oklahoma and DANIEL K. INOUYE of Hawaii.

This ceremony has become something of an annual tradition in this Capital of the United States and I want to express my appreciation on behalf of the Army veterans of the 86th Congress for the honor paid us by the U.S. Army.

Medical Payments for Elderly Citizens Legislation Must Be Enacted by the 86th Congress

EXTENSION OF REMARKS

OF

HON. EDWARD P. BOLAND

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 16, 1960

Mr. BOLAND. Mr. Speaker, the distinguished columnist, Mr. Walter Lippmann, points out in his article in the Washington Post today that there is nothing un-American in the principle that Americans shall be compelled to save "so that they can meet the needs of their old age with the self-respect which comes from being entitled to the benefits because they have paid the cost out of their own earnings."

In my opinion, this statement goes to the heart of the issue of medical payments for the elderly. The Ways and Means Committee has recommended a plan under which elderly persons will be given medical benefits coverage under the social security system. I certainly hope that this legislation is soon brought to the floor for debate and that it is enacted by Congress this year.

Mr. Speaker, at this time I would like to call to the attention of my colleagues an article entitled "A Challenge That Can't Be Ducked" which appeared in the April 16, 1960, issue of Business Week. The article points out:

The problem basically is that the aged are high-cost, high-risk, low-income customers. Their health needs can be met only by themselves when they are young, or by other younger people who are still working. The only way to handle their health problem, therefore, is to spread the risk and costs widely. And that can best be done through the social security system to which employers and employees contribute regularly. By comparison with the heavily subsidized schemes, this approach has the advantage of keeping old people from feeling that they are beggars living off society's handouts.

Mr. Speaker, there are hundreds of elderly citizens in my congressional district who have written to me or talked to me personally about their concern over the costs of possible hospitalization. They worry about the day when they might suffer from an injury or require an operation, the cost of which would wipe out their savings of a lifetime, or place them deeply in debt. The Congress must face up to the realities of this problem facing our senior citizens.

Schedule of Grassroots Conferences

EXTENSION OF REMARKS
OF
HON. PAUL F. SCHENCK
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Thursday, June 16, 1960

Mr. SCHENCK. Mr. Speaker, it is an honor and a privilege to represent the people of the Third District of Ohio here in the Congress of the United States. I am deeply grateful for this opportunity to be of service, and it is my constant desire to serve my constituents in the best way possible. During my service here I have made it my regular policy to keep in close touch with the people of my district so that I may know how they feel about the many important issues facing us here in Congress.

I have considered it my duty, as the representative of this great district, not only to be well-informed of the opinions of my constituents, but also to be of the greatest possible service to persons having problems dealing with agencies or departments of our Federal Government.

Nine years ago I initiated the idea of holding grassroots conferences throughout our district, and I have continued this practice each year during the time Congress is in adjournment. I also have a full-time congressional service office at the U.S. Post Office Building in Dayton, where I can meet with people personally at any time that my official duties permit me to return to the district.

During the time I am in Washington attending to legislative and official duties, a competent secretary is in charge of my district service office to assist callers and to help them with requests for aid in dealing with the Federal Government so that I can be of every proper assistance to them.

In these ways I have sincerely tried to keep well informed as to the personal opinions of my constituents, and I have also tried continuously and sincerely to be of every proper service to them.

Members of Congress are constantly called upon to give careful and earnest consideration to legislation dealing with many complex national and international problems. These day-to-day decisions often affect the lives and living of every citizen in our Nation. Consequently, these personal and private conferences help me to serve all of the people in my district in a much more effective manner.

This year, during our official congressional recess, I am again taking time to hold these grassroots conferences throughout our district at convenient public buildings. I deeply appreciate the fine cooperation of the many officials who have made these meeting places available to me as an aid in rendering this public service.

This is the schedule I have arranged:

Dayton Post Office, room 314, September 6 and 7, 9 a.m. to 4 p.m.

Germantown City Building, September 9, 4 p.m. to 8 p.m.

Phillipsburg City Building, September 10, 1 p.m. to 3 p.m.

Brookville City Building, September 10, 4 p.m. to 8 p.m.

Middletown American Legion, September 13, 9 a.m. to 4 p.m.

Miamisburg City Building, September 14, 4 p.m. to 8 p.m.

Oxford Municipal Building, September 15, 4 p.m. to 8 p.m.

Fairfield City Building, September 16, 4 p.m. to 8 p.m.

Hamilton Courthouse, September 19, 9 a.m. to 4 p.m.

I have been greatly encouraged by the increased attendance at these conferences each year. It is sometimes surprising to see how much can really be accomplished when a citizen and his Congressman can sit down face to face and talk over problems of mutual concern.

Special appointments are not necessary for these conferences, and I sincerely urge individuals or groups to meet with me on the date and at the place most convenient to them. The knowledge obtained through these grassroots conferences will help me to render better service, both legislative and personal, to all of the people of our important Third District as their Representative in the Congress of the United States.

Automatic Warning Signal Devices for Automobiles

EXTENSION OF REMARKS
OF
HON. JOSEPH W. BARR
OF INDIANA
IN THE HOUSE OF REPRESENTATIVES
Thursday, June 16, 1960

Mr. BARR. Mr. Speaker, today I introduced a bill requiring the Secretary of Commerce to prescribe standards for certain automatic warning signal devices for automobiles. These devices would flash a warning light when the motorist takes his foot off the accelerator to slow down his car. We do have on all cars a brake light to show when the brake is applied, but there is absolutely no warning device for the traffic behind a car that slows down abruptly by deceleration rather than the brake.

Back in the old days when I learned to drive, it was customary to stick the left arm out the window and wave it up and down as a slowdown or stop signal. Since turn signals have been installed this practice seems to have died out and with traffic as vicious as it is, no one can really be blamed for hesitating to stick his arm out the window to signal a slowdown or stop. I really doubt that I have seen the up and down slowdown signal for 5 years.

The idea for this legislation is not original with me. It came from an Indianapolis columnist, Mr. Lowell Nussbaum, but I will cheerfully admit that I grabbed it quickly.

Traffic in my home town of Indianapolis is bad enough, but it is a picnic compared to Washington rush hours and of all the hazards of traffic today, especially in city driving, nothing is so nerve wracking as a sudden deceleration by the car ahead.

I used to welcome my 45 minute drive in to work every morning as a chance to plan the day's work. But after nearly climbing over the backs of cars that suddenly reduced speed, I gave up these intellectual activities and concentrated on the necessity of getting to the Capitol in one piece.

Mr. Speaker, this is a simple piece of legislation that should require little engineering effort by the automobile manufacturers. It is my honest opinion that this legislation would help reduce the appalling accident rate on the streets and roads of this Nation.

Sylvester V. McMahon

EXTENSION OF REMARKS
OF
HON. MICHAEL A. FEIGHAN
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Thursday, June 16, 1960

Mr. FEIGHAN. Mr. Speaker, today one of Cleveland's most distinguished and esteemed citizens marks his 87th birthday.

Sylvester V. McMahon was born on June 16, 1873, in Cleveland, Ohio. He was admitted to the Ohio bar in 1899 and actively practiced law with honor and distinction for 52 years in Cleveland. As a young man he served as chief police prosecutor for the city of Cleveland. He was active in Democratic politics and a disciple of the late Tom L. Johnson, one of the greatest mayors Cleveland ever had. Johnson, though a man of wealth, dedicated most of his life to fighting for social justice and standing for the rights of the common people against entrenched power. His statue stands today in the Public Square of Cleveland.

While still a young man, Sylvester V. McMahon was elected county prosecutor for Cuyahoga County. He was the first Democrat elected to that office from the time of the Civil War. He was former president of the Cleveland Bar Association and an outstanding trial lawyer. In his early years he excelled in the trial of criminal cases. He tried many murder cases and never lost a man to the chair. Later he was a leading member of the bar in the trial of personal injury cases.

Sylvester V. McMahon, seeking few public offices himself, has nevertheless been active in politics all of his life. He has always been interested in honest and efficient government and social justice. He has actively supported those candidates whom he believed would make honest, conscientious, public servants. His standards for public office are high and exacting. He has always believed that public office is a sacred public trust.

Sylvester V. McMahon is honored in Cleveland on his 87th birthday. I offer his name to the Nation as one who is worthy of our attention and our esteem.

The Military Assistance Program

EXTENSION OF REMARKS

OF

HON. JAMES E. VAN ZANDT

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 16, 1960

Mr. VAN ZANDT. Mr. Speaker, the action taken by the House Appropriations Committee in reducing by 20 percent the President's request of $2 billion for military assistance has caused grave concern to Secretary of Defense Thomas S. Gates, Jr.

Secretary Gates on June 15 issued an urgent appeal that the cut in the appropriation be restored when the House debates the appropriation measure on June 16. The Secretary reviewed briefly in a news release the importance of military assistance, stating that Department of Defense witnesses appeared and testified before the House Appropriations Committee as to the soundness of the President's request for $2 billion to finance a necessary and effective program.

We have a sensible, sound, well administered program. Yet the House Appropriations Committee recommends that the appropriation be reduced by 20 percent.

Said Secretary Gates.

At this point I wish to incorporate in my remarks the news release issued June 15, 1960, by the Department of Defense which I have mentioned in quoting Secretary of Defense Thomas S. Gates, Jr.

I am deeply concerned over the fate of the military assistance program.

The President requested a $2 billion appropriation for military assistance for fiscal year 1961, to provide weapons and military equipment to strengthen our alliances and to promote our own national security. The Joint Chiefs of Staff all stated that they would not take $1 away from the military assistance program in order to augment the funds for their own services. Military assistance is just as much a part of our own national defense as are the appropriations for our Army, Navy, Air Force, Central Intelligence Agency, and the Atomic Energy Commission.

I have testified before the Congress, as have other Defense Department witnesses, in support of the $2 billion request. We have discussed frankly every aspect of the program. We have responded to every question and criticism. We have a sensible, sound, well-administered program. Yet the House Appropriations Committee recommends that the appropriation be reduced by 20 percent.

In spending military assistance funds, it is necessary first to maintain existing allied forces in good working order and conserve the investment already made. Therefore the proposed reduction must come from cutting down on force improvement; that is, postponing indefinitely the newer weapons. Eighty percent of any cut below the budget request must be absorbed in equipment for force improvement, which includes missiles, electronic equipment, modern aircraft and ships, modernized tanks, and combat vehicles and the like.

The impact of the proposed cuts would fall most heavily on NATO, which also bore the greatest weight of last year's appropriation cut.

We must lead the free world without hesitation.

We must contain the Communists, but we cannot do it with imaginary weapons.

We must continue to sustain the capability and determination of our allies to defeat both aggression and internal subversion.

We must provide for the military assistance program as an integral part of our national defense required by our national interest.

Before departing for the Far East, the President said in telegrams to House leaders: "This (cut) cannot but jeopardize our own security and the defense of the free world."

I urge the House of Representatives, when it debates this appropriation on Thursday, to restore the full $2 billion intact.

President's Address Before the Philippine Congress

EXTENSION OF REMARKS

OF

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 16, 1960

Mr. DERWINSKI. Mr. Speaker, yesterday, in Manila, President Eisenhower delivered a historic statement, the results of which caused great impact throughout those portions of the world that were free to hear it. I take this opportunity to call the particular attention of the House to certain portions of this address relative to the constructive force of honest and rightful nationalism, as it relates to our current international conditions. Living as we and our allies do in lands of freedom, we often fail to recognize the real loss suffered by peoples behind the Iron Curtain in the rightly labeled "captive nations."

To point out this issue, may I, first, quote from the President's address before the Philippine Congress as it appeared in the press today:

This spirit was described by your great leader and my personal friend, Manual Quezon, when he with great eloquence said:

"Rightly conceived, felt, and practiced, nationalism is a tremendous force for good. It strengthens and solidifies a nation. It preserves the best traditions of the past and adds zest to the ambition of enlarging the inheritance of the people. It is, therefore, a dynamic urge for continuous self-improvement. In time, it enriches the sum total of mankind's cultural, moral, and material possessions through the individual and characteristic contribution of each people."

A NOTE OF CAUTION

Significantly, President Quezon had this caution to offer: "So long as the nationalist sentiment is not fostered to the point where a people forgets that it forms a part of the human family, that the good of mankind should be the ultimate aim of each and every nation, and that conflicting national interests are only temporary, and that there is always a just formula for adjusting them—nationalism is a noble, elevating, and most beneficial sentiment."

In these words of clarity and timeless wisdom, President Quezon spoke a message forever applicable to human affairs, particularly to the circumstances of this era.

In addition to the immediate impact, the following words in the President's message as reported by the press will have particular significance during Captive Nations Week, July 12 to 23 of this year, when we reaffirm in behalf of the peoples presently oppressed behind the Soviet Iron Curtain the cherished hope that true freedom will once again be theirs:

Nationalism is a mighty and relentless force. No conspiracy of power, no compulsion of arms can stifle it forever. The constructive nationalism defined by President Quezon is a noble, persistent, fiery inspiration, essential to the development of a young nation. Within its ideal my own country since its earliest days has striven to achieve the American dream and destiny. We respect this quality in our sister nation.

Communist leaders fear constructive nationalism as a mortal foe. This fear is evident in the continuing efforts of the Communist conspiracy to penetrate nationalist movements, to pervert them, and to pirate them for their own evil objectives.

To dominate—if they can—the eternal impulse of national patriotism, they use force and threats of force, subversion and bribery, propaganda and spurious promises. They deny the dignity of men and have subjected many millions to the execution of master plans dictated in faraway places.

Communism demands subservience to a single ideology, to a straitjacket of ideas and approaches and methods. Freedom of individuals or nations to them is intolerable.

Mr. Speaker, in studying recent history, it is well for us to note that in the last 8 years the Soviet monster has been prevented by our effective foreign policy from seizing control of any free nation whereas in the preceding 8 years, 1944–52, the following nations and their brave peoples lost their freedom: Lithuania, Latvia, Estonia, Poland, Czechoslovakia, Rumania, Hungary, and Bulgaria.

We must keep them in mind at all times especially, as I indicated above, in our commemorative occasions in Captive Nations Week. While we have arrested the spread of communism, and have rededicated ourselves to rolling back the Iron Curtain, the nations of the free world have been granting freedom to lands once subject to their control. President Eisenhower, in addressing the Philippine Congress aptly described this as follows:

Since 1945, 33 lands that were once subject to Western control have peaceably achieved self-determination. These 33 countries have a population of almost a billion people. During the same period, 12 countries in the Sino-Soviet sphere have been forcibly deprived of their independence. The question might be asked: Who are today the colonialists?

Certainly, though we may disagree in detail, we are all united in the fundamental principle that the torch of freedom must be carried to the remotest corners of the earth. In these days of increased international tension, the people of the United States are giving their wholehearted support to a Chief Executive who is effectively dedicating himself to true world peace, and who, by his actions and affirmative pronouncements, has carried to millions of people in the nations he recently has visited the true story of the love of freedom and the heart of humanity that is so symbolic of our national foreign policy.

A Report to Constituents

EXTENSION OF REMARKS
OF

HON. THOMAS M. PELLY

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 16, 1960

Mr. PELLY. Mr. Speaker, with the adjournment of the 86th Congress comes a final responsibility of each individual Member to render to his constituents an accounting of his stewardship. I think it is recognized that we cannot please all the people all the time. However, we have the right and indeed the obligation to support and justify to the people how and why we voted the way we did and to explain our actions during each session.

In reporting to my friends and those who reside in the First Congressional District of my State of Washington, I am frank in saying I may not always have taken a popular position, but at least I did in good conscience vote the way I thought was proper. It is on this basis that I will return home and report personally on my record of public service this year.

Recently there has been widespread public criticism of Members of Congress over expenses charged to the Federal Government in connection with travel. Also, there is indignation over waste and extravagance in the way Congress spends the taxpayers' money for its own use.

Without pointing the finger at any colleagues, Mr. Speaker, I want to say I have supported itemized accounting and publication of all legislative committee spending. That a clear code of ethics for officials in all branches of the Federal Government has never been enacted, I deeply regret. I have sponsored such a plan so that conflicts of interest would be clearly defined. Public confidence for institutions of Government must be maintained. I am glad to say some progress in that direction has been made recently.

This is no holier-than-thou statement. Let the conduct of each Member stand on his own record in connection with improper practices. As for our legislative budget, I have always voted on the theory and firmly stated that the Congress could not expect to demand economy in the military and other agencies and departments of Government unless we ourselves set a good example in this respect. I regret to say that Congress has not always seen fit to practice what it has preached with regard to holding down expenditures.

Mr. Speaker, this is a presidential election year and even more than usual partisanship has colored and distorted views and political news and generated more preconvention political heat than light. However, I am glad to say that there has been a minimum of partisanship and politics in our traditional bipartisan foreign policy.

Your patriotism, Mr. Speaker, and that of certain other Democratic leaders has stood the difficult test of obvious opportunity. As always, in America in a crisis, the welfare of the country has taken precedence. I feel the Nation owes a debt, however, to you, Mr. Speaker, who never failed to respond when President Eisenhower and the Republican administration needed your support in foreign affairs.

I think we underestimate the success and effectiveness of that foreign policy. There is more peace and prosperity in the free world today than at any time and more moral and military deterrent strength than at any time since the Marshall plan was adopted. Meanwhile, Mr. Khrushchev and the Soviets have been smoked out for what they are, vicious conspirators whose sinister hope is to enslave all the peoples of this earth.

In domestic affairs, such as with farm legislation, in contrast to foreign affairs, political advantage and party politics have seemed to have been the overriding issues.

Speaking of our agricultural situation, I must deplore, as I have during the past session of Congress, that no legislation has been passed to reduce the inexcusable costs of farm subsidies or to end Federal controls. Our obsolete war emergency agricultural program must cease. It is a disgrace.

One of the major issues of the 86th Congress, of course, was the medical aid program for the aged.

The high cost of hospitalization and sickness cannot be ignored. Certainly the aged who are more subject to illness, especially catastrophic illness, and whose incomes are lower, must obtain health protection. With dignity, medical assistance must be available to the needy and I am confident the basic principles of socialized medicine need not be embraced to accomplish such assistance for retired people of modest or meager incomes.

Federal control of education continues to be a threat. A temporary school construction bill to help the States in the present emergency—if based on helping only school districts which have exhausted their own resources—is only dangerous in that it could lead to the States reducing their efforts and depending permanently on the Federal Government.

Certainly if the Federal Government attempts to finance and set standards for maintaining the schools, including salaries and curriculum, it could result in nationalization of our schools and give us the Russian system of regimentation and conditioning of youth for socialism. It could be as it was in Japan, Italy, and Germany under despotic dictators like Hitler.

Where school legislation, including a construction bill, did not meet my ideas of built-in safeguards against diminishing local responsibility, I have opposed and voted against it. Rather, I have consistently urged a return of tax funds to the individual States to spend as locally desired.

Now, Mr. Speaker, I want to mention inflation and the national financial picture. I have introduced a bill which would do much to solve a weakness in our system. There are two strong pressures on Members of Congress. One consists of groups favoring programs that entail Government spending and the other groups seek reduced taxes. If Congress favors and supports spending, it should pass a comparable increase in taxes. By the same token, if Members of Congress support less taxes, then we should vote against increased expenditures.

My bill would enforce this policy by requiring that Federal income and expenses be balanced. It would require a reduction of the huge national debt each year. In an emergency, by a record vote, Congress could waive this constitutional provision. Otherwise, we could not adjourn without a balanced budget, including a debt reduction.

Congressional committees this year favored programs requiring spending far in excess of the President's budget. When we establish new costly programs in excess of revenue, it is fiscal irresponsibility not to vote new taxes to increase revenue. I have been against that kind of spending—against so-called budget-busting.

Finally, Mr. Speaker, I should point up one national problem which remains unsolved and which especially affects the Pacific Northwest. This problem has to do with fishing and the proposed extension of the historic 3-mile limit. The Geneva Convention on the Law of the Sea sought to extend and widen the coastal sovereignty for fishing rights and would have taken away the historic right of Americans to fish outside the 3-mile limit off of Vancouver Island. Our Puget Sound fishing industry must retain that right. A settlement with Canada, therefore, must be arrived at before any international agreement is signed.

Another problem has to do with our west coast shipbuilding industry. A differential of 6 percent has long been the Federal policy in recognition of our higher costs. This only applies to the ships which are built for operation in the Pacific. Elimination of this differential could have an extremely adverse result on employment in Pacific coast shipyards.

In both the foregoing matters I take some satisfaction in that I was able to play a leading role in defending my industries and temporarily we have succeeded in holding the line. Meanwhile, I hope the fairness of our cause has been convincingly read into the record. I

serve notice, Mr. Speaker, that we of the Pacific Northwest and west coast are convinced of the justice of our cause and therefore we will continue to resist efforts to harm west coast industries.

Our Washington State delegation, including our Senators, as always, have closed ranks regardless of political party and cooperated closely in all such matters that vitally concern the welfare of the State.

Finally, Mr. Speaker, let me assure my friends in the Congress that during the past session I have appreciated their cooperation. It is a great honor of course to serve in this House of Representatives and a double privilege to be associated with so many fine and able colleagues. In the four terms I have served here I have learned one does not gain in effectiveness as a Member of Congress by experience alone, but by a combination of know-how and friends. Again, I express warm thanks to those who have worked closely with me.

I feel constrained also to publicly express thanks to my constituents at home for the honor and extreme pleasure of representing them in the Congress of the United States. Shortly I hope to carry this message to them in person when I am back home.

So, Mr. Speaker, this concludes my remarks. I only hope my service has justified the confidence of those who voted to send me to Congress and justifies likewise the kind way in which my efforts in most every instance has been received.

Transcript of Questions and Answers Submitted to Vice President Nixon on Television Program "Open End"

EXTENSION OF REMARKS
OF
HON. JOHN SHERMAN COOPER
OF KENTUCKY
IN THE SENATE OF THE UNITED STATES
Thursday, June 16, 1960

Mr. COOPER. Mr. President, I ask unanimous consent to have printed in the CONGRESSIONAL RECORD a transcript of questions submitted to Vice President NIXON and his answers, on a television program "Open End" broadcast May 15, by WNTA–TV in New York City as reported by U. S. News & World Report.

Mr. President, the interview is another example of the full and free discussion of issues by the Vice President of the United States and as always it discloses his comprehension of national and international issues, his wisdom and judgment.

There being no objection, the transcript was ordered to be printed in the RECORD, as follows:

[From U.S. News & World Report, May 30, 1960]

WHAT VICE PRESIDENT NIXON SAYS

(Vice President RICHARD M. NIXON was interviewed on a television program, "Open End," broadcast May 15 by WNTA–TV in New York City, with David Susskind as moderator. Following, from a transcribed recording of that interview, are excerpts of Mr. NIXON's comments:)

RED CHINA AND THE U.N.

"Should Red China be admitted to the United Nations? Should it be recognized by the United States?"

Mr. NIXON. In my opinion, admission of Red China to the U.N. at this point, and its recognition by the United States, could well set in motion a chain of events in Southeast Asia which would result in the communization of that area.

DICTATORSHIPS

"Should United States sever diplomatic relations with governments headed by dictators?"

Mr. NIXON. No. I feel that we have to have diplomatic relations with dictatorships. For example, we have to continue to have diplomatic relationships with Mr. Khrushchev. We have to continue to have diplomatic relations with Mr. Gomulka in Poland. They are dictatorships—dictatorships as rigid, as totalitarian as any in the world. * * * But we have to have diplomatic relations with them. * * *

The United States should make clear that we favor the development in the Americas toward democratic forms. * * *

But to break relations with countries because they had dictators would mean that we'd have to break relations with about half the world today.

LATIN AMERICA

"On Mr. NIXON's trip to South America—was it well advised and constructive?"

Mr. NIXON. From a personal standpoint, probably not. It's not very easy to sit in the car and be stoned. It isn't easy to see your wife's new pretty red suit completely covered with spit, or to see a man spit directly into her face and not be able to do anything about it. But I would say, from the standpoint of the country, probably on balance it was good, because it served to bring forcibly home to the American people, to our Congress and to our Government the fact that there was a lot of discontent in Latin America with some of our economic and political policies. And so we have taken steps to deal with those policies.

"What about Cuba and Fidel Castro?"

Mr. NIXON. Obviously, sometimes in cases like this a person in my position, particularly in an election year, might be tempted to make a flag-waving statement about the terrible things that Mr. Castro is saying about the United States, his threats at Guantanamo (U.S. Navy base in Cuba), the fact that one of his gunboats fired on a submarine, and the like.

But I think that there are times when * * * it's best to have the statements that are made come from the responsible people in the State Department or from the President himself. I can only say this in general: I've been to Cuba on two occasions officially. The Cuban people are basically pro-American. I think that Mr. Castro, of course, has tended to turn some of them—many of them, perhaps—against us.

But I will say that, as far as those people are concerned, they certainly needed a revolution. They were not getting an adequate share of the tremendous wealth of that lush island. And so, as far as the objectives of Castro's revolution—providing, for example, a better life for his people, a better division of the land and the like, and particularly that objective which he also stood for at the beginning but since has completely departed from, of freedom—freedom of press, freedom in every respect, freedom of assembly and the like—as far as the objectives of the revolution, we certainly can support them.

And we would hope that Mr. Castro and the Cuban people themselves would change the present direction of the Castro government back to the objectives of the original revolution from which it has grievously departed, particularly with regard to freedom.

CONSERVATISM AND LIBERALISM

"In regard to Mr. NIXON's description of his political philosophy as one of progressive conservatism: Is this a political contradiction in terms?"

Mr. NIXON. No, I don't think so. I believe that, historically, conservatism at its best has always been progressive. And may I say, incidentally, that the use of the words "conservative" and "liberal" I think generally should be avoided these days because the two words have been distorted by definition through the years. Some people have attached the word "liberal" to themselves that perhaps are reactionary in the extreme, and others who call themselves "conservatives" certainly don't deserve that appellation as well. * * *

I believe that a conservative is an individual who opposes bad change but who favors good change. He favors that kind of change which will conserve the best of the past and build on that.

Now, the difficulty with those who do not take a conservative point of view in the sense that I have referred to is that they see a problem and they look at the present system and they want to scrap everything that we're presently doing in order to solve the problem. I think that (1) this is inefficient, and (2) it isn't the best way to solve the problem.

WELFARE STATE

"Should such things as social security, the Tennessee Valley Authority and Federal deposit insurance be regarded as 'welfare-state-ism'?"

Mr. NIXON. No. I regard these programs which you have referred to as consistent with the kind of dynamic economy—private-enterprise economy—which I believe will provide the most goods and services for the American people.

My point of demarcation is this: Whenever the individual, acting alone or with other people, either in a partnership or a corporation or some other group activity, can do a particular job or render a particular service more efficiently and less expensively than Government can do it or render it, then I believe that should be the course of action we should follow. Whenever the individual, acting alone or with others, is unable or refuses to render the kind of services that the people need or want, then—and only then—should Government step in. And I believe that, as far as Government is concerned, we should start at the lowest level and work upward to the highest rather than start at the highest and work down. We should first see if the local government can do it, then the State government, and finally, and only as a last resort, the Federal Government.

FEDERAL AID TO SCHOOLS

"Should Federal aid be given toward paying teachers' salaries? Why did Mr. NIXON vote against the Clark amendment which would have provided such aid?"

Mr. NIXON. Because I believe there is a better approach, and that's the approach that the administration has supported and continues to support—of Federal aid for school construction, $2 billion worth of schools to be built over a period of 4 years, financed over a period of 20 years, with the Federal Government paying half of the debt-retirement costs and the State governments assuming the last half. * * *

Because I am convinced that, when the Federal Government aids in the construction of schools, there is no possibility whatever of Federal control. If the Federal Government gets into the business of subsidizing

generally throughout the country the operation of our schools, including the payment of teachers' salaries, inevitably we will move into greater and greater programs in this area.

INFLATION

"To control inflation, will some control of wages and prices be necessary?"

Mr. NIXON. I would hope not, and I would certainly resist any attempt legislatively to go to controls. That is one of the reasons why, for example, when the recent steel strike was going on, I completely disagreed with many leaders in this country who said that we had to have compulsory arbitration—compulsory arbitration of labor disputes affecting the national interest. * * *

If you go to compulsory arbitration, this means wage fixing. If you have wage fixing by Government, you have Government price fixing. If you have Government wage and price fixing, the stimulus to the free-enterprise economy—and many think that's a bad word, but I do not—the stimulus to the free-enterprise economy, which has made the American productive machine the wonder of the world, will have been destroyed. We will have taken exactly the wrong step, and I think we should resist it at all possible times.

TAX REFORM

"How would Mr. NIXON cut taxes?"

Mr. NIXON. Well, now, let me say first of all that, with regard to tax reform or reduction, I emphasize that, throughout this campaign, I do not intend to promise the people that if elected they can have either categorically, because, in my opinion, before we can talk about either tax reduction or tax reform, both of which will result—even in the second case as well—in a reduction of revenue, we have to be sure that we have met our national-security responsibilities adequately. * * *

Now, in the event, after meeting all of our national-security responsibilities adequately, there is a surplus which will enable us to have a tax bill, I believe that that tax bill should emphasize tax reform—tax reform which would have as its purpose stimulating economic growth. Now how do you stimulate economic growth? You stimulate it by encouraging people to invest their savings in industrial plant, and to encourage them—one of the ways that we do that is through our tax system.

Now, I cannot on this program, and will not until the campaign comes along indicate specifically what ought to be done, but you move on the depreciation front, for example. Accelerated depreciation can be most constructive in stimulating economic growth. You move on the area of what I would call the counterproductive higher income bracket taxes—counterproductive because, at the present time, we have what I would call an expense account economy. I think you know what I am talking about here where people, because the tax rates are so high, live in effect off of expense accounts, and companies, of course, have to pay their top officials in terms of expense accounts as well as in terms of their adequate income.

Now this, I say, is counterproductive and inefficient.

By reducing these rates you lose relatively little revenue. And, by reducing these rates, you release capital for investment in industrial plant. That investment in industrial plant produces progress, it produces more jobs, it produces economic growth.

Now may I say finally in this connection that what I have just suggested has no political sex appeal in it whatever. I'm aware of this. The British were aware of it when they did the same thing a couple of years ago. But I feel that economic growth is essential in this country, and I think the way to economic growth is through expanding primarily the private sector of the economy rather than the Government sector. I think Government has a responsibility, a proper climate, seeing to it that our economy remains competitive through enforcement of the antitrust laws. But, also, we can do a great deal through reforming our tax system and thereby encouraging and stimulating maximum investment in the new plant which produces more progress and more jobs for Americans.

LABOR LEGISLATION

"What about the Landrum-Griffin law as a way to deal with labor abuses?"

Mr. NIXON. This is a terribly complex area and it's very difficult to develop labor legislation which will deal with an abuse without injuring the organization itself. Nobody wants to damage legitimate organized labor in this country—at least I don't, I want to make that clear. What we want to do is to get all unions to follow the good unions and the honest practices that many unions follow today.

The Landrum-Griffin bill was designed to do exactly that. And I believe that, as far as it goes, it did a fairly adequate job. But we aren't going to solve the problems entirely with legislation. In the final analysis, the problem of control of abuses within unions will be solved only when union members themselves recognize that it's their responsibility to assert a fact which they should be aware of, that they run the unions.

"Should wages be geared to the cost of living?"

Mr. NIXON. I think that the gearing of wages to the cost-of-living index has, of course, obvious appeal because it puts it in terms of the need of the workers rather than in terms of productivity. On the other hand, I think we also have to recognize that, over a long period of time, wages must also be geared to increases in productivity as well as what may be the increase in the cost-of-living index.

Now, as far as the guaranteed annual wage is concerned, I think it's been very constructive that many enlightened firms throughout the country are now moving toward that objective as well, and certainly it is an objective to which, I think, both labor and management should strive.

MEDICAL AID TO AGED

"Why does Mr. NIXON prefer the administration bill dealing with medical care for older people to the Forand bill?"

Mr. NIXON. I have several reasons: One, because the administration bill covers all of those who need the coverage—are over 65—and the Forand bill does not. The Forand bill covers only those over 65 who happen to have social security. It provides no coverage whatever for 4.5 million people who aren't on social security, and those are among those who need it the most.

The second reason I favor the administration bill is because it is voluntary in its character. It forces nobody to have health insurance against his will, whereas the Forand bill is compulsory in character. All those on social security are brought in under the system.

A third point that I would make is that the administration bill, leaving as it does this choice in the people over 65 to buy private group insurance if they want or to buy no insurance whatever, I think is more consistent with our ultimate objective of keeping the medical profession—which at the present time provides the best medical care in the world for the American people—of keeping it free of Federal control.

AGRICULTURE AND MR. BENSON

"What about Ezra Taft Benson as Secretary of Agriculture?"

Mr. NIXON. I think that Secretary Benson has been as dedicated a man in working for the interests of the farmers as he saw it as any Secretary we've ever had. I can say that—I think Secretary Benson's critics would agree with that.

As far as the success of the Secretary in getting his program through is concerned, it is here that he has had his difficulty * * * and, at the present time, we are still saddled with a program which all agree is not in the best interest of the farmer or the American people.

"The Vice President was asked about his own farm program."

Mr. NIXON. Well, this is not the time to announce it. I say, first of all, that the Congress has in its committees at the present time a message from the President giving the Congress a great deal of discretion in this area of the farm program, indicating what the President would favor, but also indicating that, within certain guidelines, the President would sign a bill which did not conform with his specific recommendations.

If the Congress fails to act on this bill, I believe that it is then the responsibility of both candidates for the Presidency to present to the American people farm programs which will break the present stalemate.

CIVIL RIGHTS AND DESEGREGATION

"What about the lunchcounter sit-in strikes in the South?"

Mr. NIXON. I would say that these strikes should not be looked at as primarily constituting a legal problem. * * * To me, the problem is not legal. The problem is essentially moral. * * *

Now, what does this mean? Since it is a moral problem, it means that we've got to develop leadership from the very highest level down through the community level which will deal with the problem. * * *

Let me say this—I think it (the strike movement) is very understandable. I think, on the other hand, that we must recognize that the Negroes and others concerned about making progress in this field do avoid, and should avoid, when they can, activities which could prove to be counterproductive—counterproductive by going to extremes, which might set the cause back.

"Is Mr. NIXON satisfied with the civil-rights bill passed recently by Congress?"

Mr. NIXON. The administration favored a bill that would have contained one specific provision that I felt very deeply about, and that the Congress rejected. And that was the one that would have given statutory authority to the committee on equality of opportunity on jobs involving Government contracts. This provision was included in the administration bill, and the Congress rejected it. In addition to that, there was another provision in the administration bill dealing with the matter of schools on Government property, involving this area in which the administration did not get the provision it wanted from the Congress.

But I would say that, as far as the bill which was passed was concerned, that it was a historic bill of great importance, and it was as important a bill as it was and effective as it was because the Attorney General developed the voting-referee proposal which will provide a historic breakthrough in voting rights for Negroes, provided they move in key States—and I mean the Negroes themselves—move in key States to assert those rights.

AID TO DEPRESSED AREAS

"What about the President's veto of a bill to provide Federal aid for depressed areas?"

Mr. NIXON. The difficulty with the bill was that it was a very bad method for meeting an urgent need, and would not, unfortunately, have provided as much and as effective aid to the real distressed areas of West Virginia—western Pennsylvania particularly—that the administration bill would have provided.

This is clearly apart from the cost. The difference in cost was 50 million for the Eisenhower bill—the Eisenhower administration's bill—and approximately 250 million for this one. The difficulty with this bill is

that it included a number of areas in this country—because of a very bad and weak standard of what a depressed area was—that would have made it a political grab bag, in effect, rather than, again, using the rifle to deal with the specific problems.

May I say that there is a real problem in these distressed areas and it has not been met, but the Congress can meet it by passing the bill that the President sent down, or one closer to it than the one they did pass. And I hope they do.

POLITICS AND THE PRESIDENTIAL CAMPAIGN

"Why is the Republican Party the minority party in this country?"

Mr. NIXON. Because the Republican Party has not effectively identified itself with the policies of this administration, and because the Republican Party, in addition, I think, has failed at the local and State level, in many instances, to develop the organization and the attractive candidates that are needed in this 20th century when politics has become a science—although many could call it much worse names.

"Is there any validity to the description of the Republican Party as the party of 'big business'?"

Mr. NIXON. I would say that no administration has a more effective record in the field of antitrust enforcement than this administration, which indicates that our interest is not in big business or little business but in good business—good, competitive, American business.

And may I say that, as far as business is concerned—just as I feel about labor—that I feel that any administration should not be either antibusiness or antilabor. You should be "pro" good business, "pro" good labor, and "anti" bad business, and "anti" bad labor.

"About Mr. NIXON's campaign methods in the past—would he change those methods?"

Mr. NIXON. Every man obviously changes through the years, and I would not say, certainly, that, through the years, I have not made mistakes. But let me emphasize my philosophy with regard to politics generally.

I believe that, in campaigns, you must have hard-hitting discussion of the issues. I believe, also, that a candidate must expect his opponents to examine his record—as mine has been examined time and time again with a microscope—and he must expect to be attacked on his record—everything that he says, every vote that he has cast, every deed that might affect his conduct of the office. It's fair to discuss it, and discuss it vigorously and in a way that will bring it home to the people. Now, I would say that, when we get into personalities, there is where the line should be drawn.

"What about Governor Rockefeller as Republican nominee for Vice President?"

Mr. NIXON. Well, let me say first of all that the agreements that Governor Rockefeller and I have far outweigh the disagreements—and, as far as foreign policy is concerned, that is particularly the case. * * *

Now, what you have raised, of course, is a hypothetical question, because Governor Rockefeller has indicated that (1) he does not want the nomination for Vice President, and (2) he has said that he will not attend the Republican Convention.

May I say that I think that that statement on his part is one which is responsible and a proper statement. * * * So I think this decision by the Governor is one that should be respected. * * *

"If Senator Kennedy is the Democratic choice for the Presidency, will it be a political necessity for the Republican Party to nominate a Catholic as Vice President?"

Mr. NIXON. I would say that ticket balancing of that type, for that reason, would be such an obviously cynical act that it would be resented, and properly so, by people throughout the country. It happens that there are people of the Catholic faith in our party who are eminently qualified, may I say, to serve in the highest offices in this country. But those people, if they are to be considered, should be considered on their merits and not on the basis simply of balancing the ticket because the other party might have selected somebody of that faith.

Baltic States Freedom Council's Town Hall Rally

EXTENSION OF REMARKS
OF
HON. JOHN V. LINDSAY
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Thursday, June 16, 1960

Mr. LINDSAY. Mr. Speaker, on Sunday, June 12, 1960, it was my privilege to address the Baltic States Freedom Committee's Town Hall Rally in New York City, marking the 20th anniversary of Soviet invasion of Estonia, Latvia, and Lithuania. Under unanimous consent I include in the RECORD a copy of my statement and the manifesto of the 20th anniversary of Soviet aggression against the Baltic States issued by the free Estonians, Latvians, and Lithuanians:

ADDRESS BY REPRESENTATIVE JOHN V. LINDSAY, REPUBLICAN, OF NEW YORK, AT THE BALTIC STATES FREEDOM COUNCIL'S TOWN HALL RALLY IN NEW YORK CITY, MARKING THE 20TH ANNIVERSARY OF SOVIET INVASION OF ESTONIA, LATVIA, AND LITHUANIA, JUNE 12, 1960

We meet here both in sorrow and in hope. In sorrow we commemorate the anniversary of the darkness that engulfed the Baltic countries in June 1940; in hope we rekindle the torch of liberty to light the way out of darkness.

The enormity of the tragedy which befell Estonia, Lithuania, and Latvia by unprovoked Soviet aggression, can only be fully realized by an awareness of the remarkable contributions made to the world by the peoples of these sovereign nations during their years of independence and freedom.

By their culture, arts and crafts, science and education, literature and the theater, and an ever-rising standard of living, these countries made their lasting mark on the world community. Expanding travel and commerce established deep and lasting links with the Western World. Between these countries and the United States there existed the bonds of mutual respect and love of freedom.

When the hammer struck it corrupted all human dignity. In violation of a series of nonaggression treaties, the Soviet armies engulfed three sovereign states, purged their governments, rigged their elections and forcibly incorporated them into the Soviet Union itself. Not even nominal sovereignty was retained. The economies became subject to the central Soviet plan and their institutions came under Soviet ministries. There followed the usual reign of terror in the pattern of dictators—mass deportations, mass arrests, conviction without trial, collectivization of agriculture, industry and the like.

Many of you here tonight lived through these events and there is little that I can tell you that you do not know far better than I from personal experience.

Let me say this much, however, about personal experience. When Hungary rose and struck back in the glorious October revolt of 1956, I had the opportunity and the moving experience, as the representative of the Attorney General of the United States, of witnessing the events from the edge of freedom. In the course of helping to establish our Government's participation in the relief of Hungarian freedom fighters and their loved ones, I stood night after night at the Andau Bridge and other key points along that dark border and saw the faces of those who marched from darkness to light. It is one thing to discuss a bloodletting in the abstract; it is another to see it in the faces of women and children, with the rumble of tank treads and the rattle of machineguns echoing out of the morning mist.

So these things bear restating. Let us remind ourselves that our friends and allies, your mothers and fathers, brothers and children, remain under the oppressor's boot and cry to us for help. As an American and as a Representative, I wish to tell you that your cause is our cause. It is a cause close to our minds and hearts. But we may not rest on this. What is needed is a restatement by the free world of our determination to achieve freedom and independence for each person and each nation. The pressure of organized public opinion is a powerful weapon, but like the fight for freedom everywhere, it is not self-sustaining. It requires recognition, leadership, and restatement. Free countries everywhere must articulate their obligation toward those who died for the cause of freedom or who hold on to life only in the hope of freedom. Their cause must be highly placed on the agenda of international convocations. Otherwise the statesmen of the free world negotiate on a basis of expediency rather than principle.

The United States must adhere to principle. In 1892, both the Republican and Democratic Party platforms saw fit to condemn the Russian Czarist Government for the mistreatment and oppression of its non-Russian peoples and asked for equal rights for all. The principles of self-determination by all peoples were proclaimed by President Woodrow Wilson in 1917 and the Baltic Republics were welcomed into the family of nations shortly thereafter. The United States gave its enthusiastic welcome. There followed the Sumner Wells declaration on July 23, 1940, on the occasion of the Soviet aggression in June 1940. This declaration condemned predatory activities of one state against another. It condemned the use of force or the threat of force by nations against each other. It condemned the interference of one sovereign power into the domestic affairs of another. The declaration said in conclusion that unless these principles are followed, law and justice cannot be preserved and, indeed, the basis of modern civilization cannot prevail. Thereafter, the United States consistently refused to recognize the present absorption of Estonia, Latvia and Lithuania into the Soviet Union. We refuse to recognize the regimes that the Communists have established and maintained by force and by fraud in these countries. We recognize only the representatives of the independent Republics of Estonia, Latvia and Lithuania, and that is how it will remain.

All Americans should read the report of the Kersten committee—a select committee of the Congress under the chairmanship of Charles J. Kersten—which in 1953 and 1954 took evidence in two continents of the international crimes that had been committed by the Soviet Union against the Baltic States. The final report of and the documents assembled by the Kersten committee constitute the most definitive record that we have of a history of Soviet perfidy and of Soviet offenses against mankind.

Finally last year by congressional resolution and Presidential proclamation—the

Captive Nations Resolution and Declaration—we restated our demand for the restoration of independence to these nations of Europe. This is our goal.

The United States must rekindle the fires of freedom. On the international scene everywhere we must be the image of enlightened concern for the principles of freedom and human dignity upon which our own country was founded and for which we have fought.

We must do this by demonstrating our concern for human worth in every community, at home and abroad. Let us not, as Americans, neglect our own institutions or fail to recognize our own problems and shortcomings where they exist. Where, and to the extent that, we ourselves fail to accord full rights to every man in our own Nation, so we fail in our own effort to stop the spread of communism abroad. Where we face up to our shortcomings, so we strengthen ourselves in the battle for the freedom of other peoples. We do nothing in a vacuum. Everything is interrelated. And so it will be, more and more, in the challenging years to come.

Thank you very much.

MANIFESTO OF THE 20TH ANNIVERSARY OF SOVIET AGGRESSION AGAINST THE BALTIC STATES BY FREE ESTONIANS, LATVIANS, AND LITHUANIANS

Twenty years ago, the Soviet Union attacked the Baltic States. Some 300,000 Red army troops poured into Lithuania on June 15, 1940, and into Latvia and Estonia, on June 17, 1940. With the protection of this occupation army, the emissaries of the Kremlin—Dekanozov, Vishinsky, Zhdanov—unseated the legitimate governments of the Baltic nations. The Baltic countries were robbed of their independence and transformed into colonies of the Soviet Union.

The Soviet Union's assault against its Baltic neighbors initiated the Soviet westward march against Europe. Thus, the beginning of today's international tension and threat to peace may be found in the Soviet aggression against the Baltic States in 1940.

By its aggressive acts against Estonia, Latvia, and Lithuania, the U.S.S.R. broke the peace and nonaggression treaties it had signed with those states as well as other international agreements.

Expropriation, exploitation, pauperization, slave labor, suppression of human rights and fundamental freedoms, Russification, terror, murder, mass deportations—these are the marks of the Soviet occupation in the Baltic States. In committing these acts, the Soviets violated the United Nations Declaration embodying the Atlantic Charter, the United Nations Charter, the Convention on the Suppression of Crimes of Genocide, and the Universal Declaration of Human Rights—all these documents bearing the signatures of the U.S.S.R.

The Estonian, Latvian, and Lithuanian peoples, historically and traditionally Western in orientation and outlook, placed their hopes in the Western World. Their trust and reliance in the West was strengthened by the declaration of the U.S. Department of State of July 23, 1940; the statement of the President of the United States of October 15, 1941; the Atlantic Charter; the Yalta Declaration on Liberated Europe; the repeated statements by the U.S. Government about nonrecognition of the Soviet annexation of the Baltic States and continued recognition of their diplomatic representatives; and the proclaimed aims and principles of the United Nations.

The Baltic peoples have given active expression to their determination to regain freedom, and have resisted their oppressors, thus contributing greatly to the still continuing struggle for freedom and justice being waged by all captive peoples enslaved by the Soviet Union. Despite heavy setbacks and trials, our peoples maintain their faith in the restoration of their freedom and independence.

This summer the Soviet occupant will unveil a macabre spectacle—a festive celebration of the 20th anniversary of the enslavement of the Baltic States during which the captive Baltic peoples will be pressed to appear grateful to their conquerors.

We—free Estonians, Latvians, and Lithuanians—are conscious of our responsibility toward our nations and toward history. At this 20th anniversary of Soviet aggression, we feel dutybound to give voice to the aspirations of our captive peoples:

We accuse the Soviet Union of committing and continuing an international crime against the Baltic States;

We demand that the Soviet Union withdraw its military, police, and administrative personnel from the Baltic countries;

We request that the governments of the free world, especially those of the great powers, undertake all peaceful ways and means to restore the exercise of the right of self-determination in the Baltic countries and in the rest of east-central Europe;

We appeal to the conscience of all mankind to perceive the magnitude of the injustice perpetrated upon the Baltic countries and to support the efforts toward the restoration of the liberty of these countries;

We convey to our people at home our pride in their resolute resistance against the endeavors of the oppressor to destroy their national and personal identity;

We express to our peoples behind the Iron Curtain our deep conviction that the Soviet system—as all tyrannies throughout history—carries within it the seeds of its own destruction; that it cannot and shall not prevail;

We pledge to intensify our joint organized activity in the free world to promote the cause of liberty for the Baltic countries;

We, finally, declare to the free world and the Communist-dominated world, including the U.S.S.R., that, once free again, the Baltic nations will do all in their power to ensure the best possible relations with their neighbors on the basis of mutual respect for national sovereignty and territorial integrity.

Vaclovas Sidzikauskas, Chairman, Lithuania; Alfreds Berzins, Deputy Chairman, Latvia; Leonhard Vahter, Deputy Chairman, Estonia; Jaan Tiivel, Estonia; Eduard Vallaste, Estonia; Adolfs Blodnieks, Latvia; Vilis Hazners, Latvia; Dr. Vilis Masens, Latvia; Juris Siesers, Latvia; Msgr. Jonas Balkunas, Lithuania; Col. Jonas Slepetys, Lithuania; Dr. Antanas Trimakas, Lithuania, Members.

Protest Proposed Extension of the National Sugar Act

EXTENSION OF REMARKS
OF
HON. E. Y. BERRY
OF SOUTH DAKOTA
IN THE HOUSE OF REPRESENTATIVES
Thursday, June 16, 1960

Mr. BERRY. Mr. Speaker, under leave to extend my remarks I protest the proposed 1-year extension of the present National Sugar Act which would give to Cuba an unnecessary and an unfair windfall of some $15 or $16 million worth of sugar.

The House Agriculture Committee on almost a straight party line vote has passed a provision which would extend the National Sugar Act in its present form for an additional year.

Under terms of the act, Cuba is authorized to export into this country 3,119,655 short tons of sugar. This is bad enough, Mr. Speaker, when it is considered that the price Cuba will receive for this sugar imported into the United States is almost twice the world price, but this is only half of the story.

Under the existing law when offshore islands and American possessions are unable to meet their quotas, the quota that is thus unfilled is redistributed. Because of a shortage in Hawaii, Puerto Rico and the Philippine Islands, these countries will have a deficit of some 500,000 tons. Under the law 156,000 tons of this deficit would be assigned to Cuba, and under the law there is nothing this country could do except to assign this additional tonnage to Cuba. It would mean a windfall to Cuba of some $15 to $16 million.

Mr. Speaker, it may not be possible to rewrite the National Sugar Act this year and reduce the Cuban quota, but certainly it is not necessary for this Congress to extend the existing law and give to Cuba 156,000 tons, or a subsidy above the world price of some $6,800,000 at a time when Cuba will be spending that money to propagandize the balance of the Latin American countries against the United States and in favor of communism.

Annual Flag Day Program of Lodge No. 102, Benevolent and Protective Order of Elks, Altoona, Pa., June 15, 1960

EXTENSION OF REMARKS
OF
HON. JAMES E. VAN ZANDT
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, June 16, 1960

Mr. VAN ZANDT. Mr. Speaker, one of the most impressive Flag Day programs in Pennsylvania was sponsored by Elks Lodge No. 102 in my hometown of Altoona, Pa., on June 15, 1960, at 8:15 p.m.

It was a privilege to participate in the Flag Day program and to deliver the following address:

FLAG DAY, 1960, ADDRESS BY JAMES E. VAN ZANDT, MEMBER OF CONGRESS, 20TH DISTRICT OF PENNYSLVANIA, AT THE ANNUAL FLAG DAY OBSERVANCE OF LODGE NO. 102, BPOE, ALTOONA, PA., JUNE 15, 1960

Since the foundation of our order, the Elks have identified themselves with the cause of American patriotism, and have paid constant and conspicuous honor to the flag.

In addition, the BPOE has been in the forefront of the popular movement for national and public observance of Flag Day.

We of the Elks have made it our business to know the meaning of the Flag, and to fulfill our obligations of respect and love for the flag.

And finally, to give the flag's message of patriotism to all the citizens of our country, particularly the youth.

At this moment in history, when the disgraceful performance of Premier Khrushchev in canceling the scheduled summit meeting has offended America and damaged the prospects of international peace, it is a particularly appropriate time for Americans to rally, with enthusiastic unanimity, to the observance of this festival of our national unity and strength.

The flag, like the President of the United States, stands before the world as the symbol of the Nation.

The flag, however, is an impersonal symbol, nonpartisan, above any political dispute or disagreement.

It stands, in essence, for the spiritual ideals of America, for the virtues displayed by America's founders, and intended to be fostered by the Constitution.

Primarily, the flag stands for our national independence, and for the individual freedom of each citizen.

In our flag, we can read the basic meaning of those famous "checks and balances" written into our form of government.

This is the principle that each man's liberty is under the rule of law—that no man's liberty can be freedom to oppress another or invade his rights—that government itself, the guardian of our liberties and preserver of our rights, must be held back from invasion and injustice.

This is the principle of the rule of the majority—qualified by the important restriction that minority rights, and individual rights—must not be violated.

But the flag, this tangible, visible symbol of our country, stands for something more solid and perceptible than the ideals of freedom and justice that inspire us.

It represents the land itself, and its people.

Each of us, looking at the flag should bring before his imagination his own home, his family and friends.

He should think of, and visualize, the people and the surroundings he loves best, for there is the focal point of his patriotism.

Patriotism must spread out from self and family, from home and hometown, to encompass the multitude and the broad lands and waters of America.

A man's love of country, thus rooted in his native soil, and fostered by his relations with kin and community, stays real and practical and vivid as it grows to take in the scope of America.

The faces, and the landscape, that mean most in his life, should be firmly connected in his mind and imagination with the idea of the United States, and with the image of the Stars and Stripes.

He may think of a hero and a mountain, of his wife and a tree-surrounded home, of a child and a sea wave on the shore.

To some people, the fact that the flag means America may be brought home most forcefully in the experience, actual or remembered, of seeing it bravely flying in some foreign land, or on the broad expanse of the ownerless ocean.

Not only our land and people of today are represented by the flag however.

This vast expanse of land, this great variety and number of people, is not enough to exhaust the depth of symbolism in the flag.

All the history of America lies in those folds, those red and white stripes, those white stars in the blue field.

In the 13 stripes—in the 13 stars—with which the flag was provided when it first met the breezes of the earth and the light of heaven—we preserve at once the memory of the Thirteen Colonies, so long ago established.

We recall their existence before they rose to demand their independence.

We preserve at once that memory of long ago, and the present existence of those same colonies as sovereign States in our great Union.

We of the Commonwealth of Pennsylvania are justly proud of our place among those Thirteen Original Colonies.

As we look at the flag we see our own colony—with its heritage of religious faith and toleration—with its memory of William Penn and his even-handed justice—with its strong central position in the establishment both of the confederation and of the Union.

It was in Philadelphia that the delegates from the colonies signed the Declaration of Independence.

It was in Philadelphia that the delegates from the States signed the Constitution.

Thus, Pennsylvania has played a major part both in making us free, and in making us one.

The Brandywine, the Delaware, and Valley Forge, will live in American history as long as the hearts and minds of men remember the youth of our country—and the sacrifices brave men made that they, and their sons, might be free.

Here in our flag is enshrined our political structure—what Chief Justice S. P. Chase, in 1868, defined as an "indestructible Union composed of indestructible States."

Each State is represented by a star, though we do not assign a special, numbered star to one named State.

Here, in physical, visible form, is shown the fact that our Nation is composed of many distinct political entities.

The flag is, in a sense, a pictorial representation of the ancient motto of our country: "E Pluribus Unum."

By a triumph of political wisdom, and by agreement forged out of a great conflict of keen minds and strong wills, the delegates to the Constitutional Convention worked out a system of government.

This system of government has stood the test of well-nigh two centuries of time, of civil and foreign wars, of prosperity and financial disaster, and of tremendous growth in territorial extent and in population.

The amendments we have made to the Constitution have not been real alterations, to the structure of the document, and to the structure of the government envisioned in the document.

In the flag today, as it represents our Government under the Constitution, we see the working of the structure envisioned by men of high philosophic thought and earnest devotion to principle.

Their efforts brought into being the cooperation of practical politicians, businessmen, and lawyers, who, through the years, have plugged the gaps and smoothed the rough places in this bold device for harnessing liberty and justice in one ordered team.

From our childhood, we have connected the red of the flag with the thought of the blood of heroes.

Certainly no American patriot can look at the flag without some thought of those who have died, on their native soil or abroad, on land or at sea, fighting under the flag and in its defense.

That banner waved over the victory of Yorktown as over the brave defense of the Alamo.

Men have bled for it in the mountains of Korea, as on the plains of Kansas.

In that flag we find the idea of courage, courage to live and die for our country, and for the ideals that make our country great.

The red is the red of our hearts' blood, whether poured out in brave sacrifice on the field of battle or surging in a living tide of hope and ambition for the service of the Nation in a time of peace.

We are inclined, too often, to forget our youthful idealism and enthusiasms, and, in particular, not to think of the flag except when it is brought forcibly to our attention by some official occasion such as the present.

Each of us needs, I am sure to think over his way of life, and see if patriotism and the flag that is the visible symbol and token of patriotism, plays a sufficiently large part in his home and daily routine.

Each citizen should have a flag—that goes without saying.

But, having a flag, it is incumbent upon him to show it proper respect and reverence in all ways.

He should keep it clean and covered when it is not flying—to protect it from any indignity or neglect at all times—and to raise and lower it, on appropriate occasions, with solemn though simple ceremony.

A man should go out, early in the morning of a national holiday, to put his flag out, not in the casual manner of one getting the morning paper or taking in the milk, but with some slight ceremony.

I know one man, for example, who makes a point of having his little children go out with him, and then, when the flag is flying, they recite together the pledge of allegiance.

It is a simple matter—easy and not at all time consuming—but it is likely to give the little children a memory that time will not erase from their minds.

At home—in school—in youth organizations such as the scouts—respect and honor for the flag must be taught with constancy and enthusiasm.

Our children must come to manhood and womanhood with a sure understanding—a confident resolve—so that they will be ready to serve their country in time of need with earnest devotion.

One of the most essential elements in the education of American youth is education in the meaning of the flag—and in the loving service that is due from each of us to the flag—and the country for which it stands.

When a woman comes to be a wife and mother, when a man is called to be a soldier, sailor, or airman—then it is too late for this basic training in patriotism.

If a person's heart and head are 4–F in this matter of patriotism—a healthy body and mental keenness will do us no good.

Last year and this year are great times in the history of the flag, and we should do our best to emphasize, in our own consciousness and in the public mind, the importance of the tremendous events that have changed the look of the flag, twice in 2 years.

We have acquired, as of last July 4, a star representing a vast new State—a land of magnificent scenery, great variety of climate, and a people of vigor and ambition to match the resources and scope of their land—the great new State of Alaska.

Tonight I have the honor to present to the Elks of Altoona a flag, not yet legally the flag of the United States.

It is the flag of the United States of the future—in this case definitely the foreseeable future—since it is established by law that this 50-star flag will become officially the flag of the United States on July 4, 1960.

The 50th star, thus to be added to our flag, and now visible in this preview, is a star of many particular glories.

The State of Hawaii, for which it stands, shares with Texas and California the distinction of having been an independent nation before seeking annexation by the United States.

Hawaii, too, stands in an unusual position in being far overseas from the mainland of the United States.

We warmly welcome to our Union a sovereign State of romantic history—of well-developed culture—of a high standard of education—of thriving agricultural, manufacturing, and commercial prosperity.

This independence day will be a day of special joy and pride for those most deeply concerned with the relations between America and the Orient—for we have—by welcoming Hawaii to the society of equal States, accepted the equal partnership of a people predominantly, oriental in ancestry.

I am sure that our Altoona Local Lodge No. 102 of the Elks will boldly continue its long-established custom of furthering, by word and example, the strict observance of flag etiquette.

These are forms, as you and I are deeply aware, of vital inward meaning, and of importance in forming the character of the citizen.

I think of the casual word spoken to me the other day by a young man:

"You know, maybe it's my military training, but I just like to see the flag folded up the right way."

These matters are not so small as they look.

The man who has learned a particular way of folding the flag, in scouts or military or anywhere else, has a routine in mind, but a routine with meaning.

There is a practical meaning—the flag folded up the right way when hoisted on the pole, will unfurl properly at the top.

When the flag is folded, it is in the shape of a compass, and easily stored.

By showing a portion of the union, it is instantly identifiable as the flag, and cannot be confused with striped bunting.

Finally, each of us owes to the flag the affection and respect that he owes to the persons nearest and dearest to him.

For after all it is those persons, themselves, who are at the heart of the symbolism of the flag we honor on this Flag Day of 1960.

Address by Senator Mike Mansfield, of Montana, at 58th Annual Session of Inland Empire Education Association

EXTENSION OF REMARKS

OF

HON. HENRY M. JACKSON

OF WASHINGTON

IN THE SENATE OF THE UNITED STATES

Thursday, June 16, 1960

Mr. JACKSON. Mr. President, I ask unanimous consent to have printed in the CONGRESSIONAL RECORD a significant address by Senator MIKE MANSFIELD before the 58th annual session of the Inland Empire Education Association in Spokane, Wash., on April 8, 1960.

This address, entitled "The State of Our Foreign Relations," reflects the exceptional understanding, analytic ability, and constructive outlook of the distinguished assistant majority leader. This address should have a wide reading.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

THE STATE OF OUR FOREIGN RELATIONS

(Address by Senator MIKE MANSFIELD, Democrat, of Montana, 58th annual session of the Inland Empire Education Association, Spokane, Wash., April 8, 1960)

An invitation such as you extended to me is an invitation to come home. It is an invitation to think through old questions in the fresh but familiar perspective of this wonderful part of the Nation.

Of these questions, that of foreign relations is most compelling. As Americans, we need to understand the problems of foreign relations because none of us escapes their consequences. As teachers—I am still one of you although my membership in the club has temporarily lapsed—as teachers, we need not only to understand these problems but also to stimulate the capacity of others to understand them. We need especially to convey something of their meaning to the young people who must live in the world which our foreign policies now are doing much to shape.

Let me say, at the outset, that foreign relations are not the products of alchemy. They are the consequences of human acts. As such they are not beyond normal human comprehension. To be sure, the conduct of foreign relations is largely in the hands of specialists and that is as it should be. But in a Nation such as ours, the work of these specialists needs the understanding and broad guidance of our people if it is to be done most effectively.

Foreign relations arise because each nation in the world, as it comes into contact with others, has its hopes, its interests, its fears. Each expresses these national drives in its foreign policy. If the policy is effective, it advances the hopes and interests of a nation, not at the expense of others, but by the process of reconciliation and accommodation. In so doing, it mitigates the fears on all sides. In so doing, it acts for peace.

To put it briefly, an effective foreign policy is one which serves national needs in a complex world, a world of many nations, and many needs, by methods other than those of the jungle.

How do we grasp the essence of these matters? How do we convey an understanding of them to others? These are questions which have preoccupied me for some time, particularly in anticipation of this meeting with you who are specialists in the process of understanding the complex and helping others to learn to understand it.

It seems to me that we do not begin to appreciate the dimensions of the problems of foreign relations, if we employ as yardsticks such familiar terms as isolationism or internationalism. These are ambiguities of the past and they do not help us in the present. As far as isolationism is concerned, I think that, as a nation, we have long since recognized the impracticability of a policy designed to insulate ourselves or even the Western Hemisphere from the massive currents which flow through the world and the storms which beset it. The military conflicts, three in the lifetime of some of us, have dispelled the illusion of isolation. As a more recent reminder, if any is needed, I call to your attention the Soviet test rocket which dropped into the Pacific some weeks ago. It landed about an hour after it had left a launching pad almost 8,000 miles away.

I do not think it is necessary to labor the point. It is clear that, for better or for worse, we are in and of this world or, in these days of space exploration, perhaps I should say in and of this universe. It is obvious that it will be for worse rather than better if we close our eyes to that fact or try to pull the cover over our heads to shut out that fact.

I do not say that the urge to isolationism, this urge to escape from reality, is gone entirely from the Nation. It is there to some degree, but it is no longer the principal source of our difficulties in foreign relations. The present problems come more, I believe, from a rather widespread belief that all which is classifiable as internationalism has, per se, a special claim to virtue.

The fact is there are no panaceas in an indiscriminate embrace of internationalism any more than there is escape in isolationism. That is the point I wish to stress most strongly. Let me illustrate it by a story which, since you are teachers, may shock you, but a story whose meaning will not be lost on you. As teachers we know, I think, better than most, of the immense value to our relations with other nations, of improving our abilities in foreign languages. In recent years, the teaching profession has given great emphasis to the study of languages and the Government has taken steps to encourage it. That is a most desirable development. What we may overlook in our present enthusiasm for this great tool, however, is that it is only a tool. It is not a foolproof guarantee of effective foreign relations. The story with which I wish to illustrate the point is that of an American diplomat in Latin America some years ago. He made public statements which did a great deal of damage to our relations with that part of the world. Yet he spoke these statements in perfect Spanish, of which he was a master. The Latin Americans were astounded by his knowledge of Spanish. They were even more astounded and, in addition, were infuriated by what he said in Spanish. Obviously, here was a case where our relations might well have profited from someone with rather less capability of communicating in that language.

As it is with languages, so it is with policies of internationalism in general. It by no means follows that if 5 American military bases abroad are helpful, 10 will be doubly helpful. It by no means follows that an aid program which costs $5 billion a year will be five times more useful than a program which costs $1 billion. It by no means follows that if 20 American representatives are doing an effective job in a country in Asia, 200 representatives will increase the effectiveness by a factor of 10. It by no means follows that each additional agency added to the United Nations system will increase the total contribution which that usful system makes to peace. In short, in any category of action, not excluding international action, it is possible not only to go beyond the point of diminishing returns but even to the point of increasing loss.

What I am suggesting, then, is that we need to divest ourselves of the notion that all policies, all acts automatically are to be sanctioned if they are classifiable under the general heading of internationalism. There can be illusions no less misleading, no less dangerous to the hopes and interests of the Nation in this generalization than those which appeared at an earlier time in the guise of isolationism.

The basic problem of maintaining effective foreign relations and of building peace, insofar as we can contribute to it, lies not so much in more policies or more machinery but in giving fresh direction to existing policies and in refining the machinery by which these policies are now pursued. If we would meet this problem we need, first, to see the world as it is. We need to see it as it is now, before we can reasonably hope to see it as we should like it to be. We need to see our present policies as they are, rather than as we imagine them to be.

No illusion in our present understanding of the world is more misleading than that which assumes that there has been peace since a truce was signed in Korea in 1953. To equate the present situation in that country or, indeed in most parts of the world with peace, may well be to equate it with the period of 1940 in Europe, the period of the so-called phony war just prior to the German drive into the lowlands and France or with the state of Japanese-American relations on the eve of Pearl Harbor.

If it is enough to define peace as the immediate absence of gunfire then I suppose the present world situation, on the whole, may be so regarded. But if peace means to you what it means to me, a reasonable assurance that the young people whose education is now in your charge shall have an opportunity through that education to develop their potentialities and to grow into constructive maturity without the ever-present prospect of sudden and immense devastation being visited upon them, then the present situation cannot be defined as peace. We have a long way to go to peace. To create the illu-

sion that we have already arrived at it, is to do a grave disservice to the Nation. That, may I say, is one of the principal dangers of goodwill tours and meetings at the summit, whatever advantages they may offer.

We shall not achieve peace by studying the applause meters or the comparative Hooper ratings of Mr. Khrushchev and Mr. Eisenhower in India or France or wherever else they may visit. The road to peace does not lie in the winning of international popularity contests. Rather, it lies in the reduction of the fears which push nations and systems of nations toward military clash. It lies in a frank recognition of conflicting national interests and ideological hopes and, if they cannot be reconciled at this time, in turning them away from the channels which lead to the nuclear destruction of a recognizable civilization in the world.

If we scan the principal regions of the world we shall be able to discern quickly that there is no peace in this sense, but, instead, a series of points of potential conflict. In the Far East, these points are to be found in Korea, in the Formosan Straits and in Indochina. In each of these areas, a truce written or unwritten prevails. The truce conceals but it does not heal the ideological and political divisions which plague the Korean people, the Chinese people, and the people of Vietnam and Laos. In the case of Korea, the 38th parallel is still guarded 24 hours a day on both sides. In the Formosan Straits, Chinese Communist guns fire from the mainland at the outpost islands of the Nationalists—at Quemoy and Matsu—every other day. In Indochina—in Laos—there was a narrow escape from a large-scale conflict just a few months ago and the situation remains unstable. In Vietnam a rigid division separates the Communist north from the free south and shows no signs of closing in peace.

In short, throughout the Far East, there exists, in excess, one of the most common precipitants of war—unnatural political divisions of peoples who are in reality deeply united by culture, by geography and by history. I shall not review the circumstances which brought about the divisions. All of them, to be sure, are overlaid with the ideological schism between communism and freedom. But each division, too, has its own local characteristics. It is to these characteristics no less than to the broader ideological question which we must look if there is ever to be a full understanding of the situations, and, hence, a chance for them to evolve in the direction of a stable peace. That refinement of the problem in policy has yet to begin.

Until it begins, a basis does not exist upon which to proceed toward peace. Any suggestion that our policies have actually produced peace in these areas is gravely misleading. It obscures the problems which sooner or later, may well engulf in conflict not only those peoples immediately involved but the world and ourselves as a part of it.

What our policies have done so far is to buy time in the Far East. We have spent billions through the deployment of our own Armed Forces in that region and through aid programs to hold the line against a Communist advance. Thousands of American and other lives were sacrificed to the same end in Korea. But I repeat: All we have done so far is to buy time in the Far East.

If we look elsewhere in Asia, to China, we find still another common cause of conflict. We find a nation recently revived from a long slumber which had been induced by an inner decay and by outer pressures upon it, now being revived under the forced draft of a militant totalitarianism. This revived China tests its new-found strength in an aggressive and brutal probing into territories of its neighbors. The China of today is a China which is vastly different—so far as we can judge, for our information is all second hand—from the China to which we were allied during World War II. It is a China in which tens of millions of young people are coming of age with no direct knowledge of Americans but with an induced hatred of this country and its institutions.

Let no one underestimate the long-range effect of these years of animosity between ourselves and China. It is, to say the least, illusory to talk of peace while the animosity is present in virulent form. It is illusory to talk of peace with a China on the march, not in the paths of progress by accommodation with other nations but in the ancient way of empire under a canopy of modern totalitarian trappings. I do not say that this development—this emergence of a new and bristling China—in the heart of Asia must lead inevitably to war. I do say that I see little in it or in our policies with respect to it which warrants the assumption that we are at peace.

Moving westward to the Middle East, here, too, we find a situation which by no stretch of the imagination can be identified as peace. Rather, it is a situation of suspended war. On repeated occasions in the past, the suspension has all but ended in grave border clashes. On two occasions, at the time of the Suez crisis, and in connection with the Lebanon crisis, the world dangled with one foot over the brink of disaster. Our political intervention at the United Nations in connection with the Suez crisis may have forestalled a total collapse in the Middle East. Our military intervention in Lebanon may have had the same effect. But Communist peneration of that area—economic and political—has not been curbed nor has a basis for peace been established.

The Eisenhower doctrine on the Middle East was intended to help achieve both objectives. So, too, have the enormous sums of public funds which have been spent on various kinds of aid to that area. Yet both have proved remarkably ineffective.

It is conceivable that we may have helped to hold back the floodwaters of conflict in that region by our acts of intervention and by our aid, but we have done little if anything to disperse or to rechannel them constructively. And behind the barriers which our policies have tried to build, the floodwaters are accumulating in a dangerous fashion. Each outbreak in the Middle East appears less controllable than its predecessor. In these circumstances it is, to say the least, illusory to talk of peace.

If there is grave instability in the Middle East, the same is true for Africa. New forces are at work in that continent which we are just beginning to recognize in policy, let alone understand.

For decades Africa was preponderantly a region acted upon rather than a region which acted in international relations. Since the end of World War II, however, seven new nations have come into being in Africa. This year, an additional five are scheduled to achieve independence and more will follow in due course. This enormous and rapid political change alone is sufficient to bring about massive problems of readjustment. But it is not only a political upheaval which rumbles through that great continent. Other forces common to all the underdeveloped nations, from eastern Asia to Latin America, are felt no less strongly in Africa. The urge is there, for human equality and for a continuing and rapid modernization, with its promise of economic and social benefit to all peoples. The urge is there, but the means to satisfy it adequately in peace have yet to be devised either by the African nations themselves or in concert with others.

Again, Africa is in danger of being more acted upon rather than acting itself in international affairs as it finds itself increasingly the focal point of rival ideologies and systems. This competition for African favor may be flattering to the Africans for the moment but it contains accumulating dangers to them and to peace. The dangers will be curbed only as Africa, increasingly, finds its own way in the world, largely by its own genius and efforts. I venture to say that if the continent is not sidetracked by the blandishments from outside during this transition, if it does not become careless with the strong new wine of national independence, it will in due course make an enormous and unique contribution to the progress of mankind and to peace.

I should note in this connection that with the political transition in Africa, the composition of the United Nations General Assembly is changing in a fashion which assures a decisive voice to the Afro-Asian nations. As you know, it is in the General Assembly that expression is given to worldwide aspirations. We can hope that the Afro-Asian nations and this Nation will more and more see the problems of peace and freedom in similar perspective and that their voice will be raised in harmony with our own. That is, however, by no means a certainty. If much depends on the manner in which the African nations develop and use their newly achieved freedom, much also depends on the wisdom and the sensitivity of the policies of the older free nations toward the changes which are taking place in the emergent African Continent.

Much closer to home are the problems of peace in Latin America. Notwithstanding the President's recent good will tour we are still faced with the need for harmonization of Latin American interests with our own. Beneath the facade of hemispheric unity there are deep divisions and much dissatisfaction particularly in economic matters. Fortunately, the present state of our relations with Cuba is not typical of our Latin American relations. But, then, neither was the very warm welcome extended to President Eisenhower in any way typical. As a man of good will, Mr. Eisenhower invariably evokes a response of good will. A firm basis for sound relations, however, is not conjured up out of ceremonial journeys of less than 2-week duration. Such journeys may open doors but the problem of keeping them open is one of followthrough in policies.

It seems to me that the need now in inter-American relations is a broad movement forward to new and higher grounds of hemispheric understanding and cooperation. We need this development in inter-American education and cultural exchange no less than in defense. We need it in economic matters no less than in political questions. And if our great neighbor to the north, Canada, is so inclined, we should welcome its participation in any and all matters of hemispheric interest. Unless this movement forward begins soon and in earnest, I am afraid we may anticipate in this hemisphere whose solidarity is an essential of peace, at worst, more sharp clashes in the present Cuban pattern and at best, a steady erosion of hemispheric intimacy which will increasingly drain inter-American ideals of their substance.

Turning next to Europe, we find there, too, an illusion of peace which masks deep and dangerous divisions. That is particularly the case in Germany but it is also true of the entire continent which is split asunder by the ideological cleavage. Across the chasm only rickety bridges of contact are maintained.

If there is a need for progress toward unity in the divided countries of Asia, there is a compelling need for progress toward unification in Germany and for a growing reconciliation between Eastern and Western Europe.

Until recently, at least, our policies on Europe had remained unchanged in essentials for a decade. We have been engaged

in a vast holding action in the fear that the Russians might attack Western Europe, a fear which was intermingled with the hope that sooner or later the Russians would withdraw from Eastern Germany and Eastern Europe. To that end, we spent billions to rearm Western Europe and to maintain our forces in that region. The Russians, similarly, have engaged in a vast holding action—an action in the expectation that Western European freedom would fall prey to communism and an action to hold on to a dominance in Eastern Europe which they had obtained in consequence of World War II. To that end they have kept military forces in the Eastern European nations and rearmed those nations and, until the advent of Mr. Khrushchev, minimized contacts between East and West.

It is increasingly clear that these policies have not led to the achievement of the aims of the one side or the other. The Communist grip shows no signs of weakening in Eastern Europe and freedom has come back with great vitality in Western Europe.

Certainly, the policies now pursued have not led to peace. They have been, on both sides, holding actions which have produced, at best, an unstable truce based upon a Germany split inside the larger split of Europe. That the truce is highly unstable was indicated by the first German crisis last year. This crisis arose out of the mere announcement that the Russians intended to change one factor in the situation: that is, to withdraw from Berlin and the routes of access to the city in favor of the East German Communists. It is ironic that a Russian announcement with a withdrawal, of all things, should produce a crisis; yet it did so, for the move threatened to upset the present delicate balance which depends, with equal irony, on the continued Russian presence in Eastern Germany.

In the round of good will tours and conferences, the Russians were persuaded to remain a while longer in Berlin and Germany and the crisis eased. The source of crisis, however, remains in the outdated policies of both sides in Europe. In short, the tours and conferences have served as safety valves but I need hardly emphasize the danger of relying indefinitely on safety valves. Sooner or later, it will be necessary to come to grips in a practical fashion with the problems of a divided Germany and a divided Europe. The visiting back and forth, notwithstanding, the promise of peace will be illusory until the divisions in Germany and Europe begin to close in peace on the basis of policies attuned to today's realities rather than yesterday's expectations.

In the same fashion, the problem of control of armaments—armaments of massive destruction in particular—must begin to yield to tangible solution before we can talk of peace in any meaningful fashion. We have watched the mathematical progression in the development of the megaton power of these weapons since the end of World War II. The Russians, the British, no less than ourselves, have advanced from a capability of destroying cities to a capability of destroying nations, to a capability of destroying civilization. The number of nations able to produce such weapons has increased from one in 1945 to four in 1960 and is subject to further increase if other countries who have the capacity decide so to deploy their science, technology, and energy. The missiles of delivery have improved, from the crude but destructive V-bombs which carried devastation to London in the closing days of World War II to those which encircle the moon and the sun in 1960.

All the while the wisest humans among us, the most compassionate humans among us have warned the world of what it is about in this deadly race for greater and more certain means of human annihilation. All the while, there have been disarmament conferences in which these words of the wise have been echoed with a remarkable unanimity by all nations. Yet a decade and a half has passed and we have yet to achieve a single agreement, signed and sealed, for the control of armaments. I do not wish to minimize the difficulties involved in this process but surely there is something amiss, something illusory when all endorse the warnings of wisdom, when all agree on the extent of the danger to all and yet agreement is not achieved which makes possible even the beginnings of a beginning of substance on this critical problem.

In 1955, I suggested that a summit conference be held on the one question of ending the testing of nuclear weapons. Five years later, we may be on the verge of such a conference. If it can now produce this one achievement it will mark a major, if long-delayed, step forward. Important as it would be, however, this achievement will be but the start of a long road. Until there exists a firm pattern for the progressive extension of international control over armaments we will do well not to speak of peace as prevailing in the world. This pattern, moreover, is not likely to be established until the political differences and divisions which I have been discussing begin also to yield to practical and progressive solution. In this connection, I may be wrong and I hope I am wrong but I see little likelihood that the current session of the disarmament conference in Geneva, anymore than its innumerable predecessors, will lead to any agreement of substance.

If I may summarize, then, let me say that the United States has made, in the past decade, a vast international effort. That effort has helped to keep open the prospect for peace but it has not yet begun to produce conditions of peace in any significant degree. In no single instance is this more evident than in foreign aid. We have made available for such purposes, funds approaching $100 billion since the end of World War II. The great bulk of this aid has gone to restore the damages of war or to hold by military means existing situations against deterioration. The positive aspect of aid as it is currently expressed in the point 4 program of technical cooperation and in loans for modern development has a relatively small part of the total aid program ever since the Marshall plan came to a successful termination. In the current year, for example, the President has requested $4.1 billion for foreign aid. Of this total, however, only $200 million is for point 4 aid and $700 million for development loans. By contrast $2 billion is for military aid and $700 million for military-related defense support.

In short, we will do well to recognize still another illusion in our policies; namely, that the vast amounts of aid now being spent is of a kind which necessarily builds conditions of peace. By far the larger share, as I noted, serves primarily to hold existing situations as they are and only a relatively small proportion goes into the constructive effort which is essential in Asia, Africa, and Latin America if we are to have a reliable peace.

Many Members of Congress who recognize the importance of foreign aid in the conduct of our foreign relations have been pressing for years to bring about reforms and refinements in this program. We have sought and we will seek again to consolidate fully the functions of the aid agency with those of the Department of State. We have sought and we will seek again to give added emphasis to economic aid as contrasted with military aid. We have sought and we will seek again to substitute as far as possible long-term loans on easy terms for large grants of aid. We have sought and we will seek again to protect and advance the point 4 concept, that is, the people-to-people type of technical assistance. We have sought and we will seek again to bring about a united aid effort which draws increasingly on the cooperation of Western Europe and Japan, whose recent progress has been such as to enable them to assume a much larger share of the initiative and the cost of assisting the less favored nations.

Discriminating changes in any major governmental undertaking such as foreign aid are hard to bring about by action from Congress. We can alter legislation as we have done, or pass new legislation, but in the last analysis, effective change depends even more on the administration which has the responsibility for giving effect to the law. In this connection, I would call to your attention the fact that on two separate occasions in the past Congress voted to abolish the aid agency and turn its functions over to the Department of State and the Department of Defense. And two times this action was reversed by the administration which, on each occasion, reconstituted the aid agency under a different name. Despite such setbacks, some progress has been made in streamlining and improving the administration of the aid program but much still remains to be done.

The aid program is, in many ways, typical of our foreign policies as a whole. The problem of bringing about effective foreign relations lies not so much in new policies and new machinery as it does in sharpening existing policies and refining existing machinery. The absence of clear-cut, attainable objectives and the moribund administration of the aid program—as a recent Senate study of the program in Vietnam made clear—are principal weaknesses in foreign aid. So, too, are these factors of weakness in our foreign policy as a whole. I have no desire to minimize the tasks of the President and Secretary of State in these matters. Theirs is an exacting responsibility. Nevertheless, it seems to me that there is a great need to look beyond and to act beyond the expensive holding action in which we are now engaged throughout the world. We need to see anew the facts of the divisions in Asia no less than those in Europe. We need to think anew the costly and ineffective effort merely to keep the situation as it is in the Middle East. We need to recognize fully the defects of the aid effort in Asia, no less than in an emergent Africa and in Latin America. We need to sharpen the policies by which we deal with these problems, in the hope that the problems may begin to yield to practical solution. In short, we need a new determination and a new approach to foreign relations which will move the Nation forward from this costly, lackadaisical and dangerous illusion of peace toward the reality of peace.

Protest Against Small Business Administration Policy and Matters Pertaining to the American Economy

EXTENSION OF REMARKS
OF
HON. JOHN H. DENT
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, June 16, 1960

Mr. DENT. Mr. Speaker, I know this session is about to end and adjourn sine die.

Even so, I must call to the attention of the House a serious matter and one that will effect every nook and corner of our country, our economy and our national well-being.

Recently at the request of a fellow Member of Congress, my friend and associate, FRED SANTANGELO, of New York, I had luncheon with an American small businessman.

The story he told about certain interpretations and rulings made by the Small Business Administration astounded me and caused me to do a little checking into matters that I believe should be checked by this Congress.

The case I present is only one of many that will be uncovered if a committee of this Congress will take the necessary steps to set up a proper and vigorous board of inquiry into the whole area of foreign influences and impacts upon our domestic economy.

The question herein involved is one that goes deeper than the setting aside of congressional intent and is intermeshed with the whole picture of foreign aid, trade, imports, exports, intrigue, collusion, national defense, national welfare, quotas, migration, immigration, and the complete gamut of greed, avarice, and exorbitant profits.

It spells out the serious impact upon national thinking by a new and powerful group, the foreign importers, foreign investors, and special interest groups whose influence is felt in legislative action in the many acts creating and perpetuating money lending, credit giving, concession granting agencies. The opening wedge covered in this case can be the pry needed to unlock the bolted doors that have kept Congress from the whole truth of deceit, profiteering, kickbacks, and other questionable practices that have been fed to the American public as an excuse for foreign relations in the better part of the past decade.

You may wonder why I bring in the whole field of trade and aid, in a simple little case involving less than $5,000.

I do so because in this case we may find the straw that is breaking the camel's back. If an agency of Government created by the Congress for one specific purpose can circumvent the pronounced and spelled out will of the Congress of the United States, then maybe other agencies spending millions, even billions of taxpayers' dollars can be operating in the same mistaken area of disregard not alone for Congress, but in the main, for the people of the United States.

The invitations for bidding upon Small Business Administration contracts contain the following langauge:

NOTICE OF SMALL BUSINESS SET-ASIDE

Bids or proposals under this procurement are solicited from small business concerns only, and this procurement is to be awarded only to one or more small business concerns. This section is based on a determination by the contracting officer, alone or in conjunction with a representative of the Small Business Administration, that it is in the interest of maintaining or mobilizing the Nation's full productive capacity, in the interests of war or national defense programs, or in the interest of assuring that a fair proportion of Government procurement is placed with small business concerns. A small business concern is a concern that (1) is not dominant in its field of operation and, with its affiliates, employs fewer than 500 employees, or (2) is certified as a small business concern by the Small Business Administration. In addition to meeting these criteria, a manufacturer or a regular dealer submitting bids or proposals in its own name must agree to furnish in the performance of the contract, supplies manufactured or produced in the United States, its territories, its possessions, or Puerto Rico, by small business concerns; provided, that this additional requirement does not apply in connection with construction or service contracts. Bids or proposals received from firms which are not small business concerns shall be considered nonresponsive.

Further, let me quote from title 13—Business Credit and Assistance—chapter 1, Small Business Administration—121.3–8—Definition of small business for Government procurement:

(a) Small business definitions. A small business concern for the purpose of Government procurement is a business concern, including its affiliates, which is independently owned and operated, is not dominant in its field of operation and can further qualify under the following criteria:

(1) General definition. Any business concern (not otherwise defined in this section) is small if: (1) Its number of employees does not exceed 500 persons; or (2) it is certified as a small business concern by the Small Business Administration.

(2) Construction industry. Any business concern in the construction industry is small if its average annual receipts for the preceding 3 fiscal years do not exceed $5 million.

(3) Food canning and preserving industry. Any business concern in the food canning and preserving industry is small if its number of employees does not exceed 500 persons exclusive of agricultural labor as defined in subsection (k) of the Federal Unemployment Tax Act (68A Stat. 454, 26 U.S.C. (I.R.C. 1954) 3306).

(4) Petroleum refining industry. Any business concern in the petroleum refining industry is small if its number of employees does not exceed 1,000 persons and it does not have more than 30,000 barrels per day crude oil capacity from owned and leased facilities.

(d) Definition of a small business nonmanufacturer. Any concern which submits a bid or offer in its own name, other than a construction or service contract, but which proposes to furnish a product not manufactured by said bidder or offerer, is deemed to be a small business concern when:

(1) It is a small business concern within the meaning of paragraph (a) of this section, and

(2) In the case of Government procurement reserved for or involving the preferential treatment of small businesses or one involving equal bids, such nonmanufacturer shall furnish in the performance of the contract the products of a small business manufacturer or producer which products are manufactured or produced in the United States: *Provided, however,* If the goods to be furnished are wool, worsted, knitwear, duck, webbing, and thread (spinning and finishing), nonmanufacturers (dealers and converters) shall furnish such products which have been manufactured or produced by a small weaver (small knitter for knitwear) and, if finishing is required, by a small finisher.

It would seem clear to any elementary school graduate that up to this point anyway, the set-aside provisions for Government procurement were established for one purpose and one purpose only, namely, to keep small business in America ready and producing in times of peace to be ready in times of war, coupled with the compelling need to keep all segments of our productive security economically sound and participating in the benefits of tax dollar spending by Government.

To think or act otherwise is contrary, in my humble opinion, to both the will of Congress and the welfare of our Nation in both peace and war.

In the face of the above plainly stated requirements, the Small Business Administration ruled in favor of an import firm against an American producer on Invitation Bid DA–Eng–11–184–60 B/E 485 JD dated April 15, 1960.

At this point, allow me to put into the record facts pertaining to this particular case that I believe will show to the Congress the utter disregard for the intent and will of the Congress involved in this decision.

Quoted below is an excerpt from a letter of protest from Union Instrument Corp. on the decision by the Small Business Administration to award a contract for foreign-produced goods:

The low bidder on the invitation was Geo-Optic & Paper Corp., who offered a price of $2,876.50 against our offer of $3,570. Since Geo-Optic & Paper Corp. is an import firm dealing mainly in foreign products, it has been determined that they plan to have steel blanks made in this country, and then forward them to Germany for the major and important part of the production—that is, calibrating, engraving, and finishing of the end products.

This matter was discussed in a lengthy meeting with Mr. James Mills of your office, attended by our Mr. Scavuzzo, and Mr. Q. Johnson, and Mr. Arthur Chodosh, attorney for our company. Mr. Mills did not give us any satisfactory explanation for disregarding the small business set-aside procurement provisions of the invitation and the provisions of the statutes and regulations governing such procurements.

Mr. Mills cited a case of a foreign produced cable imported to this country to which was attached a tip representing about 4 percent of the value of the finished product, which was qualified by the Small Business Administration as a product and manufactured in the United States. Mr. Mills took a box of pencils from his drawer and stated that in his opinion the pencils and box could be manufactured in a foreign country and could qualify as a product produced in this country if the importer simply sharpened the pencils in this country prior to sale. These were cited as the basis for the interpretation applied to our case.

At the end of a long discussion, starting in the morning, and finishing after lunch, Mr. Mills stated that he thought that an error might have been made, but could not offer any means of rectifying this error. This error, of course, is at our expense.

If our interests were to be protected, and to avoid a repetition of such strange interpretations, we felt that we were left with no alternative but to refer this matter to our Congressmen for clarification. We discussed this with a number of Members of Congress, and were referred to the U.S. Senate Select Committee on Small Business. After numerous discussions, we are now firmly convinced that this decision of yours is in violation of the terms of the invitation covering the small business set-aside provisions, and the statutes and regulations covering such procurements.

May we have your early reply to our protest?

Yours very truly,

UNION INSTRUMENT CORP.

After reading the protest, I asked the Union Instrument Corp. officials to send me a report on the whole matter which I now make part of the RECORD.

A

UNION INSTRUMENT CORP.,
Plainfield, N.J., June 6, 1960.

The Honorable JOHN DENT,
House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN DENT: My meeting with you on Thursday, June 2, was an honor and a pleasure. Your grasp and understanding of the problem concerning a decision made by the Small Business Administration procurement as to foreign-made products was most gratifying.

Enclosed you will find a copy of a memorandum covering the facts in the decision which we are protesting. This decision, if allowed to stand, establishes a serious precedent particularly in view of a pending proposed change contained in Release No. 617, dated April 21, 1960, issued by the Small Business Administration, a copy of which you will also find enclosed.

Release No. 617 states that the major proposed change in this definition is to "bar firms from preferential treatment under the Small Business Act if the products they propose to sell to the Government consist of more than 50 percent of foreign made materials." The inference is that the regulations now allow foreign products of more than 50 percent. Actually, the reverse is the truth since none is now allowed as the regulations clearly state.

Under the terms of this proposed change, every procurement under the Small Business Set-Aside could be lost to foreign competition. This change does not protect 50 percent of such procurements for small business in the United States. It proposes to practically destroy the purposes of the Small Business Set-Aside program. Only a small portion of procurements are made by the Government under Small Business Set-Aside provisions, and now it is proposed to practically eliminate the last measure of protective regulation left for the small businessman.

The proposed change in Release No. 617 will take away one of the last remaining protections against disastrous competition and can only result in further hardship to small businessmen in this country. It is difficult to understand how such a proposal can come from an agency established to help small business in this country. The only small businesses which can benefit from this change are nonmanufacturers; importers, brokers, etc., of foreign produced products, at the expense of manufacturers and taxpayers in this country who have to pay for such procurements in their taxes.

Our industry has been seriously affected by foreign competition. Manufacturers in this country cannot compete with foreign labor costs. The history of the drawing instrument manufacturers in the United States illustrates the effects of lowered protection. At the end of 1945, there were at least 12 manufacturers of drawing instruments in this country. Now only two remain, and these two only because they make instruments of a quality and character with limited markets. The import duty in 1945 on drawing instruments was 45 percent, now it is 18 percent. Buy-American protection originally was 25 percent, and is now 6 percent. The net result is that 95 percent or more of the drawing instruments used in this country are of foreign make, chiefly German.

One of the stated purposes in Defense agency small business set-aside procurements is "that it is in the interest of maintaining or mobilizing the Nation's full productive capacity, in the interest of war or national defense programs." Should the Government be faced with an immediate need for large quantities of drawing instruments for engineering purposes, and if the German source of supply were cut off, it would be faced with a serious problem.

The originally announced purpose of giving vast aid to many countries by lowering protective tariffs, was to help build strong allies and friends. The rebuilding of these countries is more than complete. Germany is the main competitor of our industry on many manufactured items. It is now enjoying tremendous boom prosperity. Enclosed are two releases, one from the New York Times, dated May 11, 1960, and the second from the German American Trade News, dated March 1960, describing Germany's booming economy has been attained at tremendous cost to manufacturers in this country, some of whom have been forced out of business, and has caused unemployment in many areas with an adverse effect on our economy.

The importer, broker, etc., is now only affected by restrictions in small business set-aside procurements, not by the Buy-American differential of 6 percent. We recently quoted Weems Systems of Navigation on a requirement for 12,000 proportional dividers with special markings for the U.S. Air Force. This is an extraordinarily large requirement for this item. Our price of $9 on an American made instrument could not compete with that of a German importer's price of between $6 and $7, with only a protective differential of 6 percent in price. While this may seem a savings for the Government, when the losses in taxes to the Government are considered, it is doubtful that anything has been saved. The loss to the manufacturer, and the American worker is serious. In addition, American business and American workmen have to pay for this procurement from a country booming with prosperity. This is particularly ironic in view of the fact that this item was designed by a domestic firm for use by our Air Force.

SEC. 2. (a) of the Small Business Act states in part as follows:

"It is the declared policy of the Congress that the Government should aid, counsel, assist, and protect, insofar as is possible, the interests of small business concerns in order to preserve free competitive enterprise, to insure that a fair proportion of the total purchases and contracts for property and services for the Government * * * be placed with small busness enterprises."

It is respectfully submitted that the present regulations of the Small Business Administration granting preferential treatment to products manufactured or produced in the United States are in complete harmony with the purposes and intent of the Small Business Act, and any deviation from this regulation or any change in the regulations permitting the furnishing of foreign made merchandise to the U.S. Government, is contrary to, and in violation of the purposes of the law itself.

We respectfully urge you to oppose the changes proposed in Release No. 617, for the reasons outlined above. We are gravely concerned for our existence and the welfare of our workers if these changes become effective. This matter is being acted on now, and if you agree with our position, we ask you to take whatever steps you can to prevent these changes from becoming effective.

Your interest in this matter will be greatly apreciated.

Very sincerely yours,

S. SCAVUZZO,
President, Union Instrument Corp.

B

UNION INSTRUMENT CORP.,
Plainfield, N.J.

SECTION 121–3–8 of "Definition of Small Business Nonmanufacturer for Government Procurement, paragraph (b)(2), dated May 1, 1959, provides that in the case of Government procurements reserved for or involving equal bids, such nonmanufacturer shall furnish in the performance of contracts, the products of a small business manufacturer or producer which products are manufactured or produced in the United States. The same provisions are contained in "Definition of Small Business" as amended June 1, 1957. Photo copies of both are enclosed.

Because the provisions of the invitation and the regulation require that a nonmanufacturer shall furnish in the performance of this contract, products of small business manufacturer or producer in the United States, Union Instrument Corp. took this matter up with the Small Business Administration Office in New York, and was advised that under the terms contained in the invitation, an award could not be made to a nonmanufacturer offering foreign products or production, to inform the SBA office in Chicago, and to immediately file a protest with the U.S. Army Engineers office in Chicago, against any award to Geo Optic & Paper Corp. A visit was made to the small business office in Chicago who also advised the immediate filing of a protest and who also said that under the terms of the invitation, and the regulations, an award could not be made to a firm offering foreign products or foreign produced products.

A protest dated May 4, 1960, against any award to Geo Optic & Paper Corp. was filed by Union Instrument Corp. The contracting officer of the U.S. Army Engineers office informed Union Instrument on May 18, 1960, that the Small Business Administration office in Washington, D.C., ruled on May 5, 1960, that the product being furnished by Geo Optic qualifies as a domestic product. Since the contracting officer is bound by interpretations of the Small Business Administration on Small Business "set aside procurement," an award was made to Geo Optic & Paper Corp.

This interpretation is contrary to all previous rulings of the Small Business Administration on items in which Union Instrument Corp. has had business, including a previous case of a proposal on the same item by Geo Optic & Paper Corp. and contrary to the decisions of the New York and Chicago offices of the SBA.

Union Instrument Corp. protests that the interpretations of the Washington office of the SBA is in violation of the terms of the invitation for bids. Also, that it is a violation of the SBA "small business set-aside" regulations. The language of the SBA "set-aside" regulations are clear, concise, and definite: and we cannot see how such an interpretation can be put into the regulations as stated.

DECISION OF SMALL BUSINESS ADMINISTRATION ON SMALL BUSINESS SET ASIDE PROCUREMENT

Union Instrument Corp. of 1447 East Second Street, Plainfield, N.J., submitted a proposal to the U.S. Army Engineer Procurement Office, Chicago, Ill., on April 15, 1960, on Invitation No. DA–ENG–11–184–60–B/E–485–JD, for (95) graduated steel straight edges at a total price of $3,570.00. A competitive bid in the amount of $2,876.50 was submitted by Geo Optic & Paper Corp. of New York, N.Y., a firm dealing in foreign import products.

Since Geo-Optic & Paper Corp. is an import firm, it was determined that they planned to have steel blanks made in this country, and then forward them to Germany for the large and important part of the production, that is, the calibrating, engraving, and finishing of the item.

The invitation contained the following provisions:

Notice of small business set aside

"Bids or proposals under this procurement are solicited from small business concerns only, and this procurement is to be awarded only to one or more small business concerns. This section is based on a determination by the contracting officer, alone or in conjunction with a representative of the Small Business Administration, that it is in the in-

terest of maintaining or mobilizing the Nation's full productive capacity in the interest of war or national defense programs, or in the interest of assuring that a fair proportion of Government procurement is placed with small business concerns. A small business concern is a concern that (1) is not dominant in its field of operation, and with its affiliates, employs fewer than (500) employees, or (2) is certified as a small business concern by the Small Business Administration. In addition to meeting these criteria, a manufacturer or a regular dealer submitting bids or proposals in its own name, must agree to furnish in the performance of the contract, supplies manufactured or produced in the United States, its territories, its possessions, or Puerto Rico, by small business concerns: provided, that this additional requirement does not apply in connection with construction or service contracts. Bids or proposals received from firms which are not small business concerns shall be considered nonresponsive."

This matter was discussed in a meeting on May 26, 1960, with Mr. James Mills of the Washington office of SBA, with Mr. S. Scavuzzo and Mr. Q. Johnson, of Union Instrument Corp. and Mr. A. Chodosh, attorney for the corporation. After a long discussion, Mr. Mills conceded that an error might have been made, but could not offer any means of correcting this error.

C

UNION INSTRUMENT CORP.,
Plainfield, N.J., June 10, 1960.

The Honorable JOHN H. DENT,
Old House Office Building,
Washington, D.C.

MY DEAR MR. DENT: Enclosed you will find a copy of our official protest of a decision of the Small Business Administration in a case involving a nonmanufacturer who has been certified as entitled to preferential treatment under the Small Business Act, in spite of the fact that this nonmanufacturer proposes to furnish material which is manufactured in major part in a foreign country. This decision apparently contravenes paragraph 121.3–8(b)(2) of the regulations issued under the Small Business Act of 1958. A copy of the pertinent regulation is enclosed.

Existing regulations provide that a nonmanufacturer, in order to qualify for preferential treatment as a small-business concern, must agree to supply end items manufactured in the United States, its territories, its possessions, Puerto Rico, or the District of Columbia. No specific provisions concerning foreign source materials are contained in these laws or regulations with respect to manufacturers or producers who furnish material to the U.S. Government; with the result that the Small Business Administration has in interpretive decisions ruled that:

(a) Nonmanufacturers must, for preferential treatment, supply items wholly manufactured or produced in the United States, its territories, its possessions, Puerto Rico, or the District of Columbia, by small-business concerns. (To this interpretation there has been at least one exception, in which the Small Business Administration ruled that a nonmanufacturer was qualified for preferential treatment by furnishing the product of a firm which proposed to send materials to Germany for manufacturing and finishing operations.)

(b) Manufacturers or producers can qualify for preferential treatment if any part of what they propose to furnish is manufactured or produced in the United States—e.g., a manufacturer who imported cable, and whose sole operation in the United States consisted in cutting this cable to required lengths, was accorded certification by the Small Business Administration for preferential treatment under the Small Business Act—and an official of the Small Business Administration has stated that pencils made in Japan and sharpened in the United States also would be qualified for such preferential treatment.

In a proposed amendment to the definition of small business concerns (Federal Register, April 16, 1960, p. 3341—copy of which is enclosed) the Small Business Administration recommends the addition to their regulations of a paragraph defining a "domestic product" as one in which the cost of foreign materials does not exceed 50 percent of the cost of all materials used; and recommends revision of these regulations to allow preferential treatment to both manufacturers or nonmanufacturers who offer "domestic products" as so defined.

The effect of this proposed change would be to relax existing restrictions imposed on nonmanufacturers with respect to foreign-made items, while limiting manufacturers or producers who receive preferential treatment to end items which are 50 percent or less of foreign origin. Thus, the door to American subsidization of foreign manufacturers and producers is to be opened with respect to import brokers; while the door which has been opened by administrative interpretations of the Small Business Administration with respect to importing manufacturers is to be fixed open at 50 percent.

Since the provisions of the "Buy American Act" already afford protection to domestic products at the 50 percent level proposed by the Small Business Administration, the only real change which would result if this amendment is accepted would be to permit nonmanufacturing concerns to furnish end items which are 50 percent foreign in origin, rather than domestic as required by existing regulations. The net effect will, therefore, be a reduction in the degree of protection now afforded American manufacturers and producers.

The Congress may wish to deliberate the matter with this in mind. Your comments and suggestions are solicited.

Very sincerely yours,

UNION INSTRUMENT CORP.
S. SCAVUZZO, *President.*

D

LAFAYETTE BUILDING,
Washington, D.C., April 21, 1960.

Proposed changes in the definition of small business for purpose of Government buying, designed to give preference to products containing chiefly United States-made materials, and other minor amendments, were announced today by the Small Business Administration.

The proposed changes apply only to the definition of "small business" under which firms may qualify for contract awards on Government purchases reserved for bidding by small firms, or involving other preferential treatment for small businesses seeking to sell their products or services to the Government.

Generally, under the present definition of a small business for purposes of selling to the Government, the Small Business Administration has considered a nonmanufacturing firm as small if it is individually owned and operated, not dominant in its field of operation, and has no more than 500 employees. If a firm is a nonmanufacturer it must in addition to the foregoing, supply a product manufactured in the United States by a small manufacturer.

The major proposed change in this definition is to bar firms from preferential treatment under the Small Business Act if the products they propose to sell to the Government consist of more than 50 percent of foreign-made materials.

Other changes require that concerns must be organized for profit and must be located in the United States in order to receive assistance from the Small Business Administration.

Persons wishing to comment on the proposed definition changes will have approximately 30 days in which to file their comments with the Small Business Administration.

Mr. Speaker, may I state at this time that if this new regulation becomes the law, the need for a Small Business Administration will no longer exist.

This country cannot regulate the size of the foreign manufacturer or the ownership of the foreign manufacturer who will produce the products sold by an American based firm whose ownership may also be foreign, under the protective covenants of the Small Business Administration Act.

Let us not fool either the American manufacturer or the American taxpayer. Let us face the true facts and at least save the taxpayer the taxes required to operate this administrative bureau and at the same time save the American manufacturer both embarrassment and money.

Just in case any crocodile tears are being shed for our worthy and friendly allies, the foreign producers, let us look at what is happening in defeated, devastated nations, our former mortal enemy, Germany, as well as others who benefit from our lending, spending programs financed by our American taxpayers including the under-bid American small businessman.

E

WHALEY-EATON SERVICE,
Washington, D.C., June 7, 1960.

DEAR SIR: Obituaries for world inflation are just a bit premature, in spite of the optimism of such authorities as Monetary Fund Chairman Per Jacobsson. He thinks the inflation danger is about gone. But many skilled observers in West Europe aren't at all so sure. Pressures have certainly eased off dramatically in the United States, but Europe is riding the upside of a major boom.

The feeling is getting around that the sky's the limit—that expansion can continue almost indefinitely without a blowoff. So far West Europe's governments have shown luck and skill in their efforts to keep the boom from blowing up. But the roughest test is still ahead.

Pressure is building up in Europe at two strategic points—productive capacity and the labor supply. Most countries, but particularly Germany, simply cannot build new plants fast enough to cope with current and anticipated demand. At the same time, the labor supply is being stretched to the breaking point. Again, Germany feels this the most, but is not alone.

Competitive bidding for labor supplies is becoming common. This has an inevitable effect on wage costs. Employers aren't inclined to quibble about such things when they're confident of being able to market all their output and more—and to pass on higher costs to customers.

Typically, we've heard of a U.S. owned firm in Germany which is putting new plants in remote villages chiefly because untapped local labor was available. There are now about 10 vacancies for every 4 unemployed workers in Germany as a whole. Thousands of Italians have been brought in and an effort is under way to recruit others in Greece and Spain.

In Britain, job openings about equal the number of unemployed. Allowing for "frictional" unemployment and turnover, this means some areas are in for a worsening pinch. Even Italy has been hit by a shortage of trained technicians and engineers, though not of unskilled labor.

Switzerland reports more than twice as many vacancies as unemployed. The proportion of foreign workers (10 percent in machinery industries and up to 60 percent in construction) is rising fast. The Swiss, like the Germans, are out trying to recruit more labor, chiefly in Spain and Portugal.

The effect of labor shortages on wages is obvious: wages are heading up. Even in Germany, the redoubtable Dr. Erhard is saying that the climate is very favorable to wage increases. He says, too, that the economy is elastic enough to meet the needs of vigorous growth—provided, of course, that people don't lose their sense of proportion. That's the big question.

Conservative economists are worried over the danger that the boom atmosphere will prove too intoxicating, that restraint will be forgotten.

[From the New York Times, May 11, 1960]

WEST GERMANY ECONOMY BOOMS, SAYS KRUPP AID VISITING UNITED STATES

(By Joseph Carter)

The West German economic boom is continuing virtually unabated, Berthold Beitz, second in command of the Krupp industrial empire, said on his arrival here yesterday.

He said there was full employment and that the West German economy was still able to absorb the flow of refugees from Communist-ruled East Germany.

One of the main purposes of his visit, Herr Beitz said, was to talk with leaders of American finance and industry. "You always go back a little more intelligent and better informed on industrial procedures and methods," he commented.

Herr Beitz emphasized that in his talks with businessmen here he would seek ways to collaborate with them in advancing the economies of underdeveloped countries.

"Such development programs are the job of private enterprise," he declared. "We at Krupp, and other West German industrialists, regard them as extremely important."

The 46-year-old chairman of the executive board of Krupp of Essen arrived on the liner *Bremen*. He said he planned to stay in this country about 10 days. With him was Count Claus Ahlefeldt Laurvig, representative in Britain and the Commonwealth of the industries headed by Alfred Krupp.

Herr Beitz said he planned to visit Washington, Detroit, and Richmond, Va. He added that he would talk with executives of the Ford Motor Co., General Motors Corp., Reynolds Metals Co., and the United States Steel Corp., among others. He indicated that he hoped to meet with officials of the Federal Government.

The industrialist emphasized that he was not here to sell steel but to exchange ideas with American leaders. He said he wanted to see the latest steel production methods here because "in that field you are the leaders."

Herr Beitz said that Krupp's relations with organized labor were excellent.

[From the German American Trade News]

GERMANY'S PERSISTENT FOREIGN EXCHANGE SURPLUS

That it may be harder to spend money than to make it, is currently a problem of major economic significance for Germany. The condition arises out of the Federal Republic's persistent foreign exchange surplus. Internationally, this situation is viewed with misgivings by Germany's trading partners. Domestically, the surplus endangers the balanced development of the economy.

In an effort to remedy the situation Germany's Federal Bank has in recent months charted a course designated to meet national necessity on the one hand and to avoid likely foreign criticism on the other, in decreeing higher minimum reserve requirements for German banks as well as a reduction in the rediscount quota (see GBW, Feb. 24). The bank did not resort to raising the discount rate, the common remedy, because such a move would have only served to create an influx of foreign funds attracted by higher interest rates.

TEMPORARY SOLUTION

In large part the surplus problem was solved by prepayments on foreign debt obligations, allocations to the World Bank, and so forth. Because these payments will not recur regularly Germany is faced in 1960 with the task of planning a program for the possibility that a surplus in the balance of trade in goods and services may be permanent. Writing in London's Financial Times, Dr. Hermann J. Abs, one of Germany's leading bankers, said: "It must not, however, be overlooked that it is a moot question whether the era of such surpluses is going to last for any great length of time. The position of Germany's oversea trade is not as strong as it might appear in the relatively favorable course of German exports during recent years. Even comparatively slight changes in the terms of trade might well—at least if the present high level of business activity recedes—cause a notable deterioration in the Federal Republic's position in world trade."

"Be that as it may, a progressive liberalization of imports will in any case be among the tasks with which Germany will have to cope."

On the other hand, what is Germany's position in regard to promoting export of capital? There are many who are prepared to support such a move particularly in the form of aid to underdeveloped countries and recommend therefore government guarantees, cheaper loans, and other facilities. However, Dr. Abs feels that there might be some complications in this respect because it is difficult to differentiate between capital exports promoted by governmental action for political and economic reasons, and capital exports undertaken strictly in consideration of economic factors without any artificial supports. "Presumably," said Dr. Abs, "the Germans would with certainty come in again for heavy criticisms on the part of other exporting countries if their capital exports were generally to be stimulated through government action."

Exports of German capital in various forms have been steadily on the increase in recent years. In regard to the future, Dr. Abs stated that West Germany's main concern is to assist underdeveloped countries in which conditions are sufficiently stable, however, such investments should not be undertaken with the intention to engage in a bitter competitive struggle with other industrial nations, but should conform to the scope of Germany's economic and financial potential and the tasks to be fulfilled in the underdeveloped countries.

What about the intensification of German investments within the Common Market?

"In my own view," said Dr. Abs, "it cannot be desirable, either economically or politically, to accord a general privilege to capital export within the European Economic Community. There are only two respects where certain privilege treatment might be justified. The Rome Treaty provides for capital contribution on the part of member governments toward helping economically weaker regions within the European Economic Community or its associated areas, this contribution to be channeled through the European Investment Bank. Provided this bank, as its bylaws proclaim and its management is clearly striving to do, models its activities on the excellent example of the World Bank, it might indeed produce a beneficial contribution toward strengthening the Community, which no outside party could look upon as discriminating."

SATISFACTORY PROGRESS

"Moreover," continued Dr. Abs, "a complete liberalization of money and capital transactions, by agreements among governments, bankers, associations, and other parties concerned, may possibly come about in the European Economic Community more rapidly than could happen in a much larger area." In that event, however, it would be desirable, according to Dr. Abs, that the example of the EEC countries be imitated, that is to say that other nations should be prepared to free their capital exports and imports of restrictions in the same measure at the earliest opportunity.

No matter how these programs develop in detail, it is most important, said Dr. Abs, "that just as the European Economic Community must not be allowed to segregate itself under the aegis of monetary policy, so there must not be any obstruction of capital imports and exports of the partners to the Treaty from and to other countries. It seems to me that in this respect things have so far been going quite satisfactorily; the favorable trend in the foreign exchange reserves of all EEC countries during the past year has served to facilitate this."

TRIPLE PLAY

At the government level, plans are now being developed to solve the problem of Germany's foreign exchange surplus. These plans aim toward the establishment of a government-guaranteed fund which would perform a triple function:

1. In providing aid to underdeveloped nations.

2. In being financed through the sale of low-cost shares to the public which would have the advantage of draining money otherwise available for domestic spending and thus remove a stimulant for inflationary tendencies. The shares would pay progressively higher interest, starting at a level above that paid by savings banks. Banks would not be allowed to participate in such a subscription.

3. In exporting Germany's foreign exchange surplus the fund would realize its primary goal.

While these plans have been merely advanced in the form of ideas, they do reflect the current concern in Germany for the persistent foreign exchange surplus.

Mr. Speaker, in order that this Congress may have some idea of just how badly an American producer will fare if the proposed regulation goes into effect, let me quote from letters received from American small goods manufacturers who are now facing annihilation from foreign imports.

It is important to note that one recent news item really ought to awaken the sleeping American conscience—the one concerning a strike in Virginia and the demand of the union for protection against foreign production financed by the very same employer being struck here in the United States.

F

A. G. SPALDING & BROS., INC.,
Chicopee, Mass., May 24, 1960.

Mr. JOSEPH E. TALBOT,
Chairman, U.S. Tariff Commission,
Washington, D.C.

DEAR MR. TALBOT: It was good to talk to you on the phone the other day, and I shall look forward to receipt of the proposed tariff changes as soon as it is off the press.

I have recently received my copy of the 1959 Industry Census Report, and I want to tell you it shakes any American sporting-goods manufacturer right down to his heels.

We are preparing a formal case along the lines you suggested when I was in Washington with you and your associates on April 5. However, I want to expose you to a few quick figures drawn from the Government's own import data, and the sporting goods industry's 1959 census report, which shows the sales of domestic made sporting goods only.

Tennis rackets sold in the United States

Country of origin	Quantity, 1959	Quantity, 1958
Belgium	70,437	40,239
Japan	362,456	198,748
Pakistan	223,668	146,714
Others	65,848	75,480
United States	642,930	659,957

It is immediately apparent, then, that:

1. Tennis racket sales are increasing as the game gains in general popularity.

2. The gain in 1959 over 1958 was a substantial 21.9 percent.

3. The imported rackets now have over 50 percent of the total market.

In fact, imports had 52.8 percent of the total U.S. tennis racket market in 1959 as against only 41.5 percent in 1958.

Obviously, then, in the midst of a growing tennis racket market, with sales up 21.9 percent in the past year, U.S. manufacture of tennis rackets was down 2½ percent.

I have repeatedly said to you and your associates that United States businessmen are aware of world problems and in the interest of furthering the worldwide economic goals of the United States, most American businessmen would be willing to share the growth of our markets with other nations—this has, however, reached the point where the imports have all of the growth and part of the original body.

Warning: Every indication is that 1960 will make 1959 look like a real good year for U.S. tennis racket manufacturers. Production is way down for 1960 and further declines are forecast for 1961.

Badminton rackets sold in the United States

Country of origin	Quantity, 1959	Quantity, 1958
West Germany	46,132	91,405
Belgium	428,631	377,063
Japan	7,099,145	3,885,161
Pakistan	213,719	721,477
Others	192,251	159,481
United States	734,139	852,895

It is immediately apparent that through the past several years, the badminton racket business has gone into the hands of imported rackets.

Let's look at some of the quick facts.

1. Badminton racket sales are up in the United States. The game's popularity is increasing.

The gain in badminton racket sales in 1959 over 1958 sales was over 43 percent.

2. Imported badminton rackets had over 91.6 percent of this total in 1959, as against 86 percent of the total market in 1958.

3. In the middle of a sensational 43 percent gain in badminton racket sales in the United States, the U.S. manufacturers' share of this market fell from 14 to 8.4 percent.

The U.S. badminton business, which has for years been plagued with imports, now finds itself making 16⅓ percent less badminton rackets in a year when the sales of badminton rackets are up 43 percent.

Warning: Every indication is that 1960 will be much worse and that 1961 may well see the abandonment of badminton manufacture in the United States unless very fast and substantial relief is granted the American manufacturers.

Baseball gloves and mitts sold in the United States

Country of Origin	Quantity, 1959	Quantity, 1958
Japan	1,283,959	557,466
(Other countries not known)		
United states	1,962,168	2,309,436

1. It is apparent that the total sales of baseball gloves and mitts in the United States went up from 2,866,902 pieces in 1958 to 3,245,127 in 1959. This is an increase of 378,225 mitts and gloves, or 13.2 percent increase.

2. In this period, gloves and mitts imported from Japan increased by 726,493, or 130 percent.

3. In this period, the sales of U.S. manufactured gloves and mitts declined from 2,309,436 in 1958 to 1,962,168 in 1959, or a decline of over 15 percent.

4. At the end of 1958, Japanese imports accounted for 19.4 percent of total baseball glove and mitt sales.

At the end of 1959, this had become 39.5 percent.

In 1 short year the imported baseball gloves and mitts took another 20 percent of our total U.S. market.

American production fell off over 15 percent while total sales went up by 13.2 percent.

The conclusion is absolutely obvious.

Unless the Escape Clause is invoked very quickly the U.S. manufacture of tennis rackets, badminton rackets, and baseball gloves and mitts will cease; those people now engaged in their manufacture will join the hundreds already forced out of work by the imports in the ranks of the unemployed and another segment of the American industry will have been sacrificed on the altar of "world trade."

Is this going to happen?

Yours very truly,

EDWIN L. PARKER,
President.

A. G. SPALDING & BROS., INC.,
Chicopee, Mass., June 2, 1960.

Hon. JOHN H. DENT,
House of Representatives,
Washington, D.C.

DEAR MR. DENT: I hope you will take the time to read the attached copy of my letter of May 24 to Mr. Joseph E. Talbot, Chairman of the Tariff Commission.

I am sending it and this letter to you as the president of the largest exclusive sporting goods manufacturer in the world, and as the chairman of the Import Committee of the Athletic Goods Manufacturers Association.

I want to emphasize here, as I do in my letter to Mr. Talbot, that ours is not a radical group, demanding that imports stop, etc.

So sure are we that our American welfare and world-at-large welfare cannot be fully separated that we are ready to share part of our industry's growth with manufacturers from other countries.

It is when we lose so much of the existing market that we find ourselves making and selling less units of sporting goods items in important, rapidly growing areas such as baseball, tennis, and badminton that we begin to realize that this has gone much too far.

Our economic health and the employment of our personnel are seriously affected when we not only are completely excluded from the market growth but actually lose a substantial part of the original smaller market.

Ours is a peculiarly vulnerable industry due to the high percentage of hand labor unavoidably necessary in our production.

Besides the items listed in my letter to Mr. Talbot, U.S. golf ball manufacturing industry is 100 percent vulnerable and is being very hard hit in 1960.

Our own governmental agencies, which bought Japanese tennis rackets in 1959, bought Japanese golf balls this spring.

I urge your immediate serious consideration of these important problems affecting this industry.

The very minimum relief our industry needs for survival is the invocation of the escape clause in the Tariff Act.

Your help is needed—urgently.

Yours sincerely,

EDWIN L. PARKER,
President, A. G. Spalding & Bros., Inc.

Mr. Speaker, if we need any more proof, let us hold hearings, tear apart the shrouds of secrecy on foreign spending under mutual security, investigate foreign loans, check on who gets profits from foreign production, the effect on our employment, the extent of our enmeshment with private capital and profits in foreign countries, and check on whether we are buying peace or war with our trade-and-aid programs.

No man wants peace more, but no man wants to know for sure if we are getting peace as a harvest or reaping the wild wind.

Following are just a few samples of the results of our policies.

The protest I attach concerns me greatly for as a young man I worked in the plant in my hometown of Jeannette, Pa., that produced the largest U.S. production of tennis balls.

G

JEANNETTE, PA., *June 14, 1960.*

Hon. JOHN H. DENT,
Old House Office Building,
Washington, D.C.:

In negotiations by U.S. Government under 1958 Trades Agreement Extension Act we feel the proposed items listed on schedule 15, more particularly subparagraph 1502, would do considerable amount of damage to our company. Domestic competition has already created unfavorable atmosphere for athletic balls and tennis balls. Granting further concessions to importers could more adversely affect production and tend to reduce employment in our factories. Any assistance you can render toward defeating this proposal will benefit economy of area in which our factories are located.

THE GENERAL TIRE & RUBBER CO.,
P. C. MATHEWSON.

JUNE 15, 1960.

U.S. TARIFF COMMISSION,
Washington, D.C.:

On advice from the General Tire & Rubber Co., manufacturer of tennis balls in my district, I am protesting any action that would in any way reduce tariffs or grant further concessions to foreign-made tennis balls. This industry is very vital to the health and welfare of my community. Serious economic consequences to all concerned will follow any action by GATT and the Tariff Commission that will, in any way, make it more difficult for domestic industry to compete with low-wage, low-standard producers. Statistical data will follow.

JOHN H. DENT,
Member of Congress.

SENATE

FRIDAY, JUNE 17, 1960

The Senate met at 10:30 o'clock a.m., and was called to order by Senator MIKE MANSFIELD, of Montana.

The Chaplain, Rev. Frederick Brown Harris, D.D., offered the following prayer:

Almighty and everlasting God, who amidst the shifting sands of time standeth sure, as we bow with reverent hearts in this quiet moment, dedicated to the unseen and eternal, strengthen, we beseech Thee, our sometimes wavering confidence in those deep and holy foundations of spiritual verities on which the fathers built, lest, in foolish futility in this desperate and dangerous day, we attempt to build on sand instead of rock.

In a time of aggression and threatenings and violence, of swift and stunning change, when the angry passions of deluded people who imagine a vain thing are bursting anew with devouring flame, enable Thy servants here in the discharge of great responsibilities of public trust to be calm and confident, wise, and just; their hope in Thee as an anchor sure and steadfast, their faith unshaken that out of the wreck and ruin of today Thou art making all things new.

We ask it in that Name which is above every name. Amen.

DESIGNATION OF ACTING PRESIDENT PRO TEMPORE

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., June 17, 1960.

To the Senate:

Being temporarily absent from the Senate, I appoint Hon. MIKE MANSFIELD, a Senator from the State of Montana, to perform the duties of the Chair during my absence.

CARL HAYDEN,
President pro tempore.

Mr. MANSFIELD thereupon took the chair as Acting President pro tempore.

THE CHAPLAIN—REV. FREDERICK BROWN HARRIS, D.D.

Mr. JOHNSON of Texas. Mr. President, I wish every Member of the Senate could have been present this morning to hear the touching and beautiful prayer uttered by that wise and good man who is the Chaplain of the Senate. He is always a tower of strength and a source of comfort to those of us who attempt to work in the Senate in the discharge of our duties and labor to bring peace in the world and prosperity at home. His calm and cool pleas, appealing to the best in all of us, are a constant reminder to me that America has not lost its soul; and notwithstanding those who would deride us and say Americans are more concerned with television, air-conditioned cars, and gadgets than with the spiritual things of life, I think the distinguished Chaplain each morning gives the lie to that accusation.

THE JOURNAL

On request of Mr. JOHNSON of Texas, and by unanimous consent, the reading of the Journal of the proceedings of Thursday, June 16, 1960, was dispensed with.

MESSAGES FROM THE PRESIDENT—APPROVAL OF BILL

Messages in writing from the President of the United States were communicated to the Senate by Mr. Miller, one of his secretaries, and he announced that on June 12, 1960, the President had approved and signed the act (S. 2330) for the relief of John B. Manthey.

EXECUTIVE MESSAGE REFERRED

As in executive session,

The ACTING PRESIDENT pro tempore laid before the Senate a message from the President of the United States submitting the nomination of Arthur S. Lane, of New Jersey, to be U.S. district judge for the district of New Jersey, which was referred to the Committee on the Judiciary.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Bartlett, one of its reading clerks, announced that the House had disagreed to the amendments of the Senate to the bill (H.R. 10644) to amend title V of the Merchant Marine Act, 1936, in order to change the limitation of the construction differential subsidy under such title; asked a conference with the Senate on the disagreeing votes of the two Houses thereon, and that Mr. BONNER, Mr. THOMPSON of Louisiana, Mr. GEORGE P. MILLER, Mr. TOLLEFSON, and Mr. VAN PELT were appointed managers on the part of the House at the conference.

The message also announced that the House had passed a joint resolution (H.J. Res. 696) to provide for the designation of the month of September 1960 as National Wool Month, in which it requested the concurrence of the Senate.

ENROLLED JOINT RESOLUTION SIGNED

The message further announced that the Speaker had affixed his signature to the enrolled joint resolution (S.J. Res. 39) proposing an amendment to the Constitution of the United States granting representation in the electoral college to the District of Columbia, and it was signed by the Acting President pro tempore.

HOUSE JOINT RESOLUTION PLACED ON CALENDAR

The joint resolution (H.J. Res. 696) to provide for the designation of the month of September 1960 as National Wool Month was read twice by its title and placed on the calendar.

LIMITATION OF DEBATE DURING MORNING HOUR

Mr. JOHNSON of Texas. Mr. President, under the rule there will be the usual morning hour. I ask unanimous consent that statements in connection therewith be limited to 3 minutes.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

LEAVE OF ABSENCE

Mr. CAPEHART. Mr. President, I ask unanimous consent to be absent from the sessions of the Senate from this afternoon until Monday morning next, for family reasons.

The ACTING PRESIDENT. Without objection, it is so ordered.

Mr. JOHNSON of Texas. Mr. President, I am sorry that the Senator will not be with us. I wish to congratulate the able Senator for the contribution he made and the cooperation he extended in connection with the most important measures that the Senate has passed this year. He stayed until midnight last night and helped the leadership get the bill through the Senate. I wish to thank him for the very fine effort he made in that respect. I did not have a chance to do so last evening.

Mr. CAPEHART. I thank the Senator very much.

PRESIDENT'S VISIT TO JAPAN; KHRUSHCHEV'S VISIT TO CUBA

Mr. JOHNSON of Texas. Mr. President, during the past few days, the events in Japan have completely captured the headlines. And there is one aspect of the situation which is cause for grave concern.

It is the ability of the Communists to touch off trouble at scattered points throughout the world.

When Premier Khrushchev broke up the Paris summit conference, it was evident that the United States was headed for a severe test of its nerves. The test came quickly.

First, there was the alarm over Berlin.

Next, there was the unexpectedly heavy shelling of Quemoy and Matsu.

Now we have a situation in which a minority, led and organized by fanatical leftists, has been able to force cancellation of President Eisenhower's trip to Japan.

Just down the road we have facing us Premier Khrushchev's visit to Cuba. And we can only speculate as to the events which may take place right on our doorstep.

Premier Khrushchev, of course, will receive a warm welcome in Cuba. That will be guaranteed by the army, the police, and all the organs of Castro's government.

We do not know what else he may receive in Cuba. But it is time for all of us to do some very serious thinking as to how we will react to even closer collaboration between the Soviets and the Cuban Government.

Whatever may happen, however, it is clear that we face a period of heightened cold war tensions. The Communists

have picked up their signal from Premier Khrushchev's actions in Paris; and it will require all the determination, ingenuity, and imagination of a united America to weather the storm.

So, Mr. President, I plead with my fellow countrymen to keep their powder dry and keep their ranks closed.

COMMITTEE MEETINGS DURING SENATE SESSION

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the Subcommittee on Insurance of the Antitrust Subcommittee be permitted to meet during the session of the Senate today. I understand that out of deference and the great respect and affection we have for the Senator from Wyoming [Mr. O'MAHONEY], and because of the peculiar situation prevailing, the minority leader has agreed to this subcommittee meeting.

Mr. DIRKSEN. That is correct. I have indicated that I would object to all requests for committee meetings. However, I make an exception in this case, because the witness happens to be from London and was brought especially to the Senate to testify during the insurance investigation being conducted by the Senator from Wyoming [Mr. O'MAHONEY].

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. JOHNSON of Texas. I have just talked about a hearing on the education bill. I finished my statement, but the committee is continuing its hearing. I ask unanimous consent that the Subcommittee on Education of the Senate Committee on Labor and Public Welfare be permitted to sit during the session of the Senate today.

Mr. DIRKSEN. I will have to object, Mr. President.

Mr. JOHNSON of Texas. I wish to point out for the RECORD that I hope this will silence all Republican criticism of Congress not transacting any business. We can have committee sessions and Senate sessions during the morning hour, without hurting anyone. This education bill is a measure of far-reaching importance. It has nonpartisan sponsorship. I think we could get action on it during the morning hour, when no bill is before the Senate. Because one man has made a mistake in objecting, I hope that all of us will not do so also. I am trying to get the administration program through and the Congress program through, and legislation enacted on behalf of the people. It is pretty difficult to do it when some do not want us to have any committee meetings in the morning.

I would hope that the Republican leadership would feel it possible to permit noncontroversial bills to be considered at least up until the morning hour is concluded, because we will have nothing but insertions during that time, and that would give us a chance to report out some of the bills in which even the administration is very much interested in getting reported to the Senate. I would not ask for permission to have a committee sit which has a substantive matter before it which requires the presence of the minority leader or any Senator who must be on the floor. I only ask the minority leader to give consideration to letting committees meet during the morning hour and until the morning hour is concluded.

Mr. DIRKSEN. Mr. President, I intend to object. I know of nothing else to do. The majority leader has a bill before the Committee on Labor and Public Welfare. I have an important bill in the Committee on the Judiciary. The distinguished Senator from Oregon [Mr. MORSE] has served notice on both leaders that he intends to object. I am deeply interested.

Mr. JOHNSON of Texas. Why does the Senator from Illinois wish to emulate the senior Senator from Oregon?

Mr. DIRKSEN. I do not emulate him. I have no other weapon with which to protect the minority position.

Mr. JOHNSON of Texas. I do not see how the Senator protects the minority position when the Senator objects to the consideration of legislation which the minority demands, and bottles up that legislation in committee. I want here and now to fix the responsibility for that. The Senator from Oregon can take the responsibility for one committee. However, there are 14 committees. I will make these requests for the committees to meet. If the business is brought to a standstill, the blood will not be on my hands. I hope the propagandists who will be writing about the inability of Congress to pass bills, or state that it will do nothing, will realize it is not the majority leader who keeps the committees from meeting, because I have no objection to any meetings of committees.

Mr. DIRKSEN. Responsibility does not have to be fixed. I cheerfully accept the responsibility.

Mr. JOHNSON of Texas. I ask unanimous consent that the Business and Commerce Subcommittee of the Committee on the District of Columbia be permitted to sit during the session of the Senate today.

Mr. DIRKSEN. I object.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the Select Committee on Natural Water Resources be permitted to sit during the session of the Senate today.

Mr. DIRKSEN. I object.

Mr. JOHNSON of Texas. Mr. President, a parliamentary inquiry.

The ACTING PRESIDENT pro tempore. The Senator will state it.

Mr. JOHNSON of Texas. Under the rule, I understand, no committees can sit during the session of the Senate. Suppose a special committee, like the Water Resources Committee, is hearing witnesses but does not issue a subpena or does not make a report, what is the situation?

The ACTING PRESIDENT pro tempore. The Chair is advised that the rule applies to standing committees, not to select committees.

Mr. JOHNSON of Texas. It is not necessary, then, for a request to be made with respect to the water committee? Is that correct?

The ACTING PRESIDENT pro tempore. For the RECORD, the Chair will read:

> No standing committee of the Senate or the House, except the Committee on Rules of the House, shall sit, without special leave, while the Senate or the House, as the case may be, is in session.

Mr. JOHNSON of Texas. I thank the Senator. Then we will make some progress at least in the field of water.

Mr. WILEY. Mr. President, I have listened with a great deal of interest to this discourse. I wish to say that I have a perfect answer for the majority leader. The committee could sit as a kind of kaffee klatch as we did in the Foreign Relations Committee the other day. We cannot transact business, and we cannot hold hearings. However, at a regular meeting we can affirm or disaffirm. I suggest that this is a solution also to my dear friend from Illinois. I suggest that in this particular case there is no reason why committees cannot meet on that basis. We can get business done in that way, and there is no circumvention. I suggest that we could proceed in that manner. There is no reason why the committees cannot be canvassed on this proposition. If a committee is in favor, it can meet on that basis.

Mr. JOHNSON of Texas. I appreciate the friendly suggestion of the Senator from Wisconsin. However, I would not want to be a party to evading or circumventing a rule of the Senate. The Committee on Interstate and Foreign Commerce met the other day, and the distinguished minority leader, in his usual cordial manner, brought it to my attention. The committee had met notwithstanding the refusal of the Senate for it to meet. So I urge all committees to be very careful, unless they have the consent of the Senate to meet. I think they should not even meet informally if it is interpreted as a committee meeting, particularly when they are assembled by the chairman. I share the feeling of the minority leader that if any Senator avails himself of his privilege to object, we should follow the rule.

Mr. WILEY. I should like to transact a little morning business. My purpose was more or less to establish what the distinguished majority leader has said now is the rule.

I have contended for the rule continually. But when it was suggested that we follow through with a kaffee klatch, we had our kaffee klatch. We reviewed the business but took no action, because it is only when we have a regular meeting that we can find out what we did, and either affirm or disaffirm. But we will have reviewed the matter which is before us for attention.

EXECUTIVE COMMUNICATIONS, ETC.

The ACTING PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

REPORT ON U.S. CONTRIBUTIONS TO INTERNATIONAL ORGANIZATIONS

A letter from the Acting Secretary of State, transmitting, pursuant to law, a report on U.S. contributions to international

organizations, for the fiscal year 1959 (with an accompanying report); to the Committee on Foreign Relations.

SUSPENSION OF DEPORTATION OF CERTAIN ALIENS

A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting, pursuant to law, copies of orders suspending deportation of certain aliens, together with a statement of the facts and pertinent provisions of law pertaining to each alien, and the reasons for ordering such suspension (with accompanying papers); to the Committee on the Judiciary.

STATUS OF PERMANENT RESIDENCE FOR A CERTAIN ALIEN

A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting, pursuant to law, a copy of the order granting the application for permanent residence filed by Allen Shih-Chun Hsiao, together with a statement of the facts and pertinent provisions of law as to the subject, and the reason for granting the application (with accompanying papers); to the Committee on the Judiciary.

TEMPORARY ADMISSION INTO THE UNITED STATES OF CERTAIN ALIENS

A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting, pursuant to law, copies of orders entered granting temporary admission into the United States of certain aliens (with accompanying papers); to the Committee on the Judiciary.

PETITIONS AND MEMORIALS

Petitions, etc., were laid before the Senate, or presented, and referred as indicated:

By the ACTING PRESIDENT pro tempore:

A resolution of the Third Legislature of the Virgin Islands; to the Committee on Armed Services:

"BILL 1187

"Resolution to petition the Congress of the United States to authorize the Department of Defense to exchange a certain tract of land at John Brewer's Bay, St. Thomas, Virgin Islands, with the Government of the Virgin Islands, for a tract of land at Estate Bordeaux, St. Thomas, Virgin Islands

"Whereas a certain tract of land at John Brewer's Bay, St. Thomas, Virgin Islands, owned by the Department of Defense, and used as a rifle practice range by the U.S. Army, is an ideal area for a low-income housing project; and

"Whereas because of limitations it is extremely difficult to acquire land in St. Thomas for low-income housing; and

"Whereas there is land suitable for a rifle practice range at Estate Bordeaux, owned by the Government of the Virgin Islands: Now, therefore, be it

"*Resolved by the Legislature of the Virgin Islands*, That:

"1. The Congress of the United States authorize the Department of Defense to exchange a certain tract of land located at John Brewer's Bay, St. Thomas, Virgin Islands, and presently used as a rifle practice range, with the Government of the Virgin Islands for a certain tract of land at Estate Bordeaux, St. Thomas, Virgin Islands, which is suitable for a rifle practice range, with the provision that the land at John Brewer's Bay, when acquired by the Government of the Virgin Islands, shall be used for the construction of low-income housing; and be it

"*Resolved further*, That copies of this resolution be transmitted to the President of the U.S. Senate, the Speaker of the House of Representatives, the chairman of the Senate Armed Services Committee, the chairman of the House Armed Services Committee, the Secretary of the Interior, the Secretary of the Department of Defense, and the Governor of the Virgin Islands.

"Thus passed by the Legislature of the Virgin Islands on June 8, 1960.

"Witness our hands and the seal of the Legislature of the Virgin Islands this 9th day of June A.D. 1960.

"WALTER I. M. HODGE,
"President.

"JOHN L. MADURO,
"Legislative Secretary."

A resolution adopted by the executive committee of the board of directors of the Chamber of Commerce of the New Orleans Area, New Orleans, La., favoring the enactment of legislation to repeal the tax on transportation of persons; to the Committee on Finance.

A resolution adopted by the Morgantown, West Virginia, Chamber of Commerce, favoring the enactment of legislation to repeal the tax on transportation of persons; to the Committee on Finance.

A petition signed by I. S. Svischov and Kirill Merger, chairman and secretary, respectively, of the Russian Anti-Communist Committee, of Los Angeles, Calif., relating to amendments of Public Law 86–90, concerning the Captive Nations Week; to the Committee on the Judiciary.

IMPROVED BENEFITS FOR VETERANS OF WORLD WAR I—RESOLUTION

Mr. WILEY. Mr. President, as a nation, we recognize that the maintenance of a fair system of veterans benefits for those who served and sacrificed for their country is essential.

Over the years, the Nation has adopted a significant program of benefits for our veterans. A major task, of course, has not only been to assure an adequate system, but also to provide equitable treatment of our veterans of different wars.

We recall, of course, that the veterans of World War I, for example, did not receive advantages of such benefits as were enacted by Congress to help meet the readjustment and other needs of many of the veterans of World War II and the Korean conflict. Consequently, it is particularly important that Congress take this into consideration.

Today I was privileged to receive from Roland E. Miller, county clerk of Calumet County, Wis., a resolution supporting the need for improved benefits for veterans of World War I.

Reflecting the views of the Calumet County Board of Supervisors on this important problem, I request unanimous consent to have the resolution printed in the RECORD, and appropriately referred.

There being no objection, the resolution was referred to the Committee on Finance, and ordered to be printed in the RECORD, as follows:

RESOLUTION No. 3

Resolution petitioning the Congress of the United States to give favorable consideration to legislation providing benefits for veterans of World War I and for other purposes

Whereas many hundreds of thousands of our Nation's finest citizens served the cause of democracy during the period of World War I; and

Whereas a large number of these veterans have now reached the age and circumstances in which they are no longer self-supporting, as well as suffering illnesses and infirmities aggravated by this honorable service to their country; and

Whereas through no fault of their own, they have largely become a class of forgotten men, many of whom are close to the grave: Now, therefore, be it

Resolved by the Board of Supervisors of Calumet County, Wis., That this body recognizes the predicament of these veterans of World War I, and petition the Congress of the United States to give favorable consideration to legislation providing benefits to the aged, ill, and disabled veterans of this great war in the form of pensions or any other means which will provide relief so vitally needed; be it further

Resolved, That a copy of this resolution be forwarded to the President of the United States, to the Director of the Veterans' Administration, to the Director of the U.S. Bureau of the Budget, to the chairman of the House Committee on Veterans' Affairs, and to each member of the Wisconsin delegation in the Congress.

Passed and adopted by the Calumet County Board of Supervisors on June 14, 1960.

ROLAND E. MILLER,
County Clerk.

RESOLUTIONS BY MIDWEST ASSOCIATION OF RAILROAD AND UTILITIES COMMISSIONERS

Mr. WILEY. Mr. President, today I received from Anson J. Anderson, secretary-treasurer of the Midwest Association of Railroad and Utilities Commissioners, a series of resolutions. Subjectwise, these resolutions covered a variety of significant topics, some of which are highly controversial. These include proposals relating to removal of the excise taxes on transportation, curtailment of rail service, problems involved in collective bargaining, and transportation of mail.

As I mentioned, there are strong views on both sides of the issues involved. Nevertheless, I believe that the views of the Midwest Association of Railroad and Utilities Commissioners deserve the consideration of Congress.

I therefore ask unanimous consent to have these resolutions printed in the RECORD and appropriately referred.

There being no objection, the resolutions were received and appropriately referred, and ordered to be printed in the RECORD, as follows:

To the Committee on Finance:

"RESOLUTION 1

"Whereas, the Federal excise taxes on communication and transportation services were initially levied or greatly increased during World War II to help defray war costs and to discourage unnecessary use of such services; and

"Whereas today such excise taxes are still in effect and continuing to discourage the public use of these services, regulated or unregulated, against which any Federal excise taxes are levied; and

"Whereas by law enacted at its session in 1959 Congress provided for the repeal of the 10 percent tax on local telephone service, effective as of June 30, 1960, and provided further that the excise tax on the transportation of passengers was to be reduced to 5 percent, effective as of July 1, 1960; and

"Whereas it is now proposed to postpone the effective date of the 1959 legislation respecting repeal of the local telephone service

tax and the reduction in the excise tax on the transportation of passengers: Now, therefore, be it

"Resolved, That the Midwest Association of Railroad and Utilities Commissioners go on record as vigorously opposing any postponement of the effective date of the abovementioned 1959 enactments, and hereby restate their position that these excise taxes are contrary to the existence of reasonably priced and nondiscriminatory communications and transportation services, and that, accordingly, such Federal excise taxes should be repealed; and be it further

"Resolved, That the secretary of this conference be directed to furnish to the members of the Subcommittee on Excise Taxes of the Committee on Ways and Means of the House of Representatives, and members of the Finance Committee of the U.S. Senate, a copy of this resolution; and that the secretary forthwith transmit a copy of this resolution to each of the Members of the Senate and of the House of Representatives in the Congress of the United States, representing the 11 midwestern States included in the membership of the association.

"Respectfully submitted.

"RESOLUTIONS COMMITTEE,
"ERNEST D. NELSON,
"North Dakota, Chairman.
"JOHN R. THOMPSON,
"Arkansas.
"RAY H. THOMPSON,
"Iowa."

To the Committee on Interstate and Foreign Commerce:

"RESOLUTION 2

"Resolution concerning modifying and amending the 1958 Federal Transportation Act as it pertains to section 13A

"Resolved, That the Midwest Association of Railroad and Utilities Commissioners recommend to the National Association of Railroad and Utilities Commissioners and to the Congress of the United States that section 13A be modified with respect to the matter of curtailing passenger service. We recommend that the law provide that such application concerning interstate passenger service be considered by a joint board on the same basis as joint boards now have jurisdiction in the matter of granting authority to regular route common carriers; and be it further

"Resolved, That in the case of applications on the part of the railroad involving the limitation of an intrastate passenger train that the original jurisdiction be left as it now is with the State commissions and that the law be changed so that in the event of an appeal it should not be referred to the Interstate Commerce Commission, but to the respective State and Federal courts.

"Respectfully submitted.

"RESOLUTIONS COMMITTEE,
"ERNEST D. NELSON,
"North Dakota, Chairman.
"JOHN R. THOMPSON,
"Arkansas.
"RAY H. THOMPSON,
"Iowa."

"RESOLUTION 3

"Whereas it is the consensus of the Midwest Association of Railroad and Utilities Commissioners that orders of State or Federal regulatory commissions duly entered after public hearing and due consideration of the public interest, authorizing changes in operations of common carriers should be allowed full force and effect; and

"Whereas such orders should not be the subject of collective bargaining between carriers and their employees because of the very real possibility that such course of action may result in the nullification of such orders; and

"Whereas a very recent decision of the Supreme Court of the United States holds that under the law as now written such bargaining is mandatory when demand therefor is made; and

"Whereas S. 3548 is a bill which has been introduced in the Congress of the United States to so change the law as to preserve the effectiveness of such orders and to remove them from the field of collective bargaining: Now, therefore, be it

"Resolved, That the Midwest Association of Railroad and Utilities Commissioners does hereby endorse the principles of S. 3548 or any other legislation producing similar results and does hereby urge Congress to take prompt action with respect thereto; and be it further

"Resolved, That the secretary of this association send copies of this resolution to the Members of the U.S. Senate and House of Representatives from the States represented in the membership of this association.

"Respectfully submitted.

"RESOLUTIONS COMMITTEE,
"ERNEST D. NELSON,
"North Dakota, Chairman.
"JOHN R. THOMPSON,
"Arkansas.
"RAY H. THOMPSON,
"Iowa."

To the Committee on Post Office and Civil Service:

"RESOLUTION 4

"Whereas for over 6 years the Postmaster General of the United States has been conducting an airlift program for transporting by air ordinary first-class mail on an experimental basis and has recently substantially extended the program and has announced plans to further extend the program on a permanent basis; and

"Whereas the diversion of first-class mail revenues from the railroads as a result of this program materially impairs their ability to continue to provide the service required of them in the interest of a sound national transportation system to adequately serve the national economy and properly maintain the Nation's defense: Now, therefore, be it

"Resolved, That the Midwest Association of Railroad and Utilities Commissioners hereby go on record as opposed to the program to fly ordinary first-class mail and as favoring and urging enactment of legislation to require discontinuance of the program; and be it further

"Resolved, That copies of this resolution be sent by the Secretary to each Senator and Congressman from the States embraced in the membership of this conference, and to the members of the Committees on Post Office and Civil Service of the Senate and House of Representatives.

"Respectfully submitted.

"RESOLUTIONS COMMITTEE,
"ERNEST D. NELSON,
"North Dakota, Chairman.
"JOHN R. THOMPSON,
"Arkansas.
"RAY H. THOMPSON,
"Iowa."

Ordered to lie on the table:

"RESOLUTION 5

"Mr. President, members of the association, and guests, as we reluctantly come to the close of the 1960 annual convention of the Midwest Association of Railroad and Utilities Commissioners: Be it

"Resolved, That the association take this opportunity to salute and thank the great State of South Dakota and the city of Rapid City for having opened its doors and taken us into their hearts.

"This convention has been one of the most noteworthy and successful in the history of this association, not only because of the discussions and comprehensive reports, but it has also given the opportunity to consider and discuss problems vital to the welfare of this great Republic and particularly of the area covered by this association. For these reasons, your committee, Mr. President, desires to submit the following resolutions:

"Resolved, That this association extends its sincere gratitude and appreciation to the State of South Dakota, the city of Rapid City and members of the staff of the South Dakota Public Utilities Commission, and to all those who so graciously welcomed us to the State of South Dakota and to the city of Rapid City; especially we are appreciative of the warm interest displayed by the Honorable Ralph Herseth, Governor of the State of South Dakota; the Honorable Fred Dusek, mayor of the city of Rapid City; Charles Lien, president, Chamber of Commerce of the City of Rapid City; and our special thanks to the Honorable C. L. "Roy" Doherty, chairman, arrangements committee, and to the Honorable C. A. Merkle, chairman, program committee, who have served so well; and to the Honorable Fred Lindekugel, of the South Dakota Public Utilities Commission, our retiring president, who has served with great distinction; also deep appreciation for the inspiring invocation offered by the Reverend Jerome Pipes, of the Episcopal Church; and be it further

"Resolved, That the association hereby extends its thanks and appreciation to all other organizations and individuals who have contributed to the success and enjoyment of the convention, for their self-sacrificing efforts to make the convention and our stay in Rapid City pleasant by providing unusual and interesting entertainment to all delegates and visitors; and be it further

"Resolved, That we also express our appreciation to the distinguished guests who have contributed, by their addresses, to the interest of the convention proceedings; and be it further

"Resolved, That these resolutions be spread upon the minutes of this convention.

"Respectfully submitted.

"RESOLUTIONS COMMITTEE,
"ERNEST D. NELSON,
"North Dakota, Chairman.
"JOHN R. THOMPSON,
"Arkansas.
"RAY H. THOMPSON,
"Iowa."

RESOLUTIONS OF ILLINOIS PHARMACEUTICAL ASSOCIATION

Mr. WILEY. Mr. President, today, I was privileged to receive from Thomas J. Vratny, secretary of the Illinois Pharmaceutical Association, a resolution relating to the need for assuring fair opportunity for not only the pharmaceutical industry, but all segments of the economy, to progress in a free economy; and a resolution on the matter of meeting the needs of our senior citizens.

I request unanimous consent to have these resolutions printed in the RECORD, and appropriately referred.

There being no objection, the resolutions were referred to the Committee on the Judiciary, and ordered to be printed in the RECORD, as follows:

Whereas pharmacy, the profession and industry, has been the target of derogatory criticism and attacks from many quarters as a result of misinformation arising from the Kefauver hearings: Be it therefore

Resolved, That the Illinois Pharmaceutical Association go on record as opposing any legislation or regulations which would unfairly:

(a) Stifle the incentive to further progress in the discovery, development, and humanitarian distribution of drugs;

(b) Militate against the welfare and benefits to the public and the profession and industry of pharmacy;

(c) Restrict the free choice of drugs by a prescriber.

(d) Regiment against private practice by members of the health professions; and

(e) Undermine one of our Nation's most precious assets—the independent and highest health standards in the world today; and be it further

Resolved, That we also give credit especially to Senator DIRKSEN, of Illinois, Senator WILEY, of Wisconsin, and Representative LESLIE ARENDS, of Illinois, for their understanding and efforts in behalf of the public interest and service of pharmacy before the Kefauver investigation.

Whereas Congress is considering a health program for the so-called oldsters;

Whereas these health programs do not provide the complete medical, hospital, and pharmaceutical services as may be inferred or as may be actually needed by the oldsters; and

Whereas these proposed health programs are proposed to be financed by a compulsory tax upon all citizens of these United States: Therefore be it

Resolved, That the Illinois Pharmaceutical Association oppose the health programs for the aged whereby all the citizens are faced with a compulsory tax, which in effect results in a socialized medical program; and be it further

Resolved, That the association rather prefer those health programs which are reasonably and intelligently set up on a voluntary basis.

RESOLUTION OF BROOKLYN, N.Y., INSURANCE AGENTS' ASSOCIATION

Mr. KEATING. Mr. President, I ask unanimous consent to have printed in the RECORD a resolution adopted by the Brooklyn Insurance Agents' Association on matters relevant to our Nation's tax and general fiscal policies.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

BROOKLYN INSURANCE AGENTS' ASSOCIATION, INC.,
Brooklyn, N.Y., June 14, 1960.

Hon. KENNETH B. KEATING,
U.S. Senate,
Washington, D.C.

DEAR MR. KEATING: The Brooklyn Insurance Agents' Association, Inc., representing the insurance agents of Brooklyn, N.Y., at its meeting on June 8, 1960, unanimously adopted the following resolution:

"Whereas it is our considered opinion that the constantly decreasing value of the American dollar has been brought about mainly through the steady increase in Government spending, bringing the public debt of the country to an alltime high; and

"Whereas the interest and refunding of the public debt together with the steadily rising costs of Government services requires a taxload on the American public which is fast approaching the confiscation stage; and

"Whereas there is constant pressure by various groups for more and more so-called welfare legislation, whereby the public debt would be further increased, or alternatively, taxes would be increased to meet the costs of such projects; and

"Whereas this association representing the insurance agency business in Brooklyn believes the time has come to call a halt to Government spending for any but defense purposes and the most essential services: Now, therefore, be it

"Resolved, That we call on our representatives in Congress to actively oppose any legislation that would further increase the public debt, or increase the already heavy taxload on the people, and that they further oppose any legislation that will extend the present creeping inflation in our American economy; and be it further

"Resolved, That a copy of this resolution be sent to each Senator from New York, and to each Representative from Brooklyn in the Congress.

"W. F. STANZ,
"Secretary."

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. JOHNSTON of South Carolina, from the Committee on Post Office and Civil Service, without amendment:

S. 2388. A bill relating to the separation and retirement of John R. Barker (Rept. No. 1608); and

S. 3421. A bill to amend the Federal Employees' Group Life Insurance Act (Rept. No. 1609).

By Mrs. SMITH, from the Committee on Armed Services, with an amendment:

H.R. 8186. An act to amend titles 10 and 14, United States Code, with respect to reserve commissioned officers of the Armed Forces (Rept. No. 1613).

By Mr. CHURCH, from the Committee on Interior and Insular Affairs, without amendment:

S. 3650. A bill to supplement and amend the Act of June 30, 1948, relating to the Fort Hall Indian irrigation project, and to approve an order of the Secretary of the Interior issued under the Act of June 22, 1936 (Rept. No. 1612).

By Mr. MAGNUSON, from the Committee on Appropriations, with amendments:

H.R. 11389. An act making appropriations for the Executive Office of the President and sundry general Government agencies for the fiscal year ending June 30, 1961, and for other purposes (Rept. No. 1610); and

H.R. 11776. An act making appropriations for sundry independent executive bureaus, boards, commissions, corporations, agencies, and offices, for the fiscal year ending June 30, 1961, and for other purposes (Rept. No. 1611).

By Mr. SPARKMAN, from the Committee on Banking and Currency, with an amendment:

S. 1342. A bill to create a Federal Limited Profit Mortgage Corporation to assist in the provision of housing for moderate-income families and for elderly persons (Rept. No. 1614).

VOLUNTARY PENSION PLANS BY SELF-EMPLOYED INDIVIDUALS—MINORITY AND INDIVIDUAL VIEWS

Mr. SMATHERS. Mr. President, from the Committee on Finance, I report favorably, with an amendment, the bill—H.R. 10—to encourage the establishment of voluntary pension plans by self-employed individuals, and I submit a report—No. 1615—thereon. I ask unanimous consent that the report be printed, together with minority and individual views.

The ACTING PRESIDENT pro tempore. The report will be received, and the bill will be placed on the calendar; and, without objection, the report will be printed, as requested by the Senator from Florida.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. WILEY:

S. 3690. A bill to amend title 18, United States Code, to prohibit racketeering incident to the arrangement or conduct of professional boxing contests, and for other purposes; to the Committee on the Judiciary.

(See the remarks of Mr. WILEY when he introduced the above bill, which appear under a separate heading.)

By Mr. CHAVEZ:

S. 3691. A bill for the relief of Rear Admiral Carl H. Cotter; to the Committee on the Judiciary.

By Mr. BYRD of West Virginia:

S. 3692. A bill to amend title II of the Social Security Act to permit reduced benefits thereunder (when based upon the attainment of retirement age) to be paid to men at age 62; and

S. 3693. A bill to amend title II of the Social Security Act to permit reduced benefits thereunder (when based upon the attainment of retirement age) to be paid to men at age 62 and women at age 60; to the Committee on Finance.

By Mr. MUSKIE (for Mr. KENNEDY):

S. 3694. A bill relating to the effective date of the qualification of the Pipe and Refrigeration Fitters Local 537 Pension Fund as a qualified trust under section 401(a) of the Internal Revenue Code of 1954; to the Committee on Finance.

RACKETEERING IN PROFESSIONAL BOXING

Mr. WILEY. Mr. President, testimony heard before the Antitrust and Monopoly Subcommittee in the last 2 days suggests the existence of a nationwide underworld empire controlling the sport of boxing. The bill I am introducing is intended to break up the main channels through which the underworld controls prizefighters.

Witnesses have testified before the Antitrust and Monopoly Subcommittee that boxing has become a game of fixing, rather than a competitive sport. Evidence in some cases shows that underworld figures often connected with gambling, have managed to assume control over many prizefighters. Prizefighters are controlled both for the purpose of dividing the purse and for the purpose of fixing matches—for greater gambling killings. The police records of many boxing managers, promoters, and matchmakers, produced before the subcommittee indicate that these professions are infested with underworld figures. By penetrating the ranks of the boxing management, the underworld has an easy job of controlling prizefighters.

Boxing is a national business and the States are not always able to cope with the nationwide underworld activities in this business. The boxing commissions in some States issue licenses to managers and promoters regardless of their past criminal histories. In other cases, when a person with a criminal record is denied a license in one State, he applies for a license and transfers his activities to another State.

To break up the underworld controls over the boxing business, I am today introducing a bill which would make it

a Federal criminal offense for any person with a prior criminal record to be licensed as a promoter, manager, or matchmaker in the boxing business, within 10 years after the date of his conviction or the date of the termination of his imprisonment. Violators of this law will be subject to a fine of $10,000, or imprisonment for not more than 20 years, or both. The law would be directed to keep out any person who has been convicted of a racketeering offense, including any attempt or conspiracy to commit murder, assault, bribery, gambling, robbery, or extortion, from engaging in business as a manager or promoter in professional boxing.

The law that I am proposing should deliver a hard sock in the jaw to the boxing racketeers.

Mr. President, I introduce the bill for appropriate reference; and I ask unanimous consent that it be printed in the RECORD.

The ACTING PRESIDENT pro tempore. The bill will be received and appropriately referred; and, without objection, the bill will be printed in the RECORD.

The bill (S. 3690) to amend title 18, United States Code, to prohibit racketeering incident to the arrangement or conduct of professional boxing contests, and for other purposes, introduced by Mr. WILEY, was received, read twice by its title, referred to the Committee on the Judiciary, and ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) chapter 95 of title 18 of the United States Code (entitled "Racketeering") is amended by adding at the end thereof the following new section:

"§ 1952. Racketeering in professional boxing

"(a) Whoever, being a person who has been convicted of any racketeering offense or who has served any part of any sentence imposed upon him for conviction of any such offense, within ten years after the date of his conviction for that offense or the date of the termination of his imprisonment under any such sentence, whichever is later, knowingly engages, attempts to engage, or offers to engage in business as a manager, promoter, or matchmaker incident to the arrangement or conduct, or any proposal or attempt to conduct or arrange for the conduct, of any professional boxing contest in or affecting commerce shall be fined not more than $10,000, or imprisoned not more than twenty years, or both.

"(b) For the purposes of this section—

"(1) An individual shall be deemed to have been convicted from the date of his conviction by the judgment of a trial court, or the date on which that judgment was sustained on appeal, whichever is the later event, without regard to the occurrence of that event before or after the date of enactment of this section; but

"(2) The conviction of a person for any offense shall be disregarded if within a period of ten years after such conviction that person has been duly pardoned for that offense by competent executive authority with full restoration of his rights of citizenship.

"(c) As used in this section—

"(1) The term 'professional boxing contest' means any boxing contest between contestants who receive or who by contract or agreement are entitled to receive compensation for their services, if any fee or charge is made for the admission of spectators to witness that contest;

"(2) The term 'professional boxer' means any person who engages in or undertakes to engage in any professional boxing contest as a contestant for monetary or other compensation;

"(3) The term 'manager' means any person who (A) by contract, agreement, or other arrangement undertakes or has undertaken to represent in any way the interest of any professional boxer in procuring, or with respect to the arrangement or conduct of, any professional boxing contest in which such boxer is to participate as a contestant, and (B) is entitled under that contract, agreement, or arrangement to receive monetary or other compensation for his services, without regard to the source of such compensation;

"(4) The term 'promoter' means any person who undertakes, offers to undertake, or has undertaken to arrange, attempt to arrange, or to participate in arranging or attempting to arrange, on his own account or on behalf of any other individual, partnership, corporation, or association, for the conduct of any professional boxing contest in exchange for monetary or other compensation from any source;

"(5) The term 'matchmaker' means any person who undertakes, offers to undertake, or attempts to undertake, on behalf of any professional boxer, manager, or promoter, to render any service incident to the arrangement of, or any attempt to arrange for, the conduct of any professional boxing contest in exchange for monetary or other compensation from any source;

"(6) The term 'racketeering offense' means any criminal offense under the law of the United States or of any State an essential element of which is the commission, or an attempt, conspiracy, or threat to commit, murder, assault with intent to kill, assault which inflicts grievous bodily injury, gambling, bribery, robbery, or extortion; and

"(7) The terms 'robbery', 'extortion', and 'commerce' shall have the same meaning as when used in section 1951."

(b) The chapter analysis of chapter 95 of title 18 of the United States Code is amended by adding at the end thereof the following new item:

"1952. Racketeering in professional boxing."

COLLEGE LOANS—AMENDMENT

Mr. JOHNSON of Texas. Mr. President, a few moments ago I returned from the Committee on Labor and Public Welfare, which was presided over this morning by big JIM MURRAY, one of the most genuine liberals I have ever known, and one of the greatest men of our times. I testified before the committee over which he presided on behalf of the college loan fund bill, Senate bill 2710, to provide for loan insurance on loans to students in higher education.

Senators will recall that I introduced this proposed legislation last September so that it would be possible to obtain the comments and the recommendations for the benefit of my colleagues in both the House and the Senate, of leading educators throughout the country, businessmen, and others who are interested and to assemble those during the adjournment period.

From literally hundreds of colleges and universities throughout the Nation we have received not only strong encouragement for the principle of insured loans to college students, but many constructive suggestions. As I explained to the Education Subcommittee this morning, these recommendations caused us to revise the bill in several significant respects. Because of these revisions, I presented to the subcommittee today a new and revised draft of the proposed legislation. In order that it may be available for Members of the Senate and others to examine, I now submit the revised version of the college loan bill, and I request that it be printed as an amendment in the nature of a substitute.

The PRESIDING OFFICER (Mr. CARLSON in the chair). The amendment will be received, printed, and appropriately referred.

The amendment, in the nature of a substitute, was referred to the Committee on Labor and Public Welfare.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the amendment remain at the desk through Monday of next week in order that any of my colleagues who may desire to associate themselves with this very comprehensive and far-reaching measure, which is written to be helpful to the young of this Nation, can associate themselves with me in its presentation.

The PRESIDING OFFICER. Without objection, the amendment will lie at the desk, as requested by the Senator from Texas.

Mr. JOHNSON of Texas. Mr. President, I believe this bill can be of considerable help in meeting the financial problems of students and colleges. As an aid to education, the proposed legislation is novel and somewhat unique.

However, the approach is a familiar one in that it applies a tested and proven principle of Government insured loans to the area of student loans. We have done this for many years in the fields of housing, foreign investment, and from time to time, for defense purposes for industrial activities.

Applying the insured loan concept to student financing should prove highly beneficial to our colleges and universities, and of course, more particularly, to the students and parents upon whom falls directly the heavier and heavier impact of educational costs. The proposed legislation is not intended by any means to replace the National Defense Education Act, but is rather conceived as a supplement to it. Nor is it considered as a complete solution to financial needs of the entire higher education community. But it is a constructive and significant step in the right direction in my opinion, and I am hopeful that Congress will be able to act upon it before adjournment.

I ask unanimous consent that the amendment and the statement I presented to the Subcommittee on Education be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JOHNSON of Texas. I should like to add just one sentence. Under the terms of the bill a student could borrow not to exceed $1,000 a year, and not to exceed a total of $5,000. The student

would borrow the money from the college at a maximum cost of 5 percent per annum, 4¾-percent interest and one-fourth percent insurance premium. The college in turn could borrow money from an insurance company, pension fund or other financial institution to provide money for its student loans. The college would have about one-fourth percent to help cover the costs of administering the loan. The Government would have one-fourth percent as an insurance premium to take care of any losses that might result. I predict there would be few if any losses.

There are no appropriations involved. This is an insurance program. I believe we have some $18 billion or $20 billion in guaranteed loans under the housing program.

I can think of no safer collateral than the young people of this Nation. We have a great need for this program. I predict that the committee will act upon the bill promptly, and I hope the Senate can pass it at this session of Congress.

The amendment and statement presented by Mr. JOHNSON of Texas are as follows:

Strike out all after the enacting clause and in lieu thereof insert the following:

"SHORT TITLE

"SECTION 1. This Act may be cited as the 'Student Loan Insurance Act of 1960'.

"DEFINITIONS

"SEC. 2. As used in this Act—

"(a) The term 'State' means a State, the Canal Zone, the District of Columbia, Puerto Rico, or the Virgin Islands.

"(b) The term 'institution of higher education' means an educational institution in any State which (1) admits as regular students only persons having a certificate of graduation from a school providing secondary education, or the recognized equivalent of such a certificate, (2) is legally authorized within such State to provide a program of education beyond secondary education, (3) provides an educational program for which it awards a bachelor's degree or provides not less than a two-year program which is acceptable for full credit toward such a degree, (4) is a public or other nonprofit institution, and (5) is accedited by a nationally recognized accrediting agency or association, or, if not so accredited, is an institution whose credits are accepted, on transfer, by not less than three institutions which are so accredited, for credit on the same basis as if transferred from an institution so accredited.

"(c) The term 'Commissioner' means the Commissioner of Education.

"(d) The term 'Secretary' means the Secretary of Health, Education, and Welfare.

"TITLE I—LOAN INSURANCE FOR STUDENT LOANS

"Authorization

"SEC. 101. For the purpose of facilitating loans to students in institutions of higher education, such institutions shall be insured by the Commissioner against losses on loans made by them to such students in the fiscal year ending June 30, 1961, and the succeeding fiscal year, if made upon the conditions and within the limits specified in this title. The total principal amount of new loans to students covered by insurance under this title in any fiscal year shall not exceed $100,000,000. The Commissioner may, if he finds it necessary to do so in order to assure an equitable distribution of the benefits of this title, assign, within such maximum amount, insurance quotas applicable to eligible institutions of higher education, or to States or areas, and may reassign unused portions of such quotas.

"Limitations on individual loans and on insurance

"SEC. 102. No loan or loans by one or more institution of higher education in excess of $1,000 in the aggregate to any single student in any fiscal year shall be covered by insurance under this title, nor shall the aggregate insured unpaid principal amount of loans made to any student exceed $5,000 at any time.

"Source of funds

"SEC. 103. Loans made by institutions of higher education in accordance with this Act shall be insurable whether made from the funds of the institution or from funds held by the institution in a trust or similar capacity and available for such loans.

"Eligibility of student borrowers and terms of student loans

"SEC. 104. A loan by an institution of higher education shall be insurable under the provisions of this title only if made to a student in such institution who devotes essentially full time to educational work in attendance at such institution, as determined by such institution, and if evidenced by a note or other written agreement which (1) provides for repayment of the principal amount of such loan in installments each quarter or lesser period beginning (except in the event of default in the payment of interest, or in the payment of the cost of insurance premiums, or other default by the borrower) within one year following the date on which the student ceases to devote essentially full time to educational work in attendance at any institution of higher education, (2) is made without security and without endorsement, except that if the borrower is a minor and such note or other written agreement executed by him would not, under the applicable law, create a binding obligation, either security or endorsement may be required, (3) requires full repayment of the principal with interest within not more than ten years after the date on which the first installment of principal becomes due, (4) provides for interest on such loan at a per annum rate not exceeding 4¾ per centum on the unpaid balance and accrued interest, but payment of interest accruing prior to the date on which the first installment of principal becomes due may be postponed until after such date, (5) entitles the student borrower at his option to accelerate repayment of the whole or any part of such loan, and (6) contains such other terms and conditions consistent with the provisions of this title and with the regulations issued by the Commissioner pursuant to this Act as may be agreed upon by the parties to such loan, including, at their option, a provision requiring the borrower to pay to the institution, in addition to principal and interest, amounts equal to the insurance premiums payable by the institution to the Commissioner with respect to such loan.

"Certificates of insurance—Effective date of insurance—Premiums

"SEC. 105. (a) If, upon application by an institution of higher education, made upon such form, containing such information, and supported by such evidence as the Commissioner may require, and otherwise in conformity with this section, the Commissioner finds that the institution has made a loan to an eligible student which is insurable under the provisions of this title, he shall, upon tender by the institution of the first year's insurance premium payable pursuant to subsection (d), issue to such institution a certificate of insurance covering such loan and setting forth the amount and terms of such insurance.

"(b) Insurance evidenced by a certificate of insurance pursuant to subsection (a) shall become effective upon the date of issuance of such certificate, except that the Commissioner is authorized, in accordance with regulations, to issue commitments with respect to proposed loans submitted by eligible institutions, and in that event, upon compliance with subsection (a) by the institution, the certificate of insurance may be issued effective as of the date when the loan to be covered by such insurance was made. Such insurance shall cease to be effective upon thirty days' default by the institution in the payment of any installment of the premiums payable pursuant to subsection (d).

"(c) An application submitted pursuant to subsection (a) shall contain (1) an agreement by the institution of higher education to pay, in accordance with regulations, the premiums fixed by the Commissioner pursuant to subsection (d), and (2) an agreement by such institution that if the loan is covered by insurance the institution will submit such reports during the effective period of the loan agreement as the Commissioner may by regulation prescribe as necessary to carry out the provisions of this title.

"(d) The Commissioner shall, pursuant to regulations, charge for insurance on each loan under this title a premium in an amount not to exceed one-fourth of 1 per centum per annum of the unpaid balance of principal and accrued interest of such loan, payable in advance, at such time and in such manner as may be prescribed by the Commissioner. Such regulations may provide that such premium shall not be payable, or if paid shall be refundable, with respect to any period after default in the payment of principal or interest, or after the borrower has died or becomes totally and permanently disabled, if (1) notice of such default or other event has been duly given, and (2) request for payment of the loss insured against has been made or the Commissioner has made such payment on his own motion pursuant to section 106.

"(e) The rights of an institution of higher education arising under insurance evidenced by a certificate of insurance issued under this section may not be assigned or transferred by such institution, except as provided in case of default in section 106.

"(f) The consolidation of the obligations of two or more insured loans obtained by a student borrower in any fiscal year into a single obligation evidenced by a single instrument of indebtedness shall not affect the insurance by the United States. Upon surrender of the original certificates of insurance in such cases, the Commissioner may issue a new certificate of insurance in accordance with this section upon such consolidated obligation.

"Procedure on default, death, or disability of student

"SEC. 106. (a) Upon default and a reasonable effort toward collection by the institution on any loan covered by insurance pursuant to this title, or upon the death of the student borrower or a finding by the institution that the borrower has become totally and permanently disabled, determined in accordance with regulations established by the Commissioner, before the loan has been repaid in full, and prior to the commencement of suit or other enforcement proceeding upon the loan or upon any security for such loan, the institution shall promptly notify the Commissioner who shall thereupon, if requested by such institution or on his own motion, if the insurance is still in effect, pay to the institution the amount of the loss sustained upon such loan as soon as such amount has been determined.

"(b) Upon payment by the Commissioner of the amount of loss pursuant to subsection (a), the United States shall be subrogated to

the rights of the institution upon the insured loan and be entitled to an assignment of the note or other evidence of the insured loan and any security therefor.

"(c) Nothing in this section or in this Act shall be construed to preclude any forbearance for the benefit of the student borrower which may be agreed upon by the parties to the insured loan and approved by the Commissioner, or to preclude forbearance by the Commissioner in the enforcement of the insured obligation after payment on such insurance, or to require collection of the amount of any loan by the institution of higher education or by the Commissioner from the estate of a deceased borrower or from a borrower found by the institution to have become permanently and totally disabled.

"(d) Nothing in this section or in this Act shall be construed to excuse the institution of higher education from exercising, in the making and collection of loans under the provisions of this title, the same care and diligence which would reasonably be used in making and collecting loans not insured. If the Commissioner, after reasonable notice and opportunity for hearing to the institution, finds that an institution of higher education has substantially failed to exercise such care and diligence, or to make the reports required under section 105(c), or to pay the required insurance premiums, he shall disqualify such institution for further insurance on loans granted pursuant to this title until he is satisfied that such failure has ceased and finds that there is reasonable assurance that the institution will in the future exercise necessary care and diligence or comply with such requirements, as the case may be.

"TITLE II—LOAN INSURANCE ON LOANS TO INSTITUTIONS OF HIGHER EDUCATION

"Authorization

"SEC. 201. For the purpose of assisting institutions of higher education in obtaining funds to make loans insured under title I, the Commissioner, on terms and conditions prescribed by him consistent with the provisions of this title and necessary to protect the interests of the United States, may insure in whole or in part any public or private financing institution, or trustee under a trust or indenture or agreement for the benefit of the holders of any securities issued thereunder, by commitment or otherwise, against loss of principal and interest on any loan to an institution of higher education for the purpose of providing such institution with necessary funds to make loans insured under title I of this Act. The total principal amount of new loans covered by insurance under this title in any fiscal year shall not exceed $100,000,000. The Commissioner may, if he finds it necessary to do so in order to assure an equitable distribution of the benefits of this title, assign, within such maximum amount, insurance quotas applicable to eligible institutions of higher education, or to States or areas, and may reassign unused portions of such quotas.

"Limitations

"SEC. 202. No loan shall be covered by insurance under section 201 unless—

"(1) the Commissioner finds that such loan is necessary to enable the institution of higher education to provide student loans to be insured under title I;

"(2) the rate of interest to be paid on the loan is 4½ per centum or less;

"(3) the terms of such loan require repayment in twenty years or less; and

"(4) the Commissioner finds that there is reasonable assurance that the institution of higher education has the ability to repay the loan within the time fixed therefor.

"Payment on guarantees

"SEC. 203. Payments required to be made as the result of default on any loan insured by the Commissioner under this title shall be made from the revolving insurance fund established under section 301.

"TITLE III—ADMINISTRATIVE MATTERS

"Revolving insurance fund

"SEC. 301. (a) Premiums under title I and all other moneys derived by the Commissioner in the course of operations under this Act shall be deposited in a revolving fund in the Treasury of the United States. All moneys in the revolving fund shall upon requisition by the Commissioner, be available until expended, (1) for the payment of losses in connection with insurance undertaken pursuant to this Act, and (2) for any fiscal year, in the amount provided for by an appropriation Act, for defraying the expenses of administration incurred under this Act.

"(b) For the purposes of carrying out the provisions of this Act, there are hereby authorized to be appropriated to the revolving fund provided in this section—

"(1) the sum of $500,000 for the initial establishment of the revolving fund; and

"(2) such further sums, if any, as may become necessary for the adequacy of the revolving fund.

"(c) The Commissioner shall, from the revolving fund, pay annually into the Treasury, as miscellaneous receipts, interest on any sums appropriated to the revolving fund pursuant to subsection (b) which have not been repaid into the Treasury as provided in subsection (d). The Secretary of the Treasury shall determine the interest rate annually in advance, such rate to be calculated to reimburse the Treasury for its costs in connection with such appropriated funds, taking into consideration the current average interest rate which the Treasury pays upon its marketable obligations.

"(d) Until all advances made to the revolving fund by appropriation pursuant to subsection (b) (1) and (2) have been repaid through credits as provided in this subsection, the Commissioner shall, at least annually, determine any balance in the revolving fund in excess of an amount determined by him to be necessary for the requirements of the fund, and for reasonable reserves to maintain the solvency of the fund, and such balance shall be paid into the Treasury as miscellaneous receipts and the amount thereof be credited against such advances.

"(e) The Commissioner may authorize the Secretary of the Treasury to invest and reinvest such portions of the revolving fund as he may determine to be in excess of current needs in any interest-bearing securities of the United States or in any securities guaranteed as to principal and interest by the United States, and the income therefrom shall constitute a part of the revolving fund.

"Legal powers and responsibilities

"SEC. 302. (a) With respect to matters arising by reason of this Act, and notwithstanding the provisions of any other law, the Commissioner may—

"(1) sue on behalf of the United States and be sued in his official capacity in any court of competent jurisdiction, State or Federal;

"(2) subject to the specific limitations in this Act, consent to the modification, with respect to rate of interest, time of payment of principal and interest or any portion thereof, or security, of the provisions of any note, contract, mortgage, or other instrument evidencing or securing a loan which has been insured under this Act;

"(3) enforce, pay, or compromise, any claim on, or arising because of, any such insurance; and

"(4) enforce, pay, compromise, waive, or release any right, title, claim, lien, or demand, however acquired, including any equity or any right of redemption.

"(b) The Commissioner shall, with respect to the financial operations, arising by reason of this Act—

"(1) prepare annually and submit a budget program as provided for wholly owned Government corporations by the Government Corporation Control Act; and

"(2) maintain an integral set of accounts, which shall be audited annually by the General Accounting Office in accordance with principles and procedures applicable to commercial corporate transactions, as provided by section 105 of the Government Corporation Control Act, except that the financial transactions of the Commissioner, including the settlement of insurance claims, and transactions related thereto and vouchers approved by the Commissioner in connection with such financial transactions, shall be final and conclusive upon all accounting and other officers of the Government.

"Treatment of certain trusts, foundations, and other organizations as institutions of higher education

"SEC. 303. The Commissioner may by regulation provide for the treatment of any nonprofit trusts, foundations, or other similar organizations, controlled by an institution of higher education or the officials thereof, as part of the institution of higher education for the purposes of this Act, if he determines that such treatment would promote such purposes. Such regulations may establish such requirements for the purpose of this section as may be necessary to protect the interests of the United States.

"Administration

"SEC. 304. (a) This Act shall be administered by the Commissioner, under the supervision and direction of the Secretary. The Commissioner shall, with the approval of the Secretary, make all regulations specifically authorized to be made under this Act and such other regulations, not inconsistent with this Act, as may be necessary to carry out its purposes. The Commissioner is authorized to delegate to any officer or employee of the Office of Education any of his powers and duties under this Act, except the making of regulations.

"(b) In administering the provisions of this Act, the Commissioner is authorized to utilize the services and facilities of any agency of the Federal Government and, without regard to section 3709 of the Revised Statutes, of any other public or nonprofit agency or institution, in accordance with agreements between the Secretary and the head thereof. Payment for such services and facilities shall be made in advance or by way of reimbursement, as may be agreed upon by the Secretary and the head of the agency or institution.

"(c) At the beginning of each regular session of the Congress, the Commissioner shall make through the Secretary a full report to Congress of the administration of this Act, including his recommendations for needed revisions in the Act.

"(d) When deemed necessary by the Commissioner for the effective administration of this Act, experts or consultants may be employed as provided in section 15 of the Act of August 2, 1946 (60 Stat. 806, 810).

"Federal control of education prohibited

"SEC. 305. Nothing contained in this Act shall be construed to authorize any department, agency, officer, or employee of the United States to exercise any direction, supervision, or control over the curriculum or program of instruction of any educational institution or, except as provided in sections 105 and 106 (d), over its administration or personnel.

"Authority under Act conditional upon amount of appropriation for title II of the National Defense Education Act of 1958

"SEC. 306. The authority of the Commissioner to insure any loans in any fiscal year under the provisions of this Act shall be conditional upon the appropriation under the provisions of the Department of Health, Education, and Welfare Appropriation Act for such year of at least 75 per centum of the amount authorized for such year under the provisions of title II of the National Defense Education Act of 1958."

STATEMENT OF SENATOR LYNDON B. JOHNSON BEFORE THE EDUCATION SUBCOMMITTEE OF THE SENATE COMMITTEE ON LABOR AND PUBLIC WELFARE, JUNE 17, 1960

Mr. Chairman, I am extremely pleased to have this opportunity to appear before the Education Subcommittee of the Committee on Labor and Public Welfare on behalf of S. 2710. This is the bill I introduced during the closing days of the 1959 session to provide a program of Government insurance on loans to college students.

This bill would set up an insurance program under the Commissioner of Education on the model of the Federal Housing Administration mortgage insurance. Just as mortgage insurance opened up vast new sources of funds for housing, I believe that Government insurance on student loans will make available new sources of low-cost funds to college students to assist them and their parents in financing their education.

At the time I introduced this bill on September 14, 1959, I stated that I did so in order to make it available to the educators of our country between sessions of Congress. Since that time I have corresponded with literally hundreds of presidents and deans of colleges and universities all over the country. And I have had the good fortune to have the personal advice and counsel of a number of the country's most experienced authorities on questions of financial assistance to college students.

I was delighted by the response I received from the academic community on this proposal. The overwhelming majority of educators and college administrators approve the bill. And even those few who expressed reservations approve the general principle of insurance for student loans. I am convinced that the revised bill that I will submit to the committee today will meet most of their objections.

I would like to share with the subcommittee some of the comments of these distinguished educators. For instance, President Nathan M. Pusey, of Harvard University, in writing me of his support of the program noted that it "should be a popular program, and it would have the great advantage of being self-supporting."

President Cortney Smith, of Swarthmore College in Pennsylvania, wrote me, "It is our judgment that your proposal is both beneficial and sound. It is indeed a statesmanlike bill in the public interest." President F. Edward Lund, of Kenyon College in Ohio, wrote, "I am in full sympathy with both the principle and the legislation that you propose." President Harvey Branscomb, of Vanderbilt University in Tennessee, stated, "This proposal would be very helpful to us all, and I am grateful to you for your sponsorship of this bill."

These are typical of the comments I received from leading educators and college administrators all over the country. I could not possibly read even a fair sample of these letters, but I ask the consent of the committee to submit a few of them for the record. I am sure that the committee will find these thoughtful comments to be extremely helpful to them in passing on this bill.

These favorable comments were most gratifying, but the most encouraging aspect of the response to the bill was the manner in which the academic community provided me with constructive suggestions for improving the bill.

In addition to the suggestions contained in these letters, I was fortunate to have the helpful advice of my good friend, Mrs. Mary Lasker, and the generous assistance and advice of my good friend, Mr. David D. Lloyd. Through their cooperation I was privileged to have the advice and counsel of a committee of leading authorities on the subject of financial assistance to college students. These were Mr. John F. Morse, vice president, Rennselaer Polytechnic Institute, who was instrumental in setting up the National Defense Education Act loan program; Prof. Seymour E. Harris, professor of political economics and chairman of the Economics Department, Harvard University; Mr. Rexford G. Moon, director of the college scholarship service, college entrance examination board; and Mr. Russell Thackrey, executive secretary, American Association of Land-Grant Colleges and State Universities. All of these gentlemen gave me the benefit of their knowledge and broad experience in this field and I am deeply grateful to them.

These suggestions proved extremely helpful and played a large part in determining the form of the revised draft bill I am submitting to the committee today. At the time I introduced the bill, I stated that I have always gone on the principle that the collective judgment of the best minds is better than the individual judgment of any single mind. And I believe that this revised draft represents the collective judgment of the best minds available on the subject of financial aid to college students. I am proud to offer it to the committee.

Under the revised program, institutions with large resources of savings, such as insurance companies, endowment funds, and pension and welfare funds would be reached through a two part insurance program which would protect colleges against loss on loans to students and also protect financial institutions against loss on loans to colleges for student loan purposes.

A student could obtain up to $1,000 in insured loans a year with an overall limit of $5,000. The maximum cost to the student would be 5 percent per annum—4¾ percent maximum interest and one-fourth percent insurance premium. Repayment would commence within 1 year after the student leaves school, and the loan would be repaid over the following 10 years.

The loan to the student would be made to the college, and the college would retain the note and administer the collection of payments. If the borrower defaults, the insurance fund would protect the college from loss.

When outside funds are needed by a college for student loans, the college would borrow directly from financial institutions without assigning any student notes. These loans to colleges would be relatively long-term, with a duration of up to 20 years, and the maximum interest would be 4½ percent, with the financial institution protected from loss by insurance. This program contemplates that the colleges would borrow money for student loans at a rate not in excess of 4½ percent and lend it to students at a maximum interest of 4¾ percent, providing one-fourth percent to help cover the college's costs of administering the loans. This 4¾ percent interest plus the one-fourth percent insurance will result in a maximum cost to the student of 5 percent per annum.

The bill does not spell out the exact terms of the student loans. Only basic and minimum requirements are specified, and a large area of discretion remains within which the individual school can frame the program which best meets its own needs.

For example, the bill does not include a "needs" test as a condition of obtaining an insured loan. This does not mean that every student in every school would be entitled to an insured loan. One college might apply a "needs" test of some kind in its program; another might be willing to administer its program as one of convenience without a rigorous "needs" formula. In either event, loans under the program would be covered by insurance provided they met the other requirements of the bill.

The principal difference between this revised draft and the bill as originally introduced are these:

1. The original bill contemplated that the college would assign insured student loans to financial institutions in order to replenish its student loan funds. Under the revised bill, the college would hold and administer the loans. The college in turn would borrow funds for its loan program without assigning student notes. Both the college and the financial institution would be insured against loss.

2. The insurance premium has been reduced from one-half to one-fourth percent. It is generally believed that the incidence of default on student loans in the hands of the colleges will be so small that a one-fourth percent premium will be entirely adequate.

3. The maximum insured loan entitlement of a student has been increased from $4,000 to $5,000, although the yearly maximum remains at $1,000. This brings the bill in line with the limits of the National Defense Education Act and gives greater consideration to the student who seeks graduate training.

4. The original bill provided for repayment to begin 4 years after the borrower leaves school and to be completed within 6 years thereafter. Under the revised program, payment would commence within 1 year after the student leaves school, and he would then have 10 years in which to repay the principal and interest.

5. The original bill called for interest on the student notes at 3 percent per annum in the hands of the college with an additional 1½ percent interest added if the note were assigned to a financial institution. The revised draft approaches the interest rate problem differently. It contemplates that the college will borrow funds at a maximum of 4½ percent and loan them at a rate which will provide the school with a one-fourth percent differential to help cover the cost of administering the loans.

The question of the cost to colleges of administering student loans was one of the most significant problems we encountered in working out this loan program. Every college administrator we consulted expressed deep concern over the financial strain Government-sponsored loan programs are imposing on colleges.

The National Defense Education Act program of 3-percent loans of principally Government funds is the prime example. Not only does NDEA require the college to contribute one-ninth of the amount loaned to the student at a significant loss, the school must also bear the entire cost of administering and collecting the loans.

Apparently there are no accurate figures on what these costs are or what they should be. But I have been furnished with reliable estimates that it costs a college $10 per account per year to administer a substantial loan program.

It seems to me not only unfair but inconsistent for the Federal Government to create loan programs and expect the colleges to absorb all the administrative costs. On the one hand, we spend much of our time seeking means to help institutions of higher learning out of the financial plight in which they now find themselves. On the other hand, we impose even greater financial strains on their limited resources.

This matter of administrative costs on student loans, I believe, may seriously impair the effectiveness of NDEA program. For that reason, the bill I offer contemplates a one-fourth percent spread between what the college pays for the money and the rate for which it loans it to the student. I don't contend that this is sufficient to cover the school's expenses. The colleges will have to incur some sacrifices to implement substantial programs under this bill. But this one-fourth of 1 percent may take them out of the disaster area.

The costs to colleges of administering existing Government-sponsored programs deserves the most serious attention of this committee and the Office of Education. I recommend that a study be undertaken as soon as possible to determine the feasibility of providing assistance to colleges both in the form of direct financial aid and expert guidance in handling accounts.

A number of educators have expressed reservations about this insured loan program because they fear it might supplant the NDEA program of direct loans to students. Although the NDEA program imposes serious financial strains on the colleges, they recognize its value to their students, and I find that educators and college administrators throughout the country are overwhelmingly in favor of its continuance.

I have always conceived of the insured student loan program as a program to supplement and not to supplant the NDEA program. I believe there is a need for both and no conflict between them.

For example, the NDEA program employs a needs test to determine eligibility. No needs test is required under the bill I have introduced. Therefore, a particular school may desire to operate its program as one of convenience designed to assist the student who finds himself in a difficult financial situation but who cannot meet the needs test of the NDEA program.

The NDEA program requires that preference be given to superior students in certain fields. This insured loan program has no such requirements. Furthermore, the insured loan program could be used in exceptional cases to provide supplementary funds when a student's NDEA entitlement has been exhausted. Finally, I am sure that this insured loan program would be extremely useful to the college which simply does not have the resources to finance its end of the NDEA program.

I believe that within a brief period we will see the student loan approach to financing higher education expanded to such an extent that both of these Federal programs will be utilized to their fullest authorized extent.

But in order to provide complete assurance that this insurance program will not supplant the NDEA direct loan program, I have suggested in section 306 of the revised draft that the insured loan program will be in effect only in years when appropriations for NDEA are at a level of at least 75 percent of the authorized amount. Furthermore, it is provided that the insured loan program will expire when the NDEA expires. Therefore, there is no danger that the NDEA program will be allowed to expire because of the existence of an insured loan program.

It has been pointed out to me that some State colleges and universities may not be able to participate in this insured loan program because of legal restrictions on borrowing. I believe that the legislatures of these States will take such action as may be necessary to permit the schools to participate in the program, and for that reason I do not think the problem will arise.

However, there is another means by which such institutions may participate in the insured loan program. Section 303 allows the Commissioner of Education to permit nonprofit trusts, foundations, and similar organizations controlled by the officials of an institution to participate in the same manner as the institution itself. Therefore, a trust fund, foundation, or similar organization could be established within the framework of the college or university and participate in the insured loan program. Such organization could borrow money and make student loans and the loans would be covered by insurance.

I certainly need not dwell on the need today for our Nation to marshal every resource in an effort to provide more and better education for our young people. And I believe that this insured student loan program can make a significant contribution to this effort.

It is not my thought that loan programs such as this will be utilized to shift the cost of higher education from society at large to the college student. I know, as does the committee, that this cannot be done. Regardless of how much you provide college students in loans, it will still be necessary for every level of government to support higher education to the fullest extent.

I do not believe that through the use of student loans, we can make it possible for more students and families of students to assume the portion of the cost of a college education which has traditionally been placed on the student. Furthermore, for many colleges and universities—especially the private schools—increased tuition is unavoidable under the pressure of ever-increasing costs. And student loans may be the only feasible means of meeting this cost.

I think that Congress would do well to adopt this insured student loan program. It would help provide a portion of the vast sums needed in the United States today for higher education in a manner which won't be costly to the Government. It would utilize the credit facilities of the Nation in such a way as to direct its resources into most desirable channels. It is based on an insurance concept which the experience of FHA has proved to be entirely sound. It would provide new opportunity to thousands of youngsters, and it would be completely consistent with our tradition of self-reliance and individual initiative.

I commend the bill to the committee's consideration and urge that it be favorably reported. I appreciate the opportunity to appear before the committee, and I await your action with pleasure.

INCREASE FOR 1-YEAR PERIOD THE PUBLIC DEBT LIMIT, AND EXTENSION OF CORPORATE NORMAL TAX AND CERTAIN EXCISE TAXES—AMENDMENT

Mr. GORE submitted amendments, intended to be proposed by him to the bill (H.R. 12381) to increase for 1-year period the public debt limit set forth in section 21 of the Second Liberty Bond Act and to extend for 1 year the existing corporate normal-tax rate and certain excise tax rates, which were ordered to lie on the table and be printed.

NOTICES OF MOTIONS TO SUSPEND THE RULE—AMENDMENTS TO INDEPENDENT OFFICES APPROPRIATION BILL

Mr. MAGNUSON submitted the following notice in writing:

In accordance with rule XL, of the Standard Rules of the Senate, I hereby give notice in writing that it is my intention to move to suspend paragraph 4 of rule XVI for the purpose of proposing to the bill (H.R. 11776) making appropriations for sundry independent executive bureaus, boards, commissions, corporations, agencies, and offices, for the fiscal year ending June 30, 1961, and for other purposes, the following amendment, namely: Page 6, line 21, after the words "United States", insert: ", and the Act of August 28, 1938 (49 Stat. 956), as amended by the Act of August 27, 1951 (65 Stat. 198), is hereby repealed".

Mr. MAGNUSON also submitted an amendment, intended to be proposed by him, to House bill (H.R. 11776) making appropriations for sundry independent executive bureaus, boards, commissions, corporations, agencies, and offices, for the fiscal year ending June 30, 1961, and for other purposes, which was ordered to lie on the table and be printed.

(For text of amendment referred to, see the foregoing notice.)

Mr. MAGNUSON submitted the following notice in writing:

In accordance with rule XL, of the Standard Rules of the Senate, I hereby give notice in writing that it is my intention to move to suspend paragraph 4 of rule XVI for the purpose of proposing to the bill (H.R. 11776) making appropriations for sundry independent executive bureaus, boards, commissions, corporations, agencies, and offices, for the fiscal year ending June 30, 1961, and for other purposes, the following amendment, namely: Page 13, line 23, after the word "individuals", insert: ": *Provided*, That the Commission is authorized, subject to the procedures prescribed in the Classification Act of 1949, as amended, but without regard to the numerical limitations contained therein, to place six General Schedule positions in the following grades: four in grade GS–18, one in grade GS–17, and one in grade GS–16; and such positions shall be in addition to positions previously allocated to this agency under section 505 of said Act".

Mr. MAGNUSON also submitted an amendment, intended to be proposed by him to House bill 11776, making appropriations for sundry independent executive bureaus, boards, commissions, corporations, agencies, and offices, for the fiscal year ending June 20, 1961, and for other purposes, which was ordered to lie on the table and be printed.

(For text of amendment referred to, see the foregoing notice.)

EXTENSION AND AMENDMENT OF AGRICULTURAL ACT OF 1949—ADDITIONAL COSPONSORS OF BILL

Under authority of the order of the Senate of June 13, 1960, the names of Senators HUMPHREY, HART, DOUGLAS, MCNAMARA, MURRAY, PROXMIRE, CLARK, and YOUNG of Ohio were added as additional cosponsors of the bill (S. 3666) to amend title V of the Agricultural Act of 1949, as amended, to provide protection for the employment opportunities of domestic agricultural workers in the United States, and for other purposes, introduced by Mr. MCCARTHY on June 13, 1960.

ADDRESSES, EDITORIALS, ARTICLES, ETC., PRINTED IN THE RECORD

On request, and by unanimous consent, addresses, editorials, articles, etc.,

were ordered to be printed in the RECORD, as follows:

By Mr. BYRD of West Virginia:
Address entitled "The Crisis of the 'Golden Sixties,'" delivered by himself before the 21st General Convention of the System Federation No. 41 of the Chesapeake & Ohio Railway on June 15, 1960.

REPLY BY MAJ. GEN. JULIUS KLEIN TO ADLAI STEVENSON'S STATEMENT CONCERNING THE SUMMIT CONFERENCE

Mr. WILEY. Mr. President, I have received a statement from a very distinguished citizen of Chicago concerning the statement of Gov. Adlai Stevenson as quoted in a Paris newspaper with respect to the collapse of the summit conference. The statement is by Maj. Gen. Julius Klein. I ask unanimous consent that it be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STEVENSON'S STATEMENT STAB IN THE BACK OF SUMMIT

(Statement by Maj. Gen. Julius Klein, of Chicago, at present George V Hotel, Paris, May 18, 1960)

[English translation]

Gov. Adlai Stevenson's statement as quoted this weekend in Paris-Presse on the eve of the collapse of the summit conference was a stab in the back of those Americans charged with the responsibility to bring about some solution of the cold war. Stevenson in his statement urged, and was widely quoted all over Europe, that some concession in regard to Berlin should be made to the Soviets. If he is quoted correctly, he also severely criticized the late John Foster Dulles, who so courageously fought off Soviet aggression and imperialism during the cold war. Stevenson further charged that "The German Chancellor Adenauer was the Foreign Minister of the United States in the last 7 years." European statesmen were shocked at this statement by Stevenson, and the front pages of the newspapers gave prominent space to it.

Khrushchev must have gotten a lot of encouragement out of Stevenson's statement, and I am sure that his gangster-type performance in destroying the summit conference was prompted with his naive idea that after next November he might be in a position to confer with an administration more to his liking than the one headed by Eisenhower, Nixon, and Herter.

Americans here in Paris are bewildered and shocked but are proud of their President's conduct. I have sent the President a telegram as per attached copy. I am convinced that the political leaders of all parties as good Americans will repudiate Presidential Candidate Stevenson's position, and I am fully confident that Vice President Nixon, who is an announced candidate, will have the proper answer not only for Khrushchev but also for the hidden candidate Stevenson. We Americans are grateful to De Gaulle and Macmillan for their support of our President and the free world. We all realize that the question of Berlin and the Federal Republic of Germany under Adenauer is the concern of the entire free world. The President deserves, and I am sure will receive, not only the united support from us all but also the prayers of the American people in this grave hour.

I have issued this statement as an American who happens to be in Paris at this time and who knows the leading figures in this great drama personally.

WISCONSIN SAYS: "WELCOME, AMERICA"

Mr. WILEY. Mr. President, by Presidential proclamation, 1960 is Visit U.S.A. Year.

To every citizen, the opportunity to become more intimately acquainted with our great land—created out of a wilderness; built upon hope, hard work, and ideals; and dedicated to creating a free, rich life for its people: out of this effort—unique in history—our land has become the citadel of freedom for the world.

The history and tradition of our great country is, in itself, inspiring. It is one of which all Americans can be deeply proud.

Even more exciting and thrilling, however, is the promise of an ever-greater, brighter future.

Across this great Nation, I truly hope that more and more people will make a real effort to visit the United States of America—to see, know, understand, and better love this great country. Within its boundaries are many inspiring, exciting, thrilling, awing landscapes, and scenes and projects of natural and man-created beauty.

Here in America we find the ultimate of the new world and life of the 1960 space age. Also, we find symbols and images of the past; of our native heritage; of the cultures of lands around the world mirrored in the lives of immigrants who came to this country and helped to make it great.

During Visit U.S.A. Year, we in Wisconsin—a vacation dreamland—expect many, many of our traveling citizens.

At this time, I warmly invite all fellow Senators—after the adjournment of an extremely heavy-duty session of considering legislation in the national interest—to come to this wonderland of America.

Even though this is an election year—and many Senators will be busy electioneering—I sincerely request that they take time to "shake the dust" of campaigning off their feet.

Come to Wisconsin; shed, for a moment, the heavy burdens of political life; let them become a happy memory in the pleasureland of Wisconsin.

Stroll under the heavenly skies; in the serene, beautiful forests; and along the murmuring streams and mirror lakes. Enjoy the warmly human hospitality in a haven away from home in our Badgerland. Find yourselves again, through communion with God, nature, and a great people. After a "breather" in our wonderland, you will be better able to shoulder the burdens ahead.

To the world, we say, "Give us your tired, weary, adventure-or-leisure-seeking wanderers." Let us "renew you" in a wonderland of milk, honey, great people, scenic beauty; a haven to revive you in body, mind, and spirit. Be strengthened by the strong, heart-warming handclasp of friendship with the sons and daughters in the Indian-name land of the "gathering of the waters."

Come to us and rest awhile; then rise to "live" again.

Annually, millions of people from all walks of life come from sister States, from our good neighbor Canada, and from nations around the world to our Badger State for a truly enjoyable vacation.

The outdoor and indoor playgrounds of Wisconsin offer a great variety of opportunities to relax tightwire nerves, stimulate the mind, and refresh the spirit.

The Lord knows that we in this body need a little relaxation, because we have been sort of flying off the handle of late.

Retreating from the workaday world, vacationers find their heart's delight in our fine communities, amid natural beauty of sunny days and cool nights.

THE WELCOME MAT IS ALWAYS OUT

Our visitors too have opportunity to enjoy refreshing scented breezes through rustling pine trees, bristling cliffs, wooded slopes, restful valleys, fertile farmlands, sparkling waterfalls, scenic spring-fed rivers and clear lakes.

Across the State, we have a picturesque panorama of outstanding scenery, archeological, geological, botanical, wild life—both flora and fauna—and other features of natural and historical interest.

To you, all America, the welcome mat is always out.

SPECIAL FEATURES OF WISCONSIN'S VACATION LAND

Truly, Wisconsin is a land of the "gathering of the waters."

Among our State's attractions are included about 8,600 lakes and 10,000 miles of streams for bathing, boating, water skiing, and fishing. The game fish include trout, muskie, perch, white bass, sturgeon and a number of other varieties. A boating paradise, Wisconsin ranks as one of the Nation's top boat builders, along with motors and other accessories.

In our glorious, natural heritage, we have also 2 national forests, 7 State forests, and 17 State parks, all providing a great many wonderful opportunities for sightseeing, camping out of doors, or traveling through our scenic countryside.

Rich in cultural beauty, we have 161 museums and other historical sites of interest.

For the hunter, Wisconsin has a wide variety of game for seasonal hunting, including pheasants, Hungarian partridge, waterfowl, prairie chicken, grouse, deer, bear, raccoon, geese, ducks, and other game.

The traveler will enjoy the many splendid resorts, motels, hotels, cabins, trailer sites, and other high quality tourist accommodations for in-city or out-in-the-country living for the tourists who would get away from it all. Also, fine restaurants offer tantalizing meals of the world's finest foods, including our high-quality dairy products which are famous around the globe.

Wisconsin also boasts an overexpanding transportation system including more than 95,000 miles of roadway, more than 71 modern public airports to serve the

flying visitors, and excellent rail and water transportation facilities to the beauties of Wisconsin.

The St. Lawrence Seaway, too, is expected to bring more visitors to our Badger State wonderland—from Canada, other States and other nations.

For moderate costs, visitors are repaid many-fold in warm, friendly hospitality and accommodations that provide a paradise in settings and surroundings that revitalize the flesh and inspire the spirit.

Our chamber of commerce, conservation clubs, sports and other groups are designing constructive programs to help provide the best possible climate of welcome for the visitor to wonderful Wisconsin.

Whether you plan for spirits, playtime, picnicking, swimming, boating, or just plain loafing, our Wisconsin beautyland will provide your heart's desire.

Mr. BYRD of West Virginia. Mr. President, will the Senator from Wisconsin yield?

Mr. WILEY. Yes. Here comes West Virginia.

Mr. BYRD of West Virginia. Mr. President, I have listened with great interest to the distinguished Senator from Wisconsin as he has spoken about the treasures and the pleasures that will be available to vacationers who visit the great State of Wisconsin.

Mr. President, I can think of a State which has all of these things and more—the State of West Virginia.

West Virginia is the most northern of the southern, the most southern of the northern, the most eastern of the western, and the most western of the eastern.

West Virginia is a State which reaches farther north than Pittsburgh, Pa.; farther south than Richmond, Va.; farther east than Buffalo, N.Y.; and as far west as Columbus, Ohio.

West Virginia is the State where the East says good morning to the West; and where Yankee Doodle and Dixie kiss each other good night.

I invite my affable and distinguished "guide, philosopher, and friend," the senior Senator from Wisconsin, to come to America's finest vacationland, the West Virginia hills.

Mr. KEATING. Mr. President, will the Senator from Wisconsin yield?

Mr. WILEY. I yield to the Senator from New York.

Mr. KEATING. The distinguished Senator from Wisconsin, with characteristic loyalty to his State, has spoken of its beauties and has invited all of us there for vacation.

Perhaps a number of us will be enticed away, after hearing the eloquent statement about the beauties of Wisconsin. But if any are left over, I cordially invite them to the great State of New York. Upstate New York is a great and beautiful vacation land; and in New York City we have all the beauties and attractions—and then some—which are to be found in any city of the country, even in the great cities of Wisconsin.

But I compliment our dear friend, the Senator from Wisconsin [Mr. WILEY] on his great vigor and his great fidelity to the interests of the State he has so nobly represented in this Chamber for many, many years.

Mr. WILEY. Mr. President, in responding to the very fine remarks which have been made by the young poet and distinguished Senator from West Virginia [Mr. BYRD]—and he is a poet—let me say it is a wonderful thing for the Senate to have among its Members a young man of his caliber, who brings into the RECORD such fine ideas and fine sentiments, and brings to this Chamber his cheering countenance.

In responding to the remarks of my friend, the Senator from New York, I wish to say we are welcoming all Members of the Senate, and we will greet them with an open hand. In Wisconsin we have one thing which I think is common throughout the country, and that is a big-hearted people who have lived much and lived deeply, and have thought much and thought deeply. There are singing hearts in Wisconsin, because from Lake Superior on the north—and there is nothing like that in West Virginia—to Lake Michigan on the east—and there is nothing like that in New York—to the vast Mississippi River on the west—and there is nothing like that in either West Virginia or New York, even though New York has the Hudson River—all in between there are thousands of warm-hearted people who say, "Come and enjoy nature's wonderland."

The PRESIDING OFFICER (Mr. CARLSON in the chair). The time of the Senator has expired.

THE SITUATION IN JAPAN

Mr. KEATING. Mr. President, yesterday in the Chamber we heard from the Senator from Missouri and other Senators and we read in the newspapers and heard on the airwaves about the present situation in Japan. A great effort was made to pin upon this administration and upon the President the responsibility for the riots in Japan and the inability of the President to go to Japan. In my opinion, that is a gross misrepresentation of history. The hard facts of political reality do not ascribe to this administration any shred of responsibility for the chaotic conditions in Japan or for the possible fall of the Kishi government.

If ever a crisis was manufactured, if ever there was a stage set for political disorder, we have it in the truly saddening picture of a nation that has been sabotaged by evil forces operating from without and also from within. Japan is committing hara-kiri and we know, or we should know, who forged the sword and who is wielding it. It was not President Eisenhower. It was not Secretary of State Herter. It was not the United States of America. It is the act of an enemy.

We have seen the technique of that enemy often enough to be able to recognize it by now. Red China and Moscow have set up these demonstrations, and have planned well, and in advance, their strategy, and have financed this spectacular, and have rehearsed it with all the skill and cunning at their command.

When I say "financed," I mean exactly that. Let us not think for a moment that the funds for those supercolossal manifestations of hatred came from the coffers of the Japanese Communist Party. It is not that big; it is not that strong. It represents a minuscule minority of that country.

A report I have received from a very reliable source states that the hard core of the Communist demonstrators were paid $1.65 a day—an unusually high labor wage. In this Chamber we have had debates about the pay rates of garment workers, clothing workers, and tailors in Japan, which are 14 or 15 cents an hour. But the people who engaged in the riots were paid in excess of the rate for a long, hard day's work—simply to run the streets, light the fires of revolt and keep them burning until the Communist objective was achieved. That is how the Kremlin and Peiping operate. That is how they keep boring into freedom, like worms boring into an apple. That is the raw technique of Communists—the use of a well-trained and well-rehearsed mob as a bludgeon to beat down the forces of orderly government, to create anarchy, on which the Communists thrive, and gain power.

Mr. President, anyone who seeks to make this administration a whipping boy for this tragic Japanese situation is closing his eyes to reality and closing his mind to the truth.

INSURANCE VANISHES WHEN MEDICAL CARE NEED IS GREATEST

Mr. PROXMIRE. Mr. President, many of our senior citizens have taken normal precautions for most of their lives against the devastating effects of high medical costs. The difficulty is that these very people find their hospital and surgical insurance canceled at the very time when they need it most.

Letter after letter from senior citizens of my State illustrate this problem. Illness is the handmaiden of old age. When our people most need medical care, they can least afford it; and insurance is either prohibitive or all but unobtainable.

The cost of medical care for the aged is 80 percent higher than the cost of medical care for the rest of the population, according to Secretary Flemming, of the Department of Health, Education, and Welfare.

Eight out of 10 of the aged suffer from one or more chronic ailments, as compared with 4 out of 10 persons of all ages. More than one out of every four aged persons are affected by heart disease; while the aged make up less than 9 percent of the total population, they comprise 40 percent of all cases with heart trouble. The average hospital stay of older persons is two to three times longer than that of persons under 65. Many physical handicaps of the aged could have been prevented if the diseases or injuries had been treated promptly.

Mr. President, I have before me a typical letter in regard to this aspect of the problem of medical care for our senior

citizens. I ask unanimous consent that the letter be printed at this point in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEAR SIR: I am writing to you in regard to H.R. 4700 which would amend the Social Security Act to include hospital, nursing home, and surgical costs for persons covered by this act after retiring.

I am 64 years old and will have to retire next January 1961. I have paid on insurance since 1937 when the company took out group insurance, but 30 days after retiring this is all canceled. I will have to look for other insurance to cover hospital and surgical care because I can't afford to be without insurance after 65. Few retired people can afford the price the insurance company asks for protection. Therefore I am asking you to vote for this bill or any amendments which might be added and are favorable to the retired persons on social security.

——— ———.

CONGRESS SHOULD PASS THE FEDERAL EMPLOYEES PAY BILL

Mr. BYRD of West Virginia. Mr. President, with Congress moving rapidly toward an early adjournment, there are certain legislative items that must be taken care of promptly and completely. No amount of pressure generated by the approaching national conventions and campaigns can be used as an excuse to justify overlooking these measures, or merely according them perfunctory treatment.

Among the issues which, in my opinion, must be decided is the question of the pending pay raise for postal workers and Federal employees under the Classification Act. Fortunately, in House bill 9883, the Senate now has under consideration an excellent measure that deserves the full support of this body.

I think all of us are now familiar with the general terms of this bill, so it will not be necessary to discuss them in any detail. It provides for a minimum 7½-percent increase in the salaries now being paid to postal and classified Federal employees and to certain other small categories of Government workers. All in all, the bill would be of benefit to approximately 1,570,000 civil servants and their families, at an annual cost of about $697 million.

This is a great deal of money, and Congress should be sure of the merit of any legislation that commits the Government to expenditures of this size.

Money is important in the operations of the Federal Government, but the people who work for this Government are infinitely more important.

When the facts of this case are laid on the line, they present a compelling case for Congress to pass this proposed legislation.

If Federal employees are denied a raise which they have earned—and deserve—on the grounds that it is too expensive, an argument raised by some of its opponents, a great injustice will have been committed. This line of reasoning assumes, in effect, that there is nothing morally or economically wrong in expecting these employees to subsidize the functions of the Government. When put this bluntly, I do not think any of us will accept this argument.

An equally fallacious argument now being directed against this proposed legislation is that extensive comparative salary data now being collected by the Bureau of Labor Statistics might be used as the basis for salary legislation by the next Congress.

It is further claimed that the Classification Act contains certain inequities and defects that are not corrected by House bill 9883.

It must be cold comfort to the hard-pressed Federal employees to know that statistical data on salaries are now being compiled and that they might lead to a pay raise next year. These employees deserve this increase; and because they have already earned it, they deserve it now. It will be simple enough at a later date to make any adjustments that might be desirable on the basis of the Bureau of Labor Statistics report.

As for the alleged defects and inequities in the Classification Act, nobody contends that it is a perfect piece of legislation. But it is the law that we have in hand to work with, and it has proved satisfactory and workable for 11 years.

The voices of dissent that have used these arguments miss the point. If a pay raise is justified now, it should be granted now, even though it means a slight increase in the budget. If the Bureau of Labor Statistics study suggests the need for new legislation, we can enact such legislation after these data have been presented to Congress. And why should urgently needed salary action be delayed now because the Classification Act may have some flaws in it? We have had more than a decade to amend this law as we saw fit. Surely that can be done at a later date.

The point—and the only point that carries any real weight—is that the postal, classified, and other groups of Government employees covered by House bill 9883 have earned a salary increase. They deserve it now, and they need it now.

Regardless of what future studies may show, there is available at this moment more than enough adequate, objective information to justify the immediate passage of this bill. Let me mention briefly some of these facts and some fundamental issues involved in the Government's overall personnel program and problems that are related to the enactment of this bill.

There can be no doubt about the fact that many civil servants are having a very difficult time in supplying their families with only the bare necessities of life. They are up against the very solid and irrefutable fact that living costs are now at an all-time high. They are up against the fact that Federal salaries have always lagged behind those of private industry. They are up against the fact that, although their productivity in recent years has kept pace with that of employees in private enterprise, their wage increases in many categories comparable in terms of function and responsibility have not.

This inequitable treatment goes beyond being just a hardship on those now working for the Government. It also intensifies the persistent problems involved in the recruitment and retention of the ablest people in the Federal service.

The Government must compete with the private sector of our economy for the most promising and competent people. When we consider the complexities of modern government and the perilous times we live in, the absolute necessity for having top-caliber personnel in the Government is so patently obvious that the point need not be labored.

Employees of the Post Office Department perform what may very well be the most important day-in and day-out service offered by this Government. They do their job well.

I am sure that all of us in Congress share my feeling, based on a great deal of contact, of heavy reliance and dependence upon the civil service in general. The work of these people is characterized by a deep sense of responsibility, conscientiousness, and a high level of professional skill.

As an employer, the Federal Government would not only be harsh and unjust, but also would be very shortsighted in a practical sense, if it failed to recognize these qualities and to reward them accordingly.

This recognition and the appropriate action are, in the initial and most important phase, the responsibility of Congress. The law prohibits Federal employees from presenting their case or fighting for their objectives with the techniques used by employees in private business. Civil servants cannot strike; nor can they bargain collectively in the usual meaning of this term.

This Congress has an inescapable obligation to the entire Federal service. We must face up to that obligation now.

I wish to remind the Members of this distinguished body that there is a special urgency in connection with our disposition of this bill. For reasons which, as I indicated earlier, seem to me to be wholly unsupportable, the administration is apparently opposed to any pay increase at all. It seems most likely that any pay bill sent to the White House will be vetoed by the President.

In these circumstances, Congress must clear this bill rapidly, so that there will still be an opportunity to override the expected veto before the unusually early adjournment which everyone anticipates. If we delay action until such time as a pocket veto is possible, Congress will be powerless to attempt to override.

The reasons for the passage of this bill are persuasive. The obligation of Congress in this matter is clear and unmistakable. The circumstances under which this measure is being considered make speedy action on our part absolutely essential.

Let us, therefore, pass House bill 9883, and pass it now. To do this would be no more than doing our duty. To do less would be a dereliction of our duty and a breach of faith with every employee of the Government of the United States.

LEGISLATIVE APPROPRIATION BILL—PUBLICATION OF ITEMIZED BREAKDOWN OF ALL EXPENDITURES

Mr. WILLIAMS of Delaware. Mr. President, the Appropriations Committee has reported to the Senate H.R. 12232, the legislative appropriation bill. When this bill is brought up for consideration I shall offer an amendment, on behalf of myself and the Senator from Maine [Mrs. SMITH], the purpose of which will be to make mandatory the publication of an itemized breakdown of all expenditures, either in the form of appropriated dollars or in the form of foreign currencies, that are made by Members of Congress, congressional committees, or staff employees, while on official trips.

This amendment includes the publication of all expenditures made by individual Members, House and Senate committees, joint committees, committees on Interparliamentary Union, all other committees, and their staffs.

The amendment requires that each individual Member or employee of Congress shall furnish to the chairman of his committee an itemized report showing how much was spent and the purpose for which the expenditures were made.

The chairman of the committee will then have incorporated in the CONGRESSIONAL RECORD the consolidated reports of the committee, but included in this consolidated report will be an itemized breakdown showing the actual expenditures made by each individual Member or employee, along with the purpose for which such expenditures were made.

If a point of order is made on this amendment, which we admit constitutes legislation on an appropriation bill, a motion will be made to suspend the rules. In order to comply with the rules of the Senate, the proper notification of this request for suspension has already been filed with the Senate, and appears on page 12899 of the CONGRESSIONAL RECORD of June 16, 1960, along with a copy of the proposed amendment.

With the advance filing of this official notice, our amendment will be in order on this appropriation bill.

For the past several years we have been trying to get a bill passed which will require Members of Congress or congressional committees to render a public accounting of all expenditures of public funds that are made while on official trips, but while the Senate has on at least two occasions approved the amendment, we have been unsuccessful in getting it accepted by the House.

We recognize that, with the widespread commitments of our Government throughout the world, it is oftimes necessary for Members of Congress to make official trips in order that their committees may more intelligently legislate, and we do not question that these trips made on official business should be paid for by the U.S. Government. However, we must not overlook the fact that it is the American taxpayers who are paying for these official trips, and they are entitled to a public accounting as to how their money is being spent.

H.R. 12232 is the appropriation bill which provides money to pay the salaries and other expenditures of the Members of Congress and the employees of the legislative branch, and there can be no more appropriate bill to which our amendment could be attached. We shall request a rollcall vote upon the Senate's adopting this proposal, and we hope that this time the House will accept the amendment.

However, should the House refuse to accept the amendment, and should it result in a deadlocked conference, it will only mean that we as Members of Congress and our employees will do without our pay until such time as we agree to render a public accounting of all our expenditures.

Mr. JOHNSON of Texas. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I yield.

Mr. JOHNSON of Texas. I have not seen the amendment, or perhaps it would be more accurate to say I have not had a chance to study it in detail, but I have observed it in the RECORD and I had a conversation with the Senator about it. As I understand the amendment, it provides that any Member traveling at Government expense shall report that expense, what the amount is for, and the details for which the money has been spent, with the chairman of his committee, and the chairman of the committee shall then make the report available to the public. Is that correct?

Mr. WILLIAMS of Delaware. That is correct.

Mr. JOHNSON of Texas. I see no objection to that amendment. Is anyone objecting to it?

Mr. WILLIAMS of Delaware. No. The Senate, on at least two occasions, adopted it unanimously. At one time there was a rollcall vote which was 68 to 0. Of those absent, 26 indicated on the record they were for it, and not one was against it. Unfortunately, it was eliminated in conference. I am hoping this time the House will be more receptive to the proposal. I think the very least we can do is tell the American people and the taxpayers we are going to give them a public accounting of expenditures that are made on official trips.

Mr. JOHNSON of Texas. Much of the criticism of the Members of the legislative branch of Government, and of the executive branch, is due to the sins of a few being passed on to the many. A public accounting of public money would not hurt anyone. I see no reason why anyone should oppose the amendment, which provides for a report showing the spending of how much money, for what purpose, in connection with an official mission, and the chairman of the committee making that information available to the general public.

Is that what the amendment does?

Mr. WILLIAMS of Delaware. That is it. I certainly appreciate the support of the Senator from Texas. I have talked with him previously. He feels, just as strongly as I do, that the American taxpayers are entitled to an accounting of the expenditure of their money. That is what we are providing for in the amendment.

I am confident the cases of abuse are in the minority and that there are very few of them. However, regardless of how isolated they may be, expenditures in connection with our official travel will continue to give Members of Congress a black eye until we open to public examination an accounting of our expenditures.

Mr. JOHNSON of Texas. I agree with the Senator.

Mr. WILLIAMS of Delaware. If we do that, and the American taxpayers will review these records, they will find that a large part of the expenditures are proper.

Mr. JOHNSON of Texas. I agree with the Senator.

Mr. WILLIAMS of Delaware. I appreciate the support of the majority leader.

Mr. JOHNSON of Texas. I shall not make the request now, and may not make it at all, but I ask the minority leader and the Senator from Delaware to consider the possibility of bringing up the legislative appropriation bill, if there is no objection, so we can get it to conference. I ask them to take up the question with Senators who may be interested in it. I will discuss it with them later. I want them to give consideration to taking up that bill before the weekend.

Mr. WILLIAMS of Delaware. Having filed this motion last night, we are protected under the rules of the Senate.

Mr. JOHNSON of Texas. I shall talk to the Senator before I make the request.

Mr. WILLIAMS of Delaware. Very well.

SOUND MEDICAL PROGRAM

Mr. SYMINGTON. Mr. President, in the preparation and drafting of Senate bill 3503, the senior Senator from Michigan has done a service for the Congress and the American people as a whole.

It is my privilege to be a cosponsor of this reasonable and practical approach to meeting the medical needs of our elder citizens.

The Honorable James T. Blair, Jr., Governor of the great State of Missouri, has made a thoughtful analysis of the problem and of the constructive way in which S. 3503 would help meet it.

I was glad to receive a copy of Governor Blair's letter to Senator MCNAMARA, as well as a copy of his analysis of this bill, and ask unanimous consent that they be inserted at this point in the RECORD.

There being no objection, the letter and analysis were ordered to be printed in the RECORD, as follows:

EXECUTIVE OFFICE,
STATE OF MISSOURI,
Jefferson City, Mo., May 25, 1960.

Hon. PAT MCNAMARA,
U.S. Senate,
Washington, D.C.

DEAR SENATOR MCNAMARA: I appreciate very much the opportunity to send you my comments on S. 3503, which I consider to be an excellent bill, and one which I am sure would prove to be a tremendous boon to all aged persons in this country. The passage

of this bill would lift a constantly nagging worry from the minds of our retired aged, with respect to their medical and hospital care, and give them peace of mind in their declining years. I am extremely pleased to note that both of our great Senators from Missouri, THOMAS C. HENNINGS, Jr., and STUART SYMINGTON, have joined you in sponsoring this bill.

I enclose my comments in relation to your questionnaire, which I hope will be of use to you in your efforts to obtain passage of S. 3503.

Very truly yours,

J. T. BLAIR, Jr.,
Governor.

COMMENTS IN ANSWER TO QUESTIONNAIRE ON MCNAMARA BILL, S. 3503

1. FINANCE

(a) The McNamara plan of financing through the social security system, plus supplementation from general revenues, is far preferable to administration plan of financing entirely from general revenues. The social security plan spreads the cost over all employed persons and their employers throughout their earning period, this being the time during which they are best able to contribute to such a fund. It uses the insurance principle of each person helping to pay for his own paid-up health care plan, available at retirement; this makes it something they have worked for, not a handout of someone's charity. The social security plan would make benefits available on a like basis to all retired persons throughout the Nation; not just in the wealthier States who would have the resources to be able to participate. Under the administration plan there would be some States with a full-scale program, but there might be others with no program, and a number where the benefits might be on every conceivable gradation of adequacy.

(b) Missouri could not possibly participate in the administration program without increasing State taxes.

(c) The legislature would, of course, have to determine the priorities among the various needed State services. It is very possible that the use of increased State tax revenues for a medical care plan such as is envisioned by the Eisenhower administration might make it impossible to expand or add other needed services, and could, dependent on action by the legislature, result in curtailment of present services.

2. ELIGIBILITY

The administration's proposal, which is nothing more than a major medical or catastrophic insurance plan, completely misses the crucial point at which the majority of aged in Missouri need help. It is the first $250 or $400 which causes our major concerns. To be fully protected, the aged person would have to carry Blue Cross or some commercial hospital insurance in addition to the administration's insurance proposal. Our experience shows that the majority of retired aged persons in this State (at least 60 percent having annual incomes of $1,000 or less) are not able to carry Blue Cross or similar insurance. In many cases they would not be able to pay the first $250 or $400, and the result would be the same as it is in many cases now—the aged person would do without needed care, or would wait until the condition became acute and quite possibly too late for cure.

The McNamara proposal, providing initial benefits without deductible features, would be infinitely more effective in meeting actual health care needs of the aged.

3. ADMINISTRATIVE ORGANIZATION

An evaluation of the medical care plans for public assistance recipients, as now operated by each of the 50 States, will show a variation in scope and adequacy from zero to full and complete coverage. The same variations would undoubtedly exist under the administration's insurance proposal.

On the other hand a plan operated as your bill proposes will provide medical care for all aged persons; the care would be reasonably comparable whether the aged person lived in a rich State or in a poor State. In addition, there would not be the drastic change in plans or benefits when the aged person wished to move from one State to another.

4. THE MEANS TEST

(a) The means test is not a pleasant experience, and to many aged persons the idea is repugnant. From an administrative standpoint it is a very difficult task to try to make a fair and objective decision. If an income tax return would be used automatically without verification the task would not be particularly difficult; the problem then would be in the inequity which might be possible due to the great premium placed on having a low reporting of income. If an actual verification of income would be required, this would present a tremendous administrative problem in connection with the thousands of aged in Missouri who are not receiving public assistance.

(b) If actual verification of income is necessary, it would mean that a huge number of additional employees would have to be hired for this purpose.

5. THE PROBLEM OF COMPULSION

The administration proposal is voluntary only for these aged persons who are still employed, or for those who are in the upper income brackets. Much as those in the lower income brackets may want to have insurance coverage, they really have no choice when the available income does not decently provide for food, shelter, utilities, clothing, medicine, and the other absolute necessities of daily living. In Missouri the average OASI recipient receives about $72 per month; the average OAA recipient receives about $59 per month. The average person in these circumstances has no choice to make. If the voluntary plan is followed, those who are able to pay the cost of the premiums (and therefore the least needy) will be covered; those least able to pay the premiums (and therefore the most in need of such coverage) will not have coverage, and a full program of additional supplementation would continue to be necessary to cover this group.

6. COST TO THE STATES

(a) We believe the cost to the State for the first $250 would be very high, but have no basis at present for making an estimate. As one indication, however, out of Missouri's 470,000 persons over age 65, about 116,000 are receiving old-age assistance. Using Mr. Flemming's figure of $177 as the average annual expenditure of persons in this age group for health and medical expenses, it would cost the State $20,532,000 for that group of aged presently receiving public assistance. During the past year the division of welfare has had only $1 million in both Federal and State funds available for hospital care for all assistance programs.

(b) We have no way of estimating how many persons not now on old-age assistance would apply and be found eligible, due to a desire to qualify for medical care benefits.

7. OTHER COMMENTS

The administration plan requires the aged person to pay an extremely high proportion of his medical care costs after he has retired. This means that often he is unable to make payments, or payment is required at a time when he is least able to do so. The McNamara proposal, on the other hand, requires contribution from the person during his working days, when he is most able to make such payments.

Mr. SYMINGTON. Also, Mr. President, I commend to the attention of the Senate the Walter Lippmann column entitled "Medical Care for the Aged." With his customary objectivity, Mr. Lippmann points out the soundness of the McNamara approach as compared with that of the President.

I ask unanimous consent that this analysis by Mr. Lippmann, as it appeared in the Washington Post of June 16, be inserted at this point in the RECORD.

There being no objection, the analysis was ordered to be printed in the RECORD, as follows:

MEDICAL CARE FOR THE AGED

(By Walter Lippmann)

Almost everyone realizes that a great mass of the old people do not have the savings, and cannot depend upon their children to pay for the doctors, hospitals, nursing homes, and drugs which because they are aging, they need more than do younger people.

There are a few eccentrics, professing to be conservatives, who think that in a truly rugged individualism these ailing old people would do without medical care if they can't pay for it, or would make their children mortgage the future to pay the medical bills.

But the country is not that ruggedly obtuse to the facts of life, and accordingly both the administration and the Democratic opposition are agreed that the need, which is obvious and urgent, must be met by Government measures.

Thus, this administration has prepared a program which the director of the budget, Mr. Stans, says will cost $1.5 billion by 1964 and $2.5 billion by 1970. For the Democrats, Senator MCNAMARA and some 19 Senators, including KENNEDY, SYMINGTON, and HUMPHREY, have introduced a bill that would add medical insurance to the existing old age insurance. After the first year, the cost of this program would be $1.5 billion. Thus the two programs are approximately of the same size.

But between the two programs there is a basic issue of principle. On one side are the President and his advisers. On the other side are the preponderant mass of the Democrats and also a considerable minority of the Republicans led by Governor Rockefeller. They differ essentially on how the program shall be financed.

Shall it be financied by compulsory insurance, which means that throughout a person's working life he and his employer will be taxed to provide an insurance fund for his medical needs when he is retired and is no longer earning an income? This is the principle of the McNamara bill in the Senate, as it was of the Forand bill in the House, and it has the support of the leading Democrats and of Governor Rockefeller.

Or shall the program be financed, as the administration proposes, by charitable doles to the very poor, paid for out of compulsory taxes collected by the National and State Governments?

For reasons which he has never explained, the President regards compulsory social security taxes as unsound, socialistic, and rather un-American; on the other hand he regards compulsory taxes to pay for doles based on a means test as somehow more "voluntary," sounder, more worthy of a free society and more American.

Under the McNamara bill, medical insurance would be added to the existing old-age insurance system. During his working life, each person covered by the social security system would contribute an additional amount, as would also his employer, to supplement his retirement income to include medical services.

It is true that during the first few years benefits would be received by persons who had not contributed because the system did not exist when they were earning their living. These benefits would be paid for by the younger people. But as the younger people would be buying their own insurance, there is little inequity in this. Nobody will lose anything, although those who are already too old to have been contributors to an insurance plan will benefit. In a few years everyone receiving the benefits will have paid his share.

Why does the President feel so strongly opposed to the principle of compulsory insurance for medical care to supplement the insurance, which already exists, for old age? What is wrong about its being compulsory that a man should insure himself against the needs of his old age? What is so wonderful about a voluntary system under which a man who doesn't save for his old age has to have his doctors and his hospital bills paid for by his children or public welfare funds? There is nothing un-American in the principle that the imprudent shall be compelled to save so that they do not become a burden to their families and the local charities, so that they can meet the needs of their old age with the self-respect which comes from being entitled to the benefits because they have paid the cost out of their own earnings.

The President has been led to think, he says, that compulsory insurance is "a very definite step in socialized medicine." Why? In a system of compulsory insurance the Department of Health, Education, and Welfare, which would administer the program, could and should use as its agents private organizations like the National Blue Cross Association in negotiating with hospitals and nursing homes and in dealing with claims and complaints. The system would be financed as insurance. But it would be worked not by a new Government agency but by the kind of private voluntary association which the President otherwise believes in.

In this connection it is interesting to remember that in the early 1930's when voluntary health insurance plans were inaugurated, our old friend, the American Medical Association, was declaring that they were communism and socialism and socialized medicine. Today, the American Medical Association is pointing to these same voluntary insurance plans as the solution of our present needs and the proper alternative to compulsory old age medical care insurance.

Among the opponents of medical insurance there seems to be a vague and uncomfortable feeling that it is a newfangled theory, alien to the American way of life and imported, presumably, from Soviet Russia.

The Founding Fathers were not subject to such theoretical hobgoblins. In 1798 Congress set up the first medical insurance scheme under the U.S. Marine Hospital Service. The scheme was financed by deducting from seamen's wages contributions to pay for their hospital expenses.

If that was socialized medicine, the generation of the Founding Fathers was blandly unaware of it.

CITATION OF HUMBLE REFINING CO. FOR EXCELLENCE OF STANDARDS IN OPERATION

Mr. CASE of New Jersey. Mr. President, it is particularly gratifying when a leading American industrial organization furnishes proof of the excellence of its standards in operation. Such a distinction has just been achieved by the Esso Standard Division of Humble Oil & Refining Co., as evidenced by an award of the Special Citation of the Public Health Service. Particularly noteworthy is this recognition because Esso received the award for the fourth time, and the third consecutive year.

The Special Citation represents one of the Government's top awards for excellence in sanitation, and was presented to John D. Rogers, General Manager of the Esso Standard Division, by Wesley E. Gilbertson, Chief, Division of Engineering Services of the Public Health Service, at a ceremony in the New York Yacht Club, New York City, on Tuesday, June 7, 1960.

Mr. Rogers, who, in addition to other important connections, is a member of the Board of Directors of the American Merchant Marine Institute, has long since demonstrated his interest in elevating standards connected with the maritime industry. His fellow members of the Esso Standard Division have combined their efforts successfully in achieving the most desired results. How well they have acquitted themselves is demonstrated by the fact that each of the 39 tankers of the Esso Standard Division achieved a rating of 95 or higher on an official PHS inspection involving 166 separate items of sanitary construction and maintenance.

The previous citations to the Esso Standard Division were awarded in September 1955, June 1958, and March 1959.

Tankers of Esso call at all Atlantic and gulf coast ports and at river ports along the Mississippi and Ohio Rivers.

THE PHILOSOPHY OF COMMUNISM

Mr. MURRAY. Mr. President, I have been reading with great interest a lecture on "The Philosophy of Communism" delivered at Gonzaga University in Spokane, Wash., by the Reverend Francis J. Conklin, S.J.

Father Conklin's lecture is so illuminating that I believe it should be brought to the attention of all Members of the Congress. Therefore, I ask unanimous consent that it be printed in the RECORD.

There being no objection, the lecture was ordered to be printed in the RECORD, as follows:

The works of Karl Marx and Friedrich Engels have been read and reread, quoted and misquoted, understood and misunderstood for over a century. In this series of lectures we hope to provide the student with a background so that the works of Marx and Engels may be read with understanding. There is no substitute for direct contact with these original works. But this reading may be facilitated by a knowledge of the context in which the writing was done. Our purpose is to supply footnotes, so that the student will not have to stop every few minutes and seek a point of reference.

During the course of these lectures our main emphasis will be upon Karl Marx because Marx is more difficult to understand and once Marx is understood, Engels is quite easy to grasp. By reading their works you will ascertain what Marx and Engels said. So far as is humanly possible we want you to know why they said what they did say. To understand why we must try to create for ourselves the context of the times in which they spoke. We must endeavor to understand the political, economic and social conditions that existed during the 19th century, because without a clear insight into the times we will be considering the statements of Marx in a vacuum and completely misinterpret them.

We want to know why Marx and Engels chose to solve the particular problems that occurred to them, and why they gave the specific solution to these problems that has become associated with their names.

Marx lived from 1818 to 1883, Engels from 1820 to 1895. The major political events which shaped their early lives were the French Revolution, the era of Napoleon, and the age of Metternich.

Bureaucratic redtape, corruption, injustice in the law and the courts, heavy and badly distributed taxes—all these things helped to bring on the French Revolution. For example, salt, pepper, and even alcohol were taxed—and the alcohol tax in France is equivalent to a tax on water in this country. At the basis of the Revolution, too, lay a fundamental class conflict and concomitant—absence of distributive justice. Classes in France were stratified into a higher clergy and noble group which enjoyed all the benefits although it included only about 1 percent of the population. The rising class of the bourgeoisie, eager to participate in the benefits enjoyed by those born to rank and title, constituted the bulk of the middle class. Most of the burdens of society were borne by the peasants and lower clergy. It was truly the best of times and the worst of times.

We must rely upon your general knowledge of history for more background and details regarding the French Revolution. However, we must emphasize some of the effects of that Revolution which influenced all life in Europe and colored the thinking of the entire 19th century.

After the first half of the Revolution a fear of violence swept through all civilized countries. This was a natural reaction to the rivulets of blood sinking into French soil. Seemingly as a direct consequence, the ideals of the Revolution; leberte, egalite, fraternite crystallized in a new and different form. "Liberty" reared its ugly head in the form of excessive nationalism. "Equality" came to the fore in the form of class antagonism. "Fraternity" joined the two into a patriotism coupled with class solidarity. These concomitant ideals of nationalism and class antagonism had a profound effect upon Karl Marx—since they exerted such a direct influence upon the life of every person living in the 19th century.

The age of Metternich was characterized by political absolutism and absolute conservatism. You will recall that the Congress of Vienna reestablished the status quo in 1815. At that time Germany was split into Prussia, predominantly Lutheran; Austria, predominantly Catholic; and an intervening group of 39 small states. In the year 1834 39 of these states formed an economic union called the Zollverein. The very fact that this group of states first formed an economic union before political union was established was empirical evidence for Marx's theory known as historical materialism.

It is interesting to note when speaking of Prussia and the Rhineland that under Napoleon the Rhineland had been much better off than it was under Prussian domination. Marx was born at Treves in the Rhineland. In this same area the University of Jena was located and here the more radical thinkers found a home. This was in contrast to the University of Berlin where ultraconservatism and ultraorthodoxy held sway.

The political picture is incomplete without a consideration of early 19th century economic conditions. The economic factor is the industrial revolution. We must go to England to really see this revolution in action.

England had the banks and capital: England had the maritime fleet. England had

the coal and iron. Consequently, the commercial expansion in England was absolutely fantastic when their resources were coupled with the mechanical use of power, brought about by the new inventions.

The new industrial civilization received a tremendous impulse from the formation of the first limited liability corporations in 1830. Prior to that date a person who owned even an infinitesimal portion of a large business could lose all he possessed if the business fell into the hands of creditors. This older rule of the common law tended to freeze assets in extremely safe enterprises and stifle economic growth. However, Marx will point out that laws change according to the economic needs of a given culture. This limited liability law—the parent of true capitalism—is a clear case in point. Henceforth, the stockholder's liability is limited by the amount of his investment. The stockholder need not fear his diversified chattels, real and personal, will be attached in bankruptcy proceedings against a company he partially owns.

The industrial revolution mechanized agriculture, industrialized civilization, and created new and unheard of wealth. But all was not sweetness and light. The same revolution produced some seemingly insoluble problems. One economic problem of prime importance is the cyclical nature of the new business world. Incidentally, one set of statistics proves beyond doubt that capitalism flourishes best in time of war; another set of statistics proves with equal certitude that capitalism achieves its peak in times of peace. Whether in war or peace the capitalist system goes along in cycles: Boom and bust in the more robust terminology of the thirties; boom and recession in the emaciated terminology of the present day.

The solution for this cyclical pathological condition of the free enterprise system has been sought in economic nationalism; colonial imperialism and international imperialism. Each remedy has at one time or another been pushed to its logical conclusion—and has terminated by creating more problems than it solved.

Economic nationalism is a psychopathic patriotism pushed into the field of economics. It is characterized by such inane statements as "my country right or wrong—but right or wrong my country." Economic nationalism did far more to start World War I than the murder of a dozen dukes or archdukes. And at Versailles the big powers skillfully disected central Europe into a group of economically impossible territories. Excess patriotism completed economic chaos which the statesmen had set in motion by their unrealistic divisions of natural resources. Thus the same nationalistic fears and prejudices which retarded the natural economic growth of France and of all Europe, served to make France a great power on the Continent by confining the economic development of other portions of Europe within impossible limitations—until Hitler toppled the house of cards.

Colonial imperialism simply means the seeking out of backward or defenseless areas as a dumping ground for the products of home industry and a cheap source of raw materials. The outstanding examples of this practice are British imperialism during the 19th century and Russian imperialism since the end of World War II.

For the selfish few who are fortunate enough to be in the right place at the right time, capitalism provides the opportunity to practice international imperialism. This simply means that my country is where my profit is. In a war I will not hesitate to sell goods to both friend and foe because, like a true capitalist, I am solely interested in the profit motive. During World War II the Bofors gun, manufactured in Sweden, was sold to the United States to arm the American merchant fleet, but the high profits of this transaction went to certain prosperous Germans. Another good example is the fact that during the Korean War certain MIG aircraft piloted by the Chinese Communists were powered by recently purchased Rolls-Royce engines, although British soldiers—at least, a few—were being killed by these same Chinese Communists.

We must pass along now to the social effects of the industrial revolution. One extremely important social effect was the existence of a true class conflict between the capitalists or owners, and the workers or proletarians. In the United States we do not have, and have never had, this division into classes which exists in Europe. There is no proletariat in America such as exists, for example, in the famous red belt surrounding Paris to this day. And that is why it is very difficult for Americans to understand what is meant by a class and by class solidarity. Perhaps it will be clearer if we try to realize that even in America there is a type of class consciousness that is a part of the human need to belong. Every normal human being needs identification with a group. This is a psychological expression of the phrase "man's social nature." When the Irish first came to this country religion was a matter of class consciousness or class solidarity. Through their religious affiliation the individuals belonged and were identified with a larger group. Many of the Irish abandoned their religion when it seemed to them that they had to do so in order to find identification with the more prosperous peer group of predominantly Protestant Americans. In 19th-century Europe, this very human need "to belong" took the peculiar economic identification of two real classes; society was divided and Marx had sound empircal evidence for his theory of class struggle and warfare.

Another important social effect was the population concentration in the cities. In 1848 over 1 million Irish people came to England and crowded into the cities to create a true population surplus. There were more people than could possibly find work. As a result, wages were held at an absolute minimum.

If you read the recent articles in Life about people moving west you will see that some of the people, in fact, a good number, were tied down to jobs they hated on the east coast but could not move west because they simply could not afford it. And the same is true today. For a similar reason, many could not come to this country because they were locked into a system and had become wage slaves.

To understand what is meant by a wage slave, diagramatically juxta-pose the owner; the worker and the factory. The worker goes to the factory and there obtains a wage, from the owner. This wage must be spent primarily for food, clothing and shelter. In many places, the food had to be purchased in the company store, the clothing was purchased at the company store, the only shelter available was in company owned houses. As a result, the wage of the worker went directly back to the owner. The worker was locked inside the system. There is no escape because everything the worker does binds him closer and closer to the owner and the hated factory.

Concomitant with the population surplus and wage slavery arose the slums. Financially slums are a very good investment because all money acquired as rent is pure profit. There is no overhead. Physically, morally, and socially the slums were a spawning ground for disease. Organized crime grew apace with sporadic outbreaks of teenage violence—it was only in the 20th century that the perpetrators of teen-age crimes became delinquents instead of felons. Elementary sanitation, pasturization, refrigeration—all were unknown and unknowable in such an atmosphere. For one example, the infant mortality rate in England was 57 percent of children under 5 in 1 year. All of these elements compounded to make the lot of the average worker absolutely desperate and intolerable.

Child labor was another statistic. In 1848 in England 400,000 factory workers were employed. There were 250,000 women and 112,000 children (under 18).

Both Marx and Engels keenly appreciated the dignity of man and they knew intuitively that man was not created to suffer in such degraded conditions. To view the 19th century through their eyes you must read Engels' book "The Condition of the Working Class in England in 1844." Once you appreciate these conditions you will understand why Marx and Engels thought the way they did—although you may not subscribe to their views.

We will next turn our attention to certain English common law rules and traditions. Up until the 19th century the local parish or county had the obligation of providing food for the poor. However, this system was under constant attack. Back in 1704 Defoe published a booklet in which he maintained that giving alms to the poor was no charity and employing the poor was a grievance to the nation. Defoe's solution was to let the poor starve.

More important was preacher Mandeville's "Fable of the Bees": The poor have nothing to stir them but their own wants, which it is prudent to relieve but folly to cure. What he is saying is this: the poor need the motivation of starvation in order to keep them working and pressing forward producing food for society. It is prudent to relieve their starvation because this lessens the danger of violent outbreak in revolutionary form. But it is folly to cure these wants, because for society to be happy it is necessary that great numbers be wretched as well as poor.

In 1785 Townsend published his famous "Dissertation on the Poor Laws": hunger is the natural motive for work, consequently, men must be kept hungry or they will not work.

In 1834, shortly prior to the time of Marx, the famous Poor Law abolished all grants in aid of wages and created the workhouse for those who were in debt. The prevalence of these individualistic and antihumanitarian social views will partially explain the revolutionary fervor of Marx and Engels. And, incidentally, it is only by understanding these trends of thought that we will gain an appreciation of our own precious constitutional and statutory provisions.

Moving along now—it would be impossible to understand Marx and Engels without summarizing the views of certain social thinkers who preceded them. For convenience, we begin with Descartes. You will recall that Descartes divided mind and matter into two watertight compartments. The dichotomy was complete. There could be no intercourse between the two radically different substances—or substantial principles.

Those who choose to emphasize mind in the Cartesian system stress the power of the human intellect. In this regard we speak of the angelism of Descartes because Descartes tried to make man think like an angel. This human pride greatly contributed to the age of enlightenment in which human reason was made the measure of absolutely everything.

No individual trend in the history of philosophy survives for very long. The reaction to Cartesian angelism was a materialism; the reaction to the enlightenment was Jean Jacques Rousseau. Rousseau personified a romantic, sentimental chaos. For him the natural state of man was a pre-Adamite

paradise, an ideal state in which dwelt man, the noble savage. The unrestrained freedom of this paradise has been limited by social contracts which men enter to form society. As anyone can see, the stability of the present social situation demands the creation of laws. These laws should arise from the will of the majority. (We often fail to realize that the will of the majority can be as tyrannical as the will of any individual despot.)

Thus, the pendulum of social thought swung between rationalism and romanticism for a century before the immediate predecessors of Marx and Engels.

We come next to St. Simon who taught that the ruling class was expendable and that a new society must come into existence founded not on class distinction but upon brotherhood. St. Simon's argument ran thus: if you kill off the best people in France, i.e., the ruling class, it will not make too much difference because in a few months another ruling class will have come into existence. But if you kill off the intellectual class—the three or four hundred of the most intelligent people in France—it will take a half century or more to replace them. In a word: the ruling class is expendable.

Next comes Fourier. In his desire to make labor attractive Fourier is strongly seconded by Robert Owen. Robert Owen, the capitalist with a social conscience, looked upon environment as the source of all social problems. Against the bitter opposition of other manufacturers in England, Owen worked for good food, cleanliness, a shorter day. He tried to outlaw child labor and to decentralize the economy so as to solve the problem of the overburdened cities. For his attempts at reform and his audacious method of turning a better profit while bettering working conditions, Owen earned the bitter enmity of the better people and it was only at great personal expense that he was able to create small areas where some of his ideas could be put into practice.

The more radical social thinkers are headed by Cabet, the first to speak of a revolution which will terminate in a type of communism. This communism simply means that each will work according to his abilities and receive according to his needs. Yet, in Cabet's communal Utopia the political state will own and control industrial property.

Cabet is followed by Blanc. For Blanc, the only adequate social solution must entail the destruction of competition because competition has produced all the social evils which afflict mankind. The rule of fraternity must establish itself in workshops where men will work together in peace and harmony.

Finally, there is Blanqui, an anarchist in his own highly individualistic way. Blanqui is the first to insist that the fundamental social struggle is not a political struggle but a clash of the poor and the rich. In bold terms Blanqui advocated conspiracy, force, and violence as the indispensable means for solving the current economic and social problems. Perhaps Blanqui influenced Lenin more than Marx and Engels.

We come now to the last major topic we wish to discuss in this lecture: the idea of inevitable progress which permeated the 19th century. Optimism and materialism were intuited, self-evident principles for the prominent spokesmen of that era. Somehow, the inevitable force of evolution would solve everything. Where did this idea originate?

If we reach way back in history we will find evidence of such a concept in the millenialism of Joachim of Flora. But Giovanni Vico seems to have been the first to suggest that progress is an inevitable law of history. But the impact of this idea cannot be explained by the power of suggestion of prominent thinkers.

Around the year 1750 De Buffon not only said but proved that the earth's surface had changed. From a thorough study of fossils he showed that the earth as we see it now is completely different from the earth which existed a few years ago. Up until this date, it has been intuitively assumed that the earth as seen was the same as when it came from the hand of God at the moment of creation. The existence of fossils and their import refutes that premise and gives man a new view of the world in which he lives. We take this new view for granted—as a "given." But we must remember that the contrary view was just as self-evident a "given" 250 years ago.

Hutton proved that powers natural to the globe are the forces which caused the changes. There has been no continuous process of annihilation and creation on God's part. The natural forces which exist upon the earth have shaped this planet the way we find it.

Cuvier startled the world by proving that living organisms have developed since the days of the fossils. This indicates that the sacred process of life itself is subject to gradual development. The present living things which inhabit the world have not come directly from the hand of God but have slowly developed over the centuries.

To explain why this development of living organisms occurred, Lamark proposed a double hypothesis: new organisms arise as they are needed; these acquired characteristics are inherited. Thus, the giraffe gets its long neck by stretching up to the tender leaves at the top of trees when the leaves are gone at the base. The giraffe that first stretched its neck passed on this acquired characteristic to its progeny.

Then came the nebular hypothesis of Leplace. Partially in agreement with Kant, Leplace proposed that the present solar system evolved, not immediately from the hand of God, but from a primordial nebula—a cloud of gas. Unfortunately, Leplace is probably equally famous for his remark: "God, I have no need of that hypothesis." In his own way Leplace was a pious, religious man. Yet, he directed a crack at Newton's proof of God from local motion because Newton's "proof" didn't prove a thing—to the dismay of all respectable deists. Such was the import of Leplace's remark: "God, I have no need of that hypothesis." Be that as it may, Leplace's nebular hypothesis constituted a landmark in the history of scientific atheism because it extended a materialistic explanation of the world to the very boundaries of the universe.

In 1828 came Wohler, who synthesized organic urea. You will recall from your chemistry that organic and inorganic chemistry were originally separated on the premise that organic products could come only from living beings. By synthesizing organic urea Wohler had seemingly created life itself. Thus, the last metaphysical impossibility had been overcome—the living had been artificially created from the nonliving.

By way of parenthesis: there are still certain schools of philosophy—both Catholic and non-Catholic—for whom the artificial creation of a living cell would create insurmountable obstacles. For them the production of a life from a synthesis of inorganic materials would be metaphysically impossible for strictly a priori reasons. Other reputable philosophers do not share this self-evident intuition and regard the production of living from nonliving as extremely difficult, but probable—not "metaphysically impossible" in the pristine vigor of that phrase.

Returning to our story: next came Von Baer, who discovered that human beings evolve from an egg, and that human development parallels animal development from tiny egg to full adult. Schwann and Schleiden discovered individual cells and showed that these cells have their own individual life.

What we must keep in mind is that this whole scientific development gave impetus to the basic idea and seemed to provide empirical proof that material progress is inevitable. This is extremely important if we are to understand the 19th century. If we grasp this truth we will understand why Darwin was able to capture the imagination of the century, not by his significant contributions in biology, but by telling how and why evolution occurs. Darwin points to "natural selection" popularized as "survival of the fittest."

Incidentally, if the student is familiar with the propaganda issued by the more vociferous advocates of free enterprise and the American way of life (whatever that is), it is not too difficult to see the connection between Darwin's theory and the social policy of certain early captains of industry. Of course, as anyone knows, radically free enterprise in this country is as dead as the Java giants but more than one economic giant has achieved its position of power and dominance according to Darwin's theory of natural selection.

Given the context of the times it is no wonder that Marx, Engels, and nearly every other thinker in 19th century Europe was carried away with the vision of inevitable progress. The social chaos in which they lived was partially responsible for this hope of a better life in the future. In a word, to understand their thoughts we must understand the times in which they lived. This is the whole burden of this first lecture. To understand Marx and Engels we must see them as they saw themselves; we must look at problems as they looked at them; thus, we will see why they thought the way they did; why they tried to solve the specific problems they were attempting to give solutions for; above all, why in trying to give solutions for these problems they gave the specific solutions they did.

If the student truly understands the works of a great thinker there is no longer a need to oversimplify and refute that person.

INTELLIGENCE AND NATIONAL SECURITY—SUBCOMMITTEE REPORT

Mr. JACKSON. Mr. President, from the time it was established almost a year ago, the Subcommittee on National Policy Machinery has been making a nonpartisan study of the problem of relating intelligence activities to our overall planning for national security. Recent events have focused public attention upon this matter.

The subcommittee has agreed that a constructive purpose can now be served by setting forth certain cardinal principles which must govern a free society's use of intelligence activities.

They are contained in a unanimous report released today.

In identifying these principles, the subcommittee has devoted a portion of its series of hearings to seeking counsel of ranking Government officials, past and present. In addition, the subcommittee has consulted with representative intelligence experts and other distinguished Americans.

Mr. President, I ask unanimous consent that the subcommittee report on "Intelligence and National Security" be printed in the RECORD at this point.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

INTELLIGENCE AND NATIONAL SECURITY

(Report submitted to the Committee on Government Operations, U.S. Senate, by its Subcommittee on National Policy Machinery, Senator HENRY M. JACKSON, chairman, pursuant to S. Res. 248, 86th Congress)

INTELLIGENCE AND NATIONAL SECURITY

For almost a full year, the Subcommittee on National Policy Machinery has been making a nonpartisan study of how our Government should best organize to develop, execute and coordinate national security policies. The role of intelligence in national security policymaking has been an area of concern from the outset. The subcommittee has received the counsel of ranking Government officials and other distinguished Americans uniquely qualified in this field.

Long experience has established the validity of certain principles governing the relationship of intelligence activities to national security policy.

The future work of the subcommittee will include recommendations, classified where required, for improving the review and coordination of intelligence activities and national security planning. Our work will be guided by the following tested principles:

1. The free world needs intelligence activities to assure its survival. Intelligence is as important as armed strength. In this age of pushbutton weapons, intelligence is more than ever our first line of defense.

2. Intelligence operations are instruments of national policy. They must be subject to effective and continuing higher review and coordination. This includes a weighing of gains against risks.

3. The collection and evaluation of intelligence is a job for professionals. Intelligence organization should be tight, centralized, responsive, and to the greatest possible extent anonymous.

4. Officials who depend upon intelligence must be professional in handling the problems which it raises.

5. The conduct of diplomacy must be insulated from sensitive intelligence operations. Intelligence is a source of information for diplomacy—not a part of it.

6. Public revelation of sensitive intelligence is never a harmless act. It both jeopardizes the normal conduct of foreign relations and compromises the sources of vital intelligence. If public statements have to be made at all, they must be made only in response to overriding national interest and on the responsibility and under the control from the outset of one high authority.

7. The golden word of intelligence is silence. More can be lost by saying too much, too soon, than by saying too little, too slowly.

Recent events have not altered the need for adherence to these principles. They have, in fact, attested to their wisdom.

SALT LAKE CITIZENS ADVISORY COMMITTEE ON HIGHWAYS — LEADING THE WAY

Mr. BENNETT. Mr. President, each State of the Nation faces a tremendous challenge to plan for and meet its highway needs while at the same time maintaining good community relations and cooperation. In my own State, for example, it is estimated that by 1975 there will be 2½ million highway trips a day, every day, just in the metropolitan area of Salt Lake City. To meet this challenge, a 2-year, $500,000 study is now underway to plan highways to meet the city's 1975 needs.

Inevitably, misunderstandings and tensions arise in planning and constructing highways. Engineering plans made without careful liaison with local community leaders run the risk of being summarily rejected, no matter how meritorious they may be. With this in mind, the National Committee on Urban Transportation recommended the creation of Citizens Advisory Committees with the dual role of conveying community sentiment to the highway engineers and, in turn, informing the community about what the studies are expected to accomplish.

Highway planning not only involves engineering, but it also creates social and economic problems. This is where the advisory committee can play an invaluable role. It is important to meet problems as they arise, rather than to let them fester and become open community sores, probably resulting in the death of the highway plans.

To fill this vital community-relations role for the metropolitan area of Salt Lake City, a Citizens Advisory Committee of 22 civic leaders has been formed. The committee has already moved impressively into action.

I received a letter, today, from the Commissioner of Public Roads, Ellis L. Armstrong, who is spearheading the effort nationally to persuade other States to create advisory committees and bring their citizens into the highway planning process. He says of the Salt Lake City cooperative transportation study:

This is the type of community leadership and participation that we are encouraging all across America toward solving our very tough urban growth and transportation problems.

I certainly am delighted to see this type of approach underway. I think the good folks of Utah and Salt Lake City are to be congratulated.

The positive results of our gigantic highway program are staggering, and are often overlooked because of overemphasis of our problems by cynics and others who have lost their perspective. The achievements in Utah under Gov. George D. Clyde, the road commission, and highway leaders such as Taylor Burton, Elmo Morgan, and Ellis Armstrong have been particularly impressive. It is not surprising, therefore, that Salt Lake City should be leading the way with its advisory committee. Other cities can profit by this example.

I wish to commend the 22 members of the committee for their devotion to community betterment, and the State Highway Commission for its leadership.

I ask unanimous consent to have printed in the CONGRESSIONAL RECORD an article, appearing in the June 1960 Street Engineering magazine, entitled "Salt Lake City Leaders Launch Massive Area Transportation Study." It describes the important program now being carried out in Salt Lake City.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

SALT LAKE CITY LEADERS LAUNCH MASSIVE AREA TRANSPORTATION STUDY

(By Duane L. Cronk)

(The engineers and planners are uniquely drawing community leadership into an area study which is based on the procedures set up by the National Committee on Urban Transportation.)

On some early Tuesday morning in the spring of 1975, a milkman will turn his delivery truck away from the dairy loading platform and begin a tour that will take him to 175 homes in the northwestern suburbs of Salt Lake City, Utah.

An hour later, a young carpenter's helper will throw his tools in the back of his automobile and start for the job—an apartment project 6 miles south of town.

An insurance company executive will straighten his tie, pull on his coat, kiss his wife goodby and run for the approaching bus.

A housewife will hustle the kids into sleepy action, herd them into the family station wagon and head toward the Wasatch School.

Street engineers in the Salt Lake City metropolitan area know—almost as certainly as anything can be known—that these four average residents of their city will be among literally hundreds of thousands who will—in the course of this one day in 1975—rack up a ground total of 2½ million trips.

How many of those one million trips will be terminated happily—safely and on time?

Not very many, State and local highway engineers predict, if—15 years from today—the citizens of this fast-growing, widely spread out metropolitan area are still traveling on the present street and highway system.

To prevent that possibility, Salt Lake City and its neighboring towns and counties have joined forces in a massive inventory of the metropolitan area's street and highway needs. Officials have assigned almost every highway engineer and traffic expert in the region to some phase of an all-out research operation—an effort that will take 2 years to finish and cost nearly half a million dollars. The objective: To dig out the facts necessary for the wise planning of a metropolitan transportation network capable of accommodating 2½ million trips a day, every day.

That much alone perhaps isn't "hot news" in the highway fraternity. Several dozen other cities around the country are deep in metropolitan area planning surveys, some of the studies covering larger areas and costing twice as much money.

What's "news" about the Salt Lake City study is that the engineers are not going to do the job under wraps. They have gone to the people who will be using the streets and paying the bills, and said:

"Come on in. We need your help."

Most planning engineers want nothing more definitely than to be left alone in the highly technical job of surveying highway needs and developing long-range construction plans. They cringe at the thought of trying to work closely with someone no more knowledgeable about cordon counts, land use, and O. & D. studies than is the average businessman looking over their shoulder. The typical engineer wants to make his planning survey unmolested, draft a neat objective report, hand it to the mayor and say:

"Here are the facts. This is as far as we can go. From now on, it's your baby."

Frequently, too, such studies are conducted in secrecy. Reporters are cold shouldered and told that no one can talk till the study is complete. Ill-founded rumors start to circulate, arousing the suspicions of affected taxpayers. By the time the mayor receives the report, special interest groups are ready to tear it to pieces, the city council is wary of the whole project, and officials would just as soon forget that the subject ever came up.

Thus, city after city has compiled report after report, which now quietly gather dust on file room shelves while their traffic situation worsens.

Recognizing this threat, the National Committee on Urban Transportation, in writing its excellent guide manual "Better Transportation for Your City" recommended that a Citizens Advisory Committee be formed wherever a metropolitan area study was undertaken. Such a committee, NCUT pointed out, could help immeasurably to publicize the merits of an engineering report.

This recommendation has been followed in Salt Lake City. In a personal invitation from the Governor of Utah (40 percent of the State's population is in Salt Lake City and County), 22 civic leaders were asked to comprise a Citizens Advisory Committee. The invitation list included a representative of organized labor, a banker, a housewife, a trucker, churchman, a real estate executive, a representative of the Lions Club, president of a private utility, and the manager of the Union Stock Yards. Committee Chairman, Charles "Tex" Boynton, a successful businessman, was chosen for his working knowledge of traffic flow and highway needs in Salt Lake City. Mr. Boynton operates a fleet of taxicabs and sight-seeing buses. In fact, these 22 men and women represent every conceivable group that might have an interest in fast, safe transportation, as well as speaking for the general public.

Most of these people know very little about traffic engineering. But they personally face congestion daily in the course of their work and recreation. And, watching the tremendous growth taking place in the Salt Lake area, they realize that definite plans must be made to provide for the huge future traffic volumes now in the making.

The committee is willing to let the engineers probe for the facts in their own way, and are eagerly awaiting the results.

This does not mean that they may completely agree with official recommendations contained in the final report. Stated one way or another, this was the consensus of committee feeling:

CRITICAL LAYMAN'S EYE

"We are going to reserve the right to look at the findings through our own eyes. We may be real critical of recommendations which appear to overlook or clash with other important community programs. We will undoubtedly protest findings which threaten to hurt the segments of the community which we represent."

J. Edward Johnston, chief planner for the State highway department and one of the prime movers back of the study, is not upset by these possibilities.

"We know it," he says. "The Governor didn't pick these people at random. He picked them for their knowledge of the community and because they are leaders who are not afraid to express their sentiments.

"We are sure of two things: First, these men and women are intelligent. That means they want to make decisions and plans for the future on the basis of facts. Working so closely to this study will give them a real insight into the traffic situation building up here. They will learn the facts of life firsthand.

"Second," continued Planner Johnston, "these people can take over where we have to quit. There is a stage at which traffic becomes more than an engineering problem. It becomes a social and economic problem. At that stage, these community leaders can—and should—take over and 'sell' some sort of a program to meet street and highway needs in this region."

Of course, public sentiment about highway system development probably will not be crystallized until the study is complete and there is something tangible to consider. But it is expected that committee members will express their personal desires for the general welfare of the community, or in behalf of the special interests of the professional or industrial groups they represent along the way.

"Better we should fight some things out as we go along, than jeopardize the whole report when it comes to a showdown," Salt Lake City officials believe.

Governed by this philosophy, the highway planners have asked the committee members to shoulder two assignments. One of their responsibilities is to carry word of what the study is expected to accomplish and how it is progressing to the groups which they represent; the other is to carry citizen sentiment back to the engineers.

Last month, we visited Salt Lake City for a firsthand look at how such a group is organized and how it operates. In the course of 2 days, we talked with more than a score of civic and business leaders—committee members and other laymen who are watching the transportation survey closely, for a combination of motives: selfish business interest, civic pride, and concern for the health of a community beset with the pains of expansion.

We found members of the new committee delighted for the opportunity to serve in the ambitious undertaking. Many were already deep in the task of developing a publicity program for the study. Here are examples of what these typical members are doing:

Mrs. Jerry Landa, a past president of the League of Women Voters and now an elected member of the Salt Lake City Board of Education, represents women's interests on the advisory committee. Her job: to explain the study and its objectives to the thousands of women who belong to such civic-minded—and powerful—organizations as the Utah Women's Legislative Council, the Salt Lake City Council of Women, the Utah Federation of Women's Clubs, the Business and Professional Women's Clubs, and the League of Women Voters. Most of these organizations have traffic and safety committees. Mrs. Landa is working with these committees to obtain speaking engagements for the highway engineers conducting the study, to distribute literature, to schedule slide presentations, and otherwise to arouse interest in the project.

Gus Backman, executive secretary of the Salt Lake City Chamber of Commerce, and Don E. Kenney, chairman of the chamber's 40-man transportation committee, will keep the business community informed. Both men are pioneers in promoting downtown traffic improvements to preserve the health of the downtown shopping area. Together, they will make the chamber the sounding board for debate on the transportation study and its subsequent recommendations. They are convinced of the need for public support.

"You can be right as rain in your engineering recommendations, but unless you solicit and obtain the backing of downtown merchants, you might just as well quit and go home," Mr. Backman declares.

Allan M. Acomb, purchasing director for the Church of Jesus Christ of Latter-day Saints and leader in local service club activities, will serve as liaison with the community's 35 Lions, Kiwanis, and Rotary Clubs. He is lining up speakers for club meetings, making arrangements for exhibits, and otherwise publicizing the transportation study.

The local press has been invited to follow the whole undertaking closely and newspaper editors have become enthusiastic about the project. Editors showed us nearly 40 news items and feature stories about the study, printed since the study was put underway only 6 months ago.

LOCAL PRESS COOPERATIVE

"You're bound to get good press coverage on something like this where citizen participation is involved," H. F. Kretchman, editorial writer of the Salt Lake Tribune said. "Members of the committee are community leaders; they have a reputation of success in putting other worthwhile projects across; their participation in this study raises the whole undertaking from the level of a strictly engineering project to one of wide community interest."

"That is exactly what we want," Gerald Matthews, veteran highway engineer and manager of the study adds. "Engineers get a little bit tired of 'going it alone' in planning for the future. It's going to be great to have a group of well-informed citizens with us from the very beginning."

The signs are that Engineer Matthews' confidence in 22 nonengineers will be amply justified.

Developing a long-range transportation program to meet the needs of the people who want to make more than 2½ million trips a day—every day—into, out of, around, and through Salt Lake City in 1975 is an engineering challenge. But it is also a challenge to mayors and councilmen, downtown businessmen, and community planners. In the final reckoning, the outcome of the Salt Lake metropolitan area transportation study rests in their hands. If they do their job well a milkman may be able to finish his rounds before sundown, a carpenter's helper may get to work, an insurance company executive may make that bus, and a housewife may get four children to school—safely as well as on time.

Here is one problem the engineers are smart to share—from start to finish—with the citizens of the community they serve.

WHAT'S BEING ATTEMPTED IN THE SALT LAKE SURVEY

Highway and street engineers in America's cities have long been aware of the fact that construction of the much-publicized National System of Interstate and Defense Highways is not going to solve the total transportation problem in most of America's cities—large or small.

However, not many people have actually known how a city could go about starting the comprehensive study necesary to develop a long-range improvement program based on facts.

A few months ago, an organization called the National Committee on Urban Transportation completed a self-appointed task which it has been working on for 2 years—namely, to produce the tools with which an average city can inventory its local street and highway needs and determine where to go from there.

The traffic experts—State, county, and city—involved in the Salt Lake City metropolitan area study are following these procedures. In the course of the comprehensive $500,000 study they will—

Determine the traffic load on every block of city street and every mile of suburban road in the multi-square-mile area and classify them as expressways, major arterials, collector streets, or local streets.

Observe and record the physical condition of every block and mile of these facilities to determine where improvements are necessary, such as widening of roadbeds, addition of drainage, repair of curbs and gutters, rehabilitation of sidewalks, and installation of traffic signals.

Measure existing traffic service to determine traffic volumes, travel time between strategic points, location of accident "hotspots," and parking needs.

Determine the number of trips into, within, and through Salt Lake City, and its suburbs from all directions.

Study present and anticipated use of every block or square mile of land so future traffic patterns may be predicted.

Measure the role of the local bus company in providing transportation service. (In some cities this would include rapid transit and commuter railroads.)

Collect fiscal information necessary for legislative bodies to consider in allocating future funds for transportation improvement projects.

In some respects, Salt Lake City is more fortunate than other large cities. Its settlers, looking far ahead in laying out the original city, allowed plenty of room for expansion. Streets were given 132 feet of right-of-way (wide enough for a team of six oxen to make a U-turn on downtown streets, old-timers report with obvious pride). Most of the arterial street system is in good to excellent condition. A highly professional traffic engineering staff has steadily boosted the city's safety rating.

However, there have been no bond issues for major improvement jobs within the last 20 years and the capacity of much of the 500-mile street and highway plant has been rendered inadequate under the growing traffic load. As everywhere, suburban development is springing up around the city, feeding a heavy commuter traffic flow onto the narrower streets, outside the city, overtaxing their capacity. Traffic volume has tripled since 1946 and will double again within the next 15 years.

Businessmen are feeling the problem in two ways: Customers are drifting away to fringe shopping centers and delivery costs are going up. A local pickup and delivery truck is moving little more than 50 percent of the time on city streets.

Because so much of the total traffic in the State of Utah is generated in the Salt Lake City area, State engineers are playing a heavy role in the study. But traffic experts, engineers, and officials from Salt Lake City and the several surrounding suburban towns and counties are participating directly in the undertaking.

They are agreed that only such a comprehensive approach can solve what is a mutual problem. The adequacy of transportation media throughout the entire area, regardless of city, county, or State jurisdiction, cannot be evaluated independently or improved by piecemeal projects.

Although the study is being conducted under the guidance of two State highway staff engineers (J. Edward Johnston, deputy director for planning, and Gerald Matthews, chief research engineer), its course is guided by an executive committee made up of top officials of all the cities and counties involved.

All of these jurisdictions are represented on subcommittees set up to study administrative, legal, engineering, and fiscal aspects. The objective here is twofold—to safeguard the interests of all the communities involved and to familiarize their engineers with the areawide situation.

Governor Clyde made a point of this purpose in first calling the group together:

"The thing I want to emphasize is that this is your transportation study," he said. "It is not solely designed to locate State highways. It will serve an even more important purpose for locating your city streets and county roads and developing a transportation system that will insure the best land use and the best location of public improvements. It is an opportunity, as I see it, for the various governmental agencies throughout the metropolitan area to obtain the factual data they have needed for a long time to develop a sound transportation plan, and to have available to them the technical assistance needed to translate the plan into an improvement program. Such a plan would be difficult to obtain by their own resources."

Federal funds will pay for most of the Salt Lake City study. Although the traditional matching basis for Federal highway grants is 50–50, the predominance of public lands in Utah reduces the State's matching requirements to only 13 percent. This portion is being met jointly by the State, city, and county.

INVESTIGATIONS BY HOUSE OF REPRESENTATIVES SPECIAL COMMITTEE ON ASSIGNED POWER AND LAND PROBLEMS

Mr. GOLDWATER. Mr. President, some 10 days ago on the floor of the Senate I commented in some detail on the need for revision of our public-land laws. In particular, I attempted to bring to the attention of the Senate the series of investigations which has been conducted throughout the West by the House Special Subcommittee on Assigned Power and Land Problems.

I was, and still am, concerned about the methods employed by this subcommittee in reviewing practices of the Bureau of Land Management in my own State. I questioned the necessity of these hearings into land transactions in Arizona at the taxpayers' expense, while we in Congress have failed to act upon a resolution which would enable a qualified commission to examine the inadequacy of our public land laws and recommend changes.

Mr. President, I review my previous statement, so that I may be able to comment now on developments since my remarks of June 3.

At the time when I brought to the attention of my colleagues these subcommittee probes into Arizona land transactions, the Department of Justice already was conducting its own investigation into charges that were made during the subcommittee's hearings in Phoenix. Under review by the Justice Department was the so-called Stegall-Lawrence exchange, one of three transactions which received a great deal of publicity during the Phoenix hearings.

In view of the accusations that were bantered about as a result of the subcommittee's investigation, I believe that the finding of the Justice Department in this particular case is deserving of special note.

In reporting to the Department of the Interior, the Department of Justice said:

The inquiry conducted by the Federal Bureau of Investigation into alleged irregularities in the filing and processing of this land exchange application has now been completed. That investigation has developed no evidence of the use of "tainted" appraisals in the negotiation of the Lawrence-Stegall land exchange or otherwise disclosed evidence of possible violation of the Federal criminal statutes. Accordingly, the Department is closing its file on this case.

Mr. President, I want to make it perfectly clear that I do not question in any way the right of congressional inquiry. Having served on select committees, I know very well the importance of such investigations to elicit information in the public interest. However, I believe it was no coincidence that investigations and vague charges about the operation of the Bureau of Land Management should reach their height during an important election year. If such investigations are to be made, I feel it is necessary to bring all the facts before the public; and that is my purpose in commenting on the Department of Justice report today.

I want to reiterate that I recognize the problems faced by the Department of the Interior in carrying out its operation under outdated public land laws. I suggest that Congress move to correct this, not through the airing of charges and countercharges by investigative subcommittees, but by sound legislative processes.

Mr. JOHNSON of Texas. Mr. President, has morning business been concluded?

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

ADJUSTMENT OF COMPENSATION OF CERTAIN FEDERAL OFFICERS AND EMPLOYEES

The PRESIDING OFFICER. Without objection, the Chair lays before the Senate the unfinished business.

The Senate resumed the consideration of the bill (H.R. 9883) to adjust the rates of basic compensation of certain officers and employees of the Federal Government, and for other purposes.

Mr. JOHNSON of Texas. Mr. President, I do not know who has amendments to this bill, but we are hopeful we can get action on it today, and I suggest that the attachés on both sides of the aisle notify all members of the committee and all absent Senators who may have an interest in the bill that we are going to proceed to the consideration of the Federal and postal employees pay bill. It affects a good many people, a good many little people, a good many people who need the assistance provided by this bill, and I hope all Senators will give their careful attention to it, because, if they remain in the Chamber, we can act much more expeditiously.

Mr. President, I suggest the absence of a quorum, so that all interested Senators may be present.

The PRESIDING OFFICER. Does the Senator from Texas request from what time it shall be taken?

Mr. JOHNSON of Texas. I request that it be taken off time on the bill.

Mr. President, I ask unanimous consent that I may suggest the absence of a quorum and that the time be taken from the time allotted to the bill.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The clerk will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that further proceedings under the quorum call be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE BRANCH APPROPRIATION BILL

Mr. JOHNSON of Texas. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. JOHNSON of Texas. When was the legislative branch appropriation bill reported to the Senate?

The PRESIDING OFFICER. The bill was reported yesterday.

Mr. JOHNSON of Texas. Are the reports available to Members?

The PRESIDING OFFICER. The bill and the committee report are at the desk.

Mr. JOHNSON of Texas. I ask the clerks to see that copies are distributed to Members, so that they will be available.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADJUSTMENT OF COMPENSATION OF CERTAIN FEDERAL OFFICERS AND EMPLOYEES

The Senate resumed the consideration of the bill (H.R. 9883) to adjust the rates of basic compensation of certain officers and employees of the Federal Government, and for other purposes.

Mr. JOHNSTON of South Carolina obtained the floor.

The PRESIDING OFFICER. Does the majority leader yield time to the Senator from South Carolina?

Mr. JOHNSON of Texas. Yes, Mr. President. The Senator from South Carolina, as chairman of the Committee on Post Office and Civil Service, will control the time on the bill in my absence, and may yield time as he desires.

I commend the Senator from South Carolina for the fine job he has done. He has been one of the most fearless friends of the public servants of America. He is one of the most distinguished and able Members of this body. I congratulate the Senator for the excellent work he has done on behalf of the public servants of this country.

Mr. JOHNSTON of South Carolina. I thank the majority leader for those kind remarks. Of course, I have done nothing other than what I thought was right and just for the majority of our Federal employees.

The PRESIDING OFFICER. How much time does the Senator yield?

Mr. JOHNSTON of South Carolina. Mr. President, I yield myself 10 minutes.

The PRESIDING OFFICER. The Senator from South Carolina is recognized for 10 minutes.

Mr. JOHNSTON of South Carolina. Mr. President, I doubt that anyone in this Chamber is unfamiliar with what is at stake in this matter. The question of a pay raise for our Federal employees has been the subject of discussion both here and in the House for many, many weeks. It has been discussed in the newspapers and on the air. The time for discussion is almost past. The hour for action has arrived in the Senate.

Mr. President, early in the present session more than 80 pay bills were introduced in the House calling for increases ranging up to 26 percent. As hearings were held in the House and in the Senate, adjustments were made first in one area and then in another. Finally, there evolved agreement among the majority, at least, that the rate of increase should be somewhere between 7 and 10 percent. Many felt that a larger increase was justified, but in their desire to see Federal employees receive an increase, they adopted a realistic approach to the matter.

Early this week, the House was prepared to act under a discharge petition which had been signed by 219 Members on a 9 percent bill. In an effort to reduce the area of difference, the House committee the day before yesterday morning adopted an amendment scaling down the increase to 7½ percent. Almost simultaneously the Senate Committee on Post Office and Civil Service approved and favorably reported to the Senate S. 3672, providing a similar increase.

Thus, we have before us H.R. 9883 and S. 3672, identical bills providing a 7½ percent across-the-board increase to: (a) Some 535,000 postal employees; (b) 980,000 employees subject to the Classification Act; (c) 8,100 employees under the Foreign Service Act; (d) 19,300 in the Department of Medicine and Surgery in the Veterans' Administration; (e) 15,000 employees in the agricultural stabilization and conservation service; (f) 5,000 employees in the judicial branch; and (g) 7,500 legislative employees.

Mr. President, as I indicated, this is a 7½ percent across-the-board bill with two minor exceptions as follows:

First, a 7½-percent increase in grade 18 of the general schedule of the Classification Act would have raised the rate to $18,815. The bill holds the salary of these positions to $18,500. This was done in order to prevent overlapping with positions subject to the Executive Pay Act.

Second, in addition to the 7½-percent increase, an additional $5 has been added to the base rate and the annual increments in the lower six levels of the postal field schedule with a similar adjustment in the rural schedule so that rural carriers will continue to receive the same rate of pay as city carriers with whom their pay has been alined in the past.

In addition to the pay features of the bill already mentioned, the measure has three additional provisions as follows:

First, it amends the Federal Executive Pay Act of 1956 so as to give the legal adviser, solicitor, or general counsel of an executive department (excluding the Department of Justice) the same standing and pay as an assistant secretary.

Second, it creates in the Department of Health, Education, and Welfare the position of Administrative Assistant Secretary. Such a position now exists in the other executive departments.

Third, it adds 5 supergrade positions to the 20 such positions now established in the Interstate Commerce Commission for a total of 25 supergrade positions in this agency. The number of supergrade positions given to the Civil Service Commission for allocation to the various agencies is reduced by 20 because of the direct allocation to the Interstate Commerce Commission made by this bill.

World events of recent days give this measure added importance. The employees whose pay would be adjusted consist not only of our postal workers but include the scientific, professional, technical, and administrative personnel engaged in the execution of our defense program. These employees are engaged in the performance of over 15,000 different occupational skills in almost every area on the face of the globe. Less than 20 percent of the total who would benefit by the bill are located in the Washington area. The other 80 percent are stationed in every hamlet in the Nation and in the most remote outposts of the world. These employees are dedicated workers. The jobs they are performing are necessary to our national welfare. The Congress would be derelict in its duty if it failed at this time to see that they receive their just rewards.

In conclusion, it is my hope that the Senate will accept this measure by as overwhelming a vote as it was passed in the House yesterday, and that vote, may I remind you, was 378 to 40. Incidentally, on a motion to scale down the increase from 7½ to 5 percent, the vote was 324 to 90. In light of this, let there be no one proclaim that every avenue has not been explored and considered.

Mr. President, I ask unanimous consent that there be printed in the RECORD at this point in my remarks brief excerpts from the report of the committee which appear on pages 1 and 2 thereof under "Purpose," "Salary adjustments," "Executive positions," and down to "Summary of major provisions."

There being no objection, the excerpts were ordered to be printed in the RECORD, as follows:

PURPOSE

The purpose of the bill is twofold:

1. Title 1 provides a 7½-percent salary increase for employees in the executive, judicial, and legislative branches of the Government.

2. Title 2 authorizes the establishment of certain additional supergrade positions and adjusts the relative relationship of a limited number of existing positions in order to maintain a proper balance in the areas concerned.

SALARY ADJUSTMENTS

Title 1 provides a general increase of 7½ percent in the pay of approximately 1½ million employees in the executive, judicial, and legislative branches of the Government. The bill carries out the traditional practice of treating these employees alike in matters of pay.

The employees whose pay would be adjusted by the bill consist of our postal workers and the scientific, professional, technical, administrative, and clerical personnel required to perform over 15,000 different occupational skills essential to the performance of the varied and farflung functions of the Government. Less than 20 percent of the total are employed in the Washington area. The other 80 percent plus are employed in every State and county of the Nation and in many faraway outposts of the world.

The hearings held on this portion of the bill established conclusively that the compensation of the Government's white-collar employees has not kept pace with that of comparable employees in private industry.

Competent testimony was presented during public hearings on this portion of the bill to the effect that—

1. The Government is losing an alarming number of career engineers, scientists, and professional personnel to private industry because of an unfavorable competitive position with respect to compensation.

2. The most highly skilled are leaving the service and replacements are below the quality needed to maintain the standard of service desired.

3. More than a desirable number of employees—particularly postal workers—find it necessary to hold a second and even a third job in order to make ends meet.

4. Currently, one out of every six electronic, mechanical, and aeronautical engineering positions is vacant and similar shortages exist in other occupations.

5. Postal workers in our major cities (where most of such workers are concentrated) have fallen behind workers of comparable skills in private industry.

In light of these and other facts of an equally shocking nature, some members of the committee believe a higher increase than that provided by the bill is fully justified. However, in the interest of harmony and in the belief that an increase of modest proportions would stand a better chance of quick enactment, the 7½-percent across-the-board amount was agreed to.

EXECUTIVE POSITIONS

Title 2 makes three changes in the alinement of executive positions of the Government as follows:

1. The chief legal officers of the executive departments are given the same standing as assistant secretaries. As a result of this change, the salary of these officers would be increased from $19,000 to $20,000 a year.

2. The position of Administrative Assistant Secretary is established in the Department of Health, Education, and Welfare on the same basis as it exists in the other departments.

3. Five additional supergrade positions are authorized to be established in the Interstate Commerce Commission, which together with the 20 they now have will make a total of 25 such positions.

GIRLS' HIGHLAND BAGPIPE BAND OF IOWA

Mr. HICKENLOOPER. Mr. President, will someone yield to me about a minute and a half? Are we under a limitation of time?

The PRESIDING OFFICER (Mr. KEATING in the chair). The Senate is proceeding under a limitation of time.

Mr. DIRKSEN. I yield 2 minutes to the distinguished Senator from Iowa.

Mr. HICKENLOOPER. Mr. President, I am fully aware of the rules of the Senate, which I do not wish to transgress, and I shall not transgress them this morning. I know it is against the rules of the Senate to introduce anyone in the gallery, so I shall not attempt to do so. I merely inform the Senate that sitting in the gallery today at this time is a group of young folks of whom we in Iowa are justly proud.

We have a famous Girls' Highland Bagpipe Band, which has a history of 20 or 30 years of activity. These young people have made two tours of Europe, and they are now on their way to make a third tour of Europe. I personally am very proud to have them in the gallery today. While I may not formally introduce them under the rule, I call attention to the fact that if Senators will look, they will identify the costumes of these very fine young ladies who make up this band.

The PRESIDING OFFICER. The Chair informs the Senator from Iowa that he has complied strictly with the rules of the Senate.

Mr. HICKENLOOPER. I assure the Chair I would not for the world transgress the rules of the Senate, and I shall bend over backward to keep within the rules. However, this is a matter of national importance, and I think the Senate should be informed of the presence of this distinguished group of youngsters who are here from my home State.

Mr. DIRKSEN. Mr. President, is it a violation of the rule to applaud in the Senate?

The PRESIDING OFFICER. The Chair informs the Senator that regrettably he is required to rule that it is a violation of the rule to applaud in the Senate.

Mr. DIRKSEN. I could ask unanimous consent.

The PRESIDING OFFICER. The Chair assumes that unanimous consent would be forthcoming.

Mr. DIRKSEN. Mr. President, I ask unanimous consent that these young ladies be given a round of applause.

The PRESIDING OFFICER. Is there objection. The Chair hears none. [Applause.]

ADJUSTMENT OF COMPENSATION OF CERTAIN FEDERAL OFFICERS AND EMPLOYEES

The Senate resumed the consideration of the bill (H.R. 9883) to adjust the rates of basic compensation of certain officers and employees of the Federal Government, and for other purposes.

Mr. CARLSON. Mr. President, I ask if the minority leader will yield me some time on the bill.

Mr. DIRKSEN. Mr. President, I yield 15 minutes to the distinguished Senator from Kansas.

Mr. CARLSON. Mr. President, it is with considerable dismay that I enter into a discussion of the pay legislation that is now before the Senate.

During my many years of service in both the House and Senate, I have had an opportunity to propose, support, and assist in securing approval of pay legislation. My record in behalf of the interests of our Federal employees speaks for itself.

It is my sincere hope that the action we take today can consummate in legislation that will give our Federal employees a well-deserved pay increase.

It is my firm conviction that should the Senate approve H.R. 9883 without amendment, it will not become law and our Federal workers, whom I firmly believe are entitled to additional compensation at this time, will suffer as a result.

There are four points about the pending salary legislation which I believe should be made clear.

First, its cost.

The legislation before the Senate has an overall cost of approximately $750 million. In fact, the most precise estimate that can be made after the hasty action of the two committees in recommending this legislation is $746 million.

It should be made clear as to how this amount of money is distributed among the employees.

The cost for employees paid under the Classification Act is $452 million. The cost attributable to the Postal Pay Act is $252 million. The cost for the Department of Medicine and Surgery in the Veterans' Administration is $12,400,000. The cost for the Foreign Service is $8,600,000. The cost for the legislative and judicial branches is $5½ million. The final element to be brought into the cost picture results from a provision in the bill which establishes new pay scales for some 15,000 individuals who perform certain duties in connection with the agricultural conservation and stabilization program. The cost of this action is $15,500,000.

I think it should be mentioned that the inclusion of the agricultural stabilization and conservation county committees employees will bring all of them under the Civil Service Retirement Act, the Federal Employees Group Life Insurance Act, and the Federal Employees Health Benefits Act of 1959.

These employees are hired by farmer-elected, farmer-composed committees, the members of which are not under Federal appointment. These employees are not supervised by a Federal officer. Their tenure, hours of work, salaries, and so forth are wholly controlled by the farmer-elected committees of farmers.

Second. I want to call the Senate's attention to the fact that this is not, in reality, a 7½-percent bill.

H.R. 9883, as passed by the House, gives an average increase for the postal workers at 8.35 percent, or nearly 8.4 percent.

While this is an overall 8.35-percent increase measure for postal workers, it should be noted that the increases are applied unevenly and inequitably, generally to give the least percentage of increase to employees in the most responsible jobs.

Salary levels 7 and above will receive 7½-percent increase, whereas employees in the top steps of the lower level, levels 1 through 6, receive as much as 8.8 percent.

The first step of these lower levels, employing over 60,000 workers, receives a 7½-percent increase, whereas employees in the top step, whose base salaries are already considerably higher than the employees in the lower steps, and who are performing the same duties, will receive increases of 8.7 percent in level 1, 8.6 percent in level 2, 8.4 percent in level 3, 8.8 percent in level 4, 8.3 percent in level 5, and 8.6 percent in level 6.

The application of higher percentage increases in the lower salary levels obviously serves to decrease the percentage differentials as you get into the first line of supervision, differentials which are already precariously narrow in terms of providing incentive for advancement.

The present difference between the top step of level 6 and the top step of level 7 is 8.29 percent. H.R. 9883 would compress the spread to a 7.55 percent differential. From the standpoint of sensible personnel administration in any competent business enterprise this would be immediately recognized as a drastic step in the wrong direction.

I believe that it is most unwise to enact any kind of pay legislation which does not contain adequate provisions for further adjustment of the Federal pay structure.

In 1945, 1946, 1948, 1949, 1951, 1955, and 1958 the Congress took action to increase Federal salaries. Each time it became more apparent that the Congress is not adequately equipped to keep compensation legislation up to date by

the unsatisfactory device of biennial hearings. At best these produce much replowing of old ground and the creation of an infinite number of distractions and distortion of fact and proper relationships.

I have already indicated that the present legislation completely fails to provide for necessary reform in Federal pay statutes. Further, it does not take into account facts already known about numerous kinds of jobs in which Federal compensation is not out of line. It makes no provision at all for correction of the errors which will be compounded by its own provisions.

Third, I would like to call to the attention of the Senate the minority views reported to the House of Representatives in House Report No. 1636 on H.R. 9883. These views were written before the bill was reduced to the so-called 7½-percent legislation before us but they are equally applicable to the present legislation except for certain of the dollar figures therein contained. I would like to quote from that report.

> The Congress last year provided $500,000 for the executive branch to institute a survey of the salary rates being paid by private enterprise for work similar to that performed by Federal employees. We have been advised by the White House that this information will be ready for use by the end of September of this year. This means that the Congress can adopt a principle for compensating Federal employees that can be reasonably compared with those paid by private industry for work of similar skill and responsibility. Never before has the Federal Government had the data upon which to set such pay. It would appear to us that the fairness and objectivity of this principle should appeal to both the Federal employees and the taxpaying public.
>
> We deny that this is a delaying tactic. We maintain that this is the accomplishment of a new and improved principle in personnel administration which in the long run will be more advantageous to the Government and to the public as well. The executive branch representatives have indicated to our committee that they will be able to present to the Congress early in January 1961 pay scales based on these Bureau of Labor Statistics survey findings.

Mr. President, I regret that this report was not available for study by the Senate Post Office and Civil Service Committee, in order that we might have brought to this body statistics and facts that are badly needed if we are to write just and proper pay legislation.

Fourth, I want to state that I believe a pay increase is justified on the basis of information we have regarding the cost-of-living index and the general inflationary trends.

While I cannot support the present bill, I do not believe—based on the cost-of-living index and the inflationary trends—that we should state that the Federal workers are not entitled to some pay increase before the next session of Congress.

It is my intention to offer an amendment to the pending bill which would provide for a 6-percent across-the-board pay increase. When I do this, I realize fully that this does not correct some of the inequalities and injustices that are prevalent in this bill, but if approved by the Senate it would send the bill to conference between the House and Senate, where I believe it could be greatly improved.

I would not want to mislead anyone into believing that I have any assurance that the 6-percent proposal which I am submitting would be acceptable to the President, but I do make this pledge that if this amendment is approved I will do everything in my power to assure it becoming law.

Mr. JOHNSTON of South Carolina. I yield 3 minutes to the Senator from Oklahoma.

Mr. MONRONEY. Mr. President, I regret deeply that I must disagree with my distinguished colleague, the senior Senator from Kansas. The Committee on Post Office and Civil Service did go above, slightly, 7½ percent. We went above 7½ percent in the extremely low grades. We felt that a letter carrier who spends his life in his work, and who after 7 years finally comes up with a gross salary of less than $400 a month, on which to raise a family and educate his family, is entitled to an increase.

The place where the 7½ percent is exceeded is in the case of the lowest pay grades. Obviously, 7½ percent on a low salary is less of an increase than 7½ percent on a high salary.

If we are to limit the 7½ percent on the $15,000 and $17,000 a year positions, then certainly on the $3,000, $3,400, and $4,000 jobs, which are submarginal with today's cost of living, we should go above that limit.

What we mean when we say the bill breaks the 7½ percent rule is that we have added $5 a year in the low stages, so as to give them a little more meaningful raise. The raise for the bulk of the letter carriers, who form the big portion of postal employees in the first grade, will be $310. For the second grade, $330. For the third grade, $350. For the fourth grade, $370.

Mr. President, it seems to me that by putting the extra $5 on the lowest part of the scale, we are only trying to do justice. We do not believe the bill should be criticized because attention has been paid to the substandard incomes of the lower paid postal employees.

The basis and the genesis of the bill has been the longtime, severe suffering which some of the employees' families have endured.

I do not believe the Post Office has advanced a legitimate argument by saying that we should hold everything at the 7½-percent level, and charging that this is an 8.6 percent or an 8.4-percent increase. That percentage applies only to those who are in the lowest paid scales, and not to the highest paid scales.

I believe the bill has been carefully prepared after long hearings. There is a slight difference, of course, in the percentage of pay increase which the distinguished ranking Republican member of the committee proposes—a 6 percent increase—and the proposal before the Senate providing for a 7½-percent increase.

I call attention to the fact that all these increases will be reduced by the 20 percent income tax which will be deducted from the take-home pay of the employees. They will be further reduced by the 6½ percent retirement contribution; and also by the deduction for the health program, which amounts to $12 a month.

Mr. CARLSON. Mr. President, I offer an amendment which I ask to have read.

The PRESIDING OFFICER. The amendment will be stated.

The LEGISLATIVE CLERK. In each section where "seven and one-half per centum" is listed, it is proposed to reduce the amount to "six and one-half per centum."

Mr. CARLSON. Mr. President, if I may have the attention of the majority leader, would he object to a quorum call without the time for the quorum call being charged to either side?

Mr. JOHNSON of Texas. Let the time be charged to both sides on the bill. We have plenty of time on the bill. I shall be happy to accede to the request of the Senator from Kansas.

Mr. CARLSON. The distinguished majority leader says we have plenty of time. I am not so sure. The bill provides for more than $50 million. That is an amount of quite some size.

Mr. JOHNSON of Texas. If there is any question, we will get additional time.

Mr. President, I ask unanimous consent that there may be a quorum call, the time for the quorum call to be charged against the time on the bill.

The PRESIDING OFFICER. Is there objection? The Chair hears none. Does the Senator from Texas suggest the absence of a quorum?

Mr. JOHNSON of Texas. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CARLSON. Mr. President——

The PRESIDING OFFICER. How much time does the Senator from Kansas yield to himself?

Mr. CARLSON. Ten minutes.

The PRESIDING OFFICER. The Senator from Kansas is recognized for 10 minutes.

Mr. CARLSON. Mr. President, after sending the amendment to the desk, I find it was improperly drawn. Therefore, I ask that my amendment be modified, so as to read in the way I now submit it.

The PRESIDING OFFICER. The amendment as modified will be read.

The amendment as modified was read, as follows:

> Wherever 7½ per centum appears, it be reduced to 6 per centum and a corresponding reduction made in all schedules.

Mr. CARLSON. Mr. President, I offer this amendment because I have a very deep and personal feeling that the employees of the Federal Government are entitled to an increase in pay.

This bill, even with my amendment, will not correct some of the inequalities I have mentioned in my previous remarks. But I believe a 3-percent across-the-board, cost-of-living pay increase can be justified.

That is more than the Bureau of Labor Statistics advised us in the committee the increase in the cost of living has been; the Bureau stated it was 1.6 percent. But after hearing testimony from many of these people, I believe we can well justify a 3-percent increase above the last pay act, that of 1958.

I also feel—based on past history—that in a presidential election year there is an inflationary trend. Present indications are that that trend will develop this year; and I think it might be between 1 percent and 2 percent.

Therefore, I am willing to add 2 percent more to the 3-percent pay increase which I think should be paid, beyond any question, to these Government employees. And to provide good measure, I am willing to throw in 1 more percentage point, thus making a total increase of 6 percent. I am willing to defend that at any time, and that is the reason why I have offered this amendment.

I state frankly, as I have said previously, that I have no assurance from the President that he will sign a 6-percent pay increase bill. But if the Senate adopts this 6-percent amendment, I shall make every effort to see to it that the bill is enacted into law.

I know there are some problems in connection with this pay bill, and I know $580 million is not a small sum of money for us to vote this afternoon.

On the other hand, when we approach this problem from the point of view of the proposed 7½-percent pay increase, such an increase would involve an added cost of $750 million, whereas the 6-percent pay raise which I propose by means of my modified amendment would amount to an additional cost of between $580 million and $600 million.

I realize that the the cost of the amendment I propose will not be small. But, as I have said, my feelings and my sympathies are with these Government employees, who are entitled to a pay increase.

Frankly, I do not believe that House bill 9883, which now calls for a 7½-percent pay increase, will ever give our Federal employees $1 of pay, although they need a pay increase and are entitled to it. That is why I have offered this amendment.

No great amount of debate on the amendment is needed, for I believe everyone knows the facts.

As I have stated, the bill is an overall bill. I would not have written the bill in the way it now stands. But the bill has been passed by the House of Representatives and is now before us for our consideration.

As we go over the various proposals for the various groups, I believe it important that we keep in mind that these items are rather substantial ones. For instance, the cost for the employees under the Federal Classification Act is $452 million. The cost attributable to the Postal Pay Act is $252 million. The cost for the Department of Medicine and Surgery in the Veterans' Administration is $12,400,000. The cost for the Foreign Service Act employees is $8,600,000. The cost for the legislative and judicial branches is $5,500,000.

In addition, we added 15,000 new ASC employees, for the first time in our Nation's history, at a cost of $15,500,000.

Mr. President, it is for that reason that I offer this amendment to reduce the proposed 7½-percent pay increase by 1½ percent, to 6 percent.

If this amendment or a similar amendment is adopted, so we can get the bill into conference, I believe we can iron out, in the conference, some of the difficulties which I believe every fair-minded person will admit should be handled by rewriting some of these provisions.

Mr. CHURCH. Mr. President, will the Senator from Kansas yield?

Mr. CARLSON. I yield.

Mr. CHURCH. Do I correctly understand that the Senator's amendment would effect a reduction in the proposed wage increase from 7½ percent, in the overall, to 6 percent?

Mr. CARLSON. That is correct.

Mr. CHURCH. I should like to have the RECORD show that it has been my own feeling that, as regards the postal workers, the case made out before the congressional committees fully justifies the proposed 7½-percent pay increase.

However, as the Senator from Kansas knows, I have strong misgivings about the justification for a comparable pay increase for all the classified civil service. I feel that the evidence brought before the congressional committees fails to bear out a justification for so large an increase for all Government employees.

The arguments which the Senator from Kansas has made in support of his amendment—to the effect that the bill in its present form does not tend to solve, but, rather, tends to compound, many inequities within the present wage structure of the Government—is one which appeals very strongly to me.

I believe that if the amendment of the Senator from Kansas were adopted, we then would have an opportunity in conference to revise the bill, to the end that some of these inequities could be dealt with.

Therefore, despite the fact that I believe the proposed pay increase for the postal workers, as provided in the bill, is justified, the argument made by the Senator from Kansas is persuasive as to the benefits which would be derived from a conference which could deal with many of the inequities which this bill overlooks in the present wage structure.

So I commend the Senator from Kansas for submitting his amendment; and I state to him that, for these reasons, I shall support his amendment.

Mr. CARLSON. I thank the Senator from Idaho. I know of his interest in the Federal Government employees, because we have discussed this matter together. I call his attention to the fact that even with the proposed reduction from 7½ percent to 6 percent in the postal-pay section of the bill, the postal workers will still have 7 percent or better.

Mr. CHURCH. I recognize that to be the case.

Mr. ROBERTSON. Mr. President, will the Senator from Kansas yield to me?

Mr. CARLSON. I yield.

Mr. ROBERTSON. Mr. President, I share the views which have been expressed by the distinguished Senator from Idaho. I am rather familiar with the situation of the postal workers. A number of them live in my hometown and work in my home county. I know they are on the borderline of subsistence. I feel satisfied that even though they have had a number of pay raises, their pay is, in many instances, well below the industrial rates. But they have to compete for a standard of living with the industrial workers in their communities.

Therefore, I was very eager to support a bill which would do justice primarily to the low-income groups in the postal service with whom I am familiar, and also a bill which would be enacted into law.

In checking, however, in the CONGRESSIONAL RECORD, I found that every type of worker had been put in this bill. For instance, is it not true that there were included consular workers overseas who are getting $19,200 a year, whose salaries would be raised $700?

Mr. CARLSON. It was a substantial increase. I do not have the exact figure before me, but that is a correct statement; there was a substantial increase.

Mr. ROBERTSON. As to the average provided in the bill, for the postal worker is it something over 8 percent?

Mr. CARLSON. The bill, H.R. 9983, carries an average increase for postal employees of 8.35 percent.

Mr. ROBERTSON. As I understand the Senator's amendment, while it is an across-the-board increase for those who make the top salaries as well as those who can best prove the need for a salary increase, it will have a better chance, in the opinion of the Senator from Kansas, to be enacted into law. Is that correct?

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. CARLSON. Mr. President, I yield myself 5 additional minutes.

Mr. ROBERTSON. It will have a better chance to be enacted into law than the bill as passed on the House side, on which apparently there have been no hearings held either on the House side or the Senate side. Is that correct?

Mr. CARLSON. The Senator from Kansas would hope that the amendment would be more acceptable than the 7½-percent increase.

Mr. ROBERTSON. The Senator from Virginia, desiring to have a reasonable increase for the postal workers, in view of the fact that they are all lumped together in this bill, agrees with the Senator from Idaho that the amendment offered by the Senator from Kansas is our best plan to accomplish that purpose.

Mr. DIRKSEN. Mr. President, will the Senator yield?

Mr. CARLSON. Yes.

Mr. DIRKSEN. I wonder if the Senator from Virginia will give heed for a moment? I notice the hearings were on Senate bill 3141, which actually related only to the 2½-percent pay increase and the feasibility of making that increase permanent. Is that correct?

Mr. CARLSON. The Senator is correct.

Mr. JOHNSTON of South Carolina. Mr. President, I want to correct that statement. While that was the bill introduced, it was a vehicle for considering pay increase for classified and postal workers alike. The hearings and the testimony bear out that fact. Very little was said about the 2½ percent, for everybody realized they are getting that now and that automatically it should go on.

Mr. DIRKSEN. My statement is governed entirely by what I see on the title page of the hearings, because it reads, "S. 3141, a bill to make permanent the temporary increases in rates of basic salary provided for employees in the postal field service, and for other purposes."

That raises this question: Were there any hearings actually held on the House bill that is now before the Senate, which bears the number H.R. 9883?

Mr. CARLSON. There were no hearings on the bill that is before the Senate this morning, H.R. 9883. We did hold hearings on Senate bill 3141, which related to a 2½-percent increase for postal workers, and we had hearings and testimony on pay increases generally. So, while I would not say there were no hearings on pay increases generally, there were no hearings on H.R. 9883 by the Senate committee.

Mr. JOHNSTON of South Carolina. Mr. President, let us keep the record straight. We reported from the committee a 7½-percent bill, and we also held hearings and reached the conclusion that that was a justifiable pay increase.

Mr. CARLSON. I do not want to have any quarrel with the distinguished chairman of the committee, but the record shows that there were no hearings on the House-passed bill which is on the Senate Calendar. Hearings were held on the 2½-percent increase and pay legislation generally, which is a true statement.

Mr. DIRKSEN. Mr. President, with respect to the amendment which the distinguished Senator from Kansas has offered, he proposes, as I understand, to substitute his amendment for the 7½ percent increase in every section of the pending bill?

Mr. CARLSON. That is the pending amendment.

Mr. DIRKSEN. And keep in the bill pay increases for the so-called community and county committee men under the ACP agricultural program. Is that correct?

Mr. CARLSON. It would do that.

Mr. DIRKSEN. They are included?

Mr. CARLSON. They are included.

The PRESIDING OFFICER. The time of the Senator from Kansas has again expired.

Mr. DIRKSEN. Mr. President, I yield the distinguished Senator 5 minutes on the bill.

Does it include all members of the legislative branch, meaning, of course, the employees?

Mr. CARLSON. It does.

Mr. DIRKSEN. Does it include all employees of the judicial branch?

Mr. CARLSON. It does.

Mr. DIRKSEN. In addition, the amendment of the Senator from Kansas would also include all employees of the executive branch, including, of course, the postal service. Is that correct?

Mr. CARLSON. It does. To keep the RECORD absolutely clear, my amendment would cover classified employees of the Federal Government, postal employees, the Department of Medicine and Surgery in the Veterans' Administration, the Foreign Service, the legislative and judicial branches of this Government, and 15,000 employees in the ASC who are not now included. It covers every phase of the bill which passed the House.

Mr. DIRKSEN. Did the Senator give an estimate of the cost of his proposal?

Mr. CARLSON. It will cost between $580 million and $600 million. Each percentage point is equal, roughly, to $100 million. The cost of the bill before the Senate is, roughly, $750 million.

Mr. President, I yield the floor.

Mr. MONRONEY. Mr. President——

The PRESIDING OFFICER. Does the Senator in charge of the time yield to the Senator from Oklahoma?

Mr. MONRONEY. Will the chairman of the committee yield me 5 minutes?

Mr. JOHNSTON of South Carolina. Mr. President, I yield 5 minutes to the Senator from Oklahoma.

Mr. CARLSON. Mr. President, will the Senator from Oklahoma yield me 1 minute?

Mr. MONRONEY. Yes.

Mr. CARLSON. Mr. President, having visited my senior colleague from Kansas [Mr. SCHOEPPEL], who was unavoidably detained, he asked me to express his support of my amendment and to state that he is very much interested in securing pay increases for the Federal employees of the United States. He has asked me to make this statement for him and I quote:

> Delegation after delegation representing postal employees have conferred with me about this legislation. They have satisfied me that they are entitled to a reasonable increase. In my opinion, an increase in the amount of 6 percent is reasonable. I have advised them that in my judgment any effort to exceed that amount would be opposed by the executive branch and would probably cause the legislation to fail.
>
> Frankly, I think we do a disservice to the Federal employees when we seek to pass legislation that invites a Presidential veto. It may be "smart politics" to support such legislation and then "pass the buck" to the President but that doesn't help those who are finding it more and more difficult to pay their living expenses.
>
> I support the amendment offered by my colleague, Senator CARLSON. The 6 percent it would provide is only 1½ percent less than the increase provided in the legislation now before us. This may seem like an insignificant amount over which to quibble. But from the standpoint of the American taxpayer this amounts to approximately $200 million per annum. To the Federal employee it may mean the difference between the success or failure of this legislation.

This concludes Senator SCHOEPPEL's statement.

Mr. MONRONEY. Mr. President, to put at rest the contention that there have been no hearings held on the bill before the Senate, let us face the fact that the bill which is before us was passed less than 2 days ago. So it would have been impossible for the Senate to have held hearings on the House numbered bill.

I am sure those in the administration who vigorously oppose the bill would not say there had not been any hearings held on the subject, because fully half of the record of the hearings is composed of material and exhibits put in the hearings by the administration, including all kinds of charts, graphs, and dictagrams, and everything else, to try to prove that an increase was unnecessary.

The remainder of the hearings were the pathetic story of postal and Government employees who are trying to live in a 1960 cost-of-living era on less than $300 a month.

Further to put at rest the question whether these hearings were on postal and classified salary increases, I point out that on the first page of the opening statement of the chairman of the committee, the Senator from South Carolina [Mr. JOHNSTON], in the third paragraph said:

> The committee also desires to receive advice and pertinent information on whether additional adjustments in the salaries of the Postal and Classification Act employees are justified and, if so, to what extent, and in what areas.

The hearings followed that purpose. Let us not have a misleading assumption that there were no hearings held on the bill. I have participated in many pay-raise hearings, and I think the distinguished Senator from Kansas, always a great friend of the Government employees, will admit there were adequate hearings held by the Post Office and Civil Service Committee as to the adequacy of Federal pay.

Mr. President, it is easy to say that a 1-percent pay increase equals $100 million. Let us face it; that is what the situation is. A 1-percent pay increase equals $100 million for 1.7 million employees.

The reason why the bill is before us, Mr. President, is that we are dealing with people. We are dealing with human beings, whose employer is Uncle Sam. These people do not have the right to strike, to collectively bargain. They must rest their case in the only court of appeals they have, to keep them from going into debt, to keep them from breaking up their homes, to maintain adequate family standards of living, housing, and education, and so on. The court of appeals for them is the Senate of the United States and the House of Representatives.

Let us admit, to begin with, that a 1-percent pay increase equals $100 million cost in a budget which runs in the neighborhood of $65 billion to $70 billion a year. Let us face it. That is what it will cost to provide a pay increase.

Now let us consider the people. People are what make up the United States. People make up the Government service. People make this Government run. People make the post offices run. People make the Government run in the farflung outposts where we grapple with the threat of Communist countries. The dedicated public servants repair and maintain our missiles, our aircraft, and our trucks. They clean the floors and do the necessary repair work in our public buildings, and so on.

There are 1.7 million of those people involved.

What will the two amendments do? We are talking about people. There are 1.7 million people we are talking about; and, of those, 1 million are people who have salaries below $5,000 a year, gross. One million of these people are paid less than $5,000 a year, and many of those have salary ranges from $3,600 to $4,200 or $4,400 a year.

Let us consider a typical case, because it is typical. Let us consider the level 4 of the letter carriers. There are 400,000 of these men. So that we will not be accused of being misleading, by considering the pitifully poor ones, who are beginning work, let us consider the highest wage a letter carrier can earn, after 20 years of service.

The PRESIDING OFFICER. The time of the Senator from Oklahoma has expired.

Mr. MONRONEY. Mr. President, will the Senator yield me 5 more minutes?

Mr. JOHNSTON of South Carolina. I yield 5 minutes to the Senator from Oklahoma.

The PRESIDING OFFICER. The Senator from Oklahoma is recognized for 5 additional minutes.

Mr. MONRONEY. After 7 years of service this man attains the top grade, and receives $4,875 a year. Mr. President, he has no chance for an in-grade promotion. He has no chance to move up, as is true in the classified service or in the congressional offices. This is the top of life for 400,000 employees in the letter carriers' group.

Mr. President, I point out there are almost a million people in a somewhat similar position. I believe this is a typical case.

The bill the committee supports, Mr. President, would give a 7½-percent pay raise, plus $5 per ingrade step to these men. The reference there is to the fact that for every year the man worked, for the first 7 years, he would get $5 above the 7½ percent. I do not think that is a bad provision.

Our bill would provide that the man, after working more than 7 years—and for the rest of his life this would be the top he could get—would be paid a grand total of $430 increase in his gross salary. Mr. President, this equals $35 a month, according to my arithmetic, which we are talking about under the so-called exorbitant increase, which, I admit, runs a little above 7½ percent for these men. As a matter of fact, for the top of this grade, for these particular people, the increase would be 8.8 percent.

Mr. President, let us consider what the take-home pay of this man will be. We have a 20-percent income tax for people in this grade. The man, of course, has used up his deductible, unless he should have more children—and I am sure such a man will be trying not to have more children, at this salary. Therefore, from the $35 a month increase we would give him, he would pay back to Uncle Sam $7 in income taxes.

Mr. President, we also have a 6½-percent retirement provision. I grant that the retirement payment builds up the man's retirement benefit when he gets too old to work, and is of benefit to him. When his feet break down, when he reaches the age of 65, or when he gets arthritis and cannot carry the mail, there is no nice spot in the Cabinet for him to fill. There is no nice spot keeping track of filing papers or something for this man. When a man is a letter-carrier, and his feet give out, he goes on the retirement roll.

Mr. President, I ask Senators to bear in mind that this is a 6½ percent deduction from the monthly $35 increase we would provide. Therefore, the man would have to give back to Uncle Sam, to the retirement fund, $2.28.

Then, with a great stroke, I think—I do not believe a Member of the Senate voted against it—we passed the great Dick Neuberger bill. That was the Neuberger-Johnson bill for health protection. That is the health insurance bill for these employees. The employees are signing up this week and next week. The employees must decide whether they will try to have a health program for their families or not. If they have families—and most letter carriers have families, as most other people do—it will cost these men approximately $12 a month to pay for the health insurance program.

I think that is a good program. I think the employees should enter it. However, we must bear in mind the fact that the money must come from the take-home pay. From the $35 a month increase we want to provide, under the 7½-percent provision there would be a total of approximately $21.28 deducted.

Actually, Mr. President, these men would get very little money which they could spend from the pay increase. Approximately $21.28 would be deducted from the $35 pay raise they would get. The rest is all the money they could take home, to say to their wives, "Honey, I brought home a raise."

The PRESIDING OFFICER. The time of the Senator from Oklahoma has again expired.

Mr. MONRONEY. Mr. President, will the Senator yield me 3 more minutes?

Mr. JOHNSTON of South Carolina. I yield 3 minutes to the Senator from Oklahoma.

The PRESIDING OFFICER. The Senator from Oklahoma is recognized for an additional 3 minutes.

Mr. MONRONEY. Mr. President, these men would say, "Honey, I brought home this big raise which Congress voted. I have brought home nearly $14 for additional groceries or clothes for the children this month."

That is approximately $3.50 a week, or 50 cents a day, Mr. President. These pay deductions are for benefits which are of help to the employees, I am sure, but, Mr. President, when we talk about a steel settlement, when we talk about a settlement with the auto workers, when we talk about any other settlement in a labor dispute, practically all of these fringe benefits I have mentioned have been given in totality as a part of the bargaining, as fringe benefits. The figures we get, with respect to a 3½ percent increase or a 5 percent increase for the steel workers, do not include these other benefits for which we charge our Federal employees. Our employees have to take pay deductions for them. Our employees pay for those benefits.

Let us consider the take-home pay. The take-home pay will be 50 cents a day.

Under the 6-percent increase provision, we would have the magnificent increase, in this same grade, for the old-time letter carrier, who has worked all his life, of $268.50 a year. That is $22.37 a month.

After we deduct approximately $19.17, which the employees would have to pay back to the Federal Government in income taxes, retirement, and for the health program, what would the employee receive? He would receive $4.70 per month net take-home pay, to take to his wife, so that she could buy a new dress, perhaps. Perhaps she could buy the baby a pair of shoes. That is $4.70 per month, $1.20 per week, or less than 20 cents per day.

Mr. President, I am concerned about the cost of Government, but I do not believe that a Government which can spend money for outer space exploration, which can spend money for research and development, and which can spend money to build great new buildings—we are going to build downtown some four or five buildings, in the General Services Administration program—ought to wring the money out of the lowest salaried people who work, who can look only to the Congress for a pay wage adjustment.

Mr. President, I hope the amendment will be defeated.

Mr. CLARK. Mr. President, will the Senator yield to me? Does the Senator have additional time?

Mr. MONRONEY. If the Senator from South Carolina will yield me 2 minutes, I shall be happy to yield to the Senator from Pennsylvania.

Mr. JOHNSTON of South Carolina. I yield 2 minutes to the Senator from Oklahoma.

The PRESIDING OFFICER. The Senator from Oklahoma is recognized for 2 additional minutes.

Mr. CLARK. Mr. President, is it not the view of the Senator from Oklahoma that the cost of Government would increase very substantially if the ability and efficiency of Government employees were to decline?

Mr. MONRONEY. I am certain that would be true. If these people are held submerged beneath a decent standard of living, if their families are broken up, if there are foreclosures and garnish-

ments and the loss of homes, because of an inability to meet repair bills and other costs, I would say that we would see a general collapse of the great cadre of people who keep Government afloat. On the floor of the Senate we say this is the greatest Government and the best administered Government under a civil service system on the face of the globe.

Mr. CLARK. Is it not clear to my friend from Oklahoma that private industry is in constant competition with Government employees for the brains and ability of America as they come from our schools and universities?

Mr. MONRONEY. The Senator is absolutely correct.

Mr. CLARK. Is it not clear to my friend from Oklahoma that, unless we keep the salary and wage standard of our Government employees at least reasonably competitive with that of private industry, it is a certainty that the Government service will lose a very large proportion of its capable and able employees?

Mr. MONRONEY. The Senator is absolutely correct. We are losing an alarming number of people, as is pointed out in the report of the committee which is before us.

1. The Government is losing an alarming number of career engineers, scientists, and professional personnel to private industry because of an unfavorable competitive position with respect to compensation.

2. The most highly skilled are leaving the service and replacements are below the quality needed to maintain the standard of service desired.

The situation is worse in the skilled fields. It now amounts to almost a continual revolving personnel in the lower grades of the Post Office Department. Postmasters whom I know tell me they cannot possibly fill those jobs with competent people at present wages because every other employer in town can outbid them in salary.

Mr. CLARK. Does my friend not feel that the bill now before us makes only a modest effort to achieve that kind of parity for Government employees which the Senator has agreed is essential to the future welfare and well-being of employees in the Government service?

Mr. MONRONEY. I would say not quite parity. As in the farm program, I would say it is somewhere between 65 and 80 percent of parity as compared with other wages.

Mr. CLARK. I thank my friend for his answers.

Mr. JOHNSTON of South Carolina. Mr. President, I yield to myself 5 minutes.

Something has been said in regard to the hearings on the bill. The fact is that during the hearings on the bill most of the witnesses who testified were officers and employees of the Government. Over half of the testimony presented at the time was given by officers and employees of the Government. A good many of them were from the Post Office Department.

The committee reached the conclusion from all the facts presented that a 7½-percent increase was the lowest we could give to Government workers and do justice to them at all. We found it to be true that the 800,000 blue-collar workers who worked for the Government at the time received a far greater increase in pay from the Government of the United States than did workers covered under the bill. Those facts were brought out before the committee at our hearings.

I call the attention of the Senate to another fact that we sometimes forget. The revenue of the Government will be increased if the bill is passed. If we give increases in pay to Government workers which will approximate $700 million, we will find that at least $150 million of that amount will never leave the Treasury of the Government, but will be retained from the pay of the workers as a withholding tax.

Therefore the Government workers themselves in reality will receive only about 6 percent increase in pay from the Government after income taxes alone are deducted. That does not take into account increases in deductions for retirement and other funds which would be made. I ask the Senate not to forget that fact. Employees would receive only 6 percent net, which is what the Senator from Kansas proposes.

I noticed that the Senator from Kansas said in his speech that we propose to give the Government employees 7½ percent, and then we give them 1 percent here and there. I do not know why he stopped there. I do not know why he did not propose to give them the other 1½ percent, which I think is what they are really entitled to in equity. That is what the committee did, and as I remember, the committee report was unanimously agreed to.

The Senator from Kansas reserved the right to offer amendments in the Senate at the time the bill was reported. The members of the committee, having conducted hearings and discussed the subject, believe that Government workers are entitled to a 7½-percent increase and the three other small increases which are contained in the bill, and to which I have already called attention.

Mr. CARLSON. Mr. President, may I inquire how much time I have remaining?

The PRESIDING OFFICER. The Senator from Kansas has 15 minutes remaining.

Mr. CARLSON. I yield 4 minutes to the Senator from New York.

The PRESIDING OFFICER. The Senator from New York is recognized.

Mr. JAVITS. Mr. President, I share with the distinguished occupant of the Chair [Mr. KEATING] representation of a State which in the Post Office service has an enormous representation of the number of employees affected. We have in the New York Post Office alone 35,000 employees. Everyone knows that there has been a great amount of interest expressed by postal employees in the proposed increase in their compensation.

I think there is one point that must be emphasized as we consider the amendment and as we consider the bill, and that is that I believe postal employees will feel that they have by no means attained the result which they have been seeking. I think we will be fortunate if we give them the 7½ percent if they feel that this is even a small measure of justice.

I have attended a great many meetings of postal employees, and I have talked not only with the bread winners of the families, but with their wives, who have to make ends meet, and I have talked with many postal employees who must hold down two jobs in order to make a living, or have their wives work, notwithstanding that they do a full day's work, for which they ought to earn enough to support a family. It is a matter of disgrace for an official of the United States to have to face this kind of justifiable criticism on the part of employees.

Let us never forget that if the postal employee is to receive any kind of economic justice, we must give it to him. He has no other remedy. He does not have the privilege of economic bargaining. He cannot get another job unless he wishes to leave the service and relinquish years of investment in his own future security. He has no opportunity to go into business for himself. Only we can give him justice.

The ultimate verity in respect of whether a 7½-percent increase is the very minimum that we possibly can give is found in a comparison of the rates of compensation between the employees who are included in the bill and those engaged in similar endeavors in the private economic system, and also between the employees included in the bill and those engaged in public work, such as policemen, firemen, and other employees in municipalities and in States.

When we make such comparisons we find that even after we give Government employees the proposed increase, they will still be under par.

For some reason or other it is disadvantageous to work for the Federal Government in terms of compensation. For that reason the argument that in order to retain an effective work force we must meet economic competition is an extremely sound one.

Finally, all of us are deeply concerned about international tensions, and we realize the tremendous responsibility which is vested in our Government employees to maintain at the highest peak of efficiency our Government machinery today in the face of international tensions.

There is great dissatisfaction especially in the postal service, a dissatisfaction which we will not satisfy completely by what we propose to do here, but which will make considerable progress toward meeting that dissatisfaction.

Finally, we are urged to keep within the budget in terms of the surplus which we expect to attain. I feel as keenly about that as any other Senator. What we have to remember, though, is the great American tradition which we enforce on corporations, just as we should enforce it on Government itself, and that is, that we do not take it out of the backs of our employees. I would like to repeat that, because this is an

important point. We do not take that kind of economy out of the backs of our employees.

Every legitimate survey which we have had made shows that the United States is able to pay its bills and is able to carry out its responsibilities. Where we must deal with this question of the budget and the savings, we must make certain that we do not take it out of the backs of our employees. If we can find no other way, we will have to consider the continuation of certain taxes. It seems to me we must face that issue squarely and honestly. If we must do everything we are doing and must spend all that we are spending in every way which is now encompassed in the budget, rather than taking the necessary savings out of the back of our employees, who are solely dependent upon us for economic justice, we must deal with it in our tax bill and continue taxes which we might otherwise not wish to continue, in order to see that the United States does this measure of justice to the people who make it what it is.

Mr. DIRKSEN. Mr. President, I suggest the absence of a quorum, and I suggest that we let it run sufficiently long so that all Senators may be notified, and that the time be charged to both sides.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the order for the quorum call be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE BOMBARDMENT OF THE CHINESE OFFSHORE ISLANDS

Mr. JOHNSON of Texas. Mr. President, the news ticker brings us the information that the Chinese Communists have opened fire on Nationalist-held offshore islands to protest against President Eisenhower's visit to Formosa tomorrow.

According to the report, the Communist news agency boasted that the gunners shouted anti-American slogans as they opened fire. The bombardment was described as a "furious rain of shells" on the Quemoy Islands.

Mr. President, this is another step in the massive effort by the Communists to humiliate the United States and to seal off as many people as possible from contact with freedom. There is not even the slightest effort to conceal Communist aims.

This demonstrates the wisdom of the Senate in strengthening the defense bill that was before us yesterday. It is evident that the Communists will use force in any area where they believe there is not sufficient counterforce to block their aggression. The free world can exist only to the extent that it can defend itself or has a capacity for retaliation.

I think we must demonstrate similar foresightedness in our efforts to reach the uncommitted people of the world. Where the Communists ask them to respond to brute strength, we must appeal to the desire for dignity, freedom, and a degree of security.

Mr. President, I ask unanimous consent that there be printed in the RECORD as a part of my remarks the item from the United Press ticker concerning the bombardment of the offshore islands.

There being no objection, the news report was ordered to be printed in the RECORD, as follows:

TOKYO.—Red China announced that "thousands of guns" on its Funkien Province coast began shelling the Nationalist-held offshore islands tonight in an angry demonstration against President Eisenhower's visit to Formosa tomorrow.

"Thousands of guns roared the instant the order was issued and innumerable flashes cut through the dark sky over the Taiwan (Formosa) straits," the official Communist New China News Agency said in a broadcast heard in Tokyo.

The Communist news agency said the gunners shouted anti-American slogans as they opened fire. They shouted such things, it said, as "Eisenhower go back—fire"; "U.S. aggressors get out of Japan—fire"; and "Get out of Asia—fire."

The broadcast said that a "furious rain of shells poured down on the Quemoy Islands."

Radio Peiping and NCNA said the bombardment began at 8 p.m. Mainland China time (8 a.m. edt). The news agency said "the powerful shelling in demonstration against the United States" was "still continuing," but did not give any indication at what time the bombardment would stop.

The agency said the soldiers who manned the guns and "civilians at the Fukien front" held "meetings and forums" earlier in the day to protest the "plotting of new wars in Asia and (the) hostile attitude of the United States to the Chinese people."

"The Chinese people opposed the coming to Taiwan of warmonger Eisenhower and * * * would resolutely persist in the struggle as long as the U.S. aggressors remain in Taiwan."

Mr. JOHNSON of Texas. I plead with my colleagues in Congress and with freedom-loving people everywhere to keep their powder dry and to close ranks.

ADJUSTMENT OF COMPENSATION OF CERTAIN FEDERAL OFFICERS AND EMPLOYEES

The Senate resumed the consideration of the bill (H.R. 9883) to adjust the rates of basic compensation of certain officers and employees of the Federal Government, and for other purposes.

Mr. DIRKSEN. Mr. President, the distinguished Senator from Kansas would like to have a yea-and-nay vote on his amendment. I therefore ask for the yeas and nays.

The yeas and nays were ordered.

Mr. CARLSON. Mr. President, I yield myself 2 minutes. Then I shall be ready to vote.

I offered my amendment to the bill (H.R. 9883), reducing the amount from 7½ percent to 6 percent, across the board. I do that for this reason. I do not know of any Senator who can sincerely state that he believes a 7½-percent pay increase bill will become law. I would be less than frank if I did not state also that I am not sure that a 6-percent bill will become law. However, I feel it has a much better chance of becoming law than has a 7½-percent bill. Not only that, but it shows that I am sincerely trying to do something for the Federal workers. I want them to get a pay raise. I do not want to try to get something for them that I know cannot become law. It is for that reason that I offered my amendment calling for a 6-percent increase. The bill is not in the form in which I would have drawn it, but it is the best we can do at this moment. I urge the Senate to adopt my amendment.

Mr. JOHNSTON of South Carolina. Mr. President, I yield myself 3 minutes. I am opposed to the amendment. I believe that even a 7½-percent increase is not a sufficient amount to balance the workers who are included in the bill with other employees of the United States subject to the wage board system. I feel that if the amendment shall be adopted it will mean the death of any such legislation at this session of Congress. My reason for making that statement is that we have tried to work and get together with the House in connection with a bill calling for a 7½-percent increase. The House reduced its amount from 9 percent to 7½ percent after it had reported the bill from committee. Therefore we have a bill before us that we can get to the President's desk in time for him either to sign or not while Congress is still in session. If we add amendments to the bill, and if we adjourn on the day when I think we will adjourn, no pay raise bill will be passed by the House and Senate in time to put it on the President's desk in time to keep him from pocket-vetoing it.

Mr. JOHNSON of Texas. Mr. President, will the Senator yield?

Mr. JOHNSTON of South Carolina. I yield.

Mr. JOHNSON of Texas. We have been talking here since January about a 10-percent raise, a 9-percent raise, and finally a 7½-percent increase. Leaders of our Government participated in and contributed toward working out a settlement involving the steelworkers. I do not begrudge anyone an increase to which he is entitled.

However, I think we should bear in mind that 75 percent of the postal workers make less than $3,800 a year. After 25 percent of their pay has been deducted for income tax and insurance, most of the families of the postal workers are trying to exist on less than $300 a month.

I am convinced, after observing the action in the House, where a bill providing for a 9-percent increase was reported, but as to which the employees' groups willingly accepted 7½ percent, that if the Senate begins to amend and change the bill now so as to make the amount 8 percent or 6 percent, or any other figure, all we will do will be to kill the bill. I think a vote for the 6-percent amendment is a vote to kill the bill. It is a vote against any pay-increase legislation. So far as I am concerned, I do not want that blood on my hands. I shall support the committee bill.

Mr. JOHNSTON of South Carolina. Mr. President, I agree with the majority leader. If it is desired to kill the bill, then the amendment of the Senator from Kansas should be agreed to.

Mr. LAUSCHE. Mr. President, will the Senator from South Carolina yield?

Mr. JOHNSTON of South Carolina. I yield.

The PRESIDING OFFICER. How much time does the Senator from South Carolina yield to the Senator from Ohio?

Mr. JOHNSTON of South Carolina. I yield 1 minute.

Mr. LAUSCHE. Does the bill apply to the members of my staff?

Mr. JOHNSTON of South Carolina. It applies on a permissive basis to the members of the Senator's staff. The Senator can increase the salaries of the members of his staff or not as he desires.

Mr. JOHNSON of Texas. There is nothing mandatory about that, as I understand it. We proceed on the assumption that the members of our own staffs are as patriotic and competent and are as much entitled to consideration as the members of any other Senator's staff. However, there is no provision in the bill which requires any Senator who believes his staff is not entitled to an increase to give it to them.

Each year, I turn back funds allotted to the various committees over which I preside and allotted to my own office, when I feel that the money is not needed. Each Senator can be his own judge. The bill merely provides for an increase for all employees.

Someone raised a question with me a while ago about administrative assistants. I inquired into the matter and found that in the Senate there are 100 administrative assistants. Fifty-four of them are not paid what is authorized to be paid now, because the judgment of the Senators is that they should not be paid more than they now receive. Only 46 are paid the amount which is authorized.

There is nothing in the bill which requires that those 46 be paid the 7½-percent increase. But if they were so paid, it would mean for 46 persons an amount of less than $50,000 out of the $7 million.

Mr. LAUSCHE. Mr. President, may I have 1 more minute, to clarify my position?

Mr. JOHNSON of Texas. I yield 1 minute to the Senator from Ohio.

Mr. LAUSCHE. I do not want my question to imply that I feel the pay increase should be mandatorily applicable to the members of my staff. On the basis of the salaries which are paid to employees in private industry in Ohio, the salaries which I pay are grossly disproportionate. They are so high that I frequently feel I am not fair to the taxpayers. The salaries which I pay are paid on the basis of comparison with those which other Senators pay.

Mr. JOHNSON of Texas. I do not want to have the responsibility for the salaries which the Senator from Ohio pays the members of his staff. If he is paying too much, he should reduce the salaries. He is the sole judge of the salaries he pays to the members of his own staff. He may pay them what he wishes to pay. There is nothing in the law which requires him to pay anyone anything.

Mr. LAUSCHE. I do not want the Senator from Texas to escape the reality that the salaries I pay must inevitably be fixed on the basis of the salaries which other Senators pay.

The PRESIDING OFFICER. The time of the Senator from Ohio has expired.

Mr. CARLSON. Mr. President, I yield back the remainder of my time.

Mr. JOHNSON of Texas. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Kansas. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. MANSFIELD. I announce that the Senator from Colorado [Mr. CARROLL], the Senator from Hawaii [Mr. LONG], the Senator from Georgia [Mr. RUSSELL], the Senator from Mississippi [Mr. STENNIS], and the Senator from Texas [Mr. YARBOROUGH] are absent on official business.

I also announce that the Senator from Missouri [Mr. HENNINGS], and the Senator from Arkansas [Mr. FULBRIGHT] are absent because of illness.

I further announce that the Senator from Tennessee [Mr. KEFAUVER], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Michigan [Mr. MCNAMARA], the Senator from Oregon [Mr. MORSE], and the Senator from Wyoming [Mr. O'MAHONEY] are necessarily absent.

I further announce that, if present and voting, the Senator from Colorado [Mr. CARROLL], the Senator from Arkansas [Mr. FULBRIGHT], the Senator from Missouri [Mr. HENNINGS], the Senator from Tennessee [Mr. KEFAUVER], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Hawaii [Mr. LONG], the Senator from Michigan [Mr. MCNAMARA], the Senator from Oregon [Mr. MORSE], the Senator from Mississippi [Mr. STENNIS], the Senator from Texas [Mr. YARBOROUGH] would each vote "nay."

Mr. KUCHEL. I announce that the Senator from Maryland [Mr. BUTLER] is absent because of illness.

The Senator from Indiana [Mr. CAPEHART] is absent by leave of the Senate.

The Senator from New Hampshire [Mr. COTTON] and the Senator from Nebraska [Mr. HRUSKA] are necessarily absent.

The Senator from South Dakota [Mr. MUNDT] and the Senator from Kansas [Mr. SCHOEPPEL] are absent on official business.

On this vote, the Senator from Nebraska [Mr. HRUSKA] is paired with the Senator from Kansas [Mr. SCHOEPPEL]. If present and voting, the Senator from Nebraska would vote "nay," and the Senator from Kansas would vote "yea."

The result was announced—yeas 28, nays 54, as follows:

[No. 223]

YEAS—28

Allott	Curtis	Morton

Hennings	Morse	Yarborough

So Mr. CARLSON'S amendment was rejected.

Mr. JOHNSON of Texas. Mr. President, I move that the vote by which the amendment was rejected be reconsidered.

Mr. JOHNSTON of South Carolina. Mr. President, I move to lay on the table the motion to reconsider.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the motion to reconsider.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment.

Mr. ELLENDER. Mr. President, I submit an amendment which I send to the desk, and ask to have stated.

The PRESIDING OFFICER. The amendment will be stated.

The LEGISLATIVE CLERK. Beginning on page 17, in line 11, it is proposed to strike out all through line 6, on page 20.

Mr. MANSFIELD. Mr. President, may the amendment be read again?

The PRESIDING OFFICER. Without objection, the amendment will be read again.

The LEGISLATIVE CLERK. Beginning on page 17, in line 11, it is proposed to strike out all through line 6, on page 20, being the section entitled "Employees in the Legislative Branch."

Mr. ELLENDER. Mr. President——

The PRESIDING OFFICER. How much time does the Senator from Louisiana yield to himself?

Mr. ELLENDER. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Louisiana will state it.

Mr. ELLENDER. How much time is available to me?

The PRESIDING OFFICER. Thirty minutes.

Mr. ELLENDER. I yield myself 10 minutes, Mr. President.

The PRESIDING OFFICER. The Senator from Louisiana is recognized for 10 minutes.

Mr. ELLENDER. Mr. President, I am taken by surprise, by having this bill come up so suddenly. I was very busy yesterday afternoon, as well as today, in hearings on the mutual security program.

Mr. President, I wish to say I am all for a fair wage increase for Federal employees. In the last vote, I voted to sustain the committee in maintaining a 7½-percent increase.

The purpose of my amendment is to strike from the bill the provision authorizing pay increases for all employees connected with the legislative branch of our Government. It has been our custom in the past to fix salaries for our employees, independently of any hard and fast wage scale; we have a method of our own for handling salaries of legislative employees.

I wish to point out that when the House first considered pay legislation, the original House committee bill contained a provision which would have increased the salaries of Senate administrative assistants from $16,300 to almost $19,000 per year. That provision, of course, was deleted, so that those employees are in about the same category as employees in the Civil Service and the Postal Department, that is, they would receive an across-the-board 7.5-percent raise.

It is my belief that, since we have a method of our own for fixing salaries in the Senate we should not burden this bill with raises for legislative employees. That matter should be handled separately.

As I have already stated, the purpose of this amendment is to delete from the bill those sections extending the 7.5-percent pay raise to employees of the legislative branch. In this connection, Mr. President, I believe a little background might be in order.

Under existing law, Senators can pay one employee up to $16,300 per year, a second up to $15,731 per year, and a third employee up to $15,044 per year, with a maximum limitation as to all other employees of $10,221 per year, with the actual number of such employees being so compensated subject only to the overall limitation of salary funds available to individual Senators.

The total clerk hire figure available to Senators is dependent, of course, upon the populations of the respective States.

Now, it goes without saying, Mr. President, that these are far from starvation-level salaries. As a matter of fact, the salaries I have indicated are, as I believe Senators will agree, relatively handsome amounts of money.

Yet, as I pointed out earlier, in the original version of H.R. 9883, the so-called 9-percent pay increase bill, quite a few little gadgets were inserted to further increase the salaries of legislative employees. The bill, at first reading, would have apparently only accorded a flat 9-percent increase to employees in Senator's offices, and employees of Senate committees. The top bracket limitation was raised from $16,300 per year to $17,525 per year. However, in a subsequent subsection of the same section of the bill, the basic salary limitation for the top three employees in Senators' offices and committee staffs would have been geared to the three highest brackets of the classified schedule. In other words, by so doing, an increase in compensation for the three top brackets of the classified figure would have, of and by itself, raised the maximum amount which Senators could pay to their three top office staff employees, and other top employees of committees. In effect, the limitation would have increased from $16,300 per year for the administrative assistant, to $18,964 per year; for the second ranking employee, the maximum would have been fixed at $17,788 per year, compared with $15,731 per year under existing law. A third employee could have been paid up to $16,505 per year, compared with $15,044 per year under existing law. The maximum pay level for employees in Senators' offices, other than the top three, salary would have been raised to $11,141 per year, as opposed to $10,221, under existing law.

Furthermore, as indicated earlier, any increase in the upper limits of the three highest existing civil service classifications would have been automatically fixed as the maximums for employees of Senators and employees of Senate committees. In addition, should any new grades have been added to the Classification Act, these new limitations would have become the maximum, since the bill states that the maximum salaries of Senate employees in these categories would have been equal to the maximum established for the three highest grades under the classification schedule.

I hasten to add, of course, that no Senator would have been required to pass these increases on to his staff members, but the fact is, that for all practical purposes, the original bill would have considerably lessened the Senators' control over maximum salaries which Senators could pay to their office employees, and employees of Senate committees.

Mr. JOHNSTON of South Carolina. Mr. President, for the information of the Senator, I agree thoroughly with what he has been saying. The House bill has been amended, and the bill before the Senate at the present time gives each Senator the right to regulate all salaries within his office.

Mr. ELLENDER. I am pleased to note that these sections have been removed from the pending bill, and that the measure as it is now written merely extends a flat 7.5-percent increase in the maximum compensation which could be paid to employees in Senators' offices and employees of Senate committees, but the fact still remains that the new limitations so provided are amazingly high. Administrative assistants, for example, could receive up to $17,525 per year, compared with $16,300 per year, the present maximum. One other employee could be compensated up to $16,911, as compared with $15,731 per year under existing law. A third employee could receive as much as $16,733 per year, as compared with the maximum presently available for such third employee of $15,044 per year.

It is now proposed to so legislate that every Senator will almost be compelled to increase by 7½ percent the salary of an administrative assistant who is now getting $16,300, as well as salaries of other employees in his office.

Let me be perfectly frank. I believe the amount that is now being paid to employees in the legislative branch is ample for their needs.

Mr. JOHNSTON of South Carolina. Mr. President——

Mr. ELLENDER. I am on limited time.

Mr. JOHNSTON of South Carolina. I will take it out of my time if necessary.

Mr. ELLENDER. Very well.

Mr. JOHNSTON of South Carolina. I should like to point out that at the present time only 46 percent of the Senators pay the maximum. In the future, if the Senator wanted to keep down the payments, he could do so. Any Senator could do so. However, 54 percent of the Senators are paying the maximum. Some of them may want to increase it; some may not. That is exactly what the bill provides a Senator can do.

Mr. ELLENDER. It is my belief that if we follow that policy and provide a 7½-percent increase, it ought to be made obligatory.

The point I wish to make is that we have a method for fixing salaries of our employees which is peculiar to the Senate and to the House of Representatives. We can give increases in such manner as we determine, within broad limits, of course.

Mr. President, I ask unanimous consent to have printed in the RECORD at this point a document headed "Salary Tables, U.S. Senate." This document illustrates the broad flexibility available to Senators in fixing salaries of their employees, utilizing the basic salary amounts available to each. This table shows, for instance, that by designating a basic salary of $4,500, a Senator can give to an employee in his office a gross salary of $9,134.05. The difference is paid by the Government. In any event, this schedule demonstrates the latitude available to Senators in fixing salaries of their employees, and fortifies my position to the effect that legislative employees' salaries should not be dealt with in general Federal pay legislation.

There being no objection, the document referred to was ordered to be printed in the RECORD, as follows:

Salary tables, U.S. Senate, effective July 1, 1958

(Retroactive to Jan. 1, 1958)

Basic per annum:	*Gross per annum*
$60	$887.40

[1] Committee use only.

Mr. ELLENDER. What is proposed would make it possible for an employee of the Senate to get a salary increase of 7½ percent when most are already getting ample salaries. That is why I am opposed to it.

Since the primary purpose of this bill is to help postal and civil service employees in the low pay brackets, it is my belief we should confine the provisions of the bill to them.

I know, of my own knowledge, that many postal employees are paid just about what a janitor gets around here, and that is very small remuneration. I am for a bill that will give to the lower paid employees fair additional compensation.

Mr. BRIDGES. Mr. President, will the Senator yield?

Mr. ELLENDER. Personally, I have doubts as to whether anyone will get a pay raise if all these additional emoluments are made available.

Mr. BRIDGES. Mr. President, will the Senator yield?

Mr. ELLENDER. I yield.

Mr. BRIDGES. I point out that the same argument which the Senator has used with relation to pay increases in the higher pay brackets in the legislative branch would be multiplied a thousand times when related to classified employees and postal employees, because a great many of those employees are in those high classifications. To be consistent, the Senator ought to apply his proposal to the lower grades of all Federal employees.

Mr. ELLENDER. Mr. President, I am glad to inform the Senator that I shall offer an amendment to make the pay increase applicable only to employees whose salaries are not over $10,000 per year.

Mr. LAUSCHE. Mr. President, will the Senator yield?

Mr. ELLENDER. I yield to the Senator from Ohio.

Mr. President, I yield myself such time as is required.

Mr. LAUSCHE. The statement has been made that the increase for the $16,300-a-year employee will not apply unless the Senator determines it shall be applied. I wonder if the Senator from Louisiana understands that under the provisions of the bill affirmative action on the part of the Senator is required, and that the Senator must notify the disbursing officer he does not want the increase applied to a particular employee.

Mr. JOHNSTON of South Carolina. No; that is a mistake.

Mr. ELLENDER. The Senator must take some action.

Mr. LAUSCHE. Let us get this clear. Does the Senator have to take some action?

Mr. ELLENDER. The Senator must, yes.

Mr. LAUSCHE. If the Senator must take some action, this language is intended to "put him on the spot."

Mr. ELLENDER. That is correct.

Mr. LAUSCHE. How can I tell my employee, "I refuse to give you the 7½-percent increase"? It is blackmail, defying me to deny the increase. With the condition the country is in pecuniarily today, I do not believe we ought to increase the salaries of these $16,300-a-year employees by 7½ percent. There must be motives other than a desire to deal fairly with these employees.

If I increase the salary of my assistant by $1,050 a year and the Senator's assistant finds out about it, and the Senator tells him, "You cannot have it," what position will the Senator from Louisiana then be in?

Mr. ELLENDER. I would not like to describe it. [Laughter.]

Mr. LAUSCHE. Yes. This is nothing more than "putting the bee" on us.

Mr. JOHNSON of Texas. Mr. President, will the Senator yield?

Mr. ELLENDER. I yield.

Mr. JOHNSON of Texas. Does the Senator pay his administrative assistant the maximum salary now?

Mr. ELLENDER. Yes.

Mr. JOHNSON of Texas. I understand that 56 assistants are not paid the maximum salary now, and 44 are. That is a matter within the discretion of each Senator. Who is better able to determine what a Senator's employee is worth than the Senator himself?

Mr. ELLENDER. Mr. President, it is not a question of worth at all. My administrative assistant is seated next to me. He is second to none in the Senate. He worked for me for quite a few years before I assigned him the position of administrative assistant. Only a few years ago I elevated him to that position.

Mr. JOHNSON of Texas. I am not questioning that statement.

Mr. ELLENDER. I understand. The point is that there should be some kind of uniformity imposed here. We have a method under which we can proceed, which is peculiar to the Senate and to the House of Representatives

Mr. JOHNSON of Texas. That is not changed in the slightest.

Mr. ELLENDER. Yes, it is.

Mr. JOHNSON of Texas. It is not.

Mr. ELLENDER. It is, as the Senator from Ohio pointed out.

Mr. JOHNSON of Texas. How did the Senator from Ohio point it out?

Mr. LAUSCHE. Let us find out.

Mr. ELLENDER. We are asked to make it possible to change.

Mr. LAUSCHE. It is an automatic increase, unless the Senator goes to the disbursing officer.

Mr. JOHNSTON of South Carolina. No.

Mr. ELLENDER. Action must be taken by the Senator.

Mr. LAUSCHE. Action must be taken?

Mr. ELLENDER. Yes.

Mr. LAUSCHE. Where does it so provide in the bill? Let us find out.

The PRESIDING OFFICER. The Senator from Louisiana has the floor. Does the Senator from Louisiana yield; and, if so, to whom?

Mr. ELLENDER. Mr. President, I suggest that the distinguished Senator from South Carolina [Mr. JOHNSTON] clear up the matter. He is chairman of the Committee on Post Office and Civil Service. In the meantime, Mr. President, I repeat that we have our own method of dealing with our employees. If a Senator is desirous of increasing the salary of any of his employees, he can do so under the rules and regulations set out for the Senate, up to $16,300 per year, for one employee. Certainly, this is ample salary. Why make it possible to add another 7½ percent to each employee's salary?

Mr. LONG of Louisiana. Mr. President, will the Senator yield?

Mr. ELLENDER. The pay of the legislative employees is sufficient that we should not at this time increase their salaries.

Mr. LAUSCHE. Mr. President, will the Senator yield?

Mr. ELLENDER. I yield for a question.

Mr. LAUSCHE. I am sorry I voted against the general franking privilege, which would have permitted a Senator to send unaddressed letters, so that to each citizen of the United States could go a letter that our staff employees are paid $16,300 a year now and, under the pretense of helping the underpaid postal workers, we are giving these employees a 7½ percent pay increase.

Very few of the Senators on the floor, under those conditions, would vote for this proposal. They would then support the proposal of the Senator from Louisiana.

Mr. JOHNSON of Texas. Mr. President, will the Senator yield to me?

Mr. ELLENDER. I yield for a question.

Mr. JOHNSON of Texas. I have conferred with Mr. Brenkworth, who handles legislative matters for the Senate, and who has done so for some time. I think he is a dependable and competent employee.

To those who are having some difficulty understanding the bill, I may say, I am informed this is language identical to that carried in other acts.

I ask Senators to turn to section 117(a) of the bill.

Section 117(a) provides, in effect, that every employee in the Senate shall receive a 7½-percent pay increase. That is clear. It refers to the Parliamentarian. It refers to the reading clerk. It refers to the Sergeant at Arms.

The next paragraph, paragraph (b), takes care of any individual Senator who does not feel his employees should have the 7½-percent pay increases. A good many Senators so feel.

It is provided that the increase is taken away from the employees in the Senator's office. That is provided in paragraph (b). We do not provide for a raise for the Senator's office unless the Senator "in the case of any employee on or before the 15th day following the date of enactment of this Act notifies the Disbursing Office of the Senate" that he wishes the employee to have the pay increase.

Mr. LAUSCHE. Mr. President, that confirms exactly what I said. The Senator must take this action.

Mr. JOHNSON of Texas. I am not talking about what the Senator said. I am trying to explain what is in the bill. The Senator can interpret the provision as he wishes. That is the language we have had in other bills.

It seems to me reasonable, if we are going to raise the salaries of all the employees in the Government service by 7½ percent, that we should have such a provision. There is no reason why a Senator should not have individual authority to extend the pay increase to some employee in his office. This is simply the same right which is being extended to the postal employees and the other Federal employees.

If we do not have such a provision, we will find that our employees will leave us to take the other jobs.

The only explanation I can think of is that perhaps the Senator is willing to admit the employees are overpaid now. I am not going to say what is the Senator's opinion.

Mr. President, the only point I make is that this is the same as the language which was in the 1955 act and in the 1958 act. That is point No. 1.

Point No. 2 is that we are raising the salaries of postal employees and of all Federal employees. We are raising salaries of some 2.4 million people. We are saying, "We are going to give you a 7½-percent pay increase."

The steelworkers got a pay increase. Other people got pay increases.

In the next paragraph we have provided that no Senate employee in a Senator's office will receive the pay increase unless the Senator wants the employee to receive it. We leave it up to the Senator's judgment. We leave it up to the Senator's management. I trust the management of the individual Senator and the judgment of the individual Senator, even though sometimes I do not agree with them.

Mr. ELLENDER. Mr. President, I have the floor.

Mr. PASTORE. The Senator from Texas has the floor.

Mr. JOHNSON of Texas. I yield to the Senator from Rhode Island.

Mr. PASTORE. If we do not approve an increase for legislative employees now, we will have to pass at another time in this session, a special act to do so, anyway. So what difference does it make how we do it?

Mr. ELLENDER. I say to the Senator from Rhode Island that we do not have to do either.

Mr. PASTORE. Does the Senator from Louisiana mean that he proposes to raise the pay of all Federal employees and not raise the pay of legislative employees? Why does he seek to discriminate?

Mr. ELLENDER. If the salaries of postal employees were equal to the present salaries of legislative employees, this bill would not be before us.

Mr. PASTORE. I consider my assistants as well qualified as are the assistants of the President of the United States.

Mr. JOHNSON of Texas. I have a great admiration for the postal employees. I think they are wonderful people. I have respect for postal employees. But I do not yield to anyone with respect to the devotion and service of my own employees, and I am not willing to say that I will approve increases in pay for the employees of everyone else except those in my own office.

Mr. PASTORE. Mr. President, will the Senator yield?

Mr. JOHNSON of Texas. I yield.

Mr. PASTORE. I could not agree more with the Senator from Texas.

The PRESIDING OFFICER. The Senator from Louisiana has control of time.

Mr. ELLENDER. As I sought to point out a while ago, I do not know who put the proposals before the House, but an effort was made to increase the salaries of administrative assistants from $16,300 to $18,964; even if this bill should pass, those salaries will be increased from $16,300 to $17,525.

I wonder how many Senators would vote for an increase of their own salaries at this time? It is my belief that the employees of the legislative branch are well paid. We have a method of our own to increase their salaries if we see that it is necessary. I do not wish to do something today that may result in a denial of an increase to those who are en-

titled to it, because I feel confident that if provisions for increases for legislative employees remain in the bill, and if we otherwise make the increase apply to many employees of the Government who are now receiving sufficiently large salaries, we may deny pay increases to those who are really entitled to them.

Mr. President, how much time have I left?

The PRESIDING OFFICER. The Senator from Louisiana has 10 minutes remaining.

Mr. ELLENDER. I shall listen to what my friend from South Carolina has to say.

Mr. JOHNSTON of South Carolina. Mr. President, I yield myself 3 minutes.

To clarify the discussion concerning the particular provision of the bill before the Senate, I should like to say that it is not a new provision. It has been contained in every such pay increase bill upon which the Senate has acted. The bill provides for a 7½ percent increase for legislative employees, which is exactly the same increase the bill gives other employees of the Government. However, in the case of employees in the office of a Senator, the increase is not automatic. The bill follows a practice established in previous pay increase bills of leaving it up to each individual Senator to determine whether the increase, in whole or in part, is to be given to the various employees in his office.

I say to the Senator from Louisiana [Mr. ELLENDER] that the increase authorized by the bill is not mandatory. A Senator is not compelled by its terms to give a penny increase to the employees of his office if he does not wish to do so.

The same is true with respect to committee employees. The salaries of such employees are completely within the control of the chairman of the committee. If for any reason he does not wish the committee employee to receive the increase provided in the bill, all he needs to do is rearrange the base pay of the employee so that he will receive the same amount in the future as he is currently receiving.

Mr. PASTORE. Mr. President, will the Senator yield for a question?

Mr. JOHNSTON of South Carolina. I yield.

Mr. PASTORE. Has it not been the practice of both the Senate and the House, every time a pay raise is granted to Post Office employees and to civil service employees, to grant an increase in salary to legislative employees as well? It is done at the same time, although possibly not in the same bill, but at the same session of Congress.

Mr. JOHNSTON of South Carolina. The Senator is entirely correct. We have always provided for such an increase in every pay bill, giving legislative employees the same amount, though in a lump sum, and leaving it up to the Senator to act according to his wishes.

Mr. PASTORE. Is there any reason that the Senator knows why we should discriminate against faithful, qualified, and talented legislative employees?

Mr. JOHNSTON of South Carolina. There is no reason why we should discriminate against them and in favor of some employee downtown whom we do not know at all.

Mr. JOHNSON of Texas. Mr. President, if there is to be any discrimination, it ought to be the other way. The Senate remained in session until 12 o'clock last night. I left the Capitol after midnight. I left men at the desk, I left men at the office, and I left men at the room in the basement. They are back this morning. Never in 30 years of public service have I seen a more dedicated group of public servants than those who serve the legislative branch of the Government. I cannot say, "I recommend an increase in salary for everyone except the folks I have hired. I am ready to give 2,400,000 employees $700 million, but not $50,000 for increases in pay to our own employees."

Mr. President, we have in this country some equity and some justice. The people who work in the Senate, in the House, in the Secretary's office, in the office of the Sergeant at Arms, and in the paymaster's office are not hangers-on. They do not have an 8-hour shift. Sometimes they work as many as 16, 18, and 20 hours. I do not know why we should discriminate against them. We might discriminate for them and give them a little overtime. We might give them some of the time-and-a-half which is talked about, and some of the wage-and-hour benefits. We might make such provisions apply to legislative employees. If we did so, they might get what they are entitled to.

The PRESIDING OFFICER. The time of the Senator from Texas has expired.

Mr. JOHNSON of Texas. I yield myself 3 minutes. Merely because we have people that we can control, hire, and fire, working for us, and we think we might be criticized a little because we had extended to them the same privilege we had given to everybody else, is no reason for us to say, "I will give an increase to postal employees. I will give an increase to the people in the Pentagon. I will raise the salary of everybody else except the people who work in the Senate—the little page boys, the telephone employees, the Secretary, the Librarian, and the rest of the employees."

Mr. PASTORE. Mr. President, will the Senator yield?

Mr. JOHNSON of Texas. I yield.

Mr. PASTORE. I agree with the Senator from Texas, and that is the reason I cannot follow the logic of our distinguished colleague from Louisiana in the position he has taken today. He has indicated that he intends to vote not to cut the proposed 7½-percent increase to 6 percent, for he wants certain people to get the 7½ percent—a position with which I agree. He wants this increase extended to the Post Office employees, with which I agree. He wants it extended to civil service employees, and we agree on that. But when legislative employees are considered, he has said they are not entitled to the increase. I cannot follow that logic.

Mr. JOHNSON of Texas. No Senator is required to permit his assistants to have the increase if he does not want them to have it. He may walk back to his office and say, "I do not think you are entitled to an increase."

Mr. PASTORE. And that Senator would not give it to them.

Mr. JOHNSON of Texas. He might say, "I voted for an increase for everybody else, but I voted in the Senate today that you are not entitled to one. I will not give it to you." Senators have that authority. I do not want any other Senator to tell me how to handle my office and what people I shall hire. Therefore we leave it up to the judgment of the Senators, and I think every Senator could trust his own judgment.

Mr. MONRONEY. As the Senator knows, practically every employee covered in the bill, excepting senatorial and other legislative employees, are on a 40-hour workweek.

Mr. JOHNSON of Texas. That is correct.

Mr. MONRONEY. Does the Senator from Texas know of any office in the Capitol, or the House or in the Senate, which is not virtually on a 50-hour workweek?

Mr. JOHNSON of Texas. No; and I think 50 is the minimum. Here we are talking about 2¼ million people, and except for 5 percent of them, they all get less than $10,000 a year. Yet we would extend the benefits to 435,000 postal employees, 980,000 classified employees, 8,100 Foreign Service employees, 19,000 medical and surgical employees, 15,000 stabilization and conservation agricultural employees, and 5,000 judicial employees, but we would say to legislative employees, "No, no; we will not extend this to you. We are not going to permit any Senator to extend the increase to you. We are not going to give the authority to Senators to extend this increase to salaries of their employees, if they think it is necessary and if they certify it is necessary."

Mr. MONRONEY. Is it not correct to say that the only position of validity that can be established for raising every comparable worker in the Federal Government by 7½ percent, without permitting a Senator to do likewise, to raise his employees to that level, is by presuming or admitting that they are being overpaid by 7½ percent?

Mr. JOHNSON of Texas. That is exactly correct.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. JOHNSON of Texas. I yield myself 3 additional minutes.

Mr. PASTORE. Another fact that we must not forget is that not everyone working for a Senator is an administrative assistant. We have a great many people below that level.

Mr. JOHNSON of Texas. If we take all the increases that could be given according to the bill before us and apply them to all the administrative assistants, all 100 of them, out of the 2,400,000 employees, less than $120,000 out of a total of $700 million would be paid out. This is a red herring. It is nothing more than an attempt calculated to beat the

bill. If we load the bill down with amendments, we will say, "I am in favor of giving a raise to the postal employees and to the classified employees, but not to the legislative employees." If we add such an amendment and it goes to the House and it gets to conference, we will wind up without any bill.

Mr. LONG of Louisiana. Mr. President, will the Senator yield?

Mr. JOHNSON of Texas. I yield.

Mr. LONG of Louisiana. Perhaps it is not popular to raise the pay of someone who is making more than $10,000. I can testify to the fact that I have had two administrative assistants leave me. I believe that they are now making at least twice as much as they could make working for me. It has been my impression that if we have a good administrative assistant he is very much underpaid. My guess is that even a Senator could get more pay, that it would be impossible to hire a Senator for $22,500. At the same time an administrative assistant does not get the recognition that he deserves in his State. Many times an administrative assistant works just as hard and just as long as a Senator, and in some cases I should imagine he performs greater service for his constituents back in his State.

Mr. LAUSCHE. Mr. President, will the Senator yield?

Mr. JOHNSON of Texas. I yield.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. JOHNSON of Texas. I yield myself an additional 3 minutes.

Mr. LAUSCHE. The argument made by the Senators from Oklahoma, Rhode Island, and Texas completely overlook the fact that the Senator from Louisiana [Mr. ELLENDER] has already stated that the increase of 7½ percent, in his opinion, should not be applied to the high salaried officials in the Pentagon or in the offices of Senators.

Mr. JOHNSON of Texas. I understand his viewpoint.

Mr. LAUSCHE. He stated that he proposed to offer an amendment on that subject. I contemplate supporting him on that subsequent amendment.

Mr. JOHNSON of Texas. That is one of the reasons I believe we are second in space to the Soviet Union, and in many other technological fields, because people come up and say, "I won't vote for higher salaries."

Mr. President, we have scientists working for the Government who could get three times their salary in private industry. Does anyone think that Wernher von Braun is not worth more than the salary he works for. He must subsist. He must get along. He does not have a high salary, but his salary is high in terms of $10,000.

The other day we had a request from a department to give them an additional authorization so that the Government will not lose some of the best men it has in the scientific fields.

Mr. PASTORE. Mr. President, will the Senator yield?

Mr. JOHNSON of Texas. I yield.

Mr. PASTORE. In view of the explanation made by the distinguished Senator from Ohio [Mr. LAUSCHE], I want the position of the junior Senator from Rhode Island to be made quite clear on the record. I still disagree in all aspects with the reasoning and logic of the Senator from Ohio and the senior Senator from Louisiana.

Mr. LAUSCHE. Mr. President, will the Senator yield?

Mr. JOHNSON of Texas. I yield.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. JOHNSON of Texas. I yield myself an additional 3 minutes.

Mr. LAUSCHE. There is not a State in the Union that is not concerned about the pirating by the Federal Government of State employees. Ohio employees are in an exodus from the payrolls of Ohio to the payrolls of the Federal Government. May I say——

Mr. JOHNSON of Texas. Mr. President——

Mr. LAUSCHE. May I say——

Mr. JOHNSON of Texas. I yielded to the Senator for a question.

Mr. ELLENDER. I will be happy to yield some time to the Senator from Ohio.

Mr. JOHNSON of Texas. I have the floor.

Mr. LAUSCHE. On the matter of casting a vote in the Senate, to gain a few popular votes, the Senator from Texas made an implication that those who are supporting the Senator from Louisiana are doing it to gain votes. I say to the Senator from Texas that the easy course to follow is to dig deep into the Treasury of the Federal Government and hand out the money. There are many persons in the galleries who have frowns on their faces because some of us oppose this proposal.

Mr. JOHNSON of Texas. I do not know who is in the gallery. I know that some of them who are there sometimes have an appeal and sometimes their interest is calculated to influence. I do not know what the situation is in the Senator's State. I am much more concerned with the pirating that industry is doing of scientific employees of the Federal Government—and of some legislative employees, too—than I am of any pirating that the Federal Government does on the State level. I live in the capital of my State. We are still functioning there. The people are satisfied, so far as I know. We have had no complaints from the Governor or the Attorney General about being called to Washington. We have a good relationship down there. I was down there last week. We get along very well together. As far as I know, there is no problem. I do hear complaints about industry coming in and taking some of our best scientists and our best administrative employees out of the Government.

We are talking about $700 million. Some Senators say, "Let us not do it for the few people who work for the Senate as administrative assistants." That amounts to $100,000 out of $700 million. If we add this amendment to the bill, we will endanger the whole bill. Besides that, I believe we would do an extreme disservice to the country and an extreme injustice to the people.

SEVERAL SENATORS. Vote! Vote!

Mr. JOHNSON of Texas. Mr. President, I yield back the balance of my time.

The PRESIDING OFFICER. Does the Senator from Louisiana yield back the balance of his time?

Mr. ELLENDER. Mr. President, I ask for the yeas and nays on my amendment.

The yeas and nays were not ordered.

Mr. CASE of South Dakota. Mr. President, I have a perfecting amendment.

The PRESIDING OFFICER. Does the Senator from Louisiana yield back the remainder of his time?

Mr. JOHNSON of Texas. Let us see if we cannot get the yeas and nays. Mr. President, I again request the yeas and nays.

The yeas and nays were ordered.

Mr. ELLENDER. I yield back the remainder of my time.

Mr. CASE of South Dakota. Mr. President, I have a perfecting amendment, which I send to the desk.

The PRESIDING OFFICER. The clerk will state the amendment.

The LEGISLATIVE CLERK. On pages 17 and 18, in subsection (b) wherever the word "Senator" appears, insert the words "or Representative."

Mr. CASE of South Dakota. Mr. President, I invite the attention of Senators who have been working with the bill to what I am here proposing. I invite comment as to whether it is applicable or not. As I examine the bill, it seems to me that subsection (b), which begins at line 19, page 17, provides that the increase shall not apply if the Senator notifies the disbursing office, in writing, that he does not wish it to apply to a particular employee. But I have not been able to find anywhere in the bill anything indicating that a Representative has a similar privilege. It seems to me that in that sense the bill is uneven and discriminatory.

Mr. JOHNSTON of South Carolina. Mr. President, will the Senator from South Dakota yield?

Mr. CASE of South Dakota. I yield.

Mr. JOHNSTON of South Carolina. The bill came from the House. The language is similar to that which is in every bill which the House passes with respect to pay. The House likes to handle its affairs in its own way; and the Senate acts on its affairs in its own way. That is according to past history. So the language of this bill has been prepared according to that policy. It leaves the matter to the discretion of each Senator. In the House the practice is different.

Mr. CASE of South Dakota. I recognize that it is customary for each House to operate for itself. I have offered the amendment to point out that the language of this paragraph would establish a mandatory increase for the staff employees of the House of Representatives, as I see it; but with the Senate, the increase would not be mandatory.

I accept the interpretation which has been placed upon paragraph (b) that the basic compensation of senatorial employees—that is, employees in the

offices of the Senate—would be automatically adjusted downward, to keep them where they are, unless a Senator notifies the disbursing office, in writing, that he wants his employees to have the benefit of the bill. That is the point I think the Senator from Texas was debating a while ago. It takes a rather close reading of paragraph (b), but I think it is correct to say that the bill automatically adjusts downward the basic compensation of employees in the offices of the Senate, so that they will not get the benefit of this increase unless the Senator indicates to the disbursing office, in writing, that he wants them to get the increase.

Mr. JOHNSON of Texas. The Senator is correct. Mr. Brenkworth confirmed that interpretation.

Mr. CASE of South Dakota. That understanding is confirmed both by the chairman of the committee which reported the bill and by the distinguished majority leader.

Mr. JOHNSTON of South Carolina. That is true.

Mr. CASE of South Dakota. But I have not found any provision in the bill which permits that to be done in the House of Representatives.

Mr. JOHNSON of Texas. There is none. The House handles these matters in its own way.

Mr. CASE of South Dakota. In the House, therefore, the increase would be mandatory for every employee. I suggest that that establishes some discrimination. The bill then provides that employees in the offices of Representatives will get a 7½-percent increase. The employees in the offices of Senators will not get the increase unless Senators individually, as to their employees, indicate that they want them to get the increase. Certainly that is discriminatory. I think we should treat our employees evenhandedly. I think Senators' employees should not be treated differently from employees of the Members of the House of Representatives.

Mr. JOHNSON of Texas. Mr. President, will the Senator yield?

Mr. CASE of South Dakota. I yield.

Mr. JOHNSON of Texas. I agree with the Senator. The Senator is correct in his understanding that there is a difference. The House chooses to operate in that way. There are many differences in the operating arrangements of the two bodies.

As the Senator knows, the House refused to employ administrative assistants, following the passage of the Reorganization Act, which was introduced by the Senator from Oklahoma [Mr. MONRONEY] and the late Senator from Wisconsin, Mr. La Follette, authored. The House did not choose to have the high-level personnel which the Senators have. Theirs is a different situation.

In this instance, the House has chosen to pass the bill as the Senator has it before him. Although I would much prefer to have the same provision apply to both Houses, I think the comity which exists between the two bodies, and the understanding we have always had, is desirable. Accordingly, the Senate does not touch the provisions relating to the House of Representatives. If the Senate does not have enough to do without handling the affairs of the House of Representatives, then the Senate is underworked.

The situation throughout the years has been that the House of Representatives handles its own business, and the Senate handles its own.

The pay of the Senate Parliamentarians is different from the pay of the House Parliamentarians. Some of the employees of the House get more than the comparable employees of the Senate. Some are given increases by statute, while ours are not.

In each instance, the leadership has felt that it was better to leave such matters up to the membership of the other body. The vote in the other body on this bill was, as I recall, something like 8 or 9 or 10 to 1.

I dislike in the concluding days of this session to have the Senate adopt an amendment affecting the House. It would be something we have never done before. If we did, I think perhaps the House simply would not receive it and would send it back to us.

Mr. CASE of South Dakota. I am fully aware of the logic and historical traditions by which each body legislates for itself. However, I am glad to have the confirmation of the Senator from Texas of the fact that there is a difference in the treatment which is accorded the employees of Senators and Representatives.

Mr. JOHNSON of Texas. There always has been.

Mr. CASE of South Dakota. There are two ways to handle the matter: Either to include the words "or Representative" after "Senator," or to strike subparagraph (b) from the bill.

The Senator from Louisiana [Mr. ELLENDER] has proposed to strike the entire section from the bill. I offered my amendment as a perfecting amendment so that it could be considered before the Senate votes upon the amendment offered by the Senator from Louisiana. If it is not desired to act in that way, and if the amendment of the Senator from Louisiana should not be accepted, then the other way to proceed would be to strike subparagraph (b) from the bill, so that Senators will not be in the onerous position of having individually to determine whether the blanket pay increase which would be given to the employees in a Representative's office shall not extend to the employees in a Senator's office.

I have thought that the logical thing to do, under the motivations which produced paragraph (b) of the bill, is to give the Senate an opportunity to avoid discriminatory action by including the words "or Representative." If that is not desired, then the entire paragraph should be stricken from the bill, so that Senators will not be called upon to pick and choose, if Representatives are not going to pick and choose.

I hope the amendment will be agreed to.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from South Dakota.

The amendment was rejected.

Mr. CASE of South Dakota. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from South Dakota will state it.

Mr. CASE of South Dakota. Would it also be considered a perfecting amendment if I were to move to strike paragraph (b) from section 117?

The PRESIDING OFFICER. The Senator could move to strike that section.

Mr. CASE of South Dakota. I move that subparagraph (b) of section 117, beginning on line 19, page 17, and continuing through line 7, on page 18, be stricken.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from South Dakota.

Mr. CASE of South Dakota. Mr. President, I should like to discuss the amendment for a moment. I invite the attention of the Senator from Louisiana [Mr. ELLENDER] to the situation which now exists.

If the entire section 117, relating to employees in the legislative branch, remains in the bill undisturbed, then we will have a situation in which the employees in the office of a Representative will get an automatic pay increase of 7½ percent. The employees in the office of a Senator will not get such an increase unless the Senator notifies the disbursing office, in writing, that he wishes his employees to get the increase—and, presumably, which employees in his office he wishes to receive the increase.

If the employees in a Representative's office are to get the increase automatically, as the employees in the other branches of the Government will get it, why should we not strike paragraph (b) of section 117, so that the employees in senatorial offices will be treated just as fairly as and on all fours with the employees in the offices of Representatives? If the employees in the offices of Representatives are to get the increase automatically and uniformly, why should not the employees in the offices of Senators get the increase automatically and uniformly?

Mr. JOHNSON of Texas. Mr. President, will the Senator from South Dakota yield?

The PRESIDING OFFICER (Mr. BYRD of West Virginia in the chair). Does the Senator from South Dakota yield to the Senator from Texas?

Mr. CASE of South Dakota. I yield.

Mr. JOHNSON of Texas. I will tell the Senator why. It is because the House of Representatives, which regulates its own business, does not choose to have its employees dealt with in this way.

Mr. CASE of South Dakota. But I am not proposing that the Senate legislate for the House of Representatives employees. I am proposing that the Senate legislate for the Senate employees.

If the House decides that the employees of the House of Representatives are to receive an automatic pay increase, are we to say to the employees in the

senatorial offices, "You will not get an automatic pay increase. Your Senator must go to the disbursing office and must notify it in writing which of his employees is to receive an increase, and how much."

Mr. JOHNSON of Texas. Mr. President, will the Senator from South Dakota yield further to me?

Mr. CASE of South Dakota. I yield.

Mr. JOHNSON of Texas. I say we should vote to proceed in the way recommended by our committee, because I think a considerable number of Senators do not want their employees to receive an automatic pay increase of 5 percent or 6 percent or 7 percent; instead, those Senators want to be the judge of what their employees shall receive.

In the House of Representatives the situation is different. I propose that each body make the decision for itself.

Mr. CASE of South Dakota. Very well; and I am proposing that the Senate make the decision as to whether it wants the Senate employees not to receive an increase which the House of Representatives employees will automatically receive.

Mr. JOHNSON of Texas. The House has decided this question for itself; but I do not want any Senator to be forced to increase the pay of his employees 6 percent or 7 percent, if, in his judgment, he does not want that done.

Mr. CASE of South Dakota. But the employees of the House of Representatives should not automatically receive benefits which the employees of the Senate will not automatically receive.

Mr. ALLOTT. Mr. President, will the Senator from South Dakota yield, to permit me to propound a parliamentary inquiry?

Mr. CASE of South Dakota. I yield.

Mr. ALLOTT. Mr. President, I rise to a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Colorado will state it.

Mr. ALLOTT. I wish to ask whether an amendment which I have in mind will properly lie to the amendment of the Senator from South Dakota.

The PRESIDING OFFICER. Will the Senator from Colorado state the nature of the amendment he has in mind?

Mr. ALLOTT. I shall discuss the amendment in just a moment. On page 18, in line 3, I propose to strike out the word "not."

The effect of the amendment—and I hope the amendment will solve part of the difficulties which are bothering the Senator from South Dakota—will be simply that the pay raises will not be applicable until the individual Senator notifies the disbursing office, in writing, that he does wish such provisions to apply to such employees. In other words, the amendment takes off the burden, and reverses the situation.

I hope that my friend, the Senator from South Dakota, will see fit to accept this amendment.

The PRESIDING OFFICER. The amendment submitted by the Senator from South Dakota must first be acted upon, before the amendment of the Senator from Colorado can be acted upon.

Mr. CASE of South Dakota. Mr. President, I think the issue is clearly before the Senate; so I have nothing further to say. This issue is merely whether Senators want the bill, as passed, to discriminate in favor of employees in the offices of Members of the House of Representatives, and against employees in the offices of Senators.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from South Dakota.

Mr. JOHNSON of Texas. Mr. President, I wish to make a brief statement: 2,400,000 persons are affected by this bill; and at the moment we are talking about a relatively small number of these Government employees.

I have checked with the House of Representatives office, and it makes this statement:

> The Senate has traditionally followed the practice of requiring affirmative action in order to give the increase to its employees. The House has always done it the other way; the House employees get it unless action is taken to take it away from them.

That has been true of every increase that has been made through the years. The House has traditionally proceeded in the other way—making the increase automatic. The House employees receive the increase automatically, unless action is taken to prevent them from receiving it.

I hope that in dealing with an item which affects so few people relatively we shall not take action which will necessitate sending the bill to conference.

Mr. President, I yield back the remainder of the time available to me.

Mr. CASE of South Dakota. Mr. President, I wish to say a further word.

Mr. JOHNSON of Texas. Then, Mr. President, I reserve the remainder of the time available to me. I had thought the Senator from South Dakota had yielded back the remainder of the time available to him.

Mr. CASE of South Dakota. Mr. President, the Senator from Texas has been making the point that each House should legislate for itself. But now he has taken the position that not one amendment should be written into the bill by the Senate, but that the bill should be passed by the Senate in exactly the same form as that in which the bill came to us from the House of Representatives, so that the bill will not have to go to conference. That is a denial of the right of the Senate to have any part in this legislation. If no amendment is to be made by the Senate to the bill, then we let the House of Representatives write the legislation.

Mr. JOHNSON of Texas. Mr. President, will the Senator from South Dakota yield?

Mr. CASE of South Dakota. I yield.

Mr. JOHNSON of Texas. The Senate committee reported the bill in this form.

Mr. CASE of South Dakota. Yes, but under the same strictures which the majority leader now wishes to lay down for the Senate—namely, that we take the bill just as it is, and do not amend the bill and have it go to conference. If that is permitting the Senate to write its own ticket, I do not so understand it.

Mr. President, I ask for a vote on my amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from South Dakota.

The amendment was rejected.

The PRESIDING OFFICER. The question now is on agreeing to the amendment of the Senator from Louisiana [Mr. ELLENDER].

On this question, the yeas and nays have been ordered; and the clerk will call the roll.

The legislative clerk called the roll.

Mr. MANSFIELD. I announce that the Senator from Colorado [Mr. CARROLL], the Senator from Georgia [Mr. RUSSELL], the Senator from Mississippi [Mr. STENNIS], the Senator from Texas [Mr. YARBOROUGH], and the Senator from California [Mr. ENGLE] are absent on official business.

I also announce that the Senator from Missouri [Mr. HENNINGS], and the Senator from Arkansas [Mr. FULBRIGHT] are absent because of illness.

I further announce that the Senator from Tennessee [Mr. KEFAUVER], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Michigan [Mr. MCNAMARA], the Senator from Oregon [Mr. MORSE], and the Senator from Wyoming [Mr. O'MAHONEY] are necessarily absent.

I further announce that, if present and voting, the Senator from Colorado [Mr. CARROLL], the Senator from Missouri [Mr. HENNINGS], the Senator from Tennessee [Mr. KEFAUVER], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Michigan [Mr. MCNAMARA], the Senator from Oregon [Mr. MORSE], the Senator from Mississippi [Mr. STENNIS], the Senator from Texas [Mr. YARBOROUGH], and the Senator from California [Mr. ENGLE] would each vote "nay."

Mr. KUCHEL. I announce that the Senator from Maryland [Mr. BUTLER] is absent because of illness.

The Senator from Indiana [Mr. CAPEHART] is absent by leave of the Senate.

The Senator from New Hampshire [Mr. COTTON] and the Senator from Nebraska [Mr. HRUSKA] are necessarily absent.

The Senator from South Dakota [Mr. MUNDT] and the Senator from Kansas [Mr. SCHOEPPEL] are absent on official business. If present and voting, the Senator from Nebraska [Mr. HRUSKA], and the Senator from Kansas [Mr. SCHOEPPEL] would each vote "yea."

The result was announced—yeas 19, nays 63, as follows:

[No. 224]

YEAS—19

Anderson	Hayden	Saltonstall
Bennett	Lausche	Talmadge
Bush	Lusk	Thurmond
Byrd, Va.	McClellan	Williams, Del.
Curtis	Mansfield	Young, Ohio
Ellender	Prouty	
Gore	Robertson	

NAYS—63

Aiken	Brunsdale	Chavez
Allott	Byrd, W. Va.	Church
Bartlett	Cannon	Clark
Beall	Carlson	Cooper
Bible	Case, N.J.	Dirksen
Bridges	Case, S. Dak.	Dodd

Douglas	Jackson	Morton
Dworshak	Javits	Moss
Eastland	Johnson, Tex.	Murray
Ervin	Johnston, S.C.	Muskie
Fong	Jordan	Pastore
Frear	Keating	Proxmire
Goldwater	Kerr	Randolph
Green	Kuchel	Scott
Gruening	Long, Hawaii	Smathers
Hart	Long, La.	Smith
Hartke	McCarthy	Sparkman
Hickenlooper	McGee	Symington
Hill	Magnuson	Wiley
Holland	Martin	Williams, N.J.
Humphrey	Monroney	Young, N. Dak.

NOT VOTING—18

Butler	Hennings	Mundt
Capehart	Hruska	O'Mahoney
Carroll	Kefauver	Russell
Cotton	Kennedy	Schoeppel
Engle	McNamara	Stennis
Fulbright	Morse	Yarborough

So Mr. ELLENDER'S amendment was rejected.

The PRESIDING OFFICER. The bill is open to further amendment.

Mr. ELLENDER. Mr. President, I send to the desk an amendment and ask to have it stated, and I ask for the yeas and nays.

The PRESIDING OFFICER. The clerk will first state the amendment.

The LEGISLATIVE CLERK. On page 20, between lines 16 and 17, it is proposed to insert the following new section:

LIMITATION ON INCREASES

SEC. 123. Notwithstanding any other provision of this Act or of any amendment made by this Act, no such provision shall—

(1) provide or authorize an increase in any rate of basic compensation or gross compensation (basic compensation plus additional compensation authorized by law) if such rate, computed without regard to such provision, is $10,000 or more per annum, or

(2) provide or authorize an increase in any rate of basic or gross compensation to an amount in excess of $10,000 per annum if such rate, computed without regard to such provision, is less than $10,000 per annum.

Mr. ELLENDER. Mr. President, I renew my request for the yeas and nays.

The yeas and nays were not ordered.

Mr. ELLENDER. Mr. President, I suggest the absence of a quorum.

Mr. JOHNSON of Texas. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. JOHNSON of Texas. What time will be used for the call of the roll?

The PRESIDING OFFICER. Does the Senator from Louisiana request that the time not be charged to either side?

Mr. ELLENDER. Mr. President, I ask unanimous consent that the time for the call of the roll not be charged to either side.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Louisiana? The Chair hears none, and it is so ordered.

Mr. ELLENDER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. ELLENDER. Mr. President, I ask unanimous consent that further proceedings under the quorum call be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ELLENDER. Mr. President, I renew my request. I ask for the yeas and nays on the amendment.

The yeas and nays were ordered.

Mr. ELLENDER. Mr. President, this is a very simple amendment. All it seeks to do is to confine the 7.5-percent across-the-board pay increase provided in the pending bill to persons making less than $10,000 per year. Under my amendment, an employee receiving $10,000 per annum or more would receive no pay increase, and, as to persons presently receiving less than $10,000 per year, in no case could their compensation be increased under the authority of the pending bill, to more than $10,000 per year.

I do not enjoy offering amendments of this kind to proposed pay legislation, but I feel compelled to do so because I am firmly convinced that if the inflationary spiral is to be stopped, if burgeoning Federal expenditures are to be reduced, it is up to the Federal Government to set the example.

There is doubtless a strong case to be made for a pay increase for persons in the lower income brackets, but I do not believe that persons presently earning $10,000 per year or more, which is a substantial amount of money, need a pay increase to the extent that the lower paid Federal workers do.

Actually, Mr. President, it could perhaps be argued that a pay raise of the magnitude provided in the pending bill might be somewhat excessive, even as to the lower income brackets. According to my information, the cost of living, as measured by the Consumer Price Index, has increased by only 2 percent, since the last Federal pay raise in 1958.

A more limited study of the Consumer Price Index, embracing only housing, apparel, transportation, medical care, personal care, reading, and recreation, indicates that there has been an average net increase in prices for these items of only 3 percent during the same period of time.

Now I am not unaware of the fact that individuals employed in the private sector of our economy have received substantial wage increases since 1958, but I return to the basic premise, that despite such increases it is up to the Federal Government to lead the way in holding down the cost of living, in holding down Government expenditures.

We cannot afford to follow blindly in the footsteps of other segments of our economy, and, in effect, participate in an effort which is bound to further increase the cost of living. I am also compelled to inform Senators that despite the fact that average hourly earnings in manufacturing and similar industries have increased only an average amount of 6.4 percent since 1958, the pending bill would provide a 7.5-percent increase for Federal employees. Thus, Mr. President, even assuming that the Federal Government should go forward and "follow the leader" in raising wages, the average hourly earnings in other segments of our economy has increased by only some 6.4 percent, compared with the 7.5-percent increase provided under the pending bill.

Mr. President, I ask unanimous consent that the tables showing the Consumer Price Index for all articles, the Consumer Price Index for selected items, and the average hourly earnings, excluding overtime, for selected industries, be printed at this point in my remarks.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

Consumer Price Index, all items

[1947–49=100]

March 1958	123.3
March 1960	125.7
Net change	+2.4

Change, +2 percent (rounded).

Consumer Price Index, selected items

[1947–49=100]

	1958 average	March 1960	Percent change
Housing	127.7	131.3	+2.8
Apparel	107.0	108.8	+1.7
Transportation	140.5	146.5	+4.3
Medical care	144.6	155.0	+7.8
Personal care	128.6	132.7	+3.2
Reading and recreation	116.7	120.9	+3.6
Food	120.3	117.7	−2.2
Average increase			+3.0

Average hourly earnings (excluding overtime)

[Selected industries]

	1958 average	February 1960	Percent change
Manufacturing (all)	$2.08	$2.22	+6.7
Banks	1.78	1.87	+5.0
Hotels	1.13	1.20	+6.2
Telephone	2.05	2.22	+8.3

Average increase			+6.4

Mr. ELLENDER. Mr. President, I also tell Senators that, according to the best information I have been able to obtain, the adoption of my amendment, which, as I have said, would limit the pay raise provided in the bill to the lower paid employees of the Federal Government, would result in savings aggregating at least some $48 million. The latest available figures on Federal employment which I have obtained from the Civil Service Commission, show that there are 55,971 civil service employees earning more than $10,000, out of a total 962,264,000 employees. These $10,000 per year and over employees—and I am referring to civil service employees only—were receiving as of June 30, 1958, aggregate pay totaling $639,101,065. Applying a 7.5 percent to this amount, it is easy to see that the saving as to civil service employees alone, would be $47,932,579 per year.

I also have before me a table headed "Employees by pay group, all areas, June 30, 1959," indicating that of all Federal employees—classified, wage board, postal field service, and others—only 71,993 receive salaries in excess of $10,000 per year. Thus, it becomes obvious that the amount I propose will not affect the rank and file of our Federal workers, but will apply only to a little more than 3 percent of our total Federal payroll, in

terms of number of employees, while at the same time, saving an amount in excess of $48 million per year.

I do hope, Mr. President, that my amendment will be adopted. I do not mean to say that persons presently earning $10,000 per year are overpaid. That is not the point at all. The fact is, as I have already tried to point out, the Federal Government owes to our people a major responsibility in curbing inflation, and in halting the ever rising cost of Government.

It strikes me that this is a particularly appropriate time for the Congress to fulfill its responsibilities in this area. Under my amendment, a step forward in this regard would be taken, without as I have indicated, working any injury upon the great majority of our Federal employees.

As I previously stated, I wish to be in a position to vote for a pay increase for those who need it. As I pointed out previously, the bill is dubbed a bill to increase the pay of postal employees. Every telegram I have received in the past 24 hours refers to the bill as a postal pay raise bill, when, as a matter of fact, it affects practically every classified employee, many of whom, as I have said, are today receiving salaries that are fair and just. My fear is that by overloading this pay increase bill, by increasing the salaries of people who are now receiving sufficient salary, we may prevent the bill from becoming law.

Mr. President, I yield 10 minutes to my distinguished friend from Georgia.

Mr. TALMADGE. Mr. President, I thank the able and distinguished Senator from Louisiana for yielding to me. I commend him for the amendment he has offered. As a matter of fact, I had prepared an identical amendment which I had planned to offer myself.

I have great sympathy for the hundreds of thousands of employees of the Government who live on nominal and sometimes little more than subsistence salaries. I am ready and willing to lend my voice and my vote to improve their lot. But, in considering raising the pay of Government employees, I also have equal sympathy for the millions of Americans outside the employment of the Federal Government who are burdened with oppressive taxation.

During the past 31 years we have succeeded in balancing our budget only five times. During that same period of time the value of our dollar has eroded to slightly less than 47 cents. Although I have had the privilege of serving in the Senate for less than 4 years, during that time we have acted or soon will act on four different bills to raise the ceiling on the national debt.

We have been guilty of nothing less than complete and abject fiscal irresponsibility.

At a time when the Nation is having difficulty selling its bonds we in the Senate find ourselves considering a bill which would raise the pay of virtually every civil employee in the United States, regardless of his present level of income.

How can we justify raising the salaries of employees who are receiving $10,000 to $19,000 a year when we have not balanced our budget and the value of our dollar is steadily declining. We seem to have gotten caught in a vicious cycle of having to raise the salaries of employees whose incomes have not kept pace with the inflation created by irresponsible Federal spending.

As has the distinguished Senator from Louisiana, I, too, have tried to get some facts on this matter. My time was limited as I prepared my amendment only this morning. But I found that of the 535,000 postal employees, only 1,141 earn in excess of $10,000 a year. Thus the proposed amendment would affect them virtually not at all.

This bill is intended to aid the people who work for the Government of the United States to meet their obligations, a purpose in which I concur. However, I do not think that we should haphazardly pass legislation affecting virtually every employee of our Government, regardless of his salary, when we cannot even balance our budget.

The figures I obtained on the saving which would be accomplished under the amendment offered by the distinguished Senator from Louisiana vary somewhat from the figures given by the Senator from Louisiana, but they are along the same line.

The staff of the committee informs me that if the amendment is adopted, it will save $35 million a year. I arrived at a little different result on the basis of the information I received from the Bureau of the Budget. That agency reported the savings as $56 million a year. The Senator from Louisiana [Mr. ELLENDER] received figures from the Civil Service Commission which put the amount in the vicinity of $48 million a year.

I do not think this Senate ought to raise the salaries of the people in the highest pay brackets in the Government at the expense of placing an even greater burden on our children and on our grandchildren yet unborn.

I hope that the amendment of the Senator from Louisiana will be adopted.

Mr. JOHNSTON of South Carolina. Mr. President, I call to the attention of the Senate what the Cordiner report had to say in regard to some of the salaries that would be affected by the amendment:

> In the top-level civilian employee field, the Department of Defense is in direct competition with industry for scarce skills. Industry is free to offer greater economic incentives. As a result, the Department is suffering alarming losses of established career civilians-engineers, scientists, and managers.

We hear a good many people talking about our inability to retain skilled workers, but if the amendment passes, it will only serve to keep more people from remaining with us in the different scientific fields. The Cordiner report says further:

> To be precise turnover is increasing. The ratio of losses of top scientists and engineers in 1956 was four times that of 1951.
>
> Quality is decreasing. Supervisors indicate that their best people are leaving and that the replacements don't measure up to those who have left.
>
> Many positions remain unfilled. In June 1956, one out of every five electronic, mechanical and aeronautical engineering positions was vacant. Similar shortages exist in other occupations. The situation grows steadily worse.

The excerpts I have read are from what is known as the Cordiner report.

I hope the Senate will not agree to the amendment. I call to the attention of the Senate again the fact that Senators might just as well vote against the bill as to amend it and send it to conference.

Mr. ELLENDER. I yield 5 minutes to the distinguished Senator from Idaho.

Mr. CHURCH. Mr. President, I rise to explain briefly the reasons why I support the amendment offered by the Senator from Louisiana. I must say at the outset that normally I would oppose the amendment, because it is not my feeling that those who occupy high policy-making positions in the Government are overpaid. If I felt that a case had been made out by which I could, in good conscience, justify the 7½-percent increase proposed in the bill for all civil service employees, then I would wish to see the same increase given to the employees in the highest brackets as well as those in the middle or lower brackets.

Because I feel that no case has been made to warrant a 7½-percent increase for civil service employees generally, I must support any amendment which will tend to temper the cost which is encompassed in the proposed legislation. The cost, as the Senate well knows, is three-quarters of a billion dollars, permanently added to the Federal budget, and to the burden of the taxpayers.

Mr. JOHNSON of Texas. Mr. President, will the Senator yield?

Mr. CHURCH. I am glad to yield.

Mr. JOHNSON of Texas. How much is involved in the pending amendment?

Mr. CHURCH. The pending amendment would effect a saving of anywhere from $35 million to $55 million a year, depending upon the source of the figures. There seems to be some divergence with regard to the estimates made by the Civil Service Commission, by the Bureau of the Budget, and by the staff of our own committee. However, whichever figure is taken, be it $35 million or $55 million, it is a significant figure. I feel that it justifies support of the amendment.

Mr. JOHNSON of Texas. How many people are affected?

Mr. CHURCH. I am sorry I do not know the answer. Perhaps the Senator from Louisiana knows the answer.

Mr. ELLENDER. Fifty-five thousand.

Mr. CHURCH. Fifty-five thousand people would be affected. That would be the total number of people on the Federal payroll whose salaries are now above $10,000.

Mr. JOHNSON of Texas. Does the Senator realize that most of our technological and scientific people are in that group?

Mr. CHURCH. Yes. If I felt that a 7½-percent increase were warranted, I would want it to go to those in the higher brackets, as well as to the middle and lower brackets.

Mr. JOHNSON of Texas. Coming from the State that the Senator does, with the great interest he has in the problem, he knows of the difficulty we

have of holding technological people in our employ, the people who fall into this group, particularly because industry is hiring them away from government all the time.

Mr. CHURCH. I am trying to keep this matter in perspective. The total cost of the bill is very large indeed. To justify favorable action on the bill as a whole, upon the ground of what it might do for these highly trained people and specialists, seems to me not to be sound. After all, we have a big package. We have to consider the impact of all of it on the cost of government.

Mr. JOHNSON of Texas. Mr. President, will the Senator yield further?

Mr. CHURCH. I yield.

Mr. JOHNSON of Texas. I could appreciate the Senator's position on an amendment separating the postal employees from the other employees, if he wished to raise only the postal employees. However, that is not this amendment. This amendment says, "We will give everybody a raise except to the people we need the most, the people who are being grabbed away from the Government." It seems to me that the Senator would do that to save $35 million in the hectic period when bombs are raining on Quemoy. It is a poor way to try to take $35 million from people we are looking for to help maintain freedom in the world.

Mr. CHURCH. I do not believe that the committee reports contain data upon which we can draw, with any degree of assurance, what the Government's difficulties are, with respect to procuring these highly skilled people.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. JOHNSON of Texas. I yield 3 additional minutes to the Senator from Idaho.

Mr. CHURCH. We do not know what the difficulties are with respect to procuring these specialists, or what adjustments should be made in their wages. I do feel that if this 7½-percent increase is not warranted generally for the civil service employees, then let us take such steps to modify the bill as the majority will support. It seems to me that the amendment of the Senator from Louisiana at least has this force to it. It will confine the increase to those who are most likely to be in need of it, because their salaries are in the lower brackets. It will effect an overall saving of between $35 million and $55 million.

Until a better case is documented, showing, to my satisfaction, that adjustments in the higher brackets are necessary in order to maintain, attract, and hold, scientists and technicians, who now receive anywhere from $16,000 to $19,700 a year, I believe that I am justified in supporting the amendment.

Mr. PASTORE. Mr. President, will the Senator yield?

Mr. CHURCH. I am on limited time, but I am glad to yield to the Senator from Rhode Island.

Mr. PASTORE. Why does the Senator assume that a single girl earning $4,000 a year is in more need than a married man with five children earning $11,000?

Mr. JOHNSON of Texas. Are we not concerned with families as well as individuals?

Mr. CHURCH. We can choose convenient examples, of course. I am concerned about those who work for the Government with families, whether they are earning $11,000 or $7,000 or $5,000.

Mr. PASTORE. Precisely.

Mr. CHURCH. Those in the lower brackets who have families are faced with the rising cost of living. They are the ones who are most in need of such increases as we may choose to give. I therefore feel, that if we are going to have a 7½-percent increase, let us at least confine that increase to those who are most in need of it. It seems to me that those who are making less than $10,000 are the ones most in need.

Mr. PASTORE. Is not the Senator arguing and is not his logic taking this form, that we can afford to give this pay increase, provided it costs $35 million, but not if it costs $800 million?

Mr. CHURCH. No, indeed I am not. This amendment would save $35 million. I am about to offer an amendment to the bill which will confine the increase to postal workers, because I believe a legitimate case has been made to warrant an increase for these workers. That will exclude the $500 million in the bill that would go to the classified civil service employees, because I think no case has been made out to warrant an increase of this size for these employees. This would save money which could better be spent for the critical needs of the country. I am therefore supporting the Senator from Louisiana, and I will later offer an amendment which will not effect a savings of only $35 million or $55 million, but will effect a saving of a half a billion dollars.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. JOHNSON of Texas. I yield 1 additional minute to the Senator from Idaho.

I wish to observe that I can understand the logic of the Senator's position on his overall amendment, but I submit that it is not so much a question of the individual need of the scientist as it is the need of the Government itself. These people are going into private industry. They are going into private plants. I believe that what the Senator is saying to these people is, "We are going to raise everybody up to this level, but we are going to ignore you." That will aggravate the problem, rather than help to solve it. Perhaps the steel workers were not entitled to get an increase. However, if we are to give an increase to anyone, we should certainly give it to those we need the most in the critical period we are facing.

SEVERAL SENATORS. Vote! Vote!

Mr. LONG of Louisiana. Mr. President, will the Senator yield me 3 minutes?

Mr. JOHNSON of Texas. I yield 3 minutes to the Senator from Louisiana.

Mr. LONG of Louisiana. I dislike very much to disagree with those who argue in favor of the amendment. I should like to say a word about it. When the junior Senator from Louisiana came to the Senate the Hoover Commission had worked out recommendations for job economy in Government. One of their leading recommendations was that we should try to give an increase in pay to people who had the responsibility of management in the Government. The argument for that was that the Government was losing a great amount of money for lack of first-class managers in Government.

The junior Senator from Louisiana handled the bill on the floor, and had great difficulty in getting an increase for the top management officials in Government, although in his opinion an almost irrefutable case had been made that by spending money we could make tremendous improvements in efficiency and better management. I have seen bills go through Congress raising the salary of low grade employees but not of the higher grade employees. Incidentally, that is popular with the postal people. Raise all the low-grade people, who squabble over their supervisors, but do not raise the supervisors because they are not too popular with the letter carriers or the clerks.

If we are to have good management, we shall have to pay something for it. It is my impression that the best people in the Government today in the managerial end are staying there solely to obtain their retirement benefits, because the Government has a good retirement program. But they are being paid much less than persons having comparable ability who are employed in other areas of endeavor.

It is my judgment that if we want to keep the best people, the postmasters and persons in managerial positions in Government, we will do well to give them an increase.

We talk about people who are getting better-paid work elsewhere. They are the very people who would get no increase at all, while everyone else would get the 7½-percent increase.

My guess is that the pending amendment affects the people who have the most ability and who deserve a pay raise, while those who would be paid less would be those who would not get a pay raise, because we pile up the pay increases or incentives, in my judgment, and a better case would be made for the people who are paid on the basis of ability.

Mr. GOLDWATER. Mr. President, will the Senator from Louisiana yield?

Mr. LONG of Louisiana. I yield.

Mr. GOLDWATER. The Senator from Louisiana is making a good case for what I believe is the basic trouble with the pay raise approach which confronts us every election year. I know a little something about management and something about hiring people.

We will not retain people in desirable positions in the Government with a 7½-percent increase. Suppose a man is making $20,000 a year. If an aircraft company wants that man, it will offer him $30,000, which will mean a net increase of about $8,500 more than if he got a 7½-percent increase in the Government.

Every election year, for votes only, we come into this Chamber and argue about the underpaid postal workers and the underpaid civil service workers.

The PRESIDING OFFICER. The time of the Senator from Louisiana has expired.

Mr. DIRKSEN. I yield the distinguished Senator 5 additional minutes.

Mr. GOLDWATER. Would it not be better for the committee to devote itself to a real study of the pay bases and pay scales of the Federal employees? Would not that be better than to come here every election year, knowing it is very difficult to vote against pay increases? It is like voting against mother love or against the flag. I think we are wasting the taxpayers' money. I do not think we are getting the best out of our workers.

If the postal employees are underpaid, then let them be paid what they are worth. But let us not increase their pay in a political year merely by voting for a 7½-percent increase.

I guarantee that any private business that wants to pirate or hire any Government worker will not be stopped by a 7½-percent pay increase. It may be that we shall have to increase some of the pay bases by 20, 30, 40, or 50 percent. But I suggest that we do it, and not come here every election year with a purely political bill which does not do the worker any good. Let us not say that we have helped the underpaid employees of the Government. We have done them no good. We simply add to the inflationary spiral, and we add to the economic problems of the workers.

If we would stop irresponsible spending, we would do more good for the country than by providing wage increases.

I got away from the question I had intended to ask. Does not the Senator agree that the basic problem is one of studying the whole wage structure of the Federal employees?

Mr. LONG of Louisiana. That is a problem connected with it, but the bill is before the Senate. My general feeling about it is that if we are to give a pay raise to everyone, the people who would be denied a pay raise by the amendment are those who could fill any position. They certainly are worth more than they are getting and are worthy of a pay raise. That being the case, I hope they will share in a pay raise, if a pay raise is to be granted.

Mr. ELLENDER. Mr. President, I yield 5 minutes to the Senator from Idaho.

Mr. CHURCH. Mr. President, I shall sum up the reasons why I support the amendment. It has been argued by the distinguished majority leader and other Senators that the Government has a great need for technicians and other highly educated and expert persons who are not now working for the Government because of the higher wages they receive in private industry, or who are leaving the Government because they can receive higher wages elsewhere. I suggest that this is an assertion which is not backed up by the committee hearings. We have no data or studies upon which to rest a competent judgment that that is so. We have no proof, upon which we can act, that this is so. We have merely surmises and the contention.

Furthermore, we have no proof whatever that a 7½-percent increase will cause those persons to stay with the Government, as was well pointed out by the distinguished Senator from Arizona. The kind of salary competition which may be attracting them away from Government service is not a differential of 7½ percent; it is a differential which may run as high as 20 or 30 percent.

Therefore, I believe we cannot assume, upon the evidence now before us, that the passage of the bill providing for a 7½-percent increase would rectify the problem which has been alluded to on the floor.

Mr. PASTORE. Mr. President, will the Senator yield?

Mr. CHURCH. I will yield as soon as I have finished my statement.

Second, it seems to me that if the 7½-percent increase were justified overall, then it ought to apply to persons in the higher categories as well as to those in the lower or middle categories. That is why I said at the outset that normally I would not support an amendment of this kind.

But where there is no justification, in my opinion, for a 7½-percent increase overall, then I would prefer any amendment which would tend to limit the size of the increase to those who are clearly most in need of it. Those persons, obviously, are the ones in the lower and middle brackets. They are persons who are faced with the high cost of living but are having a difficult time making their budgets meet their living costs.

So I support the amendment. I believe it will effect a saving of at least $35 million to $55 million a year. Of those who are earning $10,000 or more a year, the great majority are not the technicians or the scientists to whom reference has been made; they are those in the regular civil service positions of the Government. They are not the persons who are most in need of a raise.

So let us effect a saving in the increase, if there is to be one, by granting the raise to persons in the lower income brackets, who certainly are most in need of an increase.

For these reasons, I believe it is in the public interest to support the amendment offered by the Senator from Louisiana.

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. CHURCH. I yield.

Mr. MANSFIELD. The Senator has heard of Parkinson's law, has he not?

Mr. CHURCH. I have, indeed. I would only add to that statement that the existence of Parkinson's law makes it all the more mandatory for the Committee on Post Office and Civil Service, on which I formerly served, and for which I have the highest regard, not to come before the Senate with a package which requires us to vote for a 7½-percent pay increase for everyone in the Government simply in order that the postal workers can get their share, or in order that scientists and technicians will stay with the Government, but rather come to the Senate with tailored legislation and a well-documented case to support the kind of reformation which should take place on the Federal payroll, if we are properly to serve the public interest. I submit that we have failed to do that in the pending bill.

Mr. GRUENING. Mr. President, I rise in opposition to the amendment.

Mr. MANSFIELD. Mr. President, has the Senator from Alaska been yielded time?

Mr. JOHNSON of Texas. I yield 1 minute to the Senator from Alaska.

Mr. GRUENING. The amount to be saved by the amendment will be something in the neighborhood of one two-hundredths of 1 percent. By adopting such a provision, we will impair the value of the persons who are most valuable, most skilled, and most important to the Government.

Only a few hours ago, I was at lunch with one of our colleagues who said that he had lost his three top employees to private industry because he could not afford to keep them at the maximum salaries which the Senate permits.

If we make this distinction, we will pile up a large number of persons at the $10,000 level, and will be grouping persons having different values in one group. That would be most unfortunate. We should proceed to vote on the bill as it now is.

Mr. ELLENDER. Mr. President, I yield back the remainder of my time.

Mr. JOHNSON of Texas. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Louisiana. The yeas and nays have been ordered, and the clerk will call the roll.

The Chief Clerk called the roll.

Mr. MANSFIELD. I announce that the Senator from Colorado [Mr. CARROLL], the Senator from California [Mr. ENGLE], the Senator from Michigan [Mr. HART], the Senator from Georgia [Mr. RUSSELL], the Senator from Mississippi [Mr. STENNIS], and the Senator from Texas [Mr. YARBOROUGH] are absent on official business.

I also announce that the Senator from Missouri [Mr. HENNINGS], and the Senator from Arkansas [Mr. FULBRIGHT] are absent because of illness.

I further announce that the Senator from Massachusetts [Mr. KENNEDY], the Senator from Tennessee [Mr. KEFAUVER], the Senator from Michigan [Mr. MCNAMARA], the Senator from Oregon [Mr. MORSE], the Senator from Wyoming [Mr. O'MAHONEY] are necessarily absent.

On this vote, the Senator from Missouri [Mr. HENNINGS] is paired with the Senator from Michigan [Mr. MCNAMARA]. If present and voting, the Senator from Missouri would vote "yea" and the Senator from Michigan would vote "nay."

I further announce that, if present and voting, the Senator from Colorado [Mr. CARROLL], the Senator from California [Mr. ENGLE], the Senator from Michigan [Mr. HART], the Senator from Tennessee [Mr. KEFAUVER], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Oregon [Mr. MORSE], the

Senator from Mississippi [Mr. STENNIS], the Senator from Texas [Mr. YARBOROUGH] would each vote "nay."

Mr. KUCHEL. I announce that the Senator from Maryland [Mr. BUTLER] is absent because of illness.

The Senator from Indiana [Mr. CAPEHART] is absent by leave of the Senate.

The Senator from New Hampshire [Mr. COTTON] and the Senator from Nebraska [Mr. HRUSKA] are necessarily absent.

The Senator from South Dakota [Mr. MUNDT] and the Senator from Kansas [Mr. SCHOEPPEL] are absent on official business.

On this vote, the Senator from Nebraska [Mr. HRUSKA] is paired with the Senator from Kansas [Mr. SCHOEPPEL]. If present and voting, the Senator from Nebraska would vote "yea," and the Senator from Kansas would vote "nay."

The result was announced—yeas 23, nays 58, as follows:

[No. 225]

YEAS—23

Allott	Dworshak	McClellan
Anderson	Ellender	Mansfield
Bridges	Ervin	Robertson
Byrd, Va.	Goldwater	Talmadge
Case, S. Dak.	Hayden	Thurmond
Church	Holland	Williams, Del.
Cooper	Lausche	Young, Ohio
Curtis	Lusk	

NAYS—58

Aiken	Green	Monroney
Bartlett	Gruening	Morton
Beall	Hartke	Moss
Bennett	Hickenlooper	Murray
Bible	Hill	Muskie
Brunsdale	Humphrey	Pastore
Bush	Jackson	Prouty
Byrd, W. Va.	Javits	Proxmire
Cannon	Johnson, Tex.	Randolph
Carlson	Johnston, S.C.	Saltonstall
Case, N.J.	Jordan	Scott
Chavez	Keating	Smathers
Clark	Kerr	Smith
Dirksen	Kuchel	Sparkman
Dodd	Long, Hawaii	Symington
Douglas	Long, La.	Wiley
Eastland	McCarthy	Williams, N.J.
Fong	McGee	Young, N. Dak.
Frear	Magnuson	
Gore	Martin	

NOT VOTING—19

Butler	Hennings	O'Mahoney
Capehart	Hruska	Russell
Carroll	Kefauver	Schoeppel
Cotton	Kennedy	Stennis
Engle	McNamara	Yarborough
Fulbright	Morse	
Hart	Mundt	

So Mr. ELLENDER's amendment was rejected.

Mr. DIRKSEN. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. KUCHEL. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER (Mr. HARTKE in the chair). The bill is open to further amendment.

Mr. CHURCH. Mr. President, I send an amendment to the desk, and ask to have it stated.

The PRESIDING OFFICER. The amendment of the Senator from Idaho will be stated.

The CHIEF CLERK. It is proposed, beginning on page 4, at line 21, to strike all through page 13, line 6; and beginning on page 16, line 12, to strike all through page 20, line 6.

Mr. CHURCH. Mr. President, the effect of the amendment is to strike Part B of Title I of the pending bill. If adopted, it would mean a saving of about half a billion dollars. I therefore think it is a matter of sufficient importance to warrant the yeas and nays. I ask for the yeas and nays.

The yeas and nays were ordered.

If we were to confine this bill to the postal workers and adopt the increases in the proposed legislation for them, it would tend to bring them abreast of other workers in the Government, and to equate their pay with that being received by the majority of workers in the classified civil service.

Secondly, the great bulk of the postal workers, as the Senate well knows, are concentrated in the lower grades, and they are faced with an increasingly serious problem in trying to meet rising living costs. I think they are the most entitled to a pay raise. They have more need for the higher pay, and there is greater justification for giving it to them.

I think this is borne out by the particular fact that data before the committees show that 31 percent of the postal employees have to have a second job in order to make a living, and 43 percent of the postal employees have wives who work, in order that their joint pay may be sufficient to meet the family bills. Therefore, I think a convincing case is made for the need to increase the general level of salaries of the postal workers.

Thirdly, there is evidence that many postal workers still receive far less for the work that they do, than those engaged in comparable work in private industry. During my 4 years in the Senate I have tried to be fair with Federal employees. I believe they are entitled to comparable pay for comparable work. The fact that this is still not true with respect to many in the postal service is still another reason why we should pass their pay increase, as embodied in this bill.

Since 1951 average industrial wages have gone up 45 percent, while postal salaries have gone up 19 percent.

Mr. PASTORE. Mr. President, will the Senator yield?

Mr. CHURCH. I would like to complete my statement. Then I shall be happy to yield.

The question I want to raise, in all seriousness, before the Senate is: Apart from the postal workers, what justification does the record show for increasing the salaries of the classified civil service employees by 7½ percent? I have studied the committee hearings, I have studied the reports very carefully, to see if I could find, to my satisfaction, a case which would justify the increase entailed in this proposed legislation.

I have asked myself, Is it because the salaries we pay to the Federal employees generally are substandard? That is not so. Unlike the case of the postal workers, we have no convincing evidence before us which would lead us to believe that Federal employees in general are not being paid wages comparable to the kind of wages that prevail for the same kind of work in private industry. On the contrary, the evidence I have seen shows that present wage levels are fair, and that the fringe benefits we now give to Federal employees are even more generous than those that generally obtain in private industry. Benefits in life insurance, health insurance, retirement, hospitalization and medical expenses—all these have been estimated to have a value of 30 percent, over and above the actual wages paid to Federal employees.

So then, Mr. President, I suggest that no case has been made that prevailing wage levels of Federal employees are so substandard as to warrant a 7½-percent increase, as provided in the pending legislation.

Therefore I have asked myself this second question: Are we granting this 7½-percent increase to enable Federal employees to keep abreast of the rising cost of living? Is that the justification for this bill? If so, I would support it, because I want to do equity by the Federal employees, and I think they are entitled to have wage adjustments as the rising cost of living may require. But since the last pay raise took effect a little more than 2 years ago, the cost of living index has gone up but 1.6 percent.

We are here proposing an increase of 7.5 percent. I wish to make it perfectly clear on the record that I favor any such adjustment as may be required to keep up with rising living costs. I would support such a bill here and now. I would support such a bill if it came from a conference committee, as it might relate to cost-of-living pay increases for classified civil service employees.

If the amendment I offer is adopted, the effect will be to send the bill to conference. There the conferees will have an opportunity to review what may be justified for the civil service employees in the light of all the data they can assemble with respect to rising living costs. Then the conferees can come back and recommend an increase in line with the needs of Federal employees, and I shall be happy to support such a measure.

However, the proposed pay raise contained in the bill before us cannot possibly be justified on the basis of the evidence presented to the committees, on account of increased living costs. What, then, is the justification?

Mr. KEATING. Mr. President, will the Senator yield?

Mr. CHURCH. I will yield to the Senator after I finish my argument, if I may.

If it is not that present wages are substandard, if it is not that inflationary rises in the cost of living require the adjustment to be made, what, then, is the justification for the bill? Is it that we have neglected for too long our Federal employees? That cannot be.

Mr. President, since the war Federal employees in the classified civil service have received regular increases in pay amounting, in the overall, to some 80 percent. If Members of the Senate who are interested will look at the minority views in the House report they will see a detailed listing of the increases granted by the Congress in the Federal wage level since the war.

In 1945, we granted an average increase of 15.9 percent.

In 1946, we granted an average increase of 14.2 percent.

In 1948, we granted an average increase of 11 percent.

In 1949, we granted an average increase of 4 percent.

In 1951, we granted an average increase of 10 percent.

In 1955, we granted an average increase of 7.5 percent.

In 1958, we granted an average increase of 10 percent.

Now we are asked to grant an increase of 7.5 percent.

The sum, all told, represents approved pay increases by the Congress of 83.6 percent in the last 15 years, and the employees have received seven of these increases, representing an inpocket average increase of 72.6 percent.

I say, Mr. President, in all reasonableness, the record simply does not support the theory that Federal employees as a whole have been forgotten or neglected in any way. Rather, the record shows that Federal pay boosts come up like spring grass, every election year, as has been well pointed out by the distinguished Senator from Georgia.

Having found no other basis to warrant the salary increase proposal contained in the bill, I have concluded it is a familiar malady which furnishes the impetus for the proposed legislation, and that malady is election fever. Respectfully, I implore the Senate to consider the cost of the passage of this measure.

As the bill now stands, it would add approximately three-fourths of a billion dollars to the cost of Government from now on. That is not simply for 1 year, but for next year and the next year and the next year, for so long as anyone can foresee. It will permanently affix 1 percent to the tax burden of this country. It represents an added 1 percent permanently engrafted upon the Federal budget.

I say to you: Come chaos, calamity, war, pestilence, or economic collapse, one thing is as certain as death and taxes. The country may come down, but the Federal wage scale will not come down, once it has been approved by the Congress.

The cost of this proposed legislation cannot be accepted cavalierly, or dismissed simply because it may be politically expedient for us not to consider it.

Is it prudent, Mr. President, at this time to engraft an additional three-fourths of a billion dollars a year on the Federal budget, to increase Federal pay? Oh, we talk a lot, Mr. President, about our critical needs, and many indeed are the grave problems we are leaving unattended and unsolved.

I support—generously, I think—appropriations of public money for causes which I think require our attention, and many have been the times on this floor when I have said, "We are not doing enough to meet the critical needs of the country."

However, Mr. President, I cannot, in good conscience, support a three-quarter billion dollar bill to fatten Federal pay, when the proof is not before us to justify it.

This bill, Mr. President, represents a cost seven times as great as the $90 million the Congress authorized to be appropriated for the elimination of water pollution. That bill, as the Senate well knows, was vetoed by the President. The veto was not overridden by the Congress.

This bill represents a cost three times the amount of money the Senate was going to provide to rehabilitate depressed areas. The depressed area bill was also vetoed by the President, and the veto was not overridden by the Congress.

I am told that this time we are going to override the veto. I am told that this time we are going to appropriate three-quarters of a billion dollars and then override the veto. It will be the second time since Mr. Eisenhower became President of the United States that his veto has been overridden. Well, that is a fine record. We will vote to override the President's veto to fatten the Federal payroll, but not to meet the critical needs of this country.

Mr. President, there is so much crying to be done. Public money is needed to help rehabilitate depressed areas; to provide urban renewal in the rotting cores of our big cities; to upgrade public transportation in congested areas, now 20 years behind our needs; to clean up our polluted rivers; to do something about the thickening contamination in the urban air; to end the classroom shortage in our public schools; to increase teachers' pay; to close the dangerous gaps we know exist in our military defenses; to deal with the inadequate care and medical attention which is now extended to the old, the handicapped, and the feeble of this land.

Mr. President, the Congress may have difficulty in pointing to a record in these fields—and assuredly we cannot show with respect to any one of them that we have overridden a Presidential veto—but the plan is to overide the veto of the President to fatten the Federal payroll.

I could go on, Mr. President, but the point is clear. Public money is desperately needed for urgent problems. Let us not spend it for a pay increase without cause, without justification, without any proven need.

But if we pass the bill as proposed, then, for goodness' sake, let us at least have the grace afterward to stop talking about this being a time for self-sacrifice for the country. This bill is self-indulgence. Let us stop talking about bravely standing up and tightening our belts, and doing something strong about the challenge which faces us. This bill is weakness.

I have always stood for fair treatment of Federal employees, and I always shall. I am for the postal pay raise because I think it is justified on the record. I am for such adjustments as rising costs of living may require for Federal employees—all of them. But I am not in favor of squandering public money where the need is unproved, in the face of the desperately important and critically unattended to needs which face our country today, both at home and abroad.

I have sent to all Senators a telegram which summarizes my case for the amendment. I ask unanimous consent that it be incorporated in the RECORD at this point in my remarks.

There being no objection, the telegram was ordered to be printed in the RECORD, as follows:

I urge your support of my amendment limiting pay raises to postal workers. Its adoption would effect an annual saving of nearly half a billion dollars. No case has been made to warrant 7½-percent increase in salaries of classified civil service employees. Their present wage scale compares favorably with comparable work in private industry, while their fringe benefits are even more generous. Since last pay raise was granted 2 years ago, cost of living has increased only 1.6 percent. The pending bill will permanently add three-quarters of a billion dollars to the cost of Government at a time when public money is urgently required to meet critical needs on many fronts which we are leaving unattended.

Mr. CHURCH. For these reasons, I urge the adoption of the amendment. If it is adopted, I think we shall have rendered a signal public service.

If the amendment is not agreed to, I shall have to support the bill on final passage, in order to do justice to the postal workers. But in that event, we shall be paying a very high price to do right by one segment of our Federal employees.

Mr. McCLELLAN. Mr. President, will the Senator yield?

Mr. CHURCH. I am happy to yield.

Mr. McCLELLAN. In his remarks earlier I understood the Senator to make a statement with respect to the amount of money that his amendment would save annually. What was the amount stated by the Senator?

Mr. CHURCH. The best estimate that I have is that the amendment would effect an annual saving of about a half billion dollars.

Mr. McCLELLAN. Is that not approximately two-thirds of the amount involved in the bill?

Mr. CHURCH. That is right; it is approximately two-thirds of the amount involved in the bill.

Mr. McCLELLAN. I wish to compliment the Senator on the very able address that he has made in support of his amendment. I subscribe to the views that he has expressed, except that I have difficulty in agreeing with him in that we should vote for two-thirds of the bill that is bad in order to get the one-third which is needed enacted into law. That is not a sound or safe guide or policy to pursue.

Can we therefore, in the light of our fiscal situation, in view of the heavy burdens upon us, go further into debt by spending money we do not have, to raise salaries to the tune of a half billion dollars for employees where no adequate justification is shown to exist at the present time for such increase. I can't in good conscience do that. A case is made here for the postal employees, and I want to vote to increase their salaries.

I believe that we should raise the salaries of the postal workers. I agree that there is justification for doing so, and I want to do that. However, as the able Senator from Idaho has pointed out, there is no need to raise Federal salaries

across the board. There is urgent need for this half billion dollars—a half billion dollars that we actually do not have—to be spent for things that are critical to the security of our country.

Mr. CHURCH. I agree with the Senator.

Mr. McCLELLAN. I wish to compliment the Senator highly. I hope that his message has reached home in the hearts of enough Senators so that we can rise to the occasion and meet our responsibilities as Senators, and protect the interest of the taxpayers, while doing justice to those Federal employees in the postal service who deserve the increase that this bill provides.

Mr. CHURCH. I thank the Senator from Arkansas.

Mr. ERVIN. Mr. President——

Mr. KEATING. Mr. President——

Mr. CHURCH. I promised to yield to the distinguished Senator from South Carolina; when he finishes, I shall be happy to yield to the distinguished Senator from New York.

Mr. ERVIN. I wish to join the Senator from Arkansas [Mr. McCLELLAN] in commending the magnificent and courageous presentation which has been made to the Senate by the able and distinguished Senator from Idaho. The bill before the Senate has troubled me. I have made a study of the matter and have reached the identical conclusions which the Senator from Idaho has reached with respect to the proposal to raise the pay of Federal employees as set forth in the bill.

The postal workers have made out a case which in my judgment justifies the pay increase proposed for postal workers. I think there has been a total failure to make out a case for the increase of pay for Government employees generally.

I sometimes feel as though we ought to hang our heads in shame for the conduct of Congress in fiscal affairs. I make that statement because 28 years ago the people of the United States had a national debt of $30 billion. Today they have a national debt of $290 billion. They have that national debt because Congress has failed to exercise the moral and political courage to raise, by taxes upon the living, sufficient moneys to pay the appropriations it has made. Instead of doing so, Congress year after year, in 25 years out of 28, has appropriated more money than it has had the moral and political courage to raise by revenue measures bearing upon those living Americans who have a chance to walk up to the ballot box and say whether they approve of the way Congress is managing affairs.

It is time for Congress to quit appropriating the unearned income of unborn Americans, and that is precisely what this bill proposes insofar as it undertakes to raise the pay of Federal employees generally. I think it is time for somebody to represent these unborn Americans who, when they come into the world find themselves already in debt to an extent in excess of $1,600 apiece as their pro rata part of the national debt.

During 25 of the last 28 years, Congress has not had the moral and political courage to raise enough revenue to take care of the expenditures which it has been authorizing. I wish to commend the Senator for his courageous and intelligent presentation.

Mr. CHURCH. I thank the Senator from North Carolina. I appreciate his remarks. I can only add that yesterday the Senate passed a defense appropriation bill, which relates to the Military Establishment. When that bill comes out of conference, it is entirely likely, and I venture to predict, that the total amount of increase the Congress will make to strengthen the national defense, over and above the budget requests of the President, will be less than the amount of money that we provide in this bill to fatten the Federal payroll.

Mr. KEATING. Mr. President, will the Senator yield?

Mr. CHURCH. I yield.

Mr. KEATING. I realize the Senator from Idaho is a member of the committee, and therefore has been able to make a study of the problem in a way which we have not. As I understand the Senator's position, he favors a raise for postal workers because they have made out a case. As I have been able to review the testimony and the ample evidence presented to me, that is so. They have made out a good case.

The Senator from Idaho, however, does not favor the proposed raise for other employees of the Government because they have not made out a sufficient case. I ask this question of the Senator from Idaho, because I am somewhat impressed with his argument. There may well be an answer to it.

Mr. JOHNSTON of South Carolina. Mr. President, the Senator from New York has referred to the Senator from Idaho as being a member of the committee.

Mr. CHURCH. Mr. President, I wish to correct that statement. It was my privilege to serve on the committee for a period of 2 years, but I am no longer a member of the committee and have not been for some time.

My allusion to the committee had reference to the time I had previously served on it. I did not attend the actual hearings on this bill, but I have tried to review the reports made by the committee, and the evidence presented to justify the reports.

Mr. KEATING. I appreciate the clarification. I intended to say that the Senator has had an opportunity to study the problem in a way which has not been given to those of us who have never been members of the committee.

I ask the Senator to refer to page 220 of the transcript of testimony, on which appears the testimony of Mr. James A. Campbell, the president of the American Federation of Government Employees.

I also call attention to the statement on page 223, of the testimony of Mr. Campbell. As I say, there may well be an answer to these assertions, but it is said at page 220:

> During the 10-year period ended in February 1960, Federal classified employees received three raises which amounted to an average increase of 30 percent on a cumulated basis. During the same period, hourly rates of employees of seven of the largest corporations were raised through collective bargaining to a degree far exceeding that of Federal workers.
>
> The total increase ranged from 53.7 percent for the Sinclair Refining Co. to 87 percent for the Aluminum Co. of America, as indicated in appendix table 1. During the 2-year period from January 1, 1958, the hourly rates of employees of these seven companies were raised as much as 10 percent in contrast to no raise for Federal classified employees.

Then on page 223, below the middle of the page, there is this statement:

> It would require an average increase of approximately 12.5 percent to return classified salaries to their 1939 purchasing power.

I would appreciate it if the Senator from Idaho or, for that matter, any member of the committee, could enlighten us on whether those are accurate statements or inaccurate statements, or whether there is some other answer to them, because they do seem to me to present an argument on the other side.

The PRESIDING OFFICER. The Senator from Idaho has 1 minute remaining.

Mr. CHURCH. As the Senator knows, it is always possible to present an argument to support any proposition. Arguments have been presented here which are confined to certain wage scales prevailing in certain industries at certain times. I have referred the Senate to the increases that Congress has granted since 1945. The increases referred to by the Senator from New York relate to a more limited period, beginning in 1950. I believe that when we go back to the end of the war and take into account all the increases which have been granted by Congress until the present time, and compare them with the rising cost of living which has occurred during the same period of time, no case is made for the proposition that we have not acted fairly toward our Federal employees.

The evidence I have seen has led me to the judgment that no sufficient case has been made to justify a 7½-percent increase across-the-board. I would approve of an increase which was commensurate with the rise in the living costs since we last made a salary adjustment.

Mr. JOHNSTON of South Carolina. Mr. President, I have listened to the Senator from Idaho, and I was very much struck by some of his statements. I notice that the Senator has said that we increased the salaries since the war by 83.6 percent. I should like to call his attention to the fact that if that is true we ought to have a higher increase than we are proposing in the bill, for this reason. We did not increase the salaries during the war. They were frozen. When we go back to the time before the war we find that the dollar was worth 100 cents. Today it is worth 47 cents to the dollar. It would take a 106-percent increase to equal the salaries the employees were getting at that time.

Then, too, we must consider the income tax. They had salaries of $5,000 in the Federal Government prior to that time, and the man got whatever his salary was. Today the Government reaches out and takes, when the salary is over

a certain amount, 20 percent, 25 percent, or 30 percent of the man's salary. Therefore, according to the Senator's own statement and according to his own figures, we are not giving the employees enough. The committee thought so too. We have always dropped back every time that we gave an increase. Some Senators who have served on the committee, like the minority leader, know from their experience with bills of this kind that we have dropped back 1 or 2 percent practically every time we passed a salary increase bill.

We have found too that the work has been increased. The employees are turning out more work.

If we should increase the salaries of the postal workers and not the classified workers, I should like to point out some of the inequities that would result. The Post Office Department pays the salaries of the workers who clean the post offices if the post office occupies more than 50 percent of the space. If they do not occupy more than 50 percent of the space, that work is done by employees under the Classified Act. We must treat them all alike. We must be equitable in dealing with all of them. Postal workers and classified workers should received the same treatment. They both have to pay the same amount for the cost of living.

Mr. KEATING. Mr. President, will the Senator yield?

Mr. JOHNSTON of South Carolina. I yield.

Mr. KEATING. The Senator perhaps heard what I read from the testimony of Mr. Campbell. I would appreciate any enlightenment he can give us on this statement by Mr. Campbell, as to whether it is accurate or not accurate. I particularly wish to ask the Senator about this statement on page 8 of the report, near the top of the page:

> This survey discloses that the salaries of classified employees in the middle ranges—grades 5, 7, 9, 11, and 13, which include 419,734 employees—declined 20.3 percent from 1950 to 1960, notwithstanding salary adjustments approved by the Congress.

I assume that that statement is inaccurately phrased. I assume it means to say that their standard of living has declined 20 percent. Is not that what it means? The following sentence in the report is:

> This independent and unbiased conclusion means that in one short decade hundreds of thousands of Federal employees have been pushed 20 percent lower in their standards of living, in comparison to their friends and neighbors in private enterprise.

Mr. JOHNSTON of South Carolina. From what report is the Senator reading?

Mr. KEATING. I am reading from the top of page 8 of the report.

Mr. JOHNSTON of South Carolina. Is that the House report?

Mr. KEATING. It is the House committee report. I am reading from the top of page 8. I wonder if the Senator could clarify that statement. It seems to me that if that is a fact it is a rather persuasive argument for a raise for other Federal employees.

Mr. JOHNSTON of South Carolina. Well, I have no answer, but according to what is stated here, the salaries declined 20.3 percent.

Mr. KEATING. I suppose that the actual salary of any Federal employee has not declined. I believe that means to say that the standard of living has declined because the cost of living has gone up more than the salaries have gone up. Is that correct?

Mr. JOHNSTON of South Carolina. The purchasing power of the salary had decreased. I believe that is what was intended to be conveyed by that language.

Mr. KEATING. I believe that is true. In the statement of Mr. Campbell, he said that during the 10-year period ended in February 1960 Federal classified employees received a 30-percent raise as compared with 1953, and 87 percent of the hourly rates paid by the seven large corporations.

I wish to ask the Senator from Idaho a question, because I recognize, having tried lawsuits, as has the Senator, that we can pick out peculiar situations, and make any case.

I ask the Senator from South Carolina whether he feels that this statement by Mr. Campbell is a fair and accurate statement, as picturing the fact that the increases for Federal employees generally have been well below the increases for workers in private industry.

Mr. JOHNSTON of South Carolina. From all the facts brought out in the committee, the Federal Government is behind the large corporations in the United States in increasing the pay of its employees.

Mr. KEATING. I thank the Senator from South Carolina.

Mr. JOHNSTON of South Carolina. I can give a list of figures for different periods of time. All the information has been placed in the RECORD. It shows that the Federal Government is behind private industry in every big city in the United States in which we could gather the information. For example, blue-collared workers or laborers in Boston are 28 percent below; helpers are 27 percent below.

We went into this question from city to city and place to place in the United States, and we found that that is correct.

I myself believe that the proposed increase is but half of what it would be if we were to raise the pay to what is paid by the big corporations in the United States. However, we cannot afford to do that at this particular time, so we want to pass a bill which will be within the limits of the Government's ability to pay. I hope it will be signed by the President.

Mr. CARLSON. Mr. President, will the Senator yield me 2 minutes?

Mr. JOHNSTON of South Carolina. I yield 2 minutes to the Senator from Kansas.

Mr. CARLSON. Mr. President, I appreciated the statement made by the Senator from Idaho today. I shall address myself to this question.

There are several features about the bill which I do not like, but it is the pending bill. It is the only bill before the Senate. I think I would be less than frank if I did not say I do not believe we can pass legislation, personally, I could not favor passing legislation, which would, in my opinion, treat unfairly one group of Federal employees as compared with another group.

Mr. Campbell's statement on page 218 of the hearings calls attention to some of the problems of the classified workers.

While I am talking about Mr. Campbell, I wish to say in his behalf, and in behalf of those whom he represents, that he is, in my opinion, one of the ablest of the various representatives of the labor group who come before us. He has rendered outstanding service on behalf of the classified employees of the Nation. I call attention to this statement by Mr. Campbell:

> Eighty-seven percent of the 2,200,000 Federal employees have their salaries or wages fixed under three separate pay systems—I repeat—three separate pay systems. These three systems are:
>
> 1. Classification Act, covering 970,000 employees.

They are the employees whom we are talking about at the present time in discussing the amendment.

> 2. The Postal Pay Act, covering 470,000 employees.
>
> 3. Army-Air Force and Navy wage systems, 480,000.

There are those three different groups.

I shall read from the statement what has happened as between the classified employees, whose pay is fixed by Congress, and the Wage Board employees. I read from page 222 of the hearings:

> A comparison of how Wage Board and classified rates have differed in one 4-year period—1952–55—will illustrate the advantage of an annual review.

The discussion was as to whether there should be an annual review.

> During those 4 years classified salaries were increased once by 7.5 percent. In the same period wage board rates advanced 20.7 percent. An increase of that size probably would have been challenged if proposed as a single raise, but divided into four separate raises it was assimilated without question.
>
> The year-to-year wage board raises were as follows: 1952, 5.5 percent; 1953, 7.8 percent; 1954, 4.3 percent; 1955, 1.7 percent.

I desired to stress that fact because classified employees during that 4-year period received a 7½ percent pay increase, while wage board employees, whose salaries and wages are fixed by boards of the Federal Government, received a 20-percent increase. Therefore, I do not believe that we could, with any justice at all, adopt an amendment which would unfairly, in my opinion, treat classified Federal workers as compared with other workers.

Mr. KEATING. Mr. President, will the Senator yield?

Mr. JOHNSTON of South Carolina. I yield.

Mr. KEATING. I am grateful for the explanation made by the Senator from Kansas. It is very difficult for us in the Chamber to reach a correct conclusion without having heard the testimony and studied it at great length. The testimony of Mr. Campbell impresses me as being very persuasive on the point that the rates of pay of Federal employees

generally, including the postal workers, have not kept pace with the rates in other industries.

If I may have permission, I should like to ask the Senator from Kansas whether he believes that the testimony of Mr. Campbell, which appears to be so persuasive, is much to be relied upon, or whether Mr. Campbell has picked out certain isolated cases which make a better case than really it should.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. JOHNSTON of South Carolina. I yield 1 additional minute to the Senator from Kansas.

Mr. CARLSON. Mr. President, the figures in the wage board decisions are based on comparable wages in the communities. Therefore, I think they are figures which really and truly reflect the wage increases which have been paid employees who come under that system, as compared with the classified and postal workers who come under the regular Federal pay system.

Mr. JOHNSTON of South Carolina. The rates fixed by the wage boards are based on the prevailing wages in the respective areas.

Mr. CARLSON. They reflect the wages out in the communities.

Mr. KEATING. Do the Senator from Kansas and the Senator from South Carolina believe that the years which have been selected make an especially good case for the employees? If another series of years, or a 10-year period, or any other period, had been selected, would substantially the same effect have been shown?

Mr. CARLSON. It is my opinion that they would show substantially the same effect.

Mr. KEATING subsequently said:

Mr. President, will the Senator yield me a half a minute?

Mr. JOHNSTON of South Carolina. I yield.

Mr KEATING. Mr. President, earlier in the day I made some remarks in connection with an amendment, and I ask unanimous consent to include at the conclusion of my remarks copies of several letters which I have received with reference to this subject.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR KEATING

This measure, viewed in its overall impact, is designed to bring the salaries paid Federal employees more nearly in line with those paid to workers in private industry. As such, it should command wide support.

We now learn that in the last 10 years, literally thousands of fine Federal employees have dropped some 20 percent lower in their standards of living, in comparison to their neighbors who happen to work in private industry.

Here are some more statistics which have been furnished to me and which I believe to be accurate: The average overall private industry wage is $15 a week or $780 a year higher than that of Federal employees doing the same type of work. Even the proposed increase will not bring the level of Federal salaries up to that of salaries outside the Government, but it will be a step in the right direction.

As against the 30-percent increase in Federal employees' salaries in the last 10-year period, here are some more comparisons with private industry. Hourly wages have increased at the following rate since 1950 in these specific companies: General Motors Corp.—a 62-percent advance, compared to 30 percent for Federal employees. United States Steel 66 percent—of this increase 9.5 percent has been since January 1, 1958. There has been no increase in Federal salaries during the past 2 years. The Aluminum Co. of America has raised its wages 87 percent in the last 10 years.

Other pertinent figures include: Goodrich Rubber—56 percent, Lockheed Aircraft, 63 percent. These percentages were supplied by the Bureau of Labor Statistics, and therefore must be viewed as reliable. These figures make the Federal salary increase of 30 percent in the last 10 years look small indeed.

I have received literally thousands of letters from postal workers and other Federal employees, as well as their families and friends, pointing out the need for an adequate pay raise measure. These communications demonstrate the very real, the very personal manner in which the present inadequate wage scales are affecting these people.

A postal worker's wife in Tonawanda wrote me in part as follows:

"As the wife of a post office employee, I am writing to you in the hope that you may act in getting a pay raise bill passed.

"We have our home and three children to support. We live in a modest community but we can't associate with any of our neighbors because their incomes are far above ours. I have a part-time job, driving for a school but with our combined income, we have quite a problem just getting by. It doesn't seem fair to—just get by, not ever being able to afford anything but food and clothing, while most everyone around us has new cars and can take vacations. We have vacation time but where can you go on nothing. We can't even charge anything extra because there just is not enough money left over after paying mortgage payments, light, heat, and food."

Here is one from a constituent of mine in Rochester:

"Both my wife and myself are career distribution clerks at the Rochester Post Office. I have 11½ years of service and my wife has a little over 1 year. We have four children going to school; a mortgaged home; and one car, which is a necessity. Our living expenses are such that even though we are both working we can only just manage to live from one payday to the next. We would like to be able to help further the education of our children and live as others do."

A lady from Staten Island recently wrote me the following letter on this subject:

"I am the wife of a Federal employee who works in New York City, and the mother of six children. We live in a housing project.

"I write with much experience about the continuous rising of living expenses that make the bare necessities of an existence on this earth: food, rent, and clothing, a constant, impossible struggle.

"With an outside job there is no leisure time to divide between family and community and only a slight chance that anyone can match expenses. Yet, without an outside job, my family and I would be hard put to survive.

"Please make possible a worthwhile, liveable raise for those of us who must depend on Federal salaries. Let us get in step with the rest of America on our pay."

Here is one from a housewife in Floral Park:

"Have you ever missed a night's sleep worrying how you were going to pay your bills? Does your wife ever hesitate to call the doctor when your children are sick?

"Well, if you were a postal worker you would know these problems. My husband has a second job as most postal workers do, and we are still just getting by. The cost of everything has gone up but not the post office salary. When the bill for the post office raise comes up please vote yes, as we do need more money just to live on."

I also have a letter from a Federal worker in New York City. He writes:

"For the past years it's been very hard for us to meet expenses and I have had to take other work in order to meet my obligations.

"I am away from my home too long and the children do not see enough of me. It seems like the only time I am home is Sunday, but then I'm so tired I find it hard to bother with them.

"You can easily see the problem. I'm a career man and I don't want to give up my job with the Government. I've been on 20 years, so you can easily see why.

"We Government workers need a pay raise—now; not in some future day. Help us please."

Finally, here is a letter from the wife of a post office worker in Elmira, N.Y.:

"As the wife of a postal clerk, I would appreciate your affirmative vote on the pay raise bill.

"This increase is definitely needed—the few that we have received in recent years have been very minor in the lower grade levels, in which the majority of Federal workers are employed. The compensation paid to postal employees is not commensurate with salaries paid in private industry; are not high enough to permit the same standard of living enjoyed by these same employees in 1939. Even a 9-percent increase will not bring the salary level up to these standards.

"We would not be causing inflation, as has been indicated—we need the increase because of inflation.

"You are familiar with the unemployment in the Elmira area. Usually a situation like this has the effect of downgrading the cost of living in an area. But the reverse is true. The new sales tax, an increase in the school tax and the reappraisal, which will increase our other real estate taxes, are but a few of the items that will take what increase we may receive.

"A regular postal clerk's salary is $4,875 annually. These are the five largest items in our budget:

Taxes—Income (Federal and State), real estate, sales, other	$1,000
Food	1,800
Mortgage payments	840
Insurance and utilities	800
Total	4,440

"You can readily see why the increase is needed."

These letters are typical of the flood of communications I have received from all over New York State testifying to the great need for a pay raise for postal and other Federal employees. They point up graphically—in a way no set of cold figures could—the urgent need for salary increases to bring the pay for these Government workers more in line with those now offered to employees in private industry. The additional fact is, however, that the cold figures support the need for this legislation.

We must eliminate this inequity in our laws. We can do it by rejecting amendments to this measure which will unduly water it down and prevent its benefits from fully helping these people out.

I hope this measure, so important in human terms to so many of our people, will gain the overwhelming approval of the Senate.

Mr. BEALL. Mr. President, will the Senator yield?

Mr. JOHNSTON of South Carolina. I yield 3 minutes to the Senator from Maryland.

Mr. BEALL. Mr. President, I associate myself with the Senator from South Carolina and the Senator from Kansas in opposing the amendment. I think the Senators have shown that the adoption of this amendment would be very definitely discriminatory against the classified civil service employees.

I must oppose any amendment which would exclude the civil service employees from the well-earned and well-deserved pay raise. The persons who would be excluded by such an amendment are dedicated public servants. They are men and women who, at a sacrifice to themselves, are devoting their entire time and talent to a better civil service. That is my personal observation.

I know many persons in the civil service who could earn much more in private industry. They are making a career of their service in the Government, and we should not turn our backs on them.

The 7½ percent salary raise has been fully justified, I believe, by the Senator from South Carolina and the Senator from Kansas. Taking that for granted, who could be more deserving of the raise than the employees in the classified civil service?

The prices of commodities, rents, and everything else in Washington and the surrounding suburbs, as elsewhere, have risen substantially. The civil service employees need this pay raise in order to meet the rising costs of living.

In my opinion, it would be cruel for Congress to exclude the civil service employees from the pay increase. In fact, it would make a mockery of the entire move for the much deserved increase.

I hope the Senate will not agree to the amendment. As has been so ably explained by the Senator from South Carolina and the Senator from Kansas, to adopt the amendment would result in discrimination against a dedicated group of Federal employees.

Mr. JOHNSTON of South Carolina. I yield back the remainder of my time.

Mr. CHURCH. My time has been exhausted.

Mr. JOHNSON of Texas. Mr. President, I hope the amendment will not be adopted. I do not believe we should say, "Brothers, we will give you a pay raise; sisters, we will not give you one."

I do not think we should say to the postal workers, "We recognize your faithful, dedicated service to the Government"; but to a civil service clerk on duty at some remote post, "We are going to reduce your pay." I believe we ought to deal with all these people equitably and fairly.

The committees have carefully considered this measure. They began with a 10 percent provision, and then reduced it to 9 percent, and now have reduced it to 7½ percent. I believe they have dealt equitably and fairly with these employees.

I do not think we wish to say we will give a postal carrier a pay increase, but will not give a civilian employee in Guam an increase in pay. I do not believe it fair to provide a pay increase to one group, but to ignore another in that connection.

Mr. President, admittedly, savings could be made. For instance, we could have cut in half the Defense Department appropriations we considered and passed, yesterday; but I do not think such procedure would be wise.

Therefore, Mr. President, I hope the amendment will be decisively rejected.

Mr. KERR. Mr. President——

Mr. JOHNSTON of South Carolina. Mr. President, I yield 1 minute to the Senator from Oklahoma.

The PRESIDING OFFICER. The Senator from Oklahoma is recognized for 1 minute.

Mr. KERR. Mr. President, I wish to congratulate the committee on the work it has done.

I am glad the bill it has reported provides for a pay increase for the postal employees and for all the other employees, equitably.

Mr. JOHNSON of Texas. Mr. President, I yield back the remainder of the time under my control.

The PRESIDING OFFICER (Mr. Moss in the chair). All time on the amendment has either been used or been yielded back.

The question is on agreeing to the amendment of the Senator from Idaho [Mr. CHURCH]. On this question, the yeas and nays have been ordered; and the clerk will call the roll.

The Chief Clerk called the roll.

Mr. MANSFIELD. I announce that the Senator from Colorado [Mr. CARROLL], the Senator from California [Mr. ENGLE], the Senator from Arizona [Mr. HAYDEN], the Senator from Georgia [Mr. RUSSELL], the Senator from Mississippi [Mr. STENNIS], and the Senator from Texas [Mr. YARBOROUGH] are absent on official business.

I also announce that the Senator from Arkansas [Mr. FULBRIGHT] and the Senator from Missouri [Mr. HENNINGS] are absent because of illness.

I further announce that the Senator from Tennessee [Mr. KEFAUVER], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Michigan [Mr. MCNAMARA], the Senator from Oregon [Mr. MORSE] and the Senator from Wyoming [Mr. O'MAHONEY] are necessarily absent.

I further announce that, if present and voting, the Senator from Colorado [Mr. CARROLL], the Senator from California [Mr. ENGLE], the Senator from Mississippi [Mr. STENNIS], the Senator from Texas [Mr. YARBOROUGH], the Senator from Arkansas [Mr. FULBRIGHT], the Senator from Missouri [Mr. HENNINGS], the Senator from Tennessee [Mr. KEFAUVER], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Michigan [Mr. MCNAMARA], and the Senator from Oregon [Mr. MORSE] would each vote "nay."

Mr. KUCHEL. I announce that the Senator from Maryland [Mr. BUTLER] is absent because of illness.

The Senator from Indiana [Mr. CAPEHART] is absent by leave of the Senate.

The Senator from New Hampshire [Mr. COTTON] and the Senator from Nebraska [Mr. HRUSKA] are necessarily absent.

The Senator from South Dakota [Mr. MUNDT] and the Senator from Kansas [Mr. SCHOEPPEL] are absent on official business.

The Senator from North Dakota [Mr. YOUNG] is detained on official business.

If present and voting, the Senator from Nebraska [Mr. HRUSKA] and the Senator from Kansas [Mr. SCHOEPPEL] would each vote "nay."

The result was announced—yeas 22, nays 58, as follows:

[Roll No. 226]

YEAS—22

Brunsdale	Ervin	Saltonstall
Case, S. Dak.	Frear	Talmadge
Chavez	Goldwater	Thurmond
Church	Hickenlooper	Wiley
Cooper	Holland	Williams, Del.
Curtis	Lausche	Young, Ohio
Dworshak	Lusk	
Ellender	McClellan	

NAYS—58

Aiken	Gore	Mansfield
Allott	Green	Martin
Anderson	Gruening	Monroney
Bartlett	Hart	Morton
Beall	Hartke	Moss
Bennett	Hill	Murray
Bible	Humphrey	Muskie
Bridges	Jackson	Pastore
Bush	Javits	Prouty
Byrd, Va.	Johnson, Tex.	Proxmire
Byrd, W. Va.	Johnston, S.C.	Randolph
Cannon	Jordan	Robertson
Carlson	Keating	Scott
Case, N.J.	Kerr	Smathers
Clark	Kuchel	Smith
Dirksen	Long, Hawaii	Sparkman
Dodd	Long, La.	Symington
Douglas	McCarthy	Williams, N.J.
Eastland	McGee	
Fong	Magnuson	

NOT VOTING—20

Butler	Hennings	O'Mahoney
Capehart	Hruska	Russell
Carroll	Kefauver	Schoeppel
Cotton	Kennedy	Stennis
Engle	McNamara	Yarborough
Fulbright	Morse	Young, N. Dak.
Hayden	Mundt	

So Mr. CHURCH's amendment was rejected.

Mr. JOHNSON of Texas. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. JOHNSTON of South Carolina. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment.

Mr. DIRKSEN. Mr. President, I send an amendment to the desk, which I ask to have stated.

The PRESIDING OFFICER. The amendment of the Senator from Illinois wil be stated.

The LEGISLATIVE CLERK. It is proposed to strike out all after the enacting clause and insert in lieu thereof:

The rates of pay of Federal employees should be generally comparable to rates paid by private enterprise for similar work, should adequately recognize differences in difficulty and responsibility of work and provide material incentive to advance in the service, and should be governed by rules of administration which make pay a useful tool of management.

In accordance with this policy the President is authorized and directed.

1. To adjust the rates of pay in the Classification Act of 1949, as amended, the Postal Field Service Pay Act, the Veterans Benefit Act as amended, and the Foreign Service Act as amended, to levels generally comparable with those reported by the Bureau of Labor Statistics as a result of its current survey of pay rates in private enterprise.

2. To revise the pay structures in the said acts in order to insure internal equity and to provide adequate incentives for advancement.

3. To establish rules for administration and use of the pay rates thus established.

The President is authorized and directed to make these adjustments and revisions effective as of the first day of the first pay period which begins on or after January 1, 1961.

Mr. DIRKSEN. Mr. President, I yield myself 15 minutes.

The PRESIDING OFFICER. The Senator is recognized for 15 minutes.

Mr. DIRKSEN. Mr. President, this pay bill has indeed done a grand shuffle. When it first began it started at a level of 23 percent. The second approach was at the level of 15 percent. The third approach was at the level of 9 percent. The bill that is presently before us calls for an increase of 7½ percent.

If it is applied generally across the board to 1,700,000 workers, it is very easy to calculate the budget impact of the bill. Just figure $100 million for every 1 percent of pay increase, and that makes an easy rule-of-thumb calculation.

It seems amazing to me to make this proposal in view of the fact that in the Labor appropriation bill for fiscal 1960 we provided a sum of $1 million, of which $500,000 was earmarked for a study of so-called comparability of remuneration in government, as distinguished from industry. That job was assigned to the Bureau of Labor Statistics. Our present information is that they have completed this work in some 30 metropolitan centers. It is intended to do the job in something over 80 centers. It will not be completed until September of this year.

The whole purpose of this study, in the hands of people in an agency created by Congress, was to determine what the disparity was between the pay in business and industry and the pay in government. It raises this interesting question: Do we not want to wait for this survey to be completed? Are we afraid that results of the survey will cause us to confess that this afternoon we have wasted $500,000 of the people's money? Why have the survey? We are the ones who indicated it in the first instance, and I think it is long overdue. That kind of survey should have been made some years ago, because the question of what the pay is in industry as compared with what it is in government, or vice versa, continues to arise like some annual specter whenever we deal with the pay structure.

The amendment now at the desk operates from that stance, and it is very simple. It strikes out everything in the bill except the enacting clause, and it not only authorizes, but directs, the President of the United States to readjust the pay, and also the pay structures and the inequities that have become almost rigid in the pay structure, and do it by the next pay period after January 1, 1961.

It has to be done, as the amendment provides, at levels that will be generally comparable with those reported by the Bureau of Labor Statistics, as a result of its current survey, of pay rates in private enterprise.

I am ready to see this problem resolved. I should like to see it resolved. We continue to rush up hill and then we rush down hill again. If one examined the testimony on the 23 percent increase bill, he would find it was just as intense, just as passionate, just as persuasive as the testimony on the 15-percent bill.

If Senators will examine the testimony with respect to the 9-percent pay raise bill, they will observe that the same arguments were made as were made for the larger percentages. It was said the employees could not get along without the increase. This "bogey" continues to haunt us from time to time.

What is proposed is a sensible approach, unless we want to confess we have no confidence in the Bureau of Labor Statistics and that we are afraid of the results, which will not be known until sometime close to election. Are we afraid the issue will not be resolved until after the Congress adjourns? I am content to abide the issue. I am content to do so now.

If this agency in the Department of Labor, on which we lavish large sums of money every year, has any value at all, then of course we could well wait until the study has been completed. The free enterprise system of this country uses the agency figures. The business structure of this country uses those figures. The other agencies of the Government use those figures. Are the Senate and the House to say, "That is perfectly all right, but we do not want to bother about those figures." That would be an amazing confession, to say the least.

We can say, "Well, we 'kissed' $500,000 goodby. The devil with this study. The devil with the Bureau of Labor Statistics. We will ignore them. We will not wait."

We could say that, notwithstanding the fact that it takes a given amount of time, always, to assemble the data and to do the job. Once the job is done, the amendment provides that upon the basis of the levels which are ascertained, to get comparability with remuneration in industry, the President "is authorized and directed to make these adjustments and revisions effective as of the first day of the first pay period which begins on or after January 1, 1961."

I listened with interest to the argument of the distinguished Senator from Idaho. Much of the burden of his argument was that there are no real, factual data, except in the case of the postal workers. That is the point the Bureau of the Budget makes. The Director of the Bureau of the Budget appeared before the Committee on Post Office and Civil Service.

Incidentally, this is a good time to come to grips with the question of how the President may feel. The President of the United States supports the Director of the Bureau of the Budget. The Budget Director does not take a position unless he confers with the President.

On the 28th of April the Budget Director appeared before the House Committee on Post Office and Civil Service. I read one sentence from what he said. It needs no further argument:

> The administration finds no justification at this time for enactment of any legislation which would provide general increases in salary rates under the Classification Act, the Postal Field Service Pay Act, and other statutory pay systems.

The Budget Director elaborated. The whole statement can be compressed, I think, in a minute of time.

The reason for the position is that the enactment of the general salary increases would ignore the only sound principle of Federal pay fixing, which is reasonable comparability. That is the reason we set up the survey group. We are waiting for the study to be completed. We are waiting for the results.

The second reason the Director of the Bureau of the Budget assigned was that, based on information presently available, enactment of any flat percentage or dollar increase would result in excessive salary rates in some grades and possibly inadequate salary rates in other grades.

We can compress this in a few words—rigidities and inequities which have persisted in the salary structure.

The third reason put forth is that any salary increase would be without sound factual justification. We are waiting for the data.

Realizing, of course, the rather intense circumstances under which the bill was rushed along, and the desire that no amendment be agreed to, so as to avoid a conference, in order to send the bill to the President of the United States, to make sure there will be no pocket veto, it seems to me in that kind of haste we are playing with the fiscal responsibility of the country, because three-quarters of a billion dollars are involved in the bill.

I am not insensible to all of the arguments which have been made, but I do not wish to be pushed into this thing when the Budget Director tells us there is no factual foundation, the comparability study has not been completed, and the inequities still persist. Certainly they do.

Mr. CASE of South Dakota. Mr. President, will the Senator yield to me?

Mr. DIRKSEN. If the Senator will permit, I should like to finish a thought or two first.

I know how easy it is to assail the Budget Director. That seems to be a common indoor sport in Congress today.

I simply remind Senators that in 1921 we passed the Budget and Accounting Act. In that act, among other things, we set up a Bureau of the Budget and named a Director of the Budget. The Director has been carrying on since that time. If Senators want to know what are his responsibilities, they can examine the 1921 law. His business is to help the President determine how to most efficiently and economically operate this Government. His business is to give aid to the committees of the Congress. That is what the law provides. His

business is to have the departmental budget officers get their material together and come in to pool their information, so that there can be some responsible fiscal operation in Government.

There was a time when at the end of a session of Congress nobody knew what were the fiscal circumstances. Every committee, prior to 1921, not only took action upon its own proposed legislation, but also took action upon proposed appropriations. There was a wilderness until the act was passed to correct it.

That is the responsibility of the Budget Director. I will say, with respect to Maurice Stans, the present Director, he is in my judgment not one of the most, but—I think—the most capable Budget Director who has occupied that office since the Budget and Accounting Act of 1921 was passed, and I make absolutely no exception.

The job of the Director of the Budget is to move into this matter, to advise the President, and to advise the committees of Congress. That he has done. The only way we are going to properly resolve the issue now, as I see it, is to strike out everything after the enacting clause and to authorize and direct the President to readjust the pay schedules, the pay rates, and the structure, after this survey has been completed in September, after he has the factual foundation to determine pay comparability and to do the job properly. In my book, it is that simple. I have nothing more to say. I am prepared to yield back the remainder of my time, and I am ready to vote.

Mr. CASE of South Dakota and Mr. BUSH addressed the Chair.

Mr. DIRKSEN. Mr. President, I yield to the Senator from South Dakota.

Mr. CASE of South Dakota. The Senator has referred to the bill as involving three-quarter billion dollars, and the same reference has been made at other times during the debate. I wish to point out to the Senator that this is an annual recurring cost.

Mr. DIRKSEN. Yes.

Mr. CASE of South Dakota. This bill does not involve merely three-quarter billion dollars. Yesterday we were talking about appropriations for the Department of Defense. The price tag for an item might be three-quarter billion dollars, or so many hundred million dollars, or something else, but it represented a one-time purchase. In this instance, if we pass the bill, without having the benefit of the study the Senator has suggested, we shall be committing the country to an annual expenditure of an additional three-quarter billion dollars.

Mr. DIRKSEN. Exactly. I am reminded of the story of the fellow in jail back home. When I walked across the courthouse yard I said, "What are you in for?"

He replied, "Larceny."

I said, "For how long?"

He said, "From now on."

Mr. President, this is going to be from now on.

Mr. BUSH. Mr. President, will the Senator from Illinois yield 10 minutes to me in order to enable me to speak in support of the amendment at the proper time?

Mr. DIRKSEN. I shall be delighted to do so.

Mr. CHAVEZ. Mr. President, will the Senator yield?

Mr. DIRKSEN. I yield.

Mr. CHAVEZ. I ask the Senator from Illinois the difference between raising the wages of employees of the U.S. Government and the proposed appropriation of $4 billion for foreign aid, which we considered this morning in committee?

Mr. DIRKSEN. Mr. President, I see that argument advanced in letters, and it is easy and appealing. I will explain the difference. The Constitution provides that provision shall be made for the common defense. Foreign aid, misnamed "mutual security," is a collective security arrangement and a program enacted by Congress in pursuit of a constitutional principle. By that law the Commander in Chief and the Congress, in its capacity as the exclusive legislative and law-making body of the Government, undertakes in partnership to subserve the interest of common defense, which involves all of the 179,200,000 people in this country, and not just a group. That is the difference.

Mr. CHAVEZ. Where are we to get the help about which the Senator is talking?

Mr. DIRKSEN. What help?

Mr. CHAVEZ. Help for foreign aid to enable Uncle Sam to get along in the world. I ask the Senator where we are getting with respect to Japan, Korea, the Philippines, and Turkey.

Mr. DIRKSEN. Mr. President, I did not know that we were going to debate the mutual security bill this afternoon. If we are, I had better ask for an extension of time for 2 or 3 hours to enable me to get my notes. We may as well consider the bill now as later. I thought we were debating a pay bill and attempting to find a factual, equitable, and reasonable basis on which to act, since we are dealing with 1,570,000 people, which is quite different from the interests of 179 million men, women, and children, and probably quite different from the interests of 67 million people who file income tax returns in this country and who have some stake in the matter.

Mr. CHAVEZ. Mr. President, will the Senator yield further?

Mr. DIRKSEN. I yield.

Mr. CHAVEZ. I do not run easily. I do not care what is said. I prefer to take care of the American girl in Washington and in New Mexico and in Illinois than to help elsewhere. That is the only difference between the attitude of the Senator from Illinois and myself. I wish to take care of our girls.

Mr. DIRKSEN. I do not quite get the point of my distinguished colleague from New Mexico.

Mr. CHAVEZ. Probably the Senator does not want to get the idea.

Mr. DIRKSEN. I have some interest in all the people of this country, including even the taxpayers, who must make up the money which we appropriate, since it comes from the general revenue.

Mr. CHAVEZ. Does the Senator worry about the $4 billion that is appropriated for foreign aid?

Mr. DIRKSEN. I answered my friend a moment ago and tried to debate the subject on the high ground of constitutional responsibility for the defense and survival of this country, which takes it out of the narrow course in which sometimes we move.

I yield now to the distinguished Senator from Connecticut [Mr. BUSH] 10 minutes, if I still have 10 minutes remaining.

Mr. BUSH. Mr. President, the basic issue of our times is whether the United States, a republic with a representative form of government based upon free elections, can compete successfully with the totalitarian dictatorship which rule the Soviet Union and her Far Eastern ally, Communist China.

I believe we can, once the American people, and their representatives in Congress, awaken to the realities we face. But I must confess, Mr. President, that there are grounds for pessimism when one considers the record of this Congress to date, and especially the political cynicism which has brought this pay increase bill for Government employees before us today.

World tensions have been heightened by Khrushchev's torpedoing of the summit conference, and by renewed Communist pressure to drive us from our oversea bases, as evidenced by the rioting in Japan.

In recognition of the increased danger created by these and other events on the international stage, the Senate on yesterday increased the defense budget by more than $1 billion.

But, Mr. President, our national security, our military strength, is based upon the financial stability, and the credit of the United States. While appropriating billions for defense, we seem determined to undermine those foundations upon which our defense rests by refusing to exercise fiscal responsibility.

President Eisenhower submitted a budget with an estimated surplus of $4.2 billion, which is needed to retire some of our huge national debt and thus strengthen the credit of the National Government.

The committees in charge of taxation have refused to approve his recommendations for raising the revenues required to achieve that surplus. Nondefense spending has been proposed far in excess of the President's budget.

Unless we exercise restraint and insist upon fiscal responsibility, not only will we wipe out the projected surplus but also run the danger of incurring an inflationary deficit in the coming fiscal year.

In the Washington Daily News of today is an editorial entitled "Rush to a Deficit," which says, in part:

> In the rush toward adjournment, our convention-minded Congress is showing a reckless tendency to play fast and loose with our hard-earned dollars.
>
> * * * * *
>
> As the outlook now adds up, extra spending of nearly $5 billion is in the works—more than the surplus President Eisenhower

had estimated for next year. And an optimistic estimate it was, too.

Mr. President, I ask unanimous consent that the editorial be printed in the RECORD at this point in my remarks.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

RUSH TO A DEFICIT

In the rush toward adjournment, our convention-minded Congress is showing a reckless tendency to play fast and loose with our hard-earned dollars.

The trend is to more spending and less income—a sure route to inflation.

While the Senate Finance Committee, over the objections of its wisest heads, was voting to cripple the Government's revenue by cutting some obnoxious but productive taxes, other committees were trying to outdo each other in new ways to spend.

The House voted to raise Government salaries, and a Senate committee promptly approved the plan. Increases in spending for housing, welfare and defense were being eagerly pushed.

As the outlook now adds up, extra spending of nearly $5 billion is in the works—more than the surplus President Eisenhower had estimated for next year. And an optimistic estimate it was, too.

The transportation, telephone and telegram taxes the Senate committee has voted to repeal were imposed on a temporary basis because of the Korean war. They have been reimposed year after year, simply because the Government needed the money. The Government needs the money no less now.

Repeal of these taxes would be desirable in normal times. So would the repeal of any taxes. But there is only one practical way to reduce taxes—and that is by first reducing spending. The waste and overspending in the Government is sinful. But a worse crime against the people would be inflation—robbing the dollar of its integrity by running up the Government's debt.

The same finance committee which voted to take away $752 million of the Government's income by reducing the transportation and communication taxes also found it necessary to raise—again—the Government's legal debt limit to $293 billion, $4 billion more than what the Government now owes. The spending, tax-cutting schemes Congress is cooking up may put temporary icing in our cake—but deficit-made inflation will take away the cake.

Mr. BUSH. The pending pay increase bill would unwisely add $750 million to Government spending, not only in the coming fiscal year, but in all the years to come.

I say unwisely, because we do not have the facts before us upon which to base a judgment concerning what amounts of salary increases, and for what positions, are needed to compensate Government workers fairly, and to attract the skills the Federal service requires.

Only last year, we appropriated $500,000 to enable the Bureau of Labor Statistics to conduct a study to determine those facts. The Bureau is scheduled to submit a report in September of this year, so that carefully considered legislation may be drafted for submission to the next Congress to provide pay adjustments for all employees to compensate for cost-of-living increases, and to correct inequities which exist in the salary schedules.

As the Senator from Illinois has said, we would waste or throw out the window $500,000 of the taxpayers' money by passing a bill which takes the shotgun approach of increasing all salaries across the board by 7½ percent for most Government employees, and by more than 8 percent for the postal workers.

The bill has been brought before us for one reason and one reason only: politics in a presidential election year. We might as well face it. That is why we are facing the bill.

Organizations of postal workers, and of other Government employees, have brought heavy pressures to bear upon Members of the Senate and of the other body. There have been threats, sometimes veiled and sometimes bluntly stated, that Members who vote against the pay bill will suffer at the polls. It is surrender to these pressures that has brought the bill to the Senate floor today.

The political cynicism behind the bill lies in the fact that it is well known that it is entirely unacceptable to the President of the United States.

Testimony has been submitted to that effect by the Director of the Bureau of the Budget, and by Senators on the floor today.

Some feel secure in voting for it, with the knowledge that the President will rescue them from what they know is folly by a veto. Others feel confident that there will be sufficient votes to override the veto. In either case, it is hoped to gain some political advantage by voting "for" the Government employees, and picturing the administration as being "against" them.

This kind of political maneuvering may be acceptable in normal times. In the days in which we live, when the United States and the entire free world are in increased danger from Communist aggression, I, for one, will have no part of it.

Mr. President, I have voted in the past for salary increases for postal and other Government workers. I expect I shall do so again. But I shall not so vote until I have a solid base of facts upon which to form a judgment.

I have consulted with postal workers from my own State during all my 8 years of service in the Senate, and especially in the past few months. I enjoy friendships among them, and have a sympathetic understanding of their problems.

I have carefully considered all the information they have presented to me, and all the information I could obtain from other sources.

The levels of postal salaries have been compared with those of State government employees in Connecticut, and with wages in industrial and nonindustrial employment in my State and elsewhere.

Although it is difficult to draw comparisons, a general conclusion can be reached. It has not been demonstrated that the salaries of postal workers and other Federal workers lag behind those prevailing in the Connecticut State government service, or in private employment in my own State. On the contrary, the evidence at hand indicates that these Federal employees are keeping pace, and, in some instances, enjoy advantages over those in private employment or the State service.

Mr. President, the attempt has been made to picture this administration as being unconcerned with the welfare of the postal employees. The record over the past 7½ years refutes that unfounded charge. In pay and fringe benefits, totaling $544,323,000 in the first year and increasing in succeeding years, these actions have been taken:

First. Direct pay increases totaling approximately 20 percent, for a first-year cost of $436,831,000.

Second. Greatly liberalized retirement benefits, with an added first-year cost of $10,538,000.

Third. Group life insurance, at a first-year cost of $7,103,000.

Fourth. Group health insurance, with an estimated first-year cost of $37,963,000.

The PRESIDING OFFICER (Mr. Moss in the chair). The time of the Senator has expired.

Mr. BUSH. I yield myself 10 minutes on the bill.

Fifth. Executive order holiday benefits for rural carriers, and Saturday holiday benefits which guarantee each employee eight paid holidays per year, with first-year costs of $4,433,000.

Sixth. Additional equipment allowance for rural carriers, with first-year costs of $6,800,000.

Seventh. Increased travel allowances, with first-year costs of $4,100,000.

Eighth. Tax-free uniform allowances of up to $100 per uniformed employee each year, with first-year costs of $13,600,000.

Ninth. Biweekly pay periods, providing one extra day's pay per year, with a first-year cost of $6,700,000.

Tenth. Military leave for substitute employees, at a first-year cost of $2,800,000.

Eleventh. Longevity pay for substitute employees, at a first-year cost of $765,000.

Twelfth. Unemployment compensation, with an estimated first-year cost to the Federal Government, attributable to postal employment, of $7,200,000.

Thirteenth. Free fidelity bonds at an estimated annual savings to postal employees of $776,280 and a cost to the Department of $190,000.

Fourteenth. Social security coverage extended to temporary employees, at a first-year cost of $5,300,000.

I do not think that is the picture of an administration which is not interested in postal employees; on the contrary, it is evidence of the very deep interest the administration has for people who are working for the Government.

I am confident that the administration will continue to give fair treatment to its employees in the postal service, as well as to those in the classified service. I am confident that when the study ordered by Congress at a cost of $500,000 is completed in September, legislation to provide fair and equitable adjustments in compensation for all Government employees will be drafted and submitted to the next Congress. I am confident that it will be legislation that Members of the Senate can support.

If the Dirksen amendment shall be agreed to, and I hope it will be, the President will have before Congress in January of next year a schedule of pay adjustments and increases which will be made in the light of the study for which we are paying $500,000 of the taxpayers' money.

To enact the bill now before the Senate would be an act of fiscal irresponsibility, and demonstrate a failure to recognize the dangers we face. For the reasons I have stated, Mr. President, I shall support the amendment offered by the Senator from Illinois.

I have given a great deal of study to this issue. I have spent more time on it than on anything I have been involved in during this year. I have talked to people in my own State and I have talked to the Chairman of the Civil Service Commission, as well as to members of the committee. I have also read volumes about it. I am satisfied that the jobs in the Post Office Department and in the classified service are in demand. Certainly that does not indicate that the Government is not offering comparable compensation with the State government or with private firms in commerce and industry, at least within the State of Connecticut. On the contrary, it indicates we need more information, and certain knowledge concerning inequities which may exist, before we can legislate fairly in the interests of all Federal employees.

Furthermore, the record shows that the "quit rate," as it is called, of people leaving the service, is lower than in private industry, which indicates that people are reluctant to leave Government service.

I hope that the Senate will adopt the Dirksen amendment. I believe that the report which we are about to receive in September will be a competent one, that it will be a report which will have been painstakingly and carefully prepared by people who are competent to make such an objective study. With this guidance, the President will, I hope, make what adjustments may be necessary, to treat fairly our Government employees.

I yield back the remainder of my time.

Mr. KERR. Mr. President, will the Senator yield?

Mr. BUSH. I yield.

Mr. KERR. I am much interested in the statement the Senator made concerning the number of applicants for postal or other Government jobs because those jobs would be better than the jobs which the persons are now in. Would the Senator know if those persons are persons whose economic condition is worse as a result of their trying to make a living under Benson's farm program?

Mr. BUSH. Not many persons in Connecticut are displaced by the Benson farm program. Most of the people in Connecticut have been strongly behind Mr. Benson, and approve his farm policies.

Mr. KERR. Most of the people in Oklahoma are behind him, too, but for different purposes. [Laughter.]

Mr. CHAVEZ. Mr. President, will the Senator from South Carolina yield time to me?

Mr. JOHNSTON of South Carolina. I yield 2 minutes to the Senator from New Mexico.

THREE HUNDRED AND FIFTIETH ANNIVERSARY OF THE FOUNDING OF NEW MEXICO

Mr. CHAVEZ. Mr. President, I am against the amendment and for the committee bill. That is certain. But before continuing with the debate on the bill, I should like to call the attention of the Senate to another matter. First, I am so glad that the Senators from Indiana are present.

It seems to me quite fitting that we should take a few moments to divert our attention from the turmoil and tumult of these riotous times and give heed to a significant event in my glorious State of New Mexico. Beginning June 17 and for 1 crowded week, the good people of my State, and especially those of Santa Fe, will celebrate the 350th anniversary of the founding of New Mexico. Everybody in the State, from Gov. John Burroughs and Mayor Leo T. Murphy, of Santa Fe, will join in this observance, basking in the past glories and looking forward to greater progress.

An event of the opening day of these festivities is worthy of note. Through the cooperation of its producers, Metro-Goldwyn-Mayer, there will be a special performance of the new motion picture, "Ben-Hur," and the Governor and mayor have proclaimed June 17 as Ben-Hur Day in the anniversary celebration. Why "Ben-Hur"? There is an interesting story behind that question; perhaps, my good colleagues the Senators from Indiana [Mr. CAPEHART and Mr. HARTKE] would prefer I did not tell the story. But the folks back home think I should.

"Ben-Hur" is a New Mexico product, and its author is being honored as one of the picturesque and courageous citizens of Santa Fe. Indiana and Crawfordsville, Ind., like to make similar claims to the origin of "Ben-Hur" and the citizenship of its author. But the record indicates that, at least, the honors must be shared. Gen. Lew Wallace, Civil War hero, Minister to Turkey, politician, and author, wrote the inspiring novel, "Ben-Hur." He began the book while living in Crawfordsville, Ind., but he finished it while he served as Governor of the Territory of New Mexico from 1878 to 1881. Wallace was a fantastic character; he was sent to New Mexico by President Hayes to try to clean up the Territory which then was ridden by all of the lawlessness and problems of the early pioneer days. Among Wallace's problems was a young fellow known as Billy the Kid, who had the Territory terrorized. Wallace contrived to have Billy give himself up, eventually. Prior to that the Kid swore to get Wallace. The fearless war hero refused to let the Kid or anybody else deter him from finishing the final chapters of "Ben-Hur." Wallace, stubbornly ignoring his wife's fears and protests, refused to draw the shades of his window as he sat writing at night. He made a perfect target for Billy the Kid. It was in that spirit that Wallace went about improving conditions in the old New Mexico. Now, 80 years later, Wallace and his immortal "Ben-Hur" are being honored in Santa Fe and throughout New Mexico.

I hope our Indiana friends will not mind.

Mr. HARTKE. Mr. President, will the Senator yield?

Mr. CHAVEZ. I yield.

The PRESIDING OFFICER. The time of the Senator from New Mexico has expired.

Mr. DIRKSEN. I yield 2 minutes on the bill to the Senator from New Mexico.

Mr. HARTKE. I thank the Senator from New Mexico for acknowledging the fact that Lew Wallace came from Indiana. The generosity of Indiana is well known. We are glad to share such a distinguished leader with New Mexico.

I observed that Lew Wallace went to New Mexico to clean things up and did a pretty good job of cleaning them up. He went further and helped to develop the State of New Mexico.

One of the finest persons ever to come out of that State is the Senator who made the statement. He is one in a long line of the heritage of New Mexico.

Mr. CHAVEZ. I acknowledge that fact that if it had not been for Lew Wallace, I might not be here.

Indiana has contributed much to New Mexico throughout the years. So have Vermont and New Hampshire. New Mexico would not have a railroad if it had not been for Vermont and New Hampshire brains and Boston money.

That is true also of the State of the distinguished junior Senator from Kansas [Mr. CARLSON]. The Atchison, Topeka & Santa Fe Railroad was built from Kansas into New Mexico. That railroad would not have been built to the Pacific coast if it had not been for Vermont brains and Boston money.

ADJUSTMENT OF COMPENSATION OF CERTAIN FEDERAL OFFICERS AND EMPLOYEES

The Senate resumed the consideration of the bill (H.R. 9883) to adjust the rates of basic compensation of certain officers and employees of the Federal Government, and for other purposes.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Illinois [Mr. DIRKSEN].

Mr. DIRKSEN. Mr. President, on the amendment, I ask for the yeas and nays.

The yeas and nays were not ordered.

Mr. DIRKSEN. Mr. President, how much time have I remaining?

The PRESIDING OFFICER. The Senator from Illinois has 54 minutes remaining on the bill.

Mr. DIRKSEN. Mr. President, in my own time, I suggest the absence of a quorum.

Mr. SALTONSTALL. Mr. President, will the Senator withold his suggestion of the absence of a qourum?

Mr. DIRKSEN. Mr. President, I withdraw my suggestion of the absence of a quorum.

TRANSFER OF CERTAIN LANDS AND IMPROVEMENTS TO MASSACHUSETTS PORT AUTHORITY

Mr. SALTONSTALL. Mr. President, I ask unanimous consent to take time from both sides on the amendment to ask, on behalf of the chairman of the Committee on Armed Services, the distinguished Senator from Georgia [Mr. RUSSELL], that the Chair appoint a committee of conference.

Mr. JOHNSTON of South Carolina. Mr. President, I ask that the Senator from Massachusetts be permitted to do that.

The PRESIDING OFFICER. Without objection, it is so ordered.

The PRESIDING OFFICER laid before the Senate a message from the House of Representatives announcing its disagreement to the amendment of the Senate to the bill (H.R. 5888) to authorize the Secretary of the Navy to transfer to the Massachusetts Port Authority, an instrumentality of the Commonwealth of Massachusetts, certain lands and improvements thereon comprising a portion of the so-called E Street Annex, South Boston Annex, Boston Naval Shipyard, in South Boston, Mass., in exchange for certain other lands, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. SALTONSTALL. I move that the Senate insist upon its amendment, agree to the request of the House for a conference, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer appointed Mr. RUSSELL, Mr. STENNIS, Mr. JACKSON, Mr. SALTONSTALL, and Mr. CASE of South Dakota conferees on the part of the Senate.

ADJUSTMENT OF COMPENSATION OF CERTAIN FEDERAL OFFICERS AND EMPLOYEES

The Senate resumed the consideration of the bill (H.R. 9883) to adjust the rates of basic compensation of certain officers and employees of the Federal Government, and for other purposes.

Mr. DIRKSEN. Mr. President, I renew my request for the yeas and nays on the amendment.

The yeas and nays were ordered.

Mr. GOLDWATER. Mr. President, will the Senator yield time to me?

Mr. DIRKSEN. Mr. President, I yield 5 minutes on the bill to the Senator from Arizona.

Mr. GOLDWATER. Mr. President, I support the amendment of the Senator from Illinois and shall explain why I do so.

Since I have been in this body, we have approached all the problems concerning salary increases in the Government from the wrong angle. Instead of determining what the probable salary should be vis-a-vis Government and private employment, we have merely jumped at some figure, sometimes a round number, sometimes not so round, to determine what the Federal employees should receive as a pay increase.

Mr. President, the greatest danger to the payrolls of America is the Federal Government itself, as we go along in our irresponsible way, spending billions of dollars that we do not have. Only 2 years ago we went through the process of increasing the pay of the postal workers and the Federal employees; and at that time I told my friends in the employ of the Federal Government that if we did not stop this reckless spending, we would negate, within 2 years, the increases we gave them. That seems to have come true, Mr. President.

The real problem is inflation, and one of the greatest contributing causes to inflation is continued deficit spending.

Recently, I was privileged to read a speech which Mr. Maurice Stans made not so long ago. I wish to read part of that speech into the RECORD, so that Senators will understand what we are doing and so that when Federal employees and other employees come to us and say to us that the dollar is not buying as much as it used to, we can take credit for that development.

Mr. Stans said:

> Where is the Federal budget headed in the coming decade? I can tell you this, as a statistical fact and not a prediction: If we continue the trend of the past several decades for just another 10 years we will have budget expenditures of $160 billion by 1970. Impossible? So it seems. Yet it is not a bit more fantastic than the increases we have already scored, from $3 billion in 1930 to $9 billion in 1940, to $40 billion in 1950, to almost $80 billion in 1960.

Then Mr. Stans made what I believe is a very sobering statement, as it relates to the fiscal situation in this country. He said:

> Fact No. 1 is that our present national debt of $290 billion is far from all we owe for the past. This is just the interest-bearing current debt. To really understand what we owe, you have to add in some other things. For example, benefits which we have promised to veterans and their dependents will cost $300 billion in the years ahead. On top of that, unfinanced Government liabilities for military and civil service retirement plans already come to nearly $60 billion more.

Mr. President, the $290 billion in public debt, plus more than $350 billion of obligations for past services, plus $90 billion of c.o.d.'s, come to the almost unbelievable total of nearly $750 billion.

We in the Senate should be fully aware of what we are doing. Every time we endanger our fiscal responsibility, by considering measures such as the one before us today, we are not helping the wage earner of the United States. Instead, by enacting such a measure we would be destroying the wages he earns. What advantage does he gain if we increase his salary by 10 percent, but then decrease the purchasing power of the dollar by 12 percent or 15 percent? To me, the answer to this issue can be found by means of such simple arithmetic.

I believe it is high time that we in this body stop thinking about votes, and begin to think about our responsibilities to the people of the Nation, regardless of whether they work for the Government or whether they work for private industry. We in the Congress must take the responsibility for the position the dollar is in today.

Mr. DIRKSEN. Mr. President, I yield to the Senator from Utah [Mr. BENNETT] 3 minutes.

The PRESIDING OFFICER. The Senator from Utah is recognized for 3 minutes.

Mr. BENNETT. Mr. President, I have been interested in the possible impact of the pending measure on the employees of the State of Utah who more nearly parallel Federal employees than private employees.

Today, I have received some very interesting figures: Using the present pay scales, before the proposed increase, employees of the State of Utah who correspond to Federal GS–2 and GS–3 clerks, are now earning from $50 to $60 a month less than their Federal counterparts. If the pending bill goes into effect, it will increase that difference by another $20 to $24 a month.

Employees in the State of Utah who correspond to Federal GS–4's in grade are earning approximately $60 a month less than their Federal counterparts.

Employees in the State of Utah who correspond to Federal GS–7's in grade are earning $75 a month less, for comparable employment.

The State of Utah employees in the professional group are earning from $80 to $90 a month less than the pay received by professional employees of the Federal Government who are engaged in similar work.

The Utah social caseworkers, who are a semiprofessional group, are earning between $60 and $100 a month less than the pay received by Federal Government employees who perform similar work.

The journeyman mechanics in Utah are being paid $100 a month less than Federal journeyman mechanics are paid.

I wonder whether we stop to realize the damage we are going to do to the State governments and their employees, particularly in the case of the smaller States far removed from the large metropolitan centers, when we widen this variation. Not only shall we increase the burden on the taxpayers, by reason of the added cost of the Federal payroll; but, in addition, we shall put the taxpayers in many States in a situation in which, by using the Federal Government's example as a lever, attempts will be made to force up the State, county, and municipal payrolls.

So the real burden on the taxpayer may be very much heavier than that represented by the proposed legislation now before us. This is one reason why I am persuaded that under present circumstances I cannot support this measure.

I was also greatly impressed by the statements made by the Senator from Idaho [Mr. CHURCH] with respect to the classified service employees.

Mr. President, when we consider the total impact of all these factors and developments, we realize that rather sobering considerations face us as we prepare to vote on the question of passage of the bill.

Mr. HUMPHREY. Mr. President——

Mr. JOHNSTON of South Carolina. Mr. President, I yield 10 minutes to the Senator from Minnesota.

The PRESIDING OFFICER. The Senator from Minnesota is recognized for 10 minutes.

Mr. HUMPHREY. Mr. President, the amendment offered by the minority leader, the Senator from Illinois [Mr. DIRKSEN] is, of course, an amendment in the nature of a substitute for the entire text of the pending pay bill.

First of all, I desire to commend the chairman of the Committee on Post Office and Civil Service and the other members of that committee for the prompt consideration they have given the Federal workers pay raise bill, following its passage on Wednesday of this week by the House of Representatives, by the overwhelming vote of 378 to 40.

The vote in the House of Representatives, especially in view of the opposition of the administration to pay raise legislation, is very significant and encouraging.

It indicates that the vast majority of the Members of Congress are convinced that the case for Federal pay raise legislation is sound and that the time to act is at hand. It also gives those of us who have been advocating a fair pay raise for Federal employees reason to believe that even if the President should veto this measure there are sufficient votes in the Congress to override the veto.

I intend to support the bill as reported from the committee. I earnestly hope that the bill is not further amended here in the Senate, because if it is, the chances of obtaining its enactment this session will be seriously dampened. We may be sure that if the bill is amended and returned to the House, the opponents of pay raise legislation—and the administration in particular—will do all in their power to kill it through delaying tactics, in these few remaining days of the session.

I am confident that the Senate will approve the bill as reported from committee and that it will be sent to the President by such a large vote in its favor that the President will realize that his veto will not prevent its enactment.

In June of 1959 there were 2,380,000 civilian employees on the Federal payroll. It has been 30 years since there has been a thoroughgoing review of the compensation scales. There have been dozens of plans put together in a piecemeal fashion. The three major pay systems in use now include: First, the Classification Act, and under this fall 970,000 employees; second, the Postal Pay Act with 470,000 employees; and third, Army, Air Force, and Navy with 480,000 employees.

To delay the pay raise now being considered, the argument has been offered that there are those who do not deserve this pay raise and that we must wait for the results of a Bureau of Labor Statistics survey to be completed in September 1960. I am confident that this survey will show that the wages of Federal employees are not comparable—by and large—with wages for similar work in private industry. I do not believe that such a delay is either necessary or warranted.

This is certainly true in the case of the postal employees. There is no reason to delay. The temporary increase of 2½ percent of 2 years ago must be approved. As the result of a survey by the National Association of Letter Carriers, 24,878 budgets of members were studied; 74.9 percent—almost 75 percent—had to seek other income sources or have their wives work. Ninty-six percent reported that they were unable to live on their present salaries.

It is more than interesting to note that the Federal Housing Administration has determined that a letter carrier with 25 years' service, earning $5,170 per year, does not have a sufficient income to purchase a $15,000 home under an FHA 30-year mortgage. An income of $5,384 is necessary. The average salary of a letter carrier is only $89.23 per week.

Every individual needs sufficient funds to keep abreast of the times. Federal salaries must be commensurate with salaries paid in private industry. There is a time element involved here. We are dealing with human beings, faced with an increase in the cost of living. Classified workers and post office employees have received only two pay raises under the present administration. Three pay raises passed by Congress have been vetoed. Salaries fixed by statute have not been adjusted in any timely or adequate manner in response to general changes and raises in non-Federal salaries.

Pay raises have become an annual occurrence in most industries, but not for Federal employees. While other workers have received 14 or 15 pay increases since 1945, total increases in Federal employees' wages number 7. Postal employees have received four. Salaries of the greater number of employees continues to lag far behind the rising price level. It is not just to require the classified and postal employees to wait for the possibility of the coordination of the other minor pay systems at some future date.

From July 1951 to November 1959, postal clerks' wage increases averaged 38½ cents an hour, or approximately 20 percent, while workers in all industries received average increases of 70 cents an hour, or in excess of 45 percent. This marks a lag of 25 percent between July 1951 and November 1959 for postal clerks.

The postal clerks are not alone. Millions of Government employees face the same situation. They cannot wait to eat and to live. They must go on with their own family lives.

If, just for a moment, one assumes that classified employees were paid in 100-cent dollars in early 1939, it becomes apparent that the employee has lost much more than appears on the surface. A GS–5 salary would have to be increased 5.2 percent to make it equal in purchasing power to 1939. A GS–7 salary is worth $263 less, and in the higher brackets the gap is much wider. To restore 1939 purchasing power today, between 3- and 61-percent raises are needed at different levels.

It is obvious that wages of comparable situations in private industry are far ahead of wages in Government employment. There are perhaps one or two grades at which they are equal, but from these lowest grades on up, pay in private industry far exceeds Government pay in managerial, scientific, and technical fields. The higher the level, the greater the gap. At GS–18, non-Federal pay is approximately $22,500 per year, while Federal employees receive $15,500. This low wage scale creates a great deal of difficulty in recruiting and maintaining workers.

It now costs the Federal Government $900 to train a new employee in the postal service. At the same time, a trained man is utilized to instruct the new man. One thousand eight hundred dollars is now tied up in these two men. The turnover rate in the postal service is by no means small. Each time a man leaves, the Federal Government loses $900. A satisfactory salary, which would keep these men in service would, in the long run, be less expensive than the wage increase. These men can rarely earn more than $5,175 per year, and then only after 25 years' service. Frequently, they must learn difficult postal schemes on their own time and at their own expense. Is it any wonder that they leave this service?

Recently, United States Steel granted an increase to its office clerical workers, an increase in wages already higher than those of classified Federal employees in comparable positions. A file clerk in Federal service receives $3,825 per year. A United States Steel file clerk now receives $4,430, and by October 1961 will receive $4,722. Government tabulating machine operators receive $4,325, while those with United States Steel receive $5,299 and will receive $5,753 by October 1961.

Sperry Gyroscope Co., International Harvester Co., and Chrysler Corp. pay between $4,320 and $5,186 per year for stenographers, typists, and key punch operators. In the Federal service, these positions are classified in GS–2 to GS–4, for which the maximum pay is $4,325. Only one of the private industry rates is in this category, most are comparable to GS–5.

Guards in private industry in the St. Paul-Minneapolis area receive $2.17 an hour. Guards, rated GS–2, receive a highest pay of $1.84. In 1939, postal letter carriers wages were generally greater than policemen. Today it is the opposite.

The whole body of Federal employees is working for the benefit of industry and for the well-being of the entire Nation. Industry could not efficiently function without the post office or the many services provided by the departments. Government engineers, scientists, and medical men benefit all the people. A fair salary is one that is compatible with business and justifiable in cost. To wait for the current survey is an unnecessary delay ignoring all previous studies and surveys. It is important that the Senate take favorable action on this bill now.

I wish to comment briefly on the amendment proposed by the Senator from Illinois. Last evening, when the housing bill was discussed in the Senate,

there was considerable debate on concentration of power in the Executive and the fact that the Congress was directing the President to put something in a message. The ghost of constitutionality was raised. We were told it would violate the Constitution. We were told by one Senator that we were pioneering on new ground. I realize that for the Republican leadership that is a rather dangerous adventure, but we were reminded this was something we should not do.

The housing bill called upon the President to make recommendations in his message to the Congress, and it was stated that, in furtherance of the realization of this goal, the President shall transmit to the Senate and the House of Representatives, after the beginning of each session of the Congress, but not later than January 20th, a report which shall include certain specified items.

Mr. President, this was not going to cost anybody anything. It was not said that the President was going to legislate by edict. All we were suggesting was that the President take cognizance of certain developments in the housing picture, certain housing needs of the American people, and that he make known those observations through a message to the Congress.

The minority leader led the fight against that proposal, which he called extreme legislation. He said the President would veto a bill which directed him to do such a thing as that. Yet the minority leader today brings in a substitute that provides that the President shall be authorized and directed to adjust the pay scales in the Classification Act of 1949, as amended, the Postal Field Service Pay Act, the Veterans' Benefits Act, as amended, and the Foreign Service Act, as amended, to levels generally comparable with those reported by the Bureau of Labor Statistics as a result of its current survey of pay rates in private enterprise.

Then the substitute proposal of the Senator from Illinois directs the President to do two more things: to revise the pay structures in the several acts in order to insure internal equity and to provide adequate incentives for administration, and to establish rules for administration.

Is not this interesting? Last night, less than 24 hours from this hour, the minority leader admonished us not to direct the President to put anything in a message, that it would be dangerous, that the President would veto it. There were speeches on the floor of the Senate to the effect that to direct him to lay down a blueprint in terms of planning in the field of housing would give the President too much power. I was reminded last night that this was almost socialism. But today the same spokesmen—and I put that word in the plural—say now the President should act like a little dictator. He shall set the pay rates for Federal employees who work for the Government of the United States, a Government that consists of the Congress as well as the executive branch, and the President shall not only set the pay rates, but he is authorized and directed to make such adjustments as his own Bureau of Labor Statistics advises him to make.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. HUMPHREY. I yield.

Mr. CLARK. The Senator makes a very powerful argument, but, to be very candid, is the Senator not of the opinion that the minority leader was wrong both times?

Mr. HUMPHREY. It is not only my opinion, but I think it can be demonstrated to be a fact.

This is a delaying tactic. That is another reason why this is being done. We can be sure that there will be men in the other body of equal capability and ingenuity who will be able to use some kind of delaying tactics, and the Federal worker will get no help or no justice from his Government.

I have heard speeches made today about what the proposed pay raises would do to the Federal budget. I heard what the pay increase would do to inflation. I wonder where the words are, I say most respectfully, in behalf of the wage earners, when prices go up? I have not heard many speeches from the other side of the aisle when steel prices have gone up time after time. I have not heard many complaints from the other side of the aisle about interest rates going up. I say to my colleagues on the other side of the aisle that the average wage earner will pay more in increased interest than he will receive from the pay increase as provided in this bill.

I have not heard any Senator on the other side of the aisle condemn anyone for the inflation in the cost of money, which takes its toll out of everyone who buys anything on time. This is a credit economy, in which the largest single item in the cost of living is the cost of money.

Furthermore, I heard one Senator say that we shall pay more to Federal employees than is paid in Utah. There is an answer to that: Raise the wages in Utah. That is the answer.

I would like to have some of our colleagues demonstrate as much concern over the worker's interest as they seem to demonstrate over what they call this item of inflation.

What would be the cost of the proposal of the Senator from Illinois? We have no figures that indicate the cost. On the one hand, it is being paraded before us as though it is of benefit to the workers. If it is beneficial, it is going to cost something. On the other hand, some speakers say it is beneficial because it will not cost anything. Mr. President, we cannot play both sides of the street. The proposal of the Senator from Illinois will result either in increased salaries or decreased salaries, and it seems to me we have a right to know which before we vote on his proposal.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. JOHNSTON of South Carolina. I yield 5 minutes more to the Senator from Minnesota.

Mr. HUMPHREY. Finally, let us face the fact that Federal workers have only one place to go. There is no use of their talking about going to see the President. They will not find him in. Let us face it, the Federal workers will not get an audience at the White House. First of all, the President of the United States, when he applies himself to his work, will be a busy man, and the Federal workers will not have an opportunity to make their case if this matter is turned over to the executive branch. If this is turned over to the executive branch, we may as well turn over everything else, because this touches the heart of government.

I am surprised that the advocates of less executive power, the advocates of States rights, come before the Senate with a proposal which would put in the hands of the Executive—the President of the United States—control over the pay scales of workers for the Federal Government, without any regard to the Congress of the United States.

The Constitution says that we shall establish the rate of compensation. The Constitution does not say that the President shall do so. I suggest that we should hold the limited authority and power we have to ourselves.

The point is that Federal workers do not have the right to strike. Federal workers do not have the right of some workers to collective bargaining. Federal workers have only one right. That is the right to appeal to their representatives in Congress for justice.

These workers have never been able to keep up with the wage scales throughout the country. Surely, we can locate a Federal worker here or there who may earn more than is earned by someone in a small country town, but we do not generalize from those limited statistics. We must consider the total picture.

The facts are that testimony before the committees of Congress has shown that many Federal workers need two jobs in order to maintain a home of modest means.

I have not seen many Federal postal workers or Federal employees spending 2 months on a yacht in the Caribbean. They have a tough time getting enough money together to be able to spend 2 days on a rowboat on a lake in Minnesota.

Those who are always admonishing the workers of this country as to the things they should or should not do are usually in Bermuda, in the Bahamas, at Nassau, or at Miami Beach at $100 a day, in a swank hotel.

Mr. President, these workers are not overpaid. The tragedy is that the administration always wants to study the pay of the workers. This administration really is guilty of being a slow learner. It studies and studies, and never seems to catch on.

I suggest that the Congress of the United States, after having reviewed these matters in the committees month after month and year after year, is in a better position to know what is the situation than some study commission which has been appointed, which is somewhat removed from the realities of the economic life of the workingman or workingwoman.

There is one thing wrong with the Congress, above all. Too many times it has lost its sensitivity to the needs of

the average man, to the needs of the man who does not have a chance to be in the social columns of the local newspaper.

Some of us in the Congress need to stand up to speak for the person who earns $5,000 a year or $4,000 a year.

A woman who testified before the committee, who lived in Fort Lauderdale, Fla., said that her husband had a take-home pay of $89 a week, after 21 years of service with the Federal Government. My friends in the Senate, who have salaries of $22,500 a year, should try to live on $89 a week. I have lived with the people long enough to know that it costs a great deal to rear a family.

The Federal Government has an obligation to establish standards, not to be trailing behind. The people who carry the mail, the people who work in our Federal agencies, by and large are fine, good, dedicated people.

One of the reasons there is trouble in America today is that too often it takes two breadwinners in a family to pay for the cost of living. This causes delinquency. This causes problems.

I suggest that the Government of the United States should set a standard under which one breadwinner in a family can earn enough for the mother, the children, the father, and perhaps a relative or so, if need be.

The PRESIDING OFFICER. The time of the Senator from Minnesota has expired.

Mr. JOHNSTON of South Carolina. Mr. President, I yield 5 minutes to the Senator from Wyoming [Mr. McGEE].

The PRESIDING OFFICER. The Senator from Wyoming is recognized for 5 minutes.

Mr. McGEE. Mr. President, I wish to associate myself with the remarks of the distinguished Senator from Minnesota, who has said in terms only he seems capable of commanding the things which need to be said at a moment like this. The Senator has moved me to bring into the focus of the picture today once again a reference I have made on other occasions to an individual whom I have described as a "one-eyed bookkeeper."

The "one-eyed bookkeeper" is the Director of the Bureau of the Budget. "One-eyed bookkeeping" goes on in the Bureau of the Budget.

Let us visualize what this could mean.

The Bureau of the Budget opposes this legislation. In a statement before the Civil Service Committee, Budget Director Stans said:

> The administration finds no justification at this time for the enactment of any legislation which would provide general increases in salary rates under the Classification Act, the Postal Field Service Pay Act, and other statutory pay systems.

The Bureau of the Budget is the arm, if not the brain—I sometimes think it is the brain—of this administration.

These, indeed, are the words of the oracle, the words of the "one-eyed bookkeeper."

Mr. President, I make my remarks after examining the Bureau of the Budget's own pay policies, in its own bailwick, since 1953. What I expected, really, was to find that the Bureau of the Budget, finding no justification for pay raises, was practicing what it preached. I was amazed to discover that since 1953 the average grade level of Bureau of Budget employees has climbed from GS–10.2 to GS–11.1. Despite administration objections, in the last several years the Congress has enacted legislation to increase the pay of the Federal employees.

The pay has continued to go up for the workers at the Bureau of the Budget. Because the Bureau of the Budget has the highest grade level for its employees of any Federal agency, they have on the average received the greatest raises. Since 1953 the average Budget Bureau employee has received an $1,100 salary increase as a result of pay legislation. These increases are the legitimate increases resulting from action by the Congress despite Presidential vetoes. These are the efforts that the Congress has made to keep the salaries of Federal employees reasonably consistent with those paid in private industry. I emphasize again that this increase for Bureau of the Budget employees occurred despite administration objections.

However, on top of this legitimate increase, the Bureau of the Budget, through raising the average grade of its employees from 10.2 to 11.1, has added approximately another $1,100 to the salary of each of its employees.

No wonder the Director of the Budget Bureau can find no justification for a general salary increase. When he inquiries into his own Bureau he finds that salaries are up and that his employees are "doing very nicely, thank you."

This earns for the Director of the Bureau of the Budget the designation as the "one-eyed bookkeeper." He looks at his own records through one eye, and through the other eye he cannot see and does not see the plight of his brethren.

Mr. President, I have compared what has happened in the Bureau of the Budget with the salaries in the offices of the secretaries of four of our major departments of Government. I ask unanimous consent at this point in my remarks that this table be printed in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

	General schedule				
	1953	Amount below Bureau of the Budget	1961	Amount below Bureau of the Budget	Change since 1953
Bureau of the Budget	10.2		11.1		+0.9
Office of Secretary of the Treasury	8.1	−2.1	8.4	−2.7	+.3
Office of Secretary of the Interior	9.0	−1.2	9.3	−1.8	+.3
Office of Secretary of Health, Education, and Welfare	7.7	−2.5	8.2	−2.9	+.5
Office of Secretary of Agriculture	8.6	−1.6	8.7	−2.4	+.1

Mr. McGEE. Mr. President, two things stand out in this table.

First, the staffs in the Secretaries' offices of these four departments receive salaries which are substantially below those in the Bureau of the Budget.

Second, the Bureau of the Budget has granted its employees, through improved grade levels, far greater increases than have the offices of the four Secretaries enumerated above.

I have not made a detailed analysis of the other agencies in these departments, nor of other departments, but I am certain that such an analysis would support the contention that the Bureau of the Budget has taken good care of its own and has chosen to neglect the rest.

Mr. President, I do not contend that Federal employees should be denied a pay raise. On the contrary, I believe that they are entitled to a raise and I believe especially that the postal employees are entitled to a raise.

My petition is that the "one-eyed bookkeeper" has his principles mixed up and is looking in the wrong direction at what he considers to be the right time. He ought to give the same consideration to other employees of the Federal Government as he gives to his own people.

The PRESIDING OFFICER. The time of the Senator from Wyoming has expired.

Mr. McGEE. Mr. President, will the Senator yield me 2 additional minutes?

Mr. JOHNSTON of South Carolina. I yield 3 minutes to the Senator from Wyoming.

The PRESIDING OFFICER. The Senator from Wyoming is recognized for 3 additional minutes.

Mr. McGEE. Mr. President, how the Bureau can justify the extremely large increases in the Bureau at the same time it asks Congress to hold down salaries of other categories of Federal employees is difficult to comprehend, unless it is rationalized in the "one-eyed bookkeeper" vernacular.

Mr. President, I also believe that the Bureau of the Budget has itself violated all of the arguments it has given in opposition to a general salary increase. If this is not the case, then apparently there is already available sound factual justification for the salary increases proposed in the legislation that the Congress is now considering.

Budget Director Stans in his presentation to the Congress claims that he is not quibbling over insignificant amounts. He said:

> If we raise Federal white collar pay levels now on the basis of inadequate information which can make the results merely guesses, and if the September BLS report shows that such increases result in unnecessary or improper expenditures, then we will all have much to regret.

But this is not the situation in the temple of the savers where the high priests of economy are gathered. There

has been no difficulty there in justifying a pay raise averaging $1,100 per employee in addition to the $1,100 pay raise effective in the Bureau of the Budget as a result of past legislation.

I ask unanimous consent that a table showing the relationship between the average salaries paid the Federal employees in five important conservation agencies in 1953 to those to be paid in 1961, in comparison with the pay scales in the Bureau of the Budget, be printed in the RECORD at this point.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

	Average salaries		
	1953	1961	Increase since 1953
Bureau of the Budget	$6,979	$9,320	$2,341
Bureau of Reclamation	4,575	6,269	1,694
Geological Survey	4,553	[1] 6,428	1,875
Soil Conservation Service	4,391	5,556	1,165
Forest Service	4,655	5,614	959
Agricultural Research Service	[1] 4,869	6,083	1,214
Bureau of the Budget differential	2,110	2,892	

[1] Best paid for fiscal year.

Mr. McGEE. These are comparative to the pay scales of the Bureau of the Budget.

Some reference has been made in the Senate to the fact that the proposed legislation will cost us a little more money, and that it is dishonest of Government to spend this additional money without preparing a tax measure to balance the expenditure. I certainly can agree that it is dishonest not to face up to what this country must do. I am not impressed, however, with the suggestion that generations yet unborn will have to pay these costs. While I, too, am concerned about the future generations, I am likewise concerned about the generations who are still living. They, too, have a right to continue to live in an area where costs continue to rise.

The overhauling and revamping of the Federal pay schedules has long been overdue, and yet this opportunity has been frittered away during the 8 years of the Eisenhower administration.

One serious accomplishment of the administration has been the apparent ability of the Bureau of the Budget to award itself salary increases while holding down the salaries of other Federal employes. This is the spectacle of the "one-eyed bookkeeper."

I conclude by suggesting that not only is the pay legislation before the Congress necessary, but also, I believe the Congress might well give consideration to reducing the salaries in the Bureau of the Budget to the relationship that they had with other Federal salaries in 1953. I would predict that were this suggestion adopted, we would have to appropriate money for the construction of a wailing wall on the White House side of the temple of the savers.

Mr. CASE of South Dakota. Mr. President, will the Senator from Illinois yield?

Mr. DIRKSEN. I yield 5 minutes to the Senator from South Dakota.

Mr. CASE of South Dakota. The proposed amendment of the Senator from Illinois makes a great deal of sense. References have been made during the debate to what is being paid to workers in industry and to people in State governments as compared with what is proposed to be paid to employees of the Federal Government. The amendment of the Senator from Illinois will merely give authority to the President of the United States to adjust the rates of pay. The amendment states in part:

> To adjust the rates of pay in the Classification Act of 1949, as amended, the Postal Field Service Pay Act, the Veterans Benefit Act as amended, and the Foreign Service Act as amended, to the levels generally comparable with those reported by the Bureau of Labor Statistics as a result of its current survey of pay rates in private enterprise.

Congress provided half a million dollars for the survey, the results of which are expected to come in September, and it is expected to use the survey as the basis for pay adjustment.

The dislocation of relative pay scales is a problem in a discussion of the cost of living. Established pay scales are thrown out of kilter. Then we try to adjust them, and sometimes there is no good relationship. The final result is relatively little better than the situation that existed at the outset. A cycle is started.

What disturbs me is that we talk about a percentage increase which ranges from 7½ to as much as 8 percent and even 8½ percent for some employees, thus throwing them farther out of a fair relationship.

In some sections of the Post Office Department the discrepancy between supervisory positions and the rank and file postal workers could be again jeopardized. Only a year or so ago we passed a bill to correct an inequity in the relative pay scales of the general workers and the supervisors.

One of the most glaring inequities that exist today is the fact that the average net income of farm families is only $2,380. Yet under the proposed legislation we have increases proposed, which affect all Government employees, in which the starting salary for an individual in the civil service rank is $2,960. The starting pay for the civil service employee of $2,960 is already $500 more than the average net income of an entire farm family.

One of the tests of the relative equity of pay scales is the turnover. The Civil Service Commission during 1959 determined that the average quits per month per 100 employees are as follows: 1.25 percent in private industry; 0.70 percent in the Federal Government as a whole; and 0.57 percent in the U.S. postal service. The turnover in private industry is twice as much as the turnover in the postal service, which would certainly indicate that the postal service and the Federal Government as a whole are more attractive places of employment than is private industry.

In my experience I have noted that there seems to be no lack of applicants for postal positions, and I am obliged to believe that at least in South Dakota employment in the postal service is more attractive than vacancies in industry generally.

I asked the Post Office Department about the following figures and I was told that the figures represent their experience over the country:

During the first 3 months of this year 238,000 persons applied for postal positions. That number of applicants is enough to fill more than 40 percent of all the positions which the Post Office Department has. In the New York area there were 37,000 applicants. In the Chicago area there were 14,000; in the Los Angeles area, 12,000; in the San Francisco area, 11,000; in the Philadelphia area, 7,000 plus; in the St. Louis area, over 4,000. Therefore it seems to me that the proper approach is on the basis of the study which the Bureau of Labor Statistics is making to give the President the authority and the responsibility to adjust pay scales to the levels determined by a factual study.

The PRESIDING OFFICER. The time of the Senator from South Dakota has expired.

Mr. KUCHEL. Mr. President, the minority leader has been compelled to leave the Senate for a moment. I ask unanimous consent that I may suggest the absence of a quorum without having the time charged to either side.

The PRESIDING OFFICER. Is there objection? The Chair hears none.

Mr. KUCHEL. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. JOHNSTON of South Carolina. Mr. President, I ask unanimous consent that the order for a quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JOHNSTON of South Carolina. I have not said anything on the amendment, but I want every Senator to know that I do not approve of the amendment. I am not ready to turn over to any one man, whether he be a Democrat or a Republican, the power to regulate the salaries of 2,300,000 employees of the Government. To do so would be setting up a dictatorship in the United States. We hear a great deal of talk about dictatorships. I believe that in Congress we have yielded entirely too much to the administration in regulating various and sundry things. This is one time that I am not in favor of going this far.

Mr. MONRONEY. Mr. President, will the Senator yield?

Mr. JOHNSTON of South Carolina. I yield.

Mr. MONRONEY. I concur with my distinguished chairman that Congress should not abrogate its powers in this way. Furthermore, I ask the chairman, if we were to grant this power to the President to fix wages, how would we know who in the 9th or 10th or 11th echelon would exercise the powers which Congress would supposedly be granting to the President.

Mr. JOHNSTON of South Carolina. Yes, while he is off somewhere trying to get into some country or other. Perhaps we ought to make him work at least a 40-hour week, if we are going to adopt this kind of amendment.

I yield back the remainder of my time. I believe the other side has used up all its time.

The PRESIDING OFFICER. All time for debate has expired. The question is on agreeing to the amendment offered by the Senator from Illinois [Mr. DIRKSEN]. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. MANSFIELD. I announce that the Senator from Colorado [Mr. CARROLL], the Senator from California [Mr. ENGLE], the Senator from Georgia [Mr. RUSSELL], the Senator from Mississippi [Mr. STENNIS], and the Senator from Texas [Mr. YARBOROUGH] are absent on official business.

I also announce that the Senator from Arkansas [Mr. FULBRIGHT] and the Senator from Missouri [Mr. HENNINGS] are absent because of illness.

I further announce that the Senator from Tennessee [Mr. KEFAUVER], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Michigan [Mr. MCNAMARA], the Senator from Oregon [Mr. MORSE], and the Senator from Wyoming [Mr. O'MAHONEY] are necessarily absent.

I further announce that, if present and voting, the Senator from Colorado [Mr. CARROLL], the Senator from California [Mr. ENGLE], the Senator from Mississippi [Mr. STENNIS], the Senator from Texas [Mr. YARBOROUGH], the Senator from Arkansas [Mr. FULBRIGHT], the Senator from Missouri [Mr. HENNINGS], the Senator from Tennessee [Mr. KEFAUVER], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Michigan [Mr. MCNAMARA], and the Senator from Oregon [Mr. MORSE] would each vote "nay."

Mr. KUCHEL. I announce that the Senator from Maryland [Mr. BUTLER] is absent because of illness.

The Senator from Indiana [Mr. CAPEHART] is absent by leave of the Senate.

The Senator from New Hampshire [Mr. COTTON] and the Senator from Nebraska [Mr. HRUSKA] are necessarily absent.

The Senator from Iowa [Mr. HICKENLOOPER], the Senator from South Dakota [Mr. MUNDT], and the Senator from Kansas [Mr. SCHOEPPEL] are absent on official business.

On this vote the Senator from Nebraska [Mr. HRUSKA] is paired with the Senator from Kansas [Mr. SCHOEPPEL]. If present and voting, the Senator from Nebraska [Mr. HRUSKA], would vote "yea," and the Senator from Kansas [Mr. SCHOEPPEL], would vote "nay."

The result was announced—yeas 11, nays 70, as follows:

[No. 227]

YEAS—11

Bennett	Cooper	Morton
Brunsdale	Curtis	Wiley
Bush	Dirksen	Williams, Del.
Case, S. Dak.	Goldwater	

NAYS—70

Aiken	Green	Mansfield
Allott	Gruening	Martin
Anderson	Hart	Monroney
Bartlett	Hartke	Moss
Beall	Hayden	Murray
Bible	Hill	Muskie
Bridges	Holland	Pastore
Byrd, Va.	Humphrey	Prouty

Frear	McGee	
Gore	Magnuson	

NOT VOTING—19

Butler	Hickenlooper	O'Mahoney
Capehart	Hruska	Russell
Carroll	Kefauver	Schoeppel
Cotton	Kennedy	Stennis
Engle	McNamara	Yarborough
Fulbright	Morse	
Hennings	Mundt	

So Mr. DIRKSEN's amendment was rejected.

Mr. JOHNSTON of South Carolina. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. JOHNSON of Texas. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment.

Mr. DIRKSEN. Mr. President, I offer the amendment which I send to the desk and ask to have stated.

The PRESIDING OFFICER. The amendment will be stated.

Mr. DIRKSEN. Mr. President, if I may have the attention of the Senate for a minute, I can save the trouble of reading the amendment, although I ask unanimous consent that it be printed in the RECORD.

There being no objection, the amendment was ordered to be printed in the RECORD as follows:

On page 22, at the end of line 24 insert a new title numbered three.

"TITLE III—TO READJUST POSTAL RATES, AND FOR OTHER PURPOSES

"First class mail

"SEC. 2. (a) That part of the first section of the joint resolution of June 30, 1947, as amended (61 Stat. 213, 72 Stat. 138, 39 U.S.C. 280), which precedes the proviso, is amended by striking out '4 cents' and inserting in lieu thereof '5 cents'.

"(b) Section 1 of the Act of October 30, 1951 (65 Stat. 672; 39 U.S.C. 280), as amended, is further amended—

"(1) by striking out '3 cents' wherever appearing in subsection (a) and inserting in lieu thereof '4 cents'; and

"(2) by striking out '3 cents' in subsection (b) and inserting in lieu thereof '4 cents'.

"Domestic air mail

"SEC. 3. Section 201 of the Postal Rate Revision and Federal Employee Salary Act of 1948 (62 Stat. 1261; 39 U.S.C. 463a), as amended, is further amended—

"(1) by striking out '7 cents' in the first sentence and inserting in lieu thereof '8 cents'; and

"(2) by striking out '5 cents' in the second sentence and inserting in lieu thereof '6 cents'.

"Air parcel post

"SEC. 4. Section 1 of the Act of June 29, 1948 (62 Stat. 1097; 39 U.S.C. 475), is amended—

"(1) by striking out the words 'for the period of two years' appearing in paragraph (11); and

"(2) by adding the following sentence to paragraph (11): 'In no event shall the rate of postage on air mail of the first class weighing in excess of eight ounces be less than the rate prescribed in section 2(a) of this Act.'

"Second-class mail

"SEC. 5. (a) The postage rates for publications entered as second-class mail when mailed for delivery at the office of original entry is one-half cent per copy mailed when delivery is made through post office boxes, general delivery or by rural or star route carriers.

"(b) The postage rate for publications entered as second-class mail when mailed for delivery at the office of mailing by city or village letter carrier or when mailed at the office where it is entered for delivery by city or village letter carriers at a different office within the delivery limits of which the headquarters or general business office of the publisher is located is 1 cent for each copy weighing two ounces or less or 2 cents for each copy weighing more than two ounces or the zone-pound rates provided in subsection (c) of this section, whichever is higher.

"(c) The postage rates on publications entered as second-class mail not entitled to be mailed at the rates in subsections (a) and (b) of this section (including sample copies to the extend of 10 per centum of the weight of copies mailed to subscribers during the calendar year), when mailed by the publishers thereof from the post office of publication and entry or other post office where entry is authorized, or when mailed by news agents registered as such under regulations prescribed by the Postmaster General to actual subscribers or to other news agents for the purpose of sale are one-half cent for each individually addressed copy or package of unaddressed copies and in addition the pound rates set forth in the following table:

Advertising portion	Mailed during calendar year 1960	Mailed after Dec. 31, 1960
	Cents	*Cents*
Zones 1 and 2	2.6	3.0
Zone 3	3.5	4.0
Zone 4	5.2	6.0
Zone 5	7.0	8.0
Zone 6	8.7	10.0
Zone 7	11.0	12.0
Zone 8	12.5	14.0
Nonadvertising portion	2.3	2.5

Publications having over 75 per centum advertising in more than one-half of their issues during any twelve months' period shall not be accepted for mailing as second-class matter and their entry shall be revoked, except that for the purpose of this proviso only, a charge made solely for the publication of transportation schedules, fares, and related information shall not be construed as constituting a charge for advertising.

"(d) The rate of postage on copies of publications having second-class entry mailed by others than the publishers or authorized news agents, sample copies mailed by the publishers in excess of the 10 per centum allowance entitled to be sent at the

pound rates, and copies mailed by the publishers to persons who may not be included in the required legitimate list of subscribers, shall be 2 cents for the first two ounces and 1 cent for each additional ounce or fraction thereof, except when the postage at the rate prescribed for fourth-class matter is lower, in which case the latter rates shall apply, computed on each individually addressed copy or package of unaddressed copies, and not on the bulk rate of the copies and packages.

"(e) For the purpose of this section, the portion of a publication devoted to advertisements shall include all advertisements inserted in and attached permanently to the publication.

"(f) The Postmaster General may require publishers to separate or make up to zones, in such a manner as he may direct, all mail matter of the second class when offered for mailing.

"(g) With the first mailing of each issue of each publication entered as second-class mail, the publisher shall file with the postmaster a copy of such issue together with a statement containing such information as the Postmaster General may prescribe for determining the postage chargeable thereon.

"Controlled circulation publications

"SEC. 6. Section 203 of the Postal Rate Revision and Federal Employees Salary Act of 1948 (62 Stat. 1262; 39 U.S.C. 291b), as amended, is further amended—

"(1) by striking out '12 cents' and inserting in lieu thereof '14 cents'; and

"(2) by striking out '1 cent' and inserting in lieu thereof '3 cents'.

"Third-class mail

"SEC. 7. Section 3 of the Act of October 30, 1951 (65 Stat. 673; 39 U.S.C. 290a–1), as amended, is further amended—

"(1) by striking out '3 cents' from that part of the section which precedes the first proviso and inserting in lieu thereof '4 cents'; and

"(2) by striking out '1½ cents' from that part of the section which precedes the proviso and inserting in lieu thereof '2 cents'; and

"(3) by striking out 'twenty pounds' from the first proviso of said section and inserting in lieu thereof 'forty pounds'; and

"(4) by striking out '16 cents' from the second proviso of said section and inserting in lieu thereof '18 cents'; and

"(5) by striking out from the second proviso of said section, whenever they appear therein the words '2½ cents when mailed on or after such date' and inserting in lieu thereof '2½ cents when mailed on or after July 1, 1960, and prior to January 1, 1961, and 3 cents when mailed on or after January 1, 1961'.

"(6) by striking out '10 cents' from the second proviso of said section and inserting in lieu thereof '14 cents'.

"(7) by striking out '3½ cents' from the third proviso of said section and inserting in lieu thereof '4½ cents'.

"Fourth-class mail

"SEC. 8. (a) Section 204(d) of the Postal Rate Revision and Federal Employees Salary Act of 1948 (39 U.S.C. 292a(d)), as amended, is further amended—

"(1) by striking out '9 cents' and inserting in lieu thereof '10 cents', and

"(2) by striking out '5 cents' and inserting in lieu thereof '6 cents'.

"(b) Section 204(e) of the Postal Rate Revision and Federal Employees Salary Act of 1948 (39 U.S.C. 292(e)), as amended, is further amended—

"(1) by striking out '4 cents' and inserting in lieu thereof '5 cents'; and

"(2) by striking out '1 cent' and inserting in lieu thereof '3 cents'.

"Repeals

"SEC. 9. The following provisions of law are hereby repealed:

"(1) Section 5 of the Act of June 23, 1874 (18 Stat. 232; 39 U.S.C. 283); and

"(2) Sections 1101, 1102, 1103, and 1106 of the Act of October 3, 1917 (40 Stat. 327; 39 U.S.C. 283, 287); and

"(3) Sections 202 and 203 of the Act of February 28, 1925, as amended (43 Stat. 1066, 1067; 39 U.S.C. 283, 287); and

"(4) Subsections (a), (b), (c), and (e) of section 204 of the Act of May 27, 1958 (39 U.S.C. 283); and

"(5) Section 25 of the Act of March 3, 1879, as amended (20 Stat. 361; 39 U.S.C. 286); and

"(6) Section 2 of the Act of October 30, 1951 (65 Stat. 672; 39 U.S.C. 289a).

"SEC. 10. (a) The provisions of this section and sections 1, 2, 3, 4, 5, 6, 7, (1), (2), (5), and (7), 8, and 9 of this Act shall become effective on July 1, 1960.

"(b) The provisions of section 7 (3), (4), and (6) of this Act shall become effective on January 1, 1961."

Mr. DIRKSEN. Mr. President, the amendment is in the form of a bill I introduced in March of this year. It provides for an increase in postal rates in first-, second-, and third-class postage. I know that the amendment is not germane under the germaneness clause in the unanimous-consent agreement. I confess that in my momentary ineptitude in the hurly-burly of things, I was not looking down the road far enough at the time I looked at the division of time and the allowance of hours on the amendments when the unanimous-consent agreement was adopted. I shall not quarrel about that. I shall not ask for any violation of the rules. I freely admit that the amendment is subject to a point of order, if any Senator cares to make a point of order.

The PRESIDING OFFICER. The Senator from Illinois may proceed.

Mr. DIRKSEN. Mr. President, in conformity with an informal understanding I have with the chairman of the committee, the distinguished Senator from South Carolina [Mr. JOHNSTON] I shall take only a few minutes for an explanation and will be very brief.

This is a measure I introduced in March. It was sent to me by the Postmaster General. It had the approval of the President. What it is designed to do is this: On first-class letters or first-class mail, it would raise an estimated $409 million. On airmail it would raise $18 million. On second-class mail it would raise $46 million. On other items it would raise $85 million. It is estimated, therefore, that the amendment would raise $554 million.

The bill has been the subject of hearings before the House Committee on Post Office and Civil Service.

If we are to vote money with which to pay employees, we shall have to find the money somewhere. I asked the Bureau of the Budget today for a statement covering the most nearly current period—and the statement is dated June 16—to ascertain now where we stand, with respect, first, to the revenue measures asked for by the President which have been denied; the unbudgeted proposals to increase expenditures, some of which have not yet been enacted, but which would be a threat to the budget; and then the unbudgeted proposals, which would reduce revenue.

I point out that the Committee on Finance, as I understand, has taken action to repeal the telephone tax and to repeal taxes on other items. The distinguished Senator from Florida [Mr. SMATHERS] has just reported a bill from the Committee on Finance. The revenue involved, as I understand, is estimated at between $150 and $250 million.

We have done nothing about aviation fuel. The proposal requested by the President is estimated to produce $89 million.

The discontinuance of the telephone tax would, in the first fiscal year, cost $346 million. There are other items with respect to budget proposals which would have an impact of roughly $1.5 billion.

As I sum up the rest of the items, they amount to $3.2 billion.

So the grand total is a little more than $5 billion.

It can be seen that if we continue to spend money—and $750 million is provided in this bill—an estimated and much-hoped-for surplus of $4.2 billion, when the budget was submitted, is rapidly and gradually and constantly going down the drain.

Congress may still do something about it, but I would be remiss in my duty if I did not say that in proportion as we spend $1 billion over the budget estimate in the Defense bill, and $750 million in this bill, somewhere, if we are to have a balanced budget, we shall have to find revenues, instead of chopping revenues out of the budget and then denying a Presidential request for revenue. That is all I have to say on this subject.

Mr. CURTIS. Mr. President, will the Senator from Illinois yield?

Mr. DIRKSEN. I yield.

Mr. CURTIS. I shall support the Senator's amendment. I shall do so because I feel, as the Senator has stated, that as a matter of fiscal policy that must be done.

In doing so, I am aware that we do not have the benefit of any hearings or a committee report on this amendment or on the bill itself.

Although I wish to go on record as being in favor of increased postal revenues, I likewise wish the RECORD to show that I do not adopt in detail the provisions of the Senator's amendment.

Mr. JAVITS. Mr. President, will the Senator from Illinois yield?

Mr. DIRKSEN. I yield.

Mr. JAVITS. Can the minority leader tell us the answer to a question which I shall now submit? It is charged that if the amendment of the minority leader is added to the bill, it will result in killing the bill; it is said that the House will not accept the amendment, and that the result will be to destroy the bill.

On the other hand, a number of Senators, including myself, are perfectly willing to vote for increased postal rates, in order to meet our responsibilities.

Can the Senator from Illinois tell us—and the majority leader is also in the Chamber, and I also direct this question to him—whether, if we defeat this amendment at this time, we shall have an opportunity to vote on the question of increasing the postal rates?

Mr. DIRKSEN. I can only say that the effort has been made over a period of time, but it has not succeeded. We have a terrific deficit—nearly $600 million—in the Post Office Department alone. If we add $236 million for the postal workers, by means of this bill, the postal deficit will be more than $836 million, which must be taken out of the general revenue; and, therefore, this deficit in the operations of this Government agency will become a charge against the taxpayers and against the Treasury generally. I do not believe that is a sound way to run a Government department, and I do not believe it is sound financing.

Mr. President, I shall not request a yea-and-nay vote on the question of agreeing to this amendment. I simply say to the Senate and to the country that not long ago we were greatly inspired by the hope that there would be a $4 billion surplus and that there might be a tax reduction for the beleaguered taxpayers of the country; but I am afraid all that is going down the drain.

I may add that perhaps yet today we shall consider the Health, Education, and Welfare Department bill; and I think the amount it calls for is in the neighborhood—according to the version reported by the Senate committee—of $400 million over the budget. Perhaps we can chop all of it out of the mutual security funds; I do not know. But I doubt it.

Mr. JAVITS. I should like to ask the majority leader that question. Will we have an opportunity—if this amendment is defeated at this time—to vote at this session of the Congress on the question of increasing the postal rates?

Mr. JOHNSON of Texas. I am informed that the House committee yesterday killed a proposal on postal-rate increases, by a vote of 14 to 7. I am further informed that the proposal offered by the distinguished minority leader is the first program of the administration, and is not its revised plan. I think it has a new plan, which is different from the one he offered in January.

Mr. DIRKSEN. I revised this, in order to make it conform.

Mr. JOHNSON of Texas. I think the Senate should consider a rate bill; and I am prepared to vote for a rate bill of that type, although at this time I do not wish to go into the specifics. I do not know that it will be reported before we leave for the conventions, if we do. I think it should be considered on its merits. I do not think it fair to the employees to make the fate of the pay bill for them dependent on the success of a measure of the sort referred to, which already has been defeated in the House committee; and in view of the fact that the House committee defeated it by a 2 to 1 margin, certainly it is unlikely that the House as a whole would do otherwise.

But I should like to see the committee begin to evolve a formula which would provide us with more revenue.

Mr. JAVITS. Of course, that situation puts me in the position of believing that this is the only chance we shall have to vote to make the income meet the outgo. I think most Senators wish to do the things which need to be done, whether in regard to research or in regard to paying the Government employees properly or in regard to foreign aid. Of course, I very much favor foreign aid. I also wish to have the Government pay its bills.

I respectfully submit that if we do not receive those opportunities from the committees, then we have to do what the minority leader is doing; namely, utilize the rules of the Senate to attach such proposals to any bills that are available.

Mr. DIRKSEN. First, let me assure the Senator from New York that this proposal is not designed to kill this bill. I am opposed to this bill, and I have been opposed to it from the beginning. I shall do my best to get the President to veto it, if he will listen to me; and I may have something to say about it—I do not know. But that is not the design of this amendment.

We know that, as the bill now stands, its cost, if it is enacted into law, will be $750 million.

I suppose the bill will be passed. I am reasonably confident that the House would override a veto of the bill. I hope the Senate would sustain a veto.

But the record must be made, and I want to make it as we proceed. I do not want anyone in the country to be able to say, at any time, "If you were interested in fiscal sanity and fiscal responsibility, why did you not concretely offer something to offset the expenditure of $750 million?"

The amendment is offered in the utmost good faith.

If I were to undertake to embarrass anyone, I might ask for a vote on the amendment by a show of hands, or for a yea-and-nay vote on the amendment. But I shall not do so.

I am quite content to let the RECORD stand as it now is.

Mr. JAVITS. Mr. President, I shall support the amendment of the Senator from Illinois, because I think he is doing the only thing that can be done in order to demonstrate that we are willing to pay the bill if we wish to provide benefits for the people whom we think need to receive benefits.

Mr. DIRKSEN. That is well spoken.

Mr. JOHNSON of Texas. Mr. President, I am ready to vote.

Mr. JOHNSTON of South Carolina. Mr. President, I should like to say to the Senate that we find ourselves in this position because we have always considered this a revenue matter, and we always wait until the House sends us the revenue bills.

It may be news to some Senators to know that the money which is raised from the Post Office operations does not go into the Post Office Department funds, but goes into the general fund; and then the Department goes to the general fund, as does every other department, for the money it needs.

We once passed such a bill, and sent it to the House of Representatives. But the House sent it back to us, with a note saying:

> We in the House originate the revenue measures.

For that reason, we find ourselves in this position at the present time.

I realize that something should be done. But I wish to call attention to the fact that in the case of second-class mail, the increase in rates will go into effect on July 1.

As regards third-class mail, another increase in rates will come next January. That will result from the original bill which we passed in 1958, which at that time increased the revenue for the Post Office Department approximately $547 million.

Mr. DIRKSEN. Mr. President, when the Congress passed the Postal Pay Raise Act of 1958, it said—and it was recorded as clearly as print could set it forth—that after making allowance for the things that can be charged to the postal service, there shall be a rate adjustment in order to provide the revenues with which to meet the expenditures of the Department. But we have been remiss in the duty of carrying out the very thing we solemnly wrote into the law only 2 years ago. The words are so clear that they cannot be mistaken. I take that responsibility pretty seriously, and it is the reason why I have offered this proposal.

I am grateful to my distinguished friend the chairman of the committee for not making a point of order. I am not going to ask for a record vote, but I shall ask for a division, and I will let it go at that.

Mr. BUSH. Mr. President, will the Senator yield 1 minute to me?

Mr. DIRKSEN. Yes.

Mr. BUSH. I commend the Senator for bringing up this amendment, and I wish to associate myself with the Senator from New York in approving the proposal and declaring, in view of the fact that there is not to be a record vote, that I wish to support the Senator's amendment.

Mr. LAUSCHE. Mr. President, will the Senator yield?

Mr. DIRKSEN. Yes.

Mr. LAUSCHE. I subscribe to the comments made by the Senator from New York. I received a letter from a citizen of Ohio who said, "I have been your friend all your life. Viewing things as they are going, I have a recommendation to make to you. While you are in the Senate, vote for every spending program, against every taxing bill, and for every tax repeal bill."

I pondered his advice, and I wondered whether that was the glorious path to eternal membership in the Senate.

Let me point out that in this session we have acted on several money bills. We repealed the cabaret tax. It is now being proposed to repeal the excise tax on telephone use and other taxes. We increased the subsidy to the merchant marine.

In the tax field, we have gone only in the direction of reducing revenues, even though we know that in 24 out of the last 29 years we have had deficits. But what are we doing in regard to spending? Every spending proposal that has been offered has received approval. Every proposal to attempt to set the budget in balance has been rejected. Mr. President, it just cannot be. There must come an eventual accounting.

I shall vote for the postal rate increase, although I do not like to connect it to a salary bill. However, under the conditions which prevail, I must do so.

Instead of having a $4 billion surplus—provided the postal rate increase and gasoline tax increase were adopted—I want the citizens of Ohio to know now that we cannot continue to repeal taxes and increase spending without further cheapening the dollar, without further putting tax burdens upon our children and grandchildren, and without further robbing holders of U.S. bonds and thrifty people who put their money in the banks for their future.

Mr. DWORSHAK. Mr. President, will the Senator yield?

Mr. DIRKSEN. Mr. President, I yield to the Senator from Idaho, and then I shall yield back the remainder of the time I have on the amendment.

Mr. DWORSHAK. Mr. President, the distinguished minority leader has said he hesitates to ask for the yeas and nays on his amendment because he does not want to embarrass Members of this body. Does not the distinguished minority leader agree with me that this body, by its actions day in and day out, is embarrassing the American taxpayer, and embarrassing our children and grandchildren, by forcing them to assume the responsibility of our giving them more government than revenues will justify at this time? When will we reach the time when we stand up and face our responsibility to give the American taxpayer only as much government as we are willing to make him pay for? Does not the Senator think the time has come when we must stop embarrassing the American people?

The PRESIDING OFFICER. The Senator from Illinois.

Mr. DIRKSEN. I am prepared to yield back my time.

Mr. JOHNSTON of South Carolina. I yield back my time.

The PRESIDING OFFICER. All time on the amendment has been yielded back.

The question is on agreeing to the amendment of the Senator from Illinois. (Putting the question.) The "noes" seem to have it. The "noes" have it.

Mr. DIRKSEN. Mr. President, I ask for a division.

Mr. JOHNSON of Texas. Mr. President, I move to reconsider the vote by which the amendment was defeated.

The PRESIDING OFFICER. The chair states to the Senator from Illinois that the result was announced.

Mr. JOHNSON of Texas. Mr. President, I move to reconsider.

The PRESIDING OFFICER. The question is on the motion to reconsider.

Mr. JOHNSTON of South Carolina. Mr. President, I move to lay the motion to reconsider on the table.

Mr. KUCHEL. Mr. President, a division.

The PRESIDING OFFICER. A division has been requested on the motion to table the motion to reconsider.

Mr. JOHNSON of Texas. Then, Mr. President, I withdraw my motion to reconsider.

The PRESIDING OFFICER. The motion to reconsider is withdrawn.

Mr. JOHNSTON of South Carolina. I withdraw my motion to table.

The PRESIDING OFFICER. Both motions have been withdrawn.

Mr. ERVIN. Mr. President, I rise for the purpose of making a motion to recommit.

I am satisfied, from my study of the subject matter of this bill, that Congress should enact the proposed pay increases for the postal service. I do not feel justified on the facts, however, in voting for the increases totaling about half a billion dollars a year which this bill provides for those in other Government employment.

For those reasons, I move that the bill be recommitted to the Committee on Post Office and Civil Service with instructions that it divide the provisions of this bill into two bills, and report back to the Senate one bill containing the present provisions respecting the postal employees, and a second bill containing the provisions of this bill relating to other Government employees.

Mr. McCLELLAN. Mr. President, will the Senator yield?

Mr. ERVIN. I yield.

The PRESIDING OFFICER. How much time does the Senator yield?

Mr. ERVIN. I yield to the Senator from Arkansas, from the time available to me, whatever time the Senator requires.

Mr. McCLELLAN. Mr. President, I wish to associate myself with the distinguished Senator from North Carolina. I believe the postal pay increase ought to be passed at this session of Congress. I urgently suggest to my colleague that he make a part of his motion the requirement that the committee separate the bills and report them to the Senate by next Monday, so that the bills can be enacted at this session of Congress. Then we shall have the issues separated. Those of us who feel as the distinguished Senator from North Carolina and I feel, that the postal pay raise is fully justified, and that the other pay raise is not, will have the opportunity to vote for the increase we feel is justified, and will have the opportunity to vote against the increase we feel is not justified. Thus we shall not be put in the position of penalizing those who deserve the pay raise by denying the raise in order to vote against that part of the bill which we feel is not justified—two thirds of the bill in money value—and for which the case has not been made.

Mr. ERVIN. Mr. President, in consequence of the suggestion made by the able and distinguished senior Senator from Arkansas, I amend my motion to recommit so as to provide that the committee shall forthwith report back two bills of the nature specified by me.

Mr. President, I ask for the yeas and nays on the motion.

The yeas and nays were ordered.

Mr. ERVIN. Mr. President, unless the able and distinguished chairman of the committee or some other Senator desires to speak, I yield back the remainder of my time.

Mr. JOHNSON of Texas. Mr. President, we have been in session since early this morning. These issues have been resolved. Senators who have been for the raise for the postal workers have had an opportunity to indicate it. Senators who have favored the increase for all workers have had an opportunity to indicate it.

I hope we shall not spend all day working on the bill and then recommit the bill. I hope the motion to recommit will be defeated, and that we can pass the bill, to give equity and justice to people who are entitled to receive it.

Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. All time has been yielded back. The question is on agreeing to the motion of the Senator from North Carolina, to recommit with instructions to report forthwith two bills.

On this motion, the yeas and nays have been ordered, and the clerk will call the roll.

The Chief Clerk called the roll.

Mr. MANSFIELD. I announce that the Senator from Colorado [Mr. CARROLL], the Senator from California [Mr. ENGLE], the Senator from Michigan [Mr. HART], the Senator from Georgia [Mr. RUSSELL], the Senator from Mississippi [Mr. STENNIS], the Senator from Texas, [Mr. YARBOROUGH], and the Senator from Louisiana [Mr. ELLENDER] are absent on official business.

I also announce that the Senator from Missouri [Mr. HENNINGS] and the Senator from Arkansas [Mr. FULBRIGHT] are absent because of illness.

I further announce that the Senator from Massachusetts [Mr KENNEDY], the Senator from Tennessee [Mr. KEFAUVER], the Senator from Michigan [Mr. McNAMARA], the Senator from Oregon [Mr. MORSE], and the Senator from Wyoming [Mr. O'MAHONEY] are necessarily absent.

I further announce that, if present and voting, the Senator from Colorado [Mr. CARROLL], the Senator from California [Mr. ENGLE], the Senator from Tennessee [Mr. KEFAUVER], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Oregon [Mr. MORSE], the Senator from Mississippi [Mr. STENNIS], the Senator from Texas [Mr. YARBOROUGH], the Senator from Michigan [Mr. McNAMARA], the Senator from Missouri [Mr. HENNINGS], the Senator from Louisiana [Mr. ELLENDER], and the Senator from Arkansas [Mr. FULBRIGHT] would each vote "nay."

Mr. KUCHEL. I announce that the Senator from Maryland [Mr. BUTLER] is absent because of illness.

The Senator from Indiana [Mr. CAPEHART] is absent by leave of the Senate.

The Senator from New Hampshire [Mr. COTTON] and the Senator from Nebraska [Mr. HRUSKA] are necessarily absent.

The Senator from Iowa [Mr. HICKENLOOPER], the Senator from South Dakota [Mr. MUNDT], and the Senator from Kansas [Mr. SCHOEPPEL] are absent on official business.

If present and voting, the Senator from Nebraska [Mr. HRUSKA] and the Senator from Kansas [Mr. SCHOEPPEL] would each vote "yea."

The result was announced—yeas 21, nays 56, as follows:

[No. 228]

YEAS—21

Bennett	Dirksen	McClellan
Bridges	Dworshak	Morton
Bush	Ervin	Saltonstall
Case, S. Dak.	Goldwater	Talmadge
Church	Holland	Thurmond
Cooper	Lausche	Wiley
Curtis	Lusk	Williams, Del.

NAYS—56

Aiken	Gruening	Martin
Allott	Hart	Monroney
Anderson	Hartke	Moss
Bartlett	Hill	Murray
Beall	Humphrey	Muskie
Bible	Jackson	Pastore
Brunsdale	Javits	Prouty
Byrd, W. Va.	Johnson, Tex.	Proxmire
Cannon	Johnston, S.C.	Randolph
Carlson	Jordan	Robertson
Case, N.J.	Keating	Scott
Clark	Kerr	Smathers
Dodd	Kuchel	Smith
Douglas	Long, Hawaii	Sparkman
Eastland	Long, La.	Symington
Fong	McCarthy	Williams, N.J.
Frear	McGee	Young, N. Dak.
Gore	Magnuson	Young, Ohio
Green	Mansfield	

NOT VOTING—23

Butler	Fulbright	Morse
Byrd, Va.	Hayden	Mundt
Capehart	Hennings	O'Mahoney
Carroll	Hickenlooper	Russell
Chavez	Hruska	Schoeppel
Cotton	Kefauver	Stennis
Ellender	Kennedy	Yarborough
Engle	McNamara	

So Mr. ERVIN's motion to recommit with instructions was rejected.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the third reading of the bill.

The bill was read the third time.

The PRESIDING OFFICER. The question is on the passage of the bill. Is all time yielded back?

Mr. JOHNSTON of South Carolina. I yield back the remainder of my time.

Mr. DIRKSEN. I yield back the remainder of my time.

Mr. JOHNSTON of South Carolina. Mr. President, I ask for the yeas and nays.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is, Shall the bill pass? On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DIRKSEN (when his name was called). On this vote, I have a live pair with the senior Senator from Kansas [Mr. SCHOEPPEL]. If he were present and voting, he would vote "yea"; if I were permitted to vote, I would vote "nay." I therefore withhold my vote.

The rollcall was concluded.

Mr. MANSFIELD. I announce that the Senator from Colorado [Mr. CARROLL], the Senator from California [Mr. ENGLE], the Senator from Georgia [Mr. RUSSELL], the Senator from Mississippi [Mr. STENNIS], the Senator from Texas [Mr. YARBOROUGH], and the Senator from Arizona [Mr. HAYDEN] are absent on official business.

I also announce that the Senator from Arkansas [Mr. FULBRIGHT] and the Senator from Missouri [Mr. HENNINGS] are absent because of illness.

I further announce that the Senator from Massachusetts [Mr. KENNEDY], the Senator from Tennessee [Mr. KEFAUVER], the Senator from Michigan [Mr. MCNAMARA], the Senator from Oregon [Mr. MORSE], and the Senator from Wyoming [Mr. O'MAHONEY] are necessarily absent.

I further announce that, if present and voting, the Senator from Colorado [Mr. CARROLL], the Senator from California [Mr. ENGLE], the Senator from Arkansas [Mr. FULBRIGHT], the Senator from Missouri [Mr. HENNINGS], the Senator from Tennessee [Mr. KEFAUVER], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Michigan [Mr. MCNAMARA], the Senator from Oregon [Mr. MORSE], the Senator from Mississippi [Mr. STENNIS], and the Senator from Texas [Mr. YARBOROUGH] would each vote "yea."

Mr. KUCHEL. I announce that the Senator from Maryland [Mr. BUTLER] is absent because of illness.

The Senator from Indiana [Mr. CAPEHART] is absent by leave of the Senate.

The Senator from New Hampshire [Mr. COTTON] and the Senator from Nebraska [Mr. HRUSKA] are necessarily absent.

The Senator from Iowa [Mr. HICKENLOOPER], the Senator from South Dakota [Mr. MUNDT], and the Senator from Kansas [Mr. SCHOEPPEL] are absent on official business.

If present and voting, the Senator from Indiana [Mr. CAPEHART] and the Senator from New Hampshire [Mr. COTTON] would each vote "yea."

The pair of the Senator from Kansas [Mr. SCHOEPPEL] has been previously announced by the Senator from Illinois [Mr. DIRKSEN].

On this vote, the Senator from South Dakota [Mr. MUNDT] is paired with the Senator from Nebraska [Mr. HRUSKA]. If present and voting, the Senator from South Dakota would vote "yea," and the Senator from Nebraska would vote "nay."

The result was announced—yeas 62, nays 17, as follows:

[No. 229]

YEAS—62

Aiken	Dodd	Johnson, Tex.
Allott	Douglas	Johnston, S.C.
Anderson	Eastland	Jordan
Bartlett	Ellender	Keating
Beall	Fong	Kerr
Bible	Frear	Kuchel
Bridges	Gore	Long, Hawaii
Byrd, W. Va.	Green	Long, La.
Cannon	Gruening	McCarthy
Carlson	Hart	McGee
Case, N.J.	Hartke	Magnuson
Chavez	Hill	Mansfield
Church	Humphrey	Martin
Clark	Jackson	Monroney
Cooper	Javits	Moss
Murray	Saltonstall	Talmadge
Muskie	Scott	Wiley
Pastore	Smathers	Williams, N.J.
Prouty	Smith	Young, N. Dak.
Proxmire	Sparkman	Young, Ohio
Randolph	Symington	

NAYS—17

Bennett	Dworshak	McClellan
Brunsdale	Ervin	Morton
Bush	Goldwater	Robertson
Byrd, Va.	Holland	Thurmond
Case, S. Dak.	Lausche	Williams, Del.
Curtis	Lusk	

NOT VOTING—21

Butler	Hayden	Morse
Capehart	Hennings	Mundt
Carroll	Hickenlooper	O'Mahoney
Cotton	Hruska	Russell
Dirksen	Kefauver	Schoeppel
Engle	Kennedy	Stennis
Fulbright	McNamara	Yarborough

So the bill (H.R. 9883) was passed.

Mr. JOHNSON of Texas. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. HUMPHREY. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AUTHORIZATION OF CERTAIN PUBLIC WORKS ON RIVERS AND HARBORS

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Order No. 1586, H.R. 7634.

The PRESIDING OFFICER (Mr. Moss in the chair). The bill will be stated by title for the information of the Senate.

The LEGISLATIVE CLERK. A bill (H.R. 7634) authorizing the construction, repair, and preservation of certain public works on rivers and harbors for navigation, flood control, and for other purposes.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Public Works with amendments.

LIMITATION OF DEBATE

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the time for debate be limited to 30 minutes on amendments and an hour on the bill.

The PRESIDING OFFICER. Is there objection?

Mr. BENNETT. Mr. President, I should like to ask the Senator from Texas whether it will be possible to take up the conference reports about which I spoke to him.

Mr. JOHNSON of Texas. As soon as we get the bill under way.

Mr. BENNETT. Then I shall be available as soon as the bill is passed. I have no objection.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Texas?

The Chair hears none, and it is so ordered.

The unanimous-consent agreement was later reduced to writing, as follows:

Ordered, That, effective during the further consideration of the bill (H.R. 7634) authorizing the construction, repair, and

preservation of certain public works on rivers and harbors for navigation, flood control, and for other purposes, debate on any amendment, motion, or appeal, except a motion to lay on the table, shall be limited to 30 minutes, to be equally divided and controlled by the mover of any such amendment or motion and the majority leader: *Provided,* That in the event the majority leader is in favor of any such amendment or motion, the time in opposition thereto shall be controlled by the minority leader or some Senator designated by him: *Provided, further,* That no amendment that is not germane to the provisions of the said bill shall be received.

Ordered further, That on the question of the final passage of the said bill debate shall be limited to 1 hour, to be equally divided and controlled, respectively, by the majority and minority leaders: *Provided,* That the said leaders, or either of them, may, from the time under their control on the passage of the said bill, allot additional time to any Senator during the consideration of any amendment, motion, or appeal.

Mr. JOHNSON of Texas. Mr. President, I yield such time as the Senator from Oklahoma may desire to use.

Mr. President, will the Senator from Oklahoma yield so that I may make an announcement?

Mr. KERR. I yield.

LABOR—HEALTH, EDUCATION, AND WELFARE APPROPRIATIONS, 1961

Mr. JOHNSON of Texas. Mr. President, while the minority leader is on the floor, I ask unanimous consent that during the consideration of H.R. 11390, the Labor—Health, Education, and Welfare appropriation bill, debate on any amendment, motion, or appeal, except a motion to lay on the table, be limited to 30 minutes, and that debate on the bill be limited to 1 hour, the time to be equally divided.

Mr. DIRKSEN. Mr. President, for the information of Senators on this side of the aisle, I know of no request for time, except that I propose to move to recommit the bill and to reduce the overall amount. Other than that, I know of no other motions or no amendments.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Texas? The Chair hears none, and it is so ordered.

The unanimous-consent agreement, reduced to writing, is as follows:

Ordered, That, effective during the further consideration of the bill (H.R. 11390) making appropriations for the Departments of Labor and Health, Education, and Welfare, and related agencies, for the fiscal year ending June 30, 1961, and for other purposes, debate on any amendment, motion, or appeal, except a motion to lay on the table, shall be limited to thirty minutes, to be equally divided and controlled by the mover of any such amendment or motion and the majority leader: *Provided,* That in the event the majority leader is in favor of any such amendment or motion, the time in opposition thereto shall be controlled by the minority leader or some Senator designated by him: *Provided further,* That no amendment that is not germane to the provisions of the said bill shall be received.

Ordered further, That on the question of the final passage of the said bill debate shall be limited to one hour, to be equally divided and controlled, respectively, by the majority and minority leaders: *Provided,* That the said leaders, or either of them, may, from the time under their control on the passage of the said bill, allot additional time to any Senator during the consideration of any amendment, motion, or appeal.

Mr. JAVITS. Mr. President, will the Senator from Texas yield?

Mr. JOHNSON of Texas. I yield.

Mr. JAVITS. Is it the intention to finish action on both bills tonight?

Mr. JOHNSON of Texas. We hope to do so. That will depend on the number of amendments to be considered.

Mr. JAVITS. What is the plan for tomorrow?

Mr. JOHNSON of Texas. It is expected that the Senate will be in session tomorrow.

Mr. HOLLAND. Mr. President, what is the title of the other bill referred to by the Senator from Texas?

Mr. JOHNSON of Texas. The Labor—Health, Education, and Welfare appropriation bill.

Mr. HOLLAND. I thank the Senator.

AUTHORIZATION OF CERTAIN PUBLIC WORKS ON RIVERS AND HARBORS

The Senate resumed the consideration of the bill (H.R. 7634) authorizing the construction, repair, and preservation of certain public works on rivers and harbors for navigation, flood control, and for other purposes.

Mr. KERR. Mr. President, since the approval of the last authorization bill on July 3, 1958, many favorable reports on proposed projects have been transmitted to the Congress by the Corps of Engineers.

In addition, a number of major river basin authorizations have been reduced by appropriations to a point where additional monetary authorization is urgently needed to continue construction of specific projects in the comprehensive plans for flood control, navigation, and other purposes, as originally approved by the Congress. There are also several matters concerning general legislation and modification of previous project authorizations that should be considered at this time.

H.R. 7634 is a comprehensive measure to carry forward the important programs for the development and improvement of the rivers and harbors of our Nation.

The bill passed the House on July 16, 1959. As it passed the House the bill included authorization for 49 new projects and modifications having an estimated cost of $278,310,500, and six increased basin authorizations totaling $379 million, a total amount of $657,310,500.

The basin authorizations included in the bill by the House were supposed to cover appropriations for 2 years, fiscal years 1961 and 1962.

The Committee on Public Works held hearings on certain projects in the House bill and on other projects which were proposed for consideration subsequent to passage of the bill by the House.

The Committee on Public Works added 85 new projects and modifications to the House bill and deleted 2 projects from the bill. This total includes five basin authorizations added and the amounts of the six in the House bill were increased.

The estimated cost of the new projects and modifications added by the Senate is $508,247,852, and the increase in basin authorizations is $417,247,852, a total added by the Senate of $925,487,552.

The basin authorizations were increased to cover appropriations for 3 years, fiscal years 1961, 1962, and 1963, instead of 2 years provided by the House bill. That was occasioned by reason of the fact that the House bill was passed in 1959 and provided future authorizations for 1961 and 1962. We bring the bill to the Senate now, in 1960, and of necessity have increased the amount to include requirements for fiscal 1963, in addition to 1961 and 1962, as provided for in the House bill.

The committee has added two new titles to the House bill. Title III permits the evaluation of recreational benefits in water resources project, and their use in the recognition of the economic consideration of the purposes of the project.

Title IV declares the policy of Congress that owners and tenants at public works projects of the United States shall be paid a fair and equitable sum for their property acquired and reimbursed for their actual losses and damages, and establishes a commission to study the problem.

The committee feels that the problems involved in the studies that have been completed are important, urgent, and deserve early consideration, and that further delay would have unfortunate results in retardation of projects now under construction and others needed for prosecution of the program for full development of our national water resources.

I ask unanimous consent to have printed in the RECORD a list of the projects included in the bill by States, and a summary of the bill.

There being no objection, the list and summary were ordered to be printed in the RECORD, as follows:

List of projects by States, H.R. 7634

	Estimated cost
ARIZONA	
(FC) Gila and Salt Rivers	$3,300,000
ARKANSAS	
(FC) McKinney Bayou	346,400
(FC) Maniece Bayou	668,400
(N) Ouachita and Black Rivers	43,550,000
(FC) Village Creek, White River, and Mayberry levee districts	1,322,000
(MP) White River Basin	50,000,000
(FC) Bank protection at Garland City	1,750,000
CALIFORNIA	
(FS) Atherton Creek	----------
(N) Los Angeles-Long Beach Harbor	1,768,000
(FC) Los Angeles County F.C. project	32,000,000
(MP) Merced River	12,000,000
(FC) Mojave River	3,070,000
(MP) Mokelumne River	10,000,000
(N) Monterey Harbor and Bay	3,989,000

List of projects by States, H.R. 7634—Con.

CALIFORNIA—continued

SUMMARY OF BILL

TITLE I—RIVERS AND HARBORS

Sec. 101:	*Estimated cost*
Navigation projects (63)	$317,201,300
Beach erosion control projects (9)	22,190,800
Monetary authorization (Barkley Dam) (1)	146,000,000
Sec. 105: Decatur Bend Lake (1)	155,000
Title I total (74)	485,547,100

TITLE II—FLOOD CONTROL

Sec. 203:	*Estimated cost*
New projects or project modifications (44)	$259,969,252
Increased basin authorizations (10)	736,240,000
Sec. 204: Merced River, Calif. (1)	12,000,000
Sec. 205: Mokelumne River, Calif. (1)	10,000,000
Sec. 208: Norman, Okla. (1)	19,042,000
Sec. 209: Missouri River Basin (1)	60,000,000
Title II, total (58)	1,097,251,252
Grand total (132)	$1,582,798,352

GENERAL LEGISLATION

Beach erosion control amendments.

Small navigation projects, $2 million annually.

Sale of excess land for port or industrial development.

Compilation and dissemination of information on floods and flood damages and hazards, $1 million annually.

Use of existing public roads for access roads to projects, and replacement of roads to be relocated.

Title III: Evaluation of recreational benefits at water-resource development projects.

Title IV: Acquisition of lands and establishment of a study commission.

Mr. KERR. Mr. President, I ask that the committee amendments be agreed to en bloc and that the bill as thus amended be considered as original text for the purpose of amendment.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The committee amendments agreed to en bloc are as follows:

On page 2, after line 11, to insert:

"Eastport Harbor, Maine: Senate Document Numbered 98, Eighty-sixth Congress, at an estimated cost of $595,000."

After line 23, to insert:

"York Harbor, Maine: House Document Numbered 395, Eighty-sixth Congress, at an estimated cost of $391,000;

"Pepperell Cove, Maine: House Document Numbered 284, Eighty-sixth Congress, at an estimated cost of $170,000;

"Rye Harbor, New Hampshire: Report of the Board of Engineers for Rivers and Harbors, dated March 30, 1960, at an estimated cost of $238,000."

On page 3, after line 11, to insert:

"Little Narragansett Bay and Watch Hill Cove, Rhode Island and Connecticut: House Document Numbered 396, Eighty-sixth Congress, at an estimated cost of $98,000."

After line 17, to insert:

"Mamaroneck Harbor (East Basin), New York: House Document Numbered 209, Eighty-sixth Congress, at an estimated cost of $105,000;

"Wilmington Harbor, Delaware: Senate Document Numbered 88, Eighty-sixth Congress, at an estimated cost of $351,000;

"Ocracoke Inlet, North Carolina: House Document Numbered 408, Eighty-sixth Congress, at an estimated cost of $4,623,000."

On page 4, after line 14, to insert:

"Palm Beach Harbor, Lake Worth Inlet, Florida: House Document Numbered 283, Eighty-sixth Congress, at an estimated cost of $4,980,000."

After line 20, to insert:

"Little Pass, Clearwater Bay, Florida: House Document Numbered 293, Eighty-sixth Congress, at an estimated cost of $104,000;

"St. Marks River, Florida: House Document Numbered 224, Eighty-sixth Congress, at an estimated cost of $1,711,000."

On page 5 after line 4, to insert:

"Biloxi Harbor, Mississippi: House Document Numbered 271, Eighty-sixth Congress, at an estimated cost of $326,000."

After line 12, to insert:

"Freshwater Bayou, Louisiana: Report of the Board of Engineers for Rivers and Harbors, dated March 31, 1960, at an estimated cost of $7,485,000;

"Calcasieu River and Pass, Louisiana: Report of the Board of Engineers for Rivers and Harbors, dated May 6, 1960, at an estimated cost of $16,992,000."

After line 18, to strike out:

"Gulf Intracoastal Waterway, channel to Port Mansfield, Texas: Senate Document Numbered 11, Eighty-sixth Congress, at an estimated cost of $3,431,000."

After line 21, to insert:

"Texas City Channel, Texas: Report of the Chief of Engineers, dated May 27, 1960, at an estimated cost of $1,605,000;

"Brazos Island Harbor, Texas: Report of the Board of Engineers for Rivers and Harbors, dated May 6, 1960, at an estimated cost of $4,381,000;

"Ouachita and Black Rivers, Arkansas and Louisiana: Report of the Board of Engineers for Rivers and Harbors, dated February 18, 1960, in lieu of the navigation project authorized by the River and Harbor Act of 1950, Public Law 516, Eighty-first Congress, Senate Document Numbered 117, Eighty-first Congress, at an estimated cost of $43,550,000."

On page 6, line 14, after "$146,000,000;", to insert a colon and *"Provided,* That the Chief of Engineers is hereby authorized to relocate the Illinois Central Railroad, as required by the construction of said project, in such manner as to eliminate and prevent interference with and disturbance of municipal and private facilities in Lyon County, Kentucky, not otherwise affected by the construction of the project, substantially in accordance with alinement 'D' shown on the plans on file in the Office of the Chief of Engineers;

"Illinois Waterway, Illinois and Indiana: House Document Numbered 31, Eighty-sixth Congress, at an estimated cost of $114,652,000."

On page 7, after line 10, to insert:

"Milwaukee Harbor, Wisconsin: House Document Numbered 285, Eighty-sixth Congress, at an estimated cost of $38,000."

On page 8, after line 9, to insert:

"Manistee Harbor, Michigan: House Document Numbered 358, Eighty-sixth Congress, at an estimated cost of $1,735,000;

"Detroit River, Trenton Channel, Michigan: House Document Numbered 319, Eighty-sixth Congress, at an estimated cost of $8,570,000."

On page 9, after line 7, to insert:

"Fairport Harbor, Ohio: House Document Numbered 347, Eighty-sixth Congress, at an estimated cost of $2,768,000."

After line 19, to insert:

"Rochester Harbor, New York: House Document Numbered 409, Eighty-sixth Congress, at an estimated cost of $2,445,000;

"Los Angeles and Long Beach Harbors (West Basin), California: House Document Numbered 401, Eighty-sixth Congress, at an estimated cost of $1,768,000;

"Monterey Harbor (Monterey Bay), California: House Document Numbered 219, Eighty-sixth Congress, at an estimated cost of $3,989,000;

"Noyo River and Harbor, California: House Document Numbered 289, Eighty-sixth Congress, at an estimated cost of $370,000;

"Snohomish River (Everett Harbor), Washington: House Document Numbered 348, Eighty-sixth Congress, at an estimated cost of $3,011,000."

On page 10, after line 14, to insert:

"Hilo Harbor, Hawaii: Emergency construction of a seawall to protect against tidal waves and excessive high tides, in accordance with plans on file in the office of the Chief of Engineers, at an estimated cost of $7,000,000."

After line 19, to insert:

"Wessagussett Beach, Weymouth, Massachusetts: House Document Numbered 334, Eighty-sixth Congress, at an estimated cost of $132,000;

"Pemberton Point to Cape Cod Canal, Massachusetts: House Document Numbered 272, Eighty-sixth Congress, at an estimated cost of $139,300;

"Cape Cod Canal to Provincetown, Massachusetts: House Document Numbered 404, Eighty-sixth Congress, at an estimated cost of $178,000."

On page 11, after line 6, to insert:

"Atlantic Coast of Long Island, Fire Island Inlet to Montauk Point, New York: Report of the Chief of Engineers, dated May 27, 1960, at an estimated cost of $19,400,000;

"New Jersey Coast from Barnegat Inlet to Cape May Canal, New Jersey: House Document Numbered 208, Eighty-sixth Congress, at an estimated cost of $1,714,000."

After line 15, to insert:

"Presque Isle Peninsula, Erie, Pennsylvania: House Document Numbered 397, Eighty-sixth Congress, periodic nourishment;

"Orange County, Newport Bay to San Mateo Creek, California: House Document Numbered 398, Eighty-sixth Congress, at an estimated cost of $256,000.

On page 12, after line 8, insert:

"SEC. 103. That the last paragraph of section 2 of the River and Harbor Act of July 3, 1930 (46 Stat. 933 at 945) pertaining to cooperative shore erosion studies and to the Beach Erosion Board, is hereby amended to read as follows:

" 'The Chief of Engineers of the United States Army, under the direction of the Secretary of the Army, is authorized and directed to cause investigations and studies to be made in cooperation with the appropriate agencies of the various States on the Atlantic, Pacific, and Gulf coasts and on the Great Lakes, and of the States of Alaska and Hawaii, the Commonwealth of Puerto Rico, and the possessions of the United States, with a view to devising effective means of preventing erosion of the shores of coastal and lake waters by waves and currents; and any expenses incident and necessary

thereto may be paid from funds appropriated for General Investigations, Civil Functions, Department of the Army: *Provided*, That the Department of the Army may release to the appropriate cooperating agencies information obtained by these investigations and studies prior to the formal transmission of reports to Congress: *Provided further*, That no money shall be expended under authority of this section in any State which does not provide for cooperation with the agents of the United States and contribute to the project such funds or services as the Secretary of the Army may deem appropriate and require; that there shall be organized under the Chief of Engineers, United States Army, a Board of seven members, of whom four shall be officers of the Corps of Engineers and three shall be civilian engineers selected by the Chief of Engineers with regard to their special fitness in the field of beach erosion and shore protection, preferably from among the State agencies cooperating with the Department of the Army. The Board will furnish such technical assistance as may be directed by the Chief of Engineers in the conduct of such studies as may be undertaken and will review the reports of the investigations made. In the consideration of such studies as may be referred to the Board by the Chief of Engineers, the Board shall, when it considers it necessary and with the sanction of the Chief of Engineers, make, as a board or through its members personal examination of localities under investigation: *Provided further*, That the civilian members of the Board may be paid at rates not to exceed $100 a day for each day of attendance at Board meetings, not to exceed thirty days per annum, in addition to the traveling and other necessary expenses connected with their duties on the Board in accordance with the provisions of section 5 of the Administrative Expenses Act of 1946, as amended (5 U.S.C. 73b–2).'"

On page 14, after line 6, to insert:

"SEC. 104. (a) That the Secretary of the Army is authorized and directed to donate and convey by quitclaim deed to the Ship Canal Authority of the State of Florida all of the right, title, and interest of the United States of America in and to—

"(1) lands in Putnam County, Florida, acquired by the United States of America by condemnation proceedings in the United States District Court for the Southern District of Florida, Jacksonville Division, as case numbered 356 U.S.J. Civil; and (2) lands in Marion County, Florida, acquired by the United States of America by condemnation proceedings instituted in the United States District Court for the Southern District of Florida, Ocala Division, as cases numbered 9, 10, 11, 12, 13, 14, 15, 16, and 22, U.S. Ocala Civil.

"(b) It is intended hereby to authorize and direct the conveyance of all lands heretofore acquired by the United States with funds provided by the said authority for rights-of-way for a proposed ship canal across Florida.

"(c) The conveyance authorized by this section shall be made without monetary consideration therefor but upon the conditions that the Ship Canal Authority of the State of Florida will, without cost to the United States: (1) when called upon by the Chief of Engineers, United States Army, to do so, reconvey to the United States, free of any encumbrances placed thereon during ownership by said authority, those lands conveyed pursuant to this section that are required for the Cross Florida Barge Canal; (2) relocate any roads, bridges, or utility lines constructed on or across such lands after the conveyance under this section by the United States, if the relocation thereof is required by the Chief of Engineers; (3) maintain and preserve improvements previously constructed upon the land by the Federal Government in a manner that will not increase the cost of the barge canal project; (4) hold the United States safe and free from any damages resulting from the aforementioned construction; and (5) devote the proceeds from sales of any lands conveyed to it under this section solely for the acquisition, for transfer to the United States free of cost, of any other lands required for the barge canal project.

"(d) Nothing in this section shall be construed as a limitation on the right of the Ship Canal Authority of the State of Florida to sell any of the lands that, in the opinion of the United States Army District Engineer at Jacksonville, Florida, will not be required for the Cross Florida Barge Canal. Any surveys or descriptions required to permit the disposal of any such lands shall be paid for by the Ship Canal Authority of the State of Florida if desired by said Authority prior to the appropriation of funds therefor by the Federal Government.

"(e) Nothing in this section shall be construed as a waiver of the obligation of the Ship Canal Authority of the State of Florida to (1) furnish without cost to the United States, all lands, easements, and rights-of-way necessary for the construction of the Cross-Florida Barge Canal as authorized by the Act of July 23, 1942 (56 Stat. 703); (2) hold and save the United States free from any damages resulting from the construction of said barge canal; and (3) to take over, maintain and operate all highways, bridges, and roadways built in connection with the said barge canal project."

On page 16, after line 16, to insert:

"SEC. 105. That the project for improvement of the Missouri River between Sioux City, Iowa, and the mouth, authorized by the River and Harbor Act approved March 2, 1945, is hereby modified to provide for a lake in the abandoned river channel of the Missouri River between river miles 710 and 715 for recreational purposes, by means of: (a) Construction of a levee extending along the left bank of the new channel to be constructed in the Middle Decatur Bend area of the Missouri River; and (b) construction of hydraulic-fill closures at both ends of the old channel, substantially in accordance with plans to be prepared by the Chief of Engineers, at an estimated Federal cost of $155,000: *Provided*, That responsible local interests furnish assurances satisfactory to the Secretary of the Army that they will (a) hold and save the United States free from damages; and (b) maintain and operate the project modification after completion in accordance with regulations to be prescribed by the Secretary of the Army."

On page 17, after line 9, to insert:

"SEC. 106. The Corps of Engineers is authorized and directed to accept as a project feature the cost of necessary improvement of that section of West Virginia State Secondary Route 40/5 approximately eighty-five one-hundredths mile in length, from its junction with State Route 40 to its terminus near the Hildebrand lock and dam site on the Monongahela River in order to provide access thereto. This authority is provided with the understanding that this method will provide necessary access to the project at the least expenditure of Federal funds, and further that the State of West Virginia will accept as its responsibility the future maintenance of the road."

After line 21, to insert:

"SEC. 107. (a) That the Secretary of the Army is hereby authorized to allot from any appropriations heretofore or hereafter made for rivers and harbors not to exceed $2,000,000 for any one fiscal year for the construction of small river and harbor improvement projects not specifically authorized by Congress which will result in substantial benefits to navigation and which can be operated consistently with appropriate and economic use of the waters of the Nation for other purposes, when in the opinion of the Chief of Engineers such work is advisable, if benefits are in excess of the cost.

"(b) Not more than $200,000 shall be allotted for the construction of a project under this section at any single locality and the amount allotted shall be sufficient to complete the Federal participation in the project under this section.

"(c) Local interests shall provide without cost to the United States all necessary lands, easements, and rights-of-way for all projects to be constructed under the authority of this section. In addition, local interests may be required to hold and save the United States free from damages that may result from the construction and maintenance of the project and may be required to provide such additional local cooperation as the Chief of Engineers deems appropriate. A State, county, municipality or other responsible local entity shall give assurance satisfactory to the Chief of Engineers that such conditions of cooperation as are required will be accomplished.

"(d) Non-Federal interests may be required to share in the cost of the project to the extent that the Chief of Engineers deems that such cost should not be borne by the Federal Government in view of the recreational or otherwise special or local nature of the project benefits.

"(e) Each project for which money is allotted under this section shall be complete in itself and not commit the United States to any additional improvement to insure its successful operation, other than routine maintenance, and except as may result from the normal procedure applying to projects authorized after submission of survey reports, and projects constructed under the authority of this section shall be considered as authorized projects.

"(f) This section shall apply to, but not be limited to, the provision of low water access navigation channels from the existing channel of the Mississippi River to established harbor areas located along the Mississippi River."

On page 19, after line 14, to insert:

"SEC. 108. (a) That whenever the Secretary of the Army, upon the recommendation of the Chief of Engineers, determines that notwithstanding the provisions of the Federal Property and Administrative Services Act of 1949 (63 Stat. 377), as amended, with respect to disposal of surplus real property, (1) the development of public port or industrial facilities on land which is part of a water resource development project under his jurisdiction will be in the public interest; (2) that such development will not interfere with the operation and maintenance of the project; and (3) that disposition of the property for these purposes under this section will serve the objectives of the project within which the land is located, he may convey the land by quitclaim deed to a State, political subdivision thereof, port district, port authority, or other body created by the State or through a compact between two or more States for the purpose of developing or encouraging the development of such facilities. In any case, where two or more political subdivisions thereof, or bodies created by, a State or group of States, seek to obtain the same land, the Secretary of the Army shall give preference to that political subdivision or body whose intended use of land will, in his opinion, best promote the purposes for which the project involved was authorized.

"(b) Any conveyance authorized by this section shall be made at the fair market value of the land, as determined by the Secretary

of the Army, upon condition that the property shall be used for one of the purposes stated in the subsection (a) of this section only, and subject to such other conditions, reservations, or restrictions as the Secretary may determine to be necessary for the development, maintenance, or operation of the project or otherwise in the public interest.

"(c) Prior to the conveyance of any land under the provisions of this section, the Secretary of the Army shall, in the manner he deems reasonable, give public notice of the proposed conveyance and afford an opportunity to interested eligible bodies in the general vicinity of the land to apply for its purchase.

"(d) The Secretary of the Army may delegate any authority conferred upon him by this section to any officer or employee of the Department of the Army. Any such officer or employee shall exercise the authority so delegated under rules and regulations approved by the Secretary.

"(e) The proceeds from any conveyance made under the provisions of this section shall be covered into the Treasury as miscellaneous receipts."

On page 21, at the beginning of line 11, to change the section number from "103" to "109"; after line 14, to insert: "Prospect Harbor, Maine."

At the top of page 22, to insert:

"Channel across Santa Rosa Peninsula and Santa Rosa Island, Florida, to connect East Bay with Santa Rosa Sound and Little Sabine Bay with the Gulf of Mexico."

After line 4, to insert:

"Channel from vicinity of Avalon, Florida, to the waters of Escambia Bay."

After line 8, to insert:

"Little Bay De Noc, Michigan."

After line 9, to insert:

"Ship Canal between Tacoma and Seattle, Washington."

After line 11, to insert:

"Point Roberts, Washington."

After line 12, to insert:

"Deep-water harbor in the Maalaea Bay Area, Island of Maui, Hawaii."

After line 14, to insert:

"Deep-water harbor at Kahaluu, Island of Oahu, Hawaii."

At the beginning of line 17, to change the section number from "104" to "110"; in line 18, after the word "of", to strike out "1959" and insert "1960"; on page 25, after line 3, to insert:

"CONNECTICUT RIVER BASIN

"The plan for flood protection on the Chicopee River, Massachusetts, is hereby authorized substantially in accordance with the recommendations of the Chief of Engineers in his report dated June 1, 1960, at an estimated cost of $5,180,000.

"The project for flood protection on the Westfield River, Massachusetts, is hereby authorized substantially in accordance with the recommendations of the Chief of Engineers in his report dated June 1, 1960, at an estimated cost of $3,240,000.

"The plan for flood control and related purposes on the Farmington River, Connecticut and Massachusetts, is hereby authorized substantially in accordance with the recommendations of the Board of Engineers for Rivers and Harbors in its report dated March 29, 1960, at an estimated cost of $12,052,000."

After line 20, to insert:

"PAWCATUCK, CONNECTICUT

"The project for hurricane-flood protection at Pawcatuck, Connecticut, is hereby authorized substantially in accordance with the recommendations of the Chief of Engineers in House Document Numbered 212, Eighty-sixth Congress, at an estimated Federal cost of $409,000."

On page 26, after line 3, to insert:

"HOUSATONIC RIVER BASIN

"The project for flood control dams and reservoirs on the Naugatuck River, Connecticut, is hereby authorized substantially in accordance with the recommendations of the Chief of Engineers in House Document Numbered 372, Eighty-sixth Congress, at an estimated cost of $10,230,000."

After line 9, to insert:

"STAMFORD, CONNECTICUT

"The project for hurricane-flood protection at Stamford, Connecticut, is hereby authorized substantially in accordance with the recommendations of the Chief of Engineers in House Document Numbered 210, Eighty-sixth Congress, at an estimated Federal cost of $3,030,000 for construction, and at an estimated Federal cost of maintenance and operation of $31,000 annually."

In line 20, after the word "of", to strike out "$1,000,000" and insert "$23,000,000"; in line 24, after the word "Congress", to insert a comma and "and such comprehensive plan is hereby modified to include the following:

"The project for canals, levees, and water control and drainage structures in the Nicodemus Slough area, Glades County, Florida, is hereby authorized substantially in accordance with the recommendations of the Chief of Engineers contained in Senate Document Numbered 53, Eighty-sixth Congress, at an estimated cost of $318,000.

"That the levees around Lake Okeechobee, Florida, authorized by the Rivers and Harbors Act approved July 3, 1930, and modified by the Flood Control Act approved June 30, 1948, and subsequent Acts, shall be known and designated as the Herbert Hoover Dike, and any law, regulation, document, or record of the United States in which such levees are referred to under any other name or designation shall be held to refer to such levees as the Herbert Hoover Dike."; on page 27, after line 15, to insert:

"PEARL RIVER, MISSISSIPPI

"The project for flood protection on the Pearl River at Jackson, Mississippi, is hereby authorized substantially in accordance with the recommendations of the Board of Engineers for Rivers and Harbors in its report dated May 6, 1960, at an estimated cost of $3,609,000."

After line 21, to insert:

"LOWER MISSISSIPPI RIVER

"The project for flood control and improvement of the lower Mississippi River, adopted by the Act of May 15, 1928 (45 Stat. 534), as amended and modified, is hereby further modified and expanded to include the following items of work and the authorization for said project is increased accordingly:

"(a) In addition to previous authorizations, there is hereby authorized to be appropriated the sum of $50,000,000 to provide for the continued prosecution of the channel improvement feature of the project.

"(b) Natchez Harbor, Mississippi: In accordance with the recommendations of the Division Engineer in Senate Document Numbered 16, Eighty-sixth Congress, at an estimated cost of $350,000."

On page 28, after line 12, to strike out:

"TRINITY RIVER BASIN

"The comprehensive plan for improvement of the Trinity River and tributaries, Texas, as authorized by the River and Harbor Act of 1945, is modified to provide for construction of the Bardwell Reservoir on Waxahachie Creek, in the Richland, Chambers, and Cedar Creeks watershed, at an estimated ultimate net Federal cost for construction in addition to that now authorized of $5,104,000, substantially in accordance with the recommendations of the Chief of Engineers in House Document Numbered 424, Eighty-fifth Congress."

And, in lieu thereof, to insert:

"The comprehensive plan for improvement of the Trinity River and tributaries, Texas, as authorized by the River and Harbor Act of 1945, is hereby modified to include the following projects:

"(a) The project for flood protection on Big Fossil Creek in the Richland Hills area, Texas, is hereby authorized substantially in accordance with the recommendations of the Chief of Engineers in House Document Numbered 407, Eighty-sixth Congress, at an estimated cost of $1,861,400.

"(b) Modification and extension of the Forth Worth Floodway on the West Fork of the Trinity River and tributaries, at Fort Worth, Texas, is hereby authorized substantially in accordance with the recommendations of the Chief of Engineers in House Document Numbered 402, Eighty-sixth Congress, at an estimated cost of $2,241,000."

On page 29, after line 20, to insert:

"BRAZOS RIVER BASIN, TEXAS

"In addition to previous authorizations, there is hereby authorized to be appropriated the sum of $21,000,000, for the prosecution of the comprehensive plan for the Brazos River Basin authorized by the Flood Control Act of September 3, 1954."

On page 30, after line 3, to insert:

"RED-OUACHITA RIVER BASIN

"The general plan for flood control and other purposes on Red River, Texas, Oklahoma, Arkansas, and Louisiana, below Denison Dam, Texas and Oklahoma, as authorized by the Flood Control Act of 1946, and amended and supplemented by subsequent Acts of Congress, is hereby further modified to provide for additional improvements for flood control, drainage, and other purposes, substantially in accordance with the recommendations of the Chief of Engineers as follows:

"(a) McKinney Bayou, Arkansas and Texas: House Document Numbered 220, Eighty-sixth Congress, at an estimated cost of $346,400.

"(b) Maniece Bayou, Arkansas: House Document Numbered 288, Eighty-sixth Congress, at an estimated cost of $668,400.

"(c) East Point, Louisiana: House Document Numbered 406, Eighty-sixth Congress, at an estimated cost of $273,000.

"(d) Garland City, Arkansas, Emergency Bank Protection: In accordance with plans on file in the Office of Engineers, at an estimated cost of $1,750,000."

On page 31, line 3, after the word "of"; to strike out "$32,000,000" and insert "$50,000,000"; after line 7, to insert:

"Modification of the existing flood protection project for Village Creek, White River, and Mayberry Levee Districts, White River, Arkansas, is hereby authorized substantially in accordance with plan III, as contained in House Document Numbered 225, Eighty-sixth Congress, at an estimated cost of $1,322,000."

On page 32, line 2, after the word "of", where it appears the first time, to strike out "$94,000,000" and insert "$179,000,000"; after line 4, to insert:

"RIO GRANDE BASIN

"The project for improvement of the Rio Grande Basin, is hereby authorized substantially as recommended by the Chief of Engineers in Senate Document Numbered 94, Eighty-sixth Congress, at an estimated cost of $58,300,000.

"The approval granted above shall be subject to the following conditions and limitations:

"Cochiti Reservoir, Galisteo Reservoir, and all other reservoirs constructed by the Corps of Engineers as a part of the Middle

Rio Grande project will be operated solely for flood control and sediment control, as described below:

"(a) The outflow from Cochiti Reservoir during each spring flood and thereafter will be at the maximum rate of flow that can be carried at the time in the channel of Rio Grande through the middle valley without causing flooding of areas protected by levees or unreasonable damage to channel protective works: *Provided*, That whenever during the months of July, August, September, and October, there is more than two hundred twelve thousand acre-feet of storage available for regulation of summer floods and the inflow to Cochiti Reservoir (exclusive of that portion of the inflow derived from upstream flood-control storage) is less than one thousand five hundred cubic feet per second, no water will be withdrawn from storage in Cochiti Reservoir and the inflow derived from upstream flood-control storage will be retained in Cochiti Reservoir.

"(b) Releases of water from Galisteo Reservoir and Jemez Canyon Reservoir during the months of July, August, September, and October, will be limited to the amounts necessary to provide adequate capacity for control of subsequent summer floods; and such releases when made in these months, or thereafter, will be at the maximum rate practicable under the conditions at the time.

"(c) Subject to the foregoing, the storage of water in and the release of water from all reservoirs constructed by the Corps of Engineers as part of the Middle Rio Grande project will be done as the interests of flood and sediment control may dictate: *Provided*, That the Corps of Engineers will endeavor to avoid encroachment on the upper two hundred and twelve thousand acre-feet of capacity in Cochiti Reservoir, and all reservoirs will be evacuated completely on or before March 31 of each year: *And provided further*, That when estimates of anticipated streamflow made by appropriate agencies of the Federal Government indicate that the operation of reservoirs constructed as a part of the Middle Rio Grande project may affect the benefits accruing to New Mexico or Colorado, under the provisions of the eighth unnumbered paragraph of article VI of the Rio Grande compact, releases from such reservoirs shall be regulated to produce a flow of ten thousand cubic feet per second at Albuquerque, or such greater or lesser rate as may be determined by the Chief of Engineers at the time to be the maximum safe flow, whenever such operation shall be requested by the Rio Grande compact commissioner for New Mexico or the commissioner for Colorado, or both, in writing prior to commencement of such operation.

"(d) All reservoirs of the Middle Rio Grande project will be operated at all times in the manner described above in conformity with the Rio Grande compact, and no departure from the foregoing operation schedule will be made except with the advice and consent of the Rio Grande compact, and no departure from the foregoing operation schedule will be made except with the advice and consent of the Rio Grande Compact Commission: *Provided*, That whenever the Corps of Engineers determines that an emergency exists affecting the safety of major structures or endangering life and shall so advise the Rio Grande Compact Commission in writing these rules of operation may be suspended during the period of and to the extent required by such emergency.

"(e) The foregoing regulations shall not apply to storage capacity which may be allocated to permanent pools for recreation and fish and wildlife propagation: *Provided*, That the water required to fill and maintain such pools is obtained from sources entirely outside the drainage basin of the Rio Grande."

On page 35, after line 5, to insert:

"UPPER MISSISSIPPI RIVER BASIN

"In addition to previous authorizations, there is hereby authorized to be appropriated the sum of $12,000,000 for the prosecution of the comprehensive plan for the Upper Mississippi River Basin, approved in the Act of June 28, 1938, as amended and supplemented by subsequent Acts of Congress.

"The flood protection project on Redwood River at Marshall, Minnesota, is hereby authorized substantially in accordance with the recommendations of the Chief of Engineers in his report dated June 1, 1960, at an estimated cost of $2,252,000.

"The project for the Coralville Reservoir on Iowa River, Iowa, as authorized by the Act of June 28, 1938 (52 Stat. 1215), is hereby modified to provide for construction of a highway bridge across said reservoir at or near the Mehaffy site, to replace the existing bridge crossing of Johnson County on County Road Y, under the direction of the Secretary of the Army and the supervision of the Chief of Engineers, in accordance with such plans as may be approved by the Chief of Engineers, at an estimated cost of not to exceed $1,180,000: *Provided*, That local interests shall construct all necessary approaches to the bridge site, and provide without cost to the United States all lands, easements, and rights-of-way necessary for construction of the bridge."

On page 36, line 8, after the word "of", to strike out "$132,000,000" and insert "$207,000,000"; after line 12, to insert:

"The report of the Chief of Engineers on Wilson Dam and Reservoir, Saline River, Kansas, submitted in compliance with Public Law 505, Eighty-fourth Congress, published as Senate Document Numbered 96, Eighty-sixth Congress, is hereby approved, and construction of the project as a unit of the comprehensive plan of improvement for the Missouri River Basin authorized by the Flood Control Act approved December 22, 1944, is hereby authorized at an estimated cost of $18,081,000."

After line 21, to insert:

"The project for flood protection in the Gering and Mitchell Valleys, Nebraska, authorized by the Flood Control Act of July 3, 1958 (Public Law 500, Eighty-fifth Congress), in accordance with the recommendations of the Chief of Engineers in Senate Document Numbered 139, 84th Congress, is hereby modified to provide for such revisions in project scope and purposes due to changed conditions as may be found necessary by the Chief of Engineers, to provide needed protection in Gering Valley: *Provided*, That construction shall not be initiated until the Chief of Engineers shall submit a feasibility report, which shall be coordinated with the Soil Conservation Service, for the approval of the Public Works Committees of the Congress which shall set forth the plan of improvement, its economic justification, and his recommendations for local cooperation."

On page 37, after line 12, to insert:

"The project for flood protection at Sioux Falls, South Dakota, authorized by the Flood Control Act approved September 3, 1954, Public Law 780, Eighty-third Congress, in accordance with the recommendations of the Chief of Engineers in House Document Numbered 133, Eighty-fourth Congress, is hereby modified to provide for extension of the authorized project to include flood protection in the reach between Western Avenue and Cherry Rock Dam, in accordance with plans to be prepared by the Chief of Engineers, at an estimated cost of $560,000: *Provided*, That local interests agree to: (a) Furnish without costs to the United States all lands, easements, and rights-of-way; (b) hold and save the United States free from damages; (c) make all necessary relocation and utility changes; and (d) maintain and operate the project after completion."

On page 38, after line 3, to insert:

"The project for flood protection on Vermillion River, South Dakota, is hereby authorized substantially in accordance with the recommendations of the Board of Engineers for Rivers and Harbors in its report, dated February 16, 1960, at an estimated cost of $6,010,000."

After line 8, to insert:

"That the Fort Randall Dam and Reservoir project, South Dakota, is modified to provide for construction of a free highway bridge over the Missouri River at an appropriate location west of Platte, South Dakota, under the direction of the Secretary of the Army and the supervision of the Chief of Engineers, in accordance with such plans as may be approved by the Chief of Engineers, in order to provide adequate crossing facilities over such river for highway traffic in the area and in replacement of the closure of the Wheeler Bridge by reason of construction of said reservoir at a cost not to exceed $6,375,000: *Provided*, That local interests shall construct all necessary approaches to the bridge site, and provide without cost to the United States all lands, easements, and rights-of-way necessary for construction of the bridge."

After line 23, to insert:

"The project for flood protection on Cheyenne River and tributaries, South Dakota and Wyoming, is hereby authorized substantially in accordance with the recommendations of the Chief of Engineers in House Document Numbered 280, Eighty-sixth Congress, at an estimated cost of $272,000."

On page 39, after line 3, to insert:

"That (a) the general comprehensive plan for flood control and other purposes in the Missouri River Basin, as authorized by the Act of June 28, 1938 (52 Stat. 1215), and as modified and expanded by subsequent Acts, if further modified to include the payment by the Corps of Engineers of $346,500 to the city of Bismarck, North Dakota, and $227,552 to the city of Mandan, North Dakota, from funds heretofore or hereafter appropriated for the Fort Peck, Garrison, or Oahe Dam and Reservoir projects, in order to provide part of the Federal compensation to such cities, recommended by the board of engineers consultants in their report on effect of Missouri River reservoirs on sewage facilities at Mandan and Bismarck, North Dakota, dated January 1956, for the cost of construction of sewage treatment works made necessary by the construction by the Federal Government of dams and reservoirs on the Missouri River; the total estimated cost of such construction being $770,000 in the case of the city of Bismarck and $505,671 in the case of the city of Mandan. The remaining part of such Federal compensation shall be provided under the provisions of subsection (d) hereof.

"(b) Amounts authorized under the provisions of this item may be paid in a single payment or in such installments as the Chief of Engineers deems appropriate to carry out the provisions of this item. No payment shall be made under such provisions until a showing is made satisfactory to the Chief of Engineers, that the city to receive such payment is ready to proceed with the construction for which the payment is authorized, and is able to finance its portion amounting to 25 per centum of the cost of such construction.

"(c) The Chief of Engineers may require such reports with respect to the expenditure of any amounts paid under the provisions of this item as may be necessary to carry out such provisions.

"(d) In addition to the amounts to be paid under the provisions of the foregoing subsections (a), (b), and (c), and for the same purposes, the Surgeon General of the Public Health Service shall pay $231,000 to the city of Bismarck, North Dakota and $151,701 to the city of Mandan, North Dakota. Payments under the provisions of this item shall be (1) from funds allotted to the State of North Dakota for the fiscal year beginning July 1, 1960, under the provisions of section 6 of the Federal Water Pollution Control Act, and (2) made without regard to the provisions of such Act other than subsection (e) of section 6 and the regulations prescribed to carry out such subsection."

On page 41, after line 1, to insert:

"The project for flood protection on Lynn Camp Creek at Corbin, Kentucky, is hereby authorized substantially in accordance with the recommendations of the Chief of Engineers in the House Document Numbered 282, Eighty-sixth Congress, at an estimated cost of $645,000.

"The project for flood control and allied purposes on Laurel River, Kentucky, is hereby authorized substantially in accordance with the recommendations of the Chief of Engineers in Senate Document Numbered ———, Eighty-sixth Congress, at an estimated cost of $21,900,000.

"The project for flood control and allied purposes on Little Sandy River, Kentucky, is hereby authorized substantially in accordance with the recommendations of the Board of Engineers for Rivers and Harbors in its report dated February 16, 1960, at an estimated cost of $11,900,000."

After line 22, to insert:

"The project for flood protection on Loyalhanna Creek at Latrobe, Pennsylvania, is hereby authorized substantially in accordance with the recommendations of the Chief of Engineers in House Document Numbered 383, Eighty-sixth Congress, at an estimated cost of $2,568,300."

On page 42, after line 9, to insert:

"The project for flood protection on the West Branch of the Mahoning River, Ohio, authorized in Public Law 85–500, in accordance with the recommendations of the Chief of Engineers in House Document 191, Eighty-fifth Congress, is hereby modified to provide that the entire local share of cost for water for pollution abatement and for municipal and industrial water supply purposes is $5,200,000, of which $3,230,000 will be paid in cash during construction, and the unpaid balance at the time the project is placed in useful operation, $1,970,000, may be paid in cash at that time or repaid on an annual basis in accordance with the principles of title III of said Public Law 85–500."

On page 43, after line 7, to insert:

"GILA RIVER BASIN

"The plan of improvement for flood protection and allied purposes on the Gila and Salt Rivers, Gillespie Dam to McDowell Dam site, Arizona, is hereby authorized substantially in accordance with the recommendations of the Chief of Engineers in House Document Numbered 279, Eighty-sixth Congress, at an estimated Federal cost of $3,300,000."

After line 14, to insert:

"WHITEWATER RIVER BASIN, CALIFORNIA

"The project for flood protection on Tahchevah Creek at and in the vicinity of Palm Springs, California, is hereby authorized substantially in accordance with the recommendations of the Chief of Engineers in House Document Numbered 171, Eighty-sixth Congress, at an estimated cost of $1,658,000."

On page 44, line 5, after the word "of", to strike out "$30,000,000" and insert "$32,000,000"; after line 13, to insert:

"SACRAMENTO RIVER BASIN

"The project for flood protection on the Sacramento River, California, authorized by the Flood Control Act approved March 1, 1917, as amended and modified by subsequent Acts of Congress, is further modified substantially in accordance with the recommendations of the Chief of Engineers in Senate Document Numbered 103, Eighty-sixth Congress, and there is hereby authorized to be appropriated the sum of $14,240,000 for the prosecution of the initial phase of bank erosion control works and set-back levees on the Sacramento River."

At the top of page 45, to insert:

"LAS VEGAS WASH, NEVADA

"The project for flood protection on Las Vegas Wash and tributaries, Nevada, is hereby authorized substantially in accordance with the recommendations of the Chief of Engineers in House Document Numbered 405, Eighty-sixth Congress, at an estimated cost of $13,410,000."

After line 6, to insert:

"GLEASON CREEK, NEVADA

"The project for flood protection on Gleason Creek, Nevada, is hereby authorized substantially in accordance with the recommendations of the Chief of Engineers in House Document 388, Eighty-sixth Congress, at an estimated cost of $450,000."

After line 12, to insert:

"GREAT SALT BASIN, UTAH

"The project for flood protection on the Salt Lake City Streams, Jordan River Basin, Utah, is hereby authorized substantially in accordance with the recommendations of the Chief of Engineers in House Document Numbered 213, Eighty-sixth Congress, at an estimated cost of $6,060,000."

In line 21, after the word "of", to strike out "$90,000,000" and insert "$148,000,000"; on page 46, line 3, after "July 3,", to strike out "1958." and insert "1958, and these projects and plans are hereby modified to include: The project for construction of the Foster Reservoir on the South Santiam River, Willamette River Basin, Oregon, is hereby authorized substantially in accordance with the recommendations of the Chief of Engineers in Senate Document Numbered 104, Eighty-sixth Congress, at an estimated cost of $17,340,000."

After line 11, to insert:

"SEC. 204. That, in recognition of the flood-control accomplishments of the multiple-purpose Merced River development including the Bagby, New Exchequer, and Snelling Dams and Reservoirs, proposed to be constructed on the Merced River by the Merced Irrigation District of California, there is hereby authorized to be appropriated a monetary contribution toward the construction cost of such development and the amount of such contribution shall be determined by the Secretary of the Army in cooperation with the Merced Irrigation District, subject to a finding by the Secretary of the Army, approved by the President, of economic justification for allocation of the amount of flood control, such funds to be administered by the Secretary of the Army: *Provided*, That prior to making the monetary contribution or any part thereof, the Department of the Army and the Merced Irrigation District shall have entered into an agreement providing for operation of the dams and reservoirs in such manner as will produce the flood-control benefits upon which the monetary contribution is predicated, and such operation of the dams and reservoirs for flood control shall be in accordance with rules prescribed by the Secretary of the Army pursuant to the provisions of section 7 of the Flood Control Act of 1944 (58 Stat. 890): *Provided further*, That the funds appropriated under this authorization shall be administered by the Secretary of the Army in a manner which shall assure that the annual Federal contribution during the project construction period does not exceed the percentage of the annual expenditure for the dams and reservoirs which the total flood-control contribution bears to the total cost of the dams and reservoirs: *And provided further*, That, unless construction of the development is undertaken within four years from the date of enactment of this Act, the authority for the monetary contribution contained herein shall expire."

On page 47, after line 20, to insert:

"SEC. 205. That, in recognition of the flood control accomplishments of the multiple purpose dam and reservoir (or dams and reservoirs) proposed to be constructed on the Mokelumne River by the East Bay Municipal Utility District of Oakland, California, there is hereby authorized to be appropriated a monetary contribution toward the construction cost of such dam and reservoir (or dams and reservoirs) and the amount of such contributions shall be determined by the Secretary of the Army in cooperation with the East Bay Municipal Utility District, and the Secretary of the Interior, subject to a finding by the Secretary of the Army, approved by the President, of economic justification for allocation of the amount of flood control, such funds to be administered by the Secretary of the Army: *Provided*, That the plan of improvement proposed by the East Bay Municipal Utility District will afford a degree of flood control which in the opinion of the Secretary of the Army is adequate for the Mokelumne River as a part of the overall flood control program for the central valley: *Provided further*, That prior to making the monetary contribution or any part thereof. the Department of the Army and the East Bay Municipal Utility District shall have entered into an agreement providing for operation of the dam or dams in such manner as will produce the flood control benefits upon which the monetary contribution is predicated, and such operation of the dam or dams for flood control shall be in accordance with rules prescribed by the Secretary of the Army pursuant to the provisions of section 7 of the Flood Control Act of 1944 (54 Stat. 890): *Provided further*, That prior to making the monetary contribution or any part thereof, the Department of the Army and the East Bay Municipal Utility District shall have entered into an agreement to provide adequately for mitigation of the damages to fish and wildlife consistent with the other purposes of the project: *And provided further*, That the funds appropriated under this authorization shall be administered by the Secretary of the Army in a manner which shall assure that the annual Federal contribution during the project construction period does not exceed the percentage of the annual expenditure for the dam and reservoir (or dams and reservoirs) which the total flood control contribution bears to the total cost of the dam and reservoir (or dams and reservoirs)."

On page 49, after line 11, to insert.

"SEC. 206. (a) That, in recognition of the increasing use and development of the flood plains of the rivers of the United States and of the need for information on flood hazards to serve as a guide to such development, and as a basis for avoiding future flood hazards by regulation of use by States and municipalities, the Secretary of the Army, through the Chief of Engineers, Department of the Army, is hereby authorized to compile and

disseminate information on floods and flood damages, including identification of areas subject to inundation by floods of various magnitudes and frequencies, and general criteria for guidance in the use of flood plain areas; and to provide engineering advice to local interests for their use in planning to ameliorate the flood hazard: *Provided*, That the necessary surveys and studies will be made and such information and advice will be provided for specific localities only upon the request of a State or a responsible local governmental agency and upon approval by the Chief of Engineers.

"(b) The Secretary of the Army is hereby authorized to allot, from any appropriations heretofore or hereafter made for flood control, sums not to exceed $1,000,000 in any one fiscal year for the compilation and dissemination of such information."

On page 50, after line 9, to insert:

"SEC. 207. (a) That whenever, in connection with the construction of any authorized flood control, navigation or multiple-purpose project for the development of water resources, the Chief of Engineers, under the direction of the Secretary of the Army, determines it to be in the public interest to utilize existing public roads as a means of providing access to such projects during construction, he may, at his discretion, improve, reconstruct and maintain such roads and he may contract with the local authority having jurisdiction over the roads to accomplish the necessary work. The accomplishment of such work may be carried out with or without obtaining any interest in the land on which the road is located in accordance with mutual agreement between the parties: *Provided*, (1) That the Chief of Engineers determines that such work would result in a saving in Federal cost as opposed to the cost of providing a new access road at Federal expense, (2) That, at the completion of construction, the Chief of Engineers will, if necessary, restore the road to at least as good condition as prior to the beginning of utilization for access during construction, and (3) That, at the completion of construction, the responsibility of the Chief of Engineers for improvement, reconstruction and maintenance shall cease.

"(b) That, for such water resources projects, under construction or to be constructed, when the taking by the Federal Government of an existing public road necessitates replacement, the substitute provided will as nearly as practicable serve in the same manner and reasonably as well as the existing road. The Chief of Engineers is authorized to construct such substitute roads to design standards comparable to those of the State in which the road is located, for roads of the same classification as the road being replaced. The traffic existing at the time of the taking shall be used in the determination of the classification."

On page 51, after line 18, to insert:

"SEC. 208. (a) That the Secretary of the Interior is authorized to construct, operate, and maintain the Norman Federal reclamation project, Oklahoma, in accordance with the Federal reclamation laws (Act of June 17, 1902, and Acts amendatory thereof or supplemental thereto), except so far as those laws are inconsistent with this section, for the principal purposes of storing, regulating, and furnishing water for municipal, domestic, and industrial use, and for controlling floods, and, as incidents to the foregoing for the additional purposes of regulating the flow of the Little River, providing for the conservation and development of fish and wildlife, and of enhancing recreational opportunities. The Norman project shall consist of the following principal work: A reservoir on Little River near Norman, Oklahoma, pumping plants, pipelines, and other conduits for furnishing water for municipal, domestic, and industrial use.

"The Secretary may enter into suitable contracts with municipal organizations, or other organizations as defined in section 2, Reclamation Project Act of 1939 (38 Stat. 1187), to undertake with non-Federal financing the construction of pumping plants, pipelines, and other conduits, or any of such works, for furnishing water for municipal, domestic, and industrial use, and to advance to such organizations during the construction period funds to cover an appropriate share of the costs thereof attributable to furnishing water to Tinker Air Force Base.

"(b) In constructing, operating, and maintaining the Norman project, the Secretary shall allocate proper costs thereof in accordance with the following conditions:

"(1) Allocations to flood control, recreation, and the conservation and development of fish and wildlife and water supply for Tinker Air Force Base shall be nonreturnable.

"(2) Allocations to municipal water supply, including domestic, manufacturing, and industrial uses, with the exception of that for Tinker Air Force Base, shall be repayable to the United States by the water users through contracts with municipal corporations, or other organizations as defined by section 2, Reclamation Project Act of 1939 (53 Stat. 1187), and title III of the Flood Control Act of 1958 under the provisions of the Federal reclamation laws, and to the extent appropriate, under the Water Supply Act of 1958. Such contracts shall be precedent to the commencement of construction of any project unit affecting the individual municipalities, and shall provide for repayment of construction costs allocated to municipal water supply in not to exceed fifty years from the date water is first delivered for that purpose, and notwithstanding the provisions in the Water Supply Act of 1958 relating to the rate of interest, payments of said construction shall include interest on unamortized balances of that allocation at a rate equal to the average rate (which rate shall be certified by the Secretary of the Treasury) paid by the United States on its marketable long-term securities outstanding on the date of this Act and adjusted to the nearest one-eighth of 1 per centum: *Provided*, That the water users' organization be responsible for the disposal and sale of all water surplus to its requirements, and that the revenues therefrom shall be used by the organization for the retirement of project debt payments, payment of interest, and payment of operation and maintenance cost.

"(3) Upon the completion of the payment of the water users' construction cost obligation, together with the interest thereon, the water users shall have a permanent right to the use of that portion of the project allocable to municipal water supply purposes.

"(c) Contracts may be entered into with the water users' organization pursuant to the provisions of this section without regard to the last sentence of subsection (c) of section 9 of the Reclamation Project Act of 1939.

"(d) The Secretary is authorized to transfer to the project water users the care, operation, and maintenance of the works herein authorized, and, if such transfer is made, to deduct from the obligation of the water users the reasonable capitalized equivalent of that portion of the estimated operation and maintenance cost of the undertaking which, if the United States continues to operate the project, would be allocated to flood control and fish and wildlife purposes. Prior to taking over the care, operation, and maintenance of said works, the water users' organization shall obligate itself to operate them in accordance with criteria specified by the Secretary of the Army with respect to flood control and the Secretary of the Interior with respect to fish and wildlife: *Provided*, That operation and maintenance and replacement cost of furnishing water supply to Tinker Air Force Base, as contemplated in the plan of development, shall be provided by an appropriate agreement between the Secretary of Defense and the water users' organization.

"(e) Construction of the Norman project herein authorized may be undertaken in such units or stages as in the opinion of the Secretary best serves the project requirements and the relative needs for water of the several municipal users. Repayment contracts negotiated in connection with each unit or stage of construction shall be subject to the terms and conditions of subsection (b) of this section.

"(f) The Secretary may, upon conclusion of a suitable agreement with any qualified agency of the State of Oklahoma or a political subdivision thereof for assumption of the administration, operation, and maintenance thereof at the earliest practicable date, construct or permit the construction of public park and recreational facilities on lands owned by the United States adjacent to the reservoirs of the Norman project, when such use is determined by the Secretary not to be contrary to the public interest, all under such rules and regulations as the Secretary may prescribe. No recreational use of any area to which this subsection applies shall be permitted which is inconsistent with the laws of the State of Oklahoma for the protection of fish and game and the protection of the public health, safety, and welfare. The Federal costs of constructing the facilities authorized by this subsection shall be limited to the nonreimbursable costs of the Norman project for minimum basic recreational facilities as determined by the Secretary.

"(g) Expenditures for the Norman Reservoir may be made without regard to the soil survey and land classification requirements of the Interior Department Appropriation Act, 1954 (43 U.S.C. 390a)."

On page 56, at the beginning of line 10, to change the section number from "204" to "209"; on page 57, after line 3, to insert:

"Ogunquit, York, Wells, Kennebunk, Kennebunkport, Biddeford, Saco, Old Orchard, Cape Elizabeth, Portland, and Phippsburg, and adjacent coastal areas, Maine."

After line 7, to insert:

"Patuxent River, Maryland."

After line 8, to insert:

"Pithlachascotee River, Masarock Town, Anclote River, Lake Tarpon, Brooksville, and adjacent areas, Florida."

After line 12, to insert:

"Atherton Creek, San Mateo County, California."

After line 13, to insert:

"Wildcat and San Pablo Creeks, Contra Costa County, California."

After line 15, to insert:

"Streams in Marin County, California, flowing into Richardson Bay, an arm of San Francisco Bay, including Coyote Creek and Arroyo Corte Madera del Presidio Creek."

After line 19, to insert:

"Island of Hawaii, State of Hawaii, construction of dikes, barriers, or walls, to protect lives and property from lava flows resulting from volcanic eruption."

After line 22, to insert:

"SEC. 210. In addition to previous authorizations, there is hereby authorized to be appropriated the sum of $60,000,000 for the prosecution of the comprehensive plan adopted by section 9(a) of the Act approved December 22, 1944 (Public Law Numbered 534, Seventy-eighth Congress), as amended and supplemented by subsequent Acts of Congress, for continuing the works in the Missouri River Basin to be undertaken under said plans by the Secretary of the Interior."

On page 58, at the beginning of line 7, to change the section number from "205" to

"211"; in line 8, after the word "of", to strike out "1959" and insert "1960"; after line 8, to insert a new title, as follows:

"TITLE III—EVALUATION OF RECREATIONAL BENEFITS

"Policy and purpose

"SEC. 301. It is hereby declared to be the policy of the Congress that full consideration should be given to the recreational purposes that can be served in the formulation, design, construction, and operation of Federal water resources projects hereafter authorized insofar as use for such purpose is compatible with the major purposes for which the project is to be undertaken. Consistent with this policy (1) as an integral part of the planning of any Federal water resources project, there should be included an evaluation of the recreational benefits to be derived therefrom, (2) planning with respect to the development of the recreational potential of any such project (a) should contemplate the coordination of the use of the project area for recreational purposes with the use of existing or planned Federal, State, or local developments in such manner as to achieve maximum net public benefit, and (b) should be carried out jointly with the Secretary of Agriculture if the project is or will be situated within the exterior boundaries of a national forest, and (3) plans with respect to any such project may provide storage and facilities as may be required for recreational use.

"Definitions

"SEC. 302. As used in this title—

"(1) the term 'Federal water resources project' means any project involving the development of water resources for purposes of navigation, flood control, reclamation, irrigation, water supply, hydropower, or other purposes which is undertaken by either the Secretary of the Army, acting through the Chief of Engineers, or the Secretary of the Interior, acting through the Bureau of Reclamation.

"(2) The term 'recreational purposes' means uses from which public recreational benefits may be derived.

"(3) The term 'recreational benefits' means public benefits of a recreational nature.

"Applicability of section 4 of the Flood Control Act of December 22, 1944

"SEC. 303. Except as provided herein, the provisions of this title are intended to be supplemental to and not in derogation of section 4 of the Flood Control Act of December 22, 1944, as amended (16 U.S.C. 460d), and the provisions of that Act are hereby made expressly applicable to Federal water resources projects of the Department of the Interior as well as the Department of the Army. With respect to any such project of the Department of the Interior, any reference in such section to the Secretary of the Army or the Chief of Engineers shall also be deemed to refer to the Secretary of the Interior.

"Evaluation of recreational benefits

"SEC. 304. (a) In addition to such other data as may be prescribed by law, or may be pertinent, there shall be included in any report required to be submitted to the Congress by the Secretary of the Army or the Secretary of the Interior with respect to the development of any Federal water resources project, (1) an evaluation of the annual recreational benefits to be derived therefrom, (2) the annual cost of providing such benefits, including the cost of the additional facilities, if any, to be installed or provided specifically in furtherance of recreational purposes, and (3) the part of the cost of any such project that should be allocated to recreational benefits.

"(b) The evaluation of recreational benefits, as provided in this section shall be made by the Secretary of the Army with respect to Corps of Engineers projects or by the Secretary of the Interior with respect to Bureau of Reclamation projects. The President is hereby authorized to prescribe regulations under which each such evaluation shall be made; and the President shall include in said regulations provisions for using in such evaluation of recreational benefits of any project a monetary value of not less than 50 cents per visitor-day of use of that project for recreation.

"(c) The total recreational benefit creditable to any project under the foregoing provisions of this section shall in no event exceed the cost of providing comparable water-associated recreation by the least costly alternative means.

"Allocation and financing of costs

"SEC. 305. (a) Project costs, including the cost of minimum basic facilities provided pursuant to clause (1) of section 306(a), shall be allocated to the purpose of recreation. Of the costs so allocated not more than 10 per centum of the total cost of any Federal water resources project, including the cost of providing minimum basic facilities pursuant to clause (1) of section 306(a), may be assigned to recreational purposes, except that if the Secretary of the Army or the Secretary of the Interior determines that the recreational benefits to be derived from any such project are needed and that such benefits will have value on a widespread national basis, he may include in any report which is submitted to the Congress with respect to such project a recommendation that a greater amount than 10 per centum of the total cost of the project be assigned to recreational purposes. That part of the total cost of any such project which is allocated to recreational purposes shall be nonreimbursable and nonreturnable: *Provided*, That project costs not so assigned shall be allocated as provided by law.

"Project facilities

"SEC. 306. (a) In connection with any Federal water resources project, the Secretary of the Army or the Secretary of the Interior is authorized—

"(1) to construct, operate, and maintain minimum basic facilities for access to, and for the maintenance of public health and safety and the protection of public property on, lands withdrawn or acquired for the project, and to conserve scenery and natural, historic, and archeologic objects;

"(2) to cooperate with interested State and local governmental agencies and others in the investigation and planning of any such project; and

"(3) to permit the construction, maintenance, and operation of public park and recreational facilities on project lands.

The minimum basic facilities referred to in clause (1) of this subsection shall be limited to water supplies, sanitary facilities, boat anchorage and launching sites, access roads and parking areas, public camp and picnic sites, overlook stations, clearing of public-use water areas to a reasonable extent, and essential safety measures.

"(b) In carrying out the policy and purpose of this title, as set forth in sections 301 and 303, the Secretary of the Army or the Secretary of the Interior is authorized to permit the construction, maintenance, and operation by non-Federal interests, with preference given to State and local governmental agencies, of such additional facilities as may be necessary or desirable for the full development of any Federal water resources project area for recreational purposes in accordance with the provisions of section 4 of the Flood Control Act of December 22, 1944, as amended (16 U.S.C. 460d).

"Fish and Wildlife Coordination Act

"SEC. 307. The provisions of this title are not intended to interfere in any way with operations carried on in accordance with the Fish and Wildlife Coordination Act (16 U.S.C. 661–666c), and no such provision shall be construed to supersede that Act or any of its provisions.

"Reclamation Project Act of 1939

"SEC. 308. The second sentence of section 9(a) of the Reclamation Project Act of 1939, as amended (43 U.S.C. 485h(a)), is amended by striking out 'together with any allocation to flood control or navigation made under subsection (b) of this section', and inserting in lieu thereof the following: 'together with any allocation (i) to flood control or navigation under subsection (b) of this section, or (ii) to recreational purposes made under the Water Resources Recreation Act of 1960.'

"Project areas within national forests

"SEC. 309. (a) Nothing in this title shall be construed to affect in any way the authority of the Secretary of Agriculture with respect to project areas which are under his jurisdiction.

"(b) The authority conferred on the Secretary of the Army and the Secretary of the Interior by section 306 of this title shall be exercised with respect to national-forest lands only with the concurrence of the Secretary of Agriculture.

"Short title

"SEC. 310. Title III of this Act may be cited as the 'Water Resources Recreation Act of 1960'."

And, on page 64, after line 17, to insert a new title, as follows:

"TITLE IV—ACQUISITION OF REQUIRED LAND

"Declaration of policy

"SEC. 401. It is hereby declared to be the policy of Congress that owners and tenants whose property is acquired for public works projects of the United States of America shall be paid a fair and equitable amount for the property acquired and reimbursed for their actual losses.

"Dissemination of information

"SEC. 402. Within six months after the date that Congress authorizes construction of a water resource development project under the jurisdiction of the Secretary of the Army, the Corps of Engineers shall make reasonable effort to advise owners and occupants in and adjacent to the project area as to the probable timing for the acquisition of lands for the project and for incidental rights-of-way, relocations, and other requirements. Within a reasonable time after initial appropriations are made for land acquisition or construction, including relocations, the Corps of Engineers shall conduct public meetings at locations convenient to owners and tenants to be displaced by the project in order to advise them of the proposed plans for acquisition and to obtain their comments thereon. To carry out the provisions of this section, the Chief of Engineers shall issue regulations to provide, among other things, dissemination of the following information to those affected: (1) basis and procedures for appraisals; (2) basis for offer to purchase property without going to court; (3) legal procedures in condemnation proceedings; (4) entitlement to payments for moving expenses or other losses not covered by appraised market value; (5) occupancy during construction; (6) removal of improvements; (7) payments required by occupants of Government acquired land; (8) deposits as advances to land and property owners; and (9) use of land by owner when easement is acquired. The operation of this section and the functions performed under it shall be exempt from

the operations of the Administrative Procedure Act of June 11, 1946, as amended (60 Stat. 237).

"Commission on compensation in the acquisition of land

"SEC. 403. Because (a) owners and tenants displaced by public works projects of the United States do not always obtain reimbursement for all of their expenses and losses and (b) judicial interpretation of just compensation as guaranteed by the fifth amendment to the Constitution of the United States assures payment of only the market value of the property taken as if willingly sold, there is hereby established a Commission to be known as The Commission To Study the Adequacy of Compensation in Federal Real Property Acquisitions, hereafter referred to as "the Commission", the purpose of which shall be to determine the most effective manner of carrying out the policy set forth in section 401 of this title.

"Interim provision for reimbursement of losses

"SEC. 404. Because (a) many owners and tenants whose land is required for water resource development projects of the Department of the Army are not being reimbursed at the present time in accordance with the policy set forth in section 401 of this title and (b) legislative action on any recommendations made by the Commission established under section 403 could not be completed before June 30, 1963, persons, firms and corporations from whom any interest in real property is acquired between the effective date of this Act and June 30, 1963 for a water resource development project of the Department of the Army shall receive, in addition to but not in duplication of any payments otherwise authorized by law, further payment as will, in the discretion of the Chief of Engineers, compensate such persons, firm or corporation for consequential losses and damages in an amount not to exceed $25,000 up to a maximum of 20 per centum of the appraised value of the interest in the real estate taken by the Government as determined by the Chief of Engineers. The authority conferred by this section shall be delegable by the Chief of Engineers to such responsible officers or employees as he may determine. The operation of this section and the functions performed under it shall be exempt from the operation of the Administrative Procedure Act of June 11, 1946, as amended (60 Stat. 237). To carry out the provisions of this section, the Chief of Engineers shall issue regulations which shall provide, among other things, that the payments authorized by this section shall be offset by any enhancement that the project causes in the market value of remaining property interests held by the applicant and shall be allowable only if the applicant certifies that he did not acquire his interest in the proeprty involved in contemplation of the project or for the purpose of transfer to the Government. For the purpose of this section there shall be a presumption that an interest in property acquired other than through heirship after the date that a project is authorized by Congress was acquired in contemplation of the project.

"Membership and organization of the Commission

SEC. 405. (a) The Commission shall be composed of seventeen members as follows:

"(1) Nine appointed by the President of the United States, of whom six shall be from the executive branch of the Government and three from private life. From among these nine the President shall designate the Chairman and Vice Chairman of the Commission.

"(2) Four appointed by the President of the Senate, at least two of whom shall be members of the United States Senate.

"(3) Four appointed by the Speaker of the House of Representatives, at least two of whom shall be Members of the House of Representatives.

"(b) Any vacancy in the Commission shall not affect its powers, but shall be filled in the same manner in which the original appointment was made.

"(c) Nine members of the Commission shall constitute a quorum, but a lesser number may conduct hearings.

"(d) Service of an individual as a member of the Commission or employment of an individual by the Commission as an attorney or expert in any business or professional field, on a part-time or full-time basis, with or without compensation, shall not be considered as service or employment bringing such individual within the provisions of section 281, 283, 284, 434, or 1914 of title 18 of the United States Code, or section 190 of the Revised Statutes (5 U.S.C. 99).

"Duties of the Commission

"SEC. 406. The Commission shall study and investigate the present methods and procedures by which real property is acquired by the United States, the several States, and by other governmental bodies as deemed necessary in the discretion of the Commission. The Commission shall determine and report on the scope of losses, expenses, and damages incurred by individuals, families, business concerns, and local communities as the result of the acquisition of land for public works projects of the United States of America indicating particularly the scope and extent of losses, expenses, and damages, if any, not compensable under the judicial interpretations of the constitutional guarantee of just compensation.

"Report

"SEC. 407. The Commission, not later than December 31, 1962, shall submit to the President and to Congress a comprehensive report of its activities and the results of its studies. The report shall include recommendations for legislative enactments and administrative actions as in the judgment of the Commission are necessary to carry out the recommendations to fulfill the policy set forth in section 401 of this title.

"Powers of the Commission

"SEC. 408. (a) The Commission or, on the authorization of the Commission, any subcommittee or member thereof may, for the purpose of carrying out the provisions of this title, hold such hearings and sit and act at such times and places, administer such oaths, and require, by subpena or otherwise, the attendance and testimony of such witnesses and the production of such books, records, correspondence, memorandums, papers, and documents, as the Commission or such subcommittee or member may deem advisable. Subpenas may be issued under the signature of the Chairman of the Commission, of such subcommittee, or any duly designated member, and may be served by any person designated by such Chairman or member. The provisions of sections 102 to 104, inclusive, of the Revised Statutes (U.S.C., title 2, secs. 192–194), shall apply in the case of any failure of any witness to comply with any subpena or to testify when summoned under authority of this section.

"(b) The Commission is authorized to obtain from any department, agency, or independent instrumentality of the executive branch of the Government any information it deems necessary to carry out its functions under this title, other than information relative to pending or prospective acquisitions; and each such department, agency, and instrumentality is authorized to furnish such information to the Commission, upon request made by the Chairman or by the Vice Chairman when acting as Chairman.

"Appropriations, expenses, and personnel

"SEC. 409. (a) There are hereby authorized to be appropriated to the Commission such amounts as may be necessary to carry out the provisions of this title.

"(b) Each member of the Commission shall receive $50 a day when engaged in the performance of duties vested in the Commission, except that no compensation shall be paid by the United States, by reason of service as a member, to any member who is receiving other compensation from the Federal Government, or to any member who is receiving compensation from any State or local government.

"(c) Each member of the Commission shall be reimbursed for travel, subsistence, and other necessary expenses incurred by him in the performance of duties vested in the Commission.

"(d) The Commission is authorized, without regard to the civil service laws and regulations, and without regard to the Classification Act of 1949, as amended, to appoint and fix the compensation of a Director and such additional personnel as may be necessary to enable it to carry out its functions, except that any Federal employees subject to the civil service laws and regulations who may be assigned to the Commission shall retain civil service status without interruption or loss of status or privilege.

"Termination of the Commission

"SEC. 410. The Commission shall cease to exist six months after the transmittal to the President and the Congress of the final report provided for in Section 407 of this title.

"SEC. 411. Title IV of this Act may be cited as the 'Land Acquisition Policy Act of 1960'."

Mr. KERR. Mr. President, I should like to include in the previous request additional committee amendments, principally technical and clarifying amendments.

The PRESIDING OFFICER. Without objection, it is so ordered.

The additional amendments agreed to are as follows:

Page 3 of the House bill, strike out lines 7 and 8, and insert the stricken language following line 20.

Page 3, lines 3 and 4 of the bill as reported, strike out "Board of Engineers for Rivers and Harbors, dated March 30, 1960," and insert in lieu thereof "Report of the Chief of Engineers, dated June 1, 1960,"

Page 5, lines 13 and 14, strike out "Report of the Board of Engineers for Rivers and Harbors, dated March 31, 1960," and insert in lieu thereof "Report of the Chief of Engineers dated June 1, 1960,"

Page 5, lines 16, 17, and 18, strike out "Report of the Board of Engineers for Rivers and Harbors, dated May 6, 1960," and insert in lieu thereof "Report of the Chief of Engineers, dated June 1, 1960,"

Page 6, lines 1 and 2, strike out "Report of the Board of Engineers for Rivers and Harbors, dated May 6, 1960," and insert in lieu thereof "Report of the Chief of Engineers, dated June 1, 1960,"

Page 6, lines 5 and 6, strike out "Report of the Board of Engineers for Rivers and Harbors, dated February 18, 1960," and insert in lieu thereof "Report of the Chief of Engineers, dated June 1, 1960,"

Page 22, following line 16, insert the following: "Coasts of the Hawaiian Islands; investigation of sites for possible use as anchorage areas for handling of explosives.

Areas of investigation to be designated by the Governor's Advisory Committee on Explosives."

Page 35, line 16, strike out "his report dated June 1, 1960," and insert in lieu thereof "House Document Numbered 417, Eighty-sixth Congress,"

Page 38, lines 6, 7, and 8, strike out "Board of Engineers for Rivers and Harbors in its report, dated February 16, 1960," and insert in lieu thereof "Chief of Engineers in his report dated June 1, 1960,"

Page 41, line 10, strike out "Senate Document Numbered ——," and insert in lieu thereof "House Document Numbered 413,"

Page 41, lines 15 and 16, strike out "Board of Engineers for Rivers and Harbors in its report dated February 16, 1960," and insert in lieu thereof "Chief of Engineers in his report dated June 13, 1960,"

Page 57, following line 12, insert the following:

"Indian River and other streams draining into Indian Lake and Lake Michigan in the vicinity of Manistique, Michigan."

Page 57, following line 22, insert the following:

"Kahoma Stream, Island of Maui, Hawaii."

Page 61, line 11, strike out "(a)".

Page 62, line 1, strike out "allocated" and insert in lieu thereof "assigned".

Mr. KERR. Mr. President, I ask unanimous consent that certain amendments which I send to the desk be printed on page 41, following line 11, as a part of the committee amendments.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendments are as follows:

On page 41, line 11, after the figures "$21,900,000", to insert a semicolon and *"Provided,* That construction of the project shall not be commenced until the agency designated to market the power has entered into an agreement which would insure that the power would be sold at rates sufficient to repay with interest within fifty years all costs allocated to power."

On page 41, at the beginning of line 15, to strike out "Board of Engineers for Rivers and Harbors in its report dated February 16, 1960," and insert in lieu thereof "Chief of Engineers in his report dated June 13, 1960,".

Mr. CASE of South Dakota. Mr. President, before the Senator yields the floor, I wonder if we might not ask to have the text of the bill inserted in the RECORD. I do not expect to make a long speech about the bill; however, it seems to me that, since it is one bill which speaks for itself, it would be helpful, for reference, if the entire text of the bill, together with committee amendments, were printed in the RECORD.

Mr. KERR. Mr. President, I make that request.

The PRESIDING OFFICER. Without objection, it is so ordered.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE I—RIVERS AND HARBORS

SEC. 101. That the following works of improvement of rivers and harbors and other waterways for navigation, flood control, and other purposes are hereby adopted and authorized to be prosecuted under the direction of the Secretary of the Army and supervision of the Chief of Engineers, in accordance with the plans and subject to the conditions recommended by the Chief of Engineers in the respective reports hereinafter designated: *Provided,* That the provisions of section 1 of the River and Harbor Act approved March 2, 1945 (Public Law Numbered 14, Seventy-ninth Congress, first session), shall govern with respect to projects authorized in this title; and the procedures therein set forth with respect to plans, proposals, or reports for works of improvement for navigation or flood control and for irrigation and purposes incidental thereto, shall apply as if herein set forth in full:

Navigation

Eastport Harbor Maine: Senate Document Numbered 98, Eighty-sixth Congress, at an estimated cost of $595,000;

Southwest Harbor, Maine: House Document Numbered 408, Eighty-fifth Congress, at an estimated cost of $240,000;

Stonington Harbor, Maine: House Document Numbered 36, Eighty-sixth Congress, at an estimated cost of $198,000;

South Bristol Harbor, Maine: Senate Document Numbered 30, Eighty-sixth Congress, at an estimated cost of $97,000;

Wells Harbor, Maine: House Document Numbered 202, Eighty-sixth Congress, at an estimated cost of $340,000;

York Harbor, Maine: House Document Numbered 395, Eighty-sixth Congress, at an estimated cost of $391,000;

Pepperell Cove, Maine: House Document Numbered 284, Eighty-sixth Congress, at an estimated cost of $170,000;

Rye Harbor, New Hampshire: Report of the Board of Engineers for Rivers and Harbors, dated March 30, 1960, at an estimated cost of $238,000;

Cotuit Harbor, Massachusetts: House Document Numbered 142, Eighty-sixth Congress, at an estimated cost of $320,000;

Apponaug Cove, Rhode Island: House Document Numbered 143, Eighty-sixth Congress, at an estimated cost of $180,000;

Little Narragansett Bay and Watch Hill Cove, Rhode Island and Connecticut: House Document Numbered 396, Eighty-sixth Congress, at an estimated cost of $98,000;

Moriches and Shinecock Inlets, New York: House Document Numbered 126, Eighty-sixth Congress, at an estimated cost of $6,858,000;

Mamaroneck Harbor (East Basin), New York: House Document Numbered 209, Eighty-sixth Congress, at an estimated cost of $105,000;

Wilmington Harbor, Delaware: Senate Document Numbered 88, Eighty-sixth Congress, at an estimated cost of $351,000;

Ocracoke Inlet, North Carolina: House Document Numbered 408, Eighty-sixth Congress, at an estimated cost of $4,623,000;

Shem Creek, Charleston Harbor, South Carolina: House Document Numbered 35, Eighty-sixth Congress, maintenance;

Everglades Harbor, Florida: House Document Numbered 147, Eighty-sixth Congress, at an estimated cost of $117,200;

Gulf Coast Shrimp Boat Harbors, Florida: House Document Numbered 183, Eighty-sixth Congress, at an estimated cost of $373,000;

Bakers Haulover Inlet, Florida: House Document Numbered 189, Eighty-sixth Congress, at an estimated cost of $239,000;

Palm Beach Harbor, Lake Worth Inlet, Florida: House Document Numbered 283, Eighty-sixth Congress, at an estimated cost of $4,980,000;

Miami Harbor, Florida: Senate Document Numbered 71, Eighty-fifth Congress, at an estimated cost of $3,818,000;

Little Pass, Clearwater Bay, Florida: House Document Numbered 293, Eighty-sixth Congress, at an estimated cost of $104,000;

St. Marks River, Florida: House Document Numbered 224, Eighty-sixth Congress, at an estimated cost of $1,711,000;

Pascagoula Harbor, Mississippi: House Document Numbered 98, Eighty-sixth Congress, maintenance;

Biloxi Harbor, Mississippi: House Document Numbered 271, Eighty-sixth Congress, at an estimated cost of $326,000;

Bayou Lafourche and Lafourche-Jump Waterway, Louisiana: House Document Numbered 112, Eighty-sixth Congress, at an estimated cost of $4,664,000;

Bayous Petit Anse, Tigre, and Carlin, Louisiana: Senate Document Numbered 70, Eighty-fifth Congress, at an estimated cost of $106,000;

Freshwater Bayou, Louisiana: Report of the Board of Engineers for Rivers and Harbors, dated March 31, 1960, at an estimated cost of $7,485,000;

Calcasieu River and Pass, Louisiana: Report of the Board of Engineers for Rivers and Harbors, dated May 6, 1960, at an estimated cost of $16,992,000;

Texas City Channel, Texas: Report of the Chief of Engineers, dated May 27, 1960, at an estimated cost of $1,605,000;

Brazos Island Harbor, Texas: Report of the Board of Engineers for Rivers and Harbors, dated May 6, 1960, at an estimated cost of $4,381,000;

Ouachita and Black Rivers, Arkansas and Louisiana: Report of the Board of Engineers for Rivers and Harbors, dated February 18, 1960, in lieu of the navigation project authorized by the River and Harbor Act of 1950, Public Law 516, Eighty-first Congress, Senate Document Numbered 117, Eighty-first Congress, at an estimated cost of $43,550,000;

In addition to previous authorizations, there is hereby authorized the completion of the Barkley Dam project in Kentucky, authorized by the River and Harbor Act of 1954, at an estimated additional cost of $146,000,000; : *Provided* That the Chief of Engineers is hereby authorized to relocate the Illinois Central Railroad, as required by the construction of said project, in such manner as to eliminate and prevent interference with and disturbance of municipal and private facilities in Lyon County, Kentucky, not otherwise affected by the construction of the project, substantially in accordance with alinement "D" shown on the plans on file in the Office of the Chief of Engineers;

Illinois Waterway, Illinois and Indiana: House Document Numbered 31, Eighty-sixth Congress, at an estimated cost of $114,652,000;

Mississippi River between Missouri River and Minneapolis, Minnesota at Dubuque, Iowa: House Document Numbered 56, Eighty-sixth Congress, at an estimated cost of $38,000;

Red Wing Harbor, Minnesota: House Document Numbered 32, Eighty-sixth Congress, at an estimated cost of $170,400;

Menominee Harbor and River, Michigan and Wisconsin: House Document Numbered 113, Eighty-sixth Congress, at an estimated cost of $715,000;

Milwaukee Harbor, Wisconsin: House Document Numbered 285, Eighty-sixth Congress, at an estimated cost of $38,000;

Kewaunee Harbor, Wisconsin: Senate Document Numbered 19, Eighty-sixth Congress, at an estimated cost of $81,900;

Two Harbors, Minnesota: House Document Numbered 146, Eighty-sixth Congress, at an estimated cost of $162,000;

Duluth-Superior Harbor, Minnesota and Wisconsin: House Document Numbered 150, Eighty-sixth Congress, at an estimated cost of $2,364,000.

Duluth-Superior Harbor, Minnesota and Wisconsin: House Document Numbered 196, Eighty-sixth Congress, at an estimated cost of $2,513,000;

Ashland Harbor, Wisconsin: House Document Numbered 165, Eighty-sixth Congress, at an estimated cost of $1,495,000;

Presque Isle Harbor, Michigan: House Document Numbered 145, Eighty-sixth Congress, at an estimated cost of $215,300;

Marquette Harbor, Michigan: House Document Numbered 154, Eighty-sixth Congress, at an estimated cost of $236,000;

Manistee Harbor, Michigan: House Document Numbered 358, Eighty-sixth Congress, at an estimated cost of $1,735,000;

Detroit River, Trenton Channel, Michigan: House Document Numbered 319, Eighty-sixth Congress, at an estimated cost of $8,570,000;

Calumet Harbor, Illinois and Indiana: House Document Numbered 149, Eighty-sixth Congress, at an estimated cost of $5,240,000;

Indiana Harbor, Indiana: House Document Numbered 195, Eighty-sixth Congress, at an estimated cost of $974,000;

Toledo Harbor, Ohio: House Document Numbered 153, Eighty-sixth Congress, at an estimated cost of $14,684,000;

Sandusky Harbor, Ohio: House Document Numbered 144, Eighty-sixth Congress, at an estimated cost of $5,800,000;

Cleveland Harbor, Ohio: House Document Numbered 152, Eighty-sixth Congress, at an estimated cost of $2,486,000;

Lorain Harbor, Ohio: House Document Numbered 166, Eighty-sixth Congress, at an estimated cost of $19,323,000;

Fairport Harbor, Ohio: House Document Numbered 347, Eighty-sixth Congress, at an estimated cost of $2,768,000;

Ashtabula Harbor, Ohio: House Document Numbered 148, Eighty-sixth Congress, at an estimated cost of $4,077,000;

Erie Harbor, Pennsylvania: House Document Numbered 199, Eighty-sixth Congress, at an estimated cost of $1,729,000;

Buffalo Harbor, New York: House Document Numbered 151, Eighty-sixth Congress, at an estimated cost of $2,352,000;

Rochester Harbor, New York: House Document Numbered 409, Eighty-sixth Congress, at an estimated cost of $2,445,000;

Los Angeles and Long Beach Harbors (West Basin), California: House Document Numbered 401, Eighty-sixth Congress, at an estimated cost of $1,768,000;

Monterey Harbor (Monterey Bay), California: House Document Numbered 219, Eighty-sixth Congress, at an estimated cost of $3,989,000:

Noyo River and Harbor, California: House Document Numbered 289, Eighty-sixth Congress, at an estimated cost of $370,000;

Snohomish River (Everett Harbor), Washington: House Document Numbered 348, Eighty-sixth Congress, at an estimated cost of $3,011,000;

Kahului Harbor, Island of Maui, Hawaii: House Document Numbered 109, Eighty-sixth Congress, at an estimated cost of $944,500;

Hilo Harbor, Hawaii: Emergency construction of a seawall to protect against tidal waves and excessive high tides, in accordance with plans on file in the office of the Chief of Engineers, at an estimated cost of $7,000,000.

Beach erosion control

Wessagussett Beach, Weymouth, Massachusetts: House Document Numbered 334, Eighty-sixth Congress, at an estimated cost of $132,000;

Pemberton Point to Cape Cod Canal, Massachusetts: House Document Numbered 272, Eighty-sixth Congress, at an estimated cost of $139,300;

Cape Cod Canal to Provincetown, Massachusetts: House Document Numbered 404, Eighty-sixth Congress, at an estimated cost of $178,000;

South Kingstown and Westerly, Rhode Island: House Document Numbered 30, Eighty-sixth Congress, at an estimated cost of $140,300;

Atlantic Coast of Long Island, Fire Island Inlet to Montauk Point, New York: Report of the Chief of Engineers, dated May 27, 1960, at an estimated cost of $19,400,000;

New Jersey Coast from Barnegat Inlet to Cape May Canal, New Jersey: House Document Numbered 208, Eighty-sixth Congress, at an estimated cost of $1,714,000;

Key West, Florida: House Document Numbered 413, Eighty-fifth Congress, at an estimated cost of $231,200.

Presque Isle Peninsula, Erie, Pennsylvania: House Document Numbered 397, Eighty-sixth Congress, periodic nourishment;

Orange County, Newport Bay to San Mateo Creek, California: House Document Numbered 398, Eighty-sixth Congress, at an estimated cost of $256,000.

SEC. 102. That the Secretary of the Army is hereby authorized to reimburse local interests for such work done by them, on the beach erosion projects authorized in section 101, subsequent to the initiation of the cooperative studies which form the basis for the projects: *Provided*, That the work which may have been done on these projects is approved by the Chief of Engineers as being in accordance with the projects hereby adopted: *Provided further*, That such reimbursement shall be subject to appropriations applicable thereto or funds available therefor and shall not take precedence over other pending projects of higher priority for improvements.

SEC. 103. That the last paragraph of section 2 of the River and Harbor Act of July 3, 1930 (46 Stat. 933 at 945) pertaining to cooperative shore erosion studies and to the Beach Erosion Board, is hereby amended to read as follows:

"The Chief of Engineers of the United States Army, under the direction of the Secretary of the Army, is authorized and directed to cause investigations and studies to be made in cooperation with the appropriate agencies of the various States on the Atlantic, Pacific, and Gulf coasts and on the Great Lakes, and of the States of Alaska and Hawaii, the Commonwealth of Puerto Rico, and the possessions of the United States, with a view to devising effective means of preventing erosion of the shores of coastal and lake waters by waves and currents; and any expenses incident and necessary thereto may be paid from funds appropriated for General Investigations, Civil Functions, Department of the Army: *Provided*, That the Department of the Army may release to the appropriate cooperating agencies information obtained by these investigations and studies prior to the formal transmission of reports to Congress: *Provided further*, That no money shall be expended under authority of this section in any State which does not provide for cooperation with the agents of the United States and contribute to the project such funds or services as the Secretary of the Army may deem appropriate and require; that there shall be organized under the Chief of Engineers, United States Army, a Board of seven members, of whom four shall be officers of the Corps of Engineers and three shall be civilian engineers selected by the Chief of Engineers with regard to their special fitness in the field of beach erosion and shore protection, preferably from among the State agencies cooperating with the Department of the Army. The Board will furnish such technical assistance as may be directed by the Chief of Engineers in the conduct of such studies as may be undertaken and will review the reports of the investigations made. In the consideration of such studies as may be referred to the Board by the Chief of Engineers, the Board shall, when it considers it necessary and with the sanction of the Chief of Engineers, make, as a board or through its members personal examination of localities under investigation: *Provided further*, That the civilian members of the Board may be paid at rates not to exceed $100 a day for each day of attendance at Board meetings, not to exceed thirty days per annum, in addition to the traveling and other necessary expenses connected with their duties on the Board in accordance with the provisions of section 5 of the Administrative Expenses Act of 1946, as amended (5 U.S.C. 73b–2)."

SEC. 104 (a) That the Secretary of the Army is authorized and directed to donate and convey by quitclaim deed to the Ship Canal Authority of the State of Florida all of the right, title, and interest of the United States of America in and to—

(1) lands in Putnam County, Florida, acquired by the United States of America by condemnation proceedings in the United States District Court for the Southern District of Florida, Jacksonville Division, as case numbered 356 U.S.J. Civil; and (2) lands in Marion County, Florida, acquired by the United States of America by condemnation proceedings instituted in the United States Court for the Southern District of Florida, Ocala Division, as cases numbered 9, 10, 11, 12, 13, 14, 15, 16, and 22, U.S. Ocala Civil.

(b) It is intended hereby to authorize and direct the conveyance of all lands heretofore acquired by the United States with funds provided by the said authority for rights-of-way for a proposed ship canal across Florida.

(c) The conveyance authorized by this section shall be made without monetary consideration therefor but upon the conditions that the Ship Canal Authority of the State of Florida will, without cost to the United States: (1) when called upon by the Chief of Engineers, United States Army, to do so, reconvey to the United States, free of any encumbrances placed thereon during ownership by said authority, those lands conveyed pursuant to this section that are required for the Cross Florida Barge Canal; (2) relocate any roads, bridges, or utility lines constructed on or across such lands after the conveyance under this section by the United States, if the relocation thereof is required by the Chief of Engineers; (3) maintain and preserve improvements previously constructed upon the land by the Federal Government in a manner that will not increase the cost of the barge canal project; (4) hold the United States safe and free from any damages resulting from the aforementioned construction; and (5) devote the proceeds from sales of any lands conveyed to it under this section solely for the acquisition, for transfer to the United States free of cost, of any other lands required for the barge canal project.

(d) Nothing in this section shall be construed as a limitation on the right of the Ship Canal Authority of the State of Florida to sell any of the lands that, in the opinion of the United States Army district engineer at Jacksonville, Florida, will not be required for the Cross Florida Barge Canal. Any surveys or descriptions required to permit the disposal of any such lands shall be paid for by the Ship Canal Authority of the State of Florida if desired by said authority prior to the appropriation of funds therefor by the Federal Government.

(e) Nothing in this section shall be construed as a waiver of the obligation of the Ship Canal Authority of the State of Florida to (1) furnish without cost to the United States, all lands, easements, and rights-of-way necessary for the construction of the Cross-Florida Barge Canal as authorized by the Act of July 23, 1942 (56 Stat. 703); (2) hold and save the United States free from any damages resulting from the construction of said barge canal; and (3) to take over, maintain and operate all highways, bridges, and roadways built in connection with the said barge canal project.

SEC. 105. That the project for improvement of the Missouri River between Sioux City, Iowa, and the mouth, authorized by the River and Harbor Act aproved March

2, 1945, is hereby modified to provide for a lake in the abandoned river channel of the Missouri River between river miles 710 and 715 for recreational purposes, by means of: (a) Construction of a levee extending along the left bank of the new channel to be constructed in the Middle Decatur Bend area of the Missouri River; and (b) construction of hydraulic-fill closures at both ends of the old channel, substantially in accordance with plans to be prepared by the Chief of Engineers, at an estimated Federal cost of $155,000: *Provided,* That responsible local interests furnish assurances satisfactory to the Secretary of the Army that they will (a) hold and save the United States free from damages; and (b) maintain and operate the project modification after completion in accordance with regulations to be prescribed by the Secretary of the Army.

SEC. 106. The Corps of Engineers is authorized and directed to accept as a project feature the cost of necessary improvement of that section of West Virginia State Secondary Route 40/5 approximately eighty-five one-hundredths mile in length, from its junction with State Route 40 to its terminus near the Hildebrand lock and dam site on the Monongahela River in order to provide access thereto. This authority is provided with the understanding that this method will provide necessary access to the project at the least expenditure of Federal funds, and further that the State of West Virginia will accept as its responsibility the future maintenance of the road.

SEC. 107. (a) That the Secretary of the Army is hereby authorized to allot from any appropriations heretofore or hereafter made for rivers and harbors not to exceed $2,000,000 for any one fiscal year for the construction of small river and harbor improvement projects not specifically authorized by Congress which will result in substantial benefits to navigation and which can be operated consistently with appropriate and economic use of the waters of the Nation for other purposes, when in the opinion of the Chief of Engineers such work is advisable, if benefits are in excess of the cost.

(b) Not more than $200,000 shall be allotted for the construction of a project under this section at any single locality and the amount allotted shall be sufficient to complete the Federal participation in the project under this section.

(c) Local interests shall provide without cost to the United States all necessary lands, easements, and rights-of-way for all projects to be constructed under the authority of this section. In addition, local interests may be required to hold and save the United States free from damages that may result from the construction and maintenance of the project and may be required to provide such additional local cooperation as the Chief of Engineers deems appropriate. A State, county, municipality, or other responsible local entity shall give assurance satisfactory to the Chief of Engineers that such conditions of cooperation as are required will be accomplished.

(d) Non-Federal interests may be required to share in the cost of the project to the extent that the Chief of Engineers deems that such cost should not be borne by the Federal Government in view of the recreational or otherwise special or local nature of the project benefits.

(e) Each project for which money is allotted under this section shall be complete in itself and not commit the United States to any additional improvement to insure its successful operation, other than routine maintenance, and except as may result from the normal procedure applying to projects authorized after submission of survey reports, and projects constructed under the authority of this section shall be considered as authorized projects.

(f) This section shall apply to, but not be limited to, the provision of low water access navigation channels from the existing channel of the Mississippi River to established harbor areas located along the Mississippi River.

SEC. 108 (a) That whenever the Secretary of the Army, upon the recommendation of the Chief of Engineers, determines that notwithstanding the provisions of the Federal Property and Administrative Services Act of 1949 (63 Stat. 377), as amended, with respect to disposal of surplus real property, (1) the development of public port or industrial facilities on land which is part of a water resource development project under his jurisdiction will be in the public interest; (2) that such development will not interfere with the operation and maintenance of the project; and (3) that disposition of the property for these purposes under this section will serve the objectives of the project within which the land is located, he may convey the land by quitclaim deed to a State, political subdivision thereof, port district, port authority, or other body created by the State or through a compact between two or more States for the purpose of developing or encouraging the development of such facilities. In any case, where two or more political subdivisions thereof, or bodies created by, a State or group of States, seek to obtain the same land, the Secretary of the Army shall give preference to that political subdivision or body whose intended use of land will, in his opinion, best promote the purposes for which the project involved was authorized.

(b) Any conveyance authorized by this section shall be made at the fair market value of the land, as determined by the Secretary of the Army, upon condition that the property shall be used for one of the purposes stated in the subsection (a) of this section only, and subject to such other conditions, reservations or restrictions as the Secretary may determine to be necessary for the development, maintenance, or operation of the project or otherwise in the public interest.

(c) Prior to the conveyance of any land under the provisions of this section, the Secretary of the Army shall, in the manner he deems reasonable, give public notice of the proposed conveyance and afford an opportunity to interested eligible bodies in the general vicinity of the land to apply for its purchase.

(d) The Secretary of the Army may delegate any authority conferred upon him by this section to any officer or employee of the Department of the Army. Any such officer or employee shall exercise the authority so delegated under rules and regulations approved by the Secretary.

(e) The proceeds from any conveyance made under the provisions of this section shall be covered into the Treasury as miscellaneous receipts.

SEC. 109. The Secretary of the Army is hereby authorized and directed to cause surveys to be made at the following named localities and subject to all applicable provisions of section 10 of the River and Harbor Act of 1950:

Prospect Harbor, Maine.

Calf Island, between Roque Island Bluffs and Seawall Point, Maine.

Green Harbor, Marshfield, Massachusetts.

Nauset Harbor, Massachusetts.

Eel Pond, Menauhant, Massachusetts.

Pleasant Bay, Massachusetts.

Rye Harbor (Playland Marina), New York.

Sturgeon Creek, Middlesex County, Virginia.

Bersford Creek, South Carolina.

Channel across Santa Rosa Peninsula and Santa Rosa Island, Florida, to connect East Bay with Santa Rosa Sound and Little Sabine Bay with the Gulf of Mexico.

Channel from vicinity of Avalon, Florida, to the waters of Escambia Bay.

Lake Pontchartrain, Louisiana.

Washburn Harbor, Wisconsin.

Little Bay De Noc, Michigan.

Ship Canal between Tacoma and Seattle, Washington.

Point Roberts, Washington.

Deep-water harbor in the Maalaea Bay Area, Island of Maui, Hawaii.

Deep-water harbor at Kahaluu, Island of Oahu, Hawaii.

SEC. 110. Title I of this Act may be cited as the "River and Harbor Act of 1960".

TITLE II—FLOOD CONTROL

SEC. 201. That section 3 of the Act approved June 22, 1936 (Public Law Numbered 738, Seventy-fourth Congress), as amended by section 2 of the Act approved June 28, 1938 (Public Law Numbered 761, Seventy-fifth Congress), shall apply to all works authorized in this title except that for any channel improvement or channel rectification project, provisions (a), (b), and (c) of section 3 of said Act of June 22, 1936, shall apply thereto, and except as otherwise provided by law: *Provided,* That the authorization for any flood-control project herein adopted requiring local cooperation shall expire five years from the date on which local interests are notified in writing by the Department of the Army of the requirements of local cooperation, unless said interests shall within said time furnish assurances satisfactory to the Secretary of the Army that the required cooperation will be furnished.

SEC. 202. The provisions of section 1 of the Act of December 22, 1944 (Public Law Numbered 534, Seventy-eighth Congress, second session), shall govern with respect to projects authorized in this Act, and the procedures therein set forth with respect to plans, proposals, or reports for works of improvement for navigation or flood control and for irrigation and purposes incidental thereto shall apply as if herein set forth in full.

SEC. 203. The following works of improvement for the benefit of navigation and the control of destructive floodwaters and other purposes are hereby adopted and authorized to be prosecuted under the direction of the Secretary of the Army and the supervision of the Chief of Engineers in accordance with the plans in the respective reports hereinafter designated and subject to the conditions set forth therein: *Provided,* That the necessary plans, specifications, and preliminary work may be prosecuted on any project authorized in this title with funds from appropriations heretofore or hereafter made for flood control so as to be ready for rapid inauguration of a construction program: *Provided further,* That the projects authorized herein shall be initiated as expeditiously and prosecuted as vigorously as may be consistent with budgetary requirements: *And provided further,* That penstocks and other similar facilities adapted to possible future use in the development of hydroelectric power shall be installed in any dam authorized in this Act for construction by the Department of the Army when approved by the Secretary of the Army on the recommendation of the Chief of Engineers and the Federal Power Commission.

Blackstone River Basin

The project for flood protection on Blackstone, Mill, and Peters Rivers, in Woonsocket, Rhode Island, is hereby authorized substantially in accordance with the recommendations of the Chief of Engineers in Senate Document Numbered 87, Eighty-fifth Congress, at an estimated cost of $2,970,000.

Thames River Basin

The project for the West Thompson Reservoir on the Quinebaug River, Connecticut,

is hereby authorized substantially as recommended by the Chief of Engineers in Senate Document Numbered 41, Eighty-sixth Congress, at an estimated cost of $4,010,000.

Connecticut River Basin

The plan for flood protection on the Chicopee River, Massachusetts, is hereby authorized substantially in accordance with the recommendations of the Chief of Engineers in his report dated June 1, 1960, at an estimated cost of $5,180,000.

The project for flood protection on the Westfield River, Massachusetts, is hereby authorized substantially in accordance with the recommendations of the Chief of Engineers in his report dated June 1, 1960, at an estimated cost of $3,240,000.

The plan for flood control and related purposes on the Farmington River, Connecticut and Massachusetts, is hereby authorized substantially in accordance with the recommendations of the Board of Engineers for Rivers and Harbors in its report dated March 29, 1960, at an estimated cost of $12,052,000.

Pawcatuck, Connecticut

The project for hurricane-flood protection at Pawcatuck, Connecticut, is hereby authorized substantially in accordance with the recommendations of the Chief of Engineers in House Document Numbered 212, Eighty-sixth Congress, at an estimated Federal cost of $409,000.

Housatonic River Basin

The project for flood control dams and reservoirs on the Naugatuck River, Connecticut, is hereby authorized substantially in accordance with the recomendations of the Chief of Engineers in House Document Numbered 372, Eighty-sixth Congress, at an estimated cost of $10,230,000.

Stamford, Connecticut

The project for hurricane-flood protection at Stamford, Connecticut, is hereby authorized substantially in accordance with the recommendations of the Chief of Engineers in House Document Numbered 210, Eighty-sixth Congress, at an estimated Federal cost of $3,030,000 for construction, and at an estimated Federal cost of maintenance and operation of $31,000 annually.

Central and southern Florida

In addition to previous authorizations, there is hereby authorized to be appropriated the sum of $23,000,000 for the prosecution of the central and southern Florida comprehensive plan for flood control and other purposes approved in the Flood Control Act of 1948, and subsequent Acts of Congress, and such comprehensive plan is hereby modified to include the following:

The project for canals, levees, and water control and drainage structures in the Nicodemus Slough area, Glades County, Florida, is hereby authorized substantially in accordance with the recommendations of the Chief of Engineers contained in Senate Document Numbered 53, Eighty-sixth Congress, at an estimated cost of $318,000.

That the levees around Lake Okeechobee, Florida, authorized by the Rivers and Harbors Act approved July 3, 1930, and modified by the Flood Control Act approved June 30, 1948, and subsequent Acts, shall be known and designated as the Herbert Hoover Dike, and any law, regulation, document, or record of the United States in which such levees are referred to under any other name or designation shall be held to refer to such levees as the Herbert Hoover Dike.

Pearl River, Mississippi

The project for flood protection on the Pearl River at Jackson, Mississippi, is hereby authorized substantially in accordance with the recommendations of the Board of Engineers for Rivers and Harbors in its report dated May 6, 1960, at an estimated cost of $3,609,000.

LOWER MISSISSIPPI RIVER

The project for flood control and improvement of the lower Mississippi River, adopted by the Act of May 15, 1928 (45 Stat. 534), as amended and modified, is hereby further modified and expanded to include the following items of work and the authorization for said project is increased accordingly:

(a) In addition to previous authorizations, there is hereby authorized to be appropriated the sum of $50,000,000 to provide for the continued prosecution of the channel improvement feature of the project.

(b) Natchez Harbor, Mississippi: In accordance with the recommendations of the Division Engineer in Senate Document Numbered 16, Eighty-sixth Congress, at an estimated cost of $350,000.

Trinity River Basin

The comprehensive plan for improvement of the Trinity River and tributaries, Texas, as authorized by the River and Harbor Act of 1945, is hereby modified to include the following projects:

(a) The project for flood protection on Big Fossil Creek in the Richland Hills area, Texas, is hereby authorized substantially in accordance with the recommendations of the Chief of Engineers in House Document Numbered 407, Eighty-sixth Congress, at an estimated cost of $1,861,400.

(b) Modification and extension of the Fort Worth Floodway on the West Fork of the Trinity River and tributaries, at Fort Worth, Texas, is hereby authorized substantially in accordance with the recommendations of the Chief of Engineers in House Document Numbered 402, Eighty-sixth Congress, at an estimated cost of $2,241,000.

Guadalupe River Basin

The project for flood control on Blieders Creek, Texas, is hereby authorized substantially in accordance with the recommendations of the Chief of Engineers in House Document Numbered 180, Eighty-sixth Congress at an estimated cost of $1,060,000.

Brazos River Basin, Texas

In addition to previous authorizations, there is hereby authorized to be appropriated the sum of $21,000,000, for the prosecution of the comprehensive plan for the Brazos River Basin authorized by the Flood Control Act of September 3, 1954.

Red-Ouachita River Basin

The general plan for flood control and other purposes on Red River, Texas, Oklahoma, Arkansas, and Louisiana, below Denison Dam, Texas and Oklahoma, as authorized by the Flood Control Act of 1946, and amended and supplemented by subsequent Acts of Congress, is hereby further modified to provide for additional improvements for flood control, drainage, and other purposes, substantially in accordance with the recommendations of the Chief of Engineers as follows:

(a) McKinney Bayou, Arkansas and Texas: House Document Numbered 220, Eighty-sixth Congress, at an estimated cost of $346,400.

(b) Maniece Bayou, Arkansas: House Document Numbered 288, Eighty-sixth Congress, at an estimated cost of $668,400.

(c) East Point, Louisiana: House Document Numbered 406, Eighty-sixth Congress, at an estimated cost of $273,000.

(d) Garland City, Arkansas, Emergency Bank Protection: In accordance with plans on file in the Office of Engineers, at an estimated cost of $1,750,000.

White River Basin

In addition to previous authorizations, there is hereby authorized to be appropriated the sum of $50,000,000, for the prosecution of the comprehensive plan for the White River Basin authorized by the Flood Control Act of June 28, 1938, as amended and supplemented by subsequent Acts of Congress.

Modification of the existing flood protection project for Village Creek, White River, and Mayberry Levee Districts, White River, Arkansas, is hereby authorized substantially in accordance with plan III, as contained in House Document Numbered 225, Eighty-sixth Congress, at an estimated cost of $1,322,000.

Arkansas River Basin

The general comprehensive plan for flood control and other purposes for the Arkansas River Basin, approved by the Act of June 28, 1938, as amended, and the multiple-purpose plan for the Arkansas River and tributaries, Arkansas and Oklahoma, approved by the River and Harbor Act of July 24, 1946, as amended, are hereby further amended to provide for the incorporation of the two plans into a single plan of development: *Provided,* That authorizations heretofore, herein and hereafter made available for the Arkansas River Basin shall be applicable to the combined plan of development.

There is hereby authorized to be appropriated the sum of $179,000,000 for prosecution of the combined plan of development for the Arkansas River Basin as herein authorized.

Rio Grande Basin

The project for improvement of the Rio Grande Basin, is hereby authorized substantially as recommended by the Chief of Engineers in Senate Document Numbered 94, Eighty-sixth Congress, at an estimated cost of $58,300,000.

The approval granted above shall be subject to the following conditions and limitations:

Cochiti Reservoir, Galisteo Reservoir, and all other reservoirs constructed by the Corps of Engineers as a part of the Middle Rio Grande project will be operated solely for flood control and sediment control, as described below:

(a) The outflow from Cochiti Reservoir during each spring flood and thereafter will be at the maximum rate of flow that can be carried at the time in the channel of Rio Grande through the middle valley without causing flooding of areas protected by levees or unreasonable damage to channel protective works: *Provided,* That whenever during the months of July, August, September, and October, there is more than two hundred twelve thousand acre-feet of storage available for regulation of summer floods and the inflow to Cochiti Reservoir (exclusive of that portion of the inflow derived from upstream flood-control storage) is less than one thousand five hundred cubic feet per second, no water will be withdrawn from storage in Cochiti Reservoir and the inflow derived from upstream flood-control storage will be retained in Cochiti Reservoir.

(b) Releases of water from Gallisteo Reservoir and Jemez Canyon Reservoir during the months of July, August, September, and October, will be limited to the amounts necessary to provide adequate capacity for control of subsequent summer floods; and such releases when made in these months, or thereafter, will be at the maximum rate practicable under the conditions at the time.

(c) Subject to the foregoing, the storage of water in and the release of water from all reservoirs constructed by the Corps of Engineers as part of the Middle Rio Grande project will be done as the interests of flood and sediment control may dictate: *Provided,* That the Corps of Engineers will endeavor to avoid encroachment on the upper two hundred and twelve thousand acre-feet of ca-

pacity in Cochiti Reservoir, and all reservoirs will be evacuated completely on or before March 31 of each year: *And provided further,* That when estimates of anticipated streamflow made by appropriate agencies of the Federal Government indicate that the operation of reservoirs constructed as a part of the middle Rio Grande project may affect the benefits accruing to New Mexico or Colorado, under the provisions of the eighth unnumbered paragraph of article VI of the Rio Grande compact, releases from such reservoirs shall be regulated to produce a flow of ten thousand cubic feet per second at Albuquerque, or such greater or lesser rate as may be determined by the Chief of Engineers at the time to be the maximum safe flow, whenever such operation shall be requested by the Rio Grande compact commissioner for New Mexico or the commissioner for Colorado, or both, in writing prior to commencement of such operation.

(d) All reservoirs of the middle Rio Grande project will be operated at all times in the manner described above in conformity with the Rio Grande compact, and no departure from the foregoing operation schedule will be made except with the advice and consent of the Rio Grande compact, and no departure from the foregoing operation schedule will be made except with the advice and consent of the Rio Grande Compact Commission: *Provided,* That whenever the Corps of Engineers determines that an emergency exists affecting the safety of major structures or endangering life and shall so advise the Rio Grande Compact Commission in writing these rules of operation may be suspended during the period of and to the extent required by such emergency.

(e) The foregoing regulations shall not apply to storage capacity which may be allocated to permanent pools for recreation and fish and wildlife propagation: *Provided,* That the water required to fill and maintain such pools is obtained from sources entirely outside the drainage basin of the Rio Grande.

Upper Mississippi River Basin

In addition to previous authorizations, there is hereby authorized to be appropriated the sum of $12,000,000 for the prosecution of the comprehensive plan for the Upper Mississippi River Basin, approved in the Act of June 28, 1938, as amended and supplemented by subsequent Acts of Congress.

The flood protection project on Redwood River at Marshall, Minnesota, is hereby authorized substantially in accordance with the recommendations of the Chief of Engineers in his report dated June 1, 1960, at an estimated cost of $2,252,000.

The project for the Coralville Reservoir on Iowa River, Iowa, as authorized by the Act of June 28, 1938 (52 Stat. 1215), is hereby modified to provide for construction of a highway bridge across said reservoir at or near the Mehaffy site, to replace the existing bridge crossing of Johnson County on County Road Y, under the direction of the Secretary of the Army and the supervision of the Chief of Engineers, in accordance with such plans as may be approved by the Chief of Engineers, at an estimated cost of not to exceed $1,180,000: *Provided,* That local interests shall construct all necessary approaches to the bridge site, and provide without cost to the United States all lands, easements, and rights-of-way necessary for construction of the bridge.

Missouri River Basin

In addition to previous authorizations, there is hereby authorized to be appropriated the sum of $207,000,000 for the prosecution of the comprehensive plan for the Missouri River Basin approved in the Act of June 28, 1938, as amended, and supplemented by subsequent Acts of Congress.

The report of the Chief of Engineers on Wilson Dam and Reservoir, Saline River, Kansas, submitted in compliance with Public Law 505, Eighty-fourth Congress, published as Senate Document Numbered 96, Eighty-sixth Congress, is hereby approved, and construction of the project as a unit of the comprehensive plan of improvement for the Missouri River Basin authorized by the Flood Control Act approved December 22, 1944, is hereby authorized at an estimated cost of $18,081,000.

The project for flood protection in the Gering and Mitchell Valleys, Nebraska, authorized by the Flood Control Act of July 3, 1958 (Public Law 500, Eighty-fifth Congress), in accordance with the recommendations of the Chief of Engineers in Senate Document Numbered 139, 84th Congress, is hereby modified to provide for such revisions in project scope and purposes due to changed conditions as may be found necessary by the Chief of Engineers, to provide needed protection in Gering Valley: *Provided,* That construction shall not be initiated until the Chief of Engineers shall submit a feasibility report, which shall be coordinated with the Soil Conservation Service, for the approval of the Public Works Committees of the Congress which shall set forth the plan of improvement, its economic justification, and his recommendations for local cooperation.

The project for flood protection at Sioux Falls, South Dakota, authorized by the Flood Control Act approved September 3, 1954, Public Law 780, Eighty-third Congress, in accordance with the recommendations of the Chief of Engineers in House Document Numbered 133, Eighty-fourth Congress, is hereby modified to provide for extension of the authorized project to include flood protection in the reach between Western Avenue and Cherry Rock Dam, in accordance with plans to be prepared by the Chief of Engineers, at an estimated cost of $560,000: *Provided,* That local interests agree to: (a) Furnish without costs to the United States all lands, easements, and rights-of-way; (b) hold and save the United States free from damages; (c) make all necessary relocation and utility changes; and (d) maintain and operate the project after completion.

The project for flood protection on Vermillion River, South Dakota, is hereby authorized substantially in accordance with the recommendations of the Board of Engineers for Rivers and Harbors in its report, dated February 16, 1960, at an estimated cost of $6,010,000.

That the Fort Randall Dam and Reservoir project, South Dakota, is modified to provide for construction of a free highway bridge over the Missouri River at an appropriate location west of Platte, South Dakota, under the direction of the Secretary of the Army and the supervision of the Chief of Engineers, in accordance with such plans as may be approved by the Chief of Engineers, in order to provide adequate crossing facilities over such river for highway traffic in the area and in replacement of the closure of the Wheeler Bridge by reason of construction of said reservoir at a cost not to exceed $6,375,000: *Provided,* That local interests shall construct all necessary approaches to the bridge site, and provide without cost to the United States all lands, easements, and rights-of-way necessary for construction of the bridge.

The project for flood protection on Cheyenne River and tributaries, South Dakota and Wyoming, is hereby authorized substantially in accordance with the recommendations of the Chief of Engineers in House Document Numbered 280, Eighty-sixth Congress, at an estimated cost of $272,000.

That (a) the general comprehensive plan for flood control and other purposes in the Missouri River Basin, as authorized by the Act of June 28, 1938 (52 Stat. 1215), and as modified and expanded by subsequent Acts, if further modified to include the payment by the Corps of Engineers of $346,500 to the city of Bismarck, North Dakota, and $227,552 to the city of Mandan, North Dakota, from funds heretofore or hereafter appropriated for the Fort Peck, Garrison, or Oahe Dam and Reservoir projects, in order to provide part of the Federal compensation to such cities, recommended by the board of engineers consultants in their report on effect of Missouri River reservoirs on sewage facilities at Mandan and Bismarck, North Dakota, dated January 1956, for the cost of construction of sewage treatment works made necessary by the construction by the Federal Government of dams and reservoirs on the Missouri River; the total estimated cost of such construction being $770,000 in the case of the city of Bismarck and $505,671 in the case of the city of Mandan. The remaining part of such Federal compensation shall be provided under the provisions of subsection (d) hereof.

(b) Amounts authorized under the provisions of this item may be paid in a single payment or in such installments as the Chief of Engineers deems appropriate to carry out the provisions of this item. No payment shall be made under such provisions until a showing is made satisfactory to the Chief of Engineers, that the city to receive such payment is ready to proceed with the construction for which the payment is authorized, and is able to finance its portion amounting to 25 per centum of the cost of such construction.

(c) The Chief of Engineers may require such reports with respect to the expenditure of any amounts paid under the provisions of this item as may be necessary to carry out such provisions.

(d) In addition to the amounts to be paid under the provisions of the foregoing subsections (a), (b), and (c), and for the same purposes, the Surgeon General of the Public Health Service shall pay $231,000 to the city of Bismark, North Dakota and $151,701 to the city of Mandan, North Dakota. Payments under the provisions of this item shall be (1) from funds allotted to the State of North Dakota for the fiscal year beginning July 1, 1960, under the provisions of section 6 of the Federal Water Pollution Control Act, and (2) made without regard to the provisions of such Act other than subsection (e) of section 6 and the regulations prescribed to carry out such subsection.

Ohio River Basin

The project for flood protection on Lynn Camp Creek at Corbin, Kentucky, is hereby authorized substantially in accordance with the recommendations of the Chief of Engineers in the House Document Numbered 282, Eighty-sixth Congress, at an estimated cost of $645,000.

The project for flood control and allied purposes on Laurel River, Kentucky, is hereby authorized substantially in accordance with the recommendations of the Chief of Engineers in Senate Document Numbered ——, Eighty-sixth Congress, at an estimated mated cost of $11,900,000.

The project for flood control and allied purposes on Little Sandy River, Kentucky, is hereby authorized substantially in accordance with the recommendations of the Board of Engineers for Rivers and Harbors in its report dated February 16, 1960, at an estimated cost of $11,900,000.

The project for flood protection on Connoquenessing Creek at Butler, Pennsylvania, is hereby authorized substantially in accordance with the recommendations of the Chief

of Engineers in House Document Numbered 110, Eighty-sixth Congress, at an estimated cost of $1,558,700.

The project for flood protection on Loyalhanna Creek at Latrobe, Pennsylvania, is hereby authorized substantially in accordance with the recommendations of the Chief of Engineers in House Document Numbered 383, Eighty-sixth Congress, at an estimated cost of $2,568,300.

The project for the North Fork Reservoir on the North Fork of Pound River, Virginia, is hereby authorized substantially in accordance with the recommendations of the Chief of Engineers in House Document Numbered 184, Eighty-sixth Congress, at an estimated cost of $3,681,000.

The project for flood protection on the West Branch of the Mahoning River, Ohio, authorized in Public Law 85–500, in accordance with the recommendations of the Chief of Engineers in House Document 191, Eighty-fifth Congress, is hereby modified to provide that the entire local share of cost for water for pollution abatement and for municipal and industrial water supply purposes is $5,200,000, of which $3,230,000 will be paid in cash during construction, and the unpaid balance at the time the project is placed in useful operation, $1,970,000, may be paid in cash at that time or repaid on an annual basis in accordance with the principles of title III of said Public Law 85–500.

Great Lakes Basin

The project for flood protection on Cayuga Inlet at and in the vicinity of Ithaca, New York, is hereby authorized substantially as recommended by the Chief of Engineers in House Document Numbered 204, Eighty-sixth Congress, at an estimated cost of $3,950,000.

The project for flood protection on Smokes Creek at and in the vicinity at Lackawanna, New York, is hereby authorized substantially as recommended by the Chief of Engineers in House Document Numbered 200, Eighty-sixth Congress, at an estimated cost of $1,974,000.

Gila River Basin

The plan of improvement for flood protection and allied purposes on the Gila and Salt Rivers, Gillespie Dam to McDowell Dam site, Arizona, is hereby authorized substantially in accordance with the recommendations of the Chief of Engineers in House Document Numbered 279, Eighty-sixth Congress, at an estimated Federal cost of $3,300,000.

Whitewater River Basin, California

The project for flood protection on Tahchevah Creek at and in the vicinity of Palm Springs, California, is hereby authorized substantially in accordance with the recommendations of the Chief of Engineers in Document Numbered 171, Eighty-sixth Congress, at an estimated cost of $1,658,000.

Mojave River Basin

The plan for flood control on the Mojave River, California, is hereby authorized substantially in accordance with the recommendations of the Chief of Engineers in House Document Numbered 164, Eighty-sixth Congress, at an estimated cost of $3,070,000.

Los Angeles River Basin

In addition to previous authorizations, there is hereby authorized to be appropriated the sum of $32,000,000 for the prosecution of the comprehensive plan approved in the Act of August 18, 1941, as amended and supplemented by subsequent Acts of Congress.

Walnut Creek Basin

The plan for flood protection on Walnut Creek, California, is hereby authorized substantially as recommended by the Chief of Engineers in House Document Numbered 76, Eighty-sixth Congress, at an estimated cost of $17,980,000.

Sacramento River Basin

The project for flood protection on the Sacramento River, California, authorized by the Flood Control Act approved March 1, 1917, as amended and modified by subsequent Acts of Congress, is further modified substantially in accordance with the recommendations of the Chief of Engineers in Senate Document numbered 103, Eighty-sixth Congress, and there is hereby authorized to be appropriated the sum of $14,240,000 for the prosecution of the initial phase of bank erosion control works and set-back levees on the Sacramento River.

Las Vegas Wash, Nevada

The project for flood protection on Las Vegas Wash and tributaries, Nevada, is hereby authorized substantially in accordance with the recommendations of the Chief of Engineers in House Document Numbered 405, Eighty-sixth Congress, at an estimated cost of $13,410,000.

Gleason Creek, Nevada

The project for flood protection on Gleason Creek, Nevada, is hereby authorized substantially in accordance with the recommendations of the Chief of Engineers in House Document 388, Eighty-sixth Congress, at an estimated cost of $450,000.

Great Salt Basin, Utah

The project for flood protection on the Salt Lake City Streams, Jordan River Basin, Utah, is hereby authorized substantially in accordance with the recommendations of the Chief of Engineers in House Document Numbered 213, Eighty-sixth Congress, at an estimated cost of $6,060,000.

Columbia River Basin

In addition to previous authorizations, there is hereby authorized to be appropriated the sum of $148,000,000 for the projects and plans for the Columbia River Basin, including the Willamette River Basin, authorized by the Flood Control Act of June 28, 1938, and subsequent Acts of Congress, including the Flood Control Acts of May 17, 1950, September 3, 1954, and July 3, 1958, and these projects and plans are hereby modified to include:

The project for construction of the Foster Reservoir on the South Santiam River, Willamette River Basin, Oregon, is hereby authorized substantially in accordance with the recommendations of the Chief of Engineers in Senate Document Numbered 104, Eighty-sixth Congress, at an estimated cost of $17,340,000.

SEC. 204. That, in recognition of the flood-control accomplishments of the multiple-purpose Merced River development including the Bagby, New Exchequer, and Snelling Dams and Reservoirs, proposed to be constructed on the Merced River by the Merced Irrigation District of California, there is hereby authorized to be appropriated a monetary contribution toward the construction cost of such development and the amount of such contribution shall be determined by the Secretary of the Army in cooperation with the Merced Irrigation District, subject to a finding by the Secretary of the Army, approved by the President, of economic justification for allocation of the amount of flood control, such funds to be administered by the Secretary of the Army: *Provided*, That prior to making the monetary contribution or any part thereof, the Department of the Army and the Merced Irrigation District shall have entered into an agreement providing for operation of the dams and reservoirs in such manner as will produce the flood-control benefits upon which the monetary contribution is predicated, and such operation of the dams and reservoirs for flood control shall be in accordance with rules prescribed by the Secretary of the Army pursuant to the provisions of section 7 of the Flood Control Act of 1944 (58 Stat. 890): *Provided further*, That the funds appropriated under this authorization shall be administered by the Secretary of the Army in a manner which shall assure that the annual Federal contribution during the project construction period does not exceed the percentage of the annual expenditure for the dams and reservoirs which the total flood-control contribution bears to the total cost of the dams and reservoirs: *And provided further*, That, unless construction of the development is undertaken within four years from the date of enactment of this Act, the authority for the monetary contribution contained herein shall expire.

SEC. 205. That, in recognition of the flood control accomplishments of the multiple purpose dam and reservoir (or dams and reservoirs) proposed to be constructed on the Mokelumne River by the East Bay Municipal Utility District of Oakland, California, there is hereby authorized to be appropriated a monetary contribution toward the construction cost of such dam and reservoir (or dams and reservoirs) and the amount of such contribution shall be determined by the Secretary of the Army in cooperation with the East Bay Municipal Utility District, and the Secretary of the Interior, subject to a finding by the Secretary of the Army, approved by the President, of economic justification for allocation of the amount of flood control, such funds to be administered by the Secretary of the Army: *Provided*, That the plan of improvement proposed by the East Bay Municipal Utility District will afford a degree of flood control which in the opinion of the Secretary of the Army is adequate for the Mokelumne River as a part of the overall flood control program for the central valley: *Provided further*, That, prior to making the monetary contribution or any part thereof, the Department of the Army and the East Bay Municipality Utility District shall have entered into an agreement providing for operation of the dam or dams in such manner as will produce the flood control benefits upon which the monetary contribution is predicated, and such operation of the dam or dams for flood control shall be in accordance with rules prescribed by the Secretary of the Army pursuant to the provisions of section 7 of the Flood Control Act of 1944 (54 Stat. 890): *Provided further*, That prior to making the monetary contribution or any part thereof, the Department of the Army and the East Bay Municipal Utility District shall have entered into an agreement to provide adequately for mitigation of damages to fish and wildlife consistent with the other purposes of the project: *And provided further*, That the funds appropriated under this authorization shall be administered by the Secretary of the Army in a manner which shall assure that the annual Federal contribution during the project construction period does not exceed the percentage of the annual expenditure for the dam and reservoir (or dams and reservoirs) which the total flood control contribution bears to the total cost of the dam and reservoir (or dams and reservoirs).

SEC. 206. (a) That, in recognition of the increasing use and development of the flood plains of the rivers of the United States and of the need for information on flood hazards to serve as a guide to such development, and as a basis for avoiding future flood hazards by regulation of use by States and municipalities, the Secretary of the Army, through the Chief of Engineers, Department of the Army, is hereby authorized

to compile and disseminate information on floods and flood damages, including identification of areas subject to inundation by floods of various magnitudes and frequencies, and general criteria for guidance in the use of flood plain areas; and to provide engineering advice to local interests for their use in planning to ameliorate the flood hazard: *Provided,* That the necessary surveys and studies will be made and such information and advice will be provided for specific localities only upon the request of a State or a responsible local governmental agency and upon approval by the Chief of Engineers.

(b) The Secretary of the Army is hereby authorized to allot, from any appropriations heretofore or hereafter made for flood control, sums not to exceed $1,000,000 in any one fiscal year for the compilation and dissemination of such information.

SEC. 207. (a) That whenever, in connection with the construction of any authorized flood control, navigation or multiple-purpose project for the development of water resources, the Chief of Engineers, under the direction of the Secretary of the Army, determines it to be in the public interest to utilize existing public roads as a means of providing access to such projects during construction, he may, at his discretion, improve, reconstruct and maintain such roads and he may contract with the local authority having jurisdiction over the roads to accomplish the necessary work. The accomplishment of such work may be carried out with or without obtaining any interest in the land on which the road is located in accordance with mutual agreement between the parties: *Provided,* (1) That the Chief of Engineers determines that such work would result in a saving in Federal cost as opposed to the cost of providing a new access road at Federal expense, (2) That, at the completion of construction, the Chief of Engineers will, if necessary, restore the road to at least as good condition as prior to the beginning of utilization for access during construction, and (3) That, at the completion of construction, the responsibility of the Chief of Engineers for improvement, reconstruction, and maintenance shall cease.

(b) That, for such water resources projects, under construction or to be constructed, when the taking by the Federal Government of an existing public road necessitates replacement, the substitute provided will as nearly as practicable serve in the same manner and reasonably as well as the existing road. The Chief of Engineers is authorized to construct such substitute roads to design standards comparable to those of the State in which the road is located, for roads of the same classification as the road being replaced. The traffic existing at the time of the taking shall be used in the determination of the classification.

SEC. 208. (a) That the Secretary of the Interior is authorized to construct, operate, and maintain the Norman Federal reclamation project, Oklahoma, in accordance with the Federal reclamation laws (Act of June 17, 1902, and Acts amendatory thereof or supplemental thereto), except so far as those laws are inconsistent with this section, for the principal purposes of storing, regulating, and furnishing water for municipal, domestic, and industrial use, and for controlling floods, and, as incidents to the foregoing for the additional purposes of regulating the flow of the Little River, providing for the conservation and development of fish and wildlife, and of enhancing recreational opportunities. The Norman project shall consist of the following principal work: A reservoir on Little River near Norman, Oklahoma, pumping plants, pipelines, and other conduits for furnishing water for municipal, domestic, and industrial use.

The Secretary may enter into suitable contracts with municipal organizations, or other organizations as defined in section 2, Reclamation Project Act of 1939 (38 Stat. 1187), to undertake with non-Federal financing the construction of pumping plants, pipelines, and other conduits, or any of such works, for furnishing water for municipal, domestic, and industrial use, and to advance to such organizations during the construction period funds to cover an appropriate share of the costs thereof attributable to furnishing water to Tinker Air Force Base.

(b) In constructing, operating, and maintaining the Norman project, the Secretary shall allocate proper costs thereof in accordance with the following conditions:

(1) Allocations to flood control, recreation, and the conservation and development of fish and wildlife and water supply for Tinker Air Force Base shall be nonreturnable.

(2) Allocations to municipal water supply, including domestic, manufacturing, and industrial uses, with the exception of that for Tinker Air Force Base, shall be repayable to the United States by the water users through contracts with municipal corporations, or other organizations as defined by section 2, Reclamation Project Act of 1939 (53 Stat. 1187), and title III of the Flood Control Act of 1958 under the provisions of the Federal reclamation laws, and to the extent appropriate, under the Water Supply Act of 1958. Such contracts shall be precedent to the commencement of construction of any project unit affecting the individual municipalities, and shall provide for repayment of construction costs allocated to municipal water supply in not to exceed fifty years from the date water is first delivered for that purpose, and notwithstanding the provisions in the Water Supply Act of 1958 relating to the rate of interest, payments of said construction cost shall include interest on unamortized balances of that allocation at a rate equal to the average rate (which rate shall be certified by the Secretary of the Treasury) paid by the United States on its marketable long-term securities outstanding on the date of this Act and adjusted to the nearest one-eighth of 1 per centum: *Provided,* That the water users' organization be responsible for the disposal and sale of all water surplus to its requirements, and that the revenues therefrom shall be used by the organization for the retirement of project debt payment, payment of interest, and payment of operation and maintenance cost.

(3) Upon the completion of the payment of the water users' construction cost obligation, together with the interest thereon, the water users shall have a permanent right to the use of that portion of the project allocable to municipal water supply purposes.

(c) Contracts may be entered into with the water users' organization pursuant to the provisions of this section without regard to the last sentence of subsection (c) of section 9 of the Reclamation Project Act of 1939.

(d) The Secretary is authorized to transfer to the project water users the care, operation, and maintenance of the works herein authorized, and, if such transfer is made, to deduct from the obligation of the water users the reasonable capitalized equivalent of that portion of the estimated operation and maintenance cost of the undertaking which, if the United States continues to operate the project, would be allocated to flood control and fish and wildlife purposes. Prior to taking over the care, operation, and maintenance of said works, the water users' organization shall obligate itself to operate them in accordance with criteria specified by the Secretary of the Army with respect to flood control and the Secretary of the Interior with respect to fish and wildlife: *Provided,* That operation and maintenance and replacement cost of furnishing water supply to Tinker Air Force Base, as contemplated in the plan of development, shall be provided by an appropriate agreement between the Secretary of Defense and the water users' organization.

(e) Construction of the Norman project herein authorized may be undertaken in such units or stages as in the opinion of the Secretary best serves the project requirements and the relative needs for water of the several municipal users. Repayment contracts negotiated in connection with each unit or stage of construction shall be subject to the terms and conditions of subsection (b) of this section.

(f) The Secretary may, upon conclusion of a suitable agreement with any qualified agency of the State of Oklahoma or a political subdivision thereof for assumption of the administration, operation, and maintenance thereof at the earliest practicable date, construct or permit the construction of public park and recreational facilities on lands owned by the United States adjacent to the reservoirs of the Norman project, when such use is determined by the Secretary not to be contrary to the public interest, all under such rules and regulations as the Secretary may prescribe. No recreational use of any area to which this subsection applies shall be permitted which is inconsistent with the laws of the State of Oklahoma for the protection of fish and game and the protection of the public health, safety, and welfare. The Federal costs of constructing the facilities authorized by this subsection shall be limited to the nonreimbursable costs of the Norman project for minimum basic recreational facilities as determined by the Secretary.

(g) Expenditures for the Norman Reservoir may be made without regard to the soil survey and land classification requirements of the Interior Department Appropriation Act, 1954 (43 U.S.C. 390a).

SEC. 209. The Secretary of the Army is hereby authorized and directed to cause surveys for flood control and allied purposes, including channel and major drainage improvements, and floods aggravated by or due to wind or tidal effects, to be made under the direction of the Chief of Engineers, in drainage areas of the United States and its territorial possessions, which include the following-named localities: *Provided,* That after the regular or formal reports made on any survey are submitted to Congress, no supplemental or additional report or estimate shall be made unless authorized by law except that the Secretary of the Army may cause a review of any examination or survey to be made and a report thereon submitted to Congress if such review is required by the national defense or by changed physical or economic conditions: *Provided further,* That the Government shall not be deemed to have entered upon any project for the improvement of any waterway or harbor mentioned in this title until the project for the proposed work shall have been adopted by law:

Ogunquit, York, Wells, Kennebunk, Kennebunkport, Biddeford, Saco, Old Orchard, Cape Elizabeth, Portland, and Phippsburg, and adjacent coastal areas, Maine.

Patuxent River, Maryland.

Pithlachascotee River, Masarock Town, Anclote River, Lake Tarpon, Brooksville, and adjacent areas, Florida.

Phillippi Creek, Florida.

Atherton Creek, San Mateo County, California.

Wildcat and San Pablo Creeks, Contra Costa County, California.

Streams in Marin County, California, flowing into Richardson Bay, an arm of San Francisco Bay, including Coyote Creek and Arroyo Corte Madera del Presidio Creek.

Island of Hawaii, State of Hawaii, construction of dikes, barriers, or walls, to protect lives and property from lava flows resulting from volcanic eruption.

SEC. 210. In addition to previous authorizations, there is hereby authorized to be appropriated the sum of $60,000,000 for the prosecution of the comprehensive plan adopted by section 9(a) of the Act approved December 22, 1944 (Public Law Numbered 534, Seventy-eighth Congress), as amended and supplemented by subsequent Acts of Congress, for continuing the works in the Missouri River Basin to be undertaken under said plans by the Secretary of the Interior.

SEC. 211. Title II of the Act may be cited as the "Flood Control Act of 1960".

TITLE III—EVALUATION OF RECREATIONAL BENEFITS

Policy and purpose

SEC. 301. It is hereby declared to be the policy of the Congress that full consideration should be given to the recreational purposes that can be served in the formulation, design, construction, and operation of Federal water resources projects hereafter authorized insofar as use for such purpose is compatible with the major purposes for which the project is to be undertaken. Consistent with this policy (1) as an integral part of the planning of any Federal water resources project, there should be included an evaluation of the recreational benefits to be derived therefrom, (2) planning with respect to the development of the recreational potential of any such project (a) should contemplate the coordination of the use of the project area for recreational purposes with the use of existing or planned Federal, State, or local developments in such manner as to achieve maximum net public benefit, and (b) should be carried out jointly with the Secretary of Agriculture if the project is or will be situated within the exterior boundaries of a national forest, and (3) plans with respect to any such project may provide storage and facilities as may be required for recreational use.

Definitions

SEC. 302. As used in this title—

(1) The term "Federal water resources project" means any project involving the development of water resources for purposes of navigation, flood control, reclamation, irrigation, water supply, hydropower, or other purposes which is undertaken by either the Secretary of the Army, acting through the Chief of Engineers, or the Secretary of the Interior, acting through the Bureau of Reclamation.

(2) The term "recreational purposes" means uses from which public recreational benefits may be derived.

(3) The term "recreational benefits" means public benefits of a recreational nature.

Applicability of section 4 of the Flood Control Act of December 22, 1944

SEC. 303. Except as provided herein, the provisions of this title are intended to be supplemental to and not in derogation of section 4 of the Flood Control Act of December 22, 1944, as amended (16 U.S.C. 460d), and the provisions of that Act are hereby made expressly applicable to Federal water resources projects of the Department of the Interior as well as the Department of the Army. With respect to any such project of the Department of the Interior, any reference in such section to the Secretary of the Army or the Chief of Engineers shall also be deemed to refer to the Secretary of the Interior.

Evaluation of recreational benefits

SEC. 304. (a) In addition to such other data as may be prescribed by law, or may be pertinent, there shall be included in any report required to be submitted to the Congress by the Secretary of the Army or the Secretary of the Interior with respect to the development of any Federal water resources project, (1) an evaluation of the annual recreational benefits to be derived therefrom, (2) the annual cost of providing such benefits, including the cost of the additional facilities, if any, to be installed or provided specifically in furtherance of recreational purposes, and (3) the part of the cost of any such project that should be allocated to recreational benefits.

(b) The evaluation of recreational benefits, as provided in this section shall be made by the Secretary of the Army with respect to Corps of Engineers projects or by the Secretary of the Interior with respect to Bureau of Reclamation projects. The President is hereby authorized to prescribe regulations under which each such evaluation shall be made; and the President shall include in said regulations provisions for using in such evaluation of recreational benefits of any project a monetary value of not less than 50 cents per visitor-day of use of that project for recreation.

(c) The total recreational benefit creditable to any project under the foregoing provisions of this section shall in no event exceed the cost of providing comparable water-associated recreation by the least costly alternative means.

Allocation and financing of costs

SEC. 305. (a) Project costs, including the cost of minimum basic facilities provided pursuant to clause (1) of section 306(a), shall be allocated to the purpose of recreation. Of the costs so allocated not more than 10 per centum of the total cost of any Federal water resources project, including the cost of providing minimum basic facilities pursuant to clause (1) of section 306(a), may be assigned to recreational purposes, except that if the Secretary of the Army or the Secretary of the Interior determines that the recreational benefits to be derived from any such project are needed and that such benefits will have value on a widespread national basis, he may include in any report which is submitted to the Congress with respect to such project a recommendation that a greater amount than 10 per centum of the total cost of the project be assigned to recreational purposes. That part of the total cost of any such project which is allocated to recreational purposes shall be nonreimbursable and nonreturnable: *Provided*, That project costs not so assigned shall be allocated as provided by law.

Project facilities

SEC. 306. (a) In connection with any Federal water resources project, the Secretary of the Army or the Secretary of the Interior is authorized—

(1) to construct, operate, and maintain minimum basic facilities for access to, and for the maintenance of public health and safety and the protection of public property on, lands withdrawn or acquired for the project, and to conserve scenery and natural, historic, and archeologic objects;

(2) to cooperate with interested State and local governmental agencies and others in the investigation and planning of any such project; and

(3) to permit the construction, maintenance, and operation of public park and recreational facilities on project lands.

The minimum basic facilities referred to in clause (1) of this subsection shall be limited to water supplies, sanitary facilities, boat anchorage and launching sites, access roads and parking areas, public camp and picnic sites, overlook stations, clearing of public-use water areas to a reasonable extent, and essential safety measures.

(b) In carrying out the policy and purpose of this title, as set forth in sections 301 and 303, the Secretary of the Army or the Secretary of the Interior is authorized to permit the construction, maintenance, and operation by non-Federal interests, with preference given to State and local governmental agencies, of such additional facilities as may be necessary or desirable for the full development of any Federal water resources project area for recreational purposes in accordance with the provisions of section 4 of the Flood Control Act of December 22, 1944, as amended (16 U.S.C. 460d).

Fish and Wildlife Coordination Act

SEC. 307. The provisions of this title are not intended to interfere in any way with operations carried on in accordance with the Fish and Wildlife Coordination Act (16 U.S.C. 661–666c), and no such provision shall be construed to supersede that Act or any of its provisions.

Reclamation Project Act of 1939

SEC. 308. The second sentence of section 9(a) of the Reclamation Project Act of 1939, as amended (43 U.S.C. 485h (a)), is amended by striking out "together with any allocation to flood control or navigation made under subsection (b) of this section", and inserting in lieu thereof the following: "together with any allocation (i) to flood control or navigation under subsection (b) of this section, or (ii) to recreational purposes made under the Water Resources Recreation Act of 1960."

Project areas within national forests

SEC. 309. (a) Nothing in this title shall be construed to affect in any way the authority of the Secretary of Agriculture with respect to project areas which are under his jurisdiction.

(b) The authority conferred on the Secretary of the Army and the Secretary of the Interior by section 306 of this title shall be exercised with respect to national-forest lands only with the concurrence of the Secretary of Agriculture.

Short title

SEC. 310. Title III of this Act may be cited as the "Water Resources Recreation Act of 1960".

TITLE IV—ACQUISITION OF REQUIRED LAND

Declaration of policy

SEC. 401. It is hereby declared to be the policy of Congress that owners and tenants whose property is acquired for public works projects of the United States of America shall be paid a fair and equitable amount for the property acquired and reimbursed for their actual losses.

Dissemination of information

SEC. 402. Within six months after the date that Congress authorizes construction of a water resource development project under the jurisdiction of the Secretary of the Army, the Corps of Engineers shall make reasonable effort to advise owners and occupants in and adjacent to the project area as to the probable timing for the acquisition of lands for the project and for incidental rights-of-way, relocations, and other requirements. Within a reasonable time after initial appropriations are made for land acquisition or construction, including relocations, the Corps of Engineers shall conduct public meetings at locations convenient to owners and tenants to be displaced by the project in order to advise them of the proposed plans for acquisition and to obtain their comments thereon. To carry out the provisions of this section, the

Chief of Engineers shall issue regulations to provide, among other things, dissemination of the following information to those affected: (1) basis and procedures for appraisals; (2) basis for offer to purchase property without going to court; (3) legal procedures in condemnation proceedings; (4) entitlement to payments for moving expenses or other losses not covered by appraised market value; (5) occupancy during construction; (6) removal of improvements; (7) payments required by occupants of Government acquired land; (8) deposits as advances to land and property owners; and (9) use of land by owner when easement is acquired. The operation of this section and the functions performed under it shall be exempt from the operations of the Administrative Procedure Act of June 11, 1946, as amended (60 Stat. 237).

Commission on Compensation in the Acquisition of Land

SEC. 403. Because (a) owners and tenants displaced by public works projects of the United States do not always obtain reimbursement for all of their expenses and losses and (b) judicial interpretation of just compensation as guaranteed by the fifth amendment to the Constitution of the United States assures payment of only the market value of the property taken as if willingly sold, there is hereby established a Commission to be known as The Commission To Study the Adequacy of Compensation in Federal Real Property Acquisitions, hereafter referred to as "the Commission", the purpose of which shall be to determine the most effective manner of carrying out the policy set forth in section 401 of this title.

Interim provision for reimbursement of losses

SEC. 404. Because (a) many owners and tenants whose land is required for water resource development projects of the Department of the Army are not being reimbursed at the present time in accordance with the policy set forth in section 401 of this title and (b) legislative action on any recommendations made by the Commission established under section 403 could not be completed before June 30, 1963, persons, firms and corporation from whom any interest in real property is acquired between the effective date of this Act and June 30, 1963 for a water resource development project of the Department of the Army shall receive, in addition to but not in duplication of any payments otherwise authorized by law, further payment as will, in the discretion of the Chief of Engineers, compensate such persons, firm or corporation for consequential losses and damages in an amount not to exceed $25,000 up to a maximum of 20 per centum of the appraised value of the interest in the real estate taken by the Government as determined by the Chief of Engineers. The authority conferred by this section shall be delegable by the Chief of Engineers to such responsible officers or employees as he may determine. The operation of this section and the functions performed under it shall be exempt from the operation of the Administrative Procedure Act of June 11, 1946, as amended (60 Stat. 237). To carry out the provisions of this section, the Chief of Engineers shall issue regulations which shall provide, among other things, that the payments authorized by this section shall be offset by any enhancement that the project causes in the market value of remaining property interests held by the applicant and shall be allowable only if the applicant certifies that he did not acquire his interest in the property involved in contemplation of the project or for the purpose of transfer to the Government. For the purpose of this section there shall be a presumption that an interest in property acquired other than through heirship after the date that a project is authorized by Congress was acquired in contemplation of the project.

Membership and organization of the Commission

SEC. 405. (a) The Commission shall be composed of seventeen members as follows:

(1) Nine appointed by the President of the United States, of whom six shall be from the executive branch of the Government and three from private life. From among these nine the President shall designate the Chairman and Vice Chairman of the Commission.

(2) Four appointed by the President of the Senate, at least two of whom shall be Members of the United States Senate.

(3) Four appointed by the Speaker of the House of Representatives, at least two of whom shall be Members of the House of Representatives.

(b) Any vacancy in the Commission shall not affect its powers, but shall be filled in the same manner in which the original appointment was made.

(c) Nine members of the Commission shall constitute a quorum, but a lesser number may conduct hearings.

(d) Service of an individual as a member of the Commission or employment of an individual by the Commission as an attorney or expert in any business or professional field, on a part-time or full-time basis, with or without compensation, shall not be considered as service or employment bringing such individual within the provisions of section 281, 283, 284, 434, or 1914 of title 18 of the United States Code, or section 190 of the Revised Statutes (5 U.S.C. 99).

Duties of the Commission

SEC. 406. The Commission shall study and investigate the present methods and procedures by which real property is acquired by the United States, the several States, and by other governmental bodies as deemed necessary in the discretion of the Commission. The Commission shall determine and report on the scope of losses, expenses, and damages incurred by individuals, families, business concerns, and local communities as the result of the acquisition of land for public works projects of the United States of America indicating particularly the scope and extent of losses, expenses, and damages, if any, not compensable under the judicial interpretations of the constitutional guarantee of just compensation.

Report

SEC. 407. The Commission, not later than December 31, 1962, shall submit to the President and to Congress a comprehensive report of its activities and the results of its studies. The report shall include recommendations for legislative enactments and administrative actions as in the judgment of the Commission are necessary to carry out the recommendations to fulfill the policy set forth in section 401 of this title.

Powers of the Commission

SEC. 408. (a) The Commission or, on the authorization of the Commission, any subcommittee or member thereof may, for the purpose of carrying out the provisions of this title, hold such hearings, and sit and act at such times and places, administer such oaths, and require, by subpena or otherwise, the attendance and testimony of such witnesses and the production of such books, records, correspondence, memoranda, papers, and documents, as the Commission or such subcommittee or member may deem advisable. Subpenas may be issued under the signature of the Chairman of the Commission, of such subcommittee, or any duly designated member, and may be served by any person designated by such Chairman or member. The provisions of sections 102 to 104, inclusive, of the Revised Statutes (U.S.C., title 2, secs. 192–194), shall apply in the case of any failure of any witness to comply with any subpena or to testify when summoned under authority of this section.

(b) The Commission is authorized to obtain from any department, agency, or independent instrumentality of the executive branch of the Government any information it deems necessary to carry out its functions under this title, other than information relative to pending or prospective acquisitions; and each such department, agency, and instrumentality is authorized to furnish such information to the Commission, upon request made by the Chairman or by the Vice Chairman when acting as Chairman.

Appropriations, expenses, and personnel

SEC. 409. (a) There are hereby authorized to be appropriated to the Commission such amounts as may be necessary to carry out the provisions of this title.

(b) Each member of the Commission shall receive $50 a day when engaged in the performance of duties vested in the Commission, except that no compensation shall be paid by the United States, by reason of service as a member, to any member who is receiving other compensation from the Federal Government, or to any member who is receiving compensation from any State or local government.

(c) Each member of the Commission shall be reimbursed for travel, subsistence, and other necessary expenses incurred by him in the performance of duties vested in the Commission.

(d) The Commission is authorized, without regard to the civil service laws and regulations, and without regard to the Classification Act of 1949, as amended, to appoint and fix the compensation of a Director and such additional personnel as may be necessary to enable it to carry out its functions, except that any Federal employees subject to the civil service laws and regulations who may be assigned to the Commission shall retain civil service status without interruption or loss of status or privilege.

Termination of the Commission

SEC. 410. The Commission shall cease to exist six months after the transmittal to the President and the Congress of the final report provided for in Section 407 of this title.

SEC. 411. Title IV of this Act may be cited as the "Land Acquisition Policy Act of 1960."

Mr. HILL. Mr. President, I offer an amendment which I ask to have stated.

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. On page 5, after line 2, it is proposed to insert the following:

Black Warrior, Warrior, and Tombigbee Rivers, Alabama, at Jackson Lock and Dam: House Document Numbered 50, Eighty-sixth Congress, at an estimated cost of $120,000;.

Mr. HILL. Mr. President, I yield myself 3 minutes.

The House of Representatives on February 15, last, unanimously passed a bill authorizing the acquisition of land for a national wildlife refuge for the Jackson lock and dam navigation project on the Tombigbee and Warrior Rivers in the State of Alabama.

My amendment would do exactly what the bill as it passed the House would do. It provides for the acquisition of the land for the establishment of a wildlife refuge pursuant to the Fish and Wildlife Coordination Act.

The bill has the approval of the Chief of Engineers, the U.S. Fish and Wildlife Service, the Department of the Interior, the Bureau of the Budget. In fact, all the agencies concerned approve the bill. There is no objection to it.

The Chief of Engineers submitted a report on the project to Congress in accordance with the Fish and Wildlife Coordination Act approved on August 12, 1958.

In view of that fact, I hope the distinguished chairman of the committee, who is in charge of the bill, will accept the amendment.

Mr. KERR. Mr. President, I think the amendment is meritorious. It has been cleared by the Corps of Engineers. Speaking as the manager of the bill, I recommend that the amendment be approved.

Mr. CASE of South Dakota. I have no objection.

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

Mr. HILL. Mr. President, I ask unanimous consent to have printed in the RECORD at this point a statement I have prepared relating to this project.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR HILL

The project for the Jackson lock and dam on Tombigbee River near Coffeeville, Ala., 120 miles above Mobile, is now under construction by the Corps of Engineers. The project is one of several lock and dam reconstructions on the Tombigbee and Black Warrior River systems, which include the Demopolis and Warrior locks and dams now completed. The authority for these projects is the River and Harbor Act of March 3, 1909, which permits the reconstruction of any existing structure whenever absolutely essential to its efficient and economic maintenance and operation to provide adequate facilities for existing navigation.

The Jackson lock and dam will replace existing old and antiquated locks Nos. 1, 2, and 3, on the Tombigbee River, with a dam about 65 feet high and a new modern lock 110 feet by 600 feet, having a single lift of 34 feet.

The plans for the Jackson lock and dam include improvement of the natural levee along the east bank of the river to provide a shallow permanent pool with several islands and a widely meandering shoreline along the west bank.

In accordance with the provisions of the Fish and Wildlife Coordination Act (U.S.C.A. title 16, sec. 661, as amended), the Secretary of the Interior and the director of the Alabama Department of Conservation propose to establish waterfowl management areas in conjunction with the project, including a State public shooting area on the east bank and a national wildlife refuge in and surrounding the pool on the west bank.

Establishment of the proposed refuge will require the acquisition of fee title to 2,025 acres of land which will be permanently inundated, but with no anticipated additional cost since the cost of fee title acquisition will probably be the same as the cost of acquiring flowage easements only as originally planned. In addition, the proposal will require fee acquisition of a thousand acres of islands formed by the impoundment at an estimated cost of $50,000, and 1,224 acres of land in a 300-foot shoreline strip around the margin of the reservoir at an estimated cost of $70,000, an increase in acquisition of approximately 2,000 acres of land that would not otherwise be acquired at a cost of $120,000.

The purpose of the Fish and Wildlife Coordination Act is to permit the development of wildlife refuge potential as a part of public works projects similar to Jackson lock and dam, but requires specific authorization for individual projects.

The Jackson lock and dam is located in a new flyway for migratory waterfowl from the Ohio River along the Cumberland and Tennessee Valleys to the wintering grounds on the gulf coast. The stabilized pool in the reservoir will also create substantial additional fishing and general recreational benefits.

The Chief of Engineers has submitted a report on this project to Congress in accordance with the Fish and Wildlife Coordination Act approved August 12, 1958. That report is printed as House Document No. 50, 86th Congress, and includes the report and recommendations of the Chief of Engineers, the U.S. Fish and Wildlife Service, the Department of the Interior, the Bureau of the Budget, and the State of Alabama. All of these agencies approve the project. There is no objection to it from any source so far as I know.

Authorization for this project was included in H.R. 8347, which passed the House on February 15, 1960. The Senate has not considered this House passed bill. A description of this project and comments of the agencies are included in House Report 1156, 86th Congress.

H.R. 7634 includes title III which permits evaluation of recreational benefits from projects hereafter authorized, and the use of those benefits in determining the economic feasibility of such projects. The Jackson lock and dam is now under construction and will be completed in about 2 years.

Adoption of the amendment I have offered will enhance the recreational possibilities of this large reservoir, will permit early realization of the recreational benefits from the project, and will permit full development of the project so that it will serve all possible purposes.

The wildlife refuge that will be established at the Jackson lock and dam project will be a cooperative effort. The U.S. Fish and Wildlife Service will maintain and operate the area on the west bank of the river, and the State of Alabama will develop the area on the east bank of the river, including construction of water control structures, and operate and maintain it without cost to the Federal Government.

I urge approval of the amendment.

Mr. JOHNSON of Texas. Mr. President, I send to the desk an amendment which I ask to have read.

The PRESIDING OFFICER. The amendment will be stated.

The LEGISLATIVE CLERK. On page 57, lines 22 to 23 it is proposed to insert the following:

SEC. 210. The Chief of Engineers, under the direction of the Secretary of the Army, is authorized and directed to cause an investigation and study to be made, in cooperation with appropriate agencies of the State of Texas, with a view to devising effective means of accomplishing the recharge and replenishment of the Edwards Underground Reservoir as a part of plans for flood control and water conservation in the Nueces, San Antonio and Guadalupe River Basins of Texas: *Provided*, That the State of Texas or its agencies contribute toward the cost of such study such funds or services as the Secretary of the Army may deem appropriate: *Provided further*, That the findings of such study shall be presented in a joint report signed by the appropriate representatives of the Governor of Texas and of the Chief of Engineers.

On page 57, line 23, in lieu of "SEC. 210" it is proposed to insert "SEC. 211".

On page 58, line 7, in lieu of "SEC. 211" it is proposed to insert "SEC. 212".

Mr. JOHNSON of Texas. Mr. President, this amendment would authorize an investigation and study of the engineering feasibility of recharging the Edwards Underground Reservoir, in Texas. This great underground reservoir is a principal source of water for much of Texas; and the rapid drop in the water table in recent years has endangered the water supply of hundreds of thousands of Texans.

Under the amendment, the Corps of Engineers would investigate the possibility of recharging and replenishing the reservoir with flood waters from Texas rivers. This would reduce flood damage, and would conserve water for water-supply purposes.

Mr. President, I ask unanimous consent that I may insert at this point in the RECORD as a part of my remarks a brief statement explaining the nature and purpose of this amendment.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR JOHNSON OF TEXAS

This amendment authorizes the Chief of Engineers to make a study and investigation, in cooperation with appropriate agencies of the State of Texas, of the recharge and replenishment potential of the Edwards Underground Reservoir as a part of plans for flood control and water conservation in the Nueces, San Antonio and Guadalupe River basins of Texas.

The Edwards Underground Water Reservoir is the principal source of water for a large area in south-central Texas extending from Bracketville in Kinney County on the west to Kyle in Hays County to the north and east, a distance of 150 miles. The reservoir underlies large areas of the Nueces, San Antonio, and Guadalupe River basins, encompassing a surface area of more than 7,000 square miles.

The Edwards Underground Reservoir is the principal source of municipal, industrial, and irrigation water for a large area of Texas. Virtually all municipal water systems in the area depend on the Edwards as its source of supply including the city of San Antonio. Over 800,000 persons, seven major Army and Air Force bases, many significant industrial establishments and a large irrigated area look to the Edwards Reservoir for continued existence.

This reservoir is naturally recharged and replenished with water through exposed sections of the Edwards limestone formation in stream beds within the Nueces, San Antonio, and Guadalupe River basins. However, in recent years the demands on the reservoir by water users have far exceeded its natural recharge capacity, and as a result the water supply of this great area has at times been seriously in danger. The growth the economy of the area presently is experiencing will only add to the drain on this supply.

If the Edwards Reservoir is going to continue to serve as a principal source of water for this area of Texas, a way must be found to increase the rate of recharge from surface water sources. And the purpose of the investigation and study is to determine the engineering potential and feasibility of a recharge project for the Edwards Reservoir

The proposed investigation and study would be designed to ascertain how much water may be made available to recharge the Edwards Reservoir, the means by which it may best be introduced into the underground strata, the nature, location and estimated costs of any improvements or structures proposed for replenishing and recharging the reservoir and a determination of the benefits which would be derived from such a project especially from the standpoint of flood control and prevention and the development of municipal, industrial, and irrigation water supplies.

Local authorities have conducted extensive ground water surveys of the area concerned and have collected much basic data which will be utilized in this engineering study. Local agencies will also participate with the Corps of Engineers in carrying out the study, and it is provided in the amendment that the State of Texas or its agencies shall contribute toward the cost of the study such funds or services as the Secretary of the Army may deem appropriate. It is also provided that the findings of the study shall be signed by the appropriate representatives of the Governor of Texas as well as the Chief of Engineers.

Mr. CASE of South Dakota. Mr. President, will the Senator from Texas yield?

Mr. JOHNSON of Texas. I yield.

Mr. CASE of South Dakota. I have examined the amendment. It has one unusual feature, in that it calls for the report to be signed by the Governor of the State of Texas, as well as by the representative of the Corps of Engineers. I certainly have no objection to the unusual signature provision, particularly in view of the fact that the study is to be a cooperative one.

However, I wish to ask the Senator from Texas whether it is to be understood that the report should also be submitted to the Federal agencies which customarily are called upon to make reports on studies by the Corps of Engineers, as well as to any State agencies which would be called upon because of their possible interest in the project.

Mr. JOHNSON of Texas. The answer is "Yes; they would be expected to."

Mr. CASE of South Dakota. With that understanding, I have no objection to the amendment.

Mr. KERR. I have no objection.

Mr. JOHNSON of Texas. Mr. President, I yield back the remainder of the time available to me.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Texas.

The amendment was agreed to.

Mr. HUMPHREY. Mr. President, I wish to express my appreciation to the Senator from Oklahoma [Mr. KERR] and to the Senator from South Dakota [Mr. CASE] for the splendid work done on the Minnesota projects in the omnibus rivers and harbors bill.

We have waited for some time for these projects, particularly those which relate to the deepening of the harbors and the flood control project on the Redwood River and the expansion of the industrial harbor at Red Wing, Minn.

Mr. President, I ask unanimous consent to have printed at this point in the RECORD, in connection with my remarks, a brief analysis of those provisions of the bill.

There being no objection, the analysis was ordered to be printed in the RECORD, as follows:

JUNE 9, 1960.

Four Minnesota projects are included in the omnibus rivers and harbors bill H.R. 7634. The following would be authorized by passage of the bill:

1. Flood control project on Redwood River at Marshall, Minn. This city serves the commercial needs of the highly developed, surrounding agricultural area. A major flood in June 1957 inundated the major part of the commercial and residential areas of the city and wide areas of adjacent farm land. Repeat of that flood would cause $2.6 million damage. The project calls for diversion of the river channel flood flows around the city.

2. Expansion of industrial harbor at Red Wing, Minn. This city serves a prosperous farming area in the southeast part of the State. At present, harbor facilities cannot handle increasing river traffic and storage demands. The project calls for dredging of a 9-foot-deep basin 1,200 feet in length.

3. Deepening of Duluth-Superior Harbor. This project would adapt the harbor to the full opportunity of deep-draft vessels off St. Lawrence Seaway. It is a part of the proposed comprehensive survey of 20 Great Lakes ports. Duluth-Superior had more traffic in 1958 than any of those ports. The cost-benefit ratio is a top-notch 19.3 to 1.

4. Deepening of Two Harbors harbor. This is another of the 20 ports included in the Great Lakes comprehensive survey. Its traffic, serving northeast part of the State, has picked up tremendously in recent years. It has a phenomenal cost-benefit ratio of 68 to 1.

Mr. CARLSON. Mr. President, I offer the amendment which I send to the desk and ask to have stated.

The PRESIDING OFFICER (Mr. MCGEE in the chair). The amendment submitted by the Senator from Kansas will be stated.

The LEGISLATIVE CLERK. On page 58, between lines 6 and 7, it is proposed to insert the following new section:

SEC. 211. (a) The Secretary of the Army is authorized and directed to pay to any bona fide lessee or permittee owning improvements, which are or which were situated on a railroad right-of-way, the fair value of any such improvements, which have been or will be rendered inoperative or be otherwise adversely affected by the construction of the Tuttle Creek Reservoir project on the Blue River, Kansas, as determined by the Secretary, or by the U.S. District Court for the District of Kansas on which is conferred jurisdiction for this purpose.

(b) The Secretary of the Army is authorized to provide the funds necessary to carry out the provisions of this Act from any moneys appropriated for the construction of the Tuttle Creek Reservoir project.

On page 58, line 7, it is proposed to strike out "211" and insert in lieu thereof "212".

Mr. CARLSON. Mr. President——

The PRESIDING OFFICER. How much time does the Senator from Kansas yield himself?

Mr. CARLSON. One minute.

The PRESIDING OFFICER. The Senator from Kansas is recognized for 1 minute.

Mr. CARLSON. Mr. President, I have discussed the amendment with the distinguished Senator from Oklahoma [Mr. KERR] and with the ranking minority member, the Senator from South Dakota [Mr. CASE].

The amendment authorizes and directs the Secretary of the Army to pay any bona fide lessee or permittee the value of improvements located on a railroad right-of-way, where improvements are rendered inoperative, due to construction of Tuttle Creek Dam.

Examples are elevators and feed mills, gasoline bulk stations, and lumberyards. Nine lessees along the rights-of-way of two railroads are affected. It is estimated the payments provided under the bill would be in the aggregate approximately $85,000.

The lessees have erected structures under leases with the railroads providing for termination upon acquisition of the fee by a public body and of another group upon 30 days' notice to lessee. As a result of court interpretation of the guarantee of just compensation contained in the fifth amendment to the Constitution, it has been held that tenants at will or licensees under revocable licenses do not possess a compensable property interest. Therefore, these nine lessees would suffer an undue hardship by receiving no damages for loss of improvements and also no consideration for the expense of removing their improvements, as required by the Federal Government.

The dam is practically complete. These installations should, in my opinion, be paid for by the Federal Government. The amendment follows the usual custom of taking care of these situations.

I sincerely hope that the Senator from Oklahoma and the ranking minority member of the committee will accept the amendment.

Mr. CASE of South Dakota. Mr. President, will the Senator from Kansas yield?

Mr. CARLSON. I yield.

Mr. CASE of South Dakota. This amendment illustrates one of the problems to which the committee addressed itself in the hearings; namely, adequate and equitable reimbursement for the taking of property when there is no basis in general law for a loss sustained.

There have been brought to the attention of the committee other instances in which a structure has been built under some sort of lease that did not amount to a title. Under existing general law the Corps of Engineers does not have authority to pay for a structure which rests upon a temporary leasehold or an easement, when there is no title to the land.

However, merit for the amendment certainly exists; and in the past Congress has passed individual or special relief bills to take care of such cases.

I have no objection to the amendment, and I believe it should be adopted.

Mr. KERR. Mr. President, the amendment offered by the Senator from Kansas has precedent in meritorious amendments; and I request the adoption of this amendment.

The PRESIDING OFFICER. Do the Senators for both sides yield back the remainder of the time under their control?

Mr. CARLSON. I do, Mr. President.

Mr. KERR. Yes, Mr. President; I do.

The PRESIDING OFFICER. All time on the amendment has been either used or yielded back.

The question is on agreeing to the amendment of the Senator from Kansas.

The amendment was agreed to.

Mr. CARLSON. I thank the Senator from Oklahoma.

Mr. FREAR. Mr. President, I submit the amendment which I send to the desk and ask to have stated.

The PRESIDING OFFICER. The amendment will be stated.

The LEGISLATIVE CLERK. In title I, it is proposed to insert a new section 110, and to renumber the following sections—as follows:

SEC. 110. (a) That the project for a navigation channel in St. Jones River, Delaware, authorized by the River and Harbor Act of June 25, 1910, insofar as said project relates to said stream upstream from Lebanon, Delaware, be and the same is hereby abandoned.

(b) That St. Jones River upstream from Lebanon, Delaware, be, and the same is hereby declared to be not navigable waters of the United States within the meaning of the Constitution and laws of the United States.

(c) The right to alter, amend, or repeal this section is hereby expressly reserved.

Mr. FREAR. Mr. President, I need only one-half a second, because I think the committee is familiar with the amendment.

The PRESIDING OFFICER. Does the Senator from Delaware yield to himself one-half a second, only?

Mr. FREAR. Yes, Mr. President, for that will be sufficient time.

I lay the amendment in the hands of the chairman of the committee.

Mr. KERR. Mr. President, the amendment is a very unusual one. But in view of the fact that it authorizes the abandonment of the improvement, and in view of the fact that the amendment is offered by the Senator from Delaware [Mr. FREAR], I suggest its adoption.

Mr. CASE of South Dakota. Mr. President——

The PRESIDING OFFICER. How much time does the Senator from South Dakota yield to himself?

Mr. CASE of South Dakota. Two minutes.

The PRESIDING OFFICER. The Senator from South Dakota is recognized for 2 minutes.

Mr. CASE of South Dakota. Mr. President, certainly it is unusual for us to be called upon to deauthorize a project or part of a project. It was authorized in 1910; and, apparently, 50 years later the authorization has not been employed, and now it is desired to abandon it.

First, let me ask the Senator from Delaware whether that is a fact?

Mr. FREAR. I believe it was abandoned in 1910.

Mr. CASE of South Dakota. And nothing has been done during the ensuing 50 years?

Mr. FREAR. That is correct. It is supposed to call for about 7 feet at mean low water. Perhaps I do not exaggerate when I say that 7 inches at mean low water is nearer the fact. There is no commercial traffic at all on the creek; it is used by rowboats, and so forth.

Mr. CASE of South Dakota. I should like to invite the attention of the chairman of the subcommittee who is handling the bill on the floor to the language in subsection (c); and I ask him to advise me what it means from a legal standpoint:

The right to alter, amend, or repeal this section is hereby expressly reserved.

That is rather unusual language, and would be a limitation. What does that provision mean?

Mr. KERR. I think it is a declaration of an actuality, which would be just as legal if not stated, but does not become less so by reason of being stated.

Mr. CASE of South Dakota. As a general proposition, my impression is that one Congress cannot bind another, and that the only way we could pass an irrepealable statute would be by constitutional amendment.

To reserve the right to repeal a section is rather unusual; but I have no objection, unless we are trying to bind a future Congress, when we do not have the power to do so.

Mr. KERR. It does not undertake to bind a future Congress. It specifically reserves to a future Congress the right to change it at its will.

Mr. CASE of South Dakota. Then I have no objection.

So far as this Congress is concerned, probably the amendment will be very useful.

Mr. FREAR. Mr. President, it will save the Government a considerable amount of money; I may say.

Let me ask whether the Senator from South Dakota will yield back the remainder of the time available to him.

Mr. CASE of South Dakota. I do.

Mr. FREAR. I do likewise.

The PRESIDING OFFICER. All time on the amendment has either been used or yielded back.

The question is on agreeing to the amendment of the Senator from Delaware.

The amendment was agreed to.

Mr. FONG. Mr. President, I send to the desk two amendments, and ask to have them stated.

The PRESIDING OFFICER. The first amendment offered by the Senator from Hawaii will be stated.

The LEGISLATIVE CLERK. It is proposed, on page 22, following line 16, to insert the following:

Coasts of the Hawaiian Islands; investigation of sites for possible use as anchorage areas for handling of explosives. Areas of investigation to be designated by the Governor's Advisory Committee on Explosives.

Mr. FONG. Mr. President, I have taken this matter up with the distinguished Senator from Oklahoma.

The PRESIDING OFFICER. How much time does the Senator yield to himself?

Mr. FONG. One minute.

This is a request for the investigation of an anchorage site for unloading of explosives within State waters. It requests an engineering survey.

Mr. CASE of South Dakota. Mr. President, I yield myself one minute.

The PRESIDING OFFICER. The Senator from South Dakota is recognized for 1 minute.

Mr. CASE of South Dakota. Mr. President, as I understand, this is a request for a study for a possible anchorage area.

Mr. FONG. That is correct.

Mr. CASE of South Dakota. It is not a request for an authorization for an anchorage, but for a study. Consistent with the other amendments we have already accepted to the bill and other proposals in the bill itself in the nature of committee amendments, I urge that the amendment be agreed to.

Mr. KERR. Mr. President, I urge the acceptance of the amendment.

The PRESIDING OFFICER. All time on the amendment is yielded back.

The question is on agreeing to the amendment.

The amendment was agreed to.

The PRESIDING OFFICER. The clerk will state the second amendment offered by the Senator from Hawaii.

The LEGISLATIVE CLERK. It is proposed, on page 57, between lines 22 and 23, to insert the following:

Kahoma Stream, island of Maui, Hawaii.

Mr. FONG. Mr. President, this is another request for the Corps of Engineers to make a flood control survey of the Kahoma Stream on the island of Maui.

Mr. CASE of South Dakota. Mr. President, I yield myself 1 minute.

This amendment seems to be a request for a study, which is consistent with other study provisions in the bill and involves no great cost. It would be accomplished under the study funds available to the Corps of Engineers.

I urge its adoption.

Mr. President, before I yield the floor on this amendment, I should like to express my personal appreciation of the fine service rendered in the committee by our new colleague, the Senator from Hawaii [Mr. FONG]. The Senator from Hawaii, who is offering this amendment, has been most faithful in his attendance upon the hearings of the committee, and it is a pleasure to cooperate with him in this regard.

While I am speaking, I want to say the Committee on Public Works, I feel, is fortunate in having both Senators from the new State of Hawaii as members of the committee. Both Senators from Hawaii, Senator LONG, as well as Senator FONG, have been faithful in attendance on the meetings of the committee and have taken a real interest in the work of the committee.

Hawaii is a new State of the Union. It has been neglected in the past in rivers and harbors projects.

A couple of years ago, after I had been there and certain situations were brought to my attention, I proposed and introduced a bill to authorize the improvement of one of the harbors on the island of Maui which had a very high cost-benefit ratio, about 6 to 1, and one which was rated very highly by the Department of the Navy.

I merely mention the fact to illustrate that when the present State of Hawaii was a territory it did not have quite

the same opportunity that a State has in getting attention for its needed development.

The State of Hawaii is a great contributor to the revenues of the country. It is proper that the study should be made. The State is represented by very fine Senators. It is a pleasure to have them on the committee and to request concurrence in the amendment.

Mr. KERR. Mr. President, I yield 1 minute to myself.

I am happy to concur in the remarks of the distinguished Senator from South Dakota relative to our two new Senators from Hawaii, who are members of our committee, and to say that this amendment also is routine in nature and provides for an appropriate survey for a project in the State of Hawaii. I urge its adoption.

The PRESIDING OFFICER. All time on the amendment is yielded back.

The question is on agreeing to the amendment of the Senator from Hawaii.

The amendment was agreed to.

Mr. FONG. I thank the Senators from South Dakota and Oklahoma.

The PRESIDING OFFICER. The bill is open to further amendment.

Mr. KERR. Mr. President, I offer an amendment, submitted by both Senators from Mississippi [Mr. EASTLAND and Mr. STENNIS], and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The LEGISLATIVE CLERK. It is proposed, on page 5, following line 4, to insert the following:

Pascagoula Harbor, Mississippi: Modification of the project authorized by the River and Harbor Act of 1954 (Public Law 790, Eighty-third Congress), House Document Numbered 98, Eighty-sixth Congress, to provide for a channel thirty-eight feet deep and three hundred and twenty-five feet wide through Horn Island Pass, thence thirty-five feet deep and two hundred and seventy-five feet wide through Mississippi Sound and up the Pascagoula River to the vicinity of the Ingalls Shipbuilding Corporation, in accordance with plans to be prepared by the Chief of Engineers, at an estimated cost of $850,000, subject to conditions of local cooperation as prescribed by the Chief of Engineers.

Mr. CASE of South Dakota. Mr. President, I yield myself 1 minute.

This project is one which has been mentioned on occasion, at other times, by the Senator from Mississippi. I am not familiar with the details of it. I see no objection to it, in view of its modest cost and with the requirement that local cooperation should be such as prescribed by the Army Engineers. I see no objection to going to conference with the amendment.

I trust, if we go to conference, a memorandum will be prepared for the information of the conferees as to details of the project.

The other amendments we have been agreeing to have been study amendments. This is an amendment for the actual authorization of a project. While it is less than $1 million in cost, I feel, before the conferees meet, we should have a memorandum of the details of the project and comment by the Army Engineers.

Mr. KERR. Mr. President, I yield myself 2 minutes.

I ask unanimous consent that there may be included in the RECORD a statement on the project by the Senator from Mississippi [Mr. STENNIS] and a letter from the Department of the Navy with reference to it.

There being no objection, the statement and letter were ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR STENNIS

MODIFICATION OF PASCAGOULA HARBOR

1. Prior to funds made available in fiscal year 1960, the project for the Pascagoula Harbor, adopted by the Rivers and Harbors Act of March 4, 1913, and modified by the Rivers and Harbors Act of March 4, 1915, and May 17, 1950, provided for a channel 25 feet deep and 800 feet wide to Horn Island Pass, thence 22 feet deep and 225 feet wide across Mississippi Sound and up Pascagoula River to the Louisville and Nashville Railroad bridge.

2. The existing project for Pascagoula Harbor, approved September 3, 1954, provides for a channel 35 feet deep and 325 feet wide through Horn Island Pass, thence 30 feet deep and 275 feet wide through Mississippi Sound and Pascagoula River to the Louisville and Nashville Railroad bridge.

Modification requested: Increase channel depth 3 feet through Horn Island Pass, and an increase of 5 feet through Mississippi Sound and Pascagoula River.

3. Although modification and deepening the channel was authorized in 1954, Federal funds were not available until fiscal year 1960. The urgency of a deeper channel prior to 1960 forced local interests to use their own funds for deepening this important harbor facility, which was authorized by the Omnibus Rivers and Harbors Bill in 1954. In an effort to cope with this overall problem the local government of Pascagoula has spent some $5,250,000 for improving their port facility. This is certainly commendable and emphasizes the competence and willingness of local authorities.

In 1949, local interests provided increased dimensions in the main ship channel from the Gulf of Mexico to the Louisville and Nashville Railroad bridge, at a cost of $739,513.

In 1955, local interests dredged a cutoff channel 18 feet deep through Robertson and Bounds Lakes, along the alinement authorized by the Rivers and Harbors Act of May 17, 1950. The Bayou Cosotte Channel and harbor represent an expenditure by local interests of about $2 million, and public terminal facilities under construction on the west bank of Pascagoula River, when completed, will represent an additional expenditure of about $2 million.

4. The Pascagoula area is the most active industrial area in the State of Mississippi. The largest industry located here is Ingalls Shipbuilding Corporation, which is making ships for the United States, including several submarines, destroyers and transports. This is one of the most popular harbors and shipbuilding corporations in the world. This industry provides employment for approximately 9,000 people in several adjoining counties.

For the past several years ships built by Ingalls have had difficulty in getting out of Pascagoula Harbor. On several occasions the Corps of Engineers has been called upon to make emergency dredges to permit new ships to move out of the harbor. Funds made available last year will be of great assistance, but because of larger ships and submarines being assembled, concern has been expressed as to possible damage to new ships moving out through the harbor. If this condition continues to exist, this important Mississippi industry will lose the opportunity to build Navy ships in the future. At the present time they are building atomic submarines.

This modification is just as necessary and just as simple as having to extend the runway at Tinker Air Force Base in Oklahoma.

Ingalls was not called on to bid on the Polaris submarine; and while other reasons were given for not inviting bids, this inadequate harbor depth could have been a key factor. This modification is essential for adequate clearance of present and future ships which will be assembled here. It is certainly not fair for this important industry to be penalized because of inadequate harbor channel.

5. I have noticed in the press that the omnibus rivers and harbors bill of 1961 has about $65 million for modification, deepening and improving port facilities on the Great Lakes.

6. Our Military Construction Subcommittee approved an item for Charleston Navy Yard, authorizing $12.5 million just to build a new dock for the Polaris submarine.

7. This small modification, which the Engineers estimate to cost $850,000 is essential and will not materially affect present maintenance cost. In view of the exceptionally high local contributions made by the local government of Pascagoula—approximately $5,250,000—for improvement of this port facility, I hope that the Senate will accept and adopt this small modification.

DEPARTMENT OF THE NAVY,
BUREAU OF SHIPS,
Washington, D.C.

Hon. JOHN STENNIS,
U.S. Senate,
Washington, D.C.

MY DEAR SENATOR STENNIS: During our recent telephone conversation you inquired as to the adequacy of channel depths in the vicinity of the Ingalls Shipbuilding Corp. at Pascagoula, Miss., in light of plans for future naval ship construction.

As you know, the inner channel extending from Pascagoula Harbor to Horn Island Pass has been dredged to approximately 30 feet in depth and the outer channel has been similarly deepened to approximately 35 feet. These depths are sufficient to accommodate Navy ships now under construction at Pascagoula. Naval ships of the foreseeable future for which Ingalls might be a competitor, probably will require a channel depth of approximately 35 feet.

I trust that this information will be helpful to you.

With kindest regards.

Sincerely yours,

R. K. JAMES,
Rear Admiral.

Mr. KERR. Mr. President, with reference to this amendment, it provides for the deepening of a channel which now comes into the harbor at Pascagoula. The purpose of it is to make it possible for a great shipbuilding company at Pascagoula to be able to be competitive in its bids for the building of certain ships or submarines by the Navy which, without this change or addition and improvement to the harbor, it could not do. With this improvement to the harbor, it will become the first shipbuilding company on the Gulf of Mexico that will have a harbor facility which will enable it to be competitive with other shipbuilding companies located in harbors elsewhere in our country with facilities which enable them to be competitive in bidding for this work.

Mr. CASE of South Dakota. Mr. President, I yield back my time.

The PRESIDING OFFICER. All time on the amendment has been yielded back.

The question is on agreeing to the amendment of the Senator from Oklahoma [Mr. KERR].

The amendment was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment.

Mr. LUSK. Mr. President, I offer amendments which I send to the desk and ask to have stated.

The PRESIDING OFFICER. The amendments offered by the Senator from Oregon will be stated.

The LEGISLATIVE CLERK. It is proposed, on page 58, between lines 6 and 7, to insert the following:

SEC. 211. The Detroit Dam and Reservoir on the North Santiam River, Oregon, authorized by the Flood Control Act of June 28, 1938 (Public Law 761, Seventy-fifth Congress), shall be known and designated hereafter as the Douglas McKay Dam and Reservoir. Any law, regulation, map, document, record, or other paper of the United States in which such dam and reservoir are referred to as the Detroit Dam and Reservoir shall be held to refer to such dam and reservoir as the Douglas McKay Dam and Reservoir.

On page 58, line 7, in lieu of "211", it is proposed to insert "212".

The PRESIDING OFFICER. How much time does the Senator from Oregon yield to himself?

Mr. LUSK. One minute.

The purpose of the amendment is to name the dam in western Oregon on the west slope of the Cascade Mountains now known as the Detroit Dam after the late Douglas McKay.

Mr. President, I shall make a brief statement about Douglas McKay. He was born in Portland, Oreg., in 1893. He served as mayor of Salem, Oreg. He served several terms in the Oregon State senate, and as Governor of Oregon from 1949 to 1953. He was appointed Secretary of the Interior January 21, 1953, and resigned from that position in May 1956. He was appointed chairman of the International Joint Commission in August 1957, and served until his death, July 22, 1959.

Mr. McKay was a distinguished political leader of Oregon for more than a quarter century. He was always interested in the development of the natural resources of the Nation, particularly the water resources. He was Governor of Oregon during the time the major projects in the Columbia River Basin were authorized. In his capacity as chairman of the International Joint Commission he served with distinction, and he deserves much of the credit for the progress which has been made in reaching an understanding with Canada with respect to the use of the Columbia River waters.

It is believed to be fitting that the Detroit Dam and Reservoir be named for Mr. McKay in recognition of his long and outstanding service to the State of Oregon, to the Pacific Northwest, and to the Nation.

Mr. President, I have discussed the amendment with the distinguished chairman of the subcommittee of the Committee on Public Works, and I trust the amendment will be accepted by him.

Mr. CASE of South Dakota. Mr. President, I yield myself 1 minute.

Mr. President, so far as the Senator from South Dakota is concerned, it is a pleasure to urge acceptance of the amendment. Douglas McKay was a man of the West. He was a great patriot. His death was untimely, due in part to injuries which he sustained in the service of his country. He had a great career in public life in the State of Oregon and in the Nation's Capital. I am pleased to see the amendment offered by the distinguished Senator from Oregon, and I urge its adoption.

Mr. KERR. Mr. President, I yield myself 1 minute.

I have no objection to the acceptance of the amendment.

Mr. President, I yield back the remainder of my time.

Mr. CASE of South Dakota. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. All time has been yielded back. The question is on agreeing to the amendment offered by the Senator from Oregon [Mr. LUSK].

The amendment was agreed to.

Mr. HART. Mr. President, will the Senator yield?

Mr. KERR. Mr. President I yield 2 minutes to the Senator from Michigan.

Mr. HART. Mr. President, I thank the senior Senator from Oklahoma for his leadership in developing title III of the bill before us. This title recognizes the urgent and increasing recreational need throughout the United States. Since I come from a State rich in recreational opportunities, and serve with the Senate Select Committee on National Water Resources, of which the Senator from Oklahoma [Mr. KERR] is chairman, I have become increasingly convinced that we are entering a period in which recreational demand is going to be such that we must give new recognition to this use of our natural resources. It will be one of my prime interests in the 87th Congress to participate in preparation of a legislative basis for meeting the national need for recreational opportunities.

Title III applies, quite properly, only to projects of the Corps of Engineers and the Reclamation Bureau, and only to the extent that recreation is applicable to their primary purposes of navigation, flood control, irrigation and hydroelectric power. Also quite appropriately, title III limits its application to minimum basis facilities. It is an urgently needed, timely step. It is my hope that the Congress will approve this statement of policy, and that next we shall move on to a program which looks to the full development of our recreational opportunities.

In this connection, I commend the author of title III specifically for recognizing in it the fact that cooperation between the Federal Government and non-Federal interests is essential. This same principle will be of the utmost importance in the drafting of legislation for the broader program which must come in light of forseeable need. Title III is a fine contribution to the bill before us. I hope it is widely appreciated and supported.

Additionally, Mr. President, I commend the senior Senator from Oklahoma for the leadership which has resulted in section 206 of the bill before us. Here the Corps of Engineers is authorized to compile and disseminate information on areas subject to inundation by floods. This section specifies that the information shall be made available only upon the request of a State or responsible local governmental agency. This limitation is wise since there are many facets to this problem which will need further study. For example, there is the problem of what use should be made of property identified as subject to inundation by floods; and there are matters of Federal-State-local governmental and nongovernmental relationships carefully to be worked out. I welcome the inclusion of this section in the bill. It will put us on the track to working out one of the thorny problems in the water resources field. Again I thank the Senator.

Mr. HOLLAND. Mr. President, will the Senator yield me 3 minutes?

Mr. KERR. Mr. President, I yield 3 minutes to the Senator from Florida.

The PRESIDING OFFICER. The Senator from Florida is recognized for 3 minutes.

Mr. HOLLAND. Mr. President, I wish to express my very deep appreciation, as well as that of my colleague and of the people of the State of Florida generally, to the distinguished Senator from Oklahoma, the Senator from South Dakota, and the other members of the committee on both sides of the aisle, for the careful and meticulous way in which they have worked out the several problems relating to Florida which were involved in the work of the committee and which are now covered by the provisions of the bill.

Mr. President, there were an unusually large number of favorable reports from the Corps of Engineers during the period following the approval of this bill by the House of Representatives. The distinguished chairman of the committee and the members of the committee handled all those reports very carefully and helpfully. I am certainly grateful to them for their action.

Mr. President, in addition, there are two unusual items in the bill to which the distinguished chairman and his committee gave attention, and which I think they handled in a very fine, fair, and understanding manner. One of those is the provision whereby the dike around Lake Okeechobee is designated as the Herbert Hoover dike. This was the request of all the local units of government in the area affected, both municipalities and counties, and also the request of the State of Florida through the Governor and members of the cabinet of our State.

Mr. President, in order that the RECORD may at least reflect the facts about this incident, I ask unanimous consent that a portion of the report, the paragraph at the top of page 132 dealing with this subject, be printed in the RECORD.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

CHANGES IN DESIGNATION, LAKE OKEECHOBEE LEVEES

Disastrous floods caused by hurricanes in 1926 and 1928 cost the lives of about 2,500 persons in the Lake Okeechobee area,

particularly around its south shore. It is understood that President Herbert Hoover visited the area and within a short time secured congressional authorization for Federal improvement of the inadequate flood-control structures around the lake. Local interests and State officials now desire to designate the levees around Lake Okeechobee as the Herbert Hoover dike, to commemorate his humanitarian efforts and interest in public safety, which permitted the safe development of the rich potential of this region. The committee believes it fitting that the desires of the people of Florida be fulfilled and that the levees around Lake Okeechobee bear the name of this great American.

Mr. HOLLAND. Mr. President, we had two disastrous floods during hurricanes, one in 1926 and one in 1928.

The flood in 1926 took the lives of about 300 citizens of our State at and near the little village of Moore Haven on the west shore of the lake. The flood of 1928, again during a hurricane, took the lives of some 2,200 citizens of our State, in the neighborhood of Belle Glade, Pahokee, and South Bay, on the southeast side of the lake.

President Hoover was very helpful to our Senators, to our Representatives, and to the people of Florida in taking a direct and personal interest in the disaster, and in helping to have legislation promptly passed through the Congress, following which the levees were speedily built. We merely wish to make sure that his very important part in this effort be not forgotten, which is the occasion for the request, Mr. President. The citizens in the protected area have been safe from hurricanes and floods since the dikes were constructed.

The other item which was handled so ably by the distinguished Senator and his committee concerned the conveyance of property. Originally, when the cross-State canal in Florida was authorized by Congress, it was intended to be a ship canal or a sea level canal which would require a very wide right-of-way. The ship canal authority of our State, seeking to meet its obligations under that venture bought and conveyed to the U.S. Government quite a large acreage of land. Some of the land is still required under the modified program, which provides for a barge canal only, which does not require nearly so wide a right-of-way.

The Corps of Engineers recommended, and the committee approved, a provision in the bill, section 104 of title I, by which it is directed that lands not needed under the new project can be reconveyed to the ship canal authority of Florida, provided the lands will be used solely to enable that authority to purchase other needed lands, which condition, of course, will be meticulously observed.

Mr. President, I thank the distinguished Senator. I realize it has not been easy in this very busy session to find time for things of this kind, which nevertheless are highly important and could not be handled other than by legislation. The Senator has been kind. He has been patient. He has been thoughtful. He has been considerate. I thank him and all the other members of the committee.

Mr. KERR. Mr. President, I yield myself 1 minute.

The PRESIDING OFFICER. The Senator from Oklahoma is recognized for 1 minute.

Mr. KERR. Mr. President, I express my appreciation not only to the distinguished Senator from Florida [Mr. HOLLAND] but also to the distinguished Senator from Michigan [Mr. HART].

It was my great pleasure, when I came to the Senate, to become a member of the Committee on Public Works. At that time the Senator from Florida was one of its very able members. It was from him that I learned a good deal of what I may know about the work of the committee. I appreciate what the Senator has had to say.

Mr. President, I yield 3 minutes to the Senator from West Virginia [Mr. RANDOLPH].

The PRESIDING OFFICER. The Senator from West Virginia is recognized for 3 minutes.

Mr. RANDOLPH. Mr. President, our colleague, the scholarly and sincere Senator from Arkansas [Mr. FULBRIGHT] is necessarily absent from the Chamber during the consideration of the rivers and harbors-flood control authorization measure. He requested me to present on his behalf a statement, in which he speaks not only of the objectives of the merited legislation, but also expresses his commendation of the services of the Senator from Oklahoma [Mr. KERR], who is in charge of the bill.

Mr. President, I ask unanimous consent that the statement of the Senator from Arkansas [Mr. FULBRIGHT] be made a part of the RECORD at this point.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR J. W. FULBRIGHT

I commend the chairman and the members of the Public Works Committee for their efforts on this authorization bill. They have done a great service to the Nation in bringing out this sound, constructive bill for the development of our water resources. The distinguished Senator from Oklahoma, Mr. KERR, deserves a special vote of thanks from conservationists everywhere for his tireless work in guiding the subcommittee's deliberations on this measure. The people of Arkansas, I know, are grateful for his vision and foresight on conservation matters. He has been a good friend to our State in cooperating on our water projects. I congratulate him on doing his usual outstanding job on an authorization bill.

The passage of this bill will represent another giant step toward the ultimate objective of achieving maximum benefits from all our water resources. We are just beginning to develop a nationwide awareness of the importance of water to our economy. It is unfortunate that we have neglected so long the development of this essential aspect of our economy. Growing water shortages in many areas and serious flooding in others have created a new awareness of the need to devote more effort toward solving the difficult problems of having too much or too little water. The wisdom of our Nation's past efforts at water control and conservation are proved anew year after year. The floods in the Missouri, Ohio, and Mississippi Basins, as well as in my own State, this spring demonstrated the economic soundness of our previous investments in flood control works in those areas.

The projects in this authorization bill will strengthen the Nation's economy and place our country in a better position to meet the demands of the future.

Arkansas fared well in this bill and I should like to discuss briefly some of the State's projects included in it.

The Ouachita River navigation project promises to open a new era of progress for all South Arkansas. The modernization of the existing 6½-foot channel has been urgently needed for years. The existing navigation channel and locks are woefully inadequate for modern barge traffic. We have worked for years to get started on the needed improvements and, with this authorization, the end is almost in sight.

South Arkansas is an area with rich potential. It has everything that industry needs and wants with the exception of adequate water transportation. The completion of the proposed project will make this one of the most attractive industrial areas in the country. I am not only very pleased that the committee recommended authorization of the project but also that it recognized the need for locks of sufficient size to accommodate modern barges. The review of this aspect, as recommended by the committee, will, I hope, result in increasing the lock size to 600 feet. Such locks are needed in order that the project not be outdated before construction is completed.

The committee also recommended authorization of the McKinney Bayou and Maniece Bayou projects in southwest Arkansas. Both of these bayous are tributaries of the Red River and construction of the recommended improvements would protect large sections of rich agricultural land from periodic flooding. The projects have excellent benefit-cost ratios. I know that the citizens of the affected areas will be grateful for the committee's sympathetic consideration of their problems.

The recommended plan for realinement of the channel of the Red River near Garland City, Ark., will save a railroad and a highway bridge as well as eliminate the threat to the city itself.

A real emergency exists because of the continued recession of the right bank of the river and I am pleased that the committee recognized the seriousness of the situation.

The plan of recommended improvements for the Village Creek, White River, and Mayberry levee districts project in Jackson County, Ark., represents the most logical approach to solving the flood control problem in that area. The plan recommended by the committee, and supported by the local interests, will eliminate 95 percent of the flood damages in the district whereas the plan recommended by the Corps of Engineers would eliminate only about 45 percent. The committee properly viewed this project as a modification of existing flood control works along the White River, with the entire plan figured as a unit. I am glad that the committee considered this relationship and approved the plan which will provide maximum benefits.

The committee has also increased the Arkansas and White River Basin authorizations by amounts sufficient to permit sound progress and budgeting for the next 3 years. This action will insure that there will be no delays because of authorization difficulties in proceeding with these basinwide projects so important to my State.

I commend the committee on its recommendation that additional emphasis be placed on the recreational aspects of water projects. For many years I have favored the computation of recreational benefits in project feasibility determinations. The citizens of Arkansas appreciate the contributions to the State's economy from the tourists and fishermen who visit our reservoirs.

Last year over 7 million visits were made to Corps of Engineer reservoirs in Arkansas. Recreation is big business, not only in Arkansas but everywhere. And it is only logical that recreational facilities should be included in a project where practical and the benefits and costs for such features computed accordingly. Our outdoor recreational facilities are already overcrowded and the situation will undoubtedly become worse as increasing leisure time is available to our people. Each Federal water project should be constructed so that maximum recreational benefits are derived from it. I am very pleased at the prospect of establishing this goal as a policy of the Congress.

This is a good bill from the standpoint of Arkansas and the Nation. I hope that it will be possible to obtain funds during this session of Congress to initiate work on many of the projects. I will certainly do everything I can to accomplish this. I again want to commend the committee members for their fine work in bringing out such a constructive piece of legislation. Future generations will be grateful for your action.

Mr. RANDOLPH. Mr. President, I wish to embrace the thinking of the Senator from Arkansas as expressed in the statement I just inserted in the RECORD. The control of water that floods may be prevented, that natural resources may be conserved, that a pure supply may be provided to growing populations—with resulting benefits for necessary recreation—is highly desirable to our Nation's growth and the well-being of our people.

It has been a genuine privilege for me to serve on the subcommittee of which the Senator from Oklahoma [Mr. KERR] is the dynamic and forward-thinking chairman. I have learned from his leadership, and I have also admired the careful efforts of Senator CASE of South Dakota in our Subcommittee on Rivers and Harbors-Flood Control and our full Committee on Public Works. The committee, chairmaned by the friendly Senator from New Mexico [Mr. CHAVEZ], is charged increasingly with the consideration of legislation important to the strengthening of the natural resources of America so that they may be blessings for future generations, rather than to have them deteriorate into blights on the Nation's tomorrows.

Mr. President, the gravity of our water pollution threat makes it imperative that the Federal Government move as rapidly as possible in solving what has long since ceased to be an exclusively local or State problem.

The water of this country can and must be improved for public water supply, propagation of aquatic life and other wildlife, for recreation, agricultural, industrial, and other legitimate uses—but importantly, of course, for the protection of public health.

Water is an old friend and a most valuable servant as well. Today we are making more demands upon this valuable servant than ever before; for home uses, for the production of hydroelectric power, for irrigation of arid lands, for transportation, and, of course, for industrial needs. Then, too, we use water to carry away the wastes from our homes, cities, and industries. This use has always been important, but as the population increases and as more industries are spawned along our streams, this use—for carrying away wastes—actually is threatening to cut down or completely prevent our other significant uses.

Let us not forget, Mr. President, that water has indeed been humanity's good friend. We have allowed ourselves to neglect and mistreat it too long, but in this legislative action, and by our cooperation back home, we are finding that it is not too late to translate neglect into positive growth and mistreatment into affirmative frontiers.

Mr. KERR. Mr. President, I yield to myself 30 seconds. I am very grateful to the Senator from West Virginia for his kind remarks, and I am happy to say that one of the pleasures that I have on the committee is the opportunity to work day by day with him, and to have the benefit of his clear thinking and devoted service to the committee and its purposes.

Mr. LONG of Louisiana. Mr. President, I offer an amendment, which I send to the desk and ask to have stated.

The PRESIDING OFFICER. The amendment offered by the Senator from Louisiana will be stated.

The LEGISLATIVE CLERK. On page 19, line 13, it is proposed after the word "to", to strike out "established harbor areas" and insert "harbor areas heretofore or now established and".

Mr. LONG of Louisiana. Mr. President, the amendment is purely in the nature of a clarifying amendment, because it contains the purpose of a bill which I had introduced to provide that cities which had harbors on rivers and which were deprived of the right to have such harbors by way of flood control structures or by the shift of the river might be in a position to have channels to bring access to the river for navigational purposes.

Mr. KERR. Mr. President, I think the amendment is purely clarifying. I think the amendment expresses the purpose of the committee in the bill as it was prepared and accepted, and is before the Senate, and I think the acceptance of this amendment is appropriate.

Mr. LONG of Louisana. Mr. President, I express the gratitude of the State of Louisiana for the consideration and the help that the distinguished Senator from Oklahoma has given to all States on flood control and navigation projects in the bill. In our judgment he has done a magnificent job. He has been very fair and he has respected the interests of the Nation.

Adoption of the bill will improve and strengthen this Nation.

The PRESIDING OFFICER. Without objection, all time is yielded back.

The amendment was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment of the amendments and the third reading of the bill.

The amendments were ordered to be engrossed, and the bill to be read a third time.

The bill was read the third time.

Mr. DIRKSEN. Mr. President, I appreciate the difficulties that we had with the authorization bill on rivers and harbors last year and perhaps the year before. It is likely that we may have the same difficulty again. I am in a very awkward position for a number of reasons.

The Budget Bureau has pointed out some projects that are objectionable, the first and largest of which is a project in which I have a deep and abiding interest.

I say to the distinguished chairman of the subcommittee, the Senator from Oklahoma [Mr. KERR] and my friend and associate from South Dakota [Mr. CASE] that I shall be forever deeply grateful for their kindness in including an Illinois Waterway project for the enlargement of three locks and dams in the hope that we can accommodate the Great Lakes commerce that will be generated by the Seaway.

Now I discover that among the projects on which the Budget Bureau has expressed hope that there would be deferral is one in which I am most interested. Incidentally, it is the largest project on the list, being in the amount of $114,652,000.

Mr. President, a soldier has no business to complain. He takes the bitter with the sweet, and when he carries the flag, he carries it through thick and thin, in light and dark, and if that is the way it must be, then that is the way it must be. My hopes and aspirations with respect to this project must at least momentarily fall by the wayside.

There are 12 projects to which opposition has been registered. They aggregate $115 million. I think of that number there were five which both the Bureau of the Budget and the Chief of Engineers opposed. There are three projects which the Bureau of the Budget has recommended not be authorized on the basis proposed in the bill. There are 10 projects estimated at a cost of $81 million which have not yet been reviewed and reported on by the Bureau of the Budget under established budget policies.

Then I believe there are 17 projects which do not conform to the uniform cost-sharing standards of flood control projects, in the sum of $181 million.

Under the circumstances I simply must say that I am in an extremely awkward position. I am terribly distressed. But I have no business to complain because in my entire congressional and senatorial career I have opposed the projects of others and attempted to remove them from bills. So if perchance through the recommendations of the President, the Corps of Engineers, and the Bureau of the Budget, the bill is vetoed because my project is at the head of the list, the largest and seemingly the one objectionable project that ought to be deferred, then I must abide the result and be content. But I feel compelled and constrained to make the record.

In connection with my remarks I ask unanimous consent to have printed in the RECORD at this point in my remarks a statement in amplification, a summary, a breakdown of the projects, and some details thereon.

The PRESIDING OFFICER. Without objection, it is so ordered.

There being no objection, the statements were ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR DIRKSEN REGARDING EXECUTIVE BRANCH OBJECTIONS TO CERTAIN PROVISIONS IN H.R. 7634

I should like to invite attention of the Senate to certain water resources projects which would be authorized under H.R. 7634 and to summarize its general provisions. As this bill passed the House it included only projects which had been cleared by the Bureau of the Budget without objection as to their relationship to the President's program. There were seven of these projects which the Bureau of the Budget had recommended be deferred until Congress had an opportunity to consider the recommendations made by the President in his 1960 budget message to establish uniform cost-sharing standards for flood control projects. Aside from this question of local cost sharing there appeared to be no basic difference between the administration's recommendation and the action proposed by the House.

The bill now before the Senate differs sharply from that passed by the House. It includes five project authorizations which both the Bureau of the Budget and the Chief of Engineers have recommended against; three projects which the Bureau of the Budget has recommended not be authorized on the basis proposed in the bill; and two project modifications which are in conflict with the President's policies, although the executive branch position has not been formally solicited. These 10 project authorizations and modifications would cost about $150 million.

In addition, the bill also proposes the authorization of 10 projects, estimated to cost $81 million, which have not yet been reviewed and reported on by the Bureau of the Budget under established policies governing the review and clearance of water resources projects. These procedures were established to assure that both the President and the Congress had complete information on which to base their action on individual projects. You may recall that this deficiency was one of the important reasons leading to the President's two successive vetoes of the last omnibus legislation authorizing appropriations for rivers and harbors and flood control improvements.

There also have been added to the House bill 17 projects which do not conform to the uniform cost-sharing standards for flood control projects recommended by the President in both his 1960 and 1961 budget messages. These 17 projects, together with the 7 previously included by the House involve an estimated total cost of about $186 million. Present laws require Federal agencies to conduct various programs involving flood control under different and inconsistent cost-sharing standards. Some local groups are required to make substantial contributions for flood control while others are required to make little or none. For example, the cost sharing required for projects included in the bill ranges from no contribution to a contribution as high as 58 percent. Certainly there should be an equitable basis for determining cost sharing. It should also apply uniformly to all water resources projects, irrespective of the Federal agency that constructs or finances the project.

Aside from those sections of the bill dealing with specific project authorizations, I would like to direct attention to its general provisions. In title III, provision is made for the evaluation of recreational benefits associated with the water resources projects of the Corps of Engineers and the Bureau of Reclamation. It is my understanding that this title has been opposed consistently by the Bureau of the Budget and other affected executive branch agencies both in written and oral representations to the Senate Public Works Committee.

The bill would permit currently uneconomical projects to be justified for authorization by assigning a share of project costs to recreation and thus reducing costs assigned to other purposes, both reimbursable and nonreimbursable. This bill would also enact piecemeal legislation dealing with water resources recreational problems which should be deferred pending consideration of the comprehensive report of the Outdoor Recreation Resources Review Commission.

It should be noted that this Commission was established by the Congress; that the Senate, as well as the House, is represented on the Commission; and that $2.5 million has been authorized for its work. The Commission's report should be available next year and should provide the information needed to frame constructive legislation dealing with recreation not only as it applies to the Corps of Engineers and the Bureau of Reclamation but all other Federal agencies involved in this growing and important field.

It is also important to note that the recreational features of the bill will result in a heavier burden for the general taxpayer since the costs assigned are nonreimbursable. No cost information is contained in the report and the effect of this bill on the Federal budget is therefore unknown.

Another general provision of the bill (title IV) deals with land-acquisition policy. It would (a) declare the policy of Congress that owners of property acquired by the United States should be paid a fair and equitable amount and be compensated for actual losses, (b) authorize establishment of a joint executive branch-congressional Commission to study problems of compensation for property acquired by the United States and report by December 31, 1962, on recommendations for amending existing Federal law and for administrative action to carry out the policy of Congress, and (c) authorize payment of up to 20 percent, but not over $25,000, above fair market value for property acquired for Corps of Engineers projects through June 30, 1963.

Both the statement of policy and the establishment of a joint executive branch-congressional Commission appear to be sound. However, the establishment of an interim additional payment policy for the Corps of Engineers is not sound. It would create an undesirable precedent and would tend to prejudge the findings and recommendations of the Commission established under this title. Until the recommendations of the Commission are available no action should be taken by the Congress to further complicate an already difficult problem. Here again there is no basis for determining the cost of this provision since no financial information is included in the report.

In summary, I think it important to point out that a review of H.R. 7634 discloses even more of the shortcomings that on two previous occasions led to Presidential disapproval of omnibus rivers and harbors and flood-control bills.

Comparison of S. 497 as vetoed in 1958 by the President and H.R. 7634 as reported by Senate Public Works Committee

[In millions of dollars]

	S. 497				H.R. 7634

Analysis of H.R. 7634, omnibus rivers and harbors and flood control bill, as reported by Senate Public Works Committee—Items to which executive branch has some objection

I. Items which the Bureau of the Budget recommends not be authorized or authorized with amendments (see following explanation):

	Federal cost authorized by H.R. 7634
1. Illinois Waterway (duplicate locks), Ill. and Ind.	$114,652,000
2. Natchez Harbor, Miss.	350,000
3. Village Creek, White River, and Mayberry levee districts, White River, Ark.	1,322,000
4. Coralville Reservoir, Iowa (Mehaffey Bridge)	1,180,000
5. Gering and Mitchell Valleys, Nebr.	
6. Fort Randall Dam, S. Dak. (free highway bridge)	$6,375,000
7. Payments to Bismarck and Mandan, N. Dak.	956,753
8. Laurel Reservoir, Ky.	22,077,000
9. West Branch Mahoning River, Ohio	1,970,000
10. Tahchevah Creek, Calif.	1,658,000
11. Water resources recreation (title III).	
12. Land acquisition policy (title IV).	
Total	150,540,753

Analysis of H.R. 7634, etc.—Continued

Analysis of H.R. 7634, etc.—Continued

EXPLANATION

1. Illinois Waterway, Ill. and Ind. (duplicate locks):

Project description: Federal construction of seven duplicate locks on the Illinois Waterway, which connects Chicago with the Mississippi River.

Cost and benefit-cost ratio: Federal, $114,652,000; non-Federal, none.

Benefit-cost ratio: from 1.8 to 7.5 for individual locks; 4.9 for entire project.

Executive branch recommendations: Chief of Engineers recommended authorization as proposed in H.R. 7634. Bureau of the Budget recommended against authorization at this time.

DISCUSSION

(a) Corps report estimates existing locks will reach capacity to move growing waterway commerce in 1968 for first 2 locks and in 1977 for last 3 locks. Growth of commerce projected by Corps on basis of increases since 1935 when channel to Chicago was opened. Though continued growth is indicated, rate projected by Corps may be optimistic.

(b) Corps report assumes no further increase in present lock capacities in terms of average tons per lockage, though this has increased dramatically since 1937. Further increase is believed possible in view of continued trend toward more efficient waterway equipment.

(c) On basis of Corps report authorization is 8 to 17 years in advance of need. Adjustment of factors as discussed above would make need even more remote. In either case authorization would be premature. Bureau of the Budget urged review and further report 5 years in advance of most optimistic estimate of need (1963).

Issue: $115 million Federal investment should not be authorized 8 years in advance of optimistic estimate of need.

2. Natchez Harbor, Miss.:

Project description: Federal construction of levee around area subject to flooding to permit development of port and terminal facilities at Natchez.

Cost and benefit-cost ratio: Federal, $350,000; non-Federal, $260,000. Benefit-cost ratio, 3.95.

Executive branch recommendations: Chief of Engineers recommended no Federal project be adopted. Bureau of the Budget concurred in Chief of Engineers' recommendation and recommended against project authorization.

DISCUSSION

Mississippi River Commission recommended authorization of project as proposed in H.R. 7634.

Chief of Engineers in reviewing Commission report found that Natchez was located on a reach of the river where access from the existing navigable channel is now available as a result of satisfactory natural depths, making possible the realization of potential savings by the provision of necessary terminals. He cited the long established principle of waterway development that the Federal Government provides the navigable channels and that local interests construct the land side facilities. He expressed the belief that this policy is a sound one and that there were no special circumstances warranting a departure therefrom in the case of Natchez Harbor.

Issue: Construction of landside port and terminal facilities—traditionally a local responsibility—should not be authorized as a Federal project.

3. Village Creek, Ark.:

Project description: Federal construction of channel improvements and pumping station for protection of about 21,000 acres of farmland from flood damage.

Cost and benefit-cost ratio:

(a) Plan I (recommended by Chief of Engineers): Federal, $295,000 (48 percent); non-Federal, $323,000 (52 percent). Benefit-cost ratio, 1.8.

(b) Plan III (as provided by H.R. 7634): Federal, $1,322,000 (80 percent); non-Federal, $329,000 (20 percent). Benefit-cost ratio, 0.62 (on basis of increment over plan I).

Executive branch recommendations: Chief of Engineers recommended authorization of plan I. Bureau of the Budget advised Army no objection to plan I.

DISCUSSION

District Engineer evaluated three alternative flood protection plans. All plans produce the same benefits in areas where ponding of runoff does not now occur. Plans II and III, by including pumping plants, decrease losses in a 3,600-acre area subject to ponding of runoff by 88 percent and 97 percent respectively, compared with 42 percent for plan I. Plans II and III would produce greater benefits than plan I but not enough to justify additional costs as indicated in tabulation below:

	Federal cost	Local cost	Benefit-cost ratio
Plan I	$294,000	$323,000	1.8
Plan II	1,072,000	316,000	1.09
Increment over I			.58
Plan III	1,322,000	329,000	1.03
Increment over I			.62

Based on this analysis the district engineer and the Chief of Engineers recommended authorization of plan I.

While local interests strongly urged adoption of plan III they did not reject plan I.

Issue: A project plan which is not economically justified should not be authorized.

4. Coralville Reservoir, Iowa (Mehaffey Bridge):

Project description: Federal construction of a highway bridge across the existing Coralville Reservoir to replace a bridge removed during construction of the reservoir.

Cost: Federal $1,180,000; non-Federal, bridge approaches and land (no cost estimate).

Executive branch recommendations: Secretary of the Army recommended amendment to require contribution by local interests in amount determined by the Secretary of the Army to be equitable. Bureau of the Budget: Same as Secretary of the Army.

DISCUSSION

Mehaffey Bridge across the Iowa River was built prior to 1900. It was removed during construction of Coralville Reservoir pursuant to 1954 agreement with Johnson County. The county then agreed that traffic did not warrant relocation of the bridge at a higher level.

Later local interests argued that development of the area had increased traffic significantly and that a bridge was now justified. The Corps agrees.

In 1959 the Bureau of the Budget recommended against authorization of the bridge on the grounds that the county had agreed to removal of the bridge and that the United States therefore had no legal liability to share in the cost of replacement. However, additional information from local interests and the Corps indicates that there may be equitable considerations which warrant a degree of Federal participation. The Bureau indicated that further study was justified and that there would be no objection to authorization of Federal participation in an amount determined to be equitable by the Secretary of the Army.

Issue: Federal replacement of a bridge removed pursuant to agreement with local interests should not be authorized without proper recognition of local responsibility.

5. Gering and Mitchell valleys, Nebraska:

Project description: Project for protection of farmland in Gering Valley was authorized by Flood Control Act of 1958. Because of changed physical conditions resulting from flood damage in 1958, reformulation of the project is necessary. H.R. 7634 would authorize modification of the project as found necessary by the Chief of Engineers: "*Provided*, That construction shall not be initiated until the Chief of Engineers shall submit a feasibility report—for the approval of the Public Works Committees of the Congress."

Cost and benefit-cost ratio: Present estimated Federal cost of authorized project is $1,470,000; cost and benefit-cost ratio of modification not known.

Executive branch recommendations: No recommendations have been formally requested by the Congress.

DISCUSSION

(a) The proviso quoted above implies that both Public Works Committees must approve the Chief of Engineers' feasibility report prior to starting construction of the project. The proviso is open to the objection that it involves an unlawful delegation by the Congress to its committees of a legislative function, which the Constitution contemplates the Congress itself should exercise.

If approval or disapproval by the committees is considered not legislative in nature, then there appears to be an unconstitutional infringement of the separation of powers prescribed in Articles I and II of the Constitution. It is believed that the Congress cannot validly delegate to its committees the power to prevent Executive action taken pursuant to law. In this case responsibility would be divided between the Secretary of the Army and the designated committees. This would be a clear violation of the separation of powers within the Government and would destroy the lines of responsibility which the Constitution provides.

The President has consistently opposed legislation authorizing a veto by congressional committees of otherwise authorized Executive action.

(b) In addition, no project report recommending modification of the authorized project has been submitted to Congress under established procedures.

Issues:

(a) Legislative provisions authorizing a veto by congressional committees of otherwise authorized Executive action are opposed by the President.

(b) No project report on which to base a modified authorization has been submitted to Congress under established procedures.

6. Fort Randall Reservoir, S. Dak. (free highway bridge):

Project description: Federal construction of a highway bridge across the existing Fort Randall Reservoir to replace a bridge removed during construction of the reservoir.

Cost: Federal, $6,375,000; non-Federal, bridge approaches and lands (no cost estimate).

Executive branch recommendations: Secretary of the Army was opposed to authorization. Bureau of the Budget recommends against authorization.

DISCUSSION

In planning the relocation of the several State and Federal highways affected by the construction of Fort Randall Dam and Reservoir, the Corps of Engineers worked closely with the South Dakota Highway Commission. With respect to the former Missouri River crossing at Wheeler, the State highway commission elected not to locate a highway crossing in the vicinity of Wheeler, but to provide a highway crossing on the crest of Fort Randall Dam. Accordingly, the Government contracted with the State of South

Dakota in 1948 to design and construct at Federal expense a highway crossing on Fort Randall Dam.

The Department of the Army considers that with the construction of the highway crossing at Fort Randall Dam, the Goverment was relieved of any further responsibility for providing a river crossing in the vicinity of Wheeler. The Bureau of the Budget concurred in the views of the Department of the Army.

Issue: Federal construction (as a replacement) of bridge removed and relocated at another site pursuant to agreement with State should not be authorized.

7. Payments to Bismarck and Mandan, N. Dak.:

Project description: Federal contribution toward construction of sewage treatment plants at Bismarck and Mandan.

Cost: Federal, $956,753 (75 percent); non-Federal, $318,918 (25 percent).

Executive branch recommendations: Secretary of the Army was opposed to authorization. Bureau of the Budget recommended against authorization.

DISCUSSION

Army report indicated that construction of Federal dams on the Missouri River will have no adverse effects on pollution in the Missouri River at Mandan and Bismarck. Moreover, it indicated that operation of Garrison Dam will have a beneficial effect on pollution caused by disposal of raw sewage into the Missouri River by the two cities because the river's natural irregular flow will be replaced by a relatively regular flow.

While many cities have been assisted in providing necessary sewage treatment facilities through the waste treatment construction grant program administered by the Public Health Service, this authorization would constitute a radical departure from established policy that construction of local pollution control works is primarily a State and local responsibility.

Issue: Federal financing of 75 percent of the cost of local sewage treatment plants is not warranted in the absence of a showing of damage by Federal activities.

8. Laurel Reservoir, Ky.:

Project description: Federal construction of a dam on Laurel River for power and recreation.

Cost and benefit-cost ratio: Federal, $22,077,000; non-Federal, none. Benefit-cost ratio: 1.1.

Executive branch recommendations: Chief of Engineers recommended authorization as provided in H.R. 7634.

Bureau of the Budget recommended against authorization unless authorizing language specifically provides that construction shall not be started until the power marketing agency has entered into agreement to sell power at rates sufficient to repay power costs in 50 years with interest.

DISCUSSION

(a) The Corps report indicates that annual cost to amortize power allocation in 50 years at 2½ percent interest is $817,900. Based on Bureau of the Budget calculation reducing recreation allocation to specific costs, annual power costs would be over $900,000. Southeastern Power Administration indicates that maximum annual power revenues would be $800,000 if sold to TVA and $740,000 if sold to preference customers. TVA states that Laurel power is not well suited to its needs and would not soon be attractive.

(b) Three million seven hundred thousand dollars of project costs are allocated to recreation though the additional cost of providing for recreation is only $525,000. Considering the speculative nature of the recreation benefits which made this allocation possible, it is considered that only the added costs of providing for recreation should be allocated to that purpose. Such an adjustment would increase the costs allocated to power.

Issue: Authorization of Laurel Dam should include a requirement that power costs be assured for repayment before starting the project, in view of indication from power marketing agency that power costs cannot be repaid.

9. West Branch, Mahoning River, Ohio:

Project description: Would reduce non-Federal share of authorized flood control and low flow regulation project (West Branch Reservoir) from $7,170,000 to $5,200,000. Flood protection and improved water quality and temperatures (for municipal and industrial water) would benefit principally heavy industrial development between Warren and Youngstown.

Cost and benefit-cost ratio: Federal, $9,320,000; non-Federal, $5,200,000. Benefit-cost ratio: 1.33.

Executive branch recommendations: No recommendations have been formally requested by Congress.

DISCUSSION

Trumbull and Mahoning Counties as the principal beneficiaries agreed to assume 49.6 percent of project costs. Mahoning County has approved its bond issue but Trumbull County failed to approve its bond issue. H.R. 7634 would in effect forgive this part of the non-Federal cost and authorize its assumption by the Federal Government. No report by the Corps of Engineers attests to the need and equity of this adjustment.

Issue: Acceptance of part of costs allocated to pollution control as a Federal responsibility is not warranted.

10. Tahchevah Creek, Calif.:

Project description: Federal construction of small reservoir and channel improvement for floor protection at Palm Springs, Calif.

Cost and benefit-cost ratio: Federal, $1,658,000 (75 percent), non-Federal, $552,000 (25 percent). Benefit-cost ratio: 1.18.

Executive branch recommendations: Chief of Engineers recommended authorization as provided in H.R. 7634. Bureau of the Budget recommended against authorization as a Federal project.

DISCUSSION

The Corps report indicated that 75 percent of the property values in Palm Springs which would be protected from floods are in an area which is now undeveloped. Thus, justification for the project depends on a large and speculative future development. The Bureau of the Budget concluded that a project primarily for protection of undeveloped urban areas from a known flood hazard was a local responsibility. It was considered that flood protection costing $2.2 million could easily be financed as a part of a development estimated in the Corps report at $175 million and estimated at even more by local interests. The Bureau, therefore, considered that Federal participation was unwarranted and recommended against authorization.

Issue: A project primarily to protect an undeveloped urban area from a known flood hazard is a local responsibility. Major Federal participation is unwarranted.

11. Water resources recreation (title III):

Description: Title III would authorize (a) a nonreimbursable allocation to recreation of up to 10 percent of the costs of new Corps of Engineers and Bureau of Reclamation projects, with an additional allocation if recreation is found to have national significance, (b) Presidential regulations governing evaluation of recreation benefits, and (c) extension of the 1944 Flood Control Act recreation authority of the Corps to the Bureau of Reclamation.

Cost: No estimate of cost is available.

Executive branch recommendations: Bureau of the Budget recommended against enactment of legislation on this subject.

DISCUSSION

Both in oral testimony and in letters to congressional committees on legislation authorizing recreation development at Federal reservoirs, the Bureau of the Budget has called attention to the study of the Outdoor Recreation Resources Review Commission and indicated that legislation on this subject would be premature prior to the Commission's report and the review of that report by the executive branch and the Congress.

In addition, the Bureau also referred to several objectionable features of previous legislative proposals, which to some degree are also applicable to title III:

(a) A formula for measuring recreation benefits (H.R. 7634 provides for minimum value of 50 cents per visitor day) should not be frozen in law.

(b) Where recreation benefits are local, costs should be borne by State or local government. (H.R. 7634 provides that up to 10 percent of project costs can be assigned to recreation on a nonreimbursable basis whether recreation is local or national in character.)

(c) Joint costs should not be allocated to recreation in view of inadequate measure of benefits. (H.R. 7634 permits allocation of joint costs to recreation.)

(d) Minimum basic facilities for protection of public should be considered project costs and allocated to other project purposes. (H.R. 7634 permits these costs to be included as recreation costs.)

Issues: Authorization of recreation as a purpose of Federal reservoirs is premature pending completion of report by Outdoor Recreation Resources Review Commission and review of report by the President and Congress.

12. Land acquisition policy (title IV):

Description: Title IV would (a) declare the policy of Congress that owners of property acquired by the United States should be paid a fair and equitable amount for their property and compensated for actual losses, (b) authorize establishment of a joint executive branch-congressional Commission to study problems of compensation for property acquired by the United States and report by December 31, 1962, on recommendations for amending existing Federal law and for administrative action to carry out the policy of Congress, and (c) authorize payment of up to 20 percent, but not over $25,000, above fair market value for property acquired for Corps of Engineers projects through June 30, 1963.

Cost: No estimate of cost available.

Executive branch recommendations: In oral testimony the Bureau of the Budget indicated it had no objection to (a) and (b) above but recommended against interim additional payment authority.

DISCUSSION

A study of problems associated with adequate compensation for actual losses of owners of property acquired by the United States is needed. No objection can be raised to authorization of such a study as provided in title IV.

However, authorization for the period during which the study is being made of additional payments in excess of fair market value to owners of property acquired for Corps of Engineers projects is premature. It would tend to establish an undesirable precedent and to prejudge the findings of the study Commission.

Issue: Authorization of interim authority for payments in excess of fair market value for Federal land acquisition is premature at this time and tends to prejudge the conclusions of a study of the problem.

II. PROJECTS ON WHICH REPORTS HAVE NOT BEEN SUBMITTED TO CONGRESS UNDER ESTABLISHED PROCEDURES

Project	Purpose	Federal cost	Remarks
1. Rye Harbor, N.H.	Navigation	$238,000	Final report received by BoB.
2. Ouachita River, Ark. and La.	do	43,550,000	Do.
3. Hilo Harbor, Hawaii	do	7,000,000	No report received by BoB.
4. Missouri River between Sioux City, Iowa, and the mouth (recreation at Decatur Bend), sec. 105.	do	155,000	No report received. Question appropriateness of recreation.
5. Farmington River, Conn. and Mass.	Flood control and water supply.	12,052,000	Advance report received by BoB. Prop. C.S. $500,000 (1 percent), S. 2060 $2,343,000 (30 percent).
6. Pearl River, Miss.	Flood control	3,609,000	Advance report received by BoB. Prop. C.S. $964,000 (22 percent), S. 2060 $1,371,900 (30 percent).
7. Garland City, Ark., bridges	do	1,750,000	No report in process.
8. Gering and Mitchell Valleys, Nebr.	do		No report received by BoB. (See also list I, item 5, on same project.)
9. Sioux Falls, S.Dak.	do	560,000	No report received.
10. Little Sandy River (Grayson Dam), Ky.	do	11,900,000	Final report received by BoB. Prop. C.S. none, S. 2060 $3,570,000 (30 percent).
Total		80,814,000	

III. FLOOD CONTROL PROJECTS ON WHICH NON-FEDERAL COST SHARING IS LESS THAN WOULD BE REQUIRED UNDER S. 2060

Project	Federal cost	Non-Federal cost sharing			
		As proposed		Under S. 2060	
		Amount	Percent	Amount	Percent
1. West Thompson Reservoir, Conn.	$4,010,000	None		$1,203,000	30
2. Naugatuck River, Conn.	10,230,000	None		3,069,000	30
3. Chicopee River, Mass.	5,180,000	$520,000	9	1,710,000	30
4. Westfield River, Mass.	3,240,000	416,000	11	1,096,800	30
5. Big Fossil Creek, Tex.	1,861,400	437,600	19	689,700	30
6. Blieders Creek, Tex.	1,060,000	83,000	7	343,000	30
7. East Point, La. (Red River)	273,000	26,100	9	89,730	30
8. Rio Grande Basin, N. Mex (Galisteo and Cochita Reservoirs)	58,300,000	None		17,488,500	30
9. Redwood River at Marshall, Minn.	2,252,000	701,000	24	885,900	30

24. Mokelumne River, Calif. (Federal contribution)	10,000,000	None		3,000,000	30
Total	186,080,400	16,194,800		59,652,750	

Mr. DIRKSEN. Mr. President, I have no intention of moving to recommit the bill. I am confident that it would not achieve a favorable result at this late hour of the day. But I must make the record against myself, and then when I am on the receiving end, with rather adverse publicity and a comment from home that I did not make the fight, the only explanation I can make is that, "When you carry the flag, you carry it wherever the course may lead."

Once more I express my appreciation to the chairman and to my distinguished friend from South Dakota that it was included. In fact, within the limits of my cardiac capacity, my heart was in this, rejoicing; I thought surely this would find favor. I am not at all sure at this moment that it will. I cheerfully await the outcome.

Mr. CASE of South Dakota. Mr. President, the Senator from South Dakota will comment a little bit later upon the remarks of the Senator from Illinois. First, I yield 3 minutes to the Senator from Kentucky.

Mr. COOPER. Mr. President, it has been a very satisfying experience to serve as a member of the Committee on Public Works during the last two sessions of the Congress. I wish to pay my tribute to the distinguished chairman of the subcommittee which considered and reported the bill, the Senator from Oklahoma [Mr. KERR]. All of us who serve with him are always amazed by his comprehensive knowledge of legislation. Our hearings on the pending bill, he gave ample opportunity for everyone to be heard, not only the witnesses from the Corps of Engineers and the officials of States and communities, but also the people affected by the bill's projects. Some of them approved, and others believed that the Corps of Engineers and the Government of the United States had not dealt fairly with them, and that in some way or other they had not received due process of law, and the consideration that they expected from the Government of the United States. The distinguished chairman of the subcommittee [Mr. KERR] heard them all with patience and understanding.

I wish also to pay my respects to the ranking minority member of the committee, the distinguished junior Senator from South Dakota [Mr. CASE]. He, too, has very wide knowledge in this field, and he, too, has shown concern for the people of his State and other States to assure fair treatment to all.

It has been a pleasure to serve as a member of the subcommittee under the leadership of these two able Senators. And I am glad for my State, that in addition to the items reported by the House, the committee accepted my amendment to place on the bill Laurel River, Lynn Camp, and Grayson projects, and amendment respecting Barkley Reservoir.

Mr. CASE of South Dakota. Mr. President, I yield myself 5 minutes. First of all, I wish to join in the expression of appreciation which the Senator from Kentucky has voiced for the work of the distinguished Senator from Oklahoma [Mr. KERR]. As a chairman he is without a superior. He not only applies his mind to the principles and details of a proposal before the committee, but he is also able to elicit information which is helpful in making a record, which is useful in case reference to it is necessary. Not only that, but his good humor and his wit and his keen mind always make for an interesting hearing. There is never a dull moment when BOB KERR is presiding at a hearing of the Committee on Public Works or of the Subcommittee on Flood Control, Rivers, and Harbors.

I wish to go further in my tribute to the chairman of the subcommittee in pointing out that part III of the bill is an epical step in Federal legislation. In the previous Rivers and Harbors Act a part III was included, and was entitled "Water Supply." It wrote legislation in the new field of water supply, particularly for municipal and domestic use.

Part III in the pending bill introduces a new field into Federal legislation. It proposes to give more adequate recognition to the place of recreation as a

part of a multipurpose project. The time will come, in my judgment, when legislators of the future will point to title III of the Rivers and Harbors Act of 1960 as the basic legislation for authorizing programs that have immense value for the public good.

We have always recognized that there were some recreational values in such projects. In recent years the trend of the population in America has been such that we have been more aware of the need for places where people can go for relaxation and recreation. The health of the country is better because of it. The morale of the country is better because of it. The outlook of the country is better because of this increased interest in outdoor recreation.

Title III of the bill makes it possible for recreation to be counted as a basis to be evaluated in determining the benefit-cost ratio on a project. We recognize, by part III, that a visitor's day has a public value of at least 50 cents. I am sure that that is a most conservative figure. We establish legislative authority for using recreational benefits up to 10 percent of the total cost of the project.

The value of recreation in a public works project is being vividly demonstrated in my home State of South Dakota, where the Lewis and Clark Lake, in its third season of use, saw 1,700,000 visitors. That is in one season, the third season of its use. It is a constant level lake in the great chain of lakes on the Missouri River.

The bill will be noted in my State also for what it does in advancing the cause of the Missouri River program and the enlargement of the authorization for the prosecution and the partial accomplishment of what is known as the Pick-Sloan plan. It embraces an authorization which carries to completion the Big Bend Reservoir, which in turn is the last of a series of great lakes to be constructed on the Missouri River. It will have a constant level lake with great recreational value, and hydroelectric power generating capacity of almost 500,000 kilowatts.

I wish to turn to the comment made by the distinguished Senator from Illinois [Mr. DIRKSEN] with reference to the position of the Bureau of the Budget on the pending bill. It should be noted, first of all, that the bill we are considering, H.R. 7634, passed the House of Representatives almost a year ago, in July 1959. During that year there have come to Congress, either to the House or to the Senate, a number of reports from the Corps of Engineers, transmitted with budget approval. The Bureau of the Budget is not objecting to them.

There are some projects included in the bill with reference to which the Board of Review for Rivers and Harbors have recommended the projects on a favorable cost ratio, but, because of the fact that the final comment on a project might not have been received by a State agency or by the Bureau of the Budget, it was not transmitted in the customary form with a document number.

Due to the fact that it may be 2 or possibly 3 years before we will consider another omnibus bill, the committee decided to include in the pending bill the reports which came to our attention with respect to which there had been favorable action taken by the Board of Review for Rivers and Harbors. There is no project incorporated in the bill in that classification, as far as I know, that does not show a favorable benefit-cost ratio. There are some projects with respect to which the formula of the Bureau of the Budget may not have been followed so far as local participation is concerned.

The Bureau of the Budget would like to have Congress adopt a uniform requirement as to local cost participation. A bill was introduced, upon which Congress has not seen fit to act, to require a 30-percent local contribution. However, the experience which members of the committee have had in considering projects makes us realize that it is difficult to establish a fixed mathematical formula for local participation.

Some communities have gone forward and spent all they could in the development of protective or preventive works against floods. Some communities have bonded themselves to the limit of their statutory authority under State law.

The committee felt it would be unfair to deny the benefits of a flood control project to areas downstream from some communities which have exhausted their revenues and their bonding authority in establishing local protective works from which some areas downstream have received the benefits.

It is difficult to establish a fixed formula which can be applied to all situations. If there are areas where the public interest requires flood control works to be established, and some community by reason of its financial situation, or perhaps because of something it has already done, is unable to meet a fixed figure, like 30 percent, the committee has thought that the other beneficiaries of the project should not be denied the benefits of the protection afforded by the project.

So we have incorporated some projects in which the local participation varies from what it is in some other projects. However, in most cases, I believe it will be found, upon examination, that the recommendations of the Board of Engineers are followed in that regard.

With respect to the comment of the Senator from Illinois, the committee included the Illinois project, to which he referred. It represents $114 million out of about $150 million worth of projects in the class about which the Bureau of the Budget raises some question. The committee noted that a very favorable benefit-to-cost ratio existed in connection with the Illinois waterway, and that it was justified in including it in the bill upon the favorable recommendation that the Corps of Engineers make another study.

There is some suggestion that possibly the project will not be immediately constructed. It may be that an argument can be presented for its deferral. In any event, the project was included in the bill as presented to the committee, and was considered in all good faith.

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. CASE of South Dakota. I yield.

Mr. AIKEN. What is contemplated in the matter of a study of the Illinois Waterway?

Mr. CASE of South Dakota. It is not a study in connection with the Illinois Waterway. It would be an improvement of the channel, so as to make it possible for some of the ships which come through the Great Lakes Seaway to enter the Illinois Waterway and reach the Mississippi.

Mr. AIKEN. Does it also contemplate maintaining the flow of the Illinois River during low water?

Mr. CASE of South Dakota. The Senator from Vermont perhaps may be confused as between this proposed study and the study which has been authorized at different times which would affect the depth of the water in Lake Michigan. The latter study is not involved in the project.

Mr. AIKEN. It has nothing to do with it in any way? The Senator from South Dakota assures us that that project is not involved in this one?

Mr. CASE of South Dakota. It is not involved. This is not the study which has been the subject on which the Senate was regaled during the closing hours of the session, in a recent year.

Mr. AIKEN. The reason I asked the question was that I just discerned the senior Senator and the junior Senator from Wisconsin [Mr. WILEY and Mr. PROXMIRE] training their eyes on the Senator from South Dakota. I wondered if something of interest to them might be involved.

Mr. CASE of South Dakota. No.

Mr. AIKEN. Do I correctly understand, then, that this proposal has nothing to do with the Lake Michigan proposal?

Mr. CASE of South Dakota. It has nothing to do with it. That may be disappointing to some persons.

Mr. AIKEN. Not to me.

Mr. CASE of South Dakota. We cannot look forward, during the closing hours of this session, to any discussion about the often-proposed study of the level of Lake Michigan and the relative merits of Chicago and Milwaukee for consideration in the distribution of the water of Lake Michigan.

Mr. AIKEN. In any event, the Senator from Vermont, as usual, is impressed by the alertness of the two Senators from Wisconsin.

Mr. CASE of South Dakota. Mr. President, two other items to which the Senator from Illinois alluded are in the list. One of the half dozen items which is on the list which the Senator from Illinois has placed in the RECORD deals with a bridge in the State of South Dakota. Because I have had only a brief opportunity to examine the comments of the Bureau of the Budget with respect to that project—the bridge in South Dakota—I desire to make a statement for the record.

The statement which was inserted by the Senator from Illinois, and which was supplied, I suppose, by the Bureau of the Budget, makes an adverse comment upon the proposed authorization for a bridge which is provided in the language of the bill on page 38, lines 9 to 23.

Mr. President I ask unanimous consent that lines 9 to 23, inclusive, on page 38 of the bill, be printed at this point in the RECORD.

There being no objection, the paragraph was ordered to be printed in the RECORD, as follows:

That the Fort Randall Dam and Reservoir project, South Dakota, is modified to provide for construction of a free highway bridge over the Missouri River at an appropriate location west of Platte, South Dakota, under the direction of the Secretary of the Army and the supervision of the Chief of Engineers, in accordance with such plans as may be approved by the Chief of Engineers, in order to provide adequate crossing facilities over such river for highway traffic in the area and in replacement of the closure of the Wheeler Bridge by reason of construction of said reservoir at a cost not to exceed $6,375,000: *Provided*, That local interests shall construct all necessary approaches to the bridge site, and provide without cost to the United States all lands, easements, and rights-of-way necessary for construction of the bridge.

Mr. CASE of South Dakota. Mr. President, the adverse comment about the proposed authorization for the bridge rests upon an assumption that there was a contract between the State of South Dakota and the Corps of Engineers which provided that when the engineers built Randall Dam it was agreeable to the State of South Dakota that Wheeler Bridge should be eliminated. There is no such contract, so far as I can find. I know what is relied upon as a contract. It is a one-sided letter from the Highway Commission of the State of South Dakota, which said that the State would interpose no objection to having the Corps of Engineers proceed with certain works.

The works which the Corps of Engineers proposed to undertake included the construction of a new bridge on the White River, a tributary of the Missouri River; the raising of the approaches and the bridge on the Missouri River at the town of Chamberlain; and also the construction of a crossing on the Randall Dam across the Missouri River at what was the old Randall Reservoir.

The replacement of the bridge on the White River would be required under any normal rule, because the construction of the Randall Dam flooded out the old bridge on the White River, a tributary of the Missouri River.

The raising of the bridge at Chamberlain was necessary by the very nature of the project. When the dam was constructed at the Fort Randall site, it raised the level of the water in the reservoir in the river back of Chamberlain; and without any commitment or without any agreement with the State of South Dakota, it was incumbent upon the State highway commission to raise the bridge. Consequently I have never felt that the Army Engineers or the Government of the United States could argue in good faith that the building of a new bridge on the White River or the raising of the bridge at Chamberlain was a replacement for the Wheeler project, which was more than 100 miles farther downstream.

Nor could it be supposed that to bring the traffic across Randall Dam itself would be any replacement for Wheeler Bridge, which was several miles upstream. The resultant construction of Randall Dam and the elimination of the old Wheeler Bridge, which had been built by the State of South Dakota many years before, means that the people who live midway between the dam and the Chamberlain Bridge would be required to travel as much as 200 miles merely to get to a point 6 miles away, across the river. The lake or reservoir created by Randall Dam is about 160 miles long. On the route which one would have to travel by highway, it would mean a trip of about 100 miles to get around to the other side of the river, if one happened to live midway along the river. Yet the location to which one was traveling might be from 3 to 6 miles, actually, in a direct line.

So I have always felt that there was an inadequate replacement of the destroyed crossing of the Wheeler Bridge. That was why I proposed, why the people of South Dakota, by the State highway commission, and many cities and communities, have adopted resolutions, urging the authorization of a proper replacement by reason of the closure of Wheeler Bridge. That is why the provision is in the bill.

I thought this statement ought to be in the RECORD, in view of the comment of the Bureau of the Budget, which has been previously placed in the RECORD today. I hope that when all the facts are explored by the representatives of the Bureau of the Budget and the conferees on the bill, the paragraph to which I have referred may be approved.

Before I conclude, I also invite attention to title IV of the bill, which deals with the problem which has been created in community after community by the taking of land for public works projects, where the only compensation which the Corps of Engineers could offer was the supposed fair market value of the land involved, that value being based upon a price or prices of record when there had been willing sellers and willing buyers.

The hearings of the committee, which are set forth in a special printing by the committee, were held on May 16 and 17, and demonstrated that in Oklahoma, in Kentucky, in South Dakota, and in other places, losses and injuries which are sustained by people, by reason of the taking of land for large public-works projects, are not adequately compensated by proposals merely to give the so-called fair market value of the land, where there are willing sellers and willing buyers. In these cases, in which there are large tracts of land—and in my State, nearly half a million acres have been taken for the construction of these great reservoirs—many people are losing their homes and are losing their means of livelihood, but are not compensated by means of measuring the land value and making payment accordingly. There is no way to establish a comparable value, because there are no comparable sales.

So in the bill we provide for the creation of a commission to study this problem and we also establish guidelines for the payment of values during the interim period, while the commission is making its study. These provisions are of general application, and I think they will be of interest to the Members of the Senate.

I hope the conferees will concur in the provisions we have set forth in title IV of the bill.

Mr. President, it is a great privilege to work on a bill such as the omnibus rivers and harbors bill. People may differ in their opinions regarding public-works projects and expenditures; but certainly it can be said that the bill is more than a bill dealing with public-works projects. Certainly it can truly be said that the bill provides ways and means to enable the people to enjoy a better living, and certainly it can likewise be said that the bill provides jobs for the people of America. The bill builds for today and also for the future.

I count it a great privilege to serve on the committee, and also to recommend the concurrence of the Senate in the bill.

Mr. KEATING. Mr. President, will the Senator from South Dakota yield 1 minute to me?

Mr. CASE of South Dakota. I yield.

The PRESIDING OFFICER. The Senator from New York is recognized for 1 minute.

Mr. KEATING. Mr. President, I wish to say a brief word to the chairman of the committee and to its other members in gratitude for the very gracious reception they gave to me, as a witness, and to constituents of mine who were particularly interested in the Rochester project, the Fire Island project, and the Mamaroneck project.

The chairman, who presided at the meeting, was very courteous and very helpful in making suggestions to me about how the necessary data could be obtained in order to support the case for these very much needed improvements. I am extremely grateful to him and also to the Senator from South Dakota [Mr. CASE] and to the other members of the committee for their assistance.

Mr. CASE of South Dakota. Mr. President, we appreciate the kind words of the Senator from New York.

I yield the floor.

Mr. KERR. Mr. President, I yield myself 5 minutes.

The PRESIDING OFFICER. The Senator from Oklahoma is recognized for 5 minutes.

Mr. KERR. Mr. President, I desire to pay tribute to the members of the committee who spent so much time in the hearings on this bill and in preparing the bill and bringing it to the floor of the Senate.

I wish to pay a special tribute to the chairman of the committee, the Senator from New Mexico [Mr. CHAVEZ], and also to the Senator from Michigan [Mr. MCNAMARA], the chairman of our subcom-

mittee on Public Roads. In addition to carrying that load, the Senator from Michigan also was most diligent in his work on this bill.

I also wish to pay special tribute to the distinguished senior Senator from West Virginia [Mr. RANDOLPH], the chairman of the Subcommittee on Public Buildings and Grounds, whose contributions to this bill were substantial.

In fact, Mr. President, I should like to pay a tribute to each member of this committee.

In that regard, I wish publicly to express my appreciation of, and my friendship for, the distinguished Senator from South Dakota [Mr. CASE]. He and I have been members of this committee ever since I have been a Member of the Senate. I cannot recall when there was ever any substantial difference of opinion between the Senator from South Dakota and myself with reference to the principles which should be recognized and embodied and developed in the omnibus rivers and harbors bills and in other public-resource development bills which our committee has brought to this floor, for action by the Senate.

The Senator from South Dakota referred to the fact that, two years ago, he and I jointly sponsored title III of the Flood Control Act of 1958, directing the recognition by both the Bureau of Reclamation and the Corps of Engineers of the evaluation of water storage space and multiple development projects for municipal and industrial water supply. Even in the brief time that act has been the law, it has demonstrated again and again the justification for that title and the wisdom of the Congress in enacting it.

Title III of this bill is another milestone in the preparation and enactment of legislation to develop our natural resources and in bringing about recognition of the economic value of the recreational features of multiple-purpose projects.

All through the development of this bill, Mr. President, there has been a spirit of cooperation, mutual respect, and dedication by the members of our committee, both in the preparation of the particular provisions and in the development of a bill which would do justice to the needs of the Nation for an accelerated program of water-resource development and the building of projects to make that possible.

On the committee, there was no partisanship in reference to this bill. The Members on both sides of the aisle—Democrats and Republicans—gave equally of themselves and of their ability and their efforts to make a success of the bill.

I am happy to have had a part in that work and, particularly, with reference to the provisions which directly affect my State of Oklahoma.

But I should like to say here, as I have often said in the committee, Mr. President, that, to me, water-resources development is a matter of the highest national interest, and of the greatest value in contributing to the national security and safety and to the national economic growth and development; and it has been in the spirit of that belief that I and the other members of the committee have developed this bill and have brought it to the floor.

Mr. President, I urge that the Senate pass the bill.

Mr. CASE of South Dakota. Mr. President, I ask unanimous consent that at this time there may be a quorum call, and that the time required for it not be charged to the time available to either side.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered; and the clerk will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JOHNSON of Texas. Mr. President, I ask for the yeas and nays on final passage.

The yeas and nays were ordered.

Mr. CASE of South Dakota. Mr. President, I yield 2 minutes to the Senator from Connecticut [Mr. BUSH].

The PRESIDING OFFICER. The Senator from Connecticut is recognized for 2 minutes.

Mr. BUSH. Mr. President, the omnibus public works bill, H.R. 7634, now before the Senate, contains authorizations for Federal participation in the construction of flood protection projects which are vitally important to Connecticut and New England.

The bill authorizes Federal participation in New England projects, at an estimated cost to the Federal Government of $41,221,000, of which $29,731,000 are assigned to flood control and hurricane flood protection projects in my State.

Connecticut projects in the bill, and the estimated Federal costs, are as follows:

Project:	*Estimated Federal cost*
Farmington River (flood control)	$12,052,000
Naugatuck River (flood control)	10,230,000
Pawcatuck (hurricane flood protection)	409,000
Stamford (hurricane flood protection)	3,030,000
West Thompson Reservoir (flood control)	4,010,000
Total	29,731,000

Mr. President, it is an astonishing fact that more has been accomplished in the past 5 years to protect the people of New England from damaging floods than was accomplished in the whole previous history of the region.

Following the disastrous hurricane floods of 1955, President Eisenhower recommended, and the Congress puts into effect, an accelerated flood protection program for my State and region. Earlier this year, I reviewed the progress which has been made with Lt. Gen. Emerson C. Itschner, Chief of Army Engineers, who reported that since 1953, 13 flood control projects in New England have been completed at a cost of $25 million, 12 additional projects are now, or soon will be, under construction at a cost of $95 million, and 4 more estimated to cost $30 million are now under design.

"This total of 29 flood control projects will be completed in the near future at a total cost of $150 million," General Itschner reported.

Mr. President, I ask unanimous consent that a press release reporting my discussion of New England flood protection with General Itschner may be printed in the RECORD following these remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. BUSH. I am grateful to the Senate Committee on Public Works and its Subcommittee on Flood Control, Rivers and Harbors, on which I formerly served, for the cooperation they have given in accelerating our flood protection program.

I regret, however, that the committee has not seen fit to recommend revisions in the laws which govern the sharing of costs between the Federal Government and the States and local communities. Existing law permits glaring inequities and discrimination as between communities in cost sharing, as I pointed out in testimony before the committee during hearings on the bill.

Mr. President, I ask unanimous consent that my statement, and supplementary materials submitted to the committee, may be printed in the RECORD following these remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 2.)

Mr. BUSH. I shall vote for H.R. 7634 because it is essential that flood control work in Connecticut and New England go forward without interruption, but I shall continue, in the next Congress, to work for a more equitable basis for cost sharing.

Mr. President, I hope that Congress will not only authorize the projects essential for flood protection in my State and region, which are included in the bill, but will also provide construction funds in order that preparation of detailed plans and specifications may proceed without delay.

I ask unanimous consent that a letter I have sent to the chairman of the Subcommittee on Public Works Appropriations, requesting such funds, may be printed in the RECORD following these remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 3.)

EXHIBIT 1

WASHINGTON, March 10.—U.S. Senator PRESCOTT BUSH said tonight "that more has been done in the past 5 years to protect the people of New England from damaging floods than was accomplished in the whole previous history of this region."

The Connecticut Senator's statement was confirmed by Lt. Gen. Emerson C. Itschner, Chief of Army Engineers, who reviewed with him flood protection work accomplished since the disastrous 1955 floods, which took

77 lives in Connecticut and caused property damage totaling $500 million in New England.

General Itschner said that in the past 5 years 13 flood control projects in New England have been completed at a cost of $25 million, 12 additional projects are now or soon will be under construction at a cost of $95 million, and 4 more estimated to cost $30 million are now under design.

"This total of 29 flood control projects will be completed in the near future at a total cost of $150 million," he said.

The discussion was recorded in Washington for broadcast by Connecticut radio stations.

DISCUSSION BY SENATOR BUSH AND GENERAL ITSCHNER

Senator BUSH. Hello everybody. This is PRESCOTT BUSH. We are fortunate in having here today Gen. Emerson C. Itschner, Chief of Engineers of the U.S. Army. General Itschner directs the world's largest construction agency—the U.S. Army Corps of Engineers, which is responsible for directing the Army and Air Force military construction programs both in continental United States and overseas. In addition, General Itschner and his Corps of Engineers supervise the construction of most of our Nation's public program for flood control, navigation, power and other water resource development.

General Itschner, it is a great pleasure to have you join me here today to discuss, for the benefit of the people of Connecticut, the progress being made by the Corps of Engineers in New England and in the State of Connecticut particularly in planning and constructing flood control, hurricane protection and other civil works projects. Since the hurricane that devastated the New England coast in 1954, followed by the tragic river flooding of August 1955, the Corps of Engineers has been hard at work to decrease our vulnerability to both river flooding and coastal damage from hurricane floods. I know our listeners would appreciate knowing how these programs are progressing. Would you bring us up to date, General Itschner, on this work?

General ITSCHNER. I'd be glad to, Senator BUSH. As you know, the six New England States, although covering only about one-thirtieth of our country's 3 million square miles, have long comprised one of the corps' 10 continental engineering divisions. As the oldest and one of the most heavily industrialized areas of our country, New England's highly developed river basins and coastline have created a number of unique problems as well as opportunities in water resource control and development.

Senator BUSH. The tremendous property damages left in the wakes of the hurricane of 1954 and the southern New England flood of 1955 certainly bear this out, General. Could you summarize what the Corps of Engineers has done to lessen the impact of natural disasters such as these?

General ITSCHNER. Yes, Senator. Since the flood of 1955 resulting from Hurricane Diane, New England's flood control program has been greatly accelerated. Owing in large measure to the cooperation and hard work of the good people of New England, our progress in planning and constructing flood control projects has been remarkable. I know of no other area in the country where so much has been accomplished in such a short time following a disastrous flood. And the 1955 flood was truly disastrous.

Senator BUSH. What was your final estimate, General, of the damage of that flood?

General ITSCHNER. We estimate that the damage was $500 million. The State of Connecticut was by far the hardest hit, sustaining a loss of 77 lives and approximately $370 million. Under our stepped-up program to prevent such damages in the future, we have in the past 5 years completed 13 flood control projects in New England at a cost of $25 million. Our New England division, directed by Brig. Gen. Alden K. Sibley, whom I am sure you know very well——

Senator BUSH. We think very highly of him.

General ITSCHNER. That's fine. So do we. He is now hard at work on 12 projects that are now, or soon will be, under construction at a cost of $95 million. Four more projects estimated to cost $30 million are now under design. This total of 29 flood control projects will be completed in the near future at a total cost of approximately $150 million.

Senator BUSH. This means then, General, that more has been done in the past 5 years to protect the people of New England from damaging floods than was accomplished in the whole previous history of this region. Is that so?

General ITSCHNER. That's right, Senator.

Senator BUSH. Well, this progress is encouraging to us. How many of these 29 flood control projects, General Itschner, are located within Connecticut?

General ITSCHNER. Eight of these New England projects, consisting of five levee, floodwall, and channel improvement projects and three flood control reservoirs, are located within Connecticut. But we must not overlook the fact that these projects are components of comprehensive river basin systems, and that 10 new reservoirs located upstream in the Connecticut and Thames River Basins in Massachusetts, New Hampshire, and Vermont will directly benefit downstream communities in the State of Connecticut.

Senator BUSH. I certainly agree wholeheartedly, General, that we must not assess the flood control program strictly on the basis of our own State boundaries. We in Connecticut are well aware now of this basinwide concept of flood control and we have signed, as you probably know, a flood control compact with Massachusetts, New Hampshire, and Vermont in order to compensate the sister States for tax losses on lands used for construction of dams and reservoirs to reduce downstream flood flows in the Connecticut and Thames River Basins.

And, in this session of Congress, I have introduced a bill which would, if passed, grant congressional approval to a Northeastern Water and Related Land Resources Compact. This compact would bring the many Federal agencies concerned into a continuing cooperative relationship with the States.

I believe most of our listeners back home are familiar with the Thomaston Dam project on the Naugatuck River. Now, General, would you tell us something about the progress that is being made on this great project and perhaps on other projects now under construction, or planned for construction, actually within the State of Connecticut?

General ITSCHNER. Senator, we are making excellent progress on the $14 million Thomaston dam and reservoir. It is scheduled for operation later this year, and when completed it will represent one of the soundest flood control investments ever made in the United States. If this reservoir had been in operation during the flood of August 1955, it would have prevented almost 80 percent of the $194 million in damages sustained in the Naugatuck River Valley. Upstream from the Thomaston Dam the system of protection for the city of Torrington is well advanced. We have completed in Torrington one of the first local protection projects in the country constructed under the authority of the legislation that you were so instrumental in bringing about. For the benefit of our listeners, Public Law 685, the Bush-McCormack Act of 1956, authorized me to approve construction of badly needed local protection projects, costing not over $400,000 each, with general funds appropriated annually by Congress. A second channel improvement project of this type in the city of Torrington is rapidly nearing completion, and a third planned project on the Byram River in the Pemberwick area of Greenwich is being built under the direction of our New York District.

Senator BUSH. Now, General, in addition to these local protective projects, two flood control reservoirs were authorized in the Flood Control Act of 1958 to control headwater tributaries of the Naugatuck River north of Torrington. What additional work is being planned for the Naugatuck?

General ITSCHNER. Senator, we have planned projects in addition to the Thomaston Dam to bring the dangerous Naugatuck River under greater control. Hall Meadow Brook Reservoir above Torrington will go under construction this summer, and we hope to have design funds for the East Branch Reservoir next fiscal year. We are also submitting to Congress a report recommending four small dams and reservoirs on downstream tributaries of the Naugatuck. In addition, a Public Law 685 project, involving channel and levee work, is being designed for construction at Waterbury. General Sibley also is now preparing recommendations for flood protection works on the Naugatuck River in the Ansonia-Derby area.

Senator BUSH. General, I know that the West Thompson Reservoir, which will protect the city of Putnam on the Quinebaug River in the Thames Basin, is included in a public works bill now being considered by Congress. What is the situation on other flood-producing rivers in Connecticut?

General ITSCHNER. Construction will begin this summer on the Mad River Reservoir above Winsted in the Farmington River Basin. Winsted, as all of us well remember, is the town that suffered such terrible damage in August 1955 when the Mad River, more than living up to its name, devastated a large portion of the community. Control of the Mad River by this reservoir will bring a high degree of flood protection to Winsted and prevent a repetition of what occurred in 1955. In another report, which is part of a review study of the whole northeast that we started after the flood of August 1955, two more flood control reservoirs are recommended for the Farmington River Basin. This report is now being reviewed by the Board of Engineers for Rivers and Harbors in Washington.

Senator BUSH. Yes, General Itschner, I am familiar with these recommendations for the Farmington Basin, and I understand that one of the reservoirs includes provisions for water supply needs.

General ITSCHNER. Yes, the Colebrook River flood control reservoir you refer to is one of the first projects in this country studied under the authority of the Water Supply Act of 1958. This study is a good example of the fine cooperation shown by State and local agencies and the people of Connecticut. This cooperation has done much to make the Federal civil works program in Connecticut one of the most dynamic programs in the country.

Senator BUSH. I'm glad to hear that, General, and with all this flood control work in Connecticut since the flood of 1955, can you tell us how the State of Connecticut compared with other States in the amount of Federal funds expended, on a per capita basis?

General ITSCHNER. Yes sir, on a per capita basis, Connecticut had an expenditure rate of $12.59, ranking third nationally behind only Kansas and West Virginia.

Senator BUSH. I'm sure our people back home would be glad to hear that. Frequently we feel that we make large contributions to the welfare of other States and don't get much back. This is very good news. I know that people of Connecticut are proud of all that has been accomplished in bringing greater flood protection to their

community. Now, General Itschner, we just have a moment but would you comment on the corps' work in the area of hurricane protection, shore protection, and navigation projects in Connecticut?

General ITSCHNER. We have been making real progress in the conduct of our hurricane protection studies along the Connecticut shoreline. We have found that many of these are worthy of construction.

Senator BUSH. General, that's fine, and I want to say to you that you have a great many friends in the State of Connecticut and certainly there is no State that appreciates the Army Corps of Engineers more than our State because when we were in dire straits and faced with a great catastrophe you and your colleagues came to our rescue. So I very much appreciate your being with us today, General Itschner.

General ITSCHNER. It's been a great pleasure for me to be here with you today, sir.

EXHIBIT 2

STATEMENT OF HON. PRESCOTT BUSH, A U.S. SENATOR FROM THE STATE OF CONNECTICUT

Mr. Chairman and members of the committee, it is a pleasure to appear before the chairman and this committee on which I served for 4 years, and which has been very helpful to our State since the disastrous floods of 1954 and 1955, in particular.

I appear today to request you to amend H.R. 7634 to provide uniform cost-sharing standards for Federal flood protection projects, and to include in the bill certain Connecticut works which are needed to carry forward the flood protection program in my State.

Before discussing the general question of cost sharing, I invite your attention to Connecticut projects which should be included in the bill. These projects, the documentation therefor and the benefit-to-cost ratios, are as follows:

Hurricane protection project for Stamford, Conn. House Document No. 210, 86th Congress, 1st session. Benefit-to-cost ratio, 1.5 to 1.

Hurricane protection project for Pawcatuck, Conn. House Document No. 212, 86th Congress, 1st session. Benefit-to-cost ratio, 2.1 to 1.

West Thompson, Conn., flood control dam and reservoir. Senate Document No. 41, 86th Congress, 1st session. Benefit-to-cost ratio, 1.3 to 1.

Additional flood protection for the Naugatuck River Valley below Thomaston, Conn., consisting of four dams and reservoirs for flood control, on Northfield Brook, Branch Brook, Hancock Brook, and Hop Brook. House Document No. 372, 86th Congress, 2d session. Benefit-cost ratios ranging between 1.7 to 1 and 2 to 1.

The subcommittee will note that all of these projects are economically justified, with some having unusually high benefit-to-cost ratios.

In process by the Corps of Engineers are additional Connecticut projects—a local flood protection plan for Ansonia-Derby in the Naugatuck River Valley, and two projects in the Farmington River Valley, a flood control reservoir on Sucker Brook at Winsted and a dual-purpose reservoir for flood control and water storage at Colebrook. Should the necessary documentation be received before the bill is ready for final action by the Congress, I urge that they also be included.

Mr. Chairman, I intend to discuss cost sharing in relation to the Connecticut projects a little later, but I should now like to have the subcommittee consider the problem as one of general application.

In the 1st session of the 86th Congress, I introduced S. 2060 which was intended to implement President Eisenhower's recommendation last year for legislation to establish a consistent basis for cost sharing on projects which provide flood protection benefits.

I submit the language of S. 2060, with certain modifications and additions suggested by the Department of the Interior, as an amendment to H.R. 7634, so that it may now be considered by the subcommittee in view of the President's renewed request for prompt enactment of this legislation.

I invite the subcommittee's attention to the following language in the President's budget message this year (pp. M52 and M53):

"Cost sharing on flood protection projects: It is essential that legislation be promptly enacted to establish a consistent basis for cost sharing on projects which provide flood protection benefits. At the present time, the various Federal agencies responsible for flood protection operate under different and confusing cost-sharing standards. The non-Federal contributions vary from 0 to over 60 percent. This intolerable situation should be corrected. Legislation now before the Congress would require generally that identifiable non-Federal interests receiving flood protection benefits be at least 30 percent of the costs of flood protection. The value of lands, easements, and rights-of-way contributed locally would be included as part of this non-Federal share. The cost of operation and maintenance would also be a State or local responsibility."

The President, in describing the present situation as "intolerable," used strong language. In my judgment, it was merited.

As evidence of the wide variation in present cost-sharing requirements, I submit for the subcommittee's information, tables prepared for me by the Departments of the Army and of Agriculture, together with letters of transmittal from the appropriate officials of the two Departments, and a letter from the Bureau of the Budget in which the tables are analyzed at my request.

These tables show that the costs imposed upon local communities range from 0 to 61 percent, in the case of projects undertaken by the Department of Agriculture under the Watershed and Flood Prevention Act (Public Law 566, as amended); and from 0 to 67 percent, in the case of flood protection projects undertaken by the Corps of Engineers.

The evils which flow from the illogical and inconsistent cost-sharing requirements under existing law include:

1. The Federal Government discriminates against certain communities in need of flood protection, and in favor of others.

2. Communities tend to "shop around" among Federal agencies engaged in flood control to determine which will give them the best bargain.

3. The Federal agencies, especially at the field level, compete one against the other, using the variations in cost-sharing requirements as bargaining points, to obtain new flood control work.

4. Without adequate local participation in costs, there is danger that projects not fully justified may be undertaken, with consequent waste of Federal funds at the expense of the taxpayers.

So, Mr. Chairman, my first recommendation to your subcommittee is to incorporate the "principle" of my bill and the amendment I have submitted in H.R. 7634 before it is reported to the Senate floor.

I have emphasized the word "principle" because I am not positive that 30 percent is the correct level at which to set a minimum floor under local contribution for flood prevention works. Whether it should be 30 percent—or 20 or 40 percent—and whether local interests should be required to pay all or part of operation and maintenance costs are matters upon which differing opinions may be held.

What I do urge is the necessity of establishing uniform standards of cost sharing, under which all communities in need of flood protection would be treated alike by their Federal Government.

What I urge is an end to the shocking and outrageous discriminations which occur under existing law.

Mr. Chairman, I should now like to discuss the Connecticut projects which I request be included in the bill, and discuss cost-sharing problems in relation to them.

I turn first to the two hurricane flood protection projects for Stamford and Pawcatuck, which were recommended as a result of studies conducted under the Hurricane Survey Act, Public Law 71, which, as a member of your subcommitee, I had the privilege of sponsoring on the Senate floor in the 84th Congress. I invite attention to the Corps of Engineers' recommendations that the local communities contribute 30 percent of the first costs of construction, and underwrite the costs of maintenance and operation.

And I contrast this treatment of these two communities with the corps' recommendations, in conformity with existing law, that all the large flood control dams and reservoirs in the bill be built, operated, and maintained entirely at Federal expense.

Now, I cannot understand why a distinction should be made between flooding which results from fresh water and flooding caused by salt water. Both have resulted in loss of life and enormous damage to property in my State and other States.

It may be said that projects to control hurricane floodwaters more closely resemble the inland local flood protection projects, for which the corps requires local contribution. If that be conceded, and there is something to be said for this point of view, why should a contribution of 30 percent be required, when some communities have been provided local flood protection without expense to them?

Or, to choose some examples from the tables furnished me by the Corps of Engineers, why should Stamford and Pawcatuck pay 30 percent, when Lampasas, Tex., paid only 2 percent; Muscatine, Iowa, only 1 percent, and South St. Paul, Minn., only 5 percent for the local flood protection they have received?

Such discrimination defies reason, or at least it certainly appears to defy reason.

I do not wish to be unreasonable, Mr. Chairman; consequently, I shall not request that the local contributions required of Stamford and Pawcatuck be reduced to nothing, or to a percentage substantially below that which has been recommended. But I believe these communities should be called upon to pay no more than the national average of local contributions on local flood protection projects of the Corps of Engineers. The average is 22 percent, according to the Bureau of the Budget.

Accordingly, I submit amendments to H.R. 7634 to include the Stamford and Pawcatuck projects, and to reduce the required local contributions to the national average of 22 percent.

I now invite attention to the West Thompson Reservoir, and to the four dams proposed as additional flood protection for the lower Naugatuck Valley.

In both instances, the Corps of Engineers, under the provisions of existing law, has recommended that the projects be constructed, operated, and maintained entirely at Federal expense.

In the case of the West Thompson Reservoir, the Bureau of the Budget has included this project among 10 in the bill for which it recommends that authorizations be deferred until action has been taken upon the uniform cost-sharing provisions of S. 2060. The Bureau has made a similar recommendation with respect to the four dams to supplement control of the lower Naugatuck.

Mr. Chairman, I would like to comment at this point upon the unfairness of existing cost-sharing provisions of the Federal flood

control law to communities in Connecticut and other States in which the nature of the terrain does not permit construction of huge dams and reservoirs such as are common in other areas of the Nation.

Adequate flood control for States such as ours requires a complex of structures—a few dams and reservoirs for area protection, supplemented by smaller dams and channel improvements which are classified as local protection works, as are the hurricane protection projects along the coast. The larger dams and reservoirs are built, operated, and maintained entirely at Federal expense. For the hurricane projects and for the smaller dams and channel improvements, such as are made, for example, under the terms of the Bush-McCormack Act, local contributions are required.

I can illustrate the incongruities which result by reference to the flood protection for the Naugatuck Valley which has been undertaken since the tragic floods of 1955. The key structure in the protective complex is the Thomaston Dam, now nearing completion, for which the Federal Government bears the entire expense. The city of Waterbury and other major population centers downstream from this dam pay nothing for the protection it will provide. Yet Torrington, a community which suffered heavily in the 1955 floods, must pay part of the cost of two dams and reservoirs, supplemented by channel improvements, which are necessary for its protection. It was the same river, the Naugatuck, which flooded and inflicted grievous damage on both Waterbury and Torrington. Yet the accident of geography which placed Torrington upstream and Waterbury downstream of the best site for an area protective dam, results in discrimination between the two communities. This is clearly inequitable, and is only one example of the many injustices which result from the lack of uniformity in cost-sharing standards.

So, in summary, Mr. Chairman, I urge the subcommittee to approve the Connecticut projects under either of these alternative courses of action:

1. Incorporate a uniform cost-sharing principle in the bill; or

2. Reduce the local cost-sharing requirement for the Stamford and Pawcatuck hurricane protection projects to the national average of 22 percent, and include the West Thompson and lower Naugatuck Dams under the terms of existing law.

I should prefer the former.

I thank the chairman for the courtesy of appearing.

That concludes my statement.

Senator KERR. Thank you, Senator; we are glad to have had your testimony.

(The statements and tabulations previously referred to follow:)

EXECUTIVE OFFICE OF THE PRESIDENT,
BUREAU OF THE BUDGET,
Washington, D.C., July 29, 1959.

Hon. PRESCOTT BUSH,
U.S. Senate,
Washington, D.C.

MY DEAR SENATOR BUSH: In response to Mr. Clarke's letter of July 14, 1959, there are returned herewith the letters and tables submitted to you by the Department of Agriculture on July 8, 1959, and the Corps of Engineers on July 7, 1959, regarding flood control cost-sharing requirements. As requested, the percentages for each project have been computed and entered on the tables.

We have several comments that may be of value to you in interpreting the material presented:

1. The data by individual projects clearly point up the need for greater uniformity in cost-sharing requirements. The present range in local level of non-Federal participation for individual projects is about the same for both agencies: 0 to 67 percent for Corps of Engineers, 1 to 61 percent for Soil Conservation Service.

2. The difference in average level of local cost sharing between the two agencies (14 percent for Soil Conservation Service, 22 percent for Corps of Engineers) reflects several factors:

(a) A larger proportion of Army's projects are in urban areas, where the lands, easements, and rights-of-way required under present law to be furnished locally are more costly than in rural areas.

(b) For a number of Army projects included in the table, drainage and flood control benefits have not been separated and costs allocated to these purposes. The Chief of Engineers in such cases has often recommended, and the Congress approved, a level of local cost sharing higher than comparable projects without drainage features. In all the Soil Conservation Service projects, costs allocated to drainage (of which local groups bear about 60 percent) have been excluded from the data furnished.

(c) In the case of projects where benefits occur from more productive use of land made possible by flood protection, the Chief of Engineers recommends that local interests bear 50 percent of the costs associated with these benefits, in accordance with the standards of Budget Circular A–47. On the other hand, the Department of Agriculture has interpreted the provision of Public Law 566 as prohibiting the collection of such payments from non-Federal groups.

One of the main advantages of S. 2060 is that it would eliminate these, as well as other confusing and inequitable differences in the cost-sharing requirements of the legislative authorities under which the Federal agencies operate.

3. The material supplied by the Corps of Engineers does not include large reservoirs, which are mostly multiple-purpose undertakings and produce power, navigation, and water supply benefits as well as flood control benefits. A major share of the flood protection benefits of large reservoirs are widely distributed over large areas. Special studies would be necessary to determine in these cases the appropriate portion of project costs that would be subject to the cost-sharing requirements on the part of groups receiving significant, identifiable flood protection benefits. Conversely, detailed studies might indicate the existence of a portion of widespread benefits in the case of some of the Department of Agriculture projects.

4. The Corps of Engineers has excluded several separable features of the overall project, "Flood Control, Mississippi River and Tributaries," which would be covered under the terms of S. 2060. Little or no local financial participation has been required for these features. The watershed projects installed by the Soil Conservation Service under authority of the Flood Control Act of 1944, which are generally similar to those installed under authority of Public Law 566, would be covered under the terms of S. 2060.

5. In General Itschner's letter it is pointed out that in some cases under the terms of S. 2060 there would be a reduction of costs to local interests. Such cases would occur where a non-Federal cash payment has been required by the Congress (in addition to the usual requirement of lands, easements, and rights-of-way) and the total local share exceeds 30 percent of project costs. For these projects, the tables reflect a reduction equal to the cash payment so long as the local share does not drop below 30 percent. The provisions of S. 2060 would, however, permit the Chief of Engineers to recommend, where special circumstances dictate, the requirement of a local cash payment, even if the non-Federal share represented by lands, easements, and rights-of-way exceeds 30 percent.

6. Reference is made in Assistant Secretary Peterson's letter to cost sharing for treatment measures, which are excluded under the terms of S. 2060. It should be pointed out that in the case of these measures, Federal payments under authorities other than Public Law 566 (such as the agricultural conservation program, the conservation reserve program, and State and private forestry cooperation) are counted as part of the local financial participation. The percentages of local cost sharing cited, therefore, are not comparable with the percentages computed for structural measures.

The opportunity to furnish these comments is greatly appreciated. If we can be of further assistance, please inform us.

Sincerely yours,

ELMER B. STAATS,
Deputy Director.

DEPARTMENT OF THE ARMY,
OFFICE OF THE CHIEF OF ENGINEERS,
Washington, D.C., July 7, 1959.

Hon. PRESCOTT BUSH,
U.S. Senate.

DEAR SENATOR BUSH: Reference is made to your letter of May 27, 1959, and an interim reply by General Person of May 29, 1959. You request tables showing the distribution of costs between the Federal Government and non-Federal interests on all flood-control or flood-prevention projects that have been authorized or recommended for authorization from January 1, 1954, to date, or which have been undertaken during that period under provisions of law which permit the initiation of projects without specific authorizations or appropriations. You also request additional tables to show distribution of costs on these projects if the changes in existing law proposed in S. 2060 had been in effect.

Tables are enclosed showing the distribution of costs for all local protection projects authorized or recommended since January 1, 1954, as follows:

	Sheets
Authorized by Flood Control Act of 1954	3
Authorized by Flood Control Act of 1958	2
Authorized by Public Law 218 and Public Law 256, 84th Cong., 1st sess., proposed in 1959 Flood Control Act	1
Approved under authority of section 205 of 1948 Flood Control Act, as amended by Public Law 685, 84th Cong	1
Summary	1

It will be noted that the costs to local interests would generally be increased under the proposed law. In some instances, however, there would be reductions. These would occur where local interests have been required to make a cash contribution toward the construction cost, in addition to providing lands, easements, and rights-of-way, and the sum of these costs is in excess of 30 percent of the total cost. Where no cash contribution is required, but lands and rights-of-way alone are estimated to cost in excess of 30 percent of the project cost, local interests would be required to bear the full cost of that item, and there would be no change in the local cost.

Reservoirs have been included in the list of local protection projects only where local interests are required under existing law to provide rights-of-way because the flood-control benefits from the reservoirs are primarily local. Large reservoirs have been omitted from the tables because the benefits from such projects are widely dispersed over large geographic areas and insufficient information was available to identify the beneficiaries. One project, the Saginaw River, Mich., in-

cluded costs for preservation of fish and wildlife. Such costs were omitted and only costs allocated to flood control were considered. Some projects include flood control and drainage costs, e.g., the central and southern Florida project. One benefit from such projects is increased or higher use of the land, made possible by control of floods, improvement of drainage outlets, and control of water level for agricultural use. Information was not available to distribute the costs between flood control and drainage. The table indicates that under the proposed S. 2060 the costs to local interests for the central and southern Florida project would be reduced, whereas it is believed that if the flood-control costs only were considered the local costs would be increased.

The following table shows the allocation of costs to local interests in percent of total cost for those projects included in the table.

[Costs in million dollars]

	Total cost	Existing law		Proposed S. 2060	
		Local cost	Percent of total cost	Local cost	Percent of total cost
1954 Flood Control Act	250.7	65.6	26	90.6	36
1955, Public Law 218	5.8	1.5	26	1.8	30
1955, Public Law 256	131.0	7.9	6	39.3	30
1958 Flood Control Act	444.6	110.1	25	133.7	30
1948, section 205	12.3	2.8	23	4.2	34
1959, proposed	31.8	8.2	26	9.5	30
Total	876.2	196.1	22	279.1	32

I hope that the above information is sufficient for your needs. If not, I will be pleased to furnish additional information upon request.

Sincerely,

E. C. ITSCHNER,
Major General, U.S. Army,
Chief of Engineers.

Distribution of costs on local flood control projects authorized by Flood Control Act of 1954 (Public Law 780, 83d Cong., 2d sess.)

DEPARTMENT OF AGRICULTURE,
Washington, D.C., July 8, 1959.

Hon. PRESCOTT BUSH,
U.S. Senate.

DEAR SENATOR BUSH: In response to your letter of May 27, 1959, we are pleased to provide information on the distribution of costs between the Federal Government and non-Federal interests on watershed protection and flood prevention projects carried out under the authority of Public Law 566, as amended.

The enclosed table shows the distribution of costs for the purpose of flood prevention for all projects which have been authorized to receive Federal assistance between January 1, 1954, and June 1, 1959. In addition, it shows the changes in cost distribution that would result from the application of the provisions of the Uniform Cost-Sharing Act for Flood Control and Flood Prevention (S. 2060).

In accordance with the definition of flood prevention contained in the proposed act, the costs shown in the enclosed table do not include the cost of land treatment measures nor the cost of structural measures allocated to purposes other than flood prevention including drainage.

Data in the enclosed table show that, in accordance with the approved work plan, non-Federal interests will bear 13.8 percent of the installation cost of structural measures for the purposes of flood prevention in accordance with the requirements of Public Law 566, as amended. These include the cost of land, easements, and rights-of-way, including relocation and replacement of utilities and improvements, and the cost of administering contracts. The Federal Government is required by law to pay that part of the cost of construction, including engineering costs, of all structural measures applicable to flood prevention. The cost borne of non-Federal interests in approved projects ranges from about 1 to 61 percent.

Application of the Uniform Cost-Sharing Act to these watershed projects would have the effect of increasing the non-Federal cost on about 96 percent of the watershed projects. The non-Federal cost would then range from 30 to 61 percent, with an average of 30.6 percent.

While the foregoing information and tables are compiled in accordance with the specific provisions of S. 2060, we call your attention to two additional factors which are peculiar to watershed projects:

1. In addition to structural measures for flood prevention, watershed projects include another kind of measure installed primarily for flood prevention. These are land treatment measures for flood prevention and are often installed in lieu of structural measures. Non-Federal interests have agreed to bear about 38 percent of the cost of these measures in approved watershed projects and the Federal Government about 62 percent.

2. As a condition for receiving Federal assistance in the installation of structural measures, local organizations or landowners are required to install or to agree to install land treatment measures for the protection and improvement of watershed land. When the cost of land treatment measures are included in the cost distribution of watershed projects, the Federal cost from appropriations made under the authority of Public Law 566 is 56 percent and the cost from other sources is 44 percent of the total installation cost. These percentages include small amounts for purposes other than flood prevention, such as irrigation and drainage.

The cost of operation and maintenance, also required to be borne in full by local organizations, is not included in any of the data supplied in this letter.

We appreciate the opportunity to provide this information. If additional information is desired, we shall appreciate being advised.

Sincerely yours,

E. L. PETERSON,
Assistant Secretary.

Comparison of distribution of approved installation cost for flood prevention measures with that proposed in the Uniform Cost-Sharing Act— Watershed projects (Public Law 566)

[H.R. 7634, 86th Cong., 2d sess.]

Amendment intended to be proposed by Mr. BUSH to the bill (H.R. 7634) authorizing the construction, repair, and preservation of certain public works on rivers and harbors for navigation, flood control, and for other purposes, viz: On page 10, between lines 15 and 16, insert the following:

"STAMFORD, CONNECTICUT

"The project for hurricane-flood protection at Stamford, Connecticut, is hereby authorized substantially in accordance with the recommendations of the Chief of Engineers in House Document Numbered 210, Eighty-sixth Congress, at an estimated Federal cost of $3,476,000, and at an estimated Federal cost of maintenance and operation of $31,000 annually: *Provided*, That in lieu of the local cooperation recommended by the Chief of Engineers, local interests (a) provide without cost to the United States all lands, easements, and rights-of-way necessary for the construction of the project; (b) accomplish without cost to the United States all modifications to the existing storm drainage system, sanitary sewer facilities required to prevent the entry of tidal floodwaters, and all changes, alterations, and additions to or relocations of any buildings and utilities made necessary by the construction of the project; (c) bear 22 per centum of the total first cost of the project, a sum presently estimated at $1,230,000 to consist of the items listed in (a) and (b) above and a cash contribution now estimated at $960,000, the cash to be paid in a lump sum prior to commencement of construction, or at their option in annual amounts equal to the proportion of the annual Federal appropriations for construction of the project and the final allocation of cost to be made after actual costs and values have been determined; (d) contribute in cash, in lieu of the cost of annual maintenance and operation of the tidal portion of the East Branch barrier, an amount presently estimated at $880,000, the cash to be paid in a lump sum prior to commencement of construction; (e) maintain and operate all the works after completion, with the exception of the tidal portion of the East Branch barrier and aids to navigation, in accordance with regulations prescribed by the Secretary of the Army; and (f) hold and save the United States free from damages due to the construction works and the operation thereof.

"PAWCATUCK, CONNECTICUT

"The project for hurricane-flood protection at Pawcatuck, Connecticut, is hereby authorized substantially in accordance with the recommendations of the Chief of Engineers in House Document Numbered 212, Eighty-sixth Congress, at an estimated Federal cost of $456,000: *Provided*, That in lieu of the local cooperation recommended by the Chief of Engineers, local interests (a) provide without cost to the United States all lands, easements, and rights-of-way necessary for construction of the project; (b) accomplish without cost to the United States all alterations and relocations of buildings, streets, storm drains, and utilities made necessary by reason of the construction; (c) bear 22 per centum of the total first cost, a sum presently estimated at $129,000 to consist of the items listed in (a) and (b) above and a cash contribution now estimated at $39,000, the cash to be paid in a lump sum prior to commencement of construction and the final allocation of cost to be made after actual costs and values have been determined; (d) hold and save the United States free from damages due to construction works; and (e) operate and maintain all the works after completion in accordance with regulations prescribed by the Secretary of the Army."

[H.R. 7634, 86th Cong., 2d sess.]

Amendments intended to be proposed by Mr. BUSH to the bill (H.R. 7634) authorizing the construction, repair, and preservation of certain public works on rivers and harbors for navigation, flood control, and for other purposes, viz: On page 15, between lines 10 and 11, insert a new section as follows:

"SEC. 205. (a) It is the intent of Congress that non-Federal entities cooperating with the Federal Government in projects providing benefits from flood control or flood prevention shall receive uniform and equitable Federal assistance, and that to this end it is the purpose of this section to establish a cost-sharing policy applicable to projects which produce flood control or flood prevention benefits.

"(b) For the purpose of this section—

"(1) The term 'flood control or flood prevention benefits' shall include but not be limited to (A) reductions in damages or losses from streamflows that exceed the capacity of the channel within which the flow of a stream is normally confined or from abnormally high levels of lakes and coastal waters caused by hurricane and other major storms; (B) reductions in sediment and erosion damages caused by flood runoff; and (C) increases in net return resulting from changed or more intensive use of flood plain property made possible by reduction of flood risks, but such term shall not include increases in net return resulting from any change in the average moisture content of the soil, over the growing season, attributable to improved drainage or irrigation.

"(2) The term 'project' shall mean any separable engineering work or system of closely related engineering works of improvement for flood prevention except land treatment measures, which produce flood control or flood prevention benefits, which are constructed pursuant to the Flood Control Act of March 1, 1917 (33 U.S.C. 703–704), the Flood Control Act of May 15, 1928 (33 U.S.C. 702), the Flood Control Act of June 22, 1936 (33 U.S.C. 701), and the Reclamation Act of June 17, 1902 (43 U.S.C. 391), and Acts amendatory or supplementary to said Acts; and such works constructed with Federal financial assistance furnished under the Watershed Protection and Flood Prevention Act of August 4, 1954, as amended (16 U.S.C. 1001–1007), and the Small Reclamation Projects Act of August 6, 1956, as amended (43 U.S.C. 422a–422k), and such part of the works represented by the cost allocated to the production of flood control or flood prevention benefits of any multiple-purpose project undertaken pursuant to the Acts cited above shall be considered a project.

"(3) The term 'non-Federal entity' shall mean a State or any public entity created under State law or interstate compact, or any private entity, having authority to cooperate with the Federal Government in the planning, installation, and maintenance and operation of a project.

"(4) The term 'responsible Federal official' shall mean an official of the Federal Government authorized to carry out the provisions of the Acts cited in paragraph (2) of this subsection or acts supplementary or amendatory thereto.

"(5) The term 'first cost' shall mean all monetary outlays made and the value of goods and services contributed or provided by various interests for the planning, design, and project construction, including contract work, materials and supplies, labor, and use of equipment; acquisition of lands, easements, rights-of-way, and water rights; relocation of facilities and settlement of damage claims; interest during construction; protection of public health; replacement of or prevention of damages to recreation and fish and wildlife resources; and prevention of loss of or damages to mineral resources and scenic, archeological, historical, and associated values; but such term shall not include the cost of investigations, surveys, and planning undertaken prior to authorization

of the project or investigations and surveys financed by appropriations to Federal agencies other than the agency responsible for the project or having primary responsibility for furnishing Federal financial assistance for the construction of the project.

"(c) On and after the effective date of this section, no Federal agency shall incur any obligation for first cost except planning, design, and acquisition of water rights for a project or provide financial assistance for a project unless a State or, at the discretion of the responsible Federal official, one or more other non-Federal entities shall have entered, in advance, into an agreement satisfactory to said responsible Federal official to fulfill the requirements for operation and maintenance under subsection (d) of this section and to assume at least 30 per centum of the first cost of the completed project allocated to the production of flood control or flood prevention benefits, payable as construction proceeds or pursuant to a contract providing for repayment with interest within 50 years, except that (1) the actual cost or fair market value, as determined or approved by the responsible Federal official, of such lands, easements, rights-of-way, and work performed or services rendered prior to completion of construction of the project which are furnished, or required by law to be furnished, by a non-Federal entity shall be included in the share of the first cost to be borne by the non-Federal entity, and (2) where a project provides flood control or flood prevention benefits that are widely dispersed over a large geographic area, non-Federal entities shall be required to bear at least 30 per centum of the share of the first cost attributable only to significant flood control or flood prevention benefits which accrue to identifiable groups or beneficiaries. In the event that non-Federal entities other than a State do not enter into the agreements required by this subsection, no obligation may be incurred for first costs except planning, design, and acquisition of water rights unless a State shall enter into such contractural arrangements with the responsible Federal official.

"(d) The operation and maintenance of any project coming within the purview of this section shall be the responsibility of the non-Federal entity or entities bearing the non-Federal share of the first cost thereof under the provisions of subsection (c) of this section, or of any group of beneficiaries that the responsible Federal official deems appropriate in accordance with existing statutory requirements except that (1) the flood control beneficiaries shall bear, in any case, their share of the costs of operation and maintenance, and (2) if the responsible Federal official finds that operation and maintenance of any such project by the Federal Government would be in the public interest, such official may arrange for operation and maintenance by the Federal Government if such non-Federal entity or entities agree to bear the cost thereof. Where a project provides flood control or flood prevention benefits that are widely dispersed over a large geographic area, the non-Federal entity or entities shall bear that portion of the costs of operation and maintenance which the responsible Federal official determines to be equitable on the basis of the proportion of flood control or flood prevention benefits accruing to such non-Federal entities in relation to the total flood control or flood prevention benefits produced by the project.

"(e) The provisions of this section shall not be constructed to modify any provisions of existing laws except the cost-sharing provisions thereof, nor to apply to any existing project or to any project determined by the responsible Federal official to be under contract or construction as of the effective date of this section, except that the duties, responsibilities, and financial obligations of non-Federal entities under the cost-sharing provisions of existing laws shall not be diminished by the provisions of this section.

"(f) This section may be cited as the 'Uniform Cost-Sharing Act for Flood Control and Flood Prevention'.

EXHIBIT 3

APRIL 12, 1960.

Hon. ALLEN J. ELLENDER,
Chairman, Subcommittee on Public Works Appropriations, U.S. Senate, Washington, D.C.

DEAR SENATOR ELLENDER: I respectfully request that your subcommittee support the inclusion in the public works appropriation bill of certain projects important to continued forward progress in the flood protection program for Connecticut and New England, as well as an item of $750,000 for the improvement of Bridgeport harbor.

Connecticut flood protection projects included in the budget submitted by the Corps of Engineers, and the amounts recommended by the Corps, include: Hall Meadow Brook Reservoir, Torrington, $1 million; Mad River Reservoir, Winsted, $870,000; Thomaston Reservoir, $1,547,000; and East Branch Reservoir, Torrington (new planning start), $150,000.

Additionally, we in Connecticut have strong interest in orderly continuation of the hurricane studies authorized by Public Law 71, 84th Congress, budgeted for $850,000; and in the small projects program authorized by Public Law 685, 85th Congress, budgeted for $2,000,000, as well as in the dams to our north in Massachusetts, New Hampshire and Vermont which contribute generally to the protection of the New England region as well as to that of our own State.

Pending in the Senate Committee on Public Works is H.R. 7634, the public works authorization bill, in which a number of Connecticut projects are eligible for inclusion. Already fully documented are:

Hurricane protection project for Stamford, Connecticut. House Document No. 210, 86th Congress, 1st session. Benefit-to-cost ratio, 1.5 to 1.0.

Hurricane protection project for Pawcatuck, Conn. House Document No. 212, 86th Congress, 1st session. Benefit-to-cost ratio, 2.1 to 1.0.

West Thompson, Conn., flood control dam and reservoir, Senate Document No. 41, 86th Congress, first session. Benefit-to-cost ratio, 1.3 to 1.0.

Additional flood protection for the lower Naugatuck River Valley, consisting of four dams and reservoirs for flood control, on Northfield Brook, Branch Brook, Hancock Brook and Hop Brook. House Document No. 372, 86th Congress, 2d session. Benefit-to-cost ratios ranging between 1.7 to 1.0 and 2.0 to 1.0.

I am hopeful that certain additional projects will be fully processed and documented before the Senate is ready to act on H.R. 7634. These include a local protection plan for Ansonia-Derby in the Naugatuck River Valley, and two projects in the Farmington River Valley, a flood control reservoir on Sucker Brook and a dual purpose reservoir for flood control and water storage at Colebrook.

It will be greatly appreciated if you will request the Corps of Engineers to submit estimates of the amount of planning funds which could profitably be employed on all the above listed projects, not presently in the budget, in the coming fiscal year. In the event these projects are approved by the Congress, I am hopeful that your Subcommittee will support the necessary appropriations to accomplish the planning recommended by the Corps, either in the pending appropriations bill or a supplemental bill to be considered later.

With appreciation for your consideration and for the work you have already done in support for flood control for my State and region, I am,

Cordially yours,

PRESCOTT BUSH.

Mr. JOHNSON of Texas. Mr. President, I yield the Senator from Utah [Mr. BENNETT] 2 minutes.

The PRESIDING OFFICER. The Senator from Utah is recognized for 2 minutes.

Mr. BENNETT. Mr. President, it is with some sense of regret that I must oppose the omnibus public works authorization bill as it was reported to the Senate. The regret arises because I have always supported sound, carefully planned projects which meet all of the requirements of Federal law and have gone through the required procedural steps. It is likewise regrettable that I must oppose a bill which contains a sound, worthwhile project in my own State, the $6,060,000 Little Dell Dam and Reservoir near Salt Lake City, Utah.

I have worked, ever since the serious 1952 floods, to obtain protection for the several important areas of Salt Lake City which received costly flood damage. Thus, the project in the omnibus bill culminates nearly 8 years of work on my part. The dam would create a reservoir with a gross storage capacity of 8,000 acre-feet. It would not only be of great value in controlling floods from Parleys and Emigration Canyons, but it would also add 1 billion gallons yearly to Salt Lake City's water supply. Moreover, the project plan calls for a much higher degree of local participation than is usual, 36.5 percent of the total cost, plus another $341,000 for land, rights-of-way, and highway relocation. It is a much needed and meritorious project.

However, I cannot in good conscience vote for an omnibus bill, even though it contains many good projects, which is so loaded down with unsupportable projects as is H.R. 7634 now being considered by the Senate. In fact, the bill is worse than the omnibus bill vetoed by the President in 1958.

There are 12 projects tacked onto this year's omnibus bill, with a total Federal cost of $150.5 million, to which the administration objects for substantive reasons. There have been no project reports whatever from the administration on 10 projects having a total cost of $80.8 million. I cannot feel too sad about opposing these 10 projects since the Little Dell project was in precisely the same fix in 1958, and was therefore not authorized. In addition, there are 24 projects included in the bill, costing $186.1 million, on which there is inadequate cost sharing by local participants. Thus, there are 45 objectionable projects, costing $417.4 million, that have been loaded onto the omnibus bill.

Since the President vetoed a public works bill just 2 years ago which had 30 objectionable projects, costing $350.9 million, it seems fair to observe that the sponsors of this year's bill are inviting yet another veto. Some of them may even prefer a political issue this fall to a good bill.

It is tragic that 80 good projects in the bill should be jeopardized and held hostage by 45 bad ones. It is just this type of bill which triggers the charge of "pork-barrel" against flood-control legislation, and with considerable justification. Unfortunately the pork-barrel label sticks to the good projects as well.

TITLE III. NONREIMBURSABLE RECREATION COSTS

Title III of H.R. 7634 would authorize a nonreimbursable allocation to recreation of up to 10 percent of the total costs of new Corps of Engineers and Bureau of Reclamation projects, with an additional allocation if recreation is found to have national significance. While I have supported some Federal participation in this area, it is premature to enact widesweeping recreation legislation of this nature since the Outdoor Recreation Resources Commission created by Congress will not complete its study until next year. It is pointless to create a commission to study recreation, and then preempt the entire area with legislation.

The bill provides that recreation benefits shall be based on a formula giving a minimum value of 50 cents per visitor-day. It is of doubtful wisdom to freeze such a formula into law. Moreover, the bill does not provide for local financial participation in recreation costs. If the benefits are local, at least a significant portion of the costs should be borne by State or local government.

For all of these reasons, I feel that I must vote against the bill unless it is amended to correct the many weaknesses that I have cited.

The PRESIDING OFFICER. Is all time on the bill yielded back?

Mr. CASE of South Dakota. I yield back my time.

Mr. JOHNSON of Texas. I yield back my time.

The PRESIDING OFFICER. All time on the bill has been yielded back.

The bill having been read the third time, the question is, Shall it pass? On this question the yeas and nays have been ordered, and the clerk will call the roll.

The Chief Clerk called the roll.

Mr. MANSFIELD. I announce that the Senator from Colorado [Mr. CARROLL], the Senator from California [Mr. ENGLE], the Senator from Georgia [Mr. RUSSELL], the Senator from Mississippi [Mr. STENNIS], the Senator from Texas [Mr. YARBOROUGH], the Senator from Alaska [Mr. BARTLETT], the Senator from Virginia [Mr. BYRD], the Senator from New Mexico [Mr. CHAVEZ], the Senator from Oregon [Mr. LUSK], and the Senator from Montana [Mr. MURRAY] are absent on official business.

I also announce that the Senator from Arkansas [Mr. FULBRIGHT], and the Senator from Missouri [Mr. HENNINGS] are absent because of illness.

I further announce that the Senator from Massachusetts [Mr. KENNEDY], the Senator from Tennessee [Mr. KEFAUVER], the Senator from Michigan [Mr. McNAMARA], the Senator from Oregon [Mr. MORSE], and the Senator from Wyoming [Mr. O'MAHONEY] are necessarily absent.

I further announce that, if present and voting, the Senator from Colorado [Mr. CARROLL], the Senator from California [Mr. ENGLE], the Senator from Arkansas [Mr. FULBRIGHT], the Senator from Missouri [Mr. HENNINGS], the Senator from Tennessee [Mr. KEFAUVER], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Michigan [Mr. McNAMARA], the Senator from Oregon [Mr. MORSE], the Senator from Mississippi [Mr. STENNIS], the Senator from Texas [Mr. YARBOROUGH], the Senator from Alaska [Mr. BARTLETT], the Senator from New Mexico [Mr. CHAVEZ], the Senator from Montana [Mr. MURRAY], and the Senator from Oregon [Mr. LUSK] would each vote "yea."

Mr. KUCHEL. I announce that the Senator from Maryland [Mr. BUTLER] is absent because of illness.

The Senator from Indiana [Mr. CAPEHART] is absent by leave of the Senate.

The Senator from New Hampshire [Mr. COTTON] and the Senator from Nebraska [Mr. HRUSKA] are necessarily absent.

The Senator from Iowa [Mr. HICKENLOOPER], the Senator from South Dakota [Mr. MUNDT], and the Senator from Kansas [Mr. SCHOEPPEL] are absent on official business.

The Senator from New Jersey [Mr. CASE] is detained on official business.

If present and voting, the Senator from Indiana [Mr. CAPEHART], the Senator from Nebraska [Mr. HRUSKA] and the Senator from Kansas [Mr. SCHOEPPEL] would each vote "yea."

On this vote the Senator from South Dakota [Mr. MUNDT] is paired with the Senator from New Jersey [Mr. CASE]. If present and voting the Senator from South Dakota would vote "yea," and the Senator from New Jersey would vote "nay."

The result was announced—yeas 70, nays 5, as follows:

[No. 230]

YEAS—70

Aiken	Gore	Mansfield
Allott	Green	Martin
Anderson	Gruening	Monroney
Beall	Hart	Morton
Bible	Hartke	Moss
Bridges	Hayden	Muskie
Brunsdale	Hill	Pastore
Bush	Holland	Prouty
Byrd, W. Va.	Humphrey	Proxmire
Cannon	Jackson	Randolph
Carlson	Javits	Robertson
Case, S. Dak.	Johnson, Tex.	Saltonstall
Church	Johnston, S.C.	Scott
Clark	Jordan	Smathers
Cooper	Keating	Smith
Curtis	Kerr	Sparkman
Dodd	Kuchel	Symington
Douglas	Lausche	Talmadge
Dworshak	Long, Hawaii	Wiley
Eastland	Long, La.	Williams, N.J.
Ellender	McCarthy	Young, N. Dak.
Ervin	McClellan	Young, Ohio
Fong	McGee	
Frear	Magnuson	

NAYS—5

Bennett	Goldwater	Williams, Del.
Dirksen	Thurmond	

NOT VOTING—25

Bartlett	Fulbright	Mundt
Butler	Hennings	Murray
Byrd, Va.	Hickenlooper	O'Mahoney
Capehart	Hruska	Russell
Carroll	Kefauver	Schoeppel
Case, N.J.	Kennedy	Stennis
Chavez	Lusk	Yarborough
Cotton	McNamara	
Engle	Morse	

So the bill (H.R. 7634) was passed.

Mr. KERR. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. CASE of South Dakota. Mr. President, I move to lay that motion on the table.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table.

The motion to lay on the table was agreed to.

Mr. KERR. Mr. President, I move that the Senate insist upon its amendments to H.R. 7634 and request a conference with the House on the disagreeing votes thereon, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer appointed Mr. CHAVEZ, Mr. KERR, Mr. McNAMARA, Mr. CASE of South Dakota, and Mr. COOPER conferees on the part of the Senate.

Mr. KERR. Mr. President, I ask unanimous consent that H.R. 7634, as passed by the Senate, be printed, with the amendments of the Senate numbered.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Oklahoma? The Chair hears none, and it is so ordered.

MESSAGE FROM THE HOUSE—ENROLLED BILL SIGNED

A message from the House of Representatives, by Mr. Bartlett, one of its reading clerks, announced that the Speaker had affixed his signature to the enrolled bill (H.R. 9883) to adjust the rates of basic compensation of certain officers and employees of the Federal Government and for other purposes, and it was signed by the President pro tempore.

DEPARTMENTS OF LABOR, AND HEALTH, EDUCATION, AND WELFARE APPROPRIATIONS, 1961

Mr. JOHNSON of Texas. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 1639, H R. 11390.

The PRESIDING OFFICER. The bill will be stated by title.

The LEGISLATIVE CLERK. A bill (H.R. 11390) making appropriation for the Departments of Labor, and Health, Education, and Welfare, and related agencies, for the fiscal year ending June 30, 1961, and for other purposes.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Texas.

The motion was agreed to; and the Senate proceeded to consider the bill, which had been reported from the Committee on Appropriations, with amendments.

Mr. JOHNSON of Texas. Mr. President, I ask for the yeas and nays on final passage of the appropriation bill for the Departments of Labor, and Health, Education, and Welfare.

The yeas and nays were ordered.

LEGISLATIVE PROGRAM

Mr. DIRKSEN. Mr. President, I assume that it is the intention of the majority leader to conclude action on the appropriation bill for the Departments of Labor, and Health, Education, and Welfare, which is the business of tonight. I would like to ask him whether he has any observations with respect to Senate business for tomorrow.

Mr. JOHNSON of Texas. First, the Senator from Utah [Mr. BENNETT] wishes to present two or three conference reports. Then we shall resume consideration of the appropriation bill for the Departments of Labor, and Health, Education, and Welfare, which we hope to conclude this evening.

I should like to plan to have the Senate convene tomorrow morning at 10 o'clock at which time it is planned to proceed to consider the debt ceiling bill and the tax extension bill.

Mr. DIRKSEN. Mr. President, is the Senate to infer from that statement that the debt ceiling and tax extension bills will be the order of business tomorrow?

Mr. JOHNSON of Texas. No; I cannot tell about that at this time.

Mr. THURMOND. Mr. President, I cannot hear the Senator from Texas.

Mr. JOHNSON of Texas. The Senator from Illinois asked if he could infer from what I said that in the morning the Senate will consider the debt ceiling bill and the excise tax bill and that they will be the order of business tomorrow. I told him I could not tell him at this time.

Mr. DIRKSEN. Other than that, I wonder if the Senate can be advised what other measures may come up tomorrow.

Mr. JOHNSON of Texas. I do not know, until we decide on the tax measure. The Senator from Illinois is fully aware of my problems in that connection, and I trust he will not embarrass me more than I am already embarrassed.

Mr. DIRKSEN. I trust I have not embarrassed the distinguished Senator.

Mr. JOHNSON of Texas. No. But I am embarrassed in not being in a position to tell the Senator as to what we intend to schedule tomorrow. I cannot definitely tell him at this moment whether the bill to which he referred will be scheduled, but during consideration of the appropriation bill for the Departments of Labor, and Health, Education, and Welfare, and before the yea-and-nay vote on that bill, I shall be able to do so. I assume there will be time between now and the rollcall vote to make the desired announcement.

Mr. DIRKSEN. I am sure the majority leader knows that my questions are never designed to embarrass him. Senators, of course, would like to know what the order of business is for the remainder of the day and what may be anticipated for tomorrow. I appreciate the difficulties involved in setting the schedule, but I am quite satisfied with the answer at the moment, because I am sure that later in the evening there will be some clarification.

TEMPORARY SUSPENSION OF DUTY ON CERTAIN EFFECTS BROUGHT INTO THE UNITED STATES UNDER GOVERNMENT ORDERS—CONFERENCE REPORT

Mr. BENNETT. Mr. President, I submit a report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 9881) to extend for 2 years the existing provisions of law relating to the free importation of personal and household effects brought into the United States under Government orders. I ask unanimous consent for the present consideration of the report.

The PRESIDING OFFICER. The report will be read for the information of the Senate.

The legislative clerk read the report.

(For conference report, see House proceedings of June 25, 1960, p. 14322, CONGRESSIONAL RECORD.)

The PRESIDING OFFICER. Is there objection to the present consideration of the report?

There being no objection, the Senate proceeded to consider the report.

Mr. BENNETT. Mr. President, the bill H.R. 9881 provides for a 2-year extension of the present law permitting the free importation of personal and household effects brought into the United States by citizens and returning from foreign assignments under Government orders.

The Finance Committee proposed an amendment which was accepted by the Senate to limit the value of such goods and to require that the assignment in each case be for a minimum period.

The amendment was adopted primarily to prevent excessive amounts from being brought in free of duty and it was felt that the limitation as to value and time would correct this possibility.

The House conferees pointed out a number of administrative problems and to several other statutes permitting the free importation of household and personal effects that the amendment might appear to modify or be in conflict with.

The House stood firm in its opposition to the amendment but joined with the Senate conferees in admonishing the departments and agencies affected that very close checks should be kept on the use of this privilege during the 2 years of the extension and that abuses or the importation of unreasonable amounts by individuals might cause changes in the law next time it comes up for renewal. The agencies are to file a report not later than January 15, 1962, with respect to the operation of the law. On this basis the conferees agreed to recede and I hope the conference report will be agreed to.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

Mr. HARTKE. Mr. President, I do not intend to object to the receding on the part of the Senate conferees, but I would like to point out briefly that the views of the Senate were supposed to be represented by the conferees appointed by the Senate, and among the Senate conferees there was not one single member who voted for the Senate views as presented on a rollcall vote in the Senate.

I feel that this is a violation of Senate procedure, which requires that the conferees should represent the view of the Senate. However, in view of the lateness of the hour, I do not intend to insist upon any further consideration. I think that procedure involves a violation of the rule, and that in the future consideration should be given to the conferees representing the views of the Senate and not just merely the views of those Senators who oppose the amendment.

Mr. BENNETT. Mr. President, I appreciate the attitude of my friend from Indiana, but I think he is referring to another conference report. The one we have been discussing is the conference report on H.R. 9881, which relates to the free importation of personal and household effects brought into the United States under Government orders. I doubt that there was a yea-and-nay vote on that bill.

Mr. HARTKE. I apologize to the Senator.

Mr. ANDERSON. Mr. President, will the Senator yield?

Mr. BENNETT. I yield.

Mr. ANDERSON. Did the Senate conferees surrender the position of the Senate completely?

Mr. BENNETT. The Senate receded with an agreement.

Mr. ANDERSON. Did it surrender its position completely?

Mr. BENNETT. The Senate conferees surrendered their position with an agreement that the agencies should make a report by January 1, 1962, as to what they had done to step up their checks on possible abuse of this privilege.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The report was agreed to.

SUSPENSION OF DUTIES ON CERTAIN COARSE WOOL—CONFERENCE REPORT

Mr. BENNETT. Mr. President, I submit a report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 9322) to make permanent the existing suspension of duties on certain coarse wool. I ask unanimous consent for the present consideration of the report.

The PRESIDING OFFICER. The report will be read for the information of the Senate.

The legislative clerk read the report.

(For conference report, see House proceedings of June 25, 1960, p. 14321, CONGRESSIONAL RECORD.)

The PRESIDING OFFICER. Is there objection to the present consideration of the report?

There being no objection, the Senate proceeded to consider the report.

Mr. BENNETT. Mr. President, the House adopted H.R. 9322 which would

make permanent the present temporary suspension of duties on certain coarse wools to be used in the manufacture of rugs, carpets, and so forth. The suspension was first adopted by law in 1957, for a period of 3 years.

The Senate amended the bill to provide for another 3-year extension and the House demanded a conference.

The reason that the Finance Committee originally recommended and the Senate adopted the 3-year extension was that one or two groups of wool producers had not satisfied themselves that there was not some risk in the permanent suspension. There was the thought that some day the domestic production of coarse wools might be interfered with by the importation of such wools.

In the conference it was pointed out that the finer wools are much more valuable than the coarse wools and it is the ambition of all sheepowners to improve their wools. It is most unlikely that the production of coarse wools will increase. The groups who originally had some apprehension about the duty suspension withdrew any objections and reservations. The House conferees were united in their stand that the permanent provision be retained and the Senate conferees receded. We shall, however, watch the operation of the measure, if it becomes law, and should any effect not now foreseeable occur in the future, the situation can be brought to the attention of the Senate.

I move that the conference report be adopted.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The report was agreed to.

SUSPENSION OF IMPORT DUTIES ON CERTAIN SHOE LATHES AND CASEIN—CONFERENCE REPORT

Mr. BENNETT. Mr. President, I submit a report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 9862) to continue for 2 years the existing suspension of duties on certain lathes used for shoe last roughing or for shoe last finishing. I ask unanimous consent for the present consideration of the report.

The PRESIDING OFFICER. The report will be read for the information of the Senate.

The legislative clerk read the report.

(For conference report, see House proceedings of June 25, 1960, p. 14323, CONGRESSIONAL RECORD.)

The PRESIDING OFFICER. Is there objection to the present consideration of the report?

There being no objection, the Senate proceeded to consider the report.

Mr. BENNETT. Mr. President, as the Senate will recall, the original bill to extend for 3 years the exemption from duties applying to casein was adopted by the House without opposition and sent to the Senate.

Prior to Senate passage, but after the Finance Committee had reported the bill, some opposition arose and the Finance Committee agreed to hold hearings. In the meantime, the expiration date ending the earlier suspension was very near, and, in order to provide for hearings, the Senate amended the bill to provide for an additional 90-day period to prevent the suspension from lapsing.

This meant, of course, that the original bill had passed both Houses and was no longer before us.

After hearings and executive action by the committee, the intent of the House, namely a 3-year extension of the suspension of duties, was reported by the Finance Committee in the form of an amendment to another House-passed bill, H.R. 9862. On the floor of the Senate an amendment was added which would prevent the duty suspension from applying to casein "imported for use for human food or for conversion to such use." The House demanded a conference.

Out of that conference came a compromise that seems not only fair but more easily administered.

The House conferees accepted the 3-year period of the suspension of duties adopted by the Senate, and also passed by the House on the earlier bill.

With regard to the Senate amendment concerning casein to be used for food, the House conferees stood firm in opposition. A compromise was worked out providing that the suspension of duty shall not apply "with respect to sodium caseinate, sodium phospho-caseinate, or other caseinates, any of the foregoing of which casein or lactarene is the component material of chief value."

Now practically all casein is theoretically edible, but it is not generally eaten until processed and made up in powdered form which is designated as "caseinate." Wheat is edible, but we grind it and process it before it is eaten. So it is with casein.

There is practically no domestic production of casein as such, although one plant makes caseinates from milk. Imported casein is used in other plants to make caseinates and caseinates themselves are imported in large quantities so that the plants that make caseinates from imported casein would be forced to close if the casein they use cannot be purchased at a price sufficiently below the price of imported caseinates. In other words, our imports of casein which would eventually be made into the consumable caseinate, would be replaced by the imports of the caseinate ready to be consumed. These caseinates already have acquired more than 50 percent of the domestic market and could increase tremendously. They may do so even under the provision which is now in the bill and which was approved by the conference, namely to retain the statutory duty of 2¾ cents, because of much lower foreign conversion costs.

The conferees could not put any higher duty on caseinates because no such figure was in conference. It could only carry out what seemed to be the real intent of the original amendment—to protect the domestic milk industry and the domestic plants employing domestic labor in the production of the real edible form of casein.

I hope the conference report will be adopted.

Mr. HARTKE. Mr. President, will the Senator yield?

Mr. BENNETT. I yield.

Mr. HARTKE. I should like to ask the Senator whether he does not understand that the conference report does not protect the milk industry, and that the conferees on the part of the Senate did not number among them any Senator who had voted for the amendment on the floor of the Senate?

Mr. BENNETT. The Senator from Utah feels—and he was one of the conferees—that the report carries out the principle of protecting the domestic milk industry just as effectively as if the original language had been left in the bill, because the real competition in the domestic industry is not from the manufacturers who transform casein into caseinates; it is from the foreign manufacturer who ships caseinates into the United States in the finished and consumable form. These foreign manufacturers have already captured between 50 and 60 percent of the domestic market, leaving less than 50 percent to the American manufacturer of caseinate. In its original form I believe the bill would have had the effect, perhaps, of protecting one producer of caseinate, who produced it directly from milk without going through the casein process, but it would have left the door open for the importation from Europe of finished caseinate. On that basis I doubt that the American manufacturer would have had the protection he sought. As it is now, foreign caseinates can come into the countery and undersell domestic production by 3 or 4 cents. Perhaps the duty of 2¾ cents is not sufficient, but I think in view of the actual situation involved in the matter the committee gave equal protection to the domestic industry compared to that which was offered by the bill. It does have the advantage that caseinate can be readily identified by customs, whereas casein, whether it is edible or inedible, would be very difficult to detect.

Mr. HARTKE. I should like to ask the Senator if it is not true that none of the conferees representing the Senate's position voted for the amendment.

Mr. BENNETT. I am sure that the Senator from Utah did not vote for it. I cannot be categorically sure about the other conferees.

Mr. HARTKE. Is it not true that the Senator from Utah, representing the Senate on the conference, in fact opposed the amendment which was presented on the floor of the Senate and spoke against the amendment and voted against the amendment?

Mr. BENNETT. That is true.

Mr. HARTKE. He was selected by the Senate as a conferee to insist, under instructions from the Senate, on the Senate amendment. Is that correct?

Mr. BENNETT. That is true. I believe the Senator from Utah as one of conferees did a good job of preserving the real meaning of the Senate amendment. I do not believe it is a complete abandonment.

Mr. HARTKE. That statement of the Senator might be open to discussion. I should like to ask a further question of the Senator. How long a time was spent by the Senate conferees on insisting on the position of the Senate?

Mr. BENNETT. The conference took up the three bills which we have considered here. Most of the time was spent in discussing the casein bill, and the meeting lasted 2 hours.

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. BENNETT. I yield.

Mr. AIKEN. Inasmuch as caseinate involves a price-supported commodity, it is possible for the President to establish quotas for the importation of this product should it appear that the importations were large enough to affect the price support program or drive the domestic product off the market. Is that not correct?

Mr. BENNETT. It is the understanding of the Senator from Utah that under section 22 that is possible.

Mr. AIKEN. That would be the proper procedure in the event caseinate, in spite of continuing the 2⅞ cent tariff, continues to come into this country at a rate which would tend to destroy the domestic industry. Is that correct?

Mr. BENNETT. That is true. We may have to resort to that. As I have indicated, foreign caseinate has already captured between 50 and 60 percent of the market in this country.

Mr. HARTKE. Mr. President, will the Senator yield?

Mr. BENNETT. I yield.

Mr. HARTKE. I should like to ask the distinguished Senator if any votes were cast by the Senate conferees in the conference on behalf of the amendment and on behalf of the Senate's position?

Mr. BENNETT. The memory of the Senator from Utah is not good enough to answer that question categorically.

Mr. HARTKE. Perhaps if the Senator were to confer with his fellow conferees he would be able to answer that question.

Mr. ANDERSON. Mr. President, will the Senator yield?

Mr. BENNETT. I yield.

Mr. ANDERSON. Certainly the Senator can remember how he voted. Did he or any other conferee on the part of the Senate vote to sustain the position of the Senate established by a yea and nay vote? That is a simple question.

Mr. BENNETT. I do not believe the matter came before the conference in that form.

Mr. ANDERSON. Would it be fair to say that no Senate conferee voted to sustain the Senate's position, adopted by a yea-and-nay vote in the Senate?

Mr. BENNETT. I think that is a fair statement.

Mr. ANDERSON. I think that is too bad.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

Mr. LONG of Louisiana. Mr. President, it has been said that not a single Senate conferee voted to sustain the Senate's position on this matter. I think the conference report should be rejected.

The distinguished Senator from Indiana offered his amendment and the majority of the Senate approved it; yet not a single Senate conferee supported the amendment which was the position of the Senate. I think we should reject the conference report and simply assert, for once, that when a majority of the Senate votes for an amendment, that amendment should be supported—at least in the beginning of the conference committee's deliberations.

Let us consider the report again. Let us name the Senator from Indiana [Mr. HARTKE], who sponsored the amendment, as chairman of the conference, or at least a member of it.

What is the use of amending a bill and sending it to conference when the Senate conferees themselves eliminate the amendment?

The testimony is that not a single Senator voted in conference to sustain the Senate's position. The Senator from Indiana offered an amendment, which the Senate watered down to an almost unrecognizable point. Nevertheless, what little was left was entitled to the support of those who represented the body of Congress that passed it. It did not get one Senate conferee vote.

I suggest that we reject the conference report and try again. All I want to do is to make certain that we have a chance to vote on the Senate amendments in the conference.

Mr. BENNETT. Mr. President, I should like to make an observation. The Senator from Utah was not the chairman of the conference. The distinguished Senator from Virginia [Mr. BYRD], chairman of the Committee on Finance, was chairman of the conference. The Senate conferees consisted of three Democrats and two Republicans, which has been the pattern of the conferees in the Committee on Finance ever since I have been a member of that committee. I think we effectively carried out the will of the Senate.

Mr. LONG of Louisiana. How many Senate votes were cast in favor of the Senate amendment? Not one.

Mr. BENNETT. May I finish? This is a compromise which was worked out before any vote was taken. We effectively preserved the tariff on edible casein. I have nothing further to say.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

Mr. LONG of Louisiana. Mr. President, I should like to speak for 1 minute.

I opposed the casein amendment. It does not benefit my State, but I am appalled at the minority influence on the Senate conference members, particularly at a time when the Senate has a two-thirds Democratic majority.

The Democratic Senator from Indiana proposed an amendment which was passed by the Senate but it appears it was not even considered in conference since it did not get a single vote even from his own Democratic conferees from the Senate.

Why do we not give the Senator from Indiana a vote? Let us try again. Let the Senator from Indiana be appointed a conferee. Let him be the chairman of the conferees.

The PRESIDING OFFICER. The question is on agreeing to the conference report. (Putting the question.)

Mr. LONG of Louisiana. Mr. President, I ask for a division.

On a division, the report was agreed to.

Mr. LONG of Louisiana. I ask for the yeas and nays, Mr. President.

The PRESIDING OFFICER. The result has been announced. It is too late to ask for the yeas and nays.

Mr. LONG of Louisiana. I asked for the yeas and nays before the result was announced.

The PRESIDING OFFICER. Before the yeas and nays were asked for, the result had been announced.

Mr. LONG of Louisiana. Mr. President, I suggest the absence of a quorum. There is not a quorum present. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

[No. 231]

Aiken	Fong	Mansfield
Allott	Frear	Martin
Anderson	Gore	Monroney
Beall	Gruening	Morton
Bennett	Hart	Moss
Bible	Hartke	Muskie
Bridges	Hill	Pastore
Brunsdale	Holland	Prouty
Bush	Humphrey	Proxmire
Byrd, Va.	Jackson	Randolph
Byrd, W. Va.	Javits	Robertson
Cannon	Johnson, Tex.	Saltonstall
Carlson	Johnston, S.C.	Scott
Case, S. Dak.	Jordan	Smathers
Church	Keating	Smith
Clark	Kerr	Sparkman
Cooper	Kuchel	Symington
Curtis	Lausche	Talmadge
Dirksen	Long, Hawaii	Thurmond
Dodd	Long, La.	Wiley
Douglas	Lusk	Williams, Del.
Dworshak	McCarthy	Williams, N.J.
Eastland	McClellan	Young, N. Dak.
Ellender	McGee	Young, Ohio
Ervin	Magnuson	

The PRESIDING OFFICER (Mr. WILLIAMS of New Jersey in the chair). A quorum is present.

Mr. LONG of Louisiana. Mr. President——

The PRESIDING OFFICER. The Senator from Louisiana.

Mr. LONG of Louisiana. Mr. President, a point of order. Was there a quorum present when the Senate agreed to the conference report?

The PRESIDING OFFICER. On the record there was a quorum present.

Mr. LONG of Louisiana. Does the Chair undertake to rule that the Senate had acted on the conference report at a time when there was no quorum present?

The PRESIDING OFFICER. A quorum was present on the record. Action on a conference report does not require a quorum call. It is presumed a quorum is present until the record shows otherwise.

Mr. LONG of Louisiana. Does the Chair state the Senate must stand on action taken when there was not a majority opinion? Is a motion to entitle the Senate to the yeas and nays on the conference report foreclosed?

The PRESIDING OFFICER. Will the Senator restate the question?

Mr. LONG of Louisiana. Is the Senate entitled to have a yea-and-nay vote on the conference report?

The PRESIDING OFFICER. If the request had been made at the proper time, before the vote was announced, the yeas and nays could have been requested and granted.

Mr. LONG of Louisiana. Is it not customary, when the yeas and nays are requested, and the absence of a quorum is suggested, for the Senate to reserve judgment on the issue until a quorum is present?

The PRESIDING OFFICER. As previously stated, it is presumed that a quorum is present until the record shows otherwise.

Mr. LONG of Louisiana. Does the record not show otherwise?

The PRESIDING OFFICER. The record does not.

Mr. LONG of Louisiana. The record shows a quorum was not present.

The PRESIDING OFFICER. On the contrary; the vote was by a voice vote.

Mr. LONG of Louisiana. Am I to understand the Chair rules the Senate has agreed to a conference report which cannot be made subject to a yea-and-nay vote, although there was no quorum present, and the Chair had to cause the roll to be called twice to get a quorum in the Chamber?

The PRESIDING OFFICER. When the vote was announced a quorum was present.

Mr. LONG of Louisiana. Is it the ruling of the Chair that the action stands, and the motion carries, even though there was no quorum present?

The PRESIDING OFFICER. That is not the ruling of the Chair. There was a quorum present officially, on the record, at the time the vote was announced.

Mr. LONG of Louisiana. Mr. President, I ask unanimous consent that the vote be rescinded.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Louisiana?

Mr. DIRKSEN. Mr. President, reserving the right to object, does the Senator from Utah have any comment?

Mr. BENNETT. Mr. President, the Senator from Utah must object.

The conference report was considered in exactly the same way most conference reports are considered in this body. We even had a division on the vote.

I will retract my statement. We do not usually have a division on votes, but we had a division on the vote, and the Presiding Officer announced the result of the division.

I object to having the vote rescinded.

The PRESIDING OFFICER. Objection is heard.

Mr. LONG of Louisiana. Mr. President, I make the point that there was no quorum present.

This is a case in which a Senator comes in with a conference report, and there are only a few Senators in the Chamber. What is the effect of the conference report? The Senator from Indiana had his position sustained, at least in part, when his amendment was passed in a revised form, yet the Senate conferees threw the proposal in the trash basket on the way to see the House conferees. Not a single Senate conferee voted for the Senator's amendment. The result is that some Senator walks into the Chamber, with only a few Senators present, and moves that the Senate agree to the House position in conference, without that conference ever having really considered the Senate amendments.

My good friend from Utah simply moved to accept the House position and to reject the Senate position. That is all there was to it.

Mr. President, I did not vote with the distinguished Senator from Indiana. However, I think the Senator is entitled to more consideration. His amendment should not be discarded on the way to the conference.

The testimony on this floor is that the Senator did not receive a single vote for his position.

Mr. President, the two branches of Congress are coequal. The Senate is entitled to have at least one Senator vote for its position in conference. At least one Senator should make a gesture to uphold the majority position of the Senate.

I say to my friend from Indiana, even though I disagreed with him and voted against him, that he is entitled to have at least a gesture made in his behalf.

I hope we shall take the attitude that the Senate conferees should represent the Senate and should try to stand by the Senate position. I had hoped the Senate would vote to reject the conference report. Perhaps new conferees could have been named.

Mr. President, all of this proposed legislation comes from the Committee on Finance. I am a member of that committee. I have gone to conference as a member of that committee on a number of occasions. I have also yielded my place in a conference to some other Senator because of the other Senator's vital interest in the subject.

Other Senators, such as my distinguished friend from Oklahoma, and my distinguished friend from Delaware, have yielded to allow me to serve on conference committees. In this instance, I would have been willing to yield to let my distinguished friend from Indiana serve on the conference committee and make an attempt to sustain his position. It does not look like any one tried to do so this time and, as a result, no Senator tried to sustain the position of the Senator from Indiana.

Our distinguished friends on the Republican side of the aisle—I am sorry that my distinguished friend from Utah has disappeared——

Mr. BENNETT. I am present.

Mr. LONG of Louisiana. Mr. President, I regret to say that I looked at the Senator's seat and he was not in his seat, but he is in the Chamber. He moved.

My good friend from Indiana made a fine presentation before the Senate. I voted against the amendment, but once passed, I think it should be accorded every consideration to which it is entitled under the rules.

Senators should not come back from conference and say, "We did not even try. There was not a single vote among the Senate conferees, even on the first ballot."

Mr. President, I say we ought to confer with the House conferees, and we ought to see if we can reach some understanding to give some weight to the Senate amendment. I suggest that the conference report should have been rejected.

Mr. KERR. Mr. President, circumstances prompt me to make a few brief remarks.

I was on the conference committee referred to, on the bill which was the subject of the conference report. My position was in favor of the position of the Senator from Indiana.

The amendment was discussed by the Senate conferees at great length. I am not definitely certain as to the details of what happened at the meeting. It occurs to me that the Senator from Louisiana has given us the correct picture with reference to some delay in the conference, due to the fact that the House conferees either were late in arriving or, after they came, had to leave for some time for some reason. Exactly what the reason was, I do not remember.

The Senate conferees talked about the bill for a period of time, between 30 minutes and an hour. There was considerable division among the Senate conferees. I am not positive that a formal vote was not taken, but I do not believe it was.

I am positive that there was considerable discussion. A considerable exchange of views took place among the conferees. It was only after the discussion had continued for a considerable period of time that a decision was reached by the Senate conferees, which was the basis of the agreement with the House.

Even so, Mr. President, the Senate conferees obtained concessions from the House conferees.

The language in the conference report is not the same as that which was in the bill when it was passed by the House, nor is it the same as that which was in the bill when it was passed by the Senate. The language in the conference report represented what the Senate conferees believed to be a compromise between the language in the bill as passed by the House and that in the bill as passed by the Senate.

There is no Member of the Senate for whom I have greater esteem, respect, and affection than I have for the Senator from Indiana. In addition, I agreed with his viewpoint. Had I been the one who alone cast the vote, the conference report would have come back more nearly in accordance with the amendment which he offered. I have found in my experience in the Senate, both in its committees and in conferences, that men do not accept my position and view on matters nearly as often as I sincerely feel that wisdom would indicate they should.

I have some gratification in the belief that in a situation in which great differences of opinion seemed to prevail, as time was consumed, discussions were had, and negotiations were entered into, my impression of the differences of opinion that existed at the beginning of the

meeting was reinforced by subsequent discussions and the statements of others present. I have often found that in order to secure something which either the Senate, a committee, or a conference committee could accept, concessions must be made, in the spirit of a wholesome attitude and desire to resolve differences and reach a conclusion.

My great friend from Louisiana is one of the most eloquent and persuasive men I know. When he is serious, I can imagine the voice and vigor of a Daniel Webster as he launches into the presentation of a viewpoint, either on the attack or on the defense. When he is disposed to do so, he can put on a performance as entrancing and attractive as that of a Thespian on the American stage, presenting either drama, comedy, or a mixture of the two. He delights me as I listen to him. He persuades me as he talks. But I believe in his own mind he is aware of the fact that the differences that existed between the House version and the Senate version of the bill were resolved in a spirit of respectful devotion on the part of the conferees from both Houses. Certainly, in my judgment, there was no absence of desire on the part of the Senate conferees to return to the Senate a good account of their stewardship and a conference report corresponding as nearly as possible to the position of the Senate.

Mr. ANDERSON. Mr. President, will the Senator from Utah yield for a question.

Mr. BENNETT. I yield.

Mr. ANDERSON. Is there available a copy of the conference report so that we might compare its language with the language of the bill as passed by the Senate?

Mr. BENNETT. No; but I can obtain a copy.

Mr. ANDERSON. Is it not part of the proceedings?

Mr. BENNETT. The Senator from New Mexico was not in the room when the Senator from Utah presented the conference report. I will send to the cloakroom for a copy.

Mr. ANDERSON. I thought I was in the Senate Chamber. I was here during the presentation of the entire series of conference reports that were presented by the able Senator from Utah.

Mr. BENNETT. I am sorry.

Mr. KERR. Mr. President, will the Senator yield ?

Mr. BENNETT. I am glad to yield.

Mr. KERR. A mistake on the part of the Senate this evening as to who or who was not present is not without precedent.

Mr. BENNETT. I appreciate the comment of the Senator from Oklahoma.

The report has not been printed. I have a photostatic copy of it before me, which I will be glad to offer for printing in the RECORD. In the meantime, I shall be glad to hand it to my friend from New Mexico, so that he may see it.

Mr. AIKEN. May we have the report read?

Mr. BENNETT. May the Senator from Utah take a moment to explain the situation? The House bill suspended the duty on all casein without exception.

The Senate version retained the duty on edible casein imported for human food or for conversion to such use.

There was another difference between the bills, but this is the only difference with respect to which there was a dispute.

The question of determining what is meant by casein imported for human food or for conversion to such use occupied much of the discussion when the bill was before the Senate, and the problem still remained when we went to conference.

In the meantime, while studying the problem, it became evident that practically all—I think I might be safe in saying all—casein that is used for human food is first transformed into a form called caseinate. The difference between casein and caseinate is that casein is not soluble in water, so it could not be put in food which is to be cooked in water. Caseinate is casein made soluble so that it can be used in human food.

The conference retained the tariff on caseinate, which is all imported casein that goes into human food. Theoretically, all casein could be put into human food but, as I say, in order to use it practically, it must be transformed.

We faced this problem. There are between 11 and 15 million pounds of edible casein as caseinate consumed for human food in the United States every year. We cannot get any closer than that to the figure because the caseinate which has been imported up to the present time is considered to be just the same as casein, and nobody has attempted to separate the two forms.

However, in July of last year the Tariff Commission made a test run, and in that year each month 7,694,000 pounds of casein were imported, of which 511,000 pounds was marked "caseinate," or "edible casein." This amounted to 8 percent of the casein imported.

A study has been made of the relative amount of imported caseinate used in the United States as compared to the domestically produced caseinate.

The estimate is that between 50 and 60 percent of all the caseinate—that is, soluble casein—consumed in the United States is manufactured abroad and shipped into the United States in its finished form. The compromise arrived at by the conference applied the 2¾-percent tariff to all edible casein imported in soluble form. This amounts to 92 percent of the edible casein that comes in. I suppose that if the Senate had stuck to the broadest interpretation of the amendment it adopted it would be forced to apply this rule to the better grades of nonedible casein, because they could be transformed in this country into caseinate, and some of them are. That is the problem when we look at it from the domestic point of view. More than 50 percent of the caseinate is now manufactured abroad. Less than 50 percent is manufactured in this country from the better grades of casein imported from abroad.

We have given protection to more than 50 percent of what can be defined as edible casein. That is a fairly good compromise with the position of the House, which gave no protection. I do not believe that the Senate conferees deserted the amendment of the Senator from Indiana. Instead, I believe we made it practical to apply it and enforce it. If I were a customs officer, I do not know how I could tell whether a shipment of casein coming in from abroad would at some time in the future be transformed into caseinate or would be left as casein. On that basis I believe the Senate conferees did a pretty good job. I do not believe we deserted the position of the Senator from Indiana.

We will provide tariff protection against the importation of a material which represents 92 percent of the obviously edible casein, and against a product which has already taken more than 50 percent of our market.

Mr. President, I hope that with this limited explanation the Senate will continue to support the conference report.

DEPARTMENTS OF LABOR, AND HEALTH, EDUCATION, AND WELFARE APPROPRIATIONS, 1961

The Senate resumed the consideration of H.R. 11390, making appropriations for the Departments of Labor, and Health, Education, and Welfare, and related agencies, for the fiscal year ending June 30, 1961, and for other purposes.

Mr. HILL. Mr. President, the bill, H.R. 11390, making appropriations for the Departments of Labor, and Health, Education, and Welfare, and related agencies for the fiscal year ending June 30, 1961, and for other purposes, as reported to the Senate by the Committee on Appropriations totals $4,484,088,931, an increase of $300,066,200 over the amount of the bill as passed by the House; an increase of $418,806,450 over the appropriations for fiscal year 1960; and an increase of $463,866,950 over the budget estimates for fiscal year 1961. A large portion of it is for social security.

It should be pointed out right here that the budget estimates presented to the Congress contemplated severe reductions under the 1960 Act in some of the programs—a $60 million reduction was proposed for grants for hospital construction; $25 million for grants to States for waste treatment works construction; $5 million for grants for construction of health research facilities; $2 million for the vocational education program; and $87 million under the estimated entitlements under Public Laws 815 and 874 to provide assistance to the federally impacted school areas. These reductions enumerated total $179 million. Each of these programs has had the strong bipartisan support of the Congress over the years and I am sure there existed little expectation in any quarter that the Congress would concur in the proposed reductions.

The committee recommends an increase of $5 million for grants to States for the administration of the employment security program under the Labor Department. These funds come not out of the general fund of the Treasury but are derived from the earmarked revenue collections under the Federal Unemployment Tax Act.

The committee added $150,000 for plans and specifications for a combined

pharmacological laboratory and animal building for the Food and Drug Administration. While we had received a preliminary estimate of total cost of a building amounting to $2,045,000, the committee felt that not enough preparation and consideration had been given to the plan and insists that every effort be made first to secure existing governmental space which might be renovated for the purpose. It also expects every consideration be given to the quartering of several dogs in a single pen, rather than one per pen as contemplated by the Food and Drug Administration, and whether air-conditioning is essential for the dog pens, rather than adequate ventilation.

The committee added $7,362,000 for payments to school districts, fiscal year 1959, to permit the payment of full entitlements to each school district under Public Law 874. The Senate had voted this amount in the second supplemental appropriation bill earlier this year but the amendment was not agreed to in conference.

For the defense educational activities the committee provided an additional $2,050,000 for language institutes under title VI of the National Defense Education Act. This will provide the full amount authorized, $7,250,000, for the language institutes.

For the vocational rehabilitation program the committee added $4 million. When Congress rewrote the Vocational Rehabilitation Act in 1954 the evidence suggested 200,000 rehabilitants annually within 5 years. But the goal was not, and has not yet, been attained. In 1959 the number of rehabilitants was 80,000; in 1960 the estimate is 88,000, and for 1961, the estimate is 93,000. The committee added $3 million for grants to States under section 2 of the act to permit the full matching by the Federal Government in a number of additional States. One million dollars was added for additional research and training.

The committee recommends increases of approximately $281 million for the Public Health Service, of which $209 million is for the National Institutes of Health; $61 million is for hospitals, nursing homes, chronic disease facilities, and health facilities construction grants; $5 million is for grants for construction of health research facilities; $1 million is for the acceleration of the building of community water and sanitation facilities on the Indian reservations; $1 million is for environmental health activities, of which $500,000 is earmarked for the training of radiation health specialists and $500,000 for the initiation of a study leading to the development of a plan for controlling and preventing pollution in and around the U.S. portion of the Great Lakes and the Illinois Waterway. We also added $500,000 for grants to States for the control of tuberculosis to make available for the purpose the same amount as is available during the current fiscal year, $4 million; and $600,000 for venereal disease control, of which $300,000 is for grants to States to make available the same amount, $2,400,000, as is available this year, and $300,000 for research in the diseases, in the light of a 50-percent increase in incidence of the diseases in the past year. Sundry other small increases were voted in the Public Health Service.

I want to say, Mr. President, that the distinguished Senator from Mississippi [Mr. STENNIS] is absent on important business but he wholeheartedly supports the programs for grants to the States, for medical research and all the programs in the bill. No member of the Appropriations Committee has labored more faithfully or contributed more to the bill and its many programs than has the Senator from Mississippi.

I am glad that within the framework of the increases in appropriations of the Institutes of Health, great emphasis has been placed on the expansion of the training programs. It is particularly appropriate at this time to provide this emphasis because the training of specialized medical investigators is the broad base on which the whole research program rests.

I trust that it is clear to the Public Health Service from the comments in our report on the bill that these expanded training programs are to remain in the administrative jurisdiction of the respective Institutes of Health. In neurology and blindness, particularly training in the basic sciences relating to the nervous system, the training of clinical teachers and investigators and the program of career teacher investigators are to stay in the administrative control of the Institute of Neurological Diseases and Blindness.

The committee added $80,000 for Gallaudet College, the only college for the deaf in the world, to restore the full amount estimated for the athletic field.

The committee restored the $187,600 disallowed by the House for the Federal Mediation and Conciliation Service, and the $32,500 disallowed by the House for the National Mediation Board.

Mr. President, I ask unanimous consent that the committee amendments be agreed to en bloc, that the bill as so amended be considered as original text for purpose of amendment, and that no point of order against any amendment shall have been waived by the granting of this request.

The PRESIDING OFFICER. Is there objection?

Mr. PROXMIRE. Mr. President, reserving the right to object, on behalf of the senior and junior Senators from Ohio, the senior and junior Senators from Vermont, the senior and junior Senators from Michigan, the senior and junior Senators from New York, and my senior colleague and myself, I should like to direct several questions to the Senator from Alabama on this issue.

Was it the intention of the committee by this bill or by the committee report to authorize either additional diversions of a thousand cubic feet per second or any other additional diversion from Lake Michigan in connection with the study by the Department of Health, Education, and Welfare?

Mr. HILL. It was not the intent, in connection with any appropriation in the bill or any language in the report to authorize any additional diversion in any way whatsoever. The only respect in which the bill deals with this water is to follow the suggestion of the Solicitor General of the Department of Justice, that the Department of Health, Education, and Welfare take immediate steps to provide the required study on the matter of water pollution.

We have no thought or idea or intent with reference to any diversion, in any way whatsoever. What is proposed is simply a study looking to the prevention and control of water pollution.

Mr. PROXMIRE. Representative YATES and Representative O'BRIEN testified before the Senator's committee that the authorization for such a study as is contemplated in the bill should include an authorization for the diversion of an additional thousand cubic feet per second. I desire to quote from page 1018 of the hearings the following statement by Representative YATES:

> This study, Mr. Chairman, also asks that as part of the study the Secretary of Health, Education, and Welfare, in cooperation with the Secretary of the Army, be authorized to divert an additional 1,000 cubic feet of water per second from Lake Michigan for the purposes of the study for a period of 1 year and no more.

These Representatives testified to that effect; did they not?

Mr. HILL. They testified, and they asked for a $12 million appropriation. We did not give them any of the $12 million appropriation for any diversion, and we have no intent, no purpose, and no language in the bill to provide for any diversion. The amount provided is solely for a study looking toward the control and prevention of water pollution.

Mr. PROXMIRE. One final question: In the Senator's opinion, can section 2 of the Water Pollution Act of 1956—Public Law 660, 84th Congress—which, I understand, is the authorizing basis for the appropriation, be construed in any way, in connection with the appropriation, to authorize an additional diversion of 1,000 cubic feet or any other amount?

Mr. HILL. No. That act deals only with the matter of water pollution and has nothing to do with the diversion of water.

Section 2, as I think it is clear from a reading of the language, simply authorizes funds looking to the control and prevention of water pollution. It provides no authority with reference to any water diversion.

Mr. PROXMIRE. Was that the full intention of the committee when they included this committee amendment?

Mr. HILL. The intention was to provide for a study looking to the prevention and control of water pollution, not water diversion.

Mr. PROXMIRE. I thank the Senator from Alabama.

Mr. DOUGLAS. Mr. President, will the Senator from Alabama yield further?

Mr. HILL. I yield.

Mr. DOUGLAS. It was the purpose of Representative YATES, Representative O'BRIEN, and the senior Senator from Illinois to be of assistance to all the States and cities along the shores of the Great Lakes. Especially, we wanted to be of service to Milwaukee, because Milwaukee has been polluting the waters

of Lake Michigan very badly by dumping its effluent and untreated sewage into Lake Michigan, with the result that miles of the Milwaukee beaches have been closed to swimming. As a matter of fact, this is true of all the cities along the Great Lakes.

Chicago is the only city where there is free bathing in the summertime. That is because we do not send our effluent into the lake.

I do not wish to revive the old battle here, but it is a matter of record, that what the State of Wisconsin and the State of Michigan, and also, I am sorry to say, the State of New York, and the State of Vermont, are trying to do is to compel Chicago to follow the very unsanitary, unhygienic, unesthetic practices of Milwaukee and other cities, and to dump its effluent into the lake.

We believe this subject should be studied. We had hoped that the committee would permit experimental diversion. As a part of that study, we greatly regret that the diversion is not included. But we hope experience will convince the States which have adopted such unsanitary practices, and which seem resolved to compel Chicago to do likewise, to change their ways, and that in the future we may be able to cooperate.

The city of Chicago will be very glad to cooperate and very glad to furnish engineers to go up and tell Milwaukee how to go about handling its effluent in a more sanitary fashion. We will be very glad to do the same for Cleveland, Toledo, and other cities, so as to be of assistance to them.

I think this action could be the beginning of a new day, provided those cities cease their reprisals and cease the attitude of hostility which they now have.

Mr. HILL. It is the hope of the committee that the proposed study of water pollution will be beneficial to all parties concerned.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Alabama that the committee amendments be agreed to en bloc?

Mr. WILEY. Mr. President, will the Senator yield?

Mr. HILL. I should like to have action taken on my request.

Mr. WILEY. I shall take only a minute.

Mr. HILL. Very well.

Mr. WILEY. In connection with the question that has been asked, I read from the testimony of Arthur S. Flemming, in which he said——

Mr. HILL. On what page?

Mr. WILEY. On page 166 of the hearings on water diversion from Lake Michigan:

> We believe that a study of the sanitary problems of the Metropolitan Sanitary District of Greater Chicago would be feasible without an increase in diversion. From this point of view of water pollution control additional diversion over the amount now authorized is not absolutely necessary for completion of a satisfactory study.

Mr. President, I ask unanimous consent, in connection with the question asked by my colleague from Wisconsin [Mr. PROXMIRE] to have placed in the RECORD section 2 of the statute which was referred to.

There being no objection, section 2 was ordered to be printed in the RECORD, as follows:

COMPREHENSIVE PROGRAMS FOR WATER POLLUTION CONTROL

Joint investigations

SEC. 2. The Surgeon General shall, after careful investigation, and in cooperation with other Federal agencies, with State water pollution control agencies and interstate agencies, and with the municipalities and industries involved, prepare or develop comprehensive programs for eliminating or reducing the pollution of interstate waters and tributaries thereof and improving the sanitary condition of surface and underground waters. In the development of such comprehensive programs due regard shall be given to the improvements which are necessary to conserve such waters for public water supplies, propagation of fish and aquatic life and wildlife, recreational purposes, and agricultural, industrial, and other legitimate uses. For the purpose of this section, the Surgeon General is authorized to make joint investigations with any such agencies of the condition of any waters in any State or States, and of the discharges of any sewage, industrial wastes, or substance which may adversely affect such waters.

Mr. WILEY. Mr. President, the matter of the diversion of water under the Constitution is a question, as I believe the Senator realizes, of navigation, and nothing else. Under the Constitution, water may be transferred for the purposes of navigation.

However, I am particularly interested in placing in the RECORD at this point, from page 164, the statement of Woodbury Willoughby, Director of the Office of British Commonwealth and the Northern European Affairs.

Mr. President, I ask unanimous consent that the statement be printed at this point in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT OF WOODBURY WILLOUGHBY, DIRECTOR, OFFICE OF BRITISH COMMONWEALTH AND NORTHERN EUROPEAN AFFAIRS

H.R. 1 authorizes the withdrawal of water from the Great Lakes Basin at Chicago and thus must be considered in relation to the rights of Canada as a co-riparian in the waters of that basin. The Department, in the interest of maintaining harmonious relations with that country, has traditionally sought its views on proposals of this type.

This committee has previously been furnished with the texts of the recent communications exchanged with the Canadian Government regarding its views on H.R. 1, and will have noted the protest registered by that Government against implementation of the proposals contained in the bill. I should be glad to submit a copy at this time for insertion in the record.

The most recent Canadian aide memoire, dated February 20, 1959, expresses the opinion that any authorization for an additional diversion from Lake Michigan at Chicago would be incompatible with the arrangements for the St. Lawrence Seaway and power development, and with the Niagara Treaty of 1950, and would be prejudicial to navigation and power development which these mutual arrangements were designed to improve and facilitate.

Neither the Niagara Treaty nor the International Joint Commission Orders relating to the development of power by the United States and Canada in the International Rapids section of the St. Lawrence River, place any specific limitation upon diversions of the type authorized by H.R. 1. Nevertheless, the Department is not in a position to question the Canadian position that an additional withdrawal of water from the Great Lakes Basin such as that under consideration would affect adversely Canadian navigation and power interests in the Great Lakes, their connecting channels and the St. Lawrence River.

I understand that estimates have been furnished to the Congress by the U.S. Army Corps of Engineers as to the extent of the damage that would be suffered by downstream hydroelectric interests on both sides of the boundary in the event that the present proposal is enacted. It is noted that H.R. 1 provides no means by which injured parties may be compensated.

In view of the foregoing, the Department believes that enactment of H.R. 1 would adversely affect our relations with a friendly foreign government. Therefore, it is unable to support this legislation.

Mr. WILEY. Mr. President, the purpose is to show that the parliamentarians agreed with the attitude of the executive branch of the Government.

Mr. HILL. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Alabama will state it.

Mr. HILL. To whose time are the remarks of the Senator from Wisconsin being charged? As the Senator from Wisconsin knows, the time is limited.

Mr. JOHNSON of Texas. Mr. President, may we not have the request of the Senator from Alabama acted upon? Then I will yield 2 minutes to the Senator from Wisconsin.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Alabama that the committee amendments be agreed to en bloc? The Chair hears none, and it is so ordered.

The committee amendments agreed to en bloc are as follows:

Under the heading "Title I—Department of Labor—Office of the Secretary—Salaries and Expenses", on page 2, at the beginning of line 6, to strike out "including payment in advance when authorized by the Secretary for dues or fees for library membership in organizations whose publications are available to members only or to members at a price lower than to the general public and for publications available only upon that basis or available at reduced price on prepublication orders; and purchase of uniforms or allowances therefor, as authorized by the Act of September 1, 1954, as amended (5 U.S.C. 2131);".

On page 2, after line 16, to insert:

"WORKING CAPITAL FUND

"The paragraph under this head in the Department of Labor Appropriation Act, 1958 (71 Stat. 210) is amended to read as follows:

" 'Working capital fund: There is hereby established a working capital fund, to be available without fiscal year limitation, for expenses necessary for the maintenance and operation of (1) a central reproduction service; (2) a central visual exhibit service; (3) a central supply service for supplies and equipment for which adequate stocks may be maintained to meet in whole or in part the requirements of the Department; (4) a central tabulating service; (5) telephone, mail and messenger services; (6) a central accounting and payroll service; and (7) a central laborers' service: *Provided*, That any stocks of supplies and equipment on hand or on order shall be used to capitalize such fund: *Provided further*, That such fund shall be reimbursed in advance from funds

available to bureaus, offices, and agencies for which such centralized services are performed at rates which will return in full all expenses of operation, including reserves for accrued annual leave and depreciation of equipment.' "

Under the subhead "Labor-Management Reporting and Disclosure Activities—Salaries and Expenses", on page 3, line 19, after "1959", to strike out "including services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a),".

Under the subhead "Bureau of Labor Standards—Salaries and Expenses", on page 4, line 19, after the word "exhibits", to strike out "and expenses of attendance of cooperating officials and consultants at conferences concerned with the work of the Bureau of Labor Standards".

Under the subhead "Grants to States for Unemployment Compensation and Employment Service Administration", on page 6, line 18, after the word "Board", to insert "including conveyance by the Commissioners of the District of Columbia to the United States of title to the land on which such building is to be situated", and on page 7, line 1, after "(68 Stat. 1130)", to strike out "$320,819,000" and insert "$325,819,000".

Under the subhead "Salaries and Expenses, Mexican Farm Labor Program", on page 10, line 7, after the word "laws", to strike out "$1,344,100" and insert "$1,404,100".

Under the subhead "Wage and Hour Division—Salaries and Expenses", on page 13, at the beginning of line 10, to strike out "and not to exceed $3,000 for expenses of attendance of cooperating officials and consultants at conferences concerned with the work of the Division,".

Under the heading "Title II—Department of Health, Education, and Welfare", on page 14, after line 5, to insert:

"PHARMACOLOGICAL-ANIMAL LABORATORY BUILDING

"For plans and specifications for a special pharmacological-animal laboratory for the Food and Drug Administration, $150,000."

Under the subhead "Office of Education—Promotion and Further Development of Vocational Education", on page 16, line 20, after the word *"Provided"*, to strike out "That the appointment to the States under section 3(a), (1), (2), (3), and (4) of the Vocational Education Act of 1946 shall be computed on the basis of not to exceed $29,267,081 for the current fiscal year: *Provided further"*.

Under the subhead "Grants for Library Services", on page 17, after line 8, to strike out:

"For grants to the States, under allotments for the current and prior fiscal year, pursuant to the Act of June 19, 1956, as amended (20 U.S.C. 351–358), $7,500,000, to remain available until expended."

And, in lieu thereof, to insert:

"For grants to the States, pursuant to the Act of June 19, 1956, as amended (20 U.S.C. 351–358), $7,500,000."

Under the subhead "Payments to School Districts", on page 17, after line 15, to insert:

"For an additional amount for 'Payments to school districts', fiscal year 1959, $7,362,000."

Under the subhead "Defense Educational Activities", on page 18, at the beginning of line 15, to strike out "$171,000,000" and insert "$173,050,000", and in line 26, after the word "counseling", to insert a colon and *"Provided,* That allotments to States under titles II and III of such Act shall be on the basis of the respective maximum amounts authorized to be appropriated in such titles: *Provided further,* That, notwithstanding any other provision of law, allotments under title III of said Act for grants to States and loans to nonprofit private schools for science, mathematics, or modern foreign language equipment and minor remodeling of facilities and for grants to States for supervisory and other services, shall be made in such manner as to extend the benefits thereof to the State of Hawaii on the basis of equality with the other States".

On page 19, after line 17, to insert:

"Grants, loans, and payments under the National Defense Education Act, next succeeding fiscal year: For making, after May 31 of the current fiscal year, loans, and payments under all titles of the National Defense Education Act, for the first quarter of the next succeeding fiscal year such sums as may be necessary, the obligations incurred and the expenditures made thereunder to be charged to the appropriation for the same purpose for that fiscal year."

Under the subhead "Office of Vocational Rehabilitation—Grants to States", on page 21, line 11, after the word "amended", to strike out "$54,500,000" and insert "$57,500,000"; in line 12, after the word "which", to strike out "$53,000,000" and insert "$56,000,000"; in line 17, after the word "of", to strike out "$63,000,000" and insert "$77,000,000"; and in line 19, after the word "year", to insert a colon and *"Provided further,* That notwithstanding any other provision of law, allotments under section 2 of the said Act shall be made in such manner as to extend the benefits of such section to the State of Hawaii on the basis of equality with other States."

Under the subhead "Research and Training", on page 22, at the beginning of line 10, to strike out "For research, training, and traineeship, and other special project grants, pursuant to section 4 of the Vocational Rehabilitation Act, as amended, for" and, in lieu thereof, to insert "For grants and other expenses for research, training, traineeships, and other special projects, pursuant to section 4 of the Vocational Rehabilitation Act, as amended, for expenses of", and in line 19, after the word "Act", to strike out "$14,800,000" and insert "$15,800,000".

Under the subhead "Public Health Service", on page 23, line 20, after the word "Corps", to insert "expenses incident to the dissemination of health information in foreign countries through exhibits and other appropriate means;", and on page 24, line 11, after the word "annum", to insert a colon and *"Provided,* That section 208(g) of the Public Health Service Act, as amended, is amended by striking out 'eighty-five', and inserting in lieu thereof 'one hundred and fifty', and by striking out 'seventy-three' and inserting in lieu thereof 'one hundred and fifteen';".

Under the subhead "Assistance to States, General", on page 24, line 22, after the word "statistics", to insert "not to exceed $1,000 for entertainment of officials of other countries when specifically authorized by the Surgeon General;", and on page 25, line 2, to strike out "$22,620,000" and insert "$24,620,000".

Under the subhead "Control of Tuberculosis", on page 25, at the beginning of line 5, to strike out $5,930,000" and insert "$6,430,000", and in the same line, after the word "than", to strike out "$3,500,000" and insert "$4,000,000".

Under the subhead "Communicable Disease Activities", on page 26, at the beginning of line 8, to strike out "$13,516,000" and insert "$14,116,000, of whch $5,700,000 shall be for the control of venereal diseases".

Under the subhead "Environmental Health Activities", on page 26, at the beginning of line 23, to strike out "$25,640,000" and insert "$26,640,000".

Under the subhead "Grants for Hospital Construction", on page 28, line 3, after the word "amended", to strike out "$150,000,000" and insert "$211,200,000"; in line 4, after the word "which", to strike out "$118,800,000" and insert "$150,000,000"; in line 7, after the word "and", to strike out "$30,000,000" and insert "$60,000,000"; in line 8, after the word "follows", to strike out "$7,500,000" and insert "$20,000,000"; in line 9, after the word "centers", to strike out "$7,500,000" and insert "$20,000,000"; in line 10, after the word "impaired" to strike out "$5,000,000" and insert "$10,000,000", and in line 12, after the word "homes", to strike out *"Provided,* That allotments under such parts C and G to the several States for the current fiscal year shall be made on the basis of amounts equal to the limitations specified herein" and insert *"Provided further,* That, notwithstanding any other provision of law, allotments under such parts C and G shall be made in such manner as to extend the benefits of such parts to the State of Hawaii on the basis of equality with the other States."

Under the subhead "Salaries and Expenses, Hospital Construction Services", on page 28, line 23, after the word "amended", to strike out "$1,654,200" and insert "$1,786,000".

Under the subhead "Hospitals and Medical Care", on page 30, line 1, after the word "appropriation", to insert a colon and *"Provided further,* That this appropriation shall be available for medical, surgical, and dental treatment and hospitalization of retired ships' officers and members of crews of Coast and Geodetic Survey vessels, and their dependents, and for payment therefor."

Under the subhead "Foreign Quarantine Activities", on page 30, line 15, after the word "countries", to strike out "$4,812,000" and insert "$4,931,000".

Under the subhead "Construction of Indian Health Facilities", on page 31, line 9, after the word "Indians", to strike out "$8,964,000" and insert "$9,964,000".

Under the subhead "General Research and Services, National Institutes of Health", on page 31, line 19, after the word "research", to strike out "$52,660,000" and insert "$104,405,000", and in line 23, after the word "only", to insert "not to exceed $2,500 for entertainment of visiting scientists when specifically approved by the Surgeon General".

Under the subhead "National Cancer Institute", on page 32, line 19, after the word "Act", to strike out "$102,469,000" and insert "$126,375,000, of which $700,000, to remain available until December 31, 1961, shall be available for plans and specifications for a research facility for the National Cancer Institute".

Under the subhead "Mental Health Activities", on page 33, line 4, after the word "diseases", to strike out "$79,863,000" and insert "$110,800,000".

Under the subhead "National Heart Institute", on page 33, line 7, after the word "Act", to strike out "$71,762,000" and insert "$125,166,000".

Under the subhead "Dental Health Activities", on page 33, line 12, to strike out "$12,604,000" and insert "$16,710,000".

Under the subhead "Arthritis and Metabolic Disease Activities", on page 33, line 16, to strike out "$52,841,000" and insert "$70,760,000".

Under the subhead "Allergy and Infectious Disease Activities", on page 33, line 20, after the word "diseases", to strike out "$38,439,000" and insert "$48,234,000"; at the beginning of line 21, to strike out "$150,000" and insert "$750,000", and on page 34, after the word "Laboratory", to insert "and for construction and equipment of facilities".

Under the subhead "Neurology and Blindness Activities", on page 34, line 5, after the word "blindness", to strike out "$44,362,000" and insert "$61,550,000".

Under the subhead "Grants for Construction of Health Research Facilities", on page 34, line 11, after "(72 Stat. 933)", to strike out "$25,000,000" and insert "$30,000,000".

On page 34, after line 11, to insert:

"CONSTRUCTION OF MENTAL HEALTH-NEUROLOGY RESEARCH FACILITY

"For construction of a combined basic and collaborative research facility for the National Institutes of Mental Health and Neurological Diseases and Blindness, including a physical biology component, and including plans and specifications, fixed and semifixed equipment, access roads and parking facilities, extension of existing power, refrigeration and other utility systems, $12,139,000, to be derived by transfer from 'Mental health activities' and 'Neurology and blindness activities', as determined by the Surgeon General."

Under the subhead "Buildings and Facilities", on page 36, line 5, after the word "sites", to strike out "$3,135,000" and insert "$3,470,000".

Under the subhead "Salaries and Expenses", on page 36, line 18, after the word "methods", to strike out "$6,800,000" and insert "$6,900,000".

Under the subhead "Saint Elizabeths Hospital—Salaries and Expenses", on page 37, line 3, after the figures "$4,095,000", to insert a colon and *"Provided,* That reimbursements pursuant to the Act of August 4, 1947 (24 U.S.C. 168a), shall be in an amount equal to not less than $8.13 per patient per day."

Under the subhead "Salaries and Expenses, Office of the Commissioner", on page 41, line 10, after the word "Security", to strike out "$342,500" and insert "$350,800".

Under the subhead "Gallaudet College—Construction", on page 43, line 4, after the word "grading", to strike out "$2,432,000" and insert "$2,512,000".

Under the subhead "White House Conference on Aging", on page 45, line 8, after the word "Columbia", to strike out "$550,000" and insert "$760,000".

On page 45, after line 8, to insert:

"WORKING CAPITAL FUND

"The paragraph under this head in the Federal Security Agency Appropriation Act, 1953 (66 Stat. 369) is amended to read as follows:

"Working capital fund: There is hereby established a working capital fund, to be available without fiscal year limitation, for expenses necessary for the maintenance and operation of (1) a central reproduction service; (2) a central visual exhibit service; (3) a central supply service for supplies and equipment for which adequate stocks may be maintained to meet in whole or in part the requirements of the Department; (4) a central tabulating service; (5) telephone, mail, and messenger services; (6) a central accounting and payroll service; and (7) a central laborers' service: *Provided,* That any stocks of supplies and equipment on hand or on order shall be used to capitalize such fund: *Provided further,* That such fund shall be reimbursed in advance from funds available to bureaus, offices, and agencies for which such centralized services are performed at rates which will return in full all expenses of operation, including reserves for accrued annual leave and depreciation of equipment.' "

Under the subhead "General Provisions", on page 46, after line 5, to strike out:

"SEC. 202. Appropriations under this title available for salaries and expenses shall be available for payment in advance for dues or fees for library membership in organizations whose publications are available to members only or to members at a price lower than to the general public and for payment in advance for publications available only upon that basis or available at a reduced price on prepublication orders."

On page 46, after line 13, to strike out:

"SEC. 203. Appropriations under this title available for salaries and expenses shall be available for uniforms or allowances therefor as authorized by the Act of September 1, 1954, as amended (5 U.S.C. 2131)."

On page 46, line 18, to change the section number from "204" to "202".

On page 47, line 5, to change the section number from "205" to "203".

On page 47, after line 8, to strike out:

"SEC. 206. None of the funds provided herein shall be used to pay any recipient of a grant for the conduct of a research project an amount for indirect expenses in connection with such project in excess of 15 per centum of the direct cost."

On page 47, line 14, to change the section number from "207" to "204".

On page 47, line 21, to change the section number from "208" to "205".

On page 48, line 1, to change the section number from "209" to "206".

On page 48, after line 6, to strike out:

"SEC. 210. Appropriations under this title available for salaries and expenses shall be available for expenses of attendance at meetings which are concerned with the functions or activities for which the appropriation is made or which will contribute to improved conduct, supervision, or management of those functions or activities."

Under the heading "Title III—National Labor Relations Board—Salaries and Expenses", on page 48, line 22, after the word "area", to strike out "and uniforms, or allowances therefor, as authorized by the Act of September 1, 1954, as amended (5 U.S.C. 2131),".

Under the heading "Title IV—National Mediation Board—Salaries and Expenses", on page 49, line 20, after the word "including", to strike out "stenographic reporting services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55a);"; on page 50, at the beginning of line 1, to strike out "$90" and insert "$100", and in line 3, after "(45 U.S.C. 160)", to strike out $1,522,500" and insert "$1,555,000".

Under the heading "Title V—Railroad Retirement Board—Limitation on Salaries and Expenses", on page 50, line 7, after the word "Board", to strike out "including uniforms or allowances therefor, as authorized by the Act of September 1, 1954 (68 Stat. 1114),".

Under the heading "Title VI—Federal Mediation and Conciliation Service—Salaries and Expenses", on page 50, line 25, after the word "maintained", to strike out "$3,905,400" and insert "$4,093,000".

Under the heading "Title IX—General Provisions", on page 52, after line 8, to insert:

"SEC. 903. Appropriations contained in this Act available for salaries and expenses shall be available for payment in advance for dues or fees for library membership in organizations whose publications are available to members only or to members at a price lower than to the general public and for payment in advance for publications available only upon that basis or available at a reduced price on prepublication orders."

On page 52, after line 16, to insert:

"SEC. 904. Appropriations contained in this Act available for salaries and expenses shall be available for uniforms or allowances therefor as authorized by the Act of September 1, 1954, as amended (5 U.S.C. 2131)."

On page 52, after line 20, to insert:

"SEC. 905. Appropriations contained in this Act available for salaries and expenses shall be available for expenses of attendance at meetings which are concerned with the functions or activities for which the appropriation is made or which will contribute to improved conduct, supervision, or management of those functions or activities."

On page 53, after line 3, to insert:

"SEC. 906. Appropriations contained in this Act available for salaries and expenses shall be available for rental of space in the District of Columbia for new or expanded activities."

Mr. JOHNSON of Texas. Mr. President, I yield 2 minutes to the senior Senator from Wisconsin.

Mr. WILEY. Mr. President, I support the objectives of preventing and controlling pollution of waters in and around the Great Lakes. Moreover, I welcome the inclusion of appropriations in the bill, H.R. 11390, for such purposes.

For the record, however, I want to make it clear that I am opposed to such allocations of funds being used as a Trojan Horse by which to increase diversion of a dangerously large volume of water into the Illinois Waterway.

The subject of water diversion from Lake Michigan by the Metropolitan Sanitary District of Greater Chicago, has been a subject of continuing controversy between Chicago, the State of Illinois, and other States adjoining the Great Lakes for many years. As far back as 1922 the Supreme Court of the United States was brought into the conflict by the Lake States in order to determine the equities involved. In recent years there has been continuous effort on the part of the Metropolitan Sanitary District of Greater Chicago to divert additional quantities of water from the Great Lakes. During this session of Congress, as in many previous ones, a bill has been introduced by Representative O'BRIEN, H.R. 1, authorizing the additional diversion of 1,000 cubic feet per second from Lake Michigan. H.R. 1, and a companion bill, S. 308, was considered by the Committee on Public Works which, after long hearings, reported it to the Senate. There was much discussion on the merits of this legislation on the floor of the Senate and the bill was referred to the Foreign Relations Committee. At the request of the Foreign Relations Committee, the Department of State has contacted the Canadian Government in order to ascertain the Canadian position on this matter.

Simultaneously the Supreme Court of the United States before which several cases relating to the diversion of Lake Michigan waters have been pending, proceeded to consider these cases and to appoint a special master to hear the evidence relating to this important subject. The master, Judge Albert Maris, has been holding hearings on this subject in Chicago and in other places and more have been scheduled. He has not, as yet completed his study of the issues.

Now as this matter is pending both before the Supreme Court and the Senate Foreign Relations Committee, I believe it would be wrong, indeed, to bypass the Court and the Foreign Relations Committee. Primarily, the issue relates to the diversion of water in the interest of navigation. Previously, the Court on several occasions has said in substance: "Chicago, you have made the mess, clean it up." And Chicago did clean it up and built a plant to take care of the then load, but afterward, Chicago extended its territory, added several million to its population and still kept the same facilities with only a little addition. But the same were not adequate. The answer is then to build adequate plants to take care of the additional load.

Mr. President, we have gone over this ground many times. The distinguished

senior Senator from Illinois [Mr. DOUGLAS], when he talks often indulges in words which he afterwards regrets.

The Court has on two occasions said to the Chicago Sanitary District, "You made the mess. Now clean it up."

Second, the Court has now placed in charge of the matter a distinguished judge to hold investigations. He is conducting the investigations on the subject of diversion. That being the case, we feel that the Committee on Labor and Public Welfare did not go off half-cocked. They recognized that they had no authority to require the diversion of water from Lake Michigan.

Mr. GORE. Mr. President, will the Senator yield?

Mr. WILEY. I yield.

Mr. GORE. I am not well informed on the subject of pollution. I wonder what the attitude of the Senator is toward the very generous offer of the senior Senator from Illinois to send three Chicago engineers to Milwaukee.

Mr. WILEY. I did not get the Senator's question.

Mr. GORE. I do not press the question.

Mr. KUCHEL. Mr. President, on behalf of myself, my colleague from California [Mr. ENGLE], the senior Senator from Pennsylvania [Mr. CLARK], the junior Senator from Pennsylvania [Mr. SCOTT], and the senior Senator from Minnesota [Mr. HUMPHREY], I offer an amendment and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The LEGISLATIVE CLERK. On page 26, line 23, it is proposed to delete "$26,640,000" and insert in lieu thereof "$27,640,000."

Mr. KUCHEL. Mr. President, a few days ago—on June 8—the President signed a law which the Congress sent to him, directing the Surgeon General of the United States to make a careful survey with respect to the part which motor vehicles of all types play in the dissemination of pollutants into the air. Obviously, inasmuch as the President signed that measure only a few days ago, no provision was made with respect to budgeting funds for the Surgeon General to use in undertaking this new responsibility, which he has just received.

The Surgeon General could expend up to $2 million a year. My amendment provides for $1 million.

Mr. HILL. Mr. President, will the Senator from California yield?

Mr. KUCHEL. I yield.

Mr. HILL. The distinguished Senator from California is the ranking minority member of the subcommittee which considered the bill. The legislation authorizing this program passed after our hearings on the bill.

Mr. KUCHEL. Yes.

Mr. HILL. I am familiar with the legislation, because it was handled by the Committee on Labor and Public Welfare.

I am familiar with the matter dealt with by the amendment; and the amendment is very meritorious. So I am happy to accept the amendment.

Mr. KUCHEL. I thank the Senator from Alabama.

Mr. CARLSON. Mr. President——

Mr. HILL. I yield to the Senator from Kansas.

Mr. CARLSON. I wish to ask a question or two in regard to the Hill-Burton fund. During the years during which the Hill-Burton fund has been in operation, the State of Kansas has received many benefits from the use of this fund.

I notice that the budget estimate for these grants for hospital construction was $126,200,000; the House allowance was $150 million; and the Senate committee recommended $211,200,000.

I should like to ask the distinguished chairman whether he believes the amount recommended by the committee will be sufficient to take care of the applications and the requests which are pending?

Mr. HILL. No, the $211,200,000 would not be sufficient; but that is as much as the committee could recommend, in view of the amount authorized.

On page 466 of the hearings there will be found a table; and from examining the table the Senator will find that in order to meet the applications we now have from the local communities and from the nonprofit hospital organizations which now are ready to go forward with the construction of their hospitals, some $806,264,000 would be required. But the $211,200,000 is the maximum amount authorized; and therefore the committee had to keep within that limit, insofar as the appropriation was concerned, as the Senator will understand.

Mr. CARLSON. How can the communities be expected to take care of some of the bond issues which already have been voted in anticipation of the provision of these funds?

Mr. HILL. Some communities have voted bond issues. Some have levied special taxes.

But so far as the appropriation is concerned, we cannot appropriate more than the $211,200,000, because that is the maximum amount authorized under the act.

Mr. CARLSON. Mr. President, I appreciate very much the increase the Senate committee has recommended.

I sincerely hope the amount recommended by the Senate committee will be approved, and that it will be possible to take care of these requests.

Mr. President, I have received a number of telegrams and other communications in connection with this matter; and I ask unanimous consent that they be printed at this point in the RECORD.

There being no objection, the communications were ordered to be printed in the RECORD, as follows:

GREAT BEND, KANS.

Senator FRANK CARLSON,
Senate Office Building
Washington, D.C.:

H.R. 11390 shows a recommended cut in the 1961 appropriations of $36,200,000 under the 1960 appropriation for grants for hospital construction. Such a cut will delay much-needed construction of hospital beds in Great Bend, Kans. We sincerely request that the 1961 appropriation be restored to the 1960 level.

HERBERT A. HARMS,
President, Barton County Flour Mills Co.

GREAT BEND, KANS.

Senator FRANK CARLSON,
Senate Office Building,
Washington, D.C.:

Respectfully urge restoration Hill-Burton grants in 1961 to at least 1960 appropriation level. Vitally needed local hospital construction project would be seriously delayed and impaired by reduction shown in H.R. 11390. Fluctuation of Hill-Burton grants creates havoc in hospital planning for any community. Your consideration deeply appreciated.

DON WELTMER,
Mayor, City of Great Bend, Kans., Great Bend Community Hospital Association.

GREAT BEND, KANS.

Senator FRANK CARLSON,
Senate Office Building,
Washington, D.C.:

Our hospital building project here will be seriously affected if H.R. 11390 is cut under the 1960 appropriations. Your help in restoring the appropriations for 1961 to the 1960 level will be greatly appreciated.

H. P. THIES,
President, Community Hospital Association, Inc.

THE KANSAS STATE BOARD OF HEALTH,
Topeka, Kans., April 22, 1960.

Hon. FRANK CARLSON,
U.S. Senate,
Washington, D.C.

DEAR SENATOR CARLSON: As requested by Mr. H. P. Thies, president of the Community Hospital Association, at Great Bend, Kans., I am sending you the allocation of Hill-Burton Act funds for the 1959 and 1960 fiscal years. Please notice that all of these funds have been allocated to projects now under construction.

Hospitals now having high priority for funds on the basis of the 1961 proposed State plan, and who have their funds available for construction and are waiting for the 1961 fiscal year appropriation are:

	Sponsor's share	Hill-Burton funds
Shawnee-Mission, Merriam	$700,000	$600,000
Clay County, Clay Center	365,000	325,000
Great Bend Medical Center	3,200,000	1,200,000
Seward County, Liberal	875,000	800,000
Anthony Hospital, Anthony	100,000	100,000
Wesley (nurses' residence), Wichita	550,000	500,000
Total	5,790,000	3,525,000

Obviously, there will not be enough funds to cover the projects where funds are available. We will, by necessity, if all of these projects are to be started within the near future, have to dip into the 1962 anticipated funds from the Hill-Burton Act.

In addition to the above, the following hospitals, who are eligible for Hill-Burton Act funds, are having bond elections this fall and are hoping to raise the necessary funds for hospital construction:

Hill-Burton funds

Wilson County Hospital, Neodesha	$400,000
Dickinson County Hospital Abilene	500,000
St. Mary's Hospital, Winfield	900,000
Total	1,800,000

If you have any questions, please feel free to write or call us.

Sincerely yours,

ROY N. JOHNSTON,
Director of Division.

Proposed allocation of Federal funds

Name of hospital	Town	Total cost	Federal funds	
			1959 fiscal year	1960 fiscal year
General hospitals:				
Labette County	Parsons	$1,472,487.72	$607,294.42	$79,080.58
Mercy (nurses residence)	Fort Scott	577,636.00	275,000.00	
Wesley Hospital	Wichita	[1]	24,820.28	
Cushing Memorial	Leavenworth	[1]	142,352.30	60,000.00

Stafford District	Stafford	486,000.00	50,000.00	190,000.00
Mercy Hospital	Independence	1,564,770.00	210,700.00	458,155.64
Caney Municipal	Caney	420,000.00	50,000.00	160,000.00
Shawnee-Mission	Merriam	1,411,836.00		5,000.00
Newman Memorial	Emporia	1,293,482.27		646,741.13
Total allocation			2,030,429.00	2,106,437.00
Chronic disease hospitals:				
Wichita-St. Joseph	Wichita	[1]	100,000.00	
Unassigned				100,000.00
Total allocation			100,000.00	100,000.00

Name of hospital	Town	Total cost	Federal funds	
			1959 fiscal year	1960 fiscal year
Rehabilitation:				
Capper Foundation	Topeka	[1]	[2] $78,517.74	
University of Kansas Medical.	Kansas City	$443,656,09	27,462.44	
Capper Foundation (nursing unit).	Topeka	119,462.00	25,986.82	$21,894.18
Unassigned				115,119.82
Total allocation			131,967.00	137,014.00
Diagnostic and treatment:				
Transferred to nursing homes.			100,000.00	
Unassigned				100,000.00
Total allocation			100,000.00	100,000.00
Nursing home:				
Grace Hospital	Hutchinson	[1]	117,400.00	
Presbyterian Manor	Newton	[1]	73,375.00	111,363.28
Lindsborg Community	Lindsborg	139,732.00	41,192.00	25,650.72
Total allocation			[3] 231,967.00	137,014.00

[1] Carried over from 1958 fiscal year. Completes Wichita and Leavenworth projects.
[2] May be reduced. Waiting decision on audit appeal.
[3] Includes $100,000 transferred from "Diagnostic and treatment."

Mr. HILL. Mr. President, by examining the table on page 466 of the hearings, Senators will obtain the entire story in connection with this matter.

Mr. SALTONSTALL. Mr. President, will the Senator from Alabama yield to me, so that I may ask a question?

Mr. HILL. I yield.

Mr. SALTONSTALL. Mr. President, very briefly, let me state that, as the Senator knows, in Massachusetts we have a number of institutions, such as the Children's Hospital in Boston, the Peter Bent Brigham Hospital, the Massachusetts General Hospital, and the Harvard Medical School, all of which do research work for the Department of Health, Education, and Welfare, which is the only department of the Government, as I understand, which places a percentage limitation on the amount for indirect costs incurred by the acceptance of research grants.

I understand that the committee has deleted that provision.

Mr. HILL. The Senator from Massachusetts is correct; the committee has deleted that 15-percent limitation. That means we shall go to conference with this, and will do our best to sustain the Senate position on this matter.

Mr. SALTONSTALL. I am very glad to hear that.

Mr. President, I ask unanimous consent to have printed at this point in the RECORD a letter from Lawrence A. Kimpton, president of the Association of American Universities. His letter deals with this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

JANUARY 15, 1960.

The Honorable the SECRETARY OF HEALTH, EDUCATION, AND WELFARE,
Washington, D.C.

DEAR MR. SECRETARY: The Association of American Universities wishes to place before the Department of Health, Education, and Welfare (and its constituent agencies, the Public Health Service and the National Institutes of Health) and the Congress of the United States an urgent request that every effort be put forward to eliminate from present and future appropriation bills for the Department the provision that research grants to institutions of higher education, made by agencies within the Department, are restricted to the payment of only 15 percent of the total cost toward covering indirect costs of research.

This 15-percent limitation, which has been enacted into prior appropriation bills, has been an extremely costly provision to the universities of the country. The costs of research consist not only of the direct expenses of salaries and equipment, but also the indirect expenses of maintenance of laboratories and buildings, including heating, lighting, ventilation, cleaning, repairs, etc., and including costs of administrative and business offices. As the teaching or research activities of any university increase, these indirect costs have been found inevitably, and in the long run, to increase also in direct proportion. The sum total of these costs in practically all universities is far in excess of the percentage limitation provided in Public Health Service and National Institutes of Health grants.

Many agencies of the Government have recognized the desirability of paying the full costs of research, including the indirect costs. The recent Circular A–21 issued by the Bureau of the Budget sets forth the policy that research projects undertaken through government sponsorship shall cover full costs, and it sets forth the principles by which such cost determination can be made. This Circular A–21 permits, and indeed instructs, all agencies of the Government to follow these principles in the awarding of research contracts and grants. The Department of Health, Education, and Welfare is the only agency of Government which is prohibited by law from adopting the principles set forth by the Bureau of the Budget in Circular A–21.

The above restriction applying to grants by the Public Health Service and the National Institutes of Health imposes serious fiscal burdens on one of the most critical elements of American higher education—namely, the medical schools. For many years the medical schools of the United States have been under serious financial pressure as the costs of medical education and research have risen, and as pressures have risen for turning out more and better doctors. A large volume of medical research is now supported by grants from the National Institutes of Health in American medical schools, but since the indirect costs are not fully covered, the schools have been desperately short of the other funds required to cover the full costs of the research work which has been undertaken. This research work in the fields of medicine and biology is of critical importance to national health, and the maintenance of the financial integrity of the medical schools is therefore an important aspect of national welfare. It is urgently necessary, therefore, that medical schools be strengthened rather than weakened by undertaking critically important research financed by Government agencies.

A large proportion of the member institutions of the Association of American Universities include medical schools in their organization, and all of these have faced serious financial difficulties because of the policy imposed by the Congress in preventing the reimbursement of the universities for the full costs which they incur in research programs.

The Association of American Universities respectfully requests the Secretary of Health, Education, and Welfare to provide in its budget the funds required to cover the full indirect allowance computed under Circular A–21 for research grants, and to recommend strongly, and as a matter of urgency, the elimination of the indirect-cost restriction in the fiscal 1961 appropriation bill.

Respectfully submitted.

THE ASSOCIATION OF AMERICAN UNIVERSITIES,
LAWRENCE A. KIMPTON,
President.

Mr. KUCHEL. Mr. President, I ask unanimous consent to have printed at this point in the RECORD my statement on this item.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR KUCHEL

The Senate from time to time has taken cognizance of the insidious and grave threat to public health stemming from our Nation's amazing industrial growth and the momentous increase in numbers and use of motor vehicles and powerplants which discharge great volumes of pollutants into the atmosphere.

On several occasions during my service in this body, I have been privileged to vote for measures finally enacted into law under

which Federal agencies have been empowered and directed to investigate the problem of air pollution. The importance of these acts may not have been fully appreciated, but, in my estimation, the Air Pollution Research Act, Public Law 159, the extension of that law in 1959 by Public Law 86–365, and most recently the so-called Schenck Act, Public Law 86–493, are of immeasurable significance in our comprehensive programs to safeguard and maintain public health.

The bill now before us providing funds for the U.S. Public Health Service will finance activities under these statutes. A total of $4,900,000 is provided for air pollution research and investigation, the largest sum which ever has been allowed in a single year. This is within $100,000 of the annual ceiling fixed by Congress a year ago in extending Public Law 159.

Within the month, the Congress has broadened, in effect, the scope of the original act, which I had the privilege of introducing and helping put through the 84th Congress. Only a few days before departing from the country on his present Pacific trip, President Eisenhower signed the bill H.R. 8238 calling on the Public Health Service to "conduct a thorough study" into the particular aspect of the air pollution problem identified with motor vehicle exhausts.

This is a widely acknowledged major phase of the smog or air-pollution difficulties with which many areas are wrestling. The studies, it is hoped, will pave the way for remedial measures to safeguard our people against fumes and materials which may have exceedingly deleterious effects.

This new act was sent to the White House about the time our Appropriations Subcommittee was finishing its work on the pending bill. Unfortunately, its passage had not been anticipated, at least to the point where any estimate could be made of the amount of money required to carry out the duties which Public Law 86–493 imposes. Therefore, it is vital that an additional amount be included in the appropriation for environmental health activities.

Accordingly, I am proposing on behalf of myself, my able colleague, Mr. ENGLE, the two able Senators from Pennsylvania, Mr. CLARK and Mr. SCOTT, and the able senior Senator from Minnesota, Mr. HUMPHREY, that $1 million be added to this measure.

Work required to implement this new law will, I am advised, include both laboratory studies and the appraisal of conditions in the field in various individual communities. This naturally will require money which is not provided in the $4,900,000 carried in the bill as passed by the House or reported by our committee.

The investigation of automobile exhausts will require a material expansion of the Public Health Service's planned activities relating to the overall air pollution problem. The studies contemplated are of such character that considerable leadtime is necessary to obtain equipment and to organize a staff. At present, the Service now has only one research facility at its Sanitary Engineering Center in Cincinnati, where a limited number of the various problems concerning such pollution can be studied at any one time.

To expedite the research work which the Congress has just called upon the Service to perform, several such installations doubtless will be required. This would permit simultaneous study of various facets of the problem at one time.

I am not seeking the full amount which may be essential to explore this highly important and extensive field. Instead, I am merely proposing a modest sum so that as little time as possible will be lost in getting under way. I do not believe we would be warranted in any so-called crash program, which might call for materially greater amounts of money. Nevertheless, the work should be begun as quickly as the Service can mobilize manpower, obtain facilities, and map out specific courses of action.

Unless money is made available at this time, it is probable that a whole year will be lost in conducting this desirable research. The law itself directs the Surgeon General to report in not more than 2 years.

Both the House and the Senate Appropriations Committee in their reports acknowledge the urgency of Federal efforts in the air-pollution field. Indeed, our Senate committee's remarks on the problem of allergy and infectious disease activities at the National Institutes of Health bear on this point. On page 35 of the report, the statement is made:

"With the growing importance of air pollution in our urban environment, the respiratory allergies in particular will demand a vigorous research attack."

The funds provided in the amendment which I propose would serve to strengthen this attack.

The PRESIDING OFFICER. Is all remaining time on the amendment yielded back?

Mr. HILL. I yield back the remainder of the time under my control, Mr. President.

Mr. KUCHEL. Mr. President, I yield back the remainder of the time under my control.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from California.

The amendment was agreed to.

Mr. HUMPHREY. Mr. President, I offer the amendment which I send to the desk and ask to have stated.

The PRESIDING OFFICER. The amendment submitted by the Senator from Minnesota will be stated.

The LEGISLATIVE CLERK. On page 41, between lines 7 and 8, it is proposed to insert:

COOPERATIVE RESEARCH OR DEMONSTRATION PROJECTS IN SOCIAL SECURITY

For grants, contracts, and jointly financed cooperative arrangements for research or demonstration projects under section 1110 of the Social Security Act, as amended (42 U.S.C. 1310), $700,000.

Mr. HUMPHREY. Mr. President, my remarks in connection with this amendment will be brief.

This is a budget recommendation of the administration. It has also been recommended in connection with the objectives of the American Public Welfare Association. It has been requested by the head of the social security agency itself and by the Secretary of the Department of Health, Education, and Welfare. It fits in with the President's program.

Mr. President, I have discussed this amendment with the chairman of the committee, and I believe it merits being made a part of the bill.

Mr. HILL. Mr. President, the amendment has the support of the Department of Health, Education, and Welfare, and also of the Bureau of the Budget. I think the amendment is a good one, and should be adopted; and I am happy to accept it.

Mr. HUMPHREY. Mr. President, I ask unanimous consent to have my statement and explanation of the amendment printed at this point in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR HUBERT H. HUMPHREY ON COOPERATIVE RESEARCH AMENDMENT TO LABOR-HEW APPROPRIATIONS BILL

I now propose an amendment to add $700,000 for social security research and demonstration projects to the Labor-HEW appropriations bill, H.R. 11390.

The Advisory Council on Public Assistance, the Advisory Council on Child Welfare Services, the American Public Welfare Association, and the National Association of Social Workers have all stressed the importance of such research and demonstration projects in advancing our efforts to strengthen family and child welfare.

The Social Security Administration requested $700,000 to begin a program of cooperative research in social security in fiscal 1961, but the House Appropriations Committee refused this budget request and it has not been restored by House floor action nor by the Senate Appropriations Committee.

I believe that a far greater amount for fruitful research into social security problems would be completely justified, but at least we should make a start. A modest investment in research can pay tremendous dividends in medical research we have discovered, and Congress very properly gives full support to the medical research programs of the National Institutes of Health. I believe it is equally realistic and reasonable to invest the modest sum of $700,000 into other important research programs which may help America to avoid the terrible social and financial costs of family breakdowns and juvenile delinquency—not to speak of the heartrending human cost of broken homes and neglected, disturbed or delinquent children.

I commend to the attention of my colleagues recommendation 18(a) of the Advisory Council on Public Assistance, which reads as follows:

"Funds authorized by the Congress under the social security amendments of 1956 should be appropriated for research and demonstration projects such as those relating to the prevention and reduction of dependency, coordination between private and public agencies, and improvements in social security and related programs, and research leading to strengthening family life."

I might also point out that this Advisory Council urged establishment of a national institute, along the lines of our National Institutes of Health, to support studies and demonstration programs to help strengthen family life in America.

Another group set up by the social security legislation of 1958, the Advisory Council on Child Welfare Services, also has urged support for research and demonstration projects. This Council recommends Federal grants to research organizations, to institutions of higher learning and to public and voluntary social agencies for demonstration and research projects in child welfare and other problems of family life such as alcoholism, desertion, divorce, neglect, and unemployment.

I also call to the attention of my colleagues item 32 of the Federal legislative objectives, 1960, of the American Public Welfare Association which urges appropriation of Federal funds for research and demonstration projects in all aspects of social security and public welfare.

These recommendations urging Federal funds for research and demonstration projects have the vigorous backing of top welfare experts in America.

I believe the great human, social, and financial dividends of research and demonstration projects in the field of social security fully justify appropriation of $700,000 for

these purposes and I urge my colleagues to join in support of my amendment to restore these funds as originally requested by the Social Security Administration.

I urge the adoption of my amendment.

COOPERATIVE RESEARCH

In his testimony before the Senate Appropriations Subcommittee on Labor and Health, Education, and Welfare, the Commissioner of Social Security, William L. Mitchell, strongly urged restoration of the $700,000 for cooperative research and demonstration projects in fiscal 1961 and he said this money would go for the following purposes:

1. $100,000 to make an inventory of social security research already in progress in various public and private organizations and agencies. Such an inventory would be essential if we are to approach the research problem in an orderly, efficient, and economical manner.

2. $250,000 for a major demonstration project, combined with a careful research program, to investigate the broad range of community services which could help low-income families, needy families, or broken homes, and thus preserve and promote the strength and stability of the community.

3. $350,000 for about 15 projects dealing with such matters as why families remain on assistance rolls, what are the best employment possibilities for mothers of dependent children, how best to use nursing homes in caring for older people, how best to improve public assistance administration, and similar problems which involve huge sums of public money.

With more than 5 million Americans getting public assistance, it seems obvious that an effective social research program can pay tremendous dividends by turning up new solutions to help needy, dependent people become self-supporting and self-respecting independent citizens.

As the Commissioner of Social Security pointed out in his testimony, "it is essential that the Federal Government provide stimulus and support through research grants as we do for health, education, and vocational rehabilitation."

If we have a good social security research program, we can deal better with public assistance cases which already exist and we can better prevent such cases from developing in the future.

Mr. HUMPHREY. Mr. President, I yield back the remainder of the time available to me.

Mr. HILL. Mr. President, I do likewise.

The PRESIDING OFFICER. All remaining time on the amendment of the Senator from Minnesota has been yielded back.

The question is on agreeing to the amendment of the Senator from Minnesota.

The amendment was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment.

Mr. DIRKSEN. Mr. President, I desire to move that the bill be recommitted, with instructions. I make that motion, which I send to the desk and ask to have read.

The PRESIDING OFFICER. The motion submitted by the Senator from Illinois will be read.

The motion was read, as follows:

I move that the bill (H.R. 11390) be recommitted to the Committee on Appropriations, with instructions to report it back to the Senate with amendments providing for a reduction of $250 million in the appropriations for the Department of Health, Education, and Welfare, other than for grants to States for public assistance.

Mr. DIRKSEN. Mr. President, the increases in the bill over the budget estimates for the Labor Department are rather inconsequential.

There are no increases for the National Labor Relations Board.

All these increases come in the items for the Department of Health, Education, and Welfare.

The Senate has added $300 million to the amount voted by the House of Representatives. The House had already voted appropriations of $164 million over the budget estimates. The bill as reported to the Senate calls for appropriations $418 million over the appropirations for 1960.

So the bill which we are considering tonight is almost $464 million—nearly half a billion—over the budget estimates.

I understand—and we had a long discussion about this, involving many officials—that what is actually happening in this field, today, is that the liberality of the criteria by which various research projects are finally accepted means that nearly any project which comes along in the research field can find lodging in this agency; and that means, in turn, that the good projects go to the private foundations, and the rest of the projects come to the Government.

Many of them, no doubt, become academic curiosities. But once they are included, they are included by the hundreds. The committees feel constrained to put them in the bill.

So we have a bill nearly half a billion dollars over the budget estimate. Somewhere this must stop. The situation was similar last year, and in other years when I was on the Appropriations Committee. I lifted my voice on occasion against some of these items, because I wanted to see some results. I have not yet seen the results.

I have made a comparison of the Kettering-Sloan Institute as compared with Government institutions. I would like to see some tangible results on the line. All we have gotten is the expenditure of more and more money over the years, and not results that are commensurate with the expenditures.

The last time I lifted my voice on this floor, when I was still on the committee, I had no more than done so than the organizations back home had me on the telephone. The pressure was on. Somewhere it must stop.

I think I can assure the Senate that the President will come pretty close to vetoing the bill with this money provided; and if I have anything to say about it, and if the President will listen to me, I will ask him to veto it to stop the business of accepting every project that comes along, irrespective of its real merit.

So today the good projects are carried out by the private foundations. They back out from all the others, and they become the Government projects; the result shows up in the form of the proposal before us tonight—$464 million over the budget estimate.

As I said this afternoon, I have seen the harpoon thrown out against the Budget Bureau on occasion, but it is a creature of the Congress. We created it 40 years ago. We did so for a purpose, because there existed a fiscal wilderness, a veritable labyrinth through which one could not find himself, and there had to be some order, with respect to economy and efficiency, so that the taxpayers could get their money's worth.

That is all I have to say. Here is a $464 million nuclear hole in the 1960 budget; and when it is approved, Senators may as well make up their minds that this is one more effort to chisel away the hope for a surplus which existed at the beginning of the session. Instead of a surplus, there will be a great big deficit. I cannot, in all good conscience, go along with this sort of thing.

So, Mr. President, I hope that the bill may be recommitted and that $250 million will be taken out of it, not, however, to include any reduction in the grants to States for public assistance.

That is my story. I yield back my time. I am ready to vote.

Mr. HILL. Mr. President, the hour is late. I shall not detain the Senate. I do wish, however, to say that if Senators want to slash funds for grants to the States for waste-treatment works, if they want to slash funds for hospital construction, diagnostic clinics, nursing homes, health centers, and other health facilities, if they want to slash funds for the project which the Senator from Kansas [Mr. CARLSON] mentioned a few minutes ago—and his question was not "Why so much?" but, really, in substance, "Why so little?"—if Senators want to slash funds for the great vocational education programs which we have had since World War I under the Smith-Hughes Act, if Senators want to slash funds that go to schools in federally impacted areas, if they want to slash funds for the very humane cause of vocational rehabilitation, if they want to slash funds for programs under our National Defense Education Act, if Senators want to slash funds for the work we have been carrying on in the prevention and control of diseases like tuberculosis, and if they want to slash funds for medical research, they will do so by voting for the Dirksen amendment. The Senate Appropriations Committee, under a resolution offered by the distinguished Senator from Massachusetts [Mr. SALTONSTALL], created a committee of consultants on medical research, composed of some of the most eminent doctors, scientists, and laymen in the United States. One could not find a more eminent group of consultants than those that served on the committee. If time permitted, I would like to fully discuss the work of the committee. The committee, through great personal sacrifice by its members, did a tremendous job. It issued a report which is a textbook on medical research. It is the finest report to be found in the field of medical research, a carefully prepared, soundly documented, compelling, and challenging report. The committee of consultants deserves the everlasting gratitude of

the American people, and of all mankind, for their tireless work and for the sacrifices they have made in coming to Washington weekend after weekend, in examining hundreds of witnesses, in bringing before it testimony, data, and material of all kinds, upon which the report is based, in giving to us this magnificent and challenging document on medical research, and showing us that medicine today stands at the threshold of a new day, and if we will but press forward, as this report recommends, against the dread diseases, the time is not too far distant when we shall have a breakthrough against cancer, heart disease, mental disease, arthritis, multiple sclerosis, cerebral palsy, cystic fibrosis, the neurological diseases, and all the other diseases that have baffled and plagued mankind through the years.

Dr. de Bakey, one of the foremost surgeons in the world, and one of the committee of consultants, was awarded last year the distinguished service award of the American Medical Association, as being, in the judgment of the members of the association, the man who during the year made the greatest contribution to medicine in all America. He declared to us that progress in medical research had moved forward in line with the support that has been given to medical research. As he further said, since we began these programs of medical research, helped and financed in part by the Government, there has been more progress in medical research in those few years than in all the centuries that had gone before.

I shall not delay the Senate longer tonight. I know the Senate is not going to slash these funds. We shall carry on the offensive against the dread diseases for we know that the Committee of Consultants has shown us the way to a new era in medical research and a new day in medicine for the health, the lives, and the happiness of our people and all peoples.

Mr. DIRKSEN. Mr. President, I yield 5 minutes from the time on the bill to the distinguished Senator from Colorado.

Mr. ALLOTT. Mr. President, we have heard a very impassioned plea by the chairman of the committee. I should like to invite attention to two facts.

First, adopting the motion Senators will not be slashing funds in any of the areas of which the chairman spoke, because not only we will be providing the budget amounts provided last year but also we will be providing more money.

I shall devote a few remarks to the phase of this about which I spoke last year. I shall continue to speak about it as long as I live.

No man in the Senate has more reason to desire medical research than the Senator from Colorado. No man appreciates more what can be done with research. The Bayne-Jones report, which was brought out 2 years ago, has still not been denied. The effects cited have not been denied, either in the committee or in the Congress. The report shows that we are depriving the people of the United States of medical care, because the medical men are being attracted to the lush research jobs.

I am in favor of research. I have talked to and reasoned with the chairman of the committee. Not every man can perform research.

If Senators vote for the bill as it is written, they will be presuming that if we throw millions and millions of dollars into the program any Tom, Dick, or Harry will be able to make a breakthrough as to cancer or as to mental diseases. Nothing could be more fallacious or so far from the truth.

There is one part of the bill to which I particularly object. We have to face the problem. We cannot obtain enough scientific researchers to do the job at the National Institutes of Health. For that reason, I shall support the Senator from Illinois.

I raised these same questions in the committee last year. I raised them this year. My arguments were not met. I was simply overridden.

The facts are that we are creating a dynasty of so-called research which is not research. Research can only be performed by capable, trained personnel. One of the greatest scientific men in the United States said to me, within the past week in my office, "You can conduct research only at a certain pace, and you cannot accelerate the pace no matter how much you spend upon the project. You may make a temporary jump, but you will end up by coming back and filling in the gaps and the mistakes you made in the original instance."

I have tried to state this in the best way I could to the chairman of the subcommittee, and to the man with whom I have served for 4 years, the chairman of the Committee on Labor and Public Welfare.

We must face the fact that we are spending too much money. We are taking into the research programs many people who are not qualified. I was going to say that they are no more qualified to perform research than Senators, but most of us are not scientific people in any sense of the word. These people are not qualified to perform basic research in the areas for which we are appropriating money.

There are other people who disagree with my position in this regard, but I believe the day will come when this will be demonstrated. The Congress will say, "What fools we are to throw money into these projects and to think we can solve our problems by this process." We cannot do it.

To make medical research meaningful, we have to have money, of course.

The PRESIDING OFFICER. The time of the Senator from Colorado has expired.

Mr. ALLOTT. Mr. President, will the Senator yield me 2 more minutes?

Mr. DIRKSEN. Mr. President, I yield 4 more minutes from the time on the bill to the Senator from Colorado.

Mr. ALLOTT. We have to have money. We have to have laboratories. We have to have people who can perform research. The key is that we have to have people to perform the research.

I am perfectly willing to vote for the budget estimate, Mr. President. I am perfectly willing to vote for the House figure. I am even willing to vote for an amount a little higher than the House figure, but when we talk about a $464 million increase for the whole budget, or $209 million over the House figure for the National Institutes of Health, I am not in favor of it.

I should like to give an example. A very pathetic case came to my attention in my office in January, in regard to a man who was afflicted with what most of us call "shaking palsy." I referred the case, with a doctor's statement, to the National Institutes of Health.

I give this example to show how good a job the Institutes are doing. The doctor received a five-line letter, along with a bunch of brochures, telling him the places he might go to find people who were doing research on this terrible, most common disease, which afflicts many people.

We have already accelerated the program so much that the people at the National Institutes of Health cannot pay attention to this disease. They can only send a five-line letter and a bunch of pamphlets to a doctor who submits a patient to them, and say, "Go look for yourself."

Mr. President, we need personnel. We will not obtain the needed personnel by throwing money away. In the end, all we will do is cause a deterioration and a proselyting of the program. We will destroy the kind of research and the kind of investigation we need.

Mr. PASTORE. Mr. President, will the Senator yield to me?

Mr. HILL. Mr. President, I yield 5 minutes to the Senator from Rhode Island.

The PRESIDING OFFICER. The Senator from Rhode Island is recognized for 5 minutes.

Mr. PASTORE. Mr. President, I am rather hesitant to speak upon this subject due to the fact that it is now 10:30 in the evening, and I think Senators are rather exhausted. However, I believe the statements made by our distinguished friend the Senator from Colorado deserve rebuttal, and I propose to make the rebuttal at this moment.

Mr. President, the argument which has been made tonight by my distinguished colleague from Colorado, for whom I have the highest of respect and affection, is the same argument which impelled and motivated my distinguished colleague from Massachusetts [Mr. SALTONSTALL] to make a motion in the committee a year ago, when the question arose whether the money we were appropriating was being wisely spent. As a matter of fact, we who are lay people on the committee do not regard ourselves as professionally proficient in this particular field and must listen to the experts to get the proper predicate upon which to formulate our plans. We are now hearing the same argument which was made by my distinguished colleague from Colorado a year ago, which led to the resolution to which I have referred. It was unanimously adopted by our committee. I do not believe I am mistaken in that position. I challenge anyone to defy the statement.

After we passed the resolution, our distinguished chairman consulted with every member of the full committee, so that suggestions could be made by them.

Mr. ALLOTT. Mr. President, will the Senator yield?

Mr. PASTORE. I yield.

Mr. ALLOTT. Would the Senator say that all the members of the committee were consulted as to who should be members of the subcommittee, or were we simply told?

Mr. PASTORE. It is my understanding that our distinguished chairman discussed this matter with nearly every member of the committee.

Mr. ALLOTT. I will correct that statement to a certain extent. The committee was appointed by the chairman, and we were asked to acquiesce, which we did.

Mr. HILL. Mr. President, will the Senator yield?

Mr. PASTORE. I yield.

Mr. HILL. Mr. President, we had a meeting with the subcommittee, and we discussed who should be members. The Senator from Colorado was not present, exactly as the Senator from Colorado was not present on May 19 and May 20, when the distinguished committee members consulted and made their report.

Mr. ALLOTT. That is right. I claim a matter of personal privilege.

Mr. PASTORE. It is not a question of personal privilege.

Mr. ALLOTT. It is a question of personal privilege. The Senator from Alabama implies I am not attending to my business.

Mr. MANSFIELD. Mr. President, I call for the regular order.

Mr. PASTORE. Mr. President, I ask the Chair whether the Senator from Rhode Island has the floor?

The PRESIDING OFFICER. The Senator from Rhode Island has the floor.

Mr. PASTORE. Does the Senator from Colorado request that I yield to him?

Mr. ALLOTT. I would request the Senator to yield for 1 minute.

Mr. PASTORE. I yield.

Mr. ALLOTT. I merely wish to say that I do not like the remark that I was not present on May 19th or 20th. I do not know what those dates were. I was present and was attending to the business of the Appropriations Committee at every time and at every moment that I was not present at the particular subcommittee of which the Senator from Alabama is chairman, and he well knows that. Let us have it as a matter of record.

Mr. PASTORE. No attempt was made to impugn——

Mr. ALLOTT. The Senator from Alabama did so. Let us get the record straight.

Mr. PASTORE. He said the Senator from Colorado was invited to come to a committee meeting.

Mr. ALLOTT. I said the Senator from Alabama made that statement.

Mr. HILL. The Senator from Colorado is on a number of subcommittees, as are all Senators. He was no doubt busy on some other subcommittee. But the fact is that he did not attend the meetings on May 19 and 20 when the committee consultants made the report to our subcommittee.

Mr. ALLOTT. That is correct. I think the Senator will have to modify his statement because he will recall that I was present on one of those days.

Mr. HILL. The Senator was there one day, but it was not the day when the committee consultants were present and made their report. The Senator from Colorado was there when Dr. Heller was present.

Mr. ALLOTT. It is immaterial. The question that came up was in respect to how the committee was appointed, and I say that the committee was not consulted as to the appointments.

Mr. PASTORE. Mr. Chairman, I invite the attention of the Senator to page 1460 of the committee's report to see the caliber of men who were chosen for this particular committee of consultants on medical research. I ask him to look at the list of not only the professional personnel but also the lay personnel. Among them is General Sarnoff, who is no starry-eyed bureaucrat. Read his statement on page 1331 of the report and find out what he had to say about the recommendation that was made by these consultants.

It was as a result of the argument then made by the distinguished Senator from Colorado that the resolution was passed. Our committee wanted to find out once and for all whether or not this money was being wasted or whether it was being used for the betterment of mankind and for the obliteration of disease. As a result of that quest, these consultants held more than 24 hearings.

These consultants talked with everyone who had anything to offer about this medical research program. They did not confine their discussions to those in this city, they went almost everywhere to speak with everyone who was proficient and knowledgeable on this subject.

What did we do in our subcommittee? We took the consultant committee's minimum recommendation, and their minimum recommendation is the figure that is in this budget today. They said, "This is the floor; this is not the ceiling."

The PRESIDING OFFICER. The time of the Senator from Rhode Island has expired.

Mr. PASTORE. May I have 2 more minutes?

Mr. HILL. I yield 2 minutes.

Mr. PASTORE. I ask my colleagues in the Senate not to be carried off by an allegation that this money is being wasted. We have not found the answer to cancer. Not yet. But we have made tremendous progress. Will we ever find the answer? God alone knows the answer to that question. But if man does not try, how will he ever know if he will succeed?

We are a Government of a free people that spends billions, billions, and billions of dollars not alone to rehabilitate our people and to conserve their general welfare, but to rehabilitate even the health and economy of people in other parts of the world, yet we are saying here this evening that we cannot afford this amount of money, which is the minimum figure our consultants advise.

The figure submitted is not a figure created in the minds of the members of our committee but was one submitted to us after careful and exhaustive research on the part of these consultants. I must take their word before I can take the word of any other individual as to whether or not this money can be spent wisely.

Gentlemen of the Senate, this is the question we must decide tonight. Will we substitute our opinion for the judgment of the experts? The amount the bill appropriates is not the ceiling—it is the floor of the amount that the consultants say can be wisely spent to find the answers in the crusade to eliminate these scourges of mankind. Money could never be appropriated by the Senate for a better purpose than the goal for which it is proposed to appropriate this money tonight.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. ALLOTT. Mr. President, I would like to have 2 minutes.

Mr. DIRKSEN. I yield 2 minutes.

Mr. ALLOTT. I would like to answer the Senator from Rhode Island, for whom I have a great deal of respect, only in this way: The witnesses who were called I know were honorable people, but I say that they were all from one side of the slate. I grant that General Sarnoff was present. I have heard about Sarnoff about 40 times since he testified. But I say seriously to the Senate that if we talk with any real scientist in the United States, he will tell us that we can proceed only so fast. We cannot proceed this fast. The great amount that we appropriated last year, so far as I have been able to learn and as far as I can read the RECORD, has not resulted in a single scientific breakthrough.

This is not conclusive, because we may go 5 years before we result in a real scientific breakthrough. The only thing I say to my friends is that we do not have the scientific personnel to carry on this kind of accelerated program, and that the day will come when we will rue the kind of so-called pseudoresearch that we are carrying on in the United States.

Mr. DIRKSEN. Mr. President, I yield to myself 3 minutes. I address myself particularly to the distinguished Senator from Rhode Island. There are 12 consultants on this board, and 10 of them certainly represent institutions.

I am advised, and I think authoritatively, that the 10 institutions that they represent are beneficiaries under the grants in the bill. Every time we consider the name of someone for confirmation to office in the Government the name comes before a committee, and the first thing we do is to investigate any possible conflict of interest. I do not reflect upon these distinguished gentlemen. I only say that if I were in their shoes representing an institution that is a beneficiary under the bill, it would not make any difference how unselfish I was. I still believe that selfishness would color to some extent the amount that I would say was the minimum.

That is the result. At least the Budget Bureau told me so, because they investigated it.

Finally, Senators might think for all the world that this measure had no preparation before it got here. Last fall the budget directors of the various components of this agency had to bring their data together. It takes that long to prepare. It is winnowed, it is sifted, and it goes to the Budget Director of the agency. Members of his office sit down with the experts in the Budget Bureau in a long, careful, and painstaking effort, involving a good deal of testimony, before the figures are contrived. These are not snatched out of thin air. But notwithstanding the months and months and months of careful work to prepare the budget, the Appropriations Committee says: "It is not enough; we are going to add $464 million to the amount."

Then they say to us, "This is the minimum, according to the consultants"—10 of the 12 of whom represent institutions that are beneficiaries under the bill.

I yield back the remainder of my time.

Mr. PASTORE. Mr. President, may I have 1 minute?

Mr. HILL. I yield 2 minutes to the Senator from Rhode Island.

Mr. PASTORE. In view of the fact that the last observation seems addressed to me, let me ask how can we doubt the integrity of these men. We are saying they are selfish—self-centered.

After all, who are these men? These are the outstanding doctors of their time in this country. Two of them have earned the achievement of the Distinguished Service Award for their respective years at medical conventions in the United States. Does any Senator believe for a moment that men of that caliber will soil their reputation merely because the university with which they are connected happens to be the beneficiary of a small amount of these research funds?

Do we have that kind of doctor serving humanity in the United States? Are these the kind of men who would extend their hands greedily and to squander money and time in their dedicated service? That is the purport of what is being said. Or perhaps we hear the softer claim—"Oh, no; we do not say that, but we say our judgment is better than theirs."

Who was the initiator of the resolution on consultants? It was the distinguished Senator from Massachusetts [Mr. SALTONSTALL]. No one ever found any fault with the consultants until they brought back their report. Who found fault with it? The very men who have been opposing this appropriation year after year.

Mr. President, this has to do with cancer. This has to do with heart disease. This has to do with mental sickness. This has to do with the fight against the devastating ailments of humankind.

Unless we move into this program with a sufficient amount of money to train the right people in the right numbers to do the proper research, we will never find the answer to these scourges which plague mankind.

Now is the time to act. Let us accept the figures of the bill. They are figures determined not by the committee, but by the consultants chosen by the resolution.

We dare not deduct from their minimum. Let us get on with this research.

The PRESIDING OFFICER. The time of the Senator from Rhode Island has expired.

Mr. DIRKSEN. Mr. President, I yield back the remainder of my time.

Mr. JOHNSON of Texas. Mr. President, I yield back the remainder of my time.

Mr. DIRKSEN. Mr. President, I ask unanimous consent that the motion may be read for the information of the Senate.

The PRESIDING OFFICER. Without objection, the text of the motion will be read.

The Chief Clerk read as follows:

I move that the bill (H.R. 11390) be recommitted to the Committee on Appropriations with instructions to report it back to the Senate with amendments providing for a reduction of $250 million in the appropriations for the Department of Health, Education, and Welfare, other than for grants to States for public assistance.

The PRESIDING OFFICER. The question is on agreeing to the motion offered by the Senator from Illinois [Mr. DIRKSEN] to recommit the bill with instructions. The yeas and nays have been ordered, and the clerk will call the roll.

The Chief Clerk called the roll.

Mr. MANSFIELD. I announce that the Senator from Alaska [Mr. BARTLETT], the Senator from Colorado [Mr. CARROLL], the Senator from New Mexico [Mr. CHAVEZ], the Senator from California [Mr. ENGLE], the Senator from Rhode Island [Mr. GREEN], the Senator from Arizona [Mr. HAYDEN], the Senators from Oklahoma [Mr. KERR and Mr. MONRONEY], the Senator from Montana [Mr. MURRAY], the Senator from Georgia [Mr. RUSSELL], the Senator from Mississippi [Mr. STENNIS], and the Senator from Texas [Mr. YARBOROUGH] are absent on official business.

I also announce that the Senator from Arkansas [Mr. FULBRIGHT] and the Senator from Missouri [Mr. HENNINGS] are absent because of illness.

I further announce that the Senator from Tennessee [Mr. KEFAUVER], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Michigan [Mr. MCNAMARA], the Senator from Oregon [Mr. MORSE], and the Senator from Wyoming [Mr. O'MAHONEY] are necessarily absent.

I further announce that, if present and voting, all of the above Senators would vote "nay."

Mr. KUCHEL. I announce that the Senator from Maryland [Mr. BUTLER] is absent because of illness.

The Senator from Indiana [Mr. CAPEHART] is absent by leave of the Senate.

The Senator from New Hampshire [Mr. COTTON] and the Senator from Nebraska [Mr. HRUSKA] are necessarily absent.

The Senator from Iowa [Mr. HICKENLOOPER], the Senator from South Dakota [Mr. MUNDT], and the Senator from Kansas [Mr. SCHOEPPEL] are absent on official business.

The Senator from New Hampshire [Mr. BRIDGES], the Senator from New Jersey [Mr. CASE], the Senator from Arizona [Mr. GOLDWATER], and the Senator from Wisconsin [Mr. WILEY] are detained on official business. If present and voting, the Senator from New Hampshire [Mr. BRIDGES], the Senator from Arizona [Mr. GOLDWATER], the Senator from Nebraska [Mr. HRUSKA], the Senator from South Dakota [Mr. MUNDT], and the Senator from Wisconsin [Mr. WILEY] would each vote "yea."

The result was announced—yeas 13, nays 57, as follows:

[No. 232]

YEAS—13

Allott	Case, S. Dak.	Morton

So the motion to recommit was rejected.

Mr. JOHNSON of Texas. Mr. President, I move to reconsider the vote by which the motion to recommit was rejected.

Mr. HILL. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. JOHNSON of Texas. Mr. President, I ask for the yeas and nays on the passage of the bill.

The PRESIDING OFFICER. The yeas and nays have already been ordered.

Mr. HUMPHREY. Mr. President, I ask unanimous consent to have printed in the RECORD, before the vote, statements I had intended to make.

There being no objection, the statements were ordered to be printed in the RECORD, as follows:

STATEMENTS BY SENATOR HUMPHREY

There is a need for at least $292,300 additional funds for welfare personnel training to the Labor-HEW appropriations bill, H.R. 11390. I have recommended this to the committee and to the Senate.

The Bureau of Public Assistance in the Social Security Administration requested this amount for fiscal 1961 to finance short-term training programs for State and local

public welfare workers, but the House Appropriations Committee refused to allow this request and the money has not been restored by floor action in the House nor by the Senate Appropriations Committee.

Officials and experts in the field of public welfare report a shortage of qualified welfare personnel and they stress the need to attract recruits and to upgrade present welfare personnel.

Short-term inservice training can give a tremendous boost to the professional abilities of welfare personnel. Such programs not only enhance the prestige of their profession but also enable them to do a better job, utilizing new knowledge and new welfare techniques.

The American Public Welfare Association has endorsed appropriation of Federal funds for assistance to the States in training personnel for State and local public welfare programs.

The Advisory Council on Public Assistance, set up by the Social Security Amendments of 1958, also calls for Federal assistance to support training of public welfare personnel, as does the Advisory Council on Child Welfare Services.

The Senate Appropriations Committee, in its report on the Labor-HEW appropriations bill, reiterates its view that sufficient authority and sufficient funds for welfare personnel training are available in the appropriation for grants to the States for public assistance.

I respect the judgment of the committee, but I am convinced that there are great dividends to be found by a relatively small investment in welfare personnel training.

We can stimulate a great progress in welfare training and we can increase the supply of trained welfare personnel by a small Federal investment which will stimulate even greater cooperative action by State and local welfare agencies. Such action on our part has the support of highly qualified welfare experts and observers, and I urge my colleagues to join in restoring the $292,300 requested by the Bureau of Public Assistance for fiscal 1961.

I had intended to offer an amendment for these purposes but after consulting with the leadership and members of the Appropriations Committee, and in light of the increases in this appropriation over the budget estimate, I shall withhold the amendment.

The program cut of $292,300 by the House in the activity "Staff development for State and local employees," under the item "Salaries and expenses of the Bureau of Public Assistance," seriously weakens a vital training program for welfare personnel.

This cut has been applied to a series of short-term training seminars for key State welfare personnel. Congress approved $49,000 for this purpose in fiscal 1960 and two successful seminars have been held for State welfare workers. The increase requested by the Bureau of Public Assistance is fully justified by the prospects of improved welfare administration and better staff work in State and local public assistance programs.

Restoration of the budget cut would not support academic training for welfare workers, although grants for such training is authorized. No appropriation has been made for such academic training.

As the chairman of the Appropriations Subcommittee on Labor and HEW, Senator HILL, pointed out during hearings on this bill "if we trained the State employees better and made sure they were better qualified for that work, that would mean in the end a saving to the contribution of the Federal Government."

The short-term, inservice training seminars can make a tremendous contribution to the States and local communities in attracting and retaining high caliber welfare personnel and in raising the standard of public assistance administration all over this country.

I had intended to propose an amendment to the Labor-HEW appropriations bill, H.R. 11390, to raise the funds appropriated for child welfare services to the full $17 million currently authorized. After consulting the committee members and the leadership I recognize that the Senate is not of the mind to further increase the appropriation. I recognize the budget limitations, but permit me to review why there is a need for the full authorization.

The administration requested only $13,666,000 for child welfare services in fiscal 1961 and the House approved this request. The Senate Appropriations Committee has accepted this figure, but I wish to make a few comments about the recommendations of the Advisory Council on Child Welfare Services.

In 1958, Congress approved legislation making child welfare funds available to children not only in rural areas, but also in urban metropolitan areas. This expanded responsibility makes it absolutely essential that we provide more adequate funds to support State and local child welfare services.

The Advisory Council on Child Welfare Services, under the able direction of John Kidneigh, director of the School of Social Work at the University of Minnesota, has pointed out that Federal appropriations would have to increase greatly to expand child welfare services in urban areas and even to maintain programs in rural areas at the same level.

For fiscal 1960, Congress appropriated $13 million. The advisory council declared that, in view of the increase in the child population and the higher costs of services and care, the fiscal 1960 appropriation of $13 million would result in a lower level of child welfare services throughout our country than existed in fiscal 1959 when Congress appropriated $12 million for this purpose.

In the near future, we must raise the authorization for child welfare services to $25 million. However, pending such action, I hope we will appropriate the full amount now authorized for child welfare services—$17 million.

The appropriation of the full $17 million authorized is needed because of the tremendous shortage of child welfare workers and the weakness of child welfare services in many areas.

About one-half of all counties in the United States have no full-time public child welfare workers.

Almost one-third of the urban communities and over one-half of the rural counties have no service from a full-time child welfare worker.

Only one-fifth of all counties in the United States have one child welfare worker per 10,000 children under the age of 21.

Mrs. Katherine Oettinger, Chief of the Children's Bureau, says that two-thirds of the States want to increase the number of foster family homes and many States want to begin or expand homemaker services, day-care services and protective services for abused or neglected children.

Whatever money we put into child welfare services will stimulate further support at the State level, for under the present law, the States are required to match Federal child welfare funds.

Therefore, appropriation of the currently authorized funds for child welfare can provide vitally needed encouragement and support for child welfare services by the State and local communities to protect homeless, dependent and neglected children, and children in danger of becoming delinquent, and runaway children who cross State lines.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment of the amendments and the third reading of the bill.

The amendments were ordered to be engrossed, and the bill to be read a third time.

The bill was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass? The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. MANSFIELD. I announce that the Senator from Alaska [Mr. BARTLETT], the Senator from Colorado [Mr. CARROLL], the Senator from New Mexico [Mr. CHAVEZ], the Senator from California [Mr. ENGLE], the Senator from Rhode Island [Mr. GREEN], the Senator from Arizona [Mr. HAYDEN], the Senators from Oklahoma [Mr. KERR and Mr. MONRONEY], the Senator from Louisiana [Mr. LONG], the Senator from Montana [Mr. MURRAY], the Senator from Georgia [Mr. RUSSELL], the Senator from Mississippi [Mr. STENNIS], and the Senator from Texas [Mr. YARBOROUGH] are absent on official business.

I also announce that the Senator from Arkansas [Mr. FULBRIGHT] and the Senator from Missouri [Mr. HENNINGS] are absent because of illness.

I further announce that the Senator from Tennessee [Mr. KEFAUVER], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Michigan [Mr. MCNAMARA], the Senator from Oregon [Mr. MORSE], and the Senator from Wyoming [Mr. O'MAHONEY] are necessarily absent.

I further announce that, if present and voting, all of the above Senators would each vote "yea."

Mr. KUCHEL. I announce that the Senator from Maryland [Mr. BUTLER] is absent because of illness.

The Senator from Indiana [Mr. CAPEHART] is absent by leave of the Senate.

The Senator from New Hampshire [Mr. COTTON] and the Senator from Nebraska [Mr. HRUSKA] are necessarily absent.

The Senator from Iowa [Mr. HICKENLOOPER], the Senator from South Dakota [Mr. MUNDT], and the Senator from Kansas [Mr. SCHOEPPEL] are absent on official business.

The Senator from New Hampshire [Mr. BRIDGES], the Senator from New Jersey [Mr. CASE], the Senator from Arizona [Mr. GOLDWATER], and the Senator from Wisconsin [Mr. WILEY] are detained on official business. If present and voting, the Senator from New Hampshire [Mr. BRIDGES], the Senator from Indiana [Mr. CAPEHART], the Senator from Nebraska [Mr. HRUSKA], the Senator from Kansas [Mr. SCHOEPPEL], and the Senator from Wisconsin [Mr. WILEY] would each vote "yea."

On this vote, the Senator from South Dakota [Mr. MUNDT] is paired with the Senator from Arizona [Mr. GOLDWATER]. If present and voting, the Senator from South Dakota would vote "yea," and the Senator from Arizona would vote "nay."

The result was announced—yeas 63, nays 6, as follows:

[No. 233]

So the bill (H.R. 11390) was passed.

Mr. JOHNSON of Texas. Mr. President, I move that the vote by which the bill was passed be reconsidered.

Mr. HILL. Mr. President, I move to lay on the table the motion to reconsider.

The PRESIDING OFFICER (Mr. YOUNG of Ohio in the chair). The question is on agreeing to the motion to lay on the table the motion to reconsider.

The motion to lay on the table was agreed to.

Mr. HILL. Mr. President, I move that the Senate insist on its amendments, request a conference thereon with the House of Representatives, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer appointed Mr. HILL, Mr. CHAVEZ, Mr. RUSSELL, Mr. STENNIS, Mr. PASTORE, Mr. MONRONEY, Mr. KUCHEL, Mrs. SMITH, and Mr. HRUSKA the conferees on the part of the Senate.

Mr. JOHNSON of Texas. Mr. President, I wish to commend the distinguished and able Senator from Alabama [Mr. HILL] for the fearless and constructive leadership he has provided the Senate this year in connection with the Departments of Labor and Health, Education, and Welfare appropriation bill. As every Member of the Senate knows, there is no more respected Member of this body than the senior Senator from Alabama. There is no Member of the Senate who does more to help more people than does Senator HILL. I wish to congratulate him on his great achievement in piloting this bill through the Senate, with only six votes against it. History will record that he was daring, he was fearless, he was conscientious, and he was always on the side of humanity.

Mr. HILL. Mr. President, I wish to express my very deep appreciation to the Senator from Texas. I wish to say it was not what the Senator from Alabama did, but it was the teamwork of the Subcommittee on Labor, Health, Education, and Welfare, of the Senate Appropriations Committee. The entire subcommittee was in this fight from the beginning, and made many, many very fine contributions.

Furthermore, the success today was due in no small measure to the very fine leadership of our distinguished majority leader, the senior Senator from Texas. He has helped us in many, many ways.

Mr. JOHNSON of Texas. I thank the Senator from Alabama.

ORDER FOR CALL OF THE CALENDAR TOMORROW

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that on tomorrow, following the conclusion of morning business, there be a call of the measures on the calendar, beginning with Calendar No. 1556, Senate bill 3383, to amend section 4 of the Watershed Protection and Flood Prevention Act.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

PUBLIC DEBT AND TAX RATE EXTENSION ACT OF 1960

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 1664, House bill 12381.

The PRESIDING OFFICER. The bill will be stated by title, for the information of the Senate.

Mr. CLARK. Mr. President, I should like to be heard on this question. I regret to state that I am opposed——

The PRESIDING OFFICER. The bill will first be stated by title, for the information of the Senate.

The CHIEF CLERK. A bill (H.R. 12381) to increase for a 1-year period the public debt limit set forth in section 21 of the Second Liberty Bond Act and to extend for 1 year the existing corporate normal tax rate and certain excise tax rates.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Texas?

Mr. CLARK. I object.

Mr. JOHNSON of Texas. Then, Mr. President, I move that the Senate proceed to the consideration of Calendar No. 1664, House bill 12381.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Texas.

Mr. CLARK. Mr. President, I desire to be heard.

The PRESIDING OFFICER. The motion is debatable.

Mr. CLARK. Mr. President, I regret more than I can say the necessity which impels me to object to this motion. I regret even more that it will be necessary for me to state my objections at some length.

The Members of the Senate will perhaps pardon me for taking this step, which I do with a heavy heart, realizing the lateness of the hour and the imposition on my colleagues in taking so unusual a step as to oppose the motion of the majority leader, for whom I have the highest respect and regard, and who has made the normally routine motion that the Senate proceed to the consideration of Calendar No. 1664, House bill 12381.

Let me state that my reasons for opposing the motion are quite extensive. I should like to begin by considering what the bill proposes to do.

This is a bill to increase for a 1-year period the public debt limit set forth in section 21 of the Second Liberty Bond Act and to extend for 1 year the existing corporate normal tax rate and certain excise tax rates.

I think no one could legitimately object to a bill which did no more than the title of the bill indicates the bill purports to do. But, although the title of the bill does not disclose it, an examination of the bill and of the committee report—which, although dated June 6, 1960, I regret that, because of the pressure of other matters, I have even now been unable to study thoroughly—reveals that, in addition to the actions stated in the title of the bill, the bill would repeal two excise taxes, a communications tax, and a transportation tax, and would involve a net loss to the Treasury—so I have been advised by the chairman of the Finance Committee, the senior Senator from Virginia [Mr. BYRD]—of $742 million annually.

The Senator from Virginia [Mr. BYRD] advises me that he opposes enactment of this bill. So do I. My reasons are perhaps not identical with those of the distinguished senior Senator from Virginia, for whom I have the highest regard, although my colleagues in the Senate appreciate that I do not always agree with him.

But, Mr. President, it occurs to me that to bring up this bill at this particular time is an action which I can only, with deep regret, describe as fiscally irresponsible and not in the interest of national unity.

During the last 48 hours the Senate has voted to increase by over $1 billion the appropriations for the Department of Defense. The Senate has voted to add an extra burden of appropriations, in the amount of $750 million, by reason of the pay bill the Senate passed today. The Senate has voted to add additional appropriations—by means of the action the Senate took a moment ago, in connection with the appropriation bill for the Department of Health, Education, and Welfare—of $400 million. So, Mr. President, in the course of 48 hours the Senate—controlled by my party, by reason of the membership in this body of 65 Democrats and 35 Republicans—has voted to increase appropriations by a total of $2,150 million.

It is now proposed that we move immediately to the consideration of a bill which will cut revenues by $742 million annually.

Mr. President, at some point there must be a halt to fiscal irresponsibility, and I think that time is now.

My position may find little favor with my colleagues on either side of the aisle, but I, who have voted for all three of these appropriations, and for a good many others, am not willing to sit by idly while my party proceeds to cut revenues by $750 million.

Mr. WILLIAMS of Delaware. Mr. President, will the Senator yield?

Mr. CLARK. I am happy to yield to the Senator from Delaware.

Mr. WILLIAMS of Delaware. I think the Senator from Pennsylvania is somewhat confused.

Mr. CLARK. This would not be the first time, may I say to the Senator from Delaware.

Mr. WILLIAMS of Delaware. I agree with the Senator.

Mr. CLARK. Let me say that the feeling is mutual.

Mr. WILLIAMS of Delaware. That is right.

The bill as reported by the committee does contain certain committee amendments which reduced the bill as it came over from the House by $752 million. To that extent the Senator from Pennsylvania is correct. The Senator from Virginia, as well as I, both opposed those amendments, and will be opposing them tomorrow. The Senator from Virginia is not here, and he can speak for himself, but while he opposed certain amendments, he is not opposing the bill. The bill itself provides for the extension of the present corporate tax rate from 47 to 52 percent, as well as other excise taxes. If this bill is not enacted by the end of June, it will result in a full year, loss of revenues of $3,948 million.

Mr. CLARK. I refuse to yield any further for the moment. I will yield shortly. It may well be that I am confused. As I said before, it will not be the first time that I have been. But I am not so confused that I do not recognize that everything the Senator from Delaware has said is correct, and he knows every other Senator in this body knows it is correct, too. I thought I had made it abundantly clear—I tried to make it clear; perhaps my friend from Delaware was not listening very carefully—that I had not the slightest objection to that which is being proposed by the title, which is to extend the public debt limitation, to extend the normal corporate tax rate, and to extend certain excise tax rates. So, with respect to that particular comment, I am not confused.

I am now happy to yield for a question to the Senator from Delaware.

Mr. WILLIAMS of Delaware. Does the Senator from Pennsylvania know that the bill as it came to the committee from the House provides for the extension of the corporate tax rate and certain excise taxes, the total of which amounts to $3,948 million for a full year? All of this amount will be lost if we do not pass the bill by June 30.

The committee adopted some amendments, reducing this amount by $752 million. I opposed this action in the committee, and I shall oppose it tomorrow.

Mr. CLARK. That is a complicated question. I have already answered it twice, but I shall be glad to answer it for the third time. The answer is "Yes."

Mr. WILLIAMS of Delaware. I ask the Senator another question. We are in complete agreement that the Senate has, to a certain extent, demonstrated a certain amount of fiscal irresponsibility in the past few days in that we have appropriated $2 billion more than the Budget Bureau thought should be appropriated for certain agencies.

Does the Senator from Pennsylvania, who criticized that action—and I join him in that criticism—realize that the Senator from Pennsylvania voted for them?

Mr. CLARK. I certainly realize that my friend from Delaware is renowned in this body and this whole Nation for having voted against practically all appropriations that have anything to do with health, welfare, and other aspects of our public economy which I think should be rehabilitated. I do not criticize him for that. That is his perfect right. Frankly, let me say I have a very deep affection for the Senator from Delaware. I think he is an extremely useful Senator. The answer to the Senator's question is, "Yes."

Mr. WILLIAMS of Delaware. I just thought that before the Senator proceeded to criticize members of his party for voting $2 billion in increased appropriations in the last 3 days, he should be reminded that he was one of them.

Mr. CLARK. I hope very much the Senator from Delaware will be emblazoned in the pages of history as one who always votes for efficiency and economy in Government at whatever the cost.

Mr. President, I return to my major argument. It will be said this is a bill which has been reported by the Finance Committee in accordance with the normal procedures of the Senate; why should it not be brought up for consideration tomorrow? That, I think, is a very fair question, as to which I think I have a very heavy burden of proof to sustain the position that it should not be brought up tomorrow.

My reasons are these: This is an exceedingly important bill to the financial status of our Federal Government. I do not believe it should be treated in a cursory way. I do not believe it should be brought up with practically no notice to the Members of the Senate.

I ask my friend the majority leader to pay attention to what I am about to say now, because I want to be very sure indeed that I do not make a misstatement; but I doubt if there are very many Members of the Senate—there may be a few—who, in the heavy pressure of business which we have been dealing with during the last 3 days, have had an opportunity to read the committee report on the bill. Perhaps I am wrong. I have been very busy. I suspect my colleagues have been, too. Perhaps I have been dilatory. Maybe I should have read and studied the report, even though I am not a member of the Finance Committee. But I have not, and I suspect that my situation is not unusual.

In fact, Mr. President, the bill, which was reported on the date of June 16, by the Senator from Virginia [Mr. BYRD], I believe has been printed only within the last 24 or 48 hours. If I am mistaken in that statement, I hope some Senator will correct me. I thumbed through the bill in a hurry a few minutes ago, denying myself the privilege of listening to the fascinating debate going on between the able Senator from Colorado and the able Senator from Rhode Island. I cannot say I have studied it in depth, but I have had a quick look at it.

I have been advised by the staff of the Senate that the hearings on the bill have not yet been printed and will not be available until tomorrow morning. Therefore, it is proposed to call up the bill tomorrow, after the call of the calendar, and without giving Members of the Senate an opportunity even to glance in a cursory way at the hearings, until after the bill has been called up.

Mr. President, I am not enough of a hypocrite to pretend that the Senate has not passed, day after day, and will not pass, day after day, from now on in, bills affecting hundreds of millions of dollars, with hearings, transcripts that are very thick, that not 10 Senators have felt compelled to look at.

I suggest that when interested Senators desire to inform themselves with respect to important proposed legislation, which is expected to be passed on a Saturday morning, we are entitled to the courtesy of an opportunity not only to consult briefly but also to thumb through the hearings, after the bill has been placed before the Senate. Certainly we should have an opportunity, at least over the weekend, to look at the hearings with respect to an important bill which, as my good friend from Delaware says, not only would increase revenues by some billions of dollars and extend the corporate income tax rates and various other taxes, which every Member of this body has known for months and months we were going to do, but also would cut revenues by $742 million.

Mr. JOHNSON of Texas. Mr. President, will the Senator yield?

Mr. CLARK. I am happy to yield to my friend from Texas.

Mr. JOHNSON of Texas. I am informed that no hearings were held on the bill. The Secretary of the Treasury made a statement in executive session. The members of the Committee on Finance can confirm that. The staff has given me that information in a memorandum.

I yield to my friend from New Mexico, for confirmation of the statement.

Mr. CLARK. I shall be happy to yield to the Senator from New Mexico, I say to the Senator from Texas, but I have the floor.

Mr. JOHNSON of Texas. Yes.

Mr. CLARK. Mr. President, I am happy to yield to my friend from New Mexico.

Mr. ANDERSON. I think what the Senator from Texas has stated is exactly correct. We had an executive session of the committee. The Secretary of the Treasury appeared before the committee and laid down the basis for his recommendations. The committee considered a great many things, which had been considered many times before. There were no formal hearings.

Mr. JOHNSON of Texas. Mr. President, if the Senator will permit me to finish, the statement will be available when the bill is under consideration.

Mr. CLARK. Mr. President, it appears that I have been badly misinformed by the members of the staff of the Senate, and I suppose my really very bad information came from one of our charming and delightful young page boys, whom I would not think of identifying even by pointing at him. The page told me the hearings were not available now, were being printed, and would be available tomorrow.

I called that to the attention of the assistant to my good friend from Texas, and he said to me, "The hearings will be available tomorrow morning."

It appears now there were no hearings.

I do not make any point in that regard. I have been a member from time to time in the Senate for the last 4 years of a committee from which we have reported bills without hearings.

I observe my friend from Oklahoma is in the Chamber. He and I have actually conspired, on occasion, to report bills without hearings. Therefore, if there were no hearings, perhaps we should proceed in complete ignorance of the reasons why the $742 million cut should be made in the annual revenues of the United States of America.

Perhaps we shall be satisfied when we read the statement of that very distinguished American from Texas, Hon. Robert Anderson, the Secretary of the Treasury, who is a very able man indeed, but with whose economic, fiscal, and monetary views I find myself frequently in disagreement. Probably I am wrong and he is right.

Perhaps tomorrow morning when I read what Secretary Anderson had to say, after the bill is before the Senate, all my doubts will be resolved, and I shall joint with unanimity my friends on both sides of the aisle in supporting the Secretary of the Treasury, as, I gather, he supported the bill. I am sure my friend the Senator from New Mexico and the other members of the Committee on Finance certainly would not report a bill from the Committee on Finance which the Secretary of the Treasury opposed, so I assume that everybody, in a fine sense of bipartisan unity, is prepared, without any hearings, and without anything but the statement of that great Texan, Mr. Anderson, to cut $742 million from the revenues of the United States of America.

Mr. ANDERSON. Mr. President, will the Senator yield?

Mr. CLARK. I yield to my friend from New Mexico.

Mr. ANDERSON. Only for the sake of protecting one of the most able public servants we have, the Secretary of the Treasury, I say that I am sure the Secretary did not agree with many of the actions taken by the Committee on Finance. However, as to the debt limit extension the Secretary of the Treasury agreed. We followed the recommendations of the Secretary made on the debt limits extension.

I would not wish to have the Senator from Pennsylvania, who is always extremely accurate in his remarks, tie the Secretary of the Treasury to all of the actions taken by the Committee on Finance. The Secretary did not approve of the repeal of some of the taxes, as suggested by the committee. The Secretary has not approved as of this time. The Finance Committee took its own action which I thought was very wise action.

I am sure the Senator would not wish to associate the Secretary of the Treasury with all the things contained in the bill, because the Secretary of the Treasury would be the first to disavow some of the actions taken by the committee.

Mr. CLARK. I am delighted, for the second time tonight, to be in error. I am delighted, because it seems to me incredible that the Secretary of the Treasury would recommend the repeal of the taxes.

While I realize this is somewhat out of order, in accordance with the Senate rules, I know my good friend the Senator from New Mexico and my good friend the Senator from Texas, and I think also my good friend the Senator from Illinois——

Mr. DIRKSEN. How do I come into this picture? [Laughter.]

Mr. CLARK. I will tell the Senator how he comes into it. I am about to take an action which is not strictly in accord with the Senate rules, and I think the Senator is a good enough friend of mine not to call me down for it. I intend to ask my friend the Senator from New Mexico to answer a question.

I ask the Senator, how much of the $742 million repeal of taxes did the Secretary of the Treasury advocate?

Mr. ANDERSON. I would not invoke the Senate rule against the Senator from Pennsylvania, though the rule states he should not ask me a question.

I do not have an adding machine with me. I do not know how much the Secretary opposed. I think it is perfectly correct to state that the Secretary opposed the removal of the excise taxes.

Mr. WILLIAMS of Delaware. Mr. President, will the Senator yield to me? I think I can answer the question.

Mr. ANDERSON. The Secretary came before the committee to ask for an extension of the debt limit. I believe that is an accurate statement.

Mr. CLARK. My friend the Senator from Delaware is always completely accurate, and he says he can answer the question, I am glad to yield to the Senator from Delaware.

Mr. WILLIAMS of Delaware. Mr. President, the Secretary of the Treasury is opposed to all of the cuts in this bill. The Secretary supports the position which I hope the Senator from Pennsylvania and I will be successful in maintaining tomorrow, the restoration of the amounts cut out by the Senate Finance Committee.

The majority of the committee took the opposite position, and the committee adopted certain amendments which reduced the recommended $3.9 billion extension of taxes by $752 million.

Mr. CLARK. I thank my friend.

Mr. WILLIAMS of Delaware. That was done by the action of the majority of the committee. I respect the position of the members of the committee who so voted, although I was in the minority and I am still supporting the position of the Secretary of the Treasury.

If the Senator from Pennsylvania will allow us to consider this bill, which must be passed and signed into law by June 30, in order to stop an additional loss of some $3 billion, I shall be fighting with the Senator tomorrow in the endeavor to regain this prospective loss of revenue.

Mr. CLARK. I thank my friend for his comments.

Mr. KERR and Mr. CURTIS addressed the Chair.

Mr. CLARK. I shall yield in a minute to the Senator from Oklahoma, and then to the Senator from Nebraska.

Mr. President, I should like to make a brief comment as to what the Senator from Delaware stated. I thank my friend from Delaware for his very helpful comment.

It is said that politics makes strange bedfellows. I suspect that those of us who think that every now and then, although not often, we rise above mere politics sometimes find ourselves in bed with colleagues with whom we are not always accustomed to sleep comfortably.

I can think of no odder alliance than that of the distinguished Senator from Delaware [Mr. WILLIAMS], the distinguished chairman of the Committee on Finance the Senator from Virginia [Mr. BYRD], the distinguished Senator from Ohio [Mr. LAUSCHE]——

Mr. LAUSCHE. Why pull me into this? [Laughter.]

Mr. CLARK. And myself. I hope that what we lack in numbers we will make up in argument and in conviction, and that perhaps we Four Horsemen of the Apocalypse, riding together at least momentarily, will prevail against what I believe to be an unwise bill.

Mr. KERR. Mr. President, will the Senator yield to me so that I may make a 2- or 3-minute statement?

Mr. CLARK. Mr. President, I ask unanimous consent that I may yield to the Senator from Oklahoma for a 3-minute statement, without losing my right to the floor.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Pennsylvania? The Chair hears none, and it is so ordered.

Mr. CLARK. I yield to the Senator from Oklahoma.

Mr. KERR. I thank my friend from Pennsylvania.

This bill does not provide a $750 million tax cut under present law. The bill, as it came to us from the House of Representatives, sought to extend a number of corporate tax rates and excise taxes which under the law are due either to expire on the 30th day of this month or to continue at a rate less than the rate in effect now.

What the Senate Finance Committee did was to bring to the Senate a bill providing for the extension of the corporate tax rate and a number of excise taxes, but amending the House bill to eliminate from it provisions which would extend certain other excise taxes, which, under the existing law, are scheduled to expire on June 30 of this year.

Last year the Senate adopted an amendment which brought about the repeal of the excise taxes on general telephone use, leased communication lines, Western Union or telegraph messages, and toll service. The Senate also provided for the expiration of the excise tax on the transportation of persons.

When the bill went to conference with the House last year, the conferees of the House accepted that part of the provision which would have terminated the excise tax on general telephone use, but kept the law in effect which provided excise taxes on telegrams and telephone tolls, and it was agreed at the conference, and approved by the Congress and the President, that instead of a complete repeal of the excise tax on the transportation of persons, effective June 30, 1960, the rate would be reduced from 10 percent to 5 percent.

When the House sent the bill to the Senate, rather than permitting the excise tax on general telephone usage to remain as it is now in the law, which terminates as of June 30, a provision was put in the bill that would have extended it beyond the expiration date now provided, as of June 30 of this year. The rate on the transportation of persons was raised from 5 percent back to 10 percent for the period during which the tax is to be extended.

So I believe, in order that Members of the Senate may have the correct picture, it is well to make clear that the Senate Finance Committee did not provide for $742 million of reduction of taxation. From the existing law we removed the remaining 5-percent excise tax on the transportation of persons, which I think involves about $120 million or $125 million.

The PRESIDING OFFICER. The Senator's 3 minutes have expired.

Mr. KERR. I ask unanimous consent that I may be permitted to speak for 1 more minute.

Mr. CLARK. I am happy to yield to my friend from Oklahoma for as long as he wishes to speak, so long as I do not lose my right to the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KERR. The provision that we made has the effect of reducing taxes, but elimination of the remaining 5-percent excise on the transportation of persons amounts to only about $145 million. Other members of the committee are present, and can verify that. As I recall, that is the only reduction under existing law that we provided in the bill that we brought to the Senate. We failed to agree with the House bill.

Mr. FREAR. There are three. Telegrams were not included. We inserted that item in the committee.

Mr. CLARK. Mr. President, will the Senator from Oklahoma permit a brief interruption?

Mr. KERR. We did eliminate the tax on telegrams and the 5-percent tax on transportation of passengers. Those were all the reductions we made. One of them amounted to $145 million.

Mr. FREAR. There were three of them; general telephone, telegrams——

Mr. KERR. We eliminated the tax on general telephones, which resulted in about $5 million of revenue. So actually the reductions that were provided in the bill were about $175 million to $180 million. I felt that the Senator would desire a correct statement in the RECORD, as to what the Finance Committee did.

Mr. CURTIS. Mr. President, will the Senator yield?

Mr. CLARK. In just a minute I will be happy to yield to my friend from Nebraska.

I should like to make an observation with respect to the statement just made by my friend from Oklahoma. In the first place, my friend from Oklahoma is a distinguished member of the Finance Committee, and obviously he knows far more about this subject than I do. I have been told by the chairman of the committee, the Senator from Virginia [Mr. BYRD], that the annual loss of revenue as a result of the passage of the bill, excluding the corporate and excise taxes which are extended, and which I think everybody knew would have to be extended, was $742 million. Of course, it is possible that the Senator from Virginia misinformed me. I suppose it is conceivable that I misunderstood him. But he sat right there no more than 45 minutes ago and I said to him, "HARRY, how much does the bill propose to cut from the revenue?"

He said, "JOE, $742 million a year."

Now, maybe someone is wrong. I could be wrong for the third time tonight.

Mr. KERR. The Senator from Virginia did not misinform the Senator from Pennsylvania. The Senator from Virginia was talking about the difference that would result between what the bill would provide as reported by the Finance Committee and what it would provide as it was referred to the Finance Committee from the House.

Mr. CLARK. This, of course, is what I am talking about.

Mr. KERR. But in view of the fact that the present law provides for termination of certain of the taxes, and the Finance Committee action only conforms to existing law, I am sure the Senator would wish to make it clear when he talks about the loss of revenue that he is talking about the difference in what the two bills would return, and not the difference between what existing law would produce and what the provisions of the bill as brought to the committee would produce.

Mr. CLARK. I completely agree with my friend from Oklahoma. Let me make abundantly clear that I am sure everything he says is absolutely true and accurate, but I think I am still justified in saying—and my friend will correct me if I am not—that the bill that went to the Senate Finance Committee would produce $742 million more revenue for the next fiscal year than the bill as reported by the Finance Committee. Am I not correct?

Mr. KERR. I do not think that is correct, but then I would be glad to have the Senator from Pennsylvania detail where the amount of difference exists. The bill that came to the Finance Committee, if enacted into law, would have produced substantially more than either the present law or the bill as reported by the Finance Committee to the Senate.

Mr. CLARK. What the Senator from Oklahoma has said may well be true, and I do not wish to quarrel over details. My point is—and I still stick to it—that the Chairman of the Finance Committee advised me that if the bill passed the Senate, we would have $742 million a year less revenue than we would have if the elimination of these taxes provided for by the Finance Committee were not enacted into law.

I yield to my friend from Nebraska.

Mr. CURTIS. I thank the distinguished Senator. It might be helpful to point out that these corporate and excise tax rates that expire or would expire in part on June 30 are fully discussed in the President's budget. The budget is predicated on the extension of these rates.

The House of Representatives passed a bill carrying out the President's request. It was referred to the Senate Finance Committee. The bill was reported from the committee that carries out part of that request. The Senator from Nebraska supported the position of the Treasury and of the Budget Bureau in their support of the House bill.

There is no particular mystery or lack of information on what the position of the Secretary of the Treasury was. It was the position that had been a matter of record for a long time in the President's budget. The bill, if enacted, will produce approximately $2 billion more in revenue than if it is not enacted. So, while it is true that it falls short of the House bill—and I supported the House bill—failure to enact the bill will therefore damage our position by some $2 billion.

Mr. CLARK. Mr. President, I should like to make a very brief observation, and then I shall yield to my distinguished friend from Tennessee [Mr. GORE], an able member of the Committee on Finance. We ought to make it abundantly clear what we are talking about. There is not a Senator who would think for a minute of not continuing, on at least a 1-year basis, the corporate normal taxes and certain excise tax rates. It certainly would be completely fiscally irresponsible not to do that.

This is a subject which is not in issue. This is not a partisan matter or even a nonpartisan matter. No Senator would be so irresponsible as to suggest letting the corporate normal tax rate expire, and thus cut billions of dollars of revenue out of our budget.

I am amazed that a majority of the Committee on Finance should be willing to eliminate certain excise taxes while continuing others. I suggest again that the result of this action, which I deplore, would be to eliminate $742 million of revenue which otherwise would be collected by the Treasury. This would be done within 24 hours of the time when we have added a billion dollars to defense, $750 million to the pay bill, $400

million for health and welfare appropriations, and while we still have pending in conference the Federal aid to education bill, which could well increase the appropriations by another $200 million or $300 million.

I suggest that this is not only—I do not like to use the term, but I do not see how I can fail to use it—fiscally irresponsible, but it is fiscal irresponsibility of the majority in the Senate.

I yield to the Senator from Tennessee.

Mr. GORE. Mr. President, it seems to me that increases in appropriation bills, coupled with amendments to the bill which has been brought up by motion, to which the Senator from Pennsylvania has referred, would make it imperative that the Senate seek additional sources of revenue during the course of the consideration of the bill, either tomorrow or Monday, or whenever we reach the point of amendment. I take it that will be tomorrow or Monday. I shall offer some amendments, and other members of the Committee on Finance will offer other amendments, to provide revenue equal to that which is not provided or which has been eliminated from the House bill.

In my view the raising of revenue from the sources which will be proposed, which are in the nature of closing loopholes, would be more equitable and more in the national interest than the excise taxes which have been reduced or not extended by the pending bill.

Mr. CLARK. Mr. President, I thank my friend for his comment, which was anticipating the point I had intended to make a little later. Last year my friend from Tennessee, my friend from Wisconsin, my friend from Illinois, whom I see on the floor, my friend from Minnesota, who is no longer here, and I made a strong but unsuccessful effort, aided by our good friend from Oklahoma [Mr. MONRONEY], whom I see on the floor, to close some of these utterly unjustifiable and completely inequitable tax loopholes.

It must be clear that if we are even going to consider the repeal of these excise taxes there ought to be extensive debate, without a limitation on time, during which Members of the Senate could consider in all sobriety and seriousness, I should think, about 10 amendments which would deal with the closing of these loopholes.

Mr. GORE. Mr. President, will the Senator yield?

Mr. CLARK. I am happy to yield.

Mr. GORE. I will offer three amendments tomorrow, each of which has been recommended to Congress by the Treasury Department. It may appear a bit strange to the senior Senator from Pennsylvania that the junior Senator from Tennessee would be offering amendments supported by the Secretary of the Treasury.

Mr. CLARK. This does not seem to me strange at all. The Senator from Tennessee and the Secretary of the Treasury are both intelligent and reasonable men who have the interest of the country at heart. Sometimes they do not see eye to eye on certain matters, but when it comes to fiscal responsibility, I am sure they are in accord.

Mr. GORE. I will now take my seat. [Laughter.]

Mr. CLARK. I am happy to yield to my friend from Illinois.

Mr. DOUGLAS. Mr. President, regardless of when we take up the bill in question, I believe the point the Senator from Pennsylvania has just touched on is of vital importance. There will be an appreciable loss of revenue, although the budget estimate which I have before me counts only on a total of $268 million for fiscal 1961 from these two sources. It will be necessary, if these cuts are to go through, to find additional sources of revenue. In my judgment, we should find additional sources of revenue to help meet the increased appropriations above the budget which we have been making in the last 2 or 3 days. I believe we know fairly well what some of these reforms should be:

The repeal of the 4 percent dividend credit, which would bring in about $400 million. A withholding tax on dividends, which would bring in approximately $200 million. I believe it is possible to get an administratively workable withholding of interest, at least in a partial form.

Mr. CLARK. Certainly on Government bonds.

Mr. DOUGLAS. Yes. That would bring in $300 million to $400 million. There should be a more rigid examination of certain business expenses, and the Senator from Pennsylvania and I have been working on a joint amendment to this effect, so that luxurious entertainment, elaborate gifts, and other features would not be tax deductible. Several hundred million dollars should come from this source.

Then there is our old friend the 27½-percent depletion allowance. Even a modest reduction in that along the lines which some of us have advocated in the past would bring in $350 million more.

So that from these sources we would probably get close to a billion and a half dollars in additional revenue.

There are certain possibilities which we had developed in connection with the investigation of this question by the Committee on Finance, to which the Senator from Tennessee [Mr. GORE] referred implicitly, although he did not outline them. For example, we are likely to be faced with the fact that the depletion allowance can be claimed not merely on minerals, oil, and gas extracted from the earth, but on the processing of those natural products as they move through the stream of production.

In order to head off this loss in revenue, I think we should remove the possibility of having the depletion allowance applied to the later fabrication and processing of these materials.

Then, we have found that there are grave abuses in connection with stock options and a number of other corporate devices which are being used to avoid—and, indeed, evade—taxes. I think we are directly up against the gun in this whole matter.

I have been greatly disappointed in the attitude of the Treasury. The Treasury has really refused to deal in any constructive fashion whatsoever in plugging those loopholes. It has refused to help us in putting the tax system on a more just basis. At the same time, it insists that the indirect taxes, which I regard as inequitable, shall be maintained without diminution.

We must face a very serious problem. Can we blast the administration into action and compel it to support these tax reforms, which I think everyone agrees are desirable, by cutting the indirect taxes, and thus forcing the administration to turn to better fields for revenue? These are some of the problems we have to face.

I think the Senator from Pennsylvania has performed a public service in raising the issue. I apologize to him for speaking at length upon this subject; but he is correct in saying that we face a very grave situation.

I think it is perfectly clear that we need to reform our tax structure, and do it speedily. In the past we have not been too successful in getting such changes through. I suppose that if we are unsuccessful tomorrow, we shall be faced with the issue as to what we should do on the passage of the bill. But that is a problem we can sleep over.

I think the Senator from Pennsylvania has raised a very important issue. In the heat and haste of the last 2 or 3 days, we have made a number of decisions. Now I think we must deal with the question of how we are going to meet them financially.

I hope the Senator from Pennsylvania will excuse me for taking this time.

Mr. CLARK. I thank the Senator from Illinois for his very helpful contribution to the debate. Far from taking too long, I would urge him to continue even further.

Having been advised finally some time during the course of the afternoon that the leadership intended to persist in bringing up this bill tomorrow, in spite of the protests of several Senators on this side of the aisle, I had pulled together and sent to the desk for printing three loophole amendments of my own. Two of them deal with relatively technical matters involving the capital gains tax. One of them has to do with a more rigorous statutory definition of "business expense deductions." In that amendment I am joined by the Senator from Illinois.

I know that everything I have said so far can well be admitted to be true. Yet the question inevitably rises, "Why do you not make your fight tomorrow? Why put it off? We must adjourn. We are in a hurry."

Mr. President, we have dawdled along, month after month, with no bills on the calendar. We spent 2 months passing a meaningless civil rights bill. Durthat time committees were not permitted to meet because of the obsolete rules of the Senate, which the leadership has been unwilling to change. We find ourselves in a hectic condition of disarray, trying desperately to pass enough legislation so that we will not be held up to the scorn of the country. I hope we can pass it. I feel certain that we can pass much of it, in spite of the fact that contumacious, stubborn, and possibly ill-advised Senators, such as the senior Senator from Pennsylvania, can delay some

of these matters when they think important questions of principle are involved.

We have our rules. I disapprove of them. But while we have them, I mean to abide by them and take such advantage of them as seems to me to be in the public interest. In this, I may be wrongheaded; I may be stubborn; I may be wrong. I have no doubt that many Senators will tell me so if they think so.

I suspect the distinguished Senator from New Mexico, who is now on his feet, may wish to make such a comment. In any event, I am willing to yield to him.

Mr. ANDERSON. No. I wish to speak in my own time, when the Senator has finished.

Mr. CLARK. We have in the law—and I used to be a lawyer before I became a politician—a procedure which is known as confession and avoidance. A complaint is filed, alleging the need for a remedy. The facts of the complaint are not denied. But an answer is filed on behalf of the defendant.

He says, "Everything you say is true, but you are still not entitled to the relief you seek for the reasons we now state."

That procedure goes back to the early common law of England. It is good, sound procedure.

So perhaps now, having pointed out, with the help of my distinguished colleagues, why I think the bill should be defeated or, if not defeated, should be stringently amended, not in 1 but perhaps in 10 particulars, and why I believe it will take quite a long while to have these amendments properly understood and properly debated, while I think I am within my rights in saying I could not consent to a unanimous-consent agreement to consider these questions, the question will still be asked, "Very well, Senator. Why not start to work? Let us take up the bill tomorrow. You have your rights. Your rights will be protected. Let us go ahead. Take all the time you want."

I do not think it would be suggested that it would be entirely appropriate or in the national interest to take as long on this bill as we took on the civil rights bill. But suppose we did. We would be within our rights under the obsolete Senate rules under which we operate. But it may be said: "Within the realm of reason, take 1 day, 2 days, 3 days, 4 days, if you want to, if you think the matter is that important. Let us have a full debate. Let us pass on these amendments. But, for goodness sake, let us get this matter through and out of the way."

What can I say in reply to so sensible a suggestion? I can say this:

Even though a bill to extend these necessary corporate taxes and excise taxes probably should be passed before June 30, in order to prevent a certain amount of administrative confusion, it does not have to be passed by June 30. If we accepted the bill as passed by the House—as I believe we should, if we could not add any amendments to it—and if we took the bill without adding any amendments to it—which is what the President requested—it would not have to go to conference, and thus we would not need to pass the bill before June 30.

On the other hand, if we were to add amendments to the bill, no doubt it would be desirable, although not necessary for the bill to be sent by us to the other body before June 30.

But we debated this matter last year, and also the year before. I believe it was agreed that an extension of these taxes could readily be made retroactive for 1, 2, 3, 4, 5, or 6 weeks, and not a nickel of revenue would be lost.

So, although this bludgeon is held over our heads, by means of the statement that we must take action by June 30, I suggest the predicted crisis is an illusory one.

It is now June 18, and we still have a good 10 days in which to act. There are many appropriation bills which the leadership quite rightly has been urging the Appropriations Committee to bring out. Today, the Senate passed a good appropriation bill, under the able leadership of the distinguished senior Senator from Alabama [Mr. HILL]. As that bill was passed by the Senate, it called for appropriations of $400 million in excess of the budget. But I thought that was right, and I voted for it.

It may well be that most of the remaining appropriation bills will not increase the budget. It is even conceivable that by means of those bills we would be able to cut the budget a little.

But who knows what the conference committee on the education bill will do? Who knows whether perhaps—although it is a pretty long shot—we might pass a bill which would provide aid for higher education, which needs such aid at least equally as much as do primary and secondary education, if not more than they do. Who knows whether the Congress might pass a bill which again would increase appropriations without providing for adequate increases of the revenues?

Mr. President, would it not be the part of wisdom for us to defer our action on this bill at least until we could study the observations of the Secretary of the Treasury in opposition to the action taken by the Senate committee, and until we could have an opportunity to review at leasure the hearings on similar attempts to repeal these taxes, which have been made in earlier years, and until those of us who have been rather busy with the housing bill, the Department of Defense bill, the Health and Welfare bill, and the postal pay bill, and who have had heavy committee responsibilities in connection with them, have had a chance to review our own files in regard to these technical and complicated matters of closing tax loopholes—matters which are very difficult for any Senator to understand, let alone able to explain in proper language to the Senate.

So I suggest that it would be the part of wisdom for us to postpone our consideration of this bill for at least a week, if not 10 days.

Let us first dispose of the appropriation bills, and then see what measures we have passed which call for a break in the budget ceiling and require additional revenue, or else would come rather close to resulting in an unbalanced budget.

I know the President has said he will have a surplus of $4,200 million.

Mr. DOUGLAS. Mr. President, will the Senator from Pennsylvania yield?

The PRESIDING OFFICER (Mr. CANNON in the chair). Does the Senator from Pennsylvania yield to the Senator from Illinois?

Mr. CLARK. I am very happy to yield.

Mr. DOUGLAS. I think it is important——

Mr. CASE of South Dakota. Mr. President, I demand the regular order.

Mr. CLARK. Mr. President I yield to the Senator from Illinois for a question.

Mr. DOUGLAS. Is it not true that the administration and the Treasury have given us no help whatever in trying to close these tax loopholes?

Mr. CLARK. The Senator from Illinois is correct. Not only have they not given us any help, but they have opposed, insofar as it was possible for them to do so, the effort to close these tax loopholes.

They told us they were studying these matters. They told us that 4 years ago; they told us that 3 years ago; they told us that 2 years ago; they told us that last year; and they tell us that today. They say that if we will only wait a little while, they will come forward with their own program for withholding dividends and interest at the source. But, somehow or other, time goes by, and we never have any recommendations from the Treasury.

Mr. DOUGLAS. Mr. President, will the Senator from Pennsylvania yield?

Mr. CLARK. I am happy to yield to my friend, the Senator from Illinois, but only in accordance with the regular order, as demanded by the Senator from South Dakota, and, hence, only for a question.

Mr. DOUGLAS. I should like to ask this question of the Senator from Pennsylvania: Is there not a case, therefore, for an effort on the part of Congress to get rid of bad taxes, in order to force the administration to impose good taxes?

Mr. CLARK. That is the view of my friend, the Senator from Illinois, for whom I have the highest respect. Frankly, I do not happen to share his view on that matter. But I recognize the sincerity of his view, and I also recognize the strength and the logic of his position, because it is abundantly clear that the taxes which are proposed to be repealed are, indeed, regressive taxes, because they are sales taxes. They are essentially bad taxes because they are not based to any appreciable extent on the ability to pay.

They are not luxury taxes; certainly a tax on the use of telephones cannot correctly be considered a luxury tax.

Certainly there is reason to support the move to repeal the so-called transportation tax, for it applies to the transportation of persons who move from place to place in search of employment or in order to carry on their businesses.

Mr. ANDERSON. Mr. President——

Mr. CLARK. Mr. President, I ask unanimous consent that at this time I may yield to the Senator from New Mexico [Mr. ANDERSON] for such time as he may desire, without losing my right to the floor.

The PRESIDING OFFICER. Is there objection? The Chair hears none. Without objection, it is so ordered.

Mr. ANDERSON. I thank the Senator from Pennsylvania.

Mr. President, at this time I wish to say that I strongly support the motion of the able Senator from Texas [Mr. JOHNSON] that the Senate proceed to the consideration of House bill 12381, because we are now considering this bill; we are doing the very thing the Senator from Texas has proposed. And why not talk about it?

But, most of all, I wish to say that many of us were anxious to proceed with the consideration of this bill, in contradiction of what the able Senator from Pennsylvania has suggested, because at least some of us have felt that we had been put under a shotgun without having the needed data. I have always protested that in the past such measures have almost always been brought up in the last 48 hours; and we did not want such a procedure to be followed this year. I have in my files letters in which it is said, "Do not wait so late in the session. Let us proceed with the bill early in the session."

A moment ago the Senator from Illinois said something which I not only applaud here, but, as he knows, I supported by voting for it, inside the committee. The Senator, for whom I have great respect, talked about fiscal irresponsibility; and he touched me on a sensitive nerve, because he said that to vote for all these things was fiscal irresponsibility, and that our party was responsible for it.

I voted for some housing projects in his State that do not help my State in the slightest; but I do not regard that as fiscal irresponsibility. I think we should do the things which our country needs, and I believe we should try to find the required tax revenues.

The point the able Senator from Illinois made inside the committee—and I hope he will pardon me if I make a mistake in referring to his action there, for certainly I do not mean to be in error—was that he felt that this administration had not tried to plug enough tax loopholes, and that perhaps if we repealed some of the bad taxes, the administration would finds ways of bringing in good tax measures. I believe that the Senator from Illinois, who is the last person I would ever charge with fiscal irresponsibility, made a very good point.

Mr. President, the situation now existing in the country shows a little bit about fiscal responsibility and fiscal irresponsibility.

Not many days ago there was an advance refunding. Not much was said. The refunding was offered on Monday. The results were not available until late Tuesday afternoon. But I noticed that after the refunding had been finished, there was published, next morning, in the newspapers a table showing the sales of Government bonds. I ask unanimous consent to have that table printed at this point in the RECORD. It shows the figures on Government bonds and their yields; and the figures are extremely interesting from the standpoint of fiscal irresponsibility or fiscal responsibility.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Government bonds

NEW YORK.—Closing over the counter U.S. Government Treasury bonds, bid, asked, net change, and yield for Wednesday.

	Bid	Asked	Net change	Yield
2½s 60	99.23	99.25	.....	2.66

Prices quoted in dollars and thirty-seconds.
T—Partially tax exempt.

Mr. ANDERSON. Mr. President, these tables show that there was not a single bond issued that was up to the limit of 4¼ percent. Yet I have read in a good many magazines and newspapers how very irresponsible the Democratic Party is for not lifting the 4¼-percent ceiling, which has been in existence since 1918, and has seen us through depression and hard times. Our party has tried to show we believe a better case should be made for the lifting of that ceiling.

I give full credit to the able Secretary of the Treasury. He has fought his battle, and fought it well, but he lost it because he insisted on lifting the ceiling from E-bonds.

I think it is proper for me to say it was upon motion of the Senator from Illinois at one time, and the Senator from New Mexico at another time, that the ceiling was left on E-bonds at 4¼ percent. Certainly nothing has happened since that time which indicates that a higher ceiling was required for those bonds. We thought we were acting with fiscal responsibility, and not with fiscal irresponsibility.

Mr. President, many other things happened. The Secretary of the Treasury asked the Finance Committee for the right for advance refunding. Advance refunding is a very dangerous thing to put in the hands of any public official. It was kicked out in the Senate. Subsequently, the able Secretary of the Treasury came to members of the Finance Committee and pleaded that he should be given the right to engage in advance refunding. He spent much time in my office and tried to show I was wrong in the motion. He explained how he wanted to do it. He offered to go to the chairman of the Finance Committee and outline to the distinguished Senator from Virginia [Mr. BYRD] what he intended to do each time.

Only a short time ago, the results of such refunding were manifested.

I ask unanimous consent to include in the RECORD a news story pointing out the Treasury's first real venture in advance refunding, which drew a response of $4,874 million of bonds to be refunded.

I ask unanimous consent that the news story appear in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. SMATHERS. Mr. President, will the Senator from Pennsylvania yield to me so that I may make a statement to the Senator from New Mexico, without the Senator from Pennsylvania losing his right to the floor?

Mr. CLARK. Mr. President, I ask unanimous consent for that permission.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SMATHERS. I am in complete agreement with the statement of the able Senator from New Mexico. The time to discuss this particular excise tax bill is now, when we have 12 days in which we can debate it, if need be, and so that it may be debated in the House, if need be, and so that we may have time to consider Presidential action. If we delay bringing the bill up, we put ourselves in a worse position than if we take it up, offer amendments, and see where the mistakes are, if Senators think there are mistakes, and give Senators an opportunity to sustain their opposition with the majority of the Senate. That is the way to do it.

I agree with the Senator from New Mexico completely. The time to discuss it is now, and to discuss it logically, as he has stated.

I thank the Senator from Pennsylvania for yielding to me.

Mr. ANDERSON. I thank the Senator from Florida.

If Senators will examine the rates on Government bonds now, they will recognize they are extremely advantageous. Only a short time ago many of us were out making political speeches, and I was engaged in a primary campaign in my State. I talked a great deal about the tight-money policy. I tried to show that the cost of servicing the national debt had been about $6 billion, and now it was up to $9 billion. I said that $3 billion was a great burden to the people of this country; that if we had that $3 billion we might not need some of the excise taxes we now have.

The place to discuss that question, however, is in a political campaign. It has no real part in this discussion, and we can leave it out of the bond question. But there are other matters we must discuss, and discuss steadily; and if we move to taking up this bill we will concern ourselves, first of all, with the item on page 3 which relates to the termination of the tax on general telephone service. That runs into $450 million a

year. If there is objection to that cut being made—and many Senators do object—that is the time to take it up. Discussion can be had, and a motion can be made to put in the language of the House bill.

If Senators take time to study the hearings to find out what the Treasury wanted, they will not find it this year, because it is a carryover from action taken years ago. There will not be found one word in the hearings of the Senate, except the mere words the Treasury Department will use when we turn to them and ask, "How much does it cut the cost to the Treasury of the United States?" The Department gave us the estimate.

The next item is the tax on transportation of persons. This the Senate Finance Committee voted not to renew. The place to discuss that question is on the floor of the Senate, and the time to discuss it is now.

If we do so now, and dispose of the question and subsequently action is taken, the Senator from Illinois [Mr. DOUGLAS], the Senator from Tennessee [Mr. GORE], or the Senator from Delaware [Mr. WILLIAMS], can rise and move to establish a new type of tax or tighten up certain tax loopholes. That is a proper function. It will take time, and I think the earlier we start it, the better off we shall be.

Therefore, I hope the motion of the Senator from Texas will be agreed to, so we may get on to discuss the question tomorrow as rapidly as we can.

I thank the Senator for yielding to me.

EXHIBIT 1

[From the New York Times, June 16, 1960]

WASHINGTON, June 15.—The Treasury's first venture into a borrowing technique called advance refunding drew a response of $4,874 million.

Holders of that amount of bonds maturing in November 1961, accepted the Treasury's offer to exchange them now for notes maturing in 4 years and bonds maturing in 8—far more for the notes than the bonds. The Treasury will fill $4,200 million of the subscriptions.

Subscriptions for the notes totaled $4,553 million. The Treasury had said that if these orders exceeded $3,850 million it would allot that amount proportionately among the subscribers. Accordingly, it announced today that subscribers for $25,000 or less would get what they asked for, and subscribers for more get 85 percent of what they requested.

Subscriptions for the new bonds aggregated $321 million. That was far below the ceiling for bond subscriptions, so every subscriber will get a full allotment. The Treasury used the slimness of the bond orders for one more assault on the failure of Congress to repeal the 4¼-percent interest rate ceiling on borrowings of more than 5 years.

The advance exchange was offered to holders of $11,200 million of bonds that were issued in 1954 with an interest rate of 2½ percent. They mature in November 1961. The results of the advance refunding mean that instead of having to cope with an $11,200 million maturity at that time, the Treasury faces a $7 billion job.

The new issues are a 3¾-percent note maturing in May 1964, and a 3⅞-percent bond maturing in May 1968.

Because the outstanding 2½-percent bonds are selling at less than par, their potential yield is more than their coupon rate. The same holds for the two new issues. Thus, although the coupon rate on the new bond is well below the 4¼-percent interest-rate ceiling, the bond's yield will be only a shade below it. The Treasury figures that the ceiling applies to yield as much as to coupon, so it could price the bond no higher than it did.

The results on the new bond, it said, "show again that under market conditions as they have existed, a significant amount of debt extension beyond 5 years has not been possible under the 4¼-percent ceiling."

Otherwise, the Treasury added, it was pleased with the outcome of the operation, "especially with the acceptance of the note."

The breakdown of subscriptions, according to today's preliminary results, was as follows:

For the note: $3,023 million from commercial banks for their own account, $83 million from Government investment accounts, and $1,447 million from all other subscribers.

For the bond: $101 million from commercial banks for their own account, $57 million from Government investment accounts, and $163 million from all others.

The refunding was conducted on Wednesday, Thursday, and Friday of last week and Monday of this week. It had a slow start, apparently because of confusion over the rather involved arithmetic needed to calculate the advantages of the offer.

Mr. CLARK. I was only too glad to yield to the Senator from New Mexico.

Mr. President, I should like to consider the question of confession and avoidance which was brought up a short while ago. It has been said, "Very well, Senator, everything you say is true, but why can you not say it tomorrow?"

There are a good many reasons why we should not say it tomorrow, and I have detailed most, but not all, of those reasons to my good friend the majority leader, and he has rejected them.

I do not wish to bring out on the floor of the Senate serious disagreements between members of our party. I do not think any useful purpose would be served by it. The majority leader knows very well what I am talking about.

So far as I am concerned, he is the majority leader. I have made a request of him. It has been rejected. That is his right. That is his privilege. But, from the point of view of those who want to make as serious and determined a fight to plug these tax loopholes as we can, who want to do everything possible to protect our party from the charge that it is willing to appropriate, but it is unwilling to tax, I and some of my colleagues have felt that we should have ample time to prepare our case. We are not going to have ample time to prepare our case. We are going to be rushed, substantially unprepared, tomorrow, to try, as best we can, based largely on an inadequate preparation, which could have been made adequate over so short a period as the ensuing weekend.

I had hoped that this matter could be considered carefully by all members of the Democratic Party. Perhaps it can be, tomorrow. I am not sure that the proper way to consider it is on the floor of the Senate, with the press gallery filled and everybody hoping to find some evidence of discord—all of this in a presidential election year, when we should be closing ranks and endeavoring to meet not only party unity but, as has been said, to some extent, at least, national unity.

Frankly, I am of the opinion that the bill should be considered next Tuesday. I am not accusing the majority leader of doing anything he should not do. Far from it.

The majority leader decided, I think he will agree, rather suddenly to bring the bill before the Senate tomorrow, in spite of the request by some of us to have it considered on Tuesday.

I am sure this is completely inadvertent, and I know it was not planned, but it so happens that seven Senators who I am confident would vote to plug most if not all of the tax loopholes will be absent from the Senate tomorrow, because they will be elsewhere, most of them on official business. We find ourselves, therefore, rushed in, ill prepared, to a fight we consider important, with some of our troops unavoidably out of town.

So be it. I am prepared to accept the party discipline.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Texas.

The motion was agreed to; and the Senate proceeded to consider the bill (H.R. 12381) to increase for a 1-year period the public debt limit set forth in section 21 of the Second Liberty Bond Act and to extend for 1 year the existing corporate normal tax rate and certain excise tax rates.

LEGISLATIVE PROGRAM

Mr. JOHNSON of Texas. Mr. President, so the RECORD will show some of the problems with which the leadership is confronted, for the benefit of Senators who are interested in knowing something about our problems, we have yet to consider, in the 12 days between now and July 4, the following very important measures.

The general Government matters appropriation bill. We cannot consider that bill before next Tuesday, under the rule.

The independent offices appropriation bill. We cannot consider that bill before next Tuesday, under the rule.

The legislative branch appropriation bill. We cannot consider that appropriation bill because of the request of the chairman that it not be considered until next week.

The civil functions appropriation bill will not be marked up until next Thursday. We hope the bill will be reported the following Monday. Perhaps some of the authorizations provided today will be included in that bill.

The mutual security appropriation bill will require rather lengthy debate, and it will involve a substantial amount of money. The bill has not been reported.

The Japanese Peace Treaty is a subject we shall want to consider at an early date.

The coal research bill will be considered as soon as we can clear it.

The minimum wage bill, I am told, will be reported by the committee perhaps early next week. I am sure the

bill will require several days of debate. At least, I have been informed that it is anticipated by the opponents of the proposed legislation it will require several days of debate.

We must consider the medical plan for the aged.

None of the bills which will require debate, such as the mutual security bill, the minimum wage bill, and the medical plan for the aged bill, is available for the leadership to motion up tonight.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. JOHNSON of Texas. I will yield to the Senator in a moment, when I finish my statement.

All of these bills will have to come before the Senate next week.

I consulted with the members of the policy committee, and I consulted with the members of the Committee on Finance. The Senator from New Mexico, I am sure, remembers that I talked to him perhaps a half dozen times about making a motion that the bill be considered. The Senator from Florida will recall the same thing. I talked to the distinguished deputy minority leader, to the minority leader, to some of the minority members, and to the distinguished chairman of the committee. He had to make the greatest sacrifice of anyone in the Senate, in order for the bill to be considered, but he thought in the interests of fiscal responsibility we ought to consider the bill.

Last year a good deal was made of the fact that the bill was brought before the Senate too late. Now we have brought the bill to the Senate 12 days ahead of time, and it is considered to be too early.

I felt, under the circumstances, I had no choice. After I had stated to the members of the committee and to some of the members of the policy committee that we planned to consider the bill late this evening or tomorrow morning, I received a notice signed by four or five Senators stating they did not want the bill considered, and they wanted to caucus next Tuesday at 12:30 o'clock in the Old Supreme Court room.

I shall be glad to call a caucus tomorrow, Monday, Tuesday, or any other time, although I would prefer that the Senators call their own caucus. If Senators want me to call a caucus, I shall be glad to do so. I have always said I would do so whenever any Senator asked me to do so.

I have never said that I could put off my responsibility to make a motion to consider proposed legislation I considered to be important. I was told that the bill would be filibustered if I made the motion that it be considered. Mr. President, that is not my responsibility. I shall stay here to do my duty in the Senate. I shall abide by majority rule in the Senate. Other Senators may do as they choose. My conscience will be clear. If Senators desire to offer 10 amendments or 20 amendments or 30 amendments, that is their privilege. That is their right. I am willing to be guided by majority rule of the Senate, and to let those amendments come to a vote in an orderly way. I shall come in early and stay late.

In addition to the bills I have outlined, we plan to consider Calendar No. 1415, S. 2581, to amend the act of June 1, 1948 (62 Stat. 281), to empower the Administrator of General Services to appoint nonuniformed special policemen.

Calendar No. 1553, H.R. 2565, to promote effectual planning, development, maintenance, and coordination of wildlife, fish, and game conservation and rehabilitation on military reservations.

Calendar No. 1580, H.R. 8229, to amend the Internal Revenue Code of 1954 to provide an exemption from income tax for supplemental unemployment benefit trusts.

Calendar No. 1588, S. 2692, to advance the marine sciences, to establish a comprehensive 10-year program of oceanographic research and surveys; to promote commerce and navigation, to secure the national defense; to expand ocean resources; to authorize the construction of research and survey ships and facilities; to assure systematic studies of effects of radioactive materials in marine environments; to enhance the general welfare; and for other purposes.

Calendar No. 1613, H.R. 11985, to make American nationals eligible for scholarships and fellowships authorized by the National Science Foundation Act of 1950.

Calendar No. 1612, H.R. 10455, to amend the Mineral Leasing Act of February 25, 1920.

In addition, we shall have a call of the calendar early in the morning. We expect to be in session late tomorrow evening. We hope we can finish consideration of the tax bill, in the event it is not filibustered.

I now yield to the Senator from Pennsylvania.

Mr. CLARK. I ask my friend from Texas, who has made a fair statement of this disagreement from his point of view, why we could not pass the coal research bill tomorrow, and a number of the other bills the Senator has mentioned, which would give us an opportunity to prepare our case adequately on the tax bill, and also to have those Senators who will be absent tomorrow, who left town without knowing the bill would be considered tomorrow, return to the Senate.

Mr. JOHNSON of Texas. First, the coal research bill has not been cleared by the policy committee.

Mr. CLARK. Has this bill been cleared?

Mr. JOHNSON of Texas. Yes, this bill has been cleared.

Mr. CLARK. When did the Policy Committee meet?

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. JOHNSON of Texas. I yield.

Mr. MANSFIELD. I wish to ask the Senator a couple of questions, and in the course of the questioning I shall try to answer what the Senator from Pennsylvania has stated.

Did not the majority leader earlier this week state there was a possibility that this bill and other tax bills would be considered at any time?

Mr. JOHNSON of Texas. Yes.

Mr. MANSFIELD. Did not the majority leader serve notice on all Members of the Senate that from now on there would be no deferments because of individual engagements?

Mr. JOHNSON of Texas. I have done that for several days.

Mr. MANSFIELD. Did not the majority leader today see practically every member of the Policy Committee and get approval for the bringing up of the tax bill?

Mr. JOHNSON of Texas. That is correct.

Mr. MANSFIELD. While all of the members of the policy committee did not give full approval, the one who did not, as I recall, said:

> I do not want to become involved, but if you wish to have the bill considered, fine and dandy, it will be all right with me.

Mr. JOHNSON of Texas. He is an ex officio member, who sometimes feels he does not want to become involved in intraparty fights.

Mr. MANSFIELD. Mr. President, will the Senator yield further?

Mr. JOHNSON of Texas. People question the leadership from time to time.

Mr. MANSFIELD. Mr. President, I think there are times when the leader takes undue and unusual punishment. I happen to know him pretty well. I happen to know some of the difficulties under which he labors. I happen to know how difficult it is to get along with 64 prima donnas on the Democratic side—65, including the majority leader. [Laughter.]

I hope that we can all work together, because we have to work also to a degree with the Republicans, to get needed legislation passed, so that we can adjourn in time for the first convention on July 11.

So far as any Senator is concerned, he can offer as many amendments as he wishes to offer, and he can talk as long as he wishes to talk upon any subject or upon any measure. That is his right and his responsibility, and I express the hope that we would recognize the difficulties under which the leader works and try to give him a little more in the way of support, especially in the dying days of this session.

Mr. JOHNSON of Texas. I say to the Senator from Montana that I appreciate very much what he has said. I will add that with very few exceptions I have that support. I do not think any leader has ever had a finer relationship with his colleagues on both sides of the aisle than I have had. I have been in a position of leadership responsibility for 10 years, either as deputy leader, minority leader, or majority leader, and I have found it very easy and very comfortable to be able to work with Members on both sides of the aisle. I have served with 6 or 7 Republican leaders and I have served with more than 100 different Senators.

The problems are always difficult.

Last year we had the bill reported to the Senate too late; this year it was reported too early. Too early—too late.

It reminds me of the story of a train in our hill country which was brought to the foot of the hill and an old man said, "You will never get it started up the hill."

It went up the hill, and as it started down the hill he said, "You will never get it stopped."

There are some people with whom we live in the world and with whom we do not get along too well. Likewise, we live in a world in which we do not get along at times too well with all nations. We see what is happening now.

I could move to adjourn the Senate tonight, tomorrow, and Monday, and not take up the bill until we have a caucus on Tuesday. Perhaps then we would get to the bill on Wednesday. I think that would be irresponsible.

Mr. President, so long as I have the responsibility of the leadership, I do not propose to yield simply to letters which are rushed to me in the late afternoon telling me what I can bring up, when I can bring it up, how I can bring it up, and how many caucuses to have in advance. If the majority of the Members of the Senate do not want to bring the bill before the Senate, let us call the roll. If Senators wish to submit amendments, let them offer their amendments. But we have been kept here until 12:30 tonight, and if any Senator has profited, I am surprised. Perhaps we can come in in the morning at 10 o'clock, have the amendments offered, consider them in an orderly manner, and call the roll on them.

We have spent 3 or 4 hours today in the calling of rolls on amendments which received 11, 17, and 18 votes.

However, Senators wished to be registered on them, and we called the roll. We can do the same thing tomorrow. But we have only 12 days left. We have at least 20 major bills to consider during that period of time, and if we are to complete consideration of them, it will require the cooperation of every Member of the Senate.

I make the prediction that in the event we do not consider the bills, the very Senators who have talked the longest and the loudest and have quarreled the most will be the first ones to complain that Congress did not do something, and the failure of Congress to act. So far as I am concerned, I am ready to act.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. JOHNSON of Texas. I yield.

Mr. CLARK. I am not so thinskinned or obtuse, nor indeed am I so old that I cannot recognize a lecture when it is administered to me in indirect form through our famous Senate custom of interrogatory and rejoinder, through addresses ostensibly directed at "Mr. President," but in reality directed at others.

I am a relatively junior Member of the Senate. Over a reasonably long life I have become accustomed to being lectured both at home and abroad. I accept the lecture in the good humor with which I am sure the majority leader and whip intended. I think it must have been clear from the discussion tonight that all that those of us who wanted to try to defeat the bill, or at least to amend it, wished, was to have the matter brought up in a Democratic conference on Tuesday morning, cleared to the floor on Tuesday afternoon, and carried on from there in accordance with the Senate rules. I would not have brought up these matters if others had not done so. I thought I had, to be sure, not a commitment—certainly not a commitment—but a reasonable assurance that the bill would be brought up on Tuesday.

Mr. JOHNSON of Texas. Mr. President, on that point I have given no one such assurance, and no one has been authorized to give anyone such assurance, and I respectfully submit that in my judgment no one gave that assurance.

Mr. CLARK. Mr. President, I am not going to quarrel with the majority leader.

Mr. JOHNSON of Texas. The Senator has misunderstood.

Mr. CLARK. The majority leader has a perfect right to say whatever he wishes to say. I do not intend to engage him in any further debate.

Mr. JOHNSON of Texas. I thank the Senator.

Mr. CLARK. In fact, I think I have made it abundantly clear by yielding the floor and not asking for a quorum and not asking for a rollcall vote that I am prepared to submit to that discipline which is necessary in any party. I submit to it willingly. I am content with my defeat.

I accept the little lecture in good humor. I hope from here on we can all show that due and mature consideration for each other which is the essence of the best tradition of the Senate.

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. JOHNSON of Texas. I yield.

Mr. MANSFIELD. I do not think the able Senator from Pennsylvania has suffered a defeat. I think he has exercised his right as a Senator in a manner that he had every right to do, and I dare say that what he has said tonight has been quite educational and worthwhile. I certainly do not think he has suffered a defeat. I think he has exercised his right and his prerogative, and I hope he does so as long as he remains in the Senate.

Mr. CLARK. I thank my friend for his courteous comments.

TRANSACTION OF ADDITIONAL ROUTINE BUSINESS

By unanimous consent, the following routine business was transacted:

ADDITIONAL BILL INTRODUCED

Mr. PROXMIRE, by unanimous consent, introduced a bill (S. 3695) to amend the act entitled "An act to amend the Immigration and Nationality Act, and for other purposes," approved September 11, 1957, which was read twice by its title, and referred to the Committee on the Judiciary.

ONE-YEAR INCREASE OF PUBLIC DEBT LIMIT, AND ONE-YEAR EXTENSION OF EXISTING CORPORATE NORMAL-TAX RATE AND CERTAIN EXCISE TAXES—AMENDMENTS

Mr. CLARK submitted amendments, intended to be proposed by him, to the bill (H.R. 12381) to increase for 1-year period the public debt limit set forth in section 21 of the Second Liberty Bond Act, and to extend for 1 year the existing corporate normal-tax rate and certain excise tax rates, which were ordered to lie on the table and be printed.

Mr. DOUGLAS submitted amendments, intended to be proposed by him, to House bill 12381, supra, which were ordered to lie on the table and to be printed.

Mr. PROXMIRE submitted an amendment, intended to be proposed by him, to House bill 12381, supra, which was ordered to lie on the table and to be printed.

PROTECTION FOR EMPLOYMENT OPPORTUNITIES OF DOMESTIC AGRICULTURAL WORKERS—ADDITIONAL COSPONSOR OF BILL

Under authority of the order of the Senate of June 13, 1960, the name of Mr. DODD was added as an additional cosponsor of the bill (S. 3666) to amend title V of the Agricultural Act of 1949, as amended, to provide protection for the employment opportunities of domestic agricultural workers in the United States, and for other purposes, introduced by Mr. MCCARTHY on June 13, 1960.

ENROLLED JOINT RESOLUTION PRESENTED

The Secretary of the Senate reported that on today, June 17, 1960, he presented to the Administrator, General Services Administration, the enrolled joint resolution (S.J. Res. 39) proposing an amendment to the Constitution of the United States granting representation in the electoral college to the District of Columbia.

ADJOURNMENT

Mr. JOHNSON of Texas. Mr. President, I move that the Senate stand in adjournment until 10 o'clock a.m., today.

The motion was agreed to; and (at 12 o'clock and 37 minutes a.m. on Saturday, June 18, 1960) the Senate adjourned until 10 o'clock a.m. of the same day.

NOMINATION

Executive nomination received by the Senate June 17, 1960:

U.S. DISTRICT JUDGE

Arthur S. Lane, of New Jersey, to be U.S. district judge for the district of New Jersey, vice Phillip Forman, elevated.

HOUSE OF REPRESENTATIVES

FRIDAY, JUNE 17, 1960

The House met at 11 o'clock a.m.

The Chaplain, Rev. Bernard Braskamp, D.D., offered the following prayer:

Luke 6: 12: *He continued all night in prayer unto God.*

O Thou transcendent and immanent God, who alone can satisfy our mortal needs and our immortal longings, grant that in the tragic unrest of our day, we may have a faith that finds its center and circumference in Thee.

Inspire us with a fortitude that can master and dispel all the somber moods of doubt and despair which are hovering over the minds and hearts of so many members of the human family.

May our vision of Thy divine will and righteous purposes be so clear and commanding that we shall feel constrained to dedicate ourselves wholeheartedly to bring them to fulfillment.

Hear us in the name of the Captain of our Salvation. Amen.

THE JOURNAL

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. McGown, one of its clerks, announced that the Senate had passed with amendments, in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 11998. An act making appropriations for the Department of Defense for the fiscal year ending June 30, 1961, and for other purposes.

The message also announced that the Senate insists on its amendments to the foregoing bill, requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. CHAVEZ, Mr. RUSSELL, Mr. HILL, Mr. MCCLELLAN, Mr. ELLENDER, Mr. ROBERTSON, Mr. STENNIS, Mr. JOHNSON of Texas, Mr. SALTONSTALL, Mr. BRIDGES, Mr. YOUNG of North Dakota, Mrs. SMITH, and Mr. BYRD of Virginia to be the conferees on the part of the Senate.

The message also announced that the Senate had passed bills of the following titles, in which the concurrence of the House is requested:

S. 2929. An act to amend the National Defense Education Act of 1958 in order to repeal certain provisions requiring affidavits of belief; and

S. 3670. An act to extend and amend laws relating to the provision and improvement of housing and the renewal of urban communities, and for other purposes.

The message also announced that the Senate agrees to the amendments of the House to a joint resolution of the Senate of the following title:

S.J. Res. 39. Joint resolution proposing amendments to the Constitution of the United States to authorize Governors to fill temporary vacancies in the House of Representatives, to abolish tax and property qualifications for electors in Federal elections, and to enfranchise the people of the District of Columbia.

CALL OF THE HOUSE

Mr. HOEVEN. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER. Obviously a quorum is not present.

Mr. ALBERT. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 136]

Ashley	Hull	Moulder
Barden	Ikard	Patman
Blitch	Jackson	Powell
Bolling	Kearns	Randall
Bow	Kilburn	Roosevelt
Buckley	Kitchin	Shipley
Burdick	Kowalski	Taylor
Carnahan	Loser	Walter
Celler	McGovern	Williams
Dorn, S.C.	Merrow	Willis
Durham	Mitchell	Wilson
Foley	Morris, Okla.	Withrow

The SPEAKER. On this rollcall 396 Members have answered to their names, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

LIMITATIONS ON CONSTRUCTION DIFFERENTIAL SUBSIDY

Mr. BONNER. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 10644) to amend title V of the Merchant Marine Act, 1936, in order to remove certain limitations on the construction differential subsidy under such title, as amended, with Senate amendments thereto, disagree to the amendments of the Senate, and ask for a conference with the Senate.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from North Carolina? [After a pause.] The Chair hears none and appoints the following conferees: Messrs. BONNER, THOMPSON of Louisiana, GEORGE P. MILLER, TOLLEFSON, and VAN PELT.

MUTUAL SECURITY AND RELATED AGENCIES APPROPRIATION BILL, 1961

Mr. PASSMAN. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 12619) making appropriations for mutual security and related agencies for the fiscal year ending June 30, 1961, and for other purposes.

The motion was agreed to.

Accordingly, the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill H.R. 12619, with Mr. MILLS in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee rose on yesterday there was pending the amendment offered by the gentleman from New York [Mr. TABER]. Without objection, the Clerk will reread the amendment offered by the gentleman from New York.

There was no objection.

The Clerk read as follows:

Amendment offered by Mr. TABER. On page 2, line 15, strike out "$1,600,000,000" and insert in lieu thereof "$1,800,000,000."

Mr. TABER. Mr. Chairman, this, to my mind, is the heart of the bill, and the question is, Do you want to carry forward a bill that will do some good and will help to make this program one which will be operated in the interest of the people of the United States? If we are going to do something of this kind, let us do it as near right as we can. I am only asking to restore to this item in the bill 50 percent of what has been cut by the committee in writing the bill.

The question resolves itself into how much money is needed to carry this thing on and do it in such manner that it would be of some value to the people of the United States.

I am going to quote just a word from General Palmer, the military officer in charge of this operation, and let me say that General Palmer has had great experience for several years as Chief of Staff under General Norstad over across the water. General Palmer said on page 2327 of the hearings:

The unexpended carryover will have fallen to approximately $2 billion by June 30, 1960, and the program is also falling. The forecast of expenditure during the current fiscal year (fiscal year 1960) is $1.83 billion, while it is forecast that the program in fiscal year 1961 will be marked by an expenditure of $1.79 billion. In these 2 years there is a drastic drop of $560 million below the rate of the preceding 5 years.

Now, we are getting to the point where there is hardly a 12-month period in the chain of merchandise being produced and delivered. We have got to have these things if we are going to help those countries across the water and to keep them in shape so that they can help us to keep communism from spreading. We have got to get things in shape for them so that they can do something. We have got to give them modern instruments of war. We have got to give them missiles, and those things cost a lot of money. It is absolutely necessary to do this if we are going to have any success in carrying forward the efforts that we are making to support the countries across the water—all of Europe, practically, outside of Russia. Turkey, Pakistan, Korea, Vietnam, Taiwan, the Philippines, and Indonesia, all of those places require help if they are going to have sufficient capacity to do the things that they need to do to keep the Communists contained.

Mr. Chairman, we are not asking for any more money than the expenditures will have been for this particular year.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. TABER. Mr. Chairman, I ask unanimous consent to proceed for 2 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. TABER. We are not asking for more money than has been spent this year or will have been spent when the end of June comes. We are asking to keep the thing whirling and keep it up as well as it has been kept up.

Now, there has been some talk by some people that there were irregularities, but those irregularities have been reduced. For my own part, I propose to do some things myself that I never have done before in the line of following up some of these things to see what they are doing and how they are doing it, because I do not like to see any waste. But there are only a few things that a Member of Congress can do along those lines. But we have got to put forward this particular program, the one thing that is straight out and out, for the benefit of those who are helping us to contain communism and keep things from getting worse and worse as we go along. This amendment will just simply put the administration of the military aid situation back on a scale where it was for this year where the expenditures have been for last year and the year before. Now, if we do not do this, we are going to seriously handicap that program. Their expenditures will drop off, and the reserves that they have, of things coming through, will be dropping off much further than they have in years past, because we are getting down now to such a low figure in the unexpended balances.

Mr. Chairman, I hope that the members of the Committee will support this amendment.

Mr. PASSMAN. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I ask unanimous permission to proceed for 5 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

Mr. PASSMAN. Mr. Chairman, I have no telegrams from the President to fortify me in my statement this morning. But I do want to give you some information heretofore denied the committee, and at the outset I also want to repeat what I said yesterday, and that is that the total foreign aid program, since its inception, all phases of it, has exceeded $100 billion and is now costing, overall, in excess of $10 billion annually.

I think I should point out that even though this year tax revenues are unprecedentedly high, during the first 11 months and 13 days of this fiscal year we have already withdrawn from the Treasury $4,772 million more than we have deposited in the Treasury. I should think that, knowing our public debt is $289 billion, as of Monday morning, and knowing that we have withdrawn almost $5 billion more from the Treasury than we have put in this fiscal year, we should give some careful thought to what we are doing.

The charge is being made today, but it is without foundation in fact, that we are wrecking the military assistance program. The same type of charge has been made every year for the past 5 years, but it has never been substantiated; and the charge will also prove to have been incorrect when we come before the House again next year. I say, Mr. Chairman, that during the previous 5 years, in which it has been my privilege to represent the committee on this bill, the Congress, in its wisdom, has reduced the President's requests by $4 billion. And it has afterward been generally acknowledged, year after year, that sufficient funds had been provided and that the program had been improved as a result of the reductions. In addition to the $4 billion overall cut in funds, in the military assistance program alone there were unobligated funds during this same period of $783 million, money which they could not even obligate and these funds lapsed. Those are the facts and you cannot get around them.

Mr. RHODES of Arizona. Mr. Chairman, will the gentleman yield?

Mr. PASSMAN. I yield to the gentleman.

Mr. RHODES of Arizona. Will the chairman tell the committee how much was unobligated this year?

Mr. PASSMAN. Not $1 million of the $783,653,000, the figure which I have used, is included this year. And I am not taking into account one single penny of unobligated funds, when I give these figures. I am giving the figures correctly.

Mr. Chairman, I want to say that we have had a very difficult time getting valid information. I hold in my hand a letter from the Department of State marked "Secret" and it contains a statement heretofore not revealed to the committee, as such. In the second paragraph of this highly secret letter it is stated:

> These currencies make it possible for the country of origin to raise and maintain the forces considered essential by the United States.

Finally, the day before yesterday, we told the people downtown, indirectly, that if they did not declassify this information we were going to subpena them for further testimony. So, I believe it was on Tuesday afternoon, the Department said that we could reveal these figures publicly for the first time.

There is a total of $451 million of dollar equivalent in local currencies available for this military aid program that has never been mentioned to the membership of this House. This has been a secret document, but it is not secret this morning, and any Member may look at it.

I want to go a bit further, as I heard some of my friends who supported our position in the full committee state that they would vote to transfer funds out of some other account into this. I want to say, here and now, that it is not going to be necessary to do that because, as I speak to you this morning, and without taking into account any unobligated funds, the military program has $1,600 million, plus cash receipts from the sale of military equipment of $40 million.

I hold in my hand a letter from the Comptroller General stating amounts which legally could be transferred to military assistance on the morning of July 1 of this year. This total is $259,980,400. So, we could argue the remainder of the day, Mr. Chairman, but it is a matter of fact that there is now $1,900 million cash which can be used in this military aid program by using the transferability clause, and without appropriating another dime.

If you do not think this committee is up against a tremendous job, let me say to you that I also hold in my hand a letter from the office of the Secretary of Defense, circulated in the Department of Defense, June 1, 1960, and it states:

> Attached for your information is a list of the members of the House Appropriations Committee that have not been contacted as of this date relative to the mutual security program.

There are 24 members of the Appropriations Committee listed to be recipients of pressure to get this particular money.

Without the amendment the military assistance category has $1,600 million of new money, plus $40 million new money, plus transferability of $259,980,000. The letters are here to back me up in that statement. This makes a total of $1,900 million for military aid without the amendment.

This committee has worked hard and is entitled to your support. You let this thing get more out of control, and we will never be able to get it under control.

Proceeding, I quote now from page 135 of our subcommittee's hearings:

> Mr. PASSMAN. We do have a program in Europe, under the NATO setup, through which we are appropriating American dollars to continue a military program in Europe?
>
> Secretary HERTER. Yes, sir.
>
> Mr. PASSMAN. Is it not true that we have contracts with nations which have had such a speedy recovery in their economy that, if it were not for the contracts, it would not be necessary to appropriate American dollars to carry out our commitments?
>
> Secretary HERTER. Very true.

We have gotten ourselves involved in these contracts with nations which in many instances, are more able to pick up the military checks than we are; but we are involved in these contracts and we have to go through with them. The more money you give these people the more they are going to get us involved.

I have conferred with most of the leaders of both bodies who are especially concerned with military affairs. Among others, Senator RUSSELL told me that he had carefully considered our recommendations in detail and was convinced that the program was adequately financed.

Mr. EVINS. Mr. Chairman, will the gentleman yield?

Mr. PASSMAN. I yield to the gentleman from Tennessee.

Mr. EVINS. I have been impressed with the diligence of the gentleman from Louisiana as have other Members of the House. I recall his statement that in the military assistance program we have supplied certain nations with more airplanes than they have pilots trained to use them. Is this the fact?

Mr. PASSMAN. To some countries we have supplied two planes for each pilot, and to others eight tanks for each crew. In another country they have placed much of the equipment in permanent storage. For five foreign countries in

which our subcommittee held hearings, and taking an accounting report on one other country, there was $300 million in military equipment in excess of requirements.

Mr. EVINS. In other words, they have planes that have already been delivered to them that they are unable to use because of the lack of pilots and other military assistance that they do not have trained men to use.

Mr. PASSMAN. That is true, as of the time of the report.

Mr. EVINS. Mr. Chairman, will the gentleman yield further?

Mr. PASSMAN. I yield to the gentleman from Tennessee.

Mr. EVINS. I have had some difficulty in running down the total correct figures on expenditures on this program. I checked with the Library of Congress and with the Mutual Security Administration and with the Department of State. I have here some seven items, totaling some $80 billion, that have gone into the foreign aid program in the years from 1949 to 1959.

First. Mutual aid programs—ICA, economic and military assistance, Development Loan Fund, and so forth, $56 billion.

Second. Other grants and credits in postwar period—President's contingent fund, defense expenditures, and so forth, $14 billion.

Third. Loan authority of Export-Import Bank, $5 billion.

Fourth. American contribution to International Bank for Reconstruction and Development—contingent liability, $4 billion.

Fifth. American contribution to World Bank for economic development loans, approximately $1 billion.

Sixth. American contributions to International Monetary Fund—total liability of all countries $14 billion—$4 billion.

Seventh. American contributions to International Finance Corporation—total of all countries about $100 million—$35 million.

Total postwar aid, $79,535 million, or approximately $80 billion in 10 years.

In addition, grants and loans in unspecified amounts have been made to foreign governments by other agencies. I have not been able to obtain the figures for these: The Agriculture Department, Commodity Credit Corporation, Foreign Agricultural Service, Atomic Energy Commission, Commerce Department, General Services Administration, Interior Department, Treasury Department, U.S. Information Agency, and others.

In all, our country has provided loans, grants, and credits of more than $80 billion.

Mr. PASSMAN. I might state that the total amount in the items to which you are referring is more than $87 billion, with fiscal 1960 estimated. This does not include oversea military construction. If you put it all in, the total exceeds billions.

I might say to the gentleman that the total in the military assistance program alone has been $25 billion in 60 nations since the inception of the program; and going into only 5 nations, and using an accounting report for another country we found that they had material in excess of their requirements amounting to $300 million.

Mr. EVINS. In other words, it amounts to $86 billion rather than $80 billion in the entire program?

Mr. PASSMAN. It amounts to more than $87 billion, if you please, exclusive of oversea military construction.

Mr. EVINS. In the last few weeks, we have been rebuffed terribly in various parts of the world and I know that many are concerned about the possible effect that reductions in this program might have on our foreign relations. I might say in this connection that wasteful and extravagant throwing around of mutual aid funds is not a proper substitute for a carefully considered and carefully carried out foreign policy—and throwing in more money into wasteful and unnecessary projects will not cure the troubles we are suffering from as a nation in our relations with the rest of the world.

The issue is not the merit of the principle of mutual aid. Most of us recognize that the mutual aid program is a necessary part of our national defense policies and vitally important to building up the strength of our allies and friends against the ever-growing menace of communism throughout the world. I have always in the past supported the bill. However, the issue is the administration of the program which is far too loose and extravagant and wasteful. Throwing more and more money wastefully into this program will not improve the respect of the world toward us. More dollars is not the answer. But a new and vital approach is needed.

Mr. PASSMAN. There is another statement I would like to make, if I may. You do not replace this equipment every day. May I say that on an average about 92 percent of the equipment which we have provided is on hand and available for use.

I say to you, Mr. Chairman, we only want you to support us on the basis of the facts as they are. Let us keep this program under control. If you let these people cut loose as they want to do, you will never bring them under control.

Mr. CHELF. Mr. Chairman, will the gentleman yield?

Mr. PASSMAN. I yield to the gentleman from Kentucky.

Mr. CHELF. The question that is worrying me considerably and I feel is worrying a good many Members of the House, especially those of us who have supported this program since it was originated by General Marshall—is—whether or not there is a sufficient amount of funds in this particular appropriations bill at this particular time to insure an adequate supply of aid to our weaker but friendly nations who want to hold the line against the advance of communism. Recent events, such as the summit fiasco last month and the existing situation in Japan have caused me to want to double check—take a fresh and clear inventory as to our needs insofar as this program is concerned. I know that the gentleman from Louisiana has made a careful, painstaking, conscientious, intelligent study of this entire matter and I also know that he is a great American—dedicated if you please to what is best for America—therefore I ask the gentleman this pointblank question—in the opinion of the gentleman—Is there sufficient funds in this bill in view of current events? If the gentleman can assure us of this fact—I sincerely believe many Members of the House would be more inclined to follow the recommendations of the Appropriations Committee. We just want to be sure of our step at this crucial moment. We cannot afford to be wrong.

Mr. PASSMAN. This bill provides $300 million more this year for military assistance than we appropriated last year for this purpose. This is 23 percent more—I want to repeat—there is $1,900 million available in the program without the amendment, if the transferability feature is used.

Mr. CHELF. Without question then—the gentleman assures us that there is a sufficient amount of money in this bill?

Mr. PASSMAN. There is more money than they need.

Mr. CHELF. I thank the distinguished gentleman for his forthright answer.

Mr. MAHON. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I shall support the action of the Committee on Appropriations on this bill. I would not feel it appropriate at this time to repudiate the action of the subcommittee, which has worked so long and successfully in an effort to get the facts with respect to the foreign aid program and formulate a bill. Had I been writing the bill, I would have recommended some figures which are different from those in the pending measure. However, I have no doubt that in the final version of the bill, after it has been cleared by the other body, some different figures will be arrived at and those figures will be higher than those now before us. But, it seems to me today, we ought to go along with the bill, as presented to us, and let the executive branch make its appeal to the other body with respect to any changes which are thought desirable. Let the other body conduct its hearings and work its will.

In the Senate-House conference which will then follow I believe we can depend, as we have in the past, on the good judgment of the conferees to work out a bill that is reasonably satisfactory. It seems to me that is the best procedure. It is the safest procedure to follow. I therefore oppose the amendment of the gentleman from New York [Mr. TABER].

The gentleman from Kentucky [Mr. CHELF] has raised the issue of the impact on the foreign aid program of the humiliating experiences which we have sustained in Paris and more recently in Japan. In my judgment, our embarrassment at the summit and in Japan have not come about, even remotely, as a result of inadequate funding of our foreign aid program; and I say further—and I do not expect everyone to agree with me—our disappointing experiences in Japan and at the summit were not the result of American military weakness.

These things have come about as a result of a revolution in the world which is not solely related to the issue of military strength. Of course, our military strength is an important factor in the picture. The whole world knows, and I believe we all agree, that we have sufficient military strength to devastate any enemy who would dare attack us. It has been sufficient to deter attack.

The answer to our problem is not just money, more money. Some say that as a result of the unfavorable experiences of recent days foreign aid has been a failure and should be almost completely abandoned. Others argue that we need more foreign aid in the face of greater world tension. I reject both those arguments; I do not believe there is substance in either point of view.

I think the foreign aid program has done a great deal in stabilizing the world and saving the lives of millions of people and preserving freedom in many parts of the world. I have always voted for foreign aid, reserving the right to vote for modification and reductions, and I expect to do so again and probably vote for a higher figure by the time we finish with the bill in the Congress. What I am saying now is that we should support the committee and await further developments.

What we need more than money, Mr. Chairman, is a revitalization of our national purposes, a more resolute moral leadership on all levels, greater stability and firmness, and a steadfast determination on the part of our people to pay the price of world leadership; and the price of world leadership does not depend upon more and more dollars for foreign aid or even for the Department of Defense.

Mr. TABER. Mr. Chairman, will the gentleman yield?

Mr. MAHON. I yield to the gentleman from New York.

Mr. TABER. Is the gentleman aware that in the past few years the other body has lowered instead of increasing these items?

Mr. MAHON. It has in some instances.

Mr. TABER. In this particular instance.

Mr. MAHON. And it may in this instance.

Mr. TABER. That would leave us high and dry.

Mr. MAHON. I believe that the figure in this bill, without being increased would not be too unreasonable with respect to our program for the forthcoming year.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. PASSMAN. Mr. Chairman, I ask unanimous consent that the gentleman from Texas [Mr. MAHON] may proceed for 2 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

Mr. PASSMAN. Mr. Chairman, will the gentleman yield?

Mr. MAHON. I yield.

Mr. PASSMAN. May I state that during the period since I became chairman of the subcommittee the other body has increased military assistance by $1,210 million.

Mr. MAHON. We are coming to a national election. The people of our Nation are disturbed and confused as to what we should do. They are going to make some important decisions next November. It seems to me those of us who have gone along within reasonable limits on the mutual security program in the past can support this program today as embodied in the committee bill. I propose to stand with the committee at this juncture.

Mr. FORD. Mr. Chairman, will the gentleman yield?

Mr. MAHON. I yield.

Mr. FORD. I am sure the distinguished gentleman from Texas is familiar with the fact that last year the House figure for military assistance was $1,300 million. The other body approved that identical figure; they did not raise it.

Two years ago the House approved for military assistance a figure of $1,515,000,000. The other body maintained the same figure; they did not raise it. I therefore say that we cannot count on the other body in this year raising this figure for the military assistance program.

Mr. MAHON. I am not suggesting that the other body should raise the figure; but I will say that if the other body does not alter the figure, after it has heard the pleas from the agency, it will be pretty good evidence that the decision of the Appropriations Committee is reasonably sound.

Certainly this bill will provide adequate support until the next Congress convenes.

Mr. PASSMAN. Mr. Chairman. will the gentleman yield?

Mr. MAHON. I yield to the gentleman from Louisiana.

Mr. PASSMAN. In the other body the military asisstance program called for only $1 billion. But, by agreement this was raised to $1.3 billion and the House approved that figure. And, I repeat, in addition to that money, by using the transferability provisions, the President will have available $1.9 billion for military aid, even without any additional appropriation.

Mr. HALLECK. Mr. Chairman, I rise in support of the pending amendment.

Mr. Chairman, may I say at the outset to some of those on both sides of the aisle who have not favored this program in the past that certainly in view of the circumstances existing in the world today this amendment should be supported.

The gentleman from Louisiana has no better friend than I. He is sincere, but we all know he has been something of a longtime foe of these programs.

The gentleman from Texas is certainly one of the best informed men in the whole country in the matter of the defense of our country, but as I listened to his speech I got the very definite impression that what is expected here is that the other body will increase this amount and that then we will come out with a greater total than is here provided.

In my opinion, the questions of the gentleman from Michigan have indicated that on this occasion we cannot and should not rely on any such supposition as that. I think we should take the action today that should be taken by adopting this amendment.

Mr. Chairman, a great deal has been said here and in other places about America's obligation and its position as the leader of the free world. But the overriding issue at stake in these deliberations is the maintenance of our own military strength and the preservation of our own security.

I have said before, and I say again that the term "foreign aid" is a complete misnomer. This is a mutual security appropriation bill, mutual security for the nations of the free world. That is what is important.

The gentleman from Louisiana said that he was not fortified with a telegram about this matter, but I would like to say to him that as the majority leader in the 80th Congress under a then Democratic President I responded to requests many times and took action pretty much on the word of President Truman when this program was initiated. Looking back, I do not think I made any mistake. So I say without apology that before his departure for the Far East the President did send telegrams to Members on both sides of the aisle, and I think that was properly done.

In his telegram, the President said:

THE WHITE HOUSE,
Washington, D.C., June 11, 1960.

HON. CHARLES HALLECK,
House of Representatives,
Washington, D.C.:

I understand that, in addition to other unfortunate reductions, the majority of Foreign Operations Subcommittee of the House Appropriations Committee has acted to cut the military assistance appropriation request by $400 million and defense support by an additional $75 million. This cannot but jeopardize our own security and the defense of the free world. Unavoidably the military assistance cut would compel America to withhold from her allies both in NATO and in the Far East the equipment required to maintain a respectable posture of defense. The defense support slash amounts in total to $124 million below my original request and reduces this program by $95 million below this year's level. This will force us to distribute a deficit among our allies rimming the Communist world from Korea to Turkey, to the detriment of all, or else to drop entirely from this powerful defensive system one or more nations important to us in order to sustain the others at an adequate level. I must be, as you know, in the Far East when these subcommittee actions are reviewed next week in the full committee and in the House of Representatives. For our own security and for the common defense of the free world I most earnestly request your cooperation in restoring these funds.

DWIGHT D. EISENHOWER.

By contributing to the free world's military and economic strength we provide through the mutual security program an essential part of the defense of our own Nation. I well remember the words of the late Senator Vandenberg when in speaking of these programs he consistently expressed the view it was our own national interest we were seeking

to protect. I believe that is as true today as it was then.

We seek to reinforce the efforts of our friends in the common defense. The strength we make possible is fundamental to the capacity and will of our allies to resist Communist threats and aggression. In that way it is fundamental to our own security and our own welfare. We know that the peace of the world is dangerously threatened by the Communist power bloc. We have done and are doing all that we can reasonably do to maintain and establish a true basis for a just and lasting peace. But the rude and ruthless action of the Soviet leaders has cast a chill on the free world. Free nations are faced with a calculated renewal of the cold war.

So, in this critical situation our Government and our people are faced with the problem and the duty of taking what action we can most effectively take to protect the interests of our own country.

Except for our own defense budget, probably the greatest single action within the power of the Congress to take in support of our Nation's security and defense of our free world association is to provide for a strong mutual security program. By such action we can make possible powerful defenses for our allies.

Since this program was initiated 12 years ago, the free world has made substantial gains in economic and military strength. We can see this plainly in the recovery of Western Europe. Allied armies receiving military assistance have increased from 3½ to 5 million men; allied navies have increased from 1,200 to 2,000 combat ships; allied air forces have increased from 16,000 to more than 25,000 aircraft.

The CHAIRMAN. The time of the gentleman from Indiana has expired.

Mr. HALLECK. Mr. Chairman, I ask unanimous consent to proceed for 3 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. HALLECK. About one-half of these aircraft are jets. All of these forces are better trained, better equipped, and better able to perform their assigned missions in defense of the free world as a result of the mutual security program. And, what is important to our deliberations here today is that these significant gains in allied military strength have been achieved at a cost billions of dollars below what would have been needed to do the same job here at home. A program of military and economic assistance enacted by the 80th Congress kept Western Europe and Greece and Turkey from falling into Communist hands in the late 1940's. Communist aggression has been checked in Korea, Vietnam, and Laos, and at the Taiwan Strait. More recently, free world nations have resisted Soviet pressures and have stood firm under threats of rocket attacks. And, of course, we had the most recent threat delivered 3 weeks ago. But, again I say our allies have stood firm and it is in our own basic strategic interest to support them in resisting actual or threatened bloc aggression.

The events which have just taken place in Japan are an ominous reminder to us all of how relentless the Communists are in their efforts to undermine and destroy free nations in this area. We, on our part, in this day and in this age, must be even more resolute, else these subversive forces shall succeed.

To that end I am going to support this amendment, which restores not all of the cut, just part of the cut, that was made by the committee, away below the authorization we voted upon some time ago. And, I am going to support the amendments for defense support that will be offered later, and I also intend to support an amendment dealing with the prohibition of funds for the Indus waters program, a program carefully worked out over a 9-year period by World Bank President Eugene Black to resolve one of the great issues confronting the free world involving troubles between India and Pakistan. If this effort is repudiated by the Congress, one of the great diplomatic successes of the decade will collapse.

This is a nonpartisan matter. This program through all the years of its existence has been supported by both sides of the aisle, and it has been resisted on both sides of the aisle. Both national platforms of 1956 strongly supported it. I have no doubt that the platforms to be drawn up next month by both parties will once again strongly endorse it. As a matter of fact, every major candidate for President that I know anything about supports this program. So, I do not think that we can afford to impede the progress that needs to be made either under President Eisenhower or whatever President succeeds him in the White House, because in my opinion, as long as the great struggle continues in the world, the struggle that has broken out between the slave and the free, we will be put to it to defend ourselves by working with the free people who stand with us.

So, I say with the President, let us not jeopardize our own security. Let us face up to the responsibility which is ours and adopt these amendments. This program is above partisanship. The real issue is the security and the strength and the protection of our own country.

Mr. GARY. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I certainly agree with the gentleman from Indiana that the time has come when we should look out for our security. If the events in the world today demonstrate anything, they demonstrate that nobody else is going to look out for us. If we do not look out for ourselves, we will soon find our resources exhausted and then we will really be alone in the world.

The Vice President of the United States was quoted in the paper 2 or 3 days ago as saying that this cold war is likely to last for 50 years.

I say to you without hesitation that in my judgment it will not last for 50 years if we continue to go on as we have in the past few years, because we will not be able to last that long.

Let me give you a few figures. Fifty years ago was 1910. At that time our receipts were $676 million, our expenditures $694 million, and our public debt was $1,147 million.

Fifty years is a long time, but let us say that the Vice President is half right. Let us go back 25 years for comparison. In 1935 our total budget receipts were $3,730 million; the total expenditures were $6,521 million. Our debt then was $28,701 million. If the figures I am using are wrong it is the fault of the administration, because I am quoting from the Federal budget in brief, published by the Bureau of the Budget.

Now, that was 1935. In the last 25 years since 1935 we have balanced the budget only 5 times—5 times in 25 years. We have had a deficit in every year except 5. Let us see what the figures are today. For 1960 the expenditures are $77 billion. The national debt as of last Monday, June 13, was $289,300 million.

Do you think we can keep that up for 25 or 50 years? I do not think we can. The time has come when we must begin to consider these facts. One thing is absolutely certain—a bankrupt nation cannot defend itself. And let me give you one other figure here. Already so far this year we are $4,772,354,000 over the receipts. That is, our expenditures for the 11 months and 13 days of the present fiscal year exceed our receipts by $4,772 million. How can we keep that up?

We have got to stop and consider these programs in the light of our fiscal situation. Moreover, let me say, with all due respect to my very good friend, the gentleman from New York [Mr. TABER], that he and I have been on this committee together since it was first created; we have usually agreed. But I well remember during the debate on the bill for the fiscal year 1957 the gentleman from New York [Mr. TABER] spoke for an increase in funds for military assistance. He told us how necessary that increase was at that time. The House did not agree with him; they agreed with me. I felt the funds were sufficient. And what happened? The military program in that fiscal year ended up with a surplus of $538,800,000. I ask the gentleman from New York, Is not that correct?

Mr. TABER. Yes; that is correct; but the gentleman's statement with reference to the present condition of the Treasury is not, as I understand it.

Mr. GARY. I said that these were the administration figures.

The CHAIRMAN. The time of the gentleman from Virginia [Mr. GARY] has expired.

Mr. HALEY. Mr. Chairman, I ask unanimous consent that the gentleman from Virginia [Mr. GARY] may proceed for 5 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. TABER. Mr. Chairman, will the gentleman yield?

Mr. GARY. I shall be glad to yield to the gentleman from New York.

Mr. TABER. The gentleman has not taken into account income tax payments due June 15, that will be coming in between now and the 1st of July.

I think we can count on there being close to if not a balanced budget.

Mr. GARY. I said to the gentleman I was using the latest figures available. This is the daily statement of the U.S. Treasury on June 13, 1960. That does not take into account the collections of June 15 but I still say that this sheet shows that the deficit as of last Monday, June 13, is $4,700 million. I am not going to attempt to predict what the June 15 collections will be. I am not going to attempt to predict what the deficit will be at the end of the year. I am simply using the latest figures available, and I am using Treasury figures.

Mr. PASSMAN. Mr. Chairman, will the gentleman yield?

Mr. GARY. I yield to the gentleman from Louisiana.

Mr. PASSMAN. Is that the latest statement?

Mr. GARY. They are the latest figures I have available. If I had later figures I would use them.

Mr. CURTIS of Missouri. Mr. Chairman, will the gentleman yield?

Mr. GARY. I yield.

Mr. CURTIS of Missouri. The gentleman is well aware of the fact that Treasury collections are highly seasonal and must be adjusted to get a fair picture.

Mr. GARY. I do not know how fair it will be, but we will get the picture for the year's operation at the end of the fiscal year. The gentleman can then discuss those figures. I will be glad to discuss them with him as soon as they are published. But I cannot anticipate what the figure is going to be next week or next month. They change so rapidly you cannot predict from day to day with any degree of accuracy.

Mr. HALEY. Mr. Chairman, will the gentleman yield?

Mr. GARY. I yield to the gentleman from Florida.

Mr. HALEY. Referring to the figures the gentleman has used here, is it not the fact that in 1953 the total indebtedness of the U.S. Government was approximately $266 billion and today it is approximately $289 billion, or roughly an increase of $23 billion?

Mr. GARY. That is absolutely correct. At the end of 1953 the total indebtedness was $266 billion and as of Monday, June 13, it was $289 billion.

Mr. HALEY. The expenditures of the Federal Government in the last few years have increased approximately $15 billion a year. We hear much of the fact that this is because of the rise in the cost of national defense, yet in 1952 the defense budget of this Nation was approximately $40 billion and today it is still approximately $40 billion, so the increase in the expenditures of this Government has been in domestic programs, not for the defense of this Nation.

Mr. GARY. I think that is correct.

Mr. PASSMAN. If the gentleman will yield further, the gentleman was chairman of this subcommittee for a number of years, and he has consistently defended the concepts of the program from its inception. Is that a fact?

Mr. GARY. Yes.

Mr. PASSMAN. Is it not true that we have heard the same charge every year when we endeavored to make some adjustment in the bill, to the effect that we were wrecking the program, but in subsequent years those charges were proved unfounded?

Mr. GARY. That is absolutely correct.

Mr. PASSMAN. Does the gentleman believe there are adequate funds in every respect in this bill to protect our military assistance program?

Mr. GARY. There are ample funds in this bill to protect not only our military assistance program but our entire foreign aid program. I want to say that the gentleman from Louisiana, the chairman of our committee, is one of the best informed men in the Congress on this program. No one has worked harder than he has to obtain the facts concerning the program. Notwithstanding the fact that he has voted against the program in the past, I think he has bent over backward at all times to be fair. Certainly he has in this bill.

I say to you I would not support the amount in this bill if it had not been for the U–2 incident and for the failure of the summit conference, because I would consider it too high. I had hoped that we could cut this program to $3 billion and possibly to $2,500 million, but after the U–2 incident and the failure of the summit conference I felt that we ought not to take any chances. We have taken that into consideration, and it is my honest opinion that the bill is adequate.

Mr. FORD. Mr. Chairman, I move to strike out the last word. The pros and cons of this amendment, and this problem, have been well discussed, but I believe at this point it might be proper, and I hope helpful, to take up several points that, in my opinion, need reemphasis. Our distinguished chairman of the defense subcommittee, a man for whom I have the highest personal regard, in effect, has made the point that if we are wrong in this figure of $1.6 billion for military assistance, we should not be concerned because the other body might protect us from our failures and come up with a figure more nearly accurate and right. There is logic to that point of view providing precedent indicated that they would make a change upward in these figures. The facts are for the last 2 years they have not. For the fiscal year 1959, we recommended and approved for military assistance a figure of $1,515 million. The other body approved exactly the same figure. That was 2 years ago. For fiscal year 1960, the House approved a figure of $1,300 million. The other body approved an identical figure. The point is we cannot expect that the other body will rescue us if we have made an error. My point is, first, that we should have the higher figure, based on military considerations. Secondly, the precedent establishes beyond any doubt that they will not go beyond what this body does in this area.

Mr. Chairman, earlier this afternoon, the distinguished chairman of this subcommittee, the gentleman from Louisiana, made a point that under the law it was possible to transfer $259,980,400 from various appropriations to supplement the military assistance account providing the figures in this bill were approved and became law. I wonder if my distinguished chairman is advocating that these transfers be made, if this is enacted into law? Is he advocating, for example, that the figure recommended, that he urged our subcommittee to approve for the United Nations Children's Fund be depleted by the transferability that he advocates and recommends? I wonder if our distinguished chairman is suggesting to the House that his figure, that he proposed we approve in this bill, for technical cooperation, can be depleted by the transfer authority that he now says exists? I wonder if he is now saying, in effect, that the figures he has recommended in all these other areas are unsubstantiated.

Is he urging that the figures he proposed be changed downward? I think the distinguished chairman puts himself in a somewhat untenable position, inasmuch as he proposed to the subcommittee these precise figures without any charge.

Yes, it seems to me that you cannot escape the dilemma by now saying we should pull funds from this pocket and put them in the other pocket. Those programs are either sound on their merits—and the chairman recommended them—or they are not, and you cannot now come up and say they are unsound in order to help out in this current debate.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

Mr. PASSMAN. Mr. Chairman, I ask unanimous consent that the gentleman from Michigan [Mr. FORD] may proceed for 3 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

Mr. PASSMAN. Mr. Chairman, will the gentleman yield?

Mr. FORD. I shall be glad to.

Mr. PASSMAN. The gentleman from Louisiana has not recommended any such procedure as the gentleman from Michigan implies. The gentleman from Louisiana is merely referring to the law and providing the recapitulation supplied by the Comptroller General who stated, and I quote:

> Amounts which legally could be transferred to military assistance if there is need for it.

I am not going to violate any of my obligations or responsibilities to maintain the secrecy of the subcommittee, but the gentleman knows that some Members on his side of the aisle wanted to cut in half the item he just mentioned.

The gentleman from Louisiana has not recommended anything such as has been implied; he is merely stating facts, and these facts are in the record.

Mr. FORD. If the gentleman is not recommending that the executive

branch do this, I do not see any substance to the argument which he makes about the right of transferability.

Mr. PASSMAN. The gentleman knows that year after year hundreds of millions of dollars of these funds are deobligated; and the gentleman knows that a lot of these programs put huge sums into what I have referred to as "phony obligations" and then come along later with deobligations. Last year $150 million was deobligated after we went home.

Mr. FORD. Now, if I can turn to summarizing what I think is the basic justification of this amendment: Here we have a chart that shows that 9 years ago we had substantial funds in unexpended military assistance funds. This chart also shows that for the last 5 or 6 years we have made available in new obligational authority for this program of military assistance an average of about $1,350 million. Is also shows that for the same period of time we have expended for this program an average annually of about $2.3 billion. In other words, we have been spending about a billion dollars more each year than we have been making available in new obligational authority. We have been able to do that for one concrete reason, that we had unexpended funds available from earlier years. We have drawn down those unexpended funds. We have now come to the point where we have in my opinion about reached the bottom of the barrel if we are to continue this program on this level.

The CHAIRMAN. The time of the gentleman from Michigan has again expired.

Mr. RHODES of Arizona. Mr. Chairman, I ask unanimous consent that the gentleman from Michigan may proceed for 2 additional minutes.

Mr. HAYS. Mr. Chairman, I object, and shall object to any further requests for extension of time.

Mr. HOFFMAN of Michigan. Mr. Chairman, I offer a preferential motion.

The Clerk read as follows:

Mr. HOFFMAN of Michigan moves that the Committee do now rise and report the bill back to the House with a recommendation that the enacting clause be stricken.

Mr. HOFFMAN of Michigan. Mr. Chairman, permit me to say there is no expectation that this motion will be adopted. Nor is it made solely for the purpose of getting an opportunity to speak, because unless revised, I expect to vote against the bill on final passage.

A LAUDABLE DESIRE BUT A FOOLISH POLICY—TRIED BUT FOUND WANTING

There are two convincing reasons why this proposed appropriation should be drastically cut. There is still available, unexpended, something over $5 billion.

The program had two objectives: the economic recovery of European countries devastated by war, and making permanent our national security. The proposal to extend financial aid to European countries "willing to assist in the task of recovery" was made by Secretary of State Gen. George C. Marshall [1] at Harvard University on June 5, 1947.

The gentleman from Louisiana [Mr. PASSMAN], chairman of the Appropriations Subcommittee in charge of this bill, told us yesterday that we have, to further military and economic aid to other countries, appropriated $100 billion. Though one of the purposes of the bill was the laudable one of aid to people less fortunate than ourselves, a justifiable desire was to strengthen and make ourselves strong from a military standpoint.

In a large degree, the first purpose, to promote economic recovery in other lands, has been accomplished—in fact, to such an extent that some of the nations we have aided are now successful competitors in the economic field.

The real purpose of the movement, that is, to purchase friendship and military aid from other countries, make ourselves secure, has not been attained. I challenge anyone to name the nation which, or the people who, when its or their own interest is adversely affected, will, to its detriment, come to our aid in time of emergency.

Much time might be used to prove that today, both economically, and militarily, we stand alone.

To demonstrate the truth of that statement, we need but to read the press, listen to radio, or watch TV, to learn that, throughout the world every nation and its people are in domestic trouble, but that in the overall picture, there is everywhere, notwithstanding our expenditure of billions of dollars, an active, strong segment of the population antagonistic to the United States of America.

The Vice President's visit to South America, Cuba's attitude toward us, yesterday's rioting in Tokyo and Japan's request that the President should not, because of the people's attitude, visit Japan, are but three of the outstanding occurrences which demonstrate the truth of the broad proposition that our foreign aid program, so far as purchasing good will or military security, has failed.

The pattern for the riot, for the seizure by the mob of Tokyo, but followed the communistic pattern pursued by Reuther in the sitdown strikes in Michigan in 1937.

The appropriation of billions of dollars for national defense, for the production of weapons is futile when we permit any organization to slow down or end production by a strike. The latest example, as shown by the press and radio, being the strike which has interfered with the production of perhaps one of our most effective weapons, the missile.[2]

THE OTHER PHASE OF THE PROBLEM

The objective of charity and faith, our laudable desire to help others, has been remarkably successful, but, unfortunately and unanticipated, to our own detriment.

Again, a book might be written demonstrating the truth of that statement.

Kindly, sensitive people and organizations, with the highest of motives, a burning desire to make all people happy and content, and strange as it may seem, certain union organizations, have advocated and have caused not only money and credit, but the know-how and technicians, to be sent to other lands to further our desire to aid.

Others have been helped, and today they not only have efficient and productive plants in countries throughout the world, but we have our own technicians, our own industrial plants producing products abroad which are returned to this country, sold in successful competition with the things made by our workers here, crowding our own products out of the market, and adding to the unemployment situation.

It is doubtful if there is a Member of this House who comes from an industrial district who cannot cite a specific example of the ruinous effect upon not only industry but employees here at home.

Such is the fact in my own district. Many, many times we have heard our Democratic colleague, the gentleman from West Virginia [Mr. BAILEY], who is so deeply interested in the people in his own district, complaining bitterly about the effect of foreign importations upon his own people.

In the brief moments allotted to me, comment cannot be made citing the various businesses and groups of individuals who have been adversely affected. Such citations are not necessary for they are a matter of common knowledge.

Today, as since the beginning of civilization, we can find and, if we choose, name individuals and groups who, unaware of the ultimate result, in an attempt to further their own interests, are following a course which will either bring us war or destroy us economically and impoverish us individually.

It might be added that it hurts to find myself in opposition to my very good personal friend and adjoining political neighbor from the Fifth District of Michigan [Mr. FORD], and I am very, very sorry I cannot go along with him. But I cannot vote to continue to give billions to other countries while we fail to meet the needs of our own people. I have somewhat less regret to find myself in disagreement with our minority leader because he lives a little farther away.

---

[1] On Dec. 8, 1945, General Marshall told us he did not know where he was on the evening of the 7th when the Japanese struck Pearl Harbor.

[2] Washington Star—June 4, 1960:

"STRIKE CALL HITS MISSILE BASES

"SAN DIEGO, CALIF., June 4.—Convair machinists have called a strike at midnight tomorrow at Cape Canaveral, Fla., Vandenberg Air Force Base, Calif., and other key U.S. missile bases.

"Exactly what the effect will be remains to be seen.

"The International Association of Machinists called the strike yesterday after turning down Convair's second contract offer.

"Work at two other big Convair plants in San Diego will be halted Monday. The stoppage will halt work on Atlas intercontinental missiles and Convair's new 880 and 660 jet transports, and the F–106 fighter, but workers are expected back Tuesday.

"On Wednesday Convair offered 27,295 machinists an 11-cent wage offer, and the union turned it down."

Let us by all means strengthen our own national defense, not by bases and airfields in other lands, which Russia has already told us will not be permitted to be used for observation and which, in case of war, will be used by our enemies; not by dollars which will be used in other countries for the production of war materiel, but here at home, in the production, through scientific aid, of the most improved defensive, destructive weapons; make our country, if that is possible, impregnable to the assault which any nation or group of nations may be either foolish or ambitious enough to make.

A more worthwhile, a clearer, more convincing statement will be found in an editorial in yesterday's Chicago Tribune, which reads as follows:

IRONIES IN FOREIGN AID

The House Republican policy committee, consisting of 30 gentlemen supposed to be the brains of the minority, has found a cause to fight for, and guess what it is. It's restoration of cuts in foreign aid voted by the Democratic majority of the House Appropriations Committee.

The Republican President asked $4,175 million in foreign aid funds. The Appropriations Committee decided to trim that request by $790.5 million. The committee adopted the recommendations of a subcommittee headed by Representative PASSMAN, of Louisiana, a Democrat.

Four Republicans on the full Appropriations Committee voted against the reduction, and the Republican policy committee concluded with this quartet that the cuts posed a threat to the security of the United States. Just how it was not stated, for the appropriation now coming to a vote still amounts to $3,384.5 million, to which must be added $4 billion previously appropriated but unspent funds, making the total available for handouts abroad $7,384.5 million.

The Republicans who see the national security imperiled do not, curiously enough, urge full restoration, but feel that if $250 million of the $790.5 million reduction is put back in the appropriation, then the country will be safe again. Judgments of such refined character disclose shadings of understanding which will elude most citizens, for the difference either way is of slight consequence, except to the struggling taxpayers.

Foreign aid was initiated under Democratic administrations, and it used to be that the Democrats resisted cuts while the Republicans sought to obtain them. Now it is the other way around. A Democratic excursion in global dogooding, which, after an outlay of some $85 billion, has yet to prove that it is productive of anything more significant than waste, becomes a Republican article of faith. We do not get it, nor do we think will most Republican voters.

Mr. YATES. Mr. Chairman, I rise in support of the pending amendment.

Mr. Chairman, I support this bill and I am in opposition to the pro forma amendment. I shall support the amendment which was offered by the gentleman from New York [Mr. TABER] because I believe it to be vitally necessary to the interest of our Nation. I disagree completely with the gentleman from Virginia [Mr. GARY], my very good friend. I do not think that the United States of America is bankrupt. I do not think we are going bankrupt. We certainly are not going bankrupt this year and that is what concerns us now. This is a special year for the consideration of the pending bill.

Last year this bill might have been in order; the cuts, the restrictions in this bill might have been in order. But, the special events of recent days have given a new atmosphere to our relationships with the other nations of the world. This is a special time that deserves special consideration. This is a time for special action and not our usual reactions. We are threatened throughout the world by communism, and extravagant budget cutting is a luxury we cannot afford.

Mr. Chairman, whether we believe in the foreign policy of this administration or not—and I have been one of its severest critics on its foreign policy—we cannot permit the shattering of the cornerstone of our present foreign policy by passing this bill with its improvident provisions requiring the contraction of our strength. To do so would be to engage in what can only be described as unilateral disarmament. In my judgment that is the worst thing we can do at the present time.

Unquestionably there have been mistakes in this program. We have given military assistance to buttress unpopular dictatorships, and I have been opposed to such action. We have forced military assistance upon nations which could not support or completely utilize it, and I have been opposed to such actions. But the fact remains that we need this program because we have no other policy at the present time. Shall we, by passing this bill, obliterate, if you will, a working program however imperfect without having an alternative to take its place?

Mr. Chairman, we stand on the threshold of a new election. In November a new President will be elected, and whether he be a Republican or whether he be a Democrat, I think we must ask ourselves these questions: One, shall we make Mr. Eisenhower's overwhelming task even more difficult in the dying days of his tenure? Shall we contribute to a paltry inheritance of troublesome foreign relationships for the next President whether he be a Democrat or whether he be a Republican? Shall we contribute to shattering the cornerstone of our present foreign policy without having a suitable alternative, and thereby increase immeasurably the burdens which the new President will have to assume? It is true that it is our responsibility as Members of the Congress to pass upon this bill, but you must keep in mind that what we do on this bill, what the Congress does, will have a significant effect upon what the next President of the United States has to do when he takes office next January. Let us give him a program that is strong, not a skeleton of what the program should be. Let him decide if he wants to terminate it.

Mr. Chairman, I urge opposition to the preferential motion and I urge support for the amendment offered by the gentleman from New York.

The CHAIRMAN. The question is on the motion offered by the gentleman from Michigan [Mr. HOFFMAN].

The motion was rejected.

Mr. SIKES. Mr. Chairman, I move to strike out the last word and I ask unanimous consent to proceed for 3 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

Mr. MASON. I object, Mr. Chairman.

Mr. SIKES. Mr. Chairman, I see little relationship between the cuts that have been made in the foreign aid bill and the defense of America or of the free world. Therefore, I support the committee bill and I oppose this amendment.

I believe, Mr. Chairman, if we were to adopt this amendment, we would be resigning ourselves to a continuation indefinitely of the present unrealistic world situation. Remember, there is the sum of $2 billion unexpended in this program now. This is the so-called leadtime or pipeline money. A sum of $2 billion is not needed now for leadtime and pipeline. Our rate of production and our rate of delivery have been stepped up materially.

The facts show this is a much greater amount of money than is necessary for an unexpended balance. Everything which is desired by the proponents of the legislation, and which it is possible to accomplish, can be achieved by the bill as written. Therefore, there is sufficient money in the program as recommended by the committee.

Mr. Chairman, an additional $200 million will not rehabilitate a program that needs spirit and determination and drive much more than it needs money. I have heard the arguments for this amendment. I know foreign troops can be maintained at less cost than U.S. troops. I know we need allies. I am not one who distrusts or downgrades our allies. But let us look around us at what is happening. For instance, we have contributed for years to the defense of Japan. We have put nearly $700 million into a buildup of that nation's military strength. We have helped to develop a home defense force there of 150,000 troops. Our Department of Defense says that they are good troops; they say they are well trained, that they are reasonably well equipped from American stocks. But tell me this. Where were those 150,000 troops when the Japanese Government said that they could not be responsible for the safety of our President? Where is the return on America's investment, an investment of the type which is provided for many nations in this bill, when the armies to which we contributed abroad cannot even maintain or are not allowed to maintain order against domestic Communist disturbances?

Mr. Chairman, this is a shocking failure on the part of an ally to come through in time of need. And none has benefited more from American aid, economic as well as military, than has Japan.

American workmen and American manufacturers are crying for relief from the flood of Japanese goods which has been generated by this aid. If Japan will not use the resources built up by American dollars for the protection of

America's President on a good will visit then pray tell me when will those resources be used in the common good?

In the beginning, when much of the world was prostrate, I supported this program, I felt it was necessary. But the situation has changed very markedly. Europe and the rest of the free world are generally prosperous. But they are reluctant to accept their full measure of responsibility for world peace. And I am afraid that America's leadership has lapsed into the easy habit of using dollars as a substitute for strong diplomacy.

Mr. Chairman, the evidence, regrettably, does not show that we have received fair value for the defense billions already given to our allies in this long and costly 12-year program. The record, regrettably, does not show that our allies, with but one or two exceptions, are making a substantial contribution to the joint defense effort which is in keeping with their material well-being. Percentagewise, our defense contributions are more than double those of nearly every member of the Western Alliance.

Let us look at NATO which has been prominently mentioned. NATO on which we have placed our major hopes, is far from being up to projected strength, strictly because of the failure of our allies to develop the pro rata forces which they agreed to contribute. In 1949 NATO commanders requested 90 divisions as a realistic force for the defense of Europe. By 1955, despite growing Soviet and Soviet satellite strength, a new figure of 30 divisions was established by Allied agreement as the irreducible minimum for NATO. How many divisions does NATO actually have in 1960? Fewer than 20. And of these, the U.S. forces are the major obstacle to enemy aggression. Our allies, who have been receiving American military aid through all these years, have not lived up to the measure of responsibility and effort to which they firmly committed themselves.

In other words, if Uncle Sam will do the job, they are going to let Uncle Sam do it.

Let us look a little further. This bill carries money for defense contributions to many small nations. This amendment would increase that contribution. Yet in many of them there is no realistic promise of effective use for the joint defense of the weapons and equipment which is given them. To arm some of them is a waste of time, effort, and money.

Let us face the fact that America's prestige has not been at a lower level worldwide in our time. The prestige of the democracies is dropping everywhere in the face of violent and ruthless tactics by the Communists and their cohorts. But the fact that diplomacy is finding itself unable to cope with today's problems is not an argument for more foreign aid It is an argument for a realistic reappraisal by the United States and by our allies of what the future holds.

In the meantime, how long must we invent arguments with which to excuse our allies for the lack of mutuality in this program? How long must we try to convince ourselves that there need not be a common acceptance of the need for a joint and equal sharing of the problems and the cost of defense against communism?

The CHAIRMAN. The time of the gentleman from Florida has expired.

Mr. RHODES of Arizona. Mr. Chairman, I move to strike out the requisite number of words.

Mr. Chairman, at this stage in the debate on the Taber amendment I feel it is a good idea to try to put the whole thing back into context and reconsider what we are really trying to do with the amendment.

This amendment is to the military assistance part of mutual security. Military assistance is the program by which we buy and deliver military hardware to the forces of our allies around the world. This is not special assistance, this is not technical cooperation, it does not deal with any other phases of this program; this is military assistance.

The committee has reported out $1,600 million for this item. The President of the United States has asked for $2 billion. The gentleman from New York has offered an amendment to raise the amount from $1,600 million to $1,800 million.

I want to point out to those of you who believe that anybody who offers an amendment might be a spendthrift that in the first place the gentleman from New York has never had that reputation and certainly does not deserve it, and in the second place, this is still a cut of 10 percent of the budget request of the President. In other words, if the amendment of the gentleman from New York is adopted, there will still be a cut of 10 percent. This is a pretty healthy cut, particularly in these times when we are worried and have reason to be worried about the security of the free world.

I reiterate what the gentleman from Michigan has already proved, and that is the fact that the other body does not historically raise the amount for military assistance. The amount which we pass will probably be the amount which will be in this bill when it goes to conference. As you know, there can be no raise in conference, so we will probably have only the figure as it appears when it leaves the House. As a result, I style this as the most important amendment we can possibly have.

A few moments ago, the gentleman from Louisiana, the distinguished chairman of the subcommittee, had on the rostrum a letter involving the use of local currency for military purposes. The implication was given that the amount of $459 million in local currency is available for the military assistance program. I think the gentleman is well aware that that amount is available only in the category of defense support. I ask the gentleman from Louisiana if that is not so.

Mr. PASSMAN. I can tell the gentleman that I am reading the letter.

Mr. RHODES of Arizona. I do not want the gentleman to read the letter. Will the gentleman tell me whether or not he disagrees with my statement?

Mr. PASSMAN. I will tell the gentleman what they said.

Mr. RHODES of Arizona. The gentleman has read the letter.

Mr. PASSMAN. Will the gentleman permit me to reply?

Mr. RHODES of Arizona. Certainly.

Mr. PASSMAN. The letter states:

> These currencies make it possible for the country of origin to raise and maintain forces considered essential by the United States.

The letter was stamped "secret," and the amount is $451 million, and that was also stamped "secret."

Mr. RHODES of Arizona. I do not yield further.

The program which we are talking about is to buy tanks, airplanes, and weapons; 90 percent of this money is spent in the United States. You do not pay for tanks, airplanes, and military weapons produced in the United States with anything but dollars. You do not pay for them in baht, or kip; you do not even pay for them in pounds or francs, you pay for them in dollars.

The $459 million of local currency the gentleman has mentioned goes for the category of defense support. It is the second phase of defense support. As the gentleman well knows, the first phase is the purchase of capital equipment to go into these countries. This equipment is then bought by the people in the country and local currency is generated by the purchase. This local currency is available then for use in expanding the military program in the country which got the materiel in the first place.

Mr. TABER. Mr. Chairman, if I could have the attention of the gentleman from Louisiana [Mr. PASSMAN], is it not about time that we had some agreement as to when we would vote?

Mr. PASSMAN. Mr. Chairman, today is Friday and many Members would like to go. We have been on this amendment for 1½ hours already. I do not want to be accused of trying to cut off debate, therefore, I ask unanimous consent that all debate on the pending amendment close in 30 minutes with 30 seconds to be reserved for the committee.

The CHAIRMAN. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

The CHAIRMAN. Under the unanimous-consent agreement, each Member standing and seeking recognition to speak on the pending amendment will be recognized for 1½ minutes.

Mr. GROSS. Mr. Chairman, I yield back my 1½ minutes.

The CHAIRMAN. The Chair recognizes the gentleman from Vermont [Mr. MEYER].

Mr. WOLF. Mr. Chairman, I ask unanimous consent that the time allotted to me may be transferred to the gentleman from Vermont [Mr. MEYER].

The CHAIRMAN. Without objection, it is so ordered.

There was no objection.

Mr. MEYER. Mr. Chairman, I am opposed to this amendment. Last year I supported the mutual security appro-

priation, and I believe in many of the things it stands for and many of the things it does. But, I do believe we could be much more selective in the use of military funds abroad. We give a lot of hardware, a lot of planes and things to countries which cannot use them and do not need them to do things that really are not in the interest of those people. Furthermore, we have seen that some of these military funds are used for political purposes, which is not in the defense of the free world or in fulfillment of the general terms and purposes of this act. We have also found out in recent times that much of the money is being used for implementing nuclear agreements to provide nuclear weapons systems to countries abroad, some of which are not too reliable. I do not believe that is in the best interests of the United States. Therefore, if not so much money was available, we would be more selective as to how it would be used, and we would do much more good with it. Furthermore, the Committee on Foreign Affairs did not have an opportunity to examine the military portion in detail this year because of the nature of the vote on the legislation.

Mr. CURTIS of Massachusetts. Mr. Chairman, will the gentleman yield?

Mr. MEYER. I do not have time; I have only 3 minutes.

Therefore, this much money should not have been authorized. By it I mean the $2 billion figure, or even $1,800 million. Therefore, I am opposed to the amendment.

I now yield to the gentleman from Massachusetts.

Mr. CURTIS of Massachusetts. Is it not a fact that the Foreign Affairs Committee examined the military assistance program in detail this year?

Mr. MEYER. Not the way it did last year.

Mr. CURTIS of Massachusetts. I beg to differ with the gentleman.

Mr. MEYER. I yield back the balance of my time.

The CHAIRMAN. The gentleman from California [Mr. CLEM MILLER] is recognized.

Mr. CLEM MILLER. Mr. Chairman, I take this time to ask a question that has not been covered thus far in the debate. I address the question primarily to the gentleman from Arizona [Mr. RHODES] because he came the closest to touching the subject, one which in my opinion is of very great consequence.

In all the debate yesterday and today on this military assistance program not a word has been said on the floor about the basic justification for it. My question deals particularly with the underdeveloped countries of South America and southeast Asia. Some say that we are actually hurting these countries and our own military position rather than the contrary. How do we justify this military assistance program with respect to those countries? How do we answer the allegation that the military assistance we give to many of these countries is destructive of our own best interest?

Mr. RHODES of Arizona. Mr. Chairman, will the gentleman yield?

Mr. CLEM MILLER. I yield.

Mr. RHODES of Arizona. I regret the opportunity of not being able to explain it due to security limitations, but those are just the facts of life.

The gentleman has asked a good question and I am sure he can find the answer in the volumes at the committee desk.

Mr. CLEM MILLER. I think this is a thing which should be discussed on the floor of the House. We have had yards of figures and statistics, all begging the basic question of why we should support this program at all. I feel the Members are entitled to some justification before we are asked to vote, and fail to understand why it cannot be done in terms which do not offend security limitations.

The CHAIRMAN. The gentleman from Illinois [Mr. PUCINSKI], is recognized.

Mr. PUCINSKI. Mr. Chairman, I ask unanimous consent to revise and extend my remarks and include a letter.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. PUCINSKI. Mr. Chairman, I have taken this time to ask the chairman of the subcommittee a question. I recently received the following letter from the Helene Curtis Industries, Inc., which, while it is not in my district, being only a few blocks away, employs many of the people who do live in my congressional district:

DEAR SIR: The Associated Press this week carried a release indicating that the Arab League has banned Helene Curtis merchandise from distribution in those countries. This action is based entirely on the refusal of Helene Curtis to terminate its business activity in Israel.

We believe this action represents a situation that is of sufficient importance to be brought to your attention and weighed in the consideration of actions and activities of our Government in its relation with the Arab League countries.

The economic effect is of little importance in this instance inasmuch as the Arab League countries represent less than one-half of 1 percent of Helene Curtis foreign business. In contrast, many times that amount of business is effected by Helene Curtis in Israel alone. However, the principle involved here is vitally important.

The documents attached are photo copies of correspondence in our files and reflect an arbitrarily menacing, discriminating procedure on the part of the Arab League. We recognize full well the sovereign rights of these and other countries to handle their internal affairs as they see fit; however, the matter becomes more pertinent and immediate when such action is taken by countries which are now receiving aid from the United States and expect to receive further aid in the future. Helene Curtis, through its payment of taxes to the U.S. Government, is, therefore, aiding these countries to specifically discriminate against its ability to engage competitively in foreign commerce.

The file of letters attached represents correspondence with our distributor in Amman, Jordan, and has been repeated with our distributors in Beirut, Lebanon, and Cairo, Egypt, as well. Accordingly, we are, effective as of this date, removed from any opportunity to engage in business in the Arab League countries. We, obviously, have not the slightest intention of severing our business relations with our representatives in Israel.

We respectfully request and urge that a strong protest be made to the Arab League countries to the end that this discriminating action is lifted and our orderly conduct of business can continue in those countries. Your early attention and reply will be appreciated.

Very truly yours,
HELENE CURTIS INDUSTRIES, INC.,
GEORGE M. FACTOR, *Vice President.*

I should like to ask the chairman whether or not in this appropriation there is American financial assistance in any form to the Arab League.

Mr. PASSMAN. The answer is "Yes."

Mr. PUCINSKI. That being true, Mr. Chairman, it seems to me that there is something tragically incongruous when we permit a recipient of our generosity to retaliate against an American firm, an American manufacturer employing American citizens, because this American firm happens to do business with Israel.

I have asked the State Department to protest this unprovoked discrimination against an American manufacturer by the Arab League. It is inconceivable to me that we Americans can tolerate this conduct by the Arab League. If we fail to protest this conduct and silently accept such conduct by the Arab League, we are laying the foundation for a principle in international trade which ultimately could have devastating effects. Israel is one of our most reliable allies. If the principle of boycotting American firms because they do business with Israel—or with any other country for that matter—is permitted to continue, we are condoning a practice which eventually can destroy the entire structure of international trade. I hope the State Department will protest this completely unjustified practice by the Arab League. Otherwise, we should give serious consideration whether we want to continue economic or military assistance under the type of legislation we are considering today to nations which so brazenly discriminate against American manufacturers whose tax money constitutes a considerable part of the funds in our mutual security program.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

The gentleman from Minnesota [Mr. JUDD] is recognized.

Mr. JUDD. Mr. Chairman, I am sure that each person's vote on an amendment like this depends, first, on his own estimate of the seriousness of the world situation we face; and, secondly, on his estimate of who knows most about the situation and what is necessary to meet it successfully. In short, whose judgment is likely to be soundest? Whose advice are we to take?

We recently passed the Defense Department appropriation bill and we were assured here that the amount in it was adequate for our own Armed Forces. I understand that in view of recent events in the world the appropriate committee in the other body has increased our amount by a little over a billion dollars.

Our own Chiefs of Staff who are administering the military assistance program say that it is just as essential to our security as are our own Armed Forces. Yet, just when the other body increases

our estimates for our own forces by more than $1 billion, we are here being urged to make a cut of $400 million in appropriations for military assistance.

Now, am I to take the judgment and advice of Members of Congress however sincere, dedicated, devoted, and conscientious they may be, or am I going to take the advice, especially in this time of crisis, of those who are charged with our defense, and who know most about it? When they tell us this is just as essential to our security as are the appropriations for our own Armed Forces, I for one am going to take their advice. I am not willing to take responsibility for weakening my country's defenses.

We have heard today a lot about waste. We have considered this whole important and difficult question in the Foreign Affairs Committee, and we estimated 2 or 3 years ago that all the programs about which there were complaints at that time amounted to less than 4 percent of all the programs under the mutual security program. I wonder how many efforts by any government anywhere have a lower percentage of questionable projects.

The CHAIRMAN. The Chair recognizes the gentleman from Massachusetts [Mr. CURTIS].

Mr. CURTIS of Massachusetts. Mr. Chairman, I should like to take a moment to answer a question that was raised a few minutes ago about the effect on economies of other countries of this military assistance. I do not think it is violating any secret information to say that a major percent of the military assistance goes to countries on the perimeter of the Soviet bloc nations.

Let me mention one other point. We read every day in the papers the criticism that the defense of our country is not being adequately maintained, that further funds are needed. An amendment has received support in the Senate to provide $3 billion in additional funds. It is inconsistent, in my opinion, now to cut down on military assistance when all of the testimony is that military assistance is just as valuable to our own defense as is the money provided for our own Defense Establishment.

Mr. JUDD. Mr. Chairman, will the gentleman yield?

Mr. CURTIS of Massachusetts. I yield to the gentleman from Minnesota.

Mr. JUDD. I thank the gentleman. It was figured out 2 or 3 years ago that all the programs about which there have been complaints of waste and grave mistakes are less than 5 percent of all the programs being carried out. But suppose it is 10 percent of the programs that do not succeed. Let us not forget the 90 percent that succeed. I have never known of a surgeon who could operate without losing some blood. He can avoid such loss of blood only by not operating at all; he will then just lose the patient. It is not possible to carry on a program like this, trying to save a free world, without some waste and without some mistakes being made. We must do our best to hold them to a minimum and this amendment, if adopted, still leaves a cut of 10 percent, as the gentleman from Arizona pointed out. Let us keep our attention on the 90 percent that are succeeding and that are essential to our own defenses.

The CHAIRMAN. The Chair recognizes the gentlewoman from New York [Mrs. KELLY].

Mrs. KELLY. Mr. Chairman, I rise in support of the amendment offered by the gentleman from New York [Mr. TABER]. I cannot stress too emphatically that the failure of this amendment will mean the weakening of the NATO.

I should like to mention the fact that military assistance to NATO countries, including Greece and Turkey in this program, amounts to $740 million. To the European NATO countries alone it would include $459 million, which earmarks for infrastructure $90 million; the weapon development program, $40 million; the international military headquarters, $11 million; weapons production, $39 million; and the science program, $1.2 million.

I do want to say that I feel we are spending too little on the production of conventional weapons. The importance of the manufacture of these weapons by our allies is most important to us.

In this program, Mr. Chairman, may I say that six European nations have agreed to buy about $400 million worth of weapons from the European Producing Agency. This Agency will produce the antiaircraft Hawk and the Sidewinder missiles.

I cannot emphasize enough the fact that there is not sufficient money in this program, there is not enough money in the pipeline, and I hope that every Member will support the amendment offered by the gentleman from New York.

I hesitate to repeat but our military assistance under the bill is an integral part of our national defense.

First. Any reduction in military assistance program falls most heavily in the area most critical to NATO—force improvement and modernization; this means NATO will bear the brunt of the cuts.

(a) Of the $2 billion requested for MAP for fiscal year 1961, approximately one-fourth goes for relatively fixed charges such as infrastructure and international military headquarters. Little can be shaved off in these areas.

(b) Six hundred and fifteen million dollars is planned for force maintenance. Little or no reduction is possible in force maintenance since commonsense dictates that forces which we have equipped and trained at great expense and effort be kept in a good state of repair and readiness.

(c) Any cuts made will therefore be largely from the $865 million for modernizing existing equipment and setting up new units and installations.

Approximately 80 percent of any cut would be taken in this area. Such a cut would proportionately reduce funds for missiles, electronics, modern aircraft and ships, tanks and combat vehicles, construction at missile bases and so on, which are vital to the effectiveness of forces allied with us, especially those of our NATO allies.

The $300 million cut last year resulted in postponement of much essential force modernization in NATO countries.

Second. We recognize that European countries have made a remarkable recovery since the end of the war.

Restoration of a viable economy was the objective of the Marshall plan, and we are most gratified that it has been successful.

Evidence of this is found in the increasing number of countries able to meet their own military requirements and in the increasing contributions European nations are making to aid projects for underdeveloped countries.

Third. This economic progress, however, should not lead us to the false conclusion that European countries are in a position to assume all the costs of modernizing their military establishments.

(a) European countries, despite enormous strides, have to build their defense forces on a much narrower base than does the United States. The average per capita gross national product and level of private consumption is about one-third that of the United States.

(b) Total tax receipts of European NATO countries represent 30.9 percent of gross national product as against 24.9 percent of gross national product in the United States.

(c) Although average defense expenditures in European NATO countries are 5.6 percent of gross national product as against 9.7 percent in the United States, the lower average income and higher tax rates in Europe make the defense burden borne by the average European heavier than that borne by the average American.

Fourth. Despite the foregoing, the United States has urged in NATO forums and bilaterally that European NATO countries assume a larger share of the common defense burden, and they are doing so.

(a) In 1953 the United States was bearing 28 percent of the European defense burden; today we are carrying only 8 percent.

(b) Defense expenditures of European NATO countries rose from $12.2 billion in 1958 to $13.6 billion in 1959, an increase of 11 percent. Present indications are that they will rise to $14.2 billion this year.

The Netherlands has planned a 9-percent increase in its budget for 1961; the United Kingdom has announced a 7.6-percent increase; Belgium and Italy are making increases of 3 and 4 percent, respectively.

Fifth. Even these increases in European defense budgets fall far short of what is required to provide General Norstad with the modern forces and equipment he requires to defend Europe and the United States.

New weapons are fantastically expensive to develop and produce and beyond the means of most of our European NATO partners.

Any cuts in the MAP will dangerously retard the modernization of General Norstad's forces and deprive him of the barest minimum of modern equipment needed in the European area, which is our own forward defense line.

Sixth. The Joint Chiefs of Staff make their strategic plans on the assumption that the United States can count on

effective allied contributions made possible by our military assistance program.

The Joint Chiefs have indicated that they would not want any increase in the U.S. defense budget if this is to be made at the expense of the military assistance program.

It seems clear, then, that it is just as important to vote the full amount of the military assistance program as it is to vote the full amount required for our own Defense Establishment.

The CHAIRMAN. The Chair recognizes the gentleman from Indiana [Mr. ADAIR].

Mr. ADAIR. Mr. Chairman, as we look around the world today and observe the new developments in Cuba, Korea, Turkey, and Japan, we must ask ourselves whether or not this foreign-aid program has been successful. It seems to me that we in the United States have a dual obligation. We have the primary obligation to keep ourselves strong economically and militarily, and we have an obligation, secondly, to provide inspiration, leadership and guidance to those countries throughout the world that need it, require it, and want it.

We too often, in my opinion, seek to solve our problems simply by voting dollars instead of providing the guidance and leadership we ought to provide. Here is such an instance. The amount that has been provided by the committee is adequate if wisely used. Let us, I say, keep ourselves strong here at home and not seek to solve the problems of the world by simply voting additional dollars.

The CHAIRMAN. The Chair recognizes the gentleman from Illinois [Mr. COLLIER].

Mr. COLLIER. Mr. Chairman, the debate on the mutual security appropriations bill makes it eminently clear to me that this program is in need of an agonizing reappraisal, as I have contended repeatedly for the past 4 years. It is most unfortunate that every taxpayer in this country could not have heard the debate which brought forth the findings of committee members who spent countless hours in studying the use of these funds, not only through departmental reports but from their on-the-scene investigations in recipient foreign countries.

There are those who have expressed their ardent support of this program because they feel that its purpose is lofty in ideal and principle. While that may be entirely true, we who are charged with the responsibility of legislating must certainly go to the core of every appropriations bill and exercise the power and authority invested in each of us in remedying waste and inadequacies.

During the years I have had the privilege of serving in the Congress of the United States, evidence of great waste in this program has been presented to each of us. Yet, while we are expected to blindly, perhaps, approve billions in appropriations, we are actually left with no real authority to see that those administering the program are doing the job intended to be done. Neither are we given an opportunity to vote funds for the various phases of the mutual security program on a discriminating basis. Instead, year after year we are presented a bill calling for astronomical sums of funds tightly packaged into a single measure of legislation, embracing military, economic, and technical assistance in round sum figures—and offered on a take-it-or-leave-it basis.

Apparently many of those in charge of administering the program feel that it has become one of the many "sacred cows" which provide Members of Congress with no alternative but to vote the funds or be charged with an attitude of indifference toward our national security. We are obliged, in the name of preserving freedom and democracy, to vote funds for a Communist Yugoslavia and contributing to Communist-dominated Poland. We are told today that our contribution of funds to Japan, for example, must be kept a secret, even from Members of Congress. And there are other areas of assistance which are cloaked in complete secrecy.

I ask you, are we responsible if we legislate the expenditure of tax funds in a bill that is punctuated with blind spots as is this one? Are we responsible if we approve increased expenditures of funds while evidence of waste is right before us?

We were told in years past that we should grant assistance until certain nations were able to build their own economies through a favorable trade balance in the world. Yet we have witnessed in the past year a trade deficit with Japan and a net trade deficit with all of Latin America. And if we exclude the shipment of surplus agricultural commodities last year, we find ourselves with a trade deficit with Europe.

We have evidence that under the military assistance program in one nation we supplied two jet fighter planes for each pilot capable of operating this equipment in that country. Other examples of waste too numerous to mention at this time have been laid before us without dispute, even from the strongest proponents of this program.

National security, even when it is called mutual security, is not a one-way street. It is built upon the foundation of a sound financial system and such programs as can properly justify the faith and the confidence of the American people.

It is no secret that today the United States of America is burdened with a staggering debt which exceeds by billions of dollars the total indebtedness of all of the other nations of the world, including the Soviet Union. It is no secret that today our gold reserves stand at about $19 billion, with demandable securities requiring some $13 billion of this amount. Our foreign dollar credits stand at approximately $18 billion. Hence, if they should decide to call the gold for these dollar credits, which they certainly could do, the value of our dollar could become all but worthless.

The present mutual security program employs 44,000 people, plus 10,000 trainees scattered across 77 nations of the world. In view of the record, who is prepared to believe that a reappraisal of this personnel would not result in savings of the American tax dollar without reducing the effectiveness of the program?

There are those among us who apparently feel that it is their responsibility to simply approve the appropriations requested and trust that the waste and inefficiency will be cured by time and understanding. Is it not true that certain of those administering the program testified that they had not bothered to give any particular consideration to the recommendations of the Committee on Appropriations, where such recommendations were directed to a more efficient procedure or limitations on the spending? Certainly we cannot assume that Congress should not have some authority or control of any funds which it is obliged to approve, nor can we assume that this program has sprawled in so many areas that there are points of no return. It is not for me to question the judgment of those who feel that we must go on with this program as we have in the past for an indefinite period. Neither is it for me to question their judgment as to whether the future will disparingly prove that this program was a noble effort which failed to accomplish its purposes, or whether it will enhance any desire on the part of our allies to seek out a free way of life or, for that matter, to even keep some of the neutral nations status quo in this cold war.

Instead, I contend from my personal viewpoint that, unless we do meet the problem squarely, we can look for little more than its ultimate collapse under its own weight. The decision that must be made, particularly at a time like this, demands a great deal of soul-searching. Yet it does not relieve those who share the same deep reservations as I of our task of being practical and responsible legislators.

The CHAIRMAN. The Chair recognizes the gentleman from Wyoming [Mr. THOMSON].

Mr. THOMSON of Wyoming. Mr. Chairman, I rise in support of this amendment to restore these funds to the military assistance program. Failure to restore them would, in my opinion, be contrary to the best interests and the security of the United States.

As a member of the Defense Subcommittee of the House Appropriations Committee, I am particularly aware of the importance to our overall defense program of the forces that would be affected by this cut. I am convinced that these cuts, if not restored, would seriously weaken the defenses of this country and of the free world. The President and all of our military leaders whom I have heard testify or with whom I have discussed this are of this opinion. Under these circumstances and with world conditions as they are today, I support the amendment to restore these military assistance funds.

With these forces being an important portion of our defense program, they must be maintained at adequate strength and equipped with modern weapons so that they can make a full contribution of our overall deterrent. As has been pointed out by members of the subcommittee which considered this bill, this cut

in appropriations goes too deep and unless restored, would have serious consequences. Without these funds, some of our allies who have proven themselves to be most effective cannot possibly maintain their forces at anticipated levels. Many of these countries have common borders with the Sino-Soviet bloc. Furthermore, the cuts, if allowed to stand, would seriously impair the effectiveness of the NATO alliance. This would be particularly serious because it would deny to these forces the modern weapons essential for a maximum contribution to providing the necessary deterrent. The testimony clearly indicates that the funds eliminated must necessarily be taken from funds to provide to NATO missiles, electronic equipment, and other modern weapons.

Under these circumstances, I support the restoration of the funds as provided in this amendment.

I have consistently and vigorously objected to the inclusion of both military assistance and foreign economic aid in the same legislation. That they are considered together again this year presents an even more difficult situation and one which, in my opinion, is unfair to the membership of the House. This confuses the issue and denies to many of the Members of the House, including myself, the opportunity to vote our true convictions.

I have consistently supported the military assistance program, and will continue to do so as long as it is kept on a sound basis.

In spite of my support for military assistance, I have consistently voted against this appropriation because of my strong objections to a major part of the foreign economic aid portion of the bill. I am fully aware of our obligations as a leader of the free world, particularly as far as assisting the underdeveloped nations. To accomplish our objectives, however, and in fairness to the American taxpayer, any assistance should be placed on a sound loan basis. We cannot expect to run a welfare program for the world.

The present program builds bureaucracy at its worst.

Rather than this, countries desiring assistance should send their Ben Franklins to us. We should carefully examine the proposals to know that they are sound and will accomplish their objectives. The program should be designed to encourage these countries to stand with us, rather than to continue to lean on us.

Furthermore, a sound foreign trade policy must be developed as a condition precedent. In fairness to American laboring men, businessmen and farmers, we cannot continue to permit their taxpayers' dollars to be used to build production facilities abroad, and the products thereof to be exported to this country in unlimited quantities. To permit this further detracts from the accomplishment of our objectives. These products are needed in those countries to raise their standard of living. What we are trying to do is to raise the standard of living of these countries, not to lower our own.

I believe that further cuts should have been made in some of the nonmilitary programs. Others, I believe, should be entirely eliminated. The whole program should be reoriented. The bill will pass. To voice my protest and convictions on the foreign economic aid, I will vote against it on final passage. I will support amendments to cut these programs.

I do, however, believe that the military assistance funds should be restored as proposed in this amendment, and I urge its adoption.

The CHAIRMAN. The chair recognizes the gentleman from New York [Mr. DORN].

Mr. DORN of New York. Mr. Chairman, I support this amendment because I believe it is in the best interests of the security of our country.

Surely there is not one among us who is not fully aware of the tenor of the world situation as it is today. If anything more were needed to convince us of the necessity of adequate military assistance to our friends, we need only examine the events of the past month. Rather than cut our expenditures for defense we should increase them. I submit that military assistance is not an altruistic move on the part of the United States, but rather one which is designed to make more secure our own self-defense. As we are able to give to our friends an increased sense of stability and self-protection, so also will we be increasing our own protection and strengthening the entire free world in their effort to achieve world peace.

The President of the United States has dedicated himself and his administration to doing as much as is humanly possible to achieve a peaceful world. The President is also well versed in what is necessary in the way of military strength to maintain peace. I believe the record will show conclusively that the President is also economy minded. It is for these reasons that I believe he has requested the least possible amount which would be commensurate with our national economy, to achieve the most in the way of national defense.

It has been brought up that one of the reasons for the cutback on the President's request is the size of the unexpended balances of previous years. Yet the military cannot develop new arms, new defenses and new methods and provide these modern armaments to our friends in a matter of 2 weeks, or 2 years. The very logistics of the situation demand that the military remain unshackeled in its ability to do this. No men have been better trained in the knowledge and the needs of armed forces for the protection of our own country and of the free world than those who have dedicated their services to the military forces.

So I say to you, in the name of national defense, world defense, and our peace of mind, we should adopt this amendment.

The CHAIRMAN. The Chair recognizes the gentleman from New Jersey [Mr. CANFIELD].

Mr. CANFIELD. Mr. Chairman, millions of free people at home and abroad and millions of others who yearn to be free in Soviet-dominated lands are concerned about what we do here in this Chamber today.

Deeply concerned here at home, of course, are our President and Commander in Chief, the Joint Chiefs of Staff, our Supreme Allied Commander in Europe, America's industrial leaders, those who head the AFL–CIO representing our workingmen, our veterans and patriotic organizations, women's clubs and voters leagues, who have spoken out most strongly for restoration of cuts in the programs.

I am retiring next January after many years of service in the Congress. I am not running for reelection. But if I were, I would be doubly anxious to vote right in this hour and I shall tell you why.

The state of the world is such that we cannot gamble and there is still fresh in my mind that day right here on this floor 3 years ago when we had up for debate and vote the defense appropriation bill which had been cut $2 billion by the House Appropriations Committee. Projecting the bill on the floor, members of the committee boasted that every phase of the military program in the bill had been cut, including missiles.

I was among those who protested in committee and on the floor and I was permitted to make the recommittal motion calling for partial restoration of the extraordinary slash. The motion was defeated in a record vote and the bill was passed.

What happened? The aftermath was both revealing and startling. Within a few months the Russian sputnik hit the skies and you will never know the number of Members who rushed to the records to check on their votes on the defense appropriation bill.

No one can deny that there has been maladministration and waste in the mutual security programs and in this respect committees of the Congress failing to pursue proper policing of expenditures are partly responsible. Furthermore, the charge made by the distinguished chairman of the subcommittee that the larger programs embraced in the bill never had the "best kind of administrators" can be well supported. Most certainly the answer is not to kill the programs.

The CHAIRMAN. The Chair recognizes the gentleman from New Jersey [Mr. GALLAGHER].

Mr. COFFIN. Mr. Chairman, will the gentleman yield?

Mr. GALLAGHER. I yield to the gentleman from Maine.

Mr. COFFIN. Before the gentleman begins, may I just urge my colleagues on our side of the aisle that under the circumstances that face us today, if they are in doubt as to this particular item, the course of prudence is to err on the side of caution.

I cannot stress too strongly the necessity to back this limited restoration of this part of the program.

Mr. GALLAGHER. Mr. Chairman, I should like to point out that responsibility for the passage of this bill is ours and not that of the other body. I rise in

support of the amendment, and should like to refer to the reasons that have been cited here today, including events in Japan, as reasons to abandon the program. They are reasons for us to rededicate ourselves to the program so as not to play into the hands of the people who caused these events in Japan.

I hope that we will recognize our own position and be responsive to the national purpose, as the opponents of the program have suggested. The national purpose is to recognize our responsibilities and obligations. Certainly we must rely on our Government, the people in our Government who have provided us with the facts. And, I might say, as a member of the Committee on Foreign Affairs, that we have been awakened to our needs. I sincerely urge the passage of this amendment.

The CHAIRMAN. The Chair recognizes the gentleman from Washington [Mr. HORAN].

Mr. HORAN. Mr. Chairman, I was one of those who voted against this amendment when it was offered in the full committee last Friday. I was against it because I thought there was too much waste and there were too many unnecessary projects in this program. I trust that this debate which I think has been intelligent and has shown sincerity on both sides, will serve notice on the administration of this program that they must clean up those places that need to be cleaned up.

Mr. Chairman, the events of the weekend and the current situation have caused me to change my mind and I will vote for this amendment simply because I think that the administration, not the Congress, has the great responsibility that exists in the world right now. I would be remiss in my obligations as an American if I took any tools from the hands of those who have the great responsibility in this year of our Lord, 1960.

The CHAIRMAN. The Chair recognizes the gentleman from Massachusetts [Mr. CONTE].

Mr. FORD. Mr. Chairman, I ask unanimous consent that the gentleman from New York [Mr. TABER] and I may yield our time to the gentleman from Massachusetts [Mr. CONTE].

The CHAIRMAN. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. CONTE. Mr. Chairman, I rise in support of the amendment to the military assistance program. As the gentleman from Michigan [Mr. FORD] so ably brought forth yesterday, the pipeline of the military assistance program in the last 7 years has gone down from $8 billion to an unexpended balance of $2 billion at the present time. We are scraping the bottom of the barrel, and at these times of world tension and unrest the military assistance pipeline has reached a most dangerous low level.

Mr. Dillon, in answer to a question propounded by the chairman of our subcommittee, page 179 of the mutual security appropriations hearings for 1961 stated:

> It costs us about $1.2 billion, something in that neighborhood, merely to maintain the forces that are presently in the field, such as the Korean forces, so if you were to cut sharply below that level it would mean that these forces would have to be disbanded and that would certainly sharply impair our national security position.
>
> Any cut between roughly the $2 billion level and the $1.3 billion level would come out of modernization.

Mr. Chairman, Gen. Lauris Norstad, supreme allied commander, European Department of Defense, concurred in these statements made by Secretary Dillon. General Norstad, in answer to a question on whether our military assistance has paid dividends in Europe, said on page 515 of same hearings, "in 1951, the question was not whether there will be a war. The question then was what month of this year will the war start? I would like to point out that in 1960 no one in his right mind asks that question. This is a tremendous change. This change can be credited to the fact that we have faced up to the Soviets, we have shown our determination to resist them, and then we have systematically created some reasonable strength with which to confront them. This has given substance to our words, so this has meant in my judgment a better place to live in at least for 10 years, an increasingly better place to live in for 10 years. It has contributed to the prevention of war in that period, and it continues to be necessary for those same reasons."

Mr. Chairman, because of my deep concern over the $400 million cut in the military assistance program, I wired General Norstad in Paris last Friday morning and asked him what effect the $400 million cut would have on the military assistance program in NATO. I would like to read General Norstad's answer which I received Monday morning:

> Conclusions in your wire essentially correct. Since any significant reduction in funds available for the maintenance of required forces would soon be reflected in the loss of some part of those forces as effective combat elements, nearly all of cut would have to come from force improvements. On a straight percentage basis, our computations indicate that a 20 percent cut in fiscal year 1961 worldwide MAP would result in reducing funds available to NATO for force improvement by $235 million.
>
> To effect a cut of such magnitude on the NATO program would mean an approximate 50 percent reduction in all modernization proposed in the fiscal year 1961 MAP, primarily aircraft, missile systems, and advance weapons. Of the $271 million remaining for force improvement, approximately one-half is required to support previous U.S. Government commitments for the Nike, Honest John, and other advanced weapons systems and, in addition, certain advanced naval weapons, all required to strengthen NATO defense. The balance of $136 million would have to be redistributed to support the other force improvement requirements which under the fiscal year 1961 MAP require $371 million. This would mean that serious cuts would have to be made in electronic ground environment for NATO air defense, advanced aircraft, other modern aircraft, missile systems, and other modernization.
>
> During my appearance before congressional committees in March of this year, I emphasized my belief in the principle that our NATO allies should contribute their fair share to the common defense effort. Those NATO countries that have the ability are assuming—I repeat, they are assuming—a larger share of the common defense responsibilities. On the other hand it was emphasized—and I repeat now, it was emphasized—that the United States must continue to provide a major contribution to the provision of necessary advanced weapons and to force improvement. In this connection, a fact to be remembered is that almost all of this modern equipment comes from American production.
>
> Without the weapons systems, without the other force improvements proposed in the fiscal year 1961 MAP now being considered by the Congress, increasing obsolescence will mean that we cannot even maintain the level of strength and effectiveness which obtains today. Considered in the context of our times, surely our policy must be one of maintaining a sound and strong defense posture. To this posture, NATO makes a most essential contribution.
>
> With warm regards.
>
> Sincerely,
>
> LAURIS NORSTAD.

I believe we would do well to pay heed to General Norstad's advice. I am sure that all will agree that General Norstad is in a position to know the problems confronting the United States and the other NATO countries. I trust that this House will see the wisdom of at least partially restoring the cuts to the military assistance program.

The CHAIRMAN. The Chair recognizes the gentleman from Illinois [Mr. ARENDS].

Mrs. CHURCH. Mr. Chairman, will the gentleman yield?

Mr. ARENDS. I yield to the gentlewoman from Illinois.

Mrs. CHURCH. May I say to the gentleman, even though I am a strong and honest critic of the program, that I certainly would not take the responsibility of risking the security of this country at this time, through what might in emergency prove to be inadequate military assistance to our allies. I shall vote for the amendment.

Mr. ARENDS. I thank the gentlewoman from Illinois very much.

Mr. Chairman, just recently this House passed an appropriation bill for national defense of approximately $39.5 billion. Since that time by Senate action this appropriation has been increased at least $2 or $3 billions. No Member hesitated in any way to vote for these funds for the defense of this country. The item here today involves $200 million compared with $40 billion in the Defense Department appropriation bill. We are here debating whether we are going to take the chance of shortchanging NATO and others of our allies who need this military help. In passing the Defense Department appropriation bill we put our faith in whom? The Secretary of Defense, the Joint Chiefs of Staff, and in the man in the White House. I would just like to remind the membership of this House that here again we should place our confidence in the same individuals we did when we voted on the $40 billion for national defense.

As our fine Secretary of Defense has so ably stated it:

> In spending military assistance funds, it is necessary first to maintain existing allied forces in good working order and conserve the investment already made. Therefore the proposed reduction must come from cutting

down on force improvement, that is, postponing indefinitely the newer weapons. Eighty percent of any cut below the budget request must be absorbed in equipment for force improvement, which includes missiles, electronic equipment, modern aircraft and ships, modernized tanks and combat vehicles, and the like.

The impact of the proposed cuts would fall most heavily on NATO, which also bore the greatest weight of last year's appropriation cut.

The CHAIRMAN. The Chair recognizes the gentleman from Arizona [Mr. RHODES].

Mr. RHODES of Arizona. Mr. Chairman, this, again, is the military assistance bill. This is the part of the bill which buys the hardware for our allies around the world. The gentleman from New York [Mr. TABER] has said this is the most important part of the bill, and I do not think there is any doubt about it. I am not one to yield to other people my prerogative of decision as a Member of the House. However, all we can do in considering this type of legislation is to look at the best opinion we have available. I merely want to read a part of this communication from Secretary of Defense Gates. It is dated June 15, 1960. In this communication, he states as follows:

The Joint Chiefs of Staff all stated that they would not take one dollar away from the military assistance program in order to augment the funds for their own services. Military assistance is just as much a part of our own national defense as are the appropriations for our Army, Navy, Air Force, Central Intelligence Agency, and the Atomic Energy Commission.

Mr. Chairman, I ask that this amendment be adopted.

Mr. BOLAND. Mr. Chairman, I rise in support of amendments to restore cuts in the mutual security appropriation bill, that will be offered by the distinguished ranking minority member of the Appropriations Committee, the gentleman from New York [Mr. TABER], and the gentleman from Michigan [Mr. FORD]. I will also support the amendment of my colleague, the gentleman from Illinois [Mr. YATES], to strike from this bill the prohibition of U.S. contribution to the Indus River Basin project.

SUPPORTS TABER AMENDMENT

The Taber amendment would restore $200 million for military assistance. The bill recommends $1.6 billion, a reduction of $400 million below President Eisenhower's request of $2 billion. Military assistance is an essential part of the American national defense program. A $400 million cut will fall with the most damaging effect on one of the greatest needs of our common defense program: the modernization of equipment of our major allies, particularly in NATO, but also in the Far East. If we do not restore these funds we will lose ground already gained with great expense and effort in building up the strength of our allies. We will also be compelled to reduce modernization programs. The money is needed to supply allied forces with advanced weapons, missiles, electronic equipment, high performance airplanes and ships, tanks and combat vehicles. Most of this materiel is of such an advanced nature that only the United States can supply it. Our allies are not equipped to make it themselves.

SUPPORTS FORD AMENDMENT

Mr. Chairman, the Ford amendment would restore $50 million for defense support. The bill appropriates $600 million, a reduction of $75 million below the $675 million authorization and of $124 million below President Eisenhower's request of $724 million.

The President pointed out in his telegram of June 11 to congressional leaders that if this cut is not restored we, the United States, would have to reduce all along the line the strength of the defense maintained by our allies in our common interest, or in order to maintain full strength in some countries, we will have to abandon or seriously limit our help to some countries. In view of the stepped-up Communist pressures throughout the world since the collapse of the summit conference at Paris, either of these courses could be disastrous for the United States and its allies.

The Ford amendment asks that $50 million be restored. This $650 million defense support appropriation would make it possible for 12 of our allies to maintain the strong military forces we want them to maintain and for which we provide them with military assistance. It will also make it possible for these nations to have the strength and courage to make available to the U.S. bases of critical importance to our Strategic Air Command, our naval forces, and our military power generally.

The importance of these countries is apparent from a glance at their locations on the map. These nations—Greece, Turkey, Iran, Pakistan, Thailand, Laos, Cambodia, Vietnam, the Philippines, the Republic of China—Formosa, and the Republic of Korea—are on the very borders of the Soviet Union and Red China. Together they provide nearly 3 million armed forces. They are in the most dangerous positions of all our allies.

The 12th nation, Spain, a little more distant from Communist power, helps the United States in the vital role of providing us with most important air bases and naval bases. In addition, the United States has significant bases in Turkey, Greece, Korea, and the Philippines. The restoration $50 million in defense support funds is all that the Ford amendment asks. This is a minimum request and the Members should support the amendment. We all heard our colleague, Mr. RHODES of Arizona, give an eloquent, precise and lucid explanation of the necessity for this program during debate yesterday. He is to be commended for his efforts.

SUPPORTS INDUS RIVER BASIN PROJECT

Mr. Chairman, section 107 of the bill prohibits the use of funds appropriated therein for the development of the Indus Basin. I sincerely hope that the Yates amendment to remove this prohibition prevails. The provision of funds for this purpose would not only serve to contribute in a major way to the economic development of the vast subcontinent of Asia, but would also contribute materially to the improvement of relations between India and Pakistan. Only the Soviet Union and Red China could benefit from failure of India and Pakistan to settle their disputes. With this Indus River Basin settlement plan the United States is in a position to make a major contribution to world peace, to strengthen the Western orientation of nearly 500 million people and to secure the participation of other industrialized nations in the financing of the costs.

The CHAIRMAN. The Chair recognizes the gentleman from Virginia [Mr. GARY].

Mr. GARY. Mr. Chairman, I ask unanimous consent to yield my time to the chairman of the subcommittee, the gentleman from Louisiana [Mr. PASSMAN].

The CHAIRMAN. Without objection, it is so ordered.

There was no objection.

The CHAIRMAN. The Chair recognizes the gentleman from Louisiana [Mr. PASSMAN] to close debate on the pending amendment.

Mr. PASSMAN. Mr. Chairman, I am not going to debate the amendment. I merely want to use this time to thank the Members for their tolerance and to assure you again that there are not only adequate funds provided, but there are funds in excess of the needs in the amount which your committee has recommended to you.

What we are experiencing today is no different than what we have experienced in the past 5 years, during which time I have had the honor of serving as chairman of the subcommittee. You have supported us in the past. Our recommendations have been sound and they have stood up.

I have stayed completely away from dealing with personalities in this debate, and I have no right to take offense because the policy committee of my friends on the other side of the aisle has a peculiar effect upon some of those who have opposed the program in its entirety in the past, but who are now supporting the proposals for increasing the funds. That is their privilege. However, so far as I, personally, am concerned, I am not going to be swayed by pressure from any point, either by the leadership or by the White House. I am going to form my opinions solely upon the basis of the facts and supporting statistics.

Now, I want to repeat for emphasis—not only has the committee recommended adequate funds, but there are excess funds. And, if you will support the committee, I say again to the Members that you will not be disappointed. When we return next year, we will be able to show you again that the committee—the subcommittee and the full committee—can be relied upon to make sound recommendations.

I thank you again for your tolerance. We have had a long session.

The CHAIRMAN. The time of the gentleman from Louisiana has expired.

The question is on the amendment offered by the gentleman from New York [Mr. TABER].

Mr. FULTON. Mr. Chairman, I ask for a division.

Mr. PASSMAN. Mr. Chairman, I ask for a division.

Mr. TABER. Mr. Chairman, I ask for a teller vote.

Tellers were ordered, and the chairman appointed as tellers Mr. PASSMAN and Mr. TABER.

The committee divided and the tellers reported that there were—ayes 170, noes 114.

So the amendment was agreed to.

The Clerk read as follows:

ECONOMIC ASSISTANCE

Defense support: For assistance authorized by section 131(b), $600,000,000.

Mr. FORD. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. FORD: On page 2, line 18, strike out "$600,000,000" and insert in lieu thereof "$650,000,000."

Mr. FORD. Mr. Chairman, this amendment goes hand in glove with the amendment which was just overwhelmingly, approved by the Committee of the Whole. May I suggest that those who want a full and I think a brilliant defense of this amendment read the statement made by my colleague, the gentleman from Arizona [Mr. RHODES], on this matter yesterday. I refer you to pages 12929 and 12930. This, in my opinion, is a very excellent presentation of the need and necessity for this extra $50 million in this account.

At the outset I indicated this amendment goes hand in glove with the amendment we just approved.

Defense support provides economic assistance and budgetary assistance for 11 countries that are on the immediate periphery of the Soviet Union, plus 1 other country, Spain, where we have today 2 highly important Air Force bases and 1 vital Navy installation. This defense support program helps to provide over 600,000 Formosan or Taiwanese military forces, it assists in the implementation of the South Korea military organization, providing something like 600,000 active duty South Koreans. It also goes to support the military forces that are part of NATO in Turkey and in Greece. In other words, this defense support program to a very substantial degree assists us in providing the necessary deterrent to keep the Soviet Union and Red China from undertaking any aggressive action in a military way.

In contrast to the program that we just discussed, military assistance, where we have had an increase in fiscal 1961 over previous fiscal years in defense support, actually the defense support program is going downward. This tends to reflect that the economies of these 12 countries are improving; that they are better able to handle their own economic responsibilities.

I say to you with conviction that this figure of $600 million that appears in the bill is too low. It is $124 million less than the President requested and it is $75 million less than the authorization figure which we enacted into law very recently.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. FORD. I yield to the gentleman from Illinois.

Mr. YATES. I should like to say to the gentleman that I agree thoroughly with his position. I supported the amendment in committee and I shall support it on the floor.

Mr. FORD. I wish to thank the gentleman from Illinois. He has been most helpful in the committee and on the floor.

Mr. Chairman, I believe that this is just as important as military assistance, because if these 12 countries that are right up against the guns, so to speak, are not able to keep their troops in the field—and they cannot unless they have defense support—the whole free world military position is weakened. This additional money for defense support is absolutely essential if we are to keep these forces ready for action. We provide military equipment for them in the military assistance account. It seems that in these limited number of countries we should likewise make contributions to their economy to permit them to sustain their economy for the benefit of their forces, their defense, and our mutual security.

May I add this? In 1957 this defense support program totaled $1,161,700,000. Even if my amendment is approved, taking the figure to $650 million for fiscal 1961, we find that the program from 1957 to 1961 will have gone down $500 million.

Mr. Chairman, I strongly urge that this amendment be approved.

Mr. PASSMAN. Mr. Chairman, I rise in opposition to the amendment.

This item carries the label "Defense support." However, it is purely and simply economic aid, nothing less, nothing more.

I respectfully refer you to page 2206 of the hearings for a listing of the types of projects being carried on as defense support in other nations, the same type of projects which are being denied in our own country practically every time a bill which would provide them goes to the White House.

Under the recommendation of the committee $1,358,601,000 will be available in the "Defense support" item.

In many instances in the past, they have placed funds in this economic aid program behind some type of an obligation and at a subsequent date, after we had adjourned sine die and returned home, they have then deobligated the funds and tried to find a more justified project. These deobligations for 1956 to 1960, inclusive, amounted to $449,146,000.

The Department has been unable to justify the amount of money requested for this category. As an example of what they do, I refer you to page 2239 of the hearings, from which I quote:

Mr. GARY. Page 89 indicates you are proposing to set aside up to ——— as a cushion for China's needs for foreign exchange. * * *

Mr. PASSMAN. As a token of our earnestness.

Mr. ROSEMAN. Yes.

This is the account under which they built the road in Vietnam, the cost of which they justified at $18,300,000, but for which there were additional contracts that brought the cost up to $129,900,000.

If it is the desire of the House to support a program of this type, and especially for many unjustified projects then I have no alternative but to continue to do the best I can, year in and year out, to point out some of the weaknesses.

But I think I should say here, too, that all of the nations receiving aid under defense support may also receive aid under the Contingency Fund; they may also receive aid from the special assistance fund; they may also receive aid from Public Law 480; they may also receive aid from the Development Loan Fund.

They are eligible to get economic aid under every category in the bill.

Mr. Chairman, I assure you that this year, as in previous years, your committee has recommended sufficient funds to fully support this program, even at the extravagant basis upon which they are operating.

Mr. CONTE. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, reductions in defense support have been made in recent years. The committee bill proposes a figure only slightly over half the appropriation 4 years ago. The Executive has reported real possibilities of further reduction or elimination of many present defense support country programs in the next 5 years.

But we have been cautioned and must always remember that these reductions have been made possible by progress on reconstruction in Korea and Vietnam, by economic productive growth in many countries, by improving administration and tax collection by a number. We cannot for one minute let this record of progressive reduction delude us into thinking that the potential threat has lessened. There have been two constant factors underlying defense support—the character of the Sino-Soviet bloc and the map of the world. Let us look at these two.

The character of the bloc, despite zigs and zags of their talking line, has demonstrated itself in action as being one of constant readiness to exploit with force real or fancied weakness at any point around its perimeter. The record reads: Eastern Europe at the end of World War II; Iran, 1946; China to 1949; Greece, 1947; Berlin, 1949; Korea, 1950; Indochina, 1950–54; Taiwan Straits, 1958 to date; Tibet, 1959 to date; Laos, 1959; Berlin, again 1959; and these are only the highlights.

Looking now at the map, first pinpoint some of these same trouble spots—China, Iran, Greece, Korea, Indochina, Taiwan, Tibet, Laos. All are on the perimeter of the bloc and in or adjacent to countries receiving defense support assistance.

The 12 countries have and still need defense support because of their economic incapacity to support the more than 3 million men unaided, because of the ever-ready probing character of the bloc and because of the map, because they generally are exposed. Again the map demonstrates—Korea, Taiwan, Philippines, Vietnam, Cambodia, Laos,

Thailand, Pakistan, Iran, Turkey, Greece. Spain is not exposed in the same fashion but has its obvious strategic importance.

I do not expect the character of the Soviet bloc to change overnight. I do not look for changes in the map. Therefore I urge adequate defense support to buoy up these burdened nations as they grow progressively more able to support themselves.

Mr. TABER. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from New York.

Mr. TABER. Mr. Chairman, I feel that I must support this amendment. It provides for the maintenance of these armies in the field that otherwise we would not have, and we need them very badly.

Mr. HALLECK. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I am glad to yield to the distinguished minority leader.

Mr. HALLECK. When I addressed the committee a short time ago in connection with the other amendment I took occasion to refer to this amendment in these words:

> To that end, I intend to support, and I urge your support for, the restoration of a substantial portion of the funds cut in committee, first, for military assistance and second, for defense support.

Then I referred to certain other amendments, but I would want it completely understood that I agree with the gentleman from Michigan when he says that defense support goes hand in glove with military assistance. Without defense support the military assistance aid we give in many places would not really be worth very much. I hope the amendment is adopted.

Mr. CONTE. I, too, Mr. Chairman, hope that the amendment is adopted.

Mr. WHITTEN. Mr. Chairman, for many years we have tried to point out many defects in the foreign aid program, not only in the handling of the program but in the overall effect in other fields.

In foreign aid, although the money returns here to add to domestic supply, the goods go overseas and with no goods to offset such funds, foreign aid is almost 100 percent inflationary. Because of the inflationary results, we see our money losing its value at a rapid rate in terms of goods it will buy. Because of inflation, our defense dollar buys about 5 percent less each year.

Because of what you give to foreign countries, it is next to impossible to hold down Federal salaries or Federal expenditures on domestic programs.

Mr. Chairman for years, our so-called military aid program has to a large degree served as an outlet for our Defense Department's excessive buying and actual waste. Where the cost is charged up to foreign aid rather than to the Defense Department, there is less pressure to hold defense spending to real defense needs.

For years our Nation has been literally going over the world asking nations to take our aid, both military and economic, with the hope, but without any real assurance in many cases, that it would in the final analysis be used on our side.

Companies have been organized and gotten rich doing this business for us, frequently without any real investment on their part. Competing businesses have been set up, whose output is now doing real damage to American industry and employment.

The real reason, in my opinion, why we cannot get together and write a sound farm program is because foreign aid, Public Law 480, prevents people from facing up to reality.

Mr. Chairman, last year, I tried to get a thorough investigation of this program. I failed. My motion was as follows:

> The committee directs its investigating staff under the direction of the chairman and the subcommittee to make a thorough investigation of all phases of the mutual security program, including but not limited to:
>
> (1) Lack of proper planning, supervision, accounting and effectiveness of the overall program.
>
> (2) Names of U.S. and foreign corporations, partnerships or individuals who receive profits from these programs, including the volume handled and profits made.
>
> (3) Profits made by foreign governments.
>
> (4) All amounts expended to promote production which is in competition with U.S. production.
>
> (5) The amount or quantity of all equipment, material or commodities which have not been used in each recipient country.
>
> (6) The prices at which items furnished through these various programs have been sold by foreign countries or their agents.
>
> (7) Rates of pay of all employees engaged in this program.

This year's hearings further prove to me that this program will never be properly run until we have that information.

Mr. Chairman, all of what I have said, I have said in years past. Today I go further and say that in our reliance on this dollar diplomacy we are seriously endangering our future safety. We are through this means making enemies in many countries who will use the benefits of our aid against us when the time of need arises.

Today we will not clean up this program if we hold this item to the $600 million, nor will we change conditions much if the amount is raised to $650 million. It is a matter of degree.

What I would point out is that we had better hold down until we find some new approach to our foreign problems. Dollars simply will not do it. We must adopt a new policy for our own safety. Recent events in many foreign countries lead me to believe that instead of arguing about whether it should be this amount of money or that amount of money we should implore our President, our military leaders, and our leaders in Congress to take a new look and see if we are not digging our own grave through this foreign aid approach we have been following for many years.

I have detailed information from an employee of the foreign-aid group, a file at least 4 or 5 inches thick, which clearly proves we have by this means urged people throughout the world to accept our aid at times when if they had only used the materials that were already in those countries they could have saved us and saved themselves hundreds of millions of dollars, saved their own pride, and perhaps remained on our side.

Why is it that we have done that? In many instances it is because by giving such governments new aid the powers that be in some of these countries got a cut, a rakeoff, a handout, and our big business makes huge profits.

My friends, when we keep in power in any nation a government which a large segment of the people of that country do not believe in, and when it is known that it is the United States of America that keeps such government in power, the minute the powers that may be out of control do get back in, it may not be that they choose Russia instead of the United States; because they prefer that but it may be that they choose the Communist bloc because of the resentment that they have against us because we kept that government in power beyond the time the local people wanted it. There have been so many examples of this. Russia appears smarter in this area than we are. Remember there is no record of Russia providing anything except through loans.

You have just adopted this military amendment. Only the year before last, we had before our Subcommittee on Appropriations for the Department of Defense a request by the Air Force to place a contract with an aircraft factory in one of our States, to provide employment, at the insistence of two U.S. Senators from that State. This plane would have had to be used in Europe because it used a British type motor. The Air Force officials in answer to my inquiry said, "Yes; we already have planes in Europe to meet our need, but if we can get these planes, we will use them there and we, in turn, can find some country which will take the planes we now have." That is a typical basis for much so-called foreign military aid.

My friends, if you analyze the foreign aid situation and look at the telegrams you get you will see they are largely inspired by the U.S. Chamber of Commerce, an organization which stands for many sound principles. In this instance, however, it is my belief that its interest comes from its members, big business which makes huge profits in this field without risk. These profits blind them to the fact that we are underwriting governments throughout the world against the wishes of large segments of the people of those countries, and in the process we are getting the people outside of control now burned up at the United States to the point that it is really serious.

Now the press and we, on the Democratic side, might try to kid ourselves into believing that all is well after the expenditure of these $80 billion in foreign aid. All is not well. Today we perhaps face the most serious situation our Nation has ever faced, both at home and abroad. I say for us to go along with the same amount of money in support of a program which has had time to work, but which has led to our present situation, when we see what is hap-

pening in the world, I say certainly we should at least hold amounts down to the committee bill, while we make an urgent and ardent plea to the President and to the leaders of the Congress on both sides of the aisle to review our overall foreign policy.

Let us see if we are not using our dollars to dig our own graves by underwriting governments to the point, and giving them rakeoffs and kickbacks to the point, that we are inflaming many people in those areas to the extent that they will rise up and choose the Communist bloc not because they prefer it, but choose it because of the resentment they feel because we have kept in power governments that those people do not want to have. See what happened in Korea. See what happened in Japan, and in Cuba. What is really happening in Turkey? On whose side will many of these bases be used? It is a real question.

The world situation today is certainly serious enough, after spending this $80 billion that by all means we should slow down, look, and recognize that what we do and have done certainly has failed, and failed to the point that our situation is critical.

I hope the amendment increasing the amount will be defeated.

Mr. GROSS. Mr. Chairman, I offer an amendment to the amendment offered by the gentleman from Michigan [Mr. FORD].

The Clerk read as follows:

Amendment offered by Mr. GROSS to the amendment offered by Mr. FORD: On page 2, line 18, after the figure "$600,000,000", strike out the period and insert a colon and add the following: "*Provided*, That not less than $200,000,000 of the amount appropriated in this paragraph shall be made available to the distressed areas of the less developed States of the United States including but not limited to the States of West Virginia and Pennsylvania."

Mr. PASSMAN. Mr. Chairman, I make a point of order against the amendment.

Such action as proposed is not authorized, and I do not think the language of the bill would permit this type of amendment. I was not really expecting an amendment of such type, and it caught me just a little bit off guard. However, I do not think the gentleman from Iowa really wants to press the point.

Mr. FORD. Mr. Chairman, may I be heard on the point of order?

The CHAIRMAN. The Chair will hear the gentleman from Michigan on the point of order.

Mr. FORD. Mr. Chairman, I join with the chairman of the subcommittee. I want to indicate that, in my opinion, this amendment is subject to a point of order. It is not germane to the bill and it is not authorized. In my opinion, therefore, it is subject to a point of order.

Mr. BAILEY. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. BAILEY. Am I to understand that Members of the House representing the general public of these United States are to be deprived and excluded from being cut in on this bonanza?

The CHAIRMAN. The Chair feels that is hardly a parliamentary inquiry.

Mr. BAILEY. Nevertheless, it is a question unanswered.

The CHAIRMAN. It is not one the Chair is permitted to answer.

Does the gentleman from Iowa desire to be heard on the point of order?

Mr. GROSS. Mr. Chairman, I concede the point of order.

The CHAIRMAN. The gentleman concedes the point of order.

The point of order is sustained.

Mr. GROSS. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, first of all, if I may have the attention of the gentleman from Louisiana, I should like to compliment him for the bill he has brought before the House even though I am opposed to it. Let me say to the Members of the House that if it were not for the untiring work of the gentleman from Louisiana, Mr. PASSMAN, and certain other members of his subcommittee, I shudder to think of what this bill would contain. Instead of being $3 billion-plus, it undoubtedly would be a $5 billion or $6 billion bill. The gentleman from Louisiana and those who have supported him on the subcommittee and the full Appropriations Committee are entitled to the plaudits of the House of Representatives.

I should like also at this time to felicitate the gentleman from Louisiana, Mr. PASSMAN, on the occasion of his birthday.

Mr. PASSMAN. These birthdays are coming entirely too fast. For the past several years since I have been here, 14 years, I have never been able to correct it. The newspapers insist on having my birthday before I reach it.

Mr. BASS of Tennessee. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield.

Mr. BASS of Tennessee. Is it not in keeping with what has been done and does not the gentleman believe it to be a fact that when the administration makes a request it is not for what they actually need but is a souped-up request, so that they get what they need in the long run?

Mr. GROSS. There is no question about it; and the gentleman from New York [Mr. TABER] recognized that in the hearings when he called attention to the asking price.

Mr. BASS of Tennessee. And also by offering an amendment to restore just half the cut.

Mr. GROSS. That is right; and on the subject of my friend the gentleman from New York [Mr. TABER], he mentioned General Palmer, General Norstad, and others in support of the amendment to add $200 million to this bill. I never heard of a general or an admiral who ever had enough money to spend for equipment or enough men to command.

Mr. HAYS. And, if the gentleman will yield, I would just like to say that I heard General Norstad's speech again this year. I can make it better than he can, because I know it by heart; it has been the same every year.

Mr. BAILEY. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield.

Mr. BAILEY. I wish to congratulate my friend from Iowa for bringing before the House and emphasizing the deplorable conditions in the State of West Virginia and certain parts of Pennsylvania. Even if we do not get anywhere with this movement, we at least will call it to the attention of the country.

Mr. GROSS. Now, I would like to cite a little past history for the benefit of my friend the gentleman from Minnesota [Mr. JUDD]. I am pleased he is on the floor. Going back to the debate in April 1949, when the foreign handout bill was before us that year and when the gentleman from Ohio, Mr. Vorys, used to carry the torch for the program, Mr. Vorys said:

Unquestionably this ECA Act last year impaired the economic stability of the United States by increasing inflationary pressures.

That back in 1949, and he was so right.

In the same debate, the gentleman from Minnesota [Mr. JUDD] added this:

I said on the floor last year when we voted for the ECA bill—

As it was then known—it has had nearly a dozen different titles since its inception—

that when we voted for this ECA bill it meant voting among other things to reduce the standards of living in the United States. We knew what it meant.

Mr. JUDD. Mr. Chairman, will the gentleman yield?

Mr. GROSS. In just a minute. Then I asked this question in 1949:

I would like to ask the Members of this House what, in their standard of living, they are willing to surrender? Or is it the plan to lower the standards of living for the common garden-variety of citizen while Members of Congress merely give lipservice to such a scheme?

Mr. JUDD. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I am glad to yield to the gentleman from Minnesota.

Mr. JUDD. I did say that in 1949. I expected that to happen, and I voted for it nevertheless because the security of my country was at stake. I am willing to take a little cut in living standards and pull my belt a little tighter in order to be free. Without the program adopted then, Italy would not be free today, Greece would not be free, France, West Germany, Denmark, Norway would not be free. That was the best investment we ever made. Fortunately our economy was stronger than I anticipated.

Mr. GROSS. Let me answer the gentleman. The gentleman from Minnesota surrendered nothing in his standard of living. What happened? Last year this Nation went $13 billion in debt to keep up a synthetic economy. It is a standard of living based upon public and private debt so staggering it will never be paid, and the gentleman knows it. You have not faced up to a lower standard of living. You have been willing to pass on to the generations yet unborn the mortgages for this preposterous program of dissipating our

resources in every nook and corner of the world.

Mr. HOFFMAN of Michigan. They took care of the Chinamen, all right.

Mr. GARY. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I do not want to belabor this point, but I certainly do not want the Members to vote under a misapprehension about this so-called defense support item.

Let me call your attention to the projects in this defense support program. They are listed beginning on page 2204 of the hearings. There are three pages of them, including 190 projects scattered all over the world.

What are the projects? One is forestry resources development. I do not know what that has to do with defense unless you are going to give them some trees to hide behind, but those trees will not defend them against modern weapons, I can assure you.

In addition, there is an agricultural and rural improvement program. We have been trying to straighten out our own agricultural problems for years and have not been able to do so. Now we are trying to straighten out those problems all over the world.

Another one, fisheries development.

Here is one that will appeal to my friend from West Virginia, and, by the way, these projects are listed in several places—coal mine development. As we develop coal mines abroad we have here in the United States many miners who are idle and suffering because we cannot dispose of our American coal.

Mr. BAILEY. Mr. Chairman, will the gentleman yield?

Mr. GARY. I yield to the gentleman from West Virginia.

Mr. BAILEY. I would like to remind the gentleman that we have a proposal before the Congress now tied up in the Rules Committee asking the simple privilege of having a joint committee of four Members of the Senate and the House study our fuel situation and to make recommendations to the Congress. It is still in the Rules Committee. Yet we are doing those things for people abroad.

Mr. GARY. Here is another project, mineral development, other than coal. When we ask for hydroelectric power development in this country it is pork-barrel legislation. If we attempt to develop rivers in the United States we hear the cry "Pork barrel." But what are we doing here? Hydroelectric power development, thermal power development, power transmission and distribution. Each of these are separate projects. Next, primary system improvement. I do not know what kind of primary system they hope to develop. They do not even have elections in most of those countries and I do not know what they are going to do with a primary. But that is the project, primary system development.

Here is rural self-help. Here is an item that appears in several places: Operation Brotherhood. What that is I do not know. Brotherhood certainly is not operating in Japan today or, on second thought, maybe that is the Operation Brotherhood that we are contributing to.

Another is a census project.

Mr. BASS of Tennessee. Mr. Chairman, will the gentleman yield?

Mr. GARY. I yield to the gentleman from Tennessee.

Mr. BASS of Tennessee. All of this information that you are giving us here just further adds to the jocular items in this program.

Mr. GARY. This is a list of the projects that was supplied at our request.

Community development. General highway improvement. Meteorological services improvement. Village health and sanitation project. Expansion of Government information facilities. Now we are even going to provide them with propaganda facilities. And, I will say this, the way our Government propaganda facilities are operating today, we can give them some technical assistance in that field, because certainly the propaganda for this program has been operating most effectively thus far. Low-cost housing. We are even going to give them low-cost housing. Excess property—construction equipment. Now, what that is I do not know.

The CHAIRMAN. The time of the gentleman from Virginia has expired.

Mr. RHODES of Arizona. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I just want to say that every statement which my good friend, the gentleman from Virginia, made is absolutely true. He was reading from the list of projects. I have the greatest faith in the gentleman and the greatest affection for him, and I know what he said is absolutely right.

Let me explain the list to you. The defense support program, as I stated yesterday, is a program by which we use dollars to buy capital equipment for these nations around the perimeter of the Sino-Soviet bloc, which were pointed out by the gentleman from Massachusetts. Now, why do we do this? Why do we use our dollars to buy capital equipment? We do it for various reasons. One of the reasons is that someday we would like to see the time when we do not have to support these nations. This will never occur until they have a reliable economy. The money which we use to buy this capital equipment, the dollars, is sent over to the nations themselves in the form of capital equipment and it is sold in that country and paid for in the currency of the country.

Now, the list which the gentleman from Virginia read was a list of projects or equipment which were purchased with dollars for the purpose of bringing economic good into the country so that they would not be in a state of inflation, when the local currency was issued to make the expenditures necessary to make for the defense of the country.

And, I just want to ask this question: Without some help do you think that Taiwan could support 600,000 troops? Do you think that South Korea could support 600,000 troops? Do you think that South Vietnam, Turkey, Greece, and Pakistan could support armed forces of the magnitude they now have? The answer certainly is, no.

The gentleman from Michigan stated that this is just as much a part of military assistance as it can possibly be. He speaks the absolute gospel truth when he says that. Now, some say it is economic aid. Maybe you can say that. However, the end product is military just as much as it can possibly be. Certainly, you could take the dollars and transfer them to the credit of country A in the defense support category and let that country do whatever it wants to do with it. These countries could buy Coca-Cola with the dollars if they wanted to. They could issue their own currency, without the necessary economic justification, and they would have the most amazing case of runaway inflation that you ever saw. So, instead of giving them the dollars, we give them the equipment to justify economically the issuance of the currency.

We give them equipment which will build up their economics and which, when they pay for the equipment in their own currency, provides a sound economic base for the issuance of that currency and keeps that country in a position where it is not and will not be a victim of runaway inflation.

Those who say that this is a large increase had better look at the figures again. The budget request was $724 million. The committee recommended $600 million, which is a cut of almost 20 percent. If the amendment of the gentleman from Michigan is adopted, the cut will still be in excess of 10 percent of the budget request of the President.

In the type of world in which we live, with the explanation which you have had so ably presented by the gentleman from Massachusetts as to the effect on these nations located in the soft underbelly of the Sino-Soviet bloc, this is, in my opinion, a modest enough outlay for this particular purpose.

May I say again, at the risk of being repetitious, that the gentleman from Michigan [Mr. FORD], the gentleman from New York [Mr. TABER], the gentleman from Massachusetts [Mr. CONTE], and the gentleman from Arizona now addressing you have never been spendthrifts. I do not think we ever will be. This is a matter of raising an appropriation which we think is very important up to the point where we can do the job that the taxpayers are entitled to expect. It would do the taxpayers of America no good to spend $600 million to do three-fourths of a job when, with $650 million, we could do the whole job.

Mr. BAILEY. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I asked for this time in order to ask the chairman of the subcommittee, the distinguished gentleman from Louisiana, a pointed question or two.

Is it not true that in the 1960 budget, which is the present budget, there is over $64 million worth of items of an educational nature?

Mr. PASSMAN. That is a conservative figure. I would not be able to state the exact amount which is provided in the bill for education.

Mr. BAILEY. Is it not true that in the budget for 1961 there are items in excess of $60 million of an educational nature?

Mr. PASSMAN. We have not actually put down in a separate column all the items for education, so I trust the gentleman will not ask me to confirm a figure which I have not personally computed.

Mr. BAILEY. Is it not also true that there are numerous other items of activity, not including educational activities, covered by this appropriation, which we are being asked by the amendment of the gentleman from Michigan to increase?

Mr. PASSMAN. I say to the gentleman that there are many school buildings in several countries, included in this program.

Mr. BAILEY. Mr. Chairman, may I say that I appreciated very much the facts brought out by the distinguished gentleman from Virginia, [Mr. GARY], as to what is contained in this so-called defense support program, which is nothing more or less than an extension of present aid facilities already in the bill.

I noted today in the vote on the first amendment that we have some dedicated souls on both sides of the aisle, who voted to increase this appropriation to do the very things—build school buildings, pay teachers' salaries, build all kinds of highways and reservoirs, improve the water systems of these countries—who, when we want to do some of those things at home, particularly in the field of education and of low-cost housing, say that that is socialistic. Some of them even say that it borders on being communistic. I have not heard a single voice raised by any of these benighted souls today who object to spending money on such items at home, against spending on these items abroad. We have had two Presidential vetoes to kill our efforts to bring some kind of economic relief to the State of West Virginia. How can we cry socialism of home and democracy when we send these funds abroad?

Today, while I appreciate his doing so, I am sure that the distinguished gentleman from Iowa meant right by referring to the bad economic situation existing in West Virginia and in western Pennsylvania.

Mr. Chairman, let me remind you that that is a serious matter. With 258,000 of West Virginia's 1,859,000 population living on surplus Government foods, with men being laid off by the hundreds and the thousands every week in the State of West Virginia, I would be remiss in my duty if I did not denounce what is going on on the floor of the House today, to do those things, to engage in those socialistic activities. I am surprised that the gentleman from Michigan, being an outstanding conservative, would want to force socialism on the poor benighted souls over in some of those undeveloped countries. That is what you are doing. If it is not good for America it is not not good for those folks over there.

Mr. HOFFMAN of Michigan. Mr. Chairman, will the gentleman yield?

Mr. BAILEY. Yes; but not to get into an argument.

Mr. HOFFMAN of Michigan. I do not want to get into an argument, either. I just want to ask the gentleman if he thought inconsistency was anything new in a Congressman.

Mr. BAILEY. I guess I will have to agree with the gentleman from Michigan that quite often we do run into situations of that kind.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. BAILEY. I yield to the gentleman from Iowa.

Mr. GROSS. The gentleman was not referring to my friend from Michigan [Mr. HOFFMAN] when he was speaking of a Member of the House who was liberal with other people's money?

Mr. BAILEY. I do not know whether I can say that about the gentleman. There are a lot of things I could say about him, but I will not. I was referring to Mr. FORD, the author of the pending amendment.

Mr. HOFFMAN of Michigan. Do not say them, please.

Mr. BAILEY. Mr. Chairman, I am against this amendment.

Mr. PASSMAN. Mr. Chairman, I ask unanimous consent that all debate on this amendment and all amendments thereto close in 25 minutes, the last 5 minutes to be reserved to the committee.

The CHAIRMAN. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

The CHAIRMAN. The Chair recognizes the gentleman from Maine [Mr. COFFIN].

Mr. GALLAGHER. Mr. Chairman, I ask unanimous consent to yield my time to the gentleman from Maine [Mr. COFFIN].

The CHAIRMAN. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. COFFIN. Mr. Chairman, this amendment should be supported for the identical reasons as the amendment offered by the gentleman from New York on military assistance.

I suppose my message should be directed chiefly to those on my own side of the aisle. Ordinarily when we look at this item and look at military assistance, to us they do not always mean progress, they do not always mean an imaginative foreign economy policy. To us they are not as attractive or perhaps as sound in the long run as an intelligently administered development loan fund or as an imaginative far-reaching project such as that involving the Indus Basin, or as appealing to our hearts as the historic point IV program, technical cooperation. But I can say to my colleagues that today, in these circumstances, this amendment is as entitled to our support as is anything else in this program. I, myself, have been much more interested in the Development Loan Fund itself.

Mr. Chairman, the Development Loan Fund, I am sorry to say, has been cut by the committee. However, there are enough vital things for us to fight for today so that I shall make no attempt to restore at this time the funds to that important program. But, I say this $50 million that we are seeking to restore to defense support is just as important as the Development Loan Fund. It is like the piece of bread we give to a hungry boy to live on. The loan fund is the piece of bread we give him to grow on. But the boy needs to live in order to grow.

Another point I would like to make, Mr. Chairman, is that many of us, Democrats and Republicans alike, are concerned from time to time over our ability to wage limited brush fire war in conventional ways. We do not like to be wholly dependent on big nuclear weapons and, yet, this program of defense support with its sister, military assistance, helps provide precisely a conventional brush fire fighting capability which it would be absurd to deprive ourselves of.

Another point, Mr. Chairman, is that this program of defense support is not a ballooning, skyrocketing, ever-expanding program. This program has diminished remarkably. In 1957, only 3 years ago, we had almost $1.2 billion in defense support. If this amendment passes, as I hope it does, we shall be down to just about a little over 50 percent of that amount. This is diminishing every year, and we can look forward to a continuing decrease as our other programs that foster growth, stability, and long-range prosperity take hold. But, we cannot do it overnight. I think we have done enough in the years just passed. We have done enough this year, if we cut it from $700 million to $650 million.

The CHAIRMAN. The time of the gentleman has expired.

Mr. CONTE. Mr. Chairman, I ask unanimous consent to yield my time to the gentleman from Maine.

The CHAIRMAN. Without objection, it is so ordered.

There was no objection.

Mr. COFFIN. Mr. Chairman, I thank the gentleman from Massachusetts for I know he, himself, could make a valuable contribution to this part of the program as well as to other parts of the program. But, I shall not take the time of my colleagues any more than to say that the amount in this particular program is as low as we can conscientiously cut it. I was amused to hear the chairman of the subcommittee, and the distinguished gentleman from Virginia, say to us that this was really economic aid—as if this were pulling aside a veil and revealing a great secret. Why, the committee report itself starts out by saying that defense support is defined as that economic assistance which is required, in addition to military assistance, in order to secure a specific contribution to the common defense, in other words, to secure a certain level of defense support.

Mr. Chairman, I thought that the gentleman from Arizona [Mr. RHODES] gave a most able discussion of defense support, its theory and how it operates. I am not ashamed at all of the list of projects to be found on page 2204 of the committee hearings. This is exactly

what the program was set up to do. We can proceed to winnow our inefficiency and we are doing it. This program is coming down, but to cut it further this year is to ask for trouble.

Mr. ROOSEVELT. Mr. Chairman, will the gentleman yield?

Mr. COFFIN. I yield.

Mr. ROOSEVELT. I am for this amendment, but I would like to ask the gentleman if he would explain briefly why the particular 12 countries have been selected as against other countries for defense support, as they are listed in the report?

Mr. COFFIN. There are two reasons. In the first place, these countries are in strategic areas around the Sino-Soviet bloc; in the second place, we give defense support only to those countries which are allied in an agreement with us. We cannot give it to countries that are not allied. If we want to give assistance to countries not so allied in treaty or pact, we do it under the form of special assistance.

The CHAIRMAN. The gentleman from Minnesota [Mr. JUDD] is recognized for 2 minutes.

(By unanimous consent, Mr. RHODES of Arizona yielded his time to Mr. JUDD.)

The CHAIRMAN. The gentleman from Minnesota is recognized for 2 additional minutes.

Mr. JUDD. Mr. Chairman, I do not think it is in our country's interest to talk much just now about the fluid situation in Japan, but the suggestion has been made here that Mr. Khrushchev's breakup of the Paris conference and the Communist-led riots in Japan are evidence of the failure of our mutual security program. On the contrary, Mr. Chairman, the Communists have to resort to these tactics because of the very success of the mutual security program, particularly the military part of it. The violent attacks on us and our President are, in fact, a tribute to the effectiveness and firmness of his leadership. They did not attack us as long as they imagined we could be deceived by their pretenses.

Mr. Khrushchev tried to take us in with his smiles. He tried to divide our allies. He tried to set the leaders and people of Germany and France against each other. He tried to separate the British from us by offering various inducements. He tried his best to whittle down our resolution to organize and lead the peace forces of the world, hoping to get us to a point where we would be willing to make innocent-looking concessions that would in fact endanger our very survival.

His effort was the old tactic of trying to divide and conquer. He did not succeed in dividing the free countries before the Paris conference.

He made a second effort; he tried to divide us from our friends and our allies at the conference by threats and abuse. Again he failed. We came out of it stronger than before, largely because of the success of our efforts through the years to build with this program a strong and united free world. It held together at and after Paris because of confidence in the leadership the United States has given.

So now he has had to change his tactics. He is making a third effort to divide and conquer, this time trying to achieve by subversion what he could not achieve by division. Subversion in what countries? The very countries around the perimeter of the Sino-Soviet bloc which defense support helps plus Japan to which most of our assistance has gone, not under this bill, but under appropriations for our own Armed Forces in Japan. These countries have had difficult times; some are newly formed and have not had enough experience and development to stand firmly on their own feet; two are divided, Korea and Vietnam; several have had exhausting wars and revolutions. It will be hard for them to pull through if we cut too deeply our assistance to their economy which enables them to maintain the armed forces they need and have.

Naturally Mr. Khrushchev is trying to upset these governments, one by one, by ordering into action the apparatus which the Communists have been building and training in every country for years, for the very purpose now revealed in Japan.

Somebody said the United States has suffered a humiliating defeat. It is true that the Communists have won a victory in the sense that they have shown their power to subvert and their disciplined obedience to Moscow's orders. But they also have had to come out in the open and expose themselves and their true nature. It is not yet determined how it will come out. I have faith in the Japanese people and believe they will find ways, despite the democratic trappings we ourselves imposed on them, to get the situation under control. The United States itself would have suffered a humiliating defeat with serious loss of prestige only if the President had appeared timid and refused to go. That would indeed have destroyed our friends in Japan and the confidence of other Asians in us. The President has done and is doing his part. But if the Congress cuts this aid too deeply at this time, that undoubtedly will injure our position. It will seem to prove that we are what the Communists have always claimed we are—an undependable ally. Only we can administer to ourselves a really humiliating defeat and loss of face.

Actually I am less anxious about the situation in Japan today than I have been for many years. The basic situation is no worse—it is only more visible to all—out in the open where it can be dealt with more effectively. We must not be influenced too much by the lawless actions of a small minority in a country whose many millions are law abiding and our true friends.

The 12 countries we are helping under defense support are maintaining 3 million trained and equipped soldiers in the field. If you cut this fund too deeply, you can weaken their confidence, their hope, their resolution. They cannot possibly continue to maintain 3 million men in their armed forces and maintain internal resistance to Communist subversion, unless their people can also see a little economic progress, a little better standard of living, which this kind of aid makes possible. The target of the Communists is to weaken the economic and political stability of these strategic countries; ours must be to strengthen it. Defense support is essential to accomplishing that. We must not shake the resolution of the people we have succeeded in welding into a giant free world coalition. Now is the time to send them a message of hope by continuing the appropriation at a level that will hold things steady. The United States must demonstrate to all its allies that it will always stand firmly by them. We must not let a handful of Japanese radicals and their misguided associates sway us against steadfast support of the many millions in Japan and free Asia who are friendly to us, because they want to preserve their freedom and know association with us to build mutual security is their best, if not their only hope. I hope the amendment will be adopted.

Mr. HAYS. Mr. Chairman, I offer a preferential motion.

The Clerk read as follows:

Mr. HAYS moves that the Committee do now rise and report the bill back to the House with the recommendation that the enacting clause be stricken out.

Mr. HAYS. Mr. Chairman, if any of you had any doubts as to why the gentleman who just preceded me was selected as the keynote speaker for a great convention, your mind ought to be at rest now. Anybody who can turn what happened in Japan in the last few days into victory for the United States ought to be a keynote speaker for all time.

I have been for this program ever since its inception. I want to talk especially to the liberals on the Democratic side. You voted to give $200 million more for military assistance for whom? Not for our NATO allies who could use it and who have used it in the past to hold together. You have had to make an additional $200 million available so the military can spend $50 million in Latin America. For example, we have a military assistance group in Guatemala headed most likely by a brigadier general.

I have only 5 minutes, but let me call the roll. What happened when we crammed military assistance into Iraq? Oh, yes, the Prime Minister of Iraq and the King were our friends, but when they were dragged out, broken and nude, behind the automobiles of the revolutionaries, our millions of military defense went down the drain.

A great deal of this money, twice as much as the military assistance amendment provided and eight times the amendment you are contemplating, goes to a country which today has no government. The government was overthrown by a mob and no government exists there.

You talk about the divisions in Korea? Why, anybody in this Chamber is intelligent enough and bright enough to know that we cannot count on them in a showdown.

Where have we failed? We take a program which worked in the industrial civilization of Western Europe and we move it bodily into undeveloped coun-

tries. We gave arms to the dictators all over the world and when their people got through with them those arms did not do us any good, they did not do the people any good; they did not even do Batista in Cuba any good.

I could call the roll over and over again. The administration may come in here and change the minds of some people who voted against the authorization, but they do not have to change my mind. All I am asking them to do is to come in with an intelligent program which will improve the conditions which exist today.

Do you think we are going to keep Nigeria on our side, or the Belgian Congo, by sending a couple of generals down there and establishing a military assistance group? You cannot have military assistance without generals, you cannot have generals without a place for them to work.

I have heard the distinguished general's speech a half a dozen times, and I refer to the distinguished leader of NATO General Norstad. It is like a broken record, he plays it over and over again.

If he came in here and said, "We are going to spend this money on NATO, we are going to put this money into Turkey and Greece where it will do some good," I would be fighting for it. But when you are going to establish military assistance groups in underdeveloped countries, where the people do not want guns, where the guns will not maintain the regime in power, where you ought to be in with technical programs and economic programs, I am against it. I say you are inviting those people to be our enemies forever, and the results of the past few months and years will prove they are going to do just what you are inviting them to do.

The CHAIRMAN. The question is on the motion offered by the gentleman from Ohio.

The motion was rejected.

The CHAIRMAN. The Chair recognizes the gentleman from Michigan [Mr. HOFFMAN].

Mr. HOFFMAN of Michigan. Mr. Chairman, of course there is an obvious answer to the question asked by our very able and industrious associate from Arizona [Mr. RHODES]. He asked whether we expected the people where our troops are stationed to support them. Of course not. Those folks did not ask for troops. We are not always guests—we are uninvited. We shoved the troops down their throats. As a matter of fact they have asked some of our forces to get out.

With reference to the bases the gentleman was talking about, if war comes who will own them, or of more importance, have possession? Did we not read recently that the Russians told us not to use our bases as headquarters or starting places for our people, who were seeking intelligence information? They did. You can get some bases out too far, sometimes, to protect them.

I have a grandson in Germany and another on the high seas. They both tell me that every place they have ever been someone suggested to them, "Yanks go home." How my good friend, the gentleman from Minnesota [Mr. JUDD], can turn this snub to Ike into a victory, mystifies me. I just cannot figure it out. And, if we take the argument of the gentleman from Arizona [Mr. RHODES], are we going to abandon the bases? I ask you, is that not just what we have done with some of our men who fought in previous wars and who are now in China and Russia? Is that not what we have done with them?

Mr. RHODES of Arizona. Mr. Chairman, will the gentleman yield?

Mr. HOFFMAN of Michigan. I yield.

Mr. RHODES of Arizona. I could not agree with the gentleman any more than I do as to the desirability—in fact, the necessity—of doing everything we possibly can to get those people liberated, but I fail to see what that has to do with this program.

Mr. HOFFMAN of Michigan. And you think we can defend all these bases all over the world.

Mr. RHODES of Arizona. I will say to the gentleman that bases are very important to the welfare of the free world and the United States of America. I certainly do not intend to make the same mistake that a former Secretary of State made a few years ago and say that they are outside of our defense perimeter.

Mr. HOFFMAN of Michigan. I remember J. Edgar Hoover saying that if we go too far, we could not maintain them.

The CHAIRMAN. The Chair recognizes the gentleman from West Virginia [Mr. BAILEY].

Mr. BAILEY. Mr. Chairman, speaking particularly to the amendment that the gentleman from Michigan proposes, this would add an additional $50 million to the already more than $700 million appropriation the subcommittee has approved and the general committee has approved for this particular program.

Now, let me in the limited amount of time I have available remind my colleagues of the House that every time we propose to do something for the people of this Nation in the way of building a few necessary and needed classrooms, in the way of borrowing some money from the Government to rehabilitate our domestic setup in our State of West Virginia, to bring in some plants into these stricken areas, the charge is made that it is socialistic. They even go so far as to try and drag in the comment that it is tinted Red; that maybe it has some of the evidence and some of the indications of being communistic. That is what these people who are the proponents of this legislation today say about our domestic programs. If they are socialistic here, they are socialistic abroad. And, I think maybe we would be performing a great disservice to the people in those underdeveloped countries, who are begging for democracy and democratic forms of government, teaching them democracy instead of teaching them socialism and socialistic ideas.

Mr. Chairman, I want to appeal to my colleagues in the House to defeat this amendment. It cannot be justified on any ground.

The CHAIRMAN. The Chair recognizes the gentleman from Pennsylvania [Mr. FULTON].

Mr. FULTON. Mr. Chairman, I rise in support of the amendment. I believe adequate defense support is absolutely necessary to these 12 countries who have stood firmly.

Under Secretary of State Dillon said:

> Defense support is economic assistance required, in addition to military assistance, to enable certain countries to make specific contributions to the common defense. It is provided to 12 nations contributing military forces and forward military bases crucial to collective security of the free world.

There is not a country in South America or Latin America that is getting any defense support whatever under this program. In case anybody thinks this has been argued here, that point on defense support in Latin America is not in issue in this program at the present time.

I want to state firmly that from my personal knowledge and experience, I have full confidence in General Norstad, the commanding general and head of our NATO forces. We must back General Norstad and NATO, and I would take General Norstad's word as a military man on his field and his needs as against almost any person I know in this Government.

Likewise we must realize that defense support is in major part, nonproject aid. It was stated by Mr. Murphy when he was testifying as Under Secretary of State, that there are only 84 projects in the defense support title in the Far East, and also one project in the Middle East and Africa. That means that most of the defense support is commodity aid, which is aid of a type like this example I will give. In Taiwan, in fiscal year 1960, there was a program increase in commodities of this equivalent—chemicals $800,000, machinery and parts $400,000, and pharmaceuticals $400,000.

Finally, we have heard comment as to this road in Vietnam. We must not think of this project as one road that has gone up in price. There has been a change in the military situation in Vietnam and there are three routes now being constructed instead of one as originally programed. This highway construction is a necessary military program for a country under extreme pressure. We in the United States cannot afford to lose out in Southeast Asia, which is a vital strategic area.

As to these 12 countries, receiving defense support assistant they are supplying armed services for their defense of approximately 3 million men. The United States has 2 divisions in South Korea, while South Korea has 18 divisions of her own troops on the 38th parallel for her own defense. Let us not pull the supports out from under such people as these who are standing so loyally by us and the free world.

If we did not make the economic assistance of defense support available to these nations they would either have to give up all or a substantial part of the military forces they maintain with our military assistance help, or their

economies could collapse under the burden of their military forces and their governments would be in danger of overthrow by subversive elements.

Defense support funds help these countries to maintain the military strength we want them to have in two ways: First, in some countries such as Greece, our defense support goes directly into the defense budget to help support the military forces. In other countries the economic assistance we provide under defense support makes it possible for the country to use money to pay its troops which it would otherwise have to use to buy imports essential to the survival of its economy.

The specific need for defense support for each country and the contribution each is expected to make to the common defense is set out in the Worldwide presentation book, page 86 and following. This book is classified but is available to all Members.

There has been a very substantial decrease in the funds requested by the executive branch for defense support in recent years. Only 3 years ago the request was for $1,100 million. For fiscal year 1959 the program was $808 million. For fiscal year 1960 it will be about $766 million. Country figures are on page 78 of the Worldwide book. This year the executive branch requested $724 million, and the Congress authorized an appropriation of $675 million. The President and the responsible administrators of the program have repeatedly testified to their belief that the full $724 million is needed. Certainly the $675 million authorized is a minimum figure. The cut made by the House Appropriations Committee to $600 million will make it impossible to provide the economic assistance to maintain military power which our military authorities believe we should have in these countries in our own interest.

The CHAIRMAN. The Chair recognizes the gentleman from New York [Mr. TABER].

Mr. TABER. Mr. Chairman, this program of defense support is absolutely necessary if we are going to maintain the armies of these countries who are our allies, who are scattered all over the world. I do not see how we can afford at this time not to supply the additional $50 million.

Mr. CONTE. Mr. Chairman, will the gentleman yield for a question?

Mr. TABER. I yield.

Mr. CONTE. The gentleman from Ohio made the point that a great deal of the military assistance money would be going to Latin America. Is it not true that in the 86th Congress, under Public Law 86–472 we limited the amount of money that could be appropriated for Latin America?

Mr. TABER. Yes.

Mr. CONTE. Latin America military assistance was limited to $55 million, broken down into $25 million of grants, $22 million of credit sales, and the rest excess military equipment.

Mr. TABER. That is correct.

Mr. CONTE. No defense money whatsoever goes to Latin America or to Africa. This defense support money goes to these 12 nations which are under the belly of the Sino-Soviet bloc.

Mr. TABER. That is correct.

Mr. CONTE. And the 12th country is Spain where we have strong military, air, and naval bases.

Mr. TABER. That is right.

Mrs. ROGERS of Massachusetts. Mr. Chairman, will the gentleman yield?

Mr. TABER. I yield.

Mrs. ROGERS of Massachusetts. Is it not true that this is the area that the President will visit shortly and which may be a very dangerous area to him? It seems to me extremely important to vote this money at this time.

Mr. TABER. The President is taking a really dangerous trip and in so doing is performing a service that we should support.

The CHAIRMAN. The Chair recognizes the gentleman from Louisiana [Mr. PASSMAN] to close the debate on this amendment.

Mr. PASSMAN. Mr. Chairman, I want to restate that there is sufficient money in the defense support item without the pending amendment. We have endeavored to present this matter on a nonpartisan basis. I, myself, have tried never to look to either Democrats or Republicans as such for support. We represent the same Nation and the same people. We have our responsibility.

At this time, I recall a particularly appropriate question by one of the great Republican Members of the past, Congressman Rich, who used to ask, "Where are we going to get the money?"

I have dealt with this matter realistically. And, I hope the information which I am going to bring to your attention at this time will cause you to review the decision made earlier, and that you will support the committee's recommendations on a rollcall vote.

From the time George Washington was sworn in as President on April 30, 1789, to June 20, 1953, a total of 164 years, cash receipts of the U.S. Treasury—taxes collected from the American people—amounted to $570,786,561,814.

From January 20, 1953, and that was a very significant date, to June 1, 1960, comparable collections were $572,258,819,664.

With all due deference to my friends, I point out that the present administration, in 7 years, 4 months, and 11 days, received revenues exceeding by $1,472,257,850 all the money collected in 164 years under all of the Presidents of the United States up to January 20, 1953.

Now, the $572 billion has been spent by this administration and an additional $23 billion has been borrowed and expended.

If that is the way you want to do business I cannot do anything about it other than call it to your attention.

But, is the fact within itself not indicative of what damage we are doing to the welfare of generations yet to be born? When are we going to face up to our responsibilities and realize we cannot do everything with money?

Mr. Chairman, when and where and how are we going to stop this idea that everything can be done with money? I trust that the Members will reverse their decision of earlier today and support the committee recommendation. If there have been any trades, let us forget about them. Let us stand together in the interest of our people and of our country and of generations yet to be born.

Mr. HAYS. Mr. Chairman, will the gentleman yield?

Mr. PASSMAN. I yield to the gentleman from Ohio.

Mr. HAYS. May I point out about the limitation on Latin America that that was written in during the 85th Congress, under an amendment offered by the gentleman from Alabama [Mr. SELDEN], and the military paid no attention to it. The limitation was there. They went right ahead and did as they pleased. Although we put the limitation in again this year, I do not think they will pay any attention to it if it does not suit them. What they did was violate it by adding on all we had given these countries and all they bought. They said that is what they thought Congress meant, when they knew very well it did not.

Mr. PASSMAN. I hope we shall think of the people's interest and of the national welfare, and of the next generation, rather than of the next election.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Michigan [Mr. FORD].

The question was taken; and on a division (demanded by Mr. PASSMAN), there were—ayes 97, noes 125.

Mr. FORD. Mr. Chairman, I demand tellers.

Tellers were ordered, and the Chairman appointed as tellers Mr. FORD and Mr. PASSMAN.

The Committee again divided and the tellers reported that there were—ayes 119, noes 141.

So the amendment was rejected.

Mr. ROONEY. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, what foreign aid should be given and how and where that foreign aid is administered is a problem always confronting the Congress. There is one aspect of this matter, however, where there should be general agreement and endorsement. I refer to those areas of the program where foreign aid is fostered through our own private enterprise system where private American companies are encouraged to venture their capital and to lend their technical experience and competence to the development of worthwhile projects in foreign lands. Not enough of this has been done.

Perhaps I can best illustrate this point by an example of what has been going on in Afghanistan.

An understanding of Afghanistan's turbulent history is essential for a true appreciation of the current impact of American aid on this strategic country. For more than two centuries, the Afghans were a buffer between the British Empire in India and Russia. In 1947, however, the British withdrew from India. The independent nations of Pakistan and India were created. Afghanistan became, in effect, a political vacuum. Almost immediately So-

viet pressure and attempts to influence and infiltrate were felt. Afghanistan became the logical first target of Soviet pressure in these vital areas.

You will recall that several years ago Khrushchev and Bulganin paid a historic visit to Afghanistan. Immediately the Western Powers, most particularly the United States, recognized the necessity for accelerated interest and activity in Afghanistan's development. The Russians had already begun a road building program, an airport construction program, and a program for equipping the Afghan Air Force. They were contemplating a program looking toward the establishment of an Afghan airline with routes extending from Moscow through Afghanistan to Pakistan, Turkey, and India. The threat of such a Soviet dominated airline is obvious.

At this point our Government undertook to meet this threat, not by forming a military mission, or by making direct grants to Afghanistan, but by enlisting the skill and experience of a private American company, Pan American World Airways. Officials of Pan American were called to Washington and asked to undertake a program whereby Pan American under a technical assistance contract would train Afghan airline pilots and ground personnel, assist in the purchase of airline equipment and in general make all of its experience and competence available in establishing and assisting in the operation of a sound Afghan civil airline. A staff of Pan American officials went to Afghanistan, studied the local problems, and a technical assistance contract was entered into. In order to insure the continuity of this program Pan American was persuaded by our Government to make an investment in the local Afghan airline under conditions which assured that Pan American did not receive excessive profits from the venture.

This program has now been in operation for 3 years. As the result we have today in Afghanistan a local airline tied in closely with one of our major private American airlines and providing assurance that the strategic air routes operated in this area are in sympathetic hands. At the same time the skills of a certain segment of the Afghan population are being increased and a start made in raising the local standards of living.

Pan American is to be strongly commended for responding to our Government's call for assistance. Had it not done so there is little doubt but that the Russians would have provided this assistance with consequences which are obviously prejudicial to the best interests of the United States. Pan American has set a fine example for other companies operating abroad. However such companies cannot expect to undertake projects of this kind looking toward the improvement of the internal economics of friendly nations and often competing with Soviet programs unless they have the assurance that their efforts are supported at home, particularly in the Congress. American private enterprise must be encouraged to go abroad and to assume as much of the responsibility and the burden as it can in assisting these underdeveloped countries. Direct country-to-country grants-in-aid may be necessary in certain instances but in my opinion the long range program should include private American companies who would step in as Pan American did in Afghanistan and do the job.

I am pleased to note that in a recent report issued by the National Planning Association which studied the significance of American aid to Afghanistan recognition was given to what Pan American has accomplished.

Mr. Chairman, some of us have on occasion expressed grave concern over what seems to be a never-ending foreign-aid program. However, we must recognize that accomplishments like the one I have mentioned in Afghanistan multiplied many times will greatly add to a proper solution. Obviously whenever American business steps in and helps to make a country increasingly self-sufficient the burden on the American taxpayer decreases. What is happening in Afghanistan insofar as its local airline is concerned, can occur in many other places and in connection with many other industries if the Congress and the administration—the current one or the new administration which will take over next January—encourage American enterprise to expand abroad. Our philosophy must be to give companies such as Pan American a pat on the back, not to deter their efforts.

Mr. RHODES of Arizona. Mr. Chairman, I ask unanimous consent to extend my remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Arizona?

There was no objection.

Mr. RHODES of Arizona. Mr. Chairman, I desire to associate myself with the interesting remarks and the philosophy expressed by the gentleman from New York [Mr. ROONEY] during the course of the discussion on foreign aid legislation.

Not only in Afghanistan, but in all parts of the world, Pan American Airways has become a symbol of the American flag. Like any private enterprise, Pan American assumes risks—often far beyond the normal—in tackling an oversea problem.

Pan American's mutual aid history far antedates foreign aid as we have come to know it in the last generation. In 1927 when Pan American began operations from Key West to Havana, through 1928 and 1929, when it built an air link around South America, the history of Pan American has been one of carrying the American flag to all parts of the universe.

This airline, Mr. Chairman, was the first American-flag carrier to fly into Africa, Asia, Australasia, and to span the Atlantic and the Pacific.

Of course, Pan American received assistance from the U.S. Government in all these undertakings, but the question is which came first, Pan American or Government assistance? Obviously, one would not have been possible without the other.

We have reached an impasse in our financial dealings abroad. Obviously, foreign aid in the form of outright cash disbursements cannot continue indefinitely. However, until American business enterprises similar to Pan American are encouraged by the Government to go abroad and blaze new economic and technological horizons we must anticipate that Government assistance remains necessary.

I agree with the gentleman from New York [Mr. ROONEY] that Pan American and other American firms should be encouraged to continue their oversea expansion, and I thank him for the privilege of letting me join with him in giving credit where credit is due.

The Clerk read as follows:

Technical cooperation, general authorization: For assistance authorized by section 304, $150,000,000: *Provided*, That no part of this appropriation shall be used to initiate any project or activity which has not been justified to the Committees on Appropriations of the House of Representatives and the Senate.

Mr. GALLAGHER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. GALLAGHER: On page 2, line 20, strike out the colon and the word "*Provided*" and all that follows down through the word "Senate" in line 24 on page 2.

Mr. GALLAGHER. Mr. Chairman, I rise in support of my amendment.

The committee bill prohibits the use of technical cooperation funds to initiate any project or activity which has not been justified to the Committees on Appropriations of the House and the Senate.

This provision reverses a decade of successful history, makes a mockery of the term "cooperation," benefits the Soviets, ties our hands, is unworkable, is uneconomic, would reduce effectiveness, serves no useful purpose.

Reverses history: Congress rightly asks for illustrative programs, since final country-to-country action is proper only after Congress acts. Decade of experience shows that both the United States and other countries will prefer to substitute for certain illustrative projects other more urgent ones. History demonstrates that this will occur. History demonstrates the value of adjusting the program to accommodate these later judgments. To ascribe 100 percent validity to illustrative programs prepared 6 to 9 months before final congressional action is to assume a prophetic foresight which is humanly impossible.

Cooperation a mockery: At the heart of the point IV concept, of technical cooperation, has been the concept of jointness—joint planning of joint operations toward joint goals. If this provision is enacted, other nations would be invited to "jointly plan, using our exclusive list which has been justified." Yes; it would be a technical program—very technical, but not a cooperation program.

Benefits Soviets: For urgent project needs not anticipated and therefore not on the list, barring claim on the contingency fund which is heavily overloaded, other countries would be told to wait

until next year. Some cannot wait and may seek or accept Soviet offers. Point of fact is that publication of the unclassified technical cooperation program presented to Congress announces to Soviets that they have clear field on everything not listed.

Ties U.S. hands: The technical cooperation appropriaton could not be used during coming year in nations just becoming independent—Camerouns, Congo, Niger, Upper Volta, Upper Dahomey, Togo, Sierra Leone, Mali, and Madagascar—and so, barring contingency fund use these nations during their first months will be told, "Wait or look elsewhere." This is an astounding backhanded way of surrendering the initiative and our rightful responsible role in the world. Natural events, progress on earlier efforts, changes in government—whatever the cause of a new need and opportunity, our answer is the same, "Wait or look elsewhere." No other major country—U.S.S.R., Communist China, United Kingdom, France, Japan—follows such a practice.

Is unworkable: The provision is poorly drafted and unworkable. There are no standards prescribed by which projects are to be judged, leaving the door open for capricious judgment or for unfruitful differences of view within the Congress or between the Congress and the Executive. The words "justified to" are not clear. If this means that presentation of a justification by the Executive is compliance, the provision is meaningless. If it implies a judgment by the committees, formal legislative action becomes mandatory to reconcile differences between the Houses if not for other reasons. Furthermore, the terms "project or activity" are nowhere precisely defined. The provision is so unclear as to purpose, criteria, and procedures as to be completely unworkable.

Is uneconomic: It has been practice of the Executive to conclude projects when they have served their purpose—over 1,000 have been successfully completed under all categories—and also to withdraw or phase down support to projects with declining priority. These sensible actions make room for more urgent, newly developed projects. If initiation of new projects within the same appropriation level becomes more difficult, there will be a premium—since our administrators and those of other countries are human—on continuing and extending going projects. Removal of the incentive for a reasonable turnover in projects will increase costs.

Reduce effectiveness: As a corollary, lesser return projects may be continued despite the development of higher return opportunities with a resultant reduction in the total impact of the program.

Serves no useful purpose: Finally, it is apparent that the provision would serve no useful purpose. This is demonstrated by the fact that the committee had before it for several months the executive branch justification for this appropriation and of over a thousand projects, but not a single one has been identified as not justified. This startling fact lends credence to the interpretation that the intent of the proviso was to preclude projects except for those presented to the committees. In other words, if you can think them up ahead of time, they are automatically cleared. Such a requirement serves no purpose other than harassment.

IN CONCLUSION

The technical cooperation program has the respect of the world, receives the flattery of emulation by the Soviets, has the warm support of the American people, and has received solid support from both sides of the aisle. It was initiated with the watchwords "a bold new program." The provision to hamstring technical cooperation turns its back on an inspired beginning, bipartisan execution, and on great future needs. The provision must be rejected.

ILLUSTRATIONS BASED ON SUCCESSFUL EXPERIENCE

First. Governments or ministries may suddenly change after the date of the preparation of the presentation materials for Congress in December and January—recent examples are Korea and Turkey—and it may become possible to undertake technical assistance in fields to which the United States has attached high priority in the past but the foreign government has not. The fields of tax, financial, and land reform are examples of areas where lack of adequate action by many underdeveloped nations has increased the amount of defense support and special assistance required to keep the country from collapse. The ability of the United States to respond quickly to requests for help in these fields—rather than to wait 1 to 2 years—could result in great savings in the amount of support assistance required from the United States as well as increasing the political stability in these countries at a much earlier date.

The House Appropriations Committee bill would prevent the use of the technical cooperation appropriation to meet these needs.

Second. The Technical Cooperation program has been one of our most successful, if not the most successful, instruments for identifying the United States with the aspirations for progress in the newly independent nations. A principal element in this psychological success has been the flexibility and speed with which the technical assistance can be provided—and a major concern of both the executive branch and of many Members of Congress in recent years has been how to speed up effective action even further. The House Appropriations Committee bill goes in exactly the opposite direction, compelling additional delays of as much as 1 year in the use of technical cooperation funds. To a country in a hurry, only recently independent—Vietnam, 4 years; Sudan, 2 years; Congo, independent this month—an additional year is a long, long time—and makes it much more difficult to prove that the United States is really interested in helping them on their problems.

Third. The Soviet bloc may offer to extend technical assistance to neutralist countries in key fields which could result in greatly increasing their capability for infiltration and subversion in that country. The past ability of the United States to act quickly with offers of technical assistance in such circumstances has effectively kept bloc personnel out of such key fields in many countries as police training, air transportation, teacher training, and radio communications.

Fourth. Experience over the past 5 years has convincingly demonstrated that if the United States has a modest but effective program—in which technical cooperation is a major or the principal component—in operation in a neutralist, newly independent country before the bloc starts its program, the political and public relations impact of the bloc program is far, far less in most instances than where the bloc starts its program first. In the former circumstance not only will the United States already have established itself in many of the most important fields of activity and decreased the internal pressure to seek extensive and early assistance from the bloc, but will have established a qualitative standard by which the bloc activities can be compared and, despite widespread public impressions to the contrary, the bloc has suffered by comparison in the majority—but not all—cases.

Ceylon, Cambodia, Sudan, Ethiopia, and Nepal are some examples of U.S. success as a result of timely U.S. action; Syria and Guinea are examples of major Soviet successes where the United States has delayed its programs. Afghanistan is an example of a draw, probably in the favor of the U.S.S.R., even though the United States was in first; but there have been two special circumstances: first and most important has been the bitter Afghan conflict with the U.S. military ally, Pakistan; the second has been U.S. performance on implementation which has been below that of the average U.S. program in other countries.

The House appropriations bill would preclude the use of the technical cooperation appropriation for timely action. Reliance would have to be placed on a contingency fund which is already greatly overburdened.

Mr. TABER. Mr. Chairman, will the gentleman yield?

Mr. GALLAGHER. I yield to the gentleman from New York.

Mr. TABER. I want to say to the gentleman that I believe that this language in the bill at this point is absolutely necessary if we are going to have any integrity in our legislative procedures or any control over such things as this.

Mr. GALLAGHER. I thank the gentleman, but respectfully disagree.

Mr. PASSMAN. Mr. Chairman, I rise in opposition to the amendment.

Mr. HALEY. Mr. Chairman, will the gentleman yield?

Mr. PASSMAN. I yield to the gentleman from Florida.

Mr. HALEY. All this language means is that you want the people who are using our own money to come back here and justify the expenditures of that money, just like the people have to do in the Western States when they want

to put in irrigation and reclamation projects.

Mr. PASSMAN. That is correct.

Mr. Chairman, this limitation came very near to being unanimous in the committee.

Under the present legislation—not the bill today, but prior legislation—the Department may use deobligated funds to start new projects. Some of those projects which they have started in this manner would take us into 1975.

There are approximately 1,500 projects, with something like 4,000 separate subprojects, and when they come before our committee they are in two different categories: one, "continuing," and the other known as "new." We do not know what projects have been justified before the committees of the Congress or what contracts have been started with deobligated funds. We discovered situations of the latter type which were absolutely alarming; and had the gentleman read the hearings carefully and completely, I do not believe he would have offered this amendment. There has never been any category of the mutual security program abused to the extent of the technical aid part of it.

Mr. GALLAGHER. Mr. Chairman, will the gentleman yield?

Mr. PASSMAN. I yield to the gentleman from New Jersey.

Mr. GALLAGHER. Not only have I read most of the testimony, but I lived through our own testimony before the Committee on Foreign Affairs. I also recall the gentleman's statement of yesterday when the gentleman said they only wrote certain language in the bill because the witnesses who appeared before the committee did not pay attention to his committee.

Mr. PASSMAN. I think the members of the committee were almost unanimous on this provision of the bill. The Department witnesses indicated that they would start new projects, the committee's position notwithstanding. Now, we are dealing with something here that if the cost is projected into the future, it may go into billions of dollars. And, it may very well be that perhaps half, or more, of the projects now funded were never approved in the beginning, by any committee of the Congress.

Let us imagine that the Chief of the Corps of Engineers had a few thousand dollars left over in your own home State, and some favorite constituent wanted an investigation made, and another constituent wanted to use the money, say $5,000, for starting a million-dollar project. Now, that would be comparable to what we are into here.

I think this is the most important provision in this bill, to prohibit these people, on items of this nature, to go out and make obligations, enter into contracts, then place them over in a continuing category, so that when they come before the congressional committees we do not know whether they had ever been justified before the Congress or whether on their own initiative they started these projects.

I might add that at this time there are 676 of such projects as these in effect, with obligations totaling $347 million.

I think the time has come when we must tighten up on such practices.

The CHAIRMAN. The time of the gentleman from Louisiana [Mr. PASSMAN] has expired.

Mr. PASSMAN. Mr. Chairman, I ask unanimous consent to proceed for 1 additional minute.

The CHAIRMAN. Is there objection to the request of the gentleman from Louisiana?

Mr. MASON. Mr. Chairman, I object.

Mr. CONTE. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I rise in support of the amendment offered by the gentleman from New Jersey. I opposed the committee amendment because I felt that it destroyed the flexibility of the entire program.

Mr. Chairman, we have a peculiar situation, whether we like it or not, of 12 new countries that have gained their independence in Africa. Before this 12-month period is up we will have 30 new countries in Africa. The Sino-Soviet bloc are down there working night and day trying to gain the hearts and the minds of the people in Africa.

One of the most effective programs that we have is this point 4 program of technical assistance. Mr. Chairman, if the committee amendment prevails, then not one project can be started for the Camerouns, Dahomey, Niger, Upper Volta, Mali, Madagascar, Togo, Sierra Leone, or the Congo. You could not start one of these technical cooperation projects because they would not have been justified before our Committee on Appropriations.

Mr. Chairman, I have great respect for my chairman. I have worked very diligently with him through the 16 weeks of our hearings and he has done an excellent job. I believe there is not a harder working man in the Congress.

Mr. PASSMAN. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I yield.

Mr. PASSMAN. I appreciate that comment.

Mr. FORD. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Michigan.

Mr. FORD. Mr. Chairman, I think the record should show that this program since its inception has never had a limitation of this kind. With some exceptions the program in this area has proceeded, I think, reasonably well, with a limited number of instances of poor management, poor projects, poor execution. With this background, it is unnecessary to include this provision. Therefore I endorse the amendment.

Mr. CONTE. The gentleman from Michigan is absolutely right.

Mr. EVINS. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I yield to the gentleman.

Mr. EVINS. Does the gentleman feel that we should have a different rule, a rule of flexibility, for foreign projects than we have for our own Corps of Engineers projects and Bureau of Reclamation projects in this country? All the latter must first be approved by the various subcommittees on appropriations before they may proceed with the project. The gentleman is suggesting that we have a different rule for our friends overseas.

Mr. CONTE. This comes under the technical cooperation program, which is altogether different. Here we are dealing with newly developed countries. We are dealing with emergencies that arise throughout the world in Africa and southeast Asia. I do not think the two situations are parallel.

Mr. GALLAGHER. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I yield to the gentleman.

Mr. GALLAGHER. I would like to point out that the amendment offered by the committee was turned down by the Committee on Foreign Relations as being completely impractical and unworkable. I might say also, in response to the comment of the gentleman about having a different standard in the United States, that the Comptroller General also has said that it is not practicable to have this type of approach in an international problem such as in the technical cooperation program. He did not advocate the adoption of this type of legislation for this program.

Mr. CONTE. Mr. Chairman, furthermore I would like to point out why this is inflexible. We are tying the hands of the people who are involved in this program. If you negotiate a contract with a country such as Togo in Central Africa, and you find the program is going to be too costly, and would like to switch that program over to another program where you can save some money, under this proposal of the committee, unless it is approved by the House Appropriations Committee, you would have to go through with the costly program or defeat it entirely.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Illinois.

Mr. YATES. With respect to the inquiry of the gentleman from Tennessee, justification is first made on domestic projects to the Committees on Public Works of the House and the Senate before they even go to the Appropriations Committees. Under the rider which is in this bill, the departments could not even initiate the projects to the Foreign Affairs Committee of the House and the Foreign Relations Committee of the Senate before going to the Appropriations Committee. Would this reverse the usual procedure? Would the agency first have to go to the Appropriations Committee and then return to the Foreign Affairs Committee in order to justify the project? Is that the way it works?

Mr. PASSMAN. It would not work that way. The only thing we want them to do is to justify the project before either the Foreign Affairs Committee or the Appropriations Committee or both.

Mr. TABER. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I am going to tell you just exactly what inspired this language, the kind of business that has been going on. It is about time we began to wake up and realize some people have been doing things that will not pass muster.

I hold in my hand a couple of programs regarding schools, high-toned schools like Johns Hopkins University and others of similar character, set up by folks who want to run research institutions and all that sort of thing. Here they were day after day supposed to have lectures for 5 days a week in the morning and some days afternoon lectures in addition. When we sent inspectors to find out what was going on, there was nothing going on at all. They got $4,000 apiece for 20 of these people they were supposed to be training, $80,000 overall for each group. The total expenditure, as near as I can figure it, was $34,400,000 out of this particular item. It was their big item last year. How many want to vote for that piece of foolishness, that absolutely ridiculous procedure?

Mr. PASSMAN. Mr. Chairman, will the gentleman yield?

Mr. TABER. I yield to the gentleman from Louisiana.

Mr. PASSMAN. Is not this the same program where they took 9 former Government employees and 3 others, 12 in all, to start with, some of them making $80 or $90 a week, and it cost us approximately $90,000 a man to maintain them in Iran for 3 years?

Mr. TABER. It is the same kind of procedure.

Mr. PASSMAN. Ninety thousand dollars per man for 3 years, because they did not have to give any justification.

Mr. TABER. Nobody who is a friend of this program ought to vote for this amendment to strike this language out, because it means absolutely destroying the civil service of the United States.

Mr. PASSMAN. Mr. Chairman, will the gentleman yield?

Mr. TABER. I yield to the gentleman from Louisiana.

Mr. PASSMAN. This is the program under which these people started so many projects in Taipeh, and they had to abandon 206 of them because they just could not make them hold up. When you give the people the money and they can go out and obligate it, when they have not come before the committees of the Congress, you do not know what kind of a deal they are going to get into; is that not correct?

Mr. TABER. That is exactly correct. I think we ought to force these people to be honest. If we are not going to do that, I do not want anything to do with that kind of performance.

Mr. YATES. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I take this time in order to clarify the language in the amendment. I would like to know what the word "initiate" means. As I understand the word would prohibit taking any measures at all until ICA first appears before the Committee on Appropriations of the House of Representatives and of the Senate. Is that the intention of the language? Or could ICA officials appear, for example, before the Committee on Foreign Affairs of the House and of the Senate and relate their plans and their programs? If they did this, would they be violating the term "initiate any project or activity"?

Mr. PASSMAN. You can substitute the word "start" for the word "initiate." It does not matter which way we argue it. It is up to the Committee on Appropriations, after the authorizations and the fixing of the ceilings, to examine the needs and to recommend the amounts of money to be appropriated.

I do not think the gentleman can possibly argue successfully against this language. It only provides that they come before the committee and say that, for example, here is a project which would take 4 years to build, and give the cost of it, which is going to be so many dollars. Then, we would go into it and examine it, asking questions as we do for projects here in America. If we find they have merit, the money can be approved; if not, they will be turned down.

Mr. YATES. Will the gentleman permit me to ask another question?

Mr. PASSMAN. I am happy to have the gentleman ask me a question.

Mr. YATES. As I understand the gentleman's explanation then, it is perfectly proper for the agencies to consider the initiation of projects, to make plans for presenting such projects to the Congress, and to present those plans to the Congress through the Committee on Foreign Affairs in the House and the Committee on Foreign Relations of the other body before making their justification to the Appropriations Committee.

Mr. PASSMAN. That is the whole purpose of it, to have them present the proposal to the committees of the Congress so that they can justify it before they start spending money and entering into contracts that will take us in some cases up to 1972, and others that will take us up to 1975.

We have shown you the record that the cost may exceed $1 billion before completion, if you should give them the money to carry out all the projects. It is intended to call a halt to starting these projects which have never been justified before the Congress.

Mr. GALLAGHER. Mr. Chairman, will the gentleman yield?

Mr. YATES. I yield to the gentleman from New Jersey.

Mr. GALLAGHER. I would like to point out that it is the duty of the Committee on Foreign Affairs also, and an obligation that we have taken quite seriously, to review all these projects as they come about. I should also like to point out the authorization legislation which was passed by this House by a vote of 234 to 132. At that time the membership considered this bill without this provision. I do not see why we should now be changing our course.

Mr. PASSMAN. Mr. Chairman, will the gentleman yield?

Mr. YATES. I yield to the gentleman from Louisiana.

Mr. PASSMAN. As I understand it, the Committee on Foreign Affairs wanted to leave it up to the Committee on Appropriations to establish some criteria and to set some limits on these projects. There is no limit, as it is now.

Mr. Chairman, I ask for a vote.

Mr. GROSS. Mr. Chairman, I move to strike out the last word.

Mr. PASSMAN. Mr. Chairman, I ask unanimous consent that all debate on the pending amendment, and all amendments thereto, close in 10 minutes.

Mr. O'HARA of Illinois. Mr. Chairman, I object.

Mr. PASSMAN. Mr. Chairman, I move that all debate on the pending amendment, and all amendments thereto, close in 15 minutes.

The CHAIRMAN. The question is on the motion offered by the gentleman from Louisiana [Mr. PASSMAN].

The motion was agreed to.

The CHAIRMAN. The gentleman from Iowa [Mr. GROSS] is recognized for 5 minutes; then the Chair will announce the division of time amongst the Members indicating a desire to be heard.

Mr. GROSS. Mr. Chairman, it is hard for me to understand why anyone should offer an amendment striking this provision from the bill. Some reference has been made to the Government Affairs Institute as an example of what is happening in this program. The Subcommittee on Appropriations asked three top officials, including Inspector General Murphy, about this program. To begin with they apparently did not know they had a $1,113,000 contract with a management firm to supply 12 technicians to tell the Iranian Government how it should be run and they did not know any of the officials of this management firm. Read the hearing record. When first asked, they said in succession: I do not know; I do not know; I do not know."

This is the language that is sought to be stricken out:

> That no part of this appropriation shall be used to initiate any project or activity which has not been justified to the Committees on Appropriations of the House of Representatives and the Senate.

What is wrong with that provision? Why should not the Congress of the United States know what these bureaucrats seek to do with the money that is so liberally provided in this bill? This is simply the right to know and unless there is this right, Congress cannot serve the people of this country. This is one provision of the bill I support.

The CHAIRMAN. The gentleman from Illinois [Mr. O'HARA] is recognized.

Mr. O'HARA of Illinois. Mr. Chairman, I am concerned with the language in the bill which states that no project or activity can be initiated unless it has been justified to the Committees on Appropriations of the House of Representatives and the Senate. I wonder why the Foreign Affairs Committee of this body was ignored? I understand that in other matters the Committee on Public Works is considered, and certain matters may go there, then to the Committee on Appropriations, but in this case there is a complete bypassing of the Committee on Foreign Affairs, and as a member of that committee I resent it.

I yield back the balance of my time, Mr. Chairman.

The CHAIRMAN. The Chair recognizes the gentlewoman from Illinois [Mrs. CHURCH].

Mrs. CHURCH. Mr. Chairman, I have asked for this time in order to get

information, if I can, as to exactly what this amendment would do.

I see the question from two sides, I would say to the chairman of the subcommittee. I know perfectly well what he is trying to do, and how necessary it is that some control be written into the program. On a recent trip that was made by our Subcommittee on Foreign Economic Policy it took us some time before departure to get a list by applying some pressure, of all projects in the areas to be visited. Although finally we obtained what was said to be a complete list, we found in some cases that some of the projects represented as being carried on were unknown to the local team; and some places where projects were being carried on that had not been listed.

On the other hand, I do recognize that the technical assistance program was initiated as one of the most valuable parts of our mutual assistance program. I also am tremendously concerned lest the small amount of money set aside to initiate technical training in Africa be held up for another year. I wonder if the gentleman from Louisiana could tell me if this amendment were voted into being, exactly how the program would be initiated in a new country.

If the technical assistance team wished to initiate small projects while the Appropriations Committee was not meeting because the Congress was not in session, what would be the procedure and how long would be the delay?

Mr. PASSMAN. Mr. Chairman, will the gentlewoman yield?

Mrs. CHURCH. I yield to the gentleman from Louisiana.

Mr. PASSMAN. It is my understanding that so far as special assistance is concerned we have no provision prohibiting funds out of that account. This does not deal with tropical Africa. That comes in under special assistance. It has to be understood, realizing the nature of these projects, that all they would have to do would be to come before the Congress and justify them, then they would get the money.

Mrs. CHURCH. Would it be possible always to bring a project to the attention of the committee within a reasonable time?

Mr. PASSMAN. It is my understanding that we are trying only to provide for reasonable justification to the Congress. I do not know anything so important about bilaterial technical aid that would preclude such justifications. As it is now, they have gone wild. There are some 1,500 regular projects and about 4,000 special projects. The Congress has just about lost all control of it.

Mrs. CHURCH. The gentleman knows that I agree with him on that. We have lost control of the program. I would like to see the Committee on Foreign Affairs brought into the picture, when it comes to authorization, however.

Mr. GARY. Mr. Chairman, will the gentlewoman yield?

Mrs. CHURCH. I yield to the gentleman from Virginia.

Mr. GARY. This amendment does not apply to defense support or to military assistance. It applies only to the technical assistance part of it. No program should be considered without some authorization.

The CHAIRMAN. The Chair recognizes the gentleman from Minnesota [Mr. JUDD].

Mr. JUDD. Mr. Chairman, I rise in support of the amendment to eliminate this language from the bill. Technical assistance is probably the most basic work we are doing in trying to help newly emerging countries develop the skills necessary to manage their affairs well and have hope of survival.

It has never been an expensive program, relatively. The amount authorized by the committee is $22 million less than what was authorized by the Congress only a month ago. Some of these programs involve difficult situations in all kinds of countries where they may have to move rapidly. Maybe some decisions made will not work out; that is part of the risk we take. But to hamstring the agency so that it can do nothing, is a much greater risk. To freeze the program into such a rigid position as the bill's language would impose, would be an extremely unwise thing to do.

Mr. TABER. Mr. Chairman, will the gentleman yield?

Mr. JUDD. I yield to the gentleman from New York.

Mr. TABER. How is it going to be possible to stop the ridiculous waste of money they have been pulling off, and the things they have failed to do?

Mr. JUDD. When they face any emergency or changed situation, they should initiate a program to meet it. They then would have to come within a year to the House Foreign Affairs and Appropriations Committees and the same committees in the Senate. If at that time one or more of those committees decides the action taken is ill advised, ill conceived, mismanaged, or what not, the committee can include in its bill a provision saying that none of the funds appropriated therein shall be used for the designated project. Congress can get complete control within a year.

None of these technical assistance programs runs into a large amount of money. It seems to me, if we want to win in this fierce world struggle, we must have maximum imagination and flexibility for those administering this program. We can check within a year on any action they take and correct or stop it, if they have done something they should not have done.

Mr. PASSMAN. Mr. Chairman, will the gentleman yield?

Mr. JUDD. I yield to the gentleman from Louisiana.

Mr. PASSMAN. These projects were authorized by the gentleman's committee. We cannot consider any money appropriation until first the gentleman's committee has provided for the authorization.

Mr. JUDD. I am not making my argument on the basis of committee jurisdiction.

The CHAIRMAN. The Chair recognizes the gentleman from Massachusetts [Mr. CURTIS].

Mr. JUDD. Mr. Chairman, will the gentleman yield?

Mr. CURTIS of Massachusetts. I yield to the gentleman from Minnesota.

Mr. JUDD. I thank the gentleman from Massachusetts. I am not making my case here on the matter of committee jurisdiction. That case, I think, has been well made by the gentleman from Illinois [Mr. O'HARA]. I am basing my argument on the importance of the technical assistance program. I want every ill-conceived or wasteful program to be checked on and, if advisable, eliminated. But I do not want to freeze this agency so that it cannot operate in the present fluid world situation effectively. I think it ought to be given maximum hope of success.

Mr. CURTIS of Massachusetts. Mr. Chairman, I support the amendment, and believe that the committees of the House can control this program without putting it in a straitjacket. We are discussing technical cooperation, which is frequently referred to, especially by those on my right, as the point 4 program. That program was initiated with fine imagination, and has been carried out with the approval of the country. It is a program in which we are more in competition with the Soviets than in any other programs included in this bill. They move into newly freed and less developed countries and seek to capture the minds of the people. This program makes is possible for us to show those people that they can make progress in freedom. To do this effectively and at the proper time requires more flexibility than would be permitted under this bill.

In closing, I want to quote what the President said to the Philippine Congress people only a few days ago:

> But our chief and most potent asset, in the battle for men's minds and their loyalty, is our commitment to the mutual interchange of knowledge and wisdom and culture; our commitment to the mutual interchange of new skills.

Mr. Chairman, that is what this program is for, and you cannot run this activity the way you run that of the Army Engineers. The amendment should be accepted.

The CHAIRMAN. The Chair recognizes the gentleman from Louisiana [Mr. PASSMAN].

Mr. PASSMAN. Mr. Chairman, I want to say again that we are not attempting to bypass the Committee on Foreign Affairs. We are not attempting to take jurisdiction. In no case will this committee ever give any thought or consideration to appropriating for any project until the Committee on Foreign Affairs has first authorized it, and after it has been justified. All that we are trying to do is help the administration do a better job.

Let me say this: It was very nearly unanimous all the way along the line that the time had come to put some sense into this program, which has been spreading throughout the world with practically no limitation whatsoever.

Mr. BASS of Tennessee. Mr. Chairman, will the gentleman yield?

Mr. PASSMAN. I yield to the gentleman from Tennessee.

Mr. BASS of Tennessee. I would like to say to the distinguished chairman of the subcommittee that the language which this amendment attempts to strike out is the only part of this entire bill that I am for, and I hope it stays in. It makes sense.

Mr. PASSMAN. I thank the gentleman.

Mr. GALLAGHER. Mr. Chairman, will the gentleman yield?

Mr. PASSMAN. I yield to the gentleman from New Jersey.

Mr. GALLAGHER. I am very happy to hear the gentleman's words about not taking over the prerogatives of the Committee on Foreign Affairs. But, in effect, that is exactly what you are doing. I might also point out that over 1,000 projects of this nature have come before his own committee, and not one project has been declined or revised.

Mr. PASSMAN. As the situation now stands, there is not a member of this committee and there is not a Member of the House of Representatives who can identify, without inquiry, what projects have been justified before committees and what projects have been started on their own initiative. The projects are in a continuing category before they ever come to the committee, and they are really more fouled up than you might think they are.

Mr. JUDD. Mr. Chairman, will the gentleman yield?

Mr. PASSMAN. I yield to the gentleman from Minnesota.

Mr. JUDD. Your subcommittee surely can find out whether it is a new project or a continuing project by just checking whether it was begun in the last fiscal year. If it was begun in the last fiscal year, obviously it is new.

Mr. PASSMAN. To accomplish that purpose would require something like 4,000 separate investigations, for that is the number of projects and subprojects included in this program.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New Jersey [Mr. GALLAGHER].

The question was taken; and on a division (demanded by Mr. GALLAGHER) there were—ayes 55, noes 137.

So the amendment was rejected

Mr. COFFIN. Mr Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. COFFIN. On page 2, line 23, strike out "Committees on Appropriations of the".

Mr. COFFIN. Mr. Chairman, I have had a conversation with the chairman of the subcommittee and it is his intention, as I understand it, that under this procedure which has just been written into the House bill, the Committee on Foreign Affairs would not be bypassed, that his committee would not propose to appropriate unless there had been authorizing legislation. Therefore, this language merely makes clear that the ordinary authorizing-appropriating procedure would take place as it does in all other areas.

Mr. PASSMAN. Mr. Chairman, I, myself, am perfectly willing to agree to the gentleman's amendment. The gentleman's committee authorizes these projects individually and then we appropriate for them individually.

Two committees working together can certainly do a better job than one.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Maine [Mr. COFFIN].

The amendment was agreed to.

Mr. WESTLAND. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I have taken this time for one reason. I have listened with a great deal of interest to the debate on the technical cooperation program which I personally favor, believing that it is one of the best parts of this type of legislation. I have voted for the bill in the past and expect to vote for it this time.

However, some of these programs, to my mind at least, are a little bit difficult to swallow. I should like to ask the chairman of the subcommittee this question. I notice in the report on page 6 that there is a technical cooperation program for Iraq, for example, for $1 million; a technical cooperation program for Cuba for $350,000 and for the Dominican Republic for $280,000.

I just voted to sustain the language that was in the bill, so I presume that whoever came before the Committee on Appropriations had to justify these requests. This is not very easy for me to swallow.

Mr. PASSMAN. Mr. Chairman, will the gentleman yield?

Mr. WESTLAND. I yield.

Mr. PASSMAN. Does the gentleman mean they had justified these projects?

Mr. WESTLAND. Yes.

Mr. PASSMAN. It is my understanding that, as the situation has been, they get the money, and then enter into their own contracts without any specific authority on any individual contract. Under the amendment just adopted, of course, we will have the opportunity to look them over and either approve the funds or deny the funds.

Mr. WESTLAND. Is the gentleman saying that there are not funds in the present bill before us for a technical cooperating program for Iraq for $1 million, for Cuba for $350,000 and for the Dominican Republic for $280,000?

Mr. PASSMAN. It is my understanding that after the completion of the contracts now under way, the President is going to suspend the program with Cuba.

Mr. WESTLAND. What is the situation as far as Iraq is concerned?

Mr. PASSMAN. If we have entered into a contract, then we are going to have to live up to our commitment. This provision will be applicable to future contracts, not to those which are now in effect.

Mr. WESTLAND. There has been a little change in government in Iraq.

Mr. PASSMAN. We are not trying to take over the President's prerogatives. I think our President will have the right to determine whether or not this program should be suspended in Iraq.

Mr. WESTLAND. It seems to me it is within the province of the Committee on Appropriations to decide that, and not appropriate funds.

Mr. PASSMAN. Under the provision approved, it shall be within the committee's province in the future. We will appropriate authorized funds when they have been justified before the committee. The committee's position is that if our President should deem it in the best interests of the country to terminate a contract, he always has that right.

Mr. FORD. Mr. Chairman, will the gentleman yield?

Mr. WESTLAND. I yield to the gentleman from Michigan.

Mr. FORD. All three programs for the three countries the gentleman mentions were programs submitted at the time of the request for the authorization of the $172 million. This bill provides $150 million, a $22 million reduction. In effect we are squeezing it down so that the executive branch has to make certain reductions or cutbacks. They have already done so in the case of Cuba and I am sure they will have to do the same thing in other places.

Mr. WESTLAND. May I suggest to the gentleman from Michigan that I hope he can work out a way to squeeze out Iraq and Cuba and the Dominican Republic.

Mr. ROOSEVELT. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ROOSEVELT: On page 2, line 20, strike out "$150,000,000," and insert in lieu thereof "$172,000,000".

Mr. ROOSEVELT. Mr. Chairman, this amendment restores the cut made by the committee and brings it back to the budget estimated amount. The reason I do this is that we have just adopted in this House a provision which absolutely guarantees that no one can make the argument that in future appropriated funds there is not going to be the most careful look at each and every program. Having done that, are we going to face the world and say that we have raised the amount of military aid by $200 million, already acted upon, and then tell the people of the world that are listed on page 6, and remember, these are the people of the world that we want to win to our side, that the only thing America is interested in is the military side of this problem. We would seem to be telling them that we are not interested in them as people in their efforts to develop themselves for democracy. I just do not believe we really want to do that. Twenty-two million dollars is a drop in the total bucket, you might say. I hope that my colleagues will see fit to restore this amount. It will be reviewed as already provided for with great care by two committees so that there could be, I hope, no possible extravagance. It would be a signal to the world that we are looking not only on the military side of things but on what is going to help people, and people are what are going to make a victory for democracy over communism in the long run.

Mr. FORD. Mr. Chairman, will the gentleman yield?

Mr. ROOSEVELT. I yield to the gentleman from Michigan.

Mr. FORD. Is it not fair to say, however, that even with the $200 million added to the military assistance program that appropriation is still 10 percent below the total requested by the Chief Executive? However, the gentleman's amendment puts the technical cooperation amount up to 100 percent of what the Chief Executive requested. I think your argument would be sounder if you used the same percentage figure in both cases.

Mr. ROOSEVELT. I will be glad to have a substitute amendment offered, if the gentleman wants to offer it. But, at least in my book, it is better to have a 100 percent appropriation that goes directly to the benefit of people and emphasizes that part of our national affairs.

Mr. Chairman, I hope the Committee will adopt the amendment

Mr. PASSMAN. Mr. Chairman, I rise in opposition to the amendment.

Mr. TABER. Mr. Chairman, will the gentleman yield?

Mr. PASSMAN. I yield to the gentleman from New York.

Mr. TABER. Is it not a fact that this particular item is one where $34,400,000 was wasted on one crazy project?

Mr. PASSMAN. On which one of the crazy projects?

Mr. TABER. On that crazy educational program.

Mr. PASSMAN. Yes; and that is just one of them.

Mr. Chairman, we have always provided too much money for this particular phase of the program. I think the year before last, that would be fiscal 1959, even before we had concluded the hearings, Secretary Dillon stated that they had overprogramed and that they would not need the amount of money requested. Consequently, we cut it back, I believe, by $10 million, and I think they finished that year with unobligated funds in the amount of $8 million.

Here are some of the facts and figures relative to this item: In 1956 they deobligated $18,101,000. In 1957 they deobligated $6,448,000. In fiscal 1958 they deobligated $17,989,000. In 1959—that was the last complete fiscal year—they deobligated $19,350,000 out of this one category. Through February of this year, for fiscal 1960, they had already deobligated $5,427,000. So what they actually do, and make no mistake about it, is to enter in many of these contracts hurriedly and haphazardly. There is no justification for them. They get started and they have to cancel them, and others they just put behind an obligation, and after we go home they deobligate and take that money and reobligate it. All we are trying to do is to make a better program out of it.

I certainly hope you will take into account also that in this particular fund you have now the special assistance and development loan and so many of these other items included also for technical aid that they are quite difficult to find. Technical aid will have $318,417,000, with a carryover and the new appropriations recommended.

I certainly hope you will vote this amendment down.

Mr. ROOSEVELT. Mr. Chairman, will the gentleman yield?

Mr. PASSMAN. I am happy to yield to the gentleman.

Mr. ROOSEVELT. Would not the gentleman agree, when the President went down to South America on his recent visit, he came back and announced that the one thing the people down there really needed was this technical assistance? I do not say that every project on which money has been spent down there is a good project, but I do say that with the help of the language which is now in the bill, proper precautions can be taken to protect the interests of both the South American and Latin American countries as well as of the United States. We realize, certainly, that the need exists. We realize, certainly, that there is a need of assistance in the Latin American countries and South American countries and, certainly, we need their assistance if we need the assistance of any nations. I am sure the gentleman will agree that we should not slap our friends in the face.

Mr. PASSMAN. Let me say to the gentleman, you have sufficient money in what the committee is recommending to take care of every project under consideration. These people have been getting too much money. It has been stacking up.

You will have no regrets if you support the committee in its recommendations.

Mr. ROOSEVELT. Would not the gentleman agree, however, the President stated that there was a need for new projects to come forward and to be appropriated for?

Mr. PASSMAN. I might say to my distinguished friend, intended humorously, of course, that this situation reminds me of being in a city where they close the saloons at midnight. We had better get a couple of more drinks because there will not be any available after 12 o'clock." Would the gentleman advocate just because we are setting up some restrictions that they had better load up with contracts before they have to justify it to the committee?

Mr. ROOSEVELT. No, but I would like to be sure that if some worthy project that could be justified came up that there would be opportunity and money for it.

Mr. PASSMAN. Such a project is amply taken care of under the restrictive language of the bill.

I hope the amendment will be defeated.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California [Mr. ROOSEVELT].

The amendment was rejected.

Mr. TABER. Mr. Chairman, I would like to suggest to the gentleman from Louisiana [Mr. PASSMAN] that we on this side think perhaps the balance of the bill might be considered as read and open to amendment and points of order at any point.

Mr. PASSMAN. I should like to have the reading of the bill continue in regular order. We can limit debate and get through I think more quickly than if we turn it wide open to amendment.

I assure the gentleman from New York I shall consume very little time during the balance of the day.

The Clerk read as follows:

United Nations expanded program of technical assistance and related fund: For contributions authorized by section 306(a), $33,000,000.

Mr. GROSS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. GROSS: On page 3, line 2, strike out "$33,000,000" and insert in lieu thereof "$30,000,000."

Mr. GROSS. Mr. Chairman, I have heard all the debate on this foreign handout bill and I never cease to marvel at some of the statements, especially when even the supporters find it convenient to decry the ridiculous spending, ill-conceived projects, waste, extravagance and corruption. They are apologists for all this and yet they vote for it. Someone else mentioned the President's great and undying affection for the foreign handout program. I cannot help but recall another statement made by the President not long ago in which he called for belt-tightening, austerity, frugality, and so on and so forth. There are some very interesting contradictions that we get each year, in connection with this giveaway deal.

Now let me turn to my amendment.

Last year both the House and Senate reports on this bill advised the Mutual Security Administration that a reduction in percentage and total dollars contribution to this U.N. program was desired. The agency has ignored this request by asking for an increase in funds for fiscal year 1961.

If this program is so important, why cannot the other participating nations in the United Nations provide for a greater share of the costs, particularly in view of the additional bilateral technical assistance and special assistance programs currently being funded by the U.S. taxpayers?

The $30 million would provide the same amount as provided for fiscal year 1960.

It might be of interest to my colleagues to know that $1 out of $5 contributed to this U.N. fund goes for administration and operational cost of the program. If an American businessman had such overhead costs he would go broke in no time.

Let us look at a little of the history of this program. From the record of the hearings and the statement by Assistant Secretary of State Wilcox, the U.S. delegate to the United Nations last year, Representative JAMES G. FULTON, of Pennsylvania, pledged—get this—pledged $40 million of our money for the calendar year 1960 for this United Nations technical assistance program. How anybody can be so fast and so free with somebody else's money is amazing. But our colleague from Pennsylvania

[Mr. FULTON] pledged $40 million; not $33 million, but $40 million.

Now, let us look at some of the other testimony on this subject.

The gentleman from Louisiana [Mr. PASSMAN] put in the RECORD the figures on this appropriation for several years past and up to the present. I am not going to take the time to read it. Then, the gentleman from New York [Mr. TABER], after the gentleman from Louisiana had questioned why there should be an increase in the program, said this: "I would like to know why it is necessary to have any program."

Not a $3 million increase, but any program at all, was the question of the gentleman from New York [Mr. TABER].

Mr. HAYS. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Ohio.

Mr. HAYS. Did the gentleman say our share of this is 33 percent?

Mr. GROSS. I do not know what percentage our share is. It must be at least 33⅓ percent. I do know it was $30 million last year and now they want $33 million.

Mr. HAYS. I will say the gentleman is on the right track because our share of NATO, and so forth, is only 24 percent. That is because some of us got in there and argued with these people, and they agreed we should not pay more than that. That is only 15 nations. The United Nations is all of the nations in the world.

Mr. GROSS. The gentleman from Louisiana pointed out to the witnesses appearing before his committee on this subject that last year he had told them a reduction was in order, not an increase. In the light of what has happened, the people running the giveaway program thumbed their noses at the committee and Congress; is that not correct? They thumbed their noses at the committee for one of the top officials said he had not even read your report in which you told him you wanted a reduction.

Mr. PASSMAN. But that is not the worst part of it.

Mr. GROSS. Let us cut this back to the appropriation for the current year. Let us take $3 million off this program and stop indulging in lipservice.

Mr. PUCINSKI. Mr. Chairman, the gentleman from Iowa [Mr. GROSS] has asked why the United States should engage in the building of a children's hospital in Krakow, Poland. I am sure the gentleman is well aware of the tremendous contribution that the people of Poland have made to the defense of freedom, not only in World War II, but for many centuries before that.

I strongly support this proposal to build a children's hospital in Krakow, Poland. It is neither the fault of the children of Poland nor even their parents that this gallant nation today finds itself under the rule of a Communist regime. This Communist regime which today rules the people of Poland was imposed on these people through the hypocrisy and deceit of the Soviet Union immediately following World War II, and despite the fact that the people of Poland had been promised free and unfettered elections after the war, it was Soviet treachery which has denied these Polish people this right. There is no question in my mind and I feel confident that the gentleman from Iowa [Mr. GROSS], will agree, that if the people of Poland were given the privilege of holding free and unfettered elections today, not a single Communist would survive in public office in Poland.

The history of the Polish people's determined struggle for freedom has been a source of inspiration to all nations of the world for many decades. We know that the people of Poland have traditionally maintained the true spirit of liberty against overwhelming odds. We know that even in 1956, when the people of Poland were faced with indescribable recriminations, they staged the gallant uprising in Poznan which has led to at least a semblance of independence from complete Soviet domination.

I respect the efforts of the gentleman from Iowa [Mr. GROSS] to indulge in economy, and I certainly share his great desire to ascertain that every American dollar spent in the mutual security program will bring the most positive results. Mr. Chairman, it is my sincere opinion that this project to build a children's hospital in Krakow, Poland, is one of the best features of this entire legislation. This hospital is to be built with counterpart funds which belong to the United States and cannot be spent anywhere but in Poland. I can think of no more humane project than this proposed hospital to demonstrate to the people of Poland that the United States continues to hold them and their dedication to freedom in high regard. This hospital built with American counterpart funds will be a monument to the tradition of charity and humane understanding which has characterized the American people since the founding of our Nation.

Few countries in the world have suffered as much as the Polish people have in their struggle for freedom. The present Communist regime in Poland, I am certain, ultimately will fall of its own oppression. But this hospital, which will help open new health opportunities for the little children of Poland, shall continue to stand and serve humanity.

The assistance that we propose here today to the people of Poland is a dramatic way in which we Americans can demonstrate our traditional friendship to the heroic people of Poland. I am confident that the day will come when Poland and all the other captive nations of Europe will again join the family of free nations. This hospital, along with all the other assistance that we give to the people and children of Poland, will long remain as America's contribution toward that goal.

I am hoping, Mr. Chairman, that we will not only approve the expenditures for this very humanitarian project in Krakow, but that in the near future we will also approve a project to build a school in Hyze, Poland, the birthplace of Gen. Wladyslaw Sikorski, in his honor. This great Polish general was killed during World War II at the height of his efforts to lead Poland as a gallant ally of the western democracies.

We have in Poland now, some $79 million of frozen counterpart funds. I know of no greater way to help the people of Poland and the people of other captive nations to understand that we have not forgotten them during this tragic period when they must suffer the loss of freedom to Communist rule, than to encourage the liquidation of these counterpart funds on humane projects such as the children's hospital in Krakow. It is for this reason that I am strongly supporting the amendment of the gentleman from Wisconsin [Mr. ZABLOCKI] and hope that the House will concur in its adoption.

Mr. PASSMAN. Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from Iowa.

This is just a little different from the bilateral technical aid program. Whether I like the program or not I must face up to my responsibilities and recognize that we are already committed. We gave our representative permission, consent or authority to commit our Government for a certain amount of money. We make this to the U.N. and the U.N. makes the allocations. If it is the wish of the Committee on Foreign Affairs to recommend a lesser amount next year and if that fact is indicated to the members of the U.N. which are participating in putting up the other portion of the money, I, myself, will go along with that; but as long as we have made a commitment we should live up to our commitment.

Mr. Chairman, I hope the amendment will be voted down.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Iowa [Mr. GROSS].

The question was taken; and on a division (demanded by Mr. GROSS) there were: ayes 32, noes 93.

So the amendment was rejected.

The Clerk read as follows:

Special assistance, general authorization: For assistance authorized by section 400(a), $206,000,000, of which not to exceed $1,500,000 may be used to purchase foreign currencies or credits owed to or owned by the Treasury of the United States for assistance authorized by section 400(c) for construction of the American Research Hospital for Children in Poland at the University of Krakow: *Provided*, That no part of this appropriation shall be transferred by the International Cooperation Administration or the Department of State to the Benjamin Franklin Foundation, until a new agreement is entered into between the United States and the Benjamin Franklin Foundation which contains adequate financial and administrative controls for the protection of the Government of the United States.

Mr. GROSS. Mr. Chairman, a point of order.

The CHAIRMAN. The gentleman will state it.

Mr. GROSS. Mr. Chairman, I make the point of order against the language beginning on page 3, line 7, and ending on line 12 which reads as follows: "of which not to exceed $1,500,000 may be used to purchase foreign currencies or credits owed to or owned by the Treasury of the United States for assistance authorized by section 400(c) for con-

struction of the American Research Hospital for Children in Poland at the University of Krakow:".

Mr. Chairman, this language is legislation on an appropriation bill. The authorizing act, the Mutual Security Act of 1959, provides for the utilization of "foreign currencies for hospitals abroad designed to serve as centers for medical treatment, education and research founded or sponsored by citizens of the United States."

In contrast, this language in the bill under consideration provides for a discretionary use of appropriated funds to purchase foreign currencies owed to or owned by the Treasury of the United States. The authorizing language does not provide for the use of appropriated funds for the purposes stated in the objected-to language. This language is not a true limitation on an appropriation bill as it provides for or authorizes positive action through permissive authorizing language.

Mr. GARY. Mr. Chairman, the language is clearly authorized and the point of order is not well taken because the appropriation is authorized under section 400(c), and it must be in accordance with that provision. The provision authorizes the use of foreign currency. We appropriate the dollars to buy the foreign currency that is now in the Treasury, but no American dollars can be used for the project. The provision provided for here is simply a bookkeeping provision which appropriates money, American dollars, to purchase the foreign currency in the Treasury, and I submit that that is a use of the foreign currency and therefore that it is in order.

The CHAIRMAN. Does the gentleman from Wisconsin desire to be heard on the point of order?

Mr. ZABLOCKI. I merely sought recognition to ask the gentleman from Iowa whether he would withhold his point of order. I have an amendment to this section which I am sure would satisfy the gentleman from Iowa.

Mr. GROSS. I will say to the gentleman I will make a point of order against his amendment if it is what I think it is.

Mr. ZABLOCKI. Will the gentleman permit my amendment to be presented?

Mr. GROSS. I would rather have a ruling on this.

The CHAIRMAN. Permit the chair to direct a question to the chairman of the subcommittee or to a member of the committee, particularly the chairman. Is this language contained in the point of order made by the gentleman from Iowa, "of which not to exceed $1,500,000 may be used to purchase foreign currencies or credits owed to or owned by the Treasury of the United States" authorized and, if so, where?

Mr. ROONEY. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. The Chair has addressed the question to the chairman or to a member of the committee.

Mr. PASSMAN. That is the usual language where we are withdrawing foreign currencies from the Treasury.

The CHAIRMAN. The Chair will be glad to hear the gentleman from New York or any other member of the committee as to whether or not this particular language is authorized by law and, if so, where.

Mr. GARY. Mr. Chairman, may I read the provision of law authorizing it? It is section 400(c) of the Mutual Security Act of 1954 as amended. It provides:

The President is authorized to use not to exceed $20 million of the funds appropriated pursuant to subsection (a) of this section for assistance on such terms and conditions as he may specify to schools and libraries abroad founded or sponsored by citizens of the United States and serving as study and demonstration centers for ideas and practices of the United States notwithstanding any other act authorizing assistance of this kind.

And further:

In addition to the authority contained in this subsection it is the sense of Congress that the President should make a special and a particular effort to utilize foreign currencies accruing under title I of the Agricultural Trade, Development and Assistance Act of 1954 as amended and notwithstanding the provisions of Public Law 213, 82d Congress, the President is authorized to utilize foreign currencies accruing to the United States under this or any other act for the purposes of this subsection and for hospitals abroad designed to serve as centers for medical treatment, education, and research, founded or sponsored by citizens of the United States.

The CHAIRMAN (Mr. MILLS). The Chair is of the opinion that the language of section 400(c) as read by the gentleman from Virginia [Mr. GARY] is sufficient to establish the point that this language is authorized by law; and therefore the Chair overrules the point of order made by the gentleman from Iowa [Mr. GROSS].

Mr. ZABLOCKI. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ZABLOCKI: On page 3, line 7, after "206,000,000," strike out beginning "of which not" and through the colon on line 12 and insert on page 3, after line 19, the following:

"Special assistance, special authorization: For assistance authorized by section 400(c) for hospital construction the equivalent of $1,500,000 in local currencies to remain available until expended."

Mr. GROSS. Mr. Chairman, a point of order.

The CHAIRMAN. The gentleman will state it.

Mr. GROSS. Mr. Chairman, I make a point of order against the amendment and against the words "until expended" as not being authorized. I would call the Chair's attention to title 31, United States Code, 718, which provides as follows:

No specific or indefinite appropriation made subsequent to August 24, 1912, in any regular annual appropriation act shall be construed to be permanent or available continuously without reference to a fiscal year unless it belongs to one of the following four classes: "Rivers and harbors," "lighthouses," "public buildings," and "pay of the Navy and Marine Corps," last specifically named in and excepted from the operation of the provisions of section 713 of this title, or unless it is made in terms expressly providing that it shall continue available beyond the fiscal year for which the appropriation act in which it is contained makes provision.

Mr. Chairman, I point out that this is an annual appropriation bill and, therefore, this is language on an appropriation bill that is not authorized by law.

Mr. ZABLOCKI. I will not argue the point, Mr. Chairman. I concede the point of order.

The CHAIRMAN. The Chair sustains the points of order.

Mr. ZABLOCKI. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ZABLOCKI: On page 3, line 7, after "$206,000,000," strike out "of which not" and through the colon in line 12, and on page 3, after line 19, insert the following:

"Special assistance, special authorization: For assistance authorized by Section 400(c) for hospital construction the equivalent of $1,500,000 in local currencies."

Mr. ZABLOCKI. Mr. Chairman I want to thank the chairman of the Mutual Security Appropriations Subcommittee and express appreciation to the Appropriations Committee for the sympathetic interest and consideration shown to the American Research Hospital for Children project. From conversations with the chairman of the subcommittee and the ranking minority member I understand there is no objection to this amendment and that the amendment will be accepted by the committee.

Mr. PASSMAN. I have discussed the proposal with the members of the committee. As the amendment has been explained to me, I have no objection.

Mr. TABER. The result of that amendment would be to increase the amount of money available in line 7, of $206 million by $1,500,000. That is the only objection to the amendment; and why should we do that?

Mr. PASSMAN. It was my understanding the amendment would not increase the amount of money.

Mr. ZABLOCKI. It would not increase the dollar amount. Foreign currency is available to the credit of the Treasury of the United States. I made that very clear in discussing the amendment.

Mr. JUDD. Mr. Chairman, will the gentleman yield?

Mr. ZABLOCKI. I yield to the gentleman from Minnesota.

Mr. JUDD. As the gentleman pointed out earlier, this will not increase the amount of dollars actually spent, it will merely free $1,500,000 worth of some 79 million zlotys we have in Poland that are not being used for any purpose, and make them available for this very worthy use.

Mr. TABER. The gentleman is mistaken. This would simply add $1,500,000 to the funds that would otherwise be available if the language goes through as it is written. The usual practice is to have the money paid over to the Treasury, foreign money, instead of appropriating these funds.

Mr. ZABLOCKI. I conferred with the chairman of the subcommittee and the ranking minority member of the committee. I thought we had a clear understanding of the intent and scope of the

amendment my distinguished colleagues agreed to accept the amendment.

Mr. PASSMAN. That is true, but the amendment of the gentleman from Iowa may possibly have changed the situation. If the amendment does not increase the $206 million of special assistance, then I, myself, am willing to accept the amendment. If the gentleman is increasing the money in the bill then the committee would not be willing to accept the amendment.

Mr. ZABLOCKI. It does not increase the dollar expenditure of money in the bill.

Mr. PASSMAN. If the gentleman's amendment would accomplish what it proposes, would it have to increase the amount?

Mr. ZABLOCKI. My amendment would allow the appropriation of foreign currency, zlotys, to the equivalent of $1,500,000. No additional dollars would be appropriated to the total dollar amount in the bill.

Mr. PASSMAN. The gentleman is correct. It is to be regretted that what appears to be a technicality must apply to what I consider a worthy project. I would regret to see it ruled out on a technicality.

Mr. ZABLOCKI. It was my understanding that the ranking member of the committee, the distinguished gentleman from New York also accepted the amendment.

Mr. TABER. I would not want it to be said I accepted the amendment, because I think the gentleman does not understand it. It does require making the $206 million appropriation for this special asistance and then, in addition to the special assistance, there is an appropriation of $1,500,000 out of foreign currencies in the Treasury, instead of going through the regular process.

Mr. FORD. Mr. Chairman, will the gentleman yield?

Mr. ZABLOCKI. I yield to the gentleman from Michigan.

Mr. FORD. I believe the interpretation by the gentleman from New York [Mr. TABER] is correct. However, despite that interpretation, I am in favor of the amendment. I think it is sound. I think we ought to approve it. There is no doubt in my opinion that you are making available $206 million in U.S. cash through new obligation authority, and this amendment provides another $1,500,000 in obligation authority to buy foreign currencies for the project. I think that is the way we should do it, otherwise, you are squeezing down even further the special assistance program.

Mr. ZABLOCKI. I thank the gentleman for his contribution.

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

Mr. ZABLOCKI. Mr. Chairman, I ask unanimous consent to proceed for 5 additional minutes.

Mr. MASON. I object.

Mr. YATES. Mr. Chairman, I move to strike out the last word.

Does the gentleman from Wisconsin ask that I yield?

Mr. ZABLOCKI. I would be delighted if the gentleman would yield to me.

Mr. YATES. I yield to my colleague.

Mr. ZABLOCKI. Mr. Chairman, I understand the appropriation of the additional $1,500,000 for this purpose would release or transfer the equivalent of that amount of dollars in foreign currency which is credited to the Treasury of the United States. To that extent, it would make available foreign currency in addition to the total appropriation in this measure, but it would not increase the expenditure of dollars appropriated in this bill. Therefore, I urge the committee to approve this very worthy project.

Mr. PASSMAN. Mr. Chairman, will the gentleman yield?

Mr. YATES. I yield to the gentleman from Louisiana.

Mr. PASSMAN. I might say to the gentleman that the chairman of the subcommittee has no authority to accept any amendment without a vote. So, on account of the procedure and the situation, and the amendment of the gentleman from Iowa, I have to confess that I, personally, am somewhat placed in a box and no less than confused at this point. I can only say we thought that there would be no opposition to the proposal, but as there seems to be some opposition, I must, of course, respect the views of the committee and abide by the rules of the House. I have no right, as chairman of the subcommittee, to accept the amendment.

Mr. PUCINSKI. Mr. Chairman, will the gentleman yield?

Mr. YATES. I yield to the gentleman from Illinois.

Mr. PUCINSKI. Just so that we can get this matter back into perspective, as I understand the situation, there is no opposition to the amendment which has just been offered by our colleague, the gentleman from Wisconsin, and there is no opposition to it on the basis of any parliamentary situation because that has just been disposed of by the ruling of the Chair on the point of order. If I am not correct in that statement, Mr. Chairman, I wish to be corrected.

Now, Mr. Chairman, we are addressing ourselves to the merits of the pending amendment. As I understand the situation, this amendment merely unfreezes $1,500,000 worth of counterpart funds which are now available in Poland. This money should be used for construction of this very worthy project. But, it does not alter the actual dollar contribution of the United States toward the purposes of this legislation. The money already is on deposit in Poland. That, Mr. Chairman, is my understanding of the amendment offered by the gentleman from Wisconsin, and I am happy to support it.

Mr. JUDD. Mr. Chairman, will the gentleman yield?

Mr. YATES. I yield to the gentleman from Minnesota.

Mr. JUDD. Mr. Chairman, I should like to say a word about the merits of this amendment. The amount in the authorization bill was $256 million for special assistance for 22 of our loyal friends around the world to whom we do not give military assistance, but whose political stability and survival as free countries is of great importance to the security of the world and of the United States of America. The committee has already reduced that by $50 million to $206 million. If this amendment offered by the gentleman from Wisconsin is not adopted, we will further reduce by $1,500,000 the contributions for countries and areas like West Berlin, Tunisia, Morocco, Libya, Jordan, Israel, Afghanistan, Burma, and so on. The bill as it now is would take $1,500,000 more away from our friends to make it available for zlotys behind the Iron Curtain. The zlotys are available there and can be used for this worthy purpose and without reducing funds for the other countries by adopting the amendment offered by the gentleman from Wisconsin. So, Mr. Chairman, I urge the committee to adopt the amendment.

Mr. YATES. I now yield to the gentleman from Wisconsin [Mr. ZABLOCKI].

Mr. ZABLOCKI. I thank my distinguished friend from Illinois. I asked him to yield to me in order that I may obtain a clarification from my distinguished colleague from Louisiana as to the intent of the committee in submitting the recommendation on page 9 of the report.

As the gentleman knows, the sponsors of the American Research Hospital for Children have spent in excess of $65,000 in the preliminary and organizational phases of this project. An additional $50,000 worth of foreign currency has been appropriated and expended on the preparation of detailed plans for the hospital. The sponsors are currently in the process of obtaining services and equipment, and of raising additional dollar funds from private sources.

It is my understanding that the committee intended the use of foreign currency to be contingent upon a reasonable and satisfactory assurance that the dollar requirements of the project would be raised from private sources.

Certainly the Committee on Appropriations did not intend to prohibit the release of any foreign currencies, thereby stopping further work on this project, until the sponsors raise all of the dollars—some $2.2 million—necessary to equip and complete the hospital?

Is my understanding correct in this respect?

Mr. YATES. Mr. Chairman, I yield to the chairman of the committee to reply.

Mr. PASSMAN. As chairman of the subcommittee, I think I should say that it is not the purpose of the committee to deprive you of something, but rather to endeavor to assure that the others who are going to contribute start meeting the dollar requirements for this project.

Mr. ZABLOCKI. I thank the gentleman.

Mr. PASSMAN. And I want to assure the gentleman again that only parliamentary procedure prevents me at this time from going further, personally, than expressing sympathy for the gentleman's position.

Mr. ZABLOCKI. It is clear, therefore, that the work on the project need not stop until every dollar requirement

is met. The construction of the hospital can proceed on schedule, contingent on the availability of dollars to meet current and immediate future expenses.

As the gentleman from Louisiana knows, according to the estimated cost of the project, the amount of dollars needed in fiscal 1961 will be approximately $150,000—while the foreign currency expenditures during that year will run close to a million dollars worth.

I understand, therefore, that the sponsors of the hospital will have to show that they have forthcoming, for example, $100,000 or $150,000 in order to secure a release of the foreign currency.

Mr. Chairman, to allay any apprehension that the American Research Hospital for Children in Poland will lack the necessary support to assure dollar financing and proper administration, I wish to place in the RECORD a progress report, dated June 1, 1960, which I received from Mr. Wladek Biernacki-Poray, chairman of the executive committee for the hospital.

Mr. Poray's letter refers to the fundraising activities and the arrangements being made to assure proper administration of the hospital upon its completion.

Mr. Poray's report reads as follows:

THE AMERICAN RESEARCH HOSPITAL
FOR CHILDREN IN POLAND,
New York, N.Y., June 1, 1960.

Re fund-raising activities.

HON. CLEMENT J. ZABLOCKI,
House of Representatives,
Washington, D.C.

MY DEAR CONGRESSMAN ZABLOCKI: When the report on the proposed American Research Hospital for Children was submitted to the Department of State, our committee again approached certain foundations with a view to secure financial assistance for the project.

In a meeting with the executive vice president of one of the largest foundations we have presented the objectives of the proposed hospital; among them the gains that may be realized through the coordination of the hospital's research program with the major medical centers in the United States, which generally fits into the sphere of interest of the foundation. He expressed a vivid interest in the project and assured us that it would be seriously considered by the board of directors of the foundation.

Another large foundation has been also asked for their support, and have assured some members of the committee of the foundation's interest in the project. The impression that was received indicates that their interest would materialize into a concrete assistance, when the project would be assured of the primary assistance in the form of allocation of Polish currency from the U.S. Government. Availability of these funds for general construction would be regarded as a practical endorsement of the project by the U.S. Government, and it would remove any doubts that the project would not be started. The policy of many foundations, as we understand, is to help the "going" projects, and in our meeting with the executive director of still another foundation we again received a strong impression that chances for substantial assistance would be much greater when the Polish funds are allocated for the project. The Sloan-Kettering Institute has already taken an active interest in the project by their willingness to train (paying also all expenses, transportation, and providing substantial stipends) doctors, scientists, and nurses, who would form the staff of the research department of the proposed hospital. We have also an indication that the institute would consider donation of the laboratory equipment and certain research facilities for the research department, as it is willing to assume a major role in the mutual research program on the subject of oncology.

It may be appropriate to mention that certain firms and manufacturers of building products and equipment indicated their willingness to donate certain products (e.g., Sylvania Electric, electrical equipment and fixtures; Willet Glass Co., glass windows, etc.). Under the present conditions these donations could not be materially received, but when the storage facilities are erected on the building site, and the free transportation provided (as offered) by the Polish Government, we would be able to start an effective campaign for donation of funds and equipment. We are very encouraged with the interest displayed so far. Following a series of articles last year in the New York Times, and in the This Week magazine, we have received a considerable number of inquiries. We understand that a number of nationally known publications (the New York Times, Time, Life, the Saturday Review, and others) are very interested to give coverage to the project when the groundbreaking would take place. This would be a very effective media to start a fund and equipment raising campaign, as we would be in an excellent position to convince donors that their assistance is immediately and necessarily required.

We are seriously determined to assure the most expeditious and effective completion of the project. As a measure of our determination may serve an indication of our efforts to date; in the preliminary and organizational phases of the project, since February 1958 when it was first conceived until the present time unreimbursed expenses have exceeded the sum of $65,000. These are the direct expenditures for preliminary planning, engineering, research, trips to Poland, Washington (over 60 trips made), conferences, promotional and organizational work. Apart from this, CARE has also been carrying a considerable amount of its own expenses. This financial effort produced desirable results, inasmuch as the project at this time is a subject of consideration by the U.S. Congress and ready to be started as soon as the primary funds in Polish currency are available.

If the decision of the U.S. Congress would result in the appropriation of the zlotys equivalent to approximately $3,350,000 ($3,338,967) as per reported estimate, the ground for the project can be broken this summer, possibly in mid-August. Only such an early start of construction would make it possible to fulfill one of the theses of the project—that is, donation of the hospital as a highlight of the 600th anniversary of the university in assurance that the project would in reality be started would be, in our opinion, a very strong incentive for the foundations, individual, and industrial donors and other to make concrete commitments of assistance.

It is entirely possible, of course, to construct the hospital with a negligible amount of dollars, in the same way as other hospitals are being constructed by the Polish Government, for local currencies. This would negate one of the main theses of the project; namely, that it should represent visually and technically the advanced status of the American design and mechanical functioning, the progress that our free system is capable to produce. These are, in our opinion, very desirable elements, but even without these the project would offer a new concept in its architectural layout, and would be a very desirable addition to the hospital facilities so desperately needed in Poland. It would make possible to originate the new campus for the medical academy of the university, thus serving as a tangible evidence of the American interest in the welfare of children of Poland and the future of medical education. Such an action would not be forgotten by the people of Poland, doctors and the spirited students of Poland, who gave such a display of their admiration to the United States during the coup d'etat of October 1956.

Respectfully submitted.

W. D. BIERNACKI-PORAY,
Chairman, AIA.

Mr. Chairman, I am convinced that the hospital would, by symbolizing the interest of the American people in the welfare of the people of Poland, have a favorable effect in terms of U.S. foreign policy objectives. I sincerely hope, therefore, that every effort will be made to expedite the construction of the hospital which will be a lasting memorial and source of credit to the United States.

Mr. GROSS. Mr. Chairman, I offer a substitute amendment.

The Clerk read as follows:

Amendment offered by Mr. GROSS as a substitute for the amendment offered by Mr. ZABLOCKI: On page 3, line 7, strike out the language beginning: "of which not" and running through the colon in line 12.

Mr. GROSS. Mr. Chairman, I would like to ask someone on the committee to tell me why we should build a hospital of any description in Communist Poland. I am in favor of hospitals but this may have serious ramifications.

Mr. JUDD. If the gentleman will yield——

Mr. GROSS. I asked someone on the Appropriations Committee to explain.

Mr. TABER. I cannot tell the gentleman.

Mr. GROSS. I wonder if the chairman of the subcommittee can tell me. Can the gentleman from Louisiana tell me why we are starting to build a hospital in Poland?

Mr. PASSMAN. I am not going to endeavor at this time to place my judgment concerning this particular proposal against that of the President. The hospital would be built out of local currencies, and I think it might serve a useful purpose.

Mr. GROSS. What kind of precedent are you setting? What is going to be the demand upon the taxpayers of this country when other countries demand that we build hospitals for them?

Mr. PASSMAN. Local currency only is to be used.

Mr. GROSS. I know all about these local currencies, but this money was originally American dollars.

Mr. PASSMAN. Mr. Chairman, will the gentleman yield further?

Mr. GROSS. I yield.

Mr. PASSMAN. I have endeavored to be fair, to pinpoint my cases, and to try to reduce the waste. I know the gentleman fully supports this effort, and I know, too, that he shall continue to do so.

Mr. GROSS. Certainly I will.

Mr. GARY. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Virginia.

Mr. GARY. The amount of money in this bill is about one-fourth of what it is estimated that the hospital will cost. I think it is one-fourth, certainly not over half.

The project is being fostered by some private interests in this country. They are going to raise the necessary dollars to build this hospital. You cannot build a hospital entirely on local currency. They will raise the dollars. We have local currency running out of our ears.

Mr. GROSS. Let me ask the gentleman this question. We have some $2.5 billion of country currencies floating around all over the world. Are we now going into every country in the world with a hospital building program?

Mr. GARY. We are already in with every other kind of program. I do not know a better program than a hospital program.

Mr. GROSS. If that is the case, I throw in the sponge and ask unanimous consent to withdraw my amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from Iowa.

There was no objection.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Wisconsin [Mr. ZABLOCKI].

The amendment was agreed to.

Mr. SIKES. Mr. Chairman, I move to strike out the last word.

Mr. SIKES. Mr. Chairman, I rise to ask the chairman of the subcommittee one or two questions, if I may have his attention. I shall be brief.

I know that the gentleman from Louisiana has always considered this program with great care and wisdom, and is literally saving the American taxpayer billion of dollars. I think the country owes a tremendous debt of gratitude to the gentleman and to his subcommittee.

May I ask the chairman of the subcommittee, Would not the gentleman agree that grant aid, whether under special assistance or the President's contingency fund, should be used sparingly—only in very special and exceptional situations?

Mr. PASSMAN. I am in complete accord with the gentleman's viewpoint.

Mr. SIKES. May I go one step further and may I ask the gentleman by way of clarifying legislative intent, notwithstanding this situation would it not be the understanding of the chairman of the subcommittee that Guatemala, a country which is solidifying the anti-Communist forces in the delicate Caribbean and Central American area, falls into this exceptional category and that any forthcoming special assistance or contingency fund assistance to that country could well be by grant, particularly in view of the current effort of the Arbenz Communist group, now associated with Castro in Cuba to regain a foothold by force in Guatemala?

Mr. PASSMAN. I want to say to the gentleman that I am certainly in accord with his position. I feel that Guatemala is in a singular position and is deserving of special consideration.

Mr. COLLIER. Mr. Chairman, I move to strike the requisite number of words to ask a question that just occurs to me.

In the first session of the 85th Congress, as a part of what was then known as the Middle East Doctrine, we authorized and later appropriated, as I recall, some $200 million and at the same time authorized the executive to expend that sum in the Middle East.

Can anyone tell me what remains unexpended of that sum?

Mr. PASSMAN. As of June 30, this fiscal year, there will remain in the reserve fund a total of $61,247,000 unexpended.

Mr. COLLIER. If I may ask one further question, does that sum embrace more than the $200 million original authorization approved by this Congress in 1957, or does this include other funds?

Mr. PASSMAN. It is my understanding that this is the residue of that particular account that is obligated but unliquidated.

Mr. COLLIER. I thank the gentleman.

The Clerk read as follows:

Intergovernmental Committee for European Migration: For contributions authorized by section 405(a), $10,000,000: *Provided*, That no funds herein appropriated shall be used to assist directly in the migration to any nation in the Western Hemisphere of any person not having a security clearance based on reasonable standards to insure against Communist infiltration in the Western Hemisphere.

Mr. WALTER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WALTERS On page 3, line 26, after the period insert "*And provided further*, That no funds herein appropriated shall be used to pay transportation costs of any doctor or immigrant inspector or for any space not required to be allotted by the applicable United States maritime laws and regulations."

Mr. GARY. Mr. Chairman, I reserve a point of order on the amendment.

Mr. WALTER. Mr. Chairman, the amendment under consideration is aimed at a very old royal proclamation or edict, whatever the law is called, that was adopted many years ago at a time when immigrants were not given the kind of protection they are on American ships. Under the laws of the United States it is necessary that each ship carrying immigrants have a hospital and medical facilities. But, despite the ample protection given to these people, under the old edict the Italian Government assigns to duty on every American ship a doctor and an immigrant inspector and requires that the American line provide space for an infimary. Nobody knows of a case in recent years where the doctor's services were required. Certainly, no immigrant inspector performs any services on a vessel. This is a needless expense, and I am sure but for the political implication, the officials in the Italian Government would themselves remove this law.

Mr. Chairman, the amendment is very definitely a limitation on expenditures. It does not provide any legislation but limits the authority to use the money appropriated in this section of the appropriation bill.

The CHAIRMAN. Does the gentleman from Virginia withdraw his point of order?

Mr. GARY. I withdraw my point of order, Mr. Chairman.

The CHAIRMAN. Does the gentleman from Louisiana desire to be heard?

Mr. PASSMAN. Mr. Chairman, I ask for a vote on the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania [Mr. WALTER].

The amendment was agreed to.

LEGISLATIVE PROGRAM FOR THE BALANCE OF THIS WEEK AND NEXT WEEK

Mr. HALLECK. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I have taken this time to ask the acting majority leader concerning the program for the balance of the week and for next week.

Mr. ALBERT. It is our hope to finish this bill this evening and to adjourn over until Monday.

For next week, Monday is Consent Calendar day. Then there are 20 suspensions, as follows:

First. H.R. 12313, increase pay professors, U.S. Military and U.S. Air Academy.

Second. H.R. 12570, armed services, transportation limitation on household effects.

Third. H.R. 12572, Armed Forces, procurement.

Fourth. S. 2969, medals and decorations, chaplains.

Fifth. H.R. 12346, Federal Reserve Act, sale of obligations.

Sixth. S. 1886, Communications Act, community antenna television system.

Seventh. S. 1965, regulatory agencies, removal and terms of office of members.

Eighth. H.R. 7593, air carriers, add planes.

Ninth. S. 1508, Alaska Railroad, economic regulation.

Tenth. S. 1509, Interstate Commerce Act, grandfather rights.

Eleventh. H.R. 6871, Public Health Training Service Act of 1959.

Twelfth. H.R. 5436, national register of revoked drivers licenses.

Thirteenth. House Joint Resolution 649, International Health Research Act of 1960.

Fourteenth. H.R. 3900, Puerto Rico, trade, hydrofoil vessels.

Fifteenth. S. 2669, Alaska, vessel inspection.

Sixteenth. S. 3189, coastwise trade in rebuilt vessels.

Seventeenth. H.R. 9600, surplus property, donation.

Eighteenth. H.R. 11499, surplus property, personal use by States.

Nineteenth. H.R. 12564, Vermont, develop Victory Reservoir.

Twentieth. H.R. 12547, Foreign Service Act amendments of 1960.

Mr. BASS of Tennessee. Mr. Chairman, will the gentleman yield?

Mr. HALLECK. I yield.

Mr. BASS of Tennessee. Is it the intention of the leadership to bring up the library services bill next week?

Mr. ALBERT. No. I would like to advise that there is a primary in Maine on Monday and we are hoping that votes on Monday and Tuesday may be put over. We shall undertake to get that agreement later.

On Monday, in addition to the suspensions, there are two bills under rules; H.R. 11123, the Gorgas Memorial Labo-

ratory, an authorization of appropriation; and the continuation of H.R. 4815, the transit company sightseeing bill.

Mr. HALLECK. Would they follow conclusion of action on these suspensions?

Mr. ALBERT. The gentleman is correct.

Tuesday is Private Calendar day, and there are two bills, under rules, H.R. 12261, Farm Surplus Reduction Act of 1960; and H.R. 8860, lead and zinc, to stabilize mining.

On Wednesday, Thursday, Friday, and Saturday the following bills will be considered:

H.R. 12580, the social security amendments of 1960; S. 1898, license and rehearings, Communications Act. If that bill is not completed on Wednesday then S. 1898 will follow the supplemental appropriation bill.

Next is the supplemental appropriation bill for 1961.

Then H.R. 7624, the food additives control bill; H.R. 9996, importation of excess property; H.R. 12176, extension of the farm labor program, agriculture; and H.R. 2467, the Chantilly Airport—moving expenses for tenants and owners of land.

There is the general reservation, that any further program may be announced later and conference reports may be brought up at any time.

Mr. COLMER. Mr. Chairman, I did not hear the acting majority leader refer to H.R. 7201, a bill out of the Committee on Interstate and Foreign Commerce for which a rule was reported out about 3 weeks ago.

Mr. ALBERT. It is planned to program that bill for the week of June 27, I will advise the gentleman.

Mr. COLMER. That has been out a good while, but I suppose there is not much I can do about it except exercise a right that I prefer not to exercise.

Mr. ALBERT. The gentleman will observe that we have a very heavy week, including a number of major bills as well as a large number of suspensions. I do not intend to infer that the gentleman's bill is not a major bill, but we have an agricultural bill, an appropriation bill, and a social security bill, among others, programed for the week.

Mr. COLMER. Of course, I do observe that it is a very busy week, but we have had some very quiet weeks.

Mr. ALBERT. I can assure the gentleman that I shall do my best to accommodate the gentleman and program the bill in which the gentleman is interested in due course—probably the week of June 27.

Mr. ANDERSEN of Minnesota. Mr. Chairman, will the gentleman yield?

Mr. HALLECK. I yield to the gentleman.

Mr. ANDERSEN of Minnesota. I asked the gentleman to yield for the purpose of asking the acting majority leader regarding the Poage farm bill. I understand a rule was granted on that bill this morning; is that correct?

Mr. ALBERT. The gentleman is correct. That bill is programed as the first order of business following the Private Calendar on Tuesday next.

Mr. ANDERSEN of Minnesota. In other words, we will finally have our day in court?

Mr. ALBERT. The gentleman is correct.

Mr. ANDERSEN of Minnesota. Can the gentleman advise whether that is an open rule?

Mr. ALBERT. It is an open rule with 2 hours of general debate.

Mr. ANDERSEN of Minnesota. With every opportunity to offer amendments?

Mr. ALBERT. The rule is entirely open.

Mr. ANDERSEN of Minnesota. I thank the gentleman.

Mr. GATHINGS. Mr. Chairman, will the gentleman yield?

Mr. HALLECK. I yield to the gentleman.

Mr. GATHINGS. On what day is the bill H.R. 12176 set down?

Mr. ALBERT. It is set down as part of the group to be called Wednesday, Thursday, Friday, and Saturday, following the social security bill, the license and rehearing bill, the supplemental appropriation bill, and the food additives control bill.

Mr. GATHINGS. The rule was granted on that bill the week before last.

Mr. ALBERT. It is the plan of the leadership to reach this bill next week.

Mr. PASSMAN. Mr. Chairman, I move to strike out the requisite number of words.

For fear there may possibly be some misunderstanding with respect to the amount of military assistance funds, let me say now that we indicated earlier an amount of $2,044 million in obligated unexpended funds and $35 million in unobligated funds. The bill provides that these funds would carry over into the new fiscal year. I should like to direct the attention of the committee to the fact that the total of $35 million in unobligated funds is now reserved, and therefore, there will be no unobligated funds in the military assistance category. But that fact does not decrease in any manner the amount of money available; it simply means that the unliquidated balances will move up another $35 million. Inasmuch as I discussed this situation with the Comptroller today, I must bring it to your attention.

But, this does not alter the fact that, by using the transferability, there would be $1,900 million available for the military aid program. If you do approve, on a record vote, the amendment to increase these funds, then, by using transferability, the total for expenditure would really be $2,100 million. I do not believe you are going to approve the increase.

The Clerk read, as follows:

Program of the United Nations High Commissioner for Refugees: For contributions authorized by section 405(c), $1,300,000.

Mr. BARR. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I have been sitting here for 2 days waiting for some facts on this bill to come out, and I decided that I might as well ask the questions myself. We are dealing here with an appropriation bill, but the impact of this bill, while it does have an effect on the budget of the United States, still that is only one side of the whole impact of this bill. Probably its major impact is on the balance of payments of this Nation. Our international balance of payments is in more trouble than our financial situation at home.

Would somebody like to answer this question for me: You have a $3,400 million bill that we are discussing today. What is the effect of this on our international balance of payments? How much money do we have to earn in our trade balance to finance this bill? I am not talking about American dollars, I am talking about trade balances.

Mr. CONTE. The latest figures we have for our trade balance, January to April of this year, are exports, $6,288 million, imports, $5,036 million, making a surplus of $1,251 million. For the same period last year we had a surplus of $399 million. Therefore, it looks like we may end up with a $3 billion trade surplus for 1960.

Mr. BARR. I am aware of that. We have consistently since 1950 run an excess in our trade balance. But, we spent or invested $15 billion more than we have earned. We have spent it partly through these programs. The point I am making is this. We cannot continue this indefinitely. We have $7 billion worth of free gold to handle $19 billion in short term trade balances. When that figure drops much lower, you are going to have every speculator all over the world trading on the credit of the United States. There is an alternative I am asking if the gentleman would recommend—could we strike the 25-percent gold requirement behind the currency? Will the gentleman recommend that? You are getting very close to this place. You are going to have to do something. You are not going to go much further. Last year the deficit in our balance was about $4 billion. This year it can be about $2 billion. This is something we might as well wake up to in this Congress. Our national debt is a matter of concern, but our international balance of payments problem is right on top of us. We cannot go much further. I would be delighted if anybody has an answer to this. This is a matter of concern to me.

Mr. COFFIN. Mr. Chairman, will the gentleman yield?

Mr. BARR. I yield to the gentleman from Maine.

Mr. COFFIN. The gentleman is a good enough economist to know that this is not the only factor in the balance of payments. He also knows even if we abolish the entire foreign aid program, it would not solve the problem.

Mr. BARR. That is true. That is the reason I have asked these questions. Can the gentleman answer the question as to what he anticipates the impact of this $3.5 billion bill to be on our international balance of payments—how much of it is going to be a drain on our balance of payments?

Mr. COFFIN. I do not think anyone can answer that. I would say that for this coming year, it would be in the order

of several hundred million dollars, but not as much as last year. We are in a better position this year than we were in last year. I think the ultimate answer lies in exports.

Mr. BARR. I agree.

Mr. COFFIN. I think we are beginning with our Export-Import Bank export credit program to stimulate exports and the Department of Commerce program will enable our businessmen to be interested and effective in exports activities. I am optimistic in the long run.

Mr. PASSMAN. Is it not true that we have just about already priced ourselves out of the world markets? Many of the recipient nations are now requesting that automobiles, jeeps and trucks and so on be bought from Japan or Great Britain because they cost from 20 percent to 30 percent less than they cost in this country?

Mr. BARR. I am not aware of that.

Mr. PASSMAN. That is true. I can assure the gentleman.

Mr. BARR. If that is true, then buying overseas is a direct drain on our balance of payments.

Mr. PASSMAN. The gentleman is absolutely correct and furthermore that is true.

Mr. BARR. I would say this very definitely, if you are going to give this money away, you had better give it away on things that we can buy in the United States. We had better be pretty careful because we are uncomfortably close to the limit.

Mr. RHODES of Arizona. Mr. Chairman, will the gentleman yield?

Mr. BARR. I yield.

Mr. RHODES of Arizona. The gentleman has asked a very good question. I have taken my pencil and tried to come up with what I think is a fairly reasonable answer. On the military assistance program, approximately 90 percent is spent in the United States, so that only the equipment leaves this country. Therefore, it does not affect the balance of payments. Only $180 million of it will affect the balance of payments.

In the special assistance category, practically all of it goes out in dollars—about $206 million, and I would say that that would affect the balance of payment.

On the technical cooperation program, most of that goes out in dollars to the extent of $150 million.

Three hundred and sixty million dollars is about 60 percent of the amount recommended for defense support which I believe is a fair estimate of the dollars which go out.

Mr. BARR. In other words, about $1 billion.

Mr. RHODES of Arizona. My personal estimate is somewhere between $900 million and $1 billion.

The CHAIRMAN. The time of the gentleman has expired.

Mr. PASSMAN. Mr. Chairman, I ask unanimous consent that the remainder of the bill be considered as read, and be open to points of order and amendments.

The CHAIRMAN. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

The CHAIRMAN. Are there any points of order to any part of the remainder of the bill?

Mr. GROSS. Mr. Chairman, I make a point of order against the language on page 5, lines 1 through 8, inclusive, on the grounds it is not in order on a general appropriation bill under clause 5 of rule XXI. This language provides for the reappropriation of funds previously made available and is not permitted under the rules of the House—paragraph 5 of rule XXI which reads, in pertinent part, as follows:

> No general appropriation bill or amendment thereto shall be received or considered if it contains a provision reappropriating unexpended balances of appropriations.

It is true that the mutual security authorization law authorizes reappropriations of unexpended balances, but that authority was last contained in section 548 enacted in calendar year 1956. Subsequent to that time, and at the beginning of the 86th Congress, the House adopted rules from which I have just read. Inasmuch as this rulemaking action occurred subsequent to the latest action by law, and there has been no enactment by statute on the particular matter during the present Congress, the rules of the House govern in this situation. Furthermore, it is well settled in the precedents that the power of the House to make its own rules may not be impaired by a law passed by a prior Congress. Therefore, I ask that my point of order be sustained.

Mr. PASSMAN. Mr. Chairman, the gentleman from Iowa [Mr. GROSS] was considerate enough to advise us in advance of his intention to make this point of order. He has stated the facts of the matter accurately. I have discussed this point of order with other Members and we have carefully reviewed the situation. Most regretfully I must concede that the point of order is well taken.

The CHAIRMAN. The Chair sustains the point of order.

Mr. GROSS. Mr. Chairman, I have another point of order.

The CHAIRMAN. The gentleman will state it.

Mr. GROSS. Mr. Chairman, I make a point of order against the language appearing on page 12, line 24, after the figures "$6,250" and the comma, "and not to exceed $9,000 for entertainment allowances for members of the Board of Directors when specifically authorized by the Chairman of the Board."

Mr. Chairman, I hold that this confers additional duties upon the Chairman of the Board, duties that might be distasteful to him under some circumstances. I ask that the point of order be sustained.

Mr. PASSMAN. Mr. Chairman, this is regular language in the appropriation bill, and it requires additional duties; but it is germane and not subject to a point of order.

The CHAIRMAN. The Chair wants to hear from the gentleman from Louisiana as to whether or not this particular language "when specifically authorized by the Chairman of the Board" is authorized by law, not whether it is germane.

Mr. PASSMAN. I do not have the original authorizing language at hand. In the interest of time we will concede the point of order.

The CHAIRMAN. The Chair sustains the point of order.

Are there further points of order to the remaining portions of the bill? If not the Chair will entertain amendments.

Mr. YATES. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

> Amendment offered by Mr. YATES: Strike out lines 19, 20, and 21 on page 7, and renumber following sections.

Mr. PASSMAN. Mr. Chairman, I ask unanimous consent that all debate on the bill and all amendments thereto close in 30 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Louisiana?

Mr. GROSS. Mr. Chairman, I object.

The CHAIRMAN. The gentleman from Illinois [Mr. YATES] is recognized in support of his amendment.

Mr. YATES. Mr. Chairman, it is inconceivable that this section should not be stricken. In a world in which we much too frequently find ourselves the butt of criticism and protest, the one bright spot is the achievement of the U.S. representatives in having paved the way at long last for abatement of hostilities between India and Pakistan. It is not too much to say that our prestige throughout Asia rides with the success of that settlement. And our prestige throughout Asia rides with this amendment because section 107 crushes that program.

Since 1947, when India was partitioned and the new state of Pakistan created, the controversy has raged between them as to a proper sharing of the waters of the rivers of the Indus Basin. The Indus Basin has been one of the principal food sources of the area. Both nations are rightfully concerned with the proper allocation of the waters. Forty million people are affected by this decision. This dispute is one of the main sources of friction between India and Pakistan, and they have been quarreling with each other, rather than standing united against a possible common aggressor. I say possible aggressor. The fact is that the Communist Chinese have already invaded and settled in the northern approaches to India.

The United States has been hailed throughout the free world for her role in bringing the two countries together in a prospective agreement for sharing the waters of the Indus.

It will be argued that this project is much too expensive and that our contribution is much too great. The fact remains that the financing of this project is being shared by six other nations. This is the first major cooperative effort between the great nations of the free world to initiate a program of joint contributions for helping solve economic difficulties of underdeveloped nations.

How many times have we heard upon this floor, and properly so, the argument that the United States has long carried too much of the burden of helping in

the development of new nations; that assistance should be cooperative? The Indus Basin proposal is such a joint effort. Significant contributions will be made by other nations and the success of the project will be a resounding victory for a peaceful and rational settlement of disputes between nations.

Helping complete the Indus project is the best possible expression of our concept of technical assistance. It will enable two great and friendly nations of Asia to concentrate their energies and resources on improving their economic and social development instead of expending their efforts in quarreling.

It will permit two great nations of Asia to reduce their concentration of military forces against each other and encourage their cooperation against the military threat from the outside.

It will permit the United States to project a true image of herself to the world as a peacemaker.

I urge adoption of this amendment.

Mr. PASSMAN. There is no section of the bill over which there has been greater misunderstanding. The intent was not to interfere with anything that had been previously authorized to be done. It is to be regretted that time has not permitted detailed explanation. It was not the purpose of the committee to cripple the project, but rather to hold up dollar funds not exceeding $5 million for this year only, until we could get additional important information. There has, unfortunately, been much misinterpretation and misunderstanding of this situation.

Mr. YATES. Do I understand the chairman has accepted this amendment?

Mr. PASSMAN. The chairman of the subcommittee has no right to accept, personally, any amendment.

Mr. YATES. It was my understanding a few moments ago the gentleman said he had the intention of accepting my amendment.

Mr. PASSMAN. The gentleman from Louisiana is learning more about the rules of the House every hour of the day.

Mr. YATES. The gentleman is not learning more about the rules of the House. The gentleman is learning more about the chairman of the subcommittee.

Mr. PASSMAN. Will the gentleman yield further?

Mr. YATES. I want to proceed with my amendment.

Mr. HALLECK. Mr. Chairman, will the gentleman yield?

Mr. YATES. I yield to the gentleman from Indiana.

Mr. HALLECK. In some remarks I made earlier in the day I indicated support of this amendment. I hope the amendment will be agreed to.

Mr. PASSMAN. Mr. Chairman, will the gentleman yield?

Mr. YATES. I yield to the gentleman.

Mr. PASSMAN. I was not speaking about the gentleman from Illinois understanding the rules. The gentleman from Louisiana was informed a little while ago that he had no authority under the rules, to accept any amendment. Therefore, I am trying to abide by the rules.

Mr. YATES. That rule applies to the gentleman individually; but when the gentleman has said members of the committee are willing to accept the amendment, it is my understanding he may do so.

Mr. PASSMAN. All of the members are not willing to accept the amendment, I may say to the gentleman.

Mr. HAYS. Mr. Chairman, will the gentleman yield?

Mr. YATES. I yield to the gentleman from Ohio.

Mr. HAYS. I would like to say, briefly, that I support the gentleman's amendment, because this Indus River project is the kind of a project which, in my opinion, will have some chance of doing the job we want to do in these areas; that is, meeting the Communist threat head on at the village level, down to the standard of living level, at the level where people are on a bare subsistence. It is the kind of project which they can understand and which will do them some good and certainly will do them a lot more good than sending arms in there to keep some dictator in power. I think the gentleman's amendment should be adopted.

Mr. YATES. I thank the gentleman for his comment. He is exactly right, because today in a world in which we find ourselves much too frequently the butt of criticism and the butt of protest, the one bright spot that we have in the world today is the achievement of U.S. representatives in paving the way at long last for the abatement of hostilities between the two great Asiatic nations, Pakistan and India. It is not too much to say that the prestige of the United States in Asia will rise with the success of that settlement, and it is not too much to say that the success and prestige of the United States will rise with adoption of this amendment.

Since 1947 when India was partitioned and the new state of Pakistan was created, a controversy has raged as to the proper sharing of the waters of the Indus River. That has been one of the principal sources of food for that section of the world. Forty million people are affected. This dispute is one of the main sources of friction between India and Pakistan. These two nations are tending to quarrel between themselves instead of standing united against a prospective Chinese Communist aggression on their borders. I said "prospective," but I think that word is wrong because actually Red China has already entered the approaches of India and has settled there.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. YATES. Mr. Chairman, I ask unanimous consent to proceed for 3 additional minutes.

Mr. MASON. Mr. Chairman, I object.

Mr. GARY. Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from Illinois [Mr. YATES] and I do this for the purpose of giving the Congress the facts in connection with the amendment.

This is a billion-dollar project, or slightly over a billion dollars, and the United States is being asked to contribute $515 million of the billion dollars.

When they came before our committee, they were unable to give us the necessary facts concerning the construction and other features of the plan. Now, if anyone would propose such a billion-dollar project for the United States without the necessary facts to support it, it would not be considered for 5 minutes. Our committee has not turned the project down. We are not opposed to the project, and we so state in the committee report as follows: In connection with the provision relating to the development of the Indus Basin, the committee belives that this project is of such magnitude and ultimate expansion that more study and consideration should be given thereto before any obligations are incurred by the mutual security program for this purpose.

All we are doing is asking for time and the facts. If the Congress wants to embark upon a billion dollar contract of which we shall furnish $515 million of the funds without the necessary facts to guide us, it may do so by voting for the amendment. Personally I want the facts before proceeding further.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. GARY. I yield to the gentleman from Illinois.

Mr. YATES. Is it not true that throughout these hearings there is testimony which fully justifies the Indus Basin project? Secondly, is it not true that the contribution and the loans of the United States are to be made over a period of 10 years? Is it not true, further, that contributions are to be made by six other nations of the free world, and that this is the first time that we have had a cooperative undertaking to develop the economy of an underdeveloped nation? Is it not true, further, that it is the wish of this Congress that our burden of helping the underdeveloped nations of the world be shared more and more by other nations? Why do we want to stop it by the language of this bill?

Mr. GARY. Those are the facts we want to go into. If six nations of the world are going to contribute to this project, why should the United States contribute over half of the funds?

Mr. YATES. Is the gentleman from Illinois correct in declaring that our representatives have tried for 9 years to get a settlement of this project. It has only been because of the recommendations of our officials that the disputing nations have approached any settlement at this time. Of course, it is done, and the language of this section will suspend all further negotiations.

Mr. GARY. Not at all.

Mr. YATES. Why of course it will, pending such time as this committee completes its study.

Mr. GARY. Why should we be asked to contribute funds for a project when an agreement has not been reached?

Mr. YATES. There has been tentative agreement reached. The record shows what the proposed schedule of cost sharing is between other countries and ours and the additional data that describes the progress made.

Mr. GARY. Has the agreement been signed?

Mr. YATES. No; the contract has not been signed because it cannot be signed without commitments as to funding. This section stops any hope of agreement.

Mr. GARY. Yet they ask us to commit ourselves to this billion-dollar project without the facts.

The CHAIRMAN. The time of the gentleman from Virginia has expired.

Mr. PASSMAN. Mr. Chairman, I move to strike out the requisite number of words.

It was not the intent of the committee to stop this project, and this proviso does not stop it. This is a billion-dollar contract. Let me quote this colloquy from our hearings:

Mr. PASSMAN. And that is the present estimate?

Mr. BRAND. Yes.

Mr. PASSMAN. It could be far in excess of that amount; could it not?

Mr. BRAND. That is the present estimate, and I am not advised as to the latter point, but I do not take issue with the chairman's observation.

If that is not a vague response, then I have never heard or read vague language. This project might cost up to $2 billion, and maybe even more.

We merely state in section 107 that—

None of the funds herein appropriated shall be used to carry out the provisions of section 404 of the Mutual Security Act of 1954, as amended.

It has nothing to do with previous allocations whatsoever, either of dollar funds or local currencies. I can assure the House that that is true.

In our hearings, we asked the question, "What amount will you require this year?" They did not state they would require anything at all, but that certainly they would not want in excess of $5 million. So, we are dealing here entirely with this year's appropriation.

Mr. GALLAGHER. Mr. Chairman, will the gentleman yield?

Mr. PASSMAN. I yield.

Mr. GALLAGHER. I would like to point out that in view of the provision we adopted here today, unless the Indus Basin project is approved here today, they will be unable to enter into negotiations under the initiation plan which the gentleman introduced in this bill.

Mr. PASSMAN. No; that does not follow. I can assure the gentleman again that what has already been agreed to is in effect. Our commitments are quite substantial, already, as I understand it. This limitation does not stop the project.

There is some classified information here which I am not privileged to discuss on the floor at this time, but I again assure the gentleman that the limitation applies only to the funds for this year, and does not apply to prior funds or to proceeding with the project itself. If the gentleman will call the State Department, he will find out that I am giving him the correct information.

Mr. HAYS. Mr. Chairman, will the gentleman yield?

Mr. PASSMAN. I yield to the gentleman.

Mr. HAYS. Do I understand the gentleman is opposed to the amendment of the gentleman from Illinois?

Mr. PASSMAN. My motion was to strike out the requisite number of words.

Mr. HAYS. I am trying to find out whether the gentleman is for the amendment or against the amendment. That is a simple question. Can the gentleman answer that yes or no?

Mr. PASSMAN. I may say that I am not going to vote against the amendment.

Mr. HAYS. That is good enough. Let me ask this further. Is it not true that a good deal of the money we are talking about is counterpart funds, Public Law 480 funds, and so on, which we have no chance of ever getting back anyway?

Mr. PASSMAN. There is a substantial amount of local currency involved. I cannot state at the moment from what particular fund it has been, or might be, derived.

Mr. HAYS. And we have to use it under the law. If we do not, it would just dribble away to nothing.

Mr. PASSMAN. Is not the gentleman referring to the Development Loan Fund local currency repayments, rather than Public Law 480 funds?

Mr. HAYS. I am talking about local currencies. I do not care whether the local currencies are generated under the Development Loan Fund or Public Law 480 or any of the other funds. I will include all of them. It is still local currency that we will never be able to change over into dollars.

Mr. PASSMAN. I am not quarreling with the gentleman. Whatever amount has already been obligated out of the various funds, whether dollars or local currencies, there is nothing we can do about it.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. PASSMAN. I yield to the gentleman.

Mr. YATES. Is it not essential that this provision be stricken in view of the fact that the gentleman has stated that we already have invested a certain amount of money in this project, so why should we hold up further development of it?

Mr. PASSMAN. Five million dollars, in dollar funds, is the only amount which might be involved in the present bill. I might say to the gentleman again that the information we received was very vague as to what the ultimate cost would be; and I think the Committee should posibly be commended for requesting more information, instead of giving a blank check, without possession of many of the pertinent facts which should be known by the Congress.

The CHAIRMAN (Mr. BASS of Tennessee). The time of the gentleman from Louisiana [Mr. PASSMAN] has expired.

Mr. CONTE. Mr. Chairman, I move to strike out the requisite number of words.

Mr. PASSMAN. Mr. Chairman, will the gentleman yield for a unanimous consent request?

Mr. CONTE. I yield.

Mr. PASSMAN. Mr. Chairman, I ask unanimous consent that all debate on the bill and all amendments thereto close at 6 o'clock.

The CHAIRMAN. Is there objection to the request of the gentleman from Louisiana?

Mr. JUDD. Mr. Chairman, reserving the right to object, how many amendments are there?

The CHAIRMAN. The Chair is not in a position to answer that question.

Is there objection to the request of the gentleman from Louisiana?

Mr. GROSS and Mr. O'HARA of Illinois objected.

Mr. PASSMAN. Mr. Chairman, I move that all debate on the bill and all amendments thereto close at 6 o'clock.

The CHAIRMAN. The question is on the motion offered by the gentleman from Louisiana.

The motion was agreed to.

Mr. FORD. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Michigan.

Mr. FORD. May I say to the gentleman from Massachusetts that I support the amendment offered by the gentleman from Illinois and I endorse the remarks that are to be made by the gentleman from Massachusetts.

Mr. CONTE. I thank the gentleman. May I say that I am pleased to have the support of the gentleman from Illinois. He knows that I have had a long interest in this matter, and that had I had an opportunity I would have offered an amendment.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Illinois.

Mr. YATES. What the gentleman is saying is exactly correct. Throughout the hundreds of pages of hearings taken on the various projects, and particularly on the Indus Basin project, the gentleman from Massachusetts has shown a firm interest in seeing that the agreement was carried out.

Mr. CONTE. I thank the gentleman from Illinois.

Mr. Chairman, section 107 of the bill prohibits the use of funds appropriated therein for the development of the Indus Basin.

This prohibition runs completely counter to section 404 of the Mutual Security Act, already approved by both Houses of Congress, which affirms the willingness of the United States to participate, in cooperation with other nations of the free world, in a highly significant program to develop the Indus Basin. This represents a singularly short-sighted action from the standpoint of the interests of the United States, both in terms of the lessening of tensions and divisive forces in this critical area and in terms of enlarging the role of other free nations in addressing the economic problems of the less-developed areas.

The controversy between Pakistan and India over the use of the Indus waters has been one of the major international conflicts of the past decade. Bitterness and violence have characterized the situation and the possibility of military conflict has been real and continuing. Through the good offices and protracted efforts of the International Bank for

Reconstruction and Development, 9 years of patient negotiation have resulted in virtual agreement on the terms of equitable settlement of the controversy. Final agreement depends upon firm assurances from friendly countries of essential financial assistance required to construct the system of works recommended by the Bank.

The Bank itself plans to contribute to the costs of the development project and five other nations—the United States, Australia, New Zealand, Canada, and Germany—in addition to Pakistan and India have signified their willingness and intention to join with the United States in the funding of this project. So important is the project to the nations directly affected that India will undertake to make very substantial foreign exchange payments to Pakistan under the proposed Indus Waters Treaty. The specific amount, of which congressional committees are already informed and which will be made available on request to any Member of the Congress, will be released publicly after signature of the Waters Treaty.

U.S. participation would involve over a 10-year period the provision of $177 million of grant assistance and $103 million of loan assistance plus the provision of local currency arising from sales of agricultural surpluses from United States is essential to the successful conclusion of this great international effort.

It is also essential that the United States be able to make its commitment in the immediate future as an absolute precondition for the commitments of the other participants and the World Bank, and in order to make it possible for India and Pakistan to sign the necessary treaty as soon as possible.

The committee report states that the project is of such magnitude and ultimate expense that more study and consideration should be given before any obligations are incurred for this purpose under the MSP. Yet the current proposal represents the culmination of 10 years of negotiation. Geological conditions, foundation conditions, and the amount and character of construction materials have been determined for significant portions of the project, and technical and economic feasibility have been firmly established; plans and specifications have been completed and reviewed, and are ready for tender to international bidding. Preliminary reports have been prepared on other aspects of the project, and contracts have been let for preparation of plans and specifications. American engineering firms have already been engaged by the World Bank in both preliminary and advanced stages of the engineering, and an American firm will supervise major elements of the actual construction. Still another American firm serves as engineering consultant to West Pakistan's Water and Power Development Authority, and will coordinate all elements of the project.

Engineering plans are advanced to the point where the basic construction can get under way as soon as treaty agreement is reached. Actual conclusion of the treaty is expected to coincide with receipt of assurances that the outside financial aid required to carry out the project will be forthcoming. Other contributing nations have indicated their willingness to provide such assurances—all on a grant basis. It is imperative that the United States be in a positon to move forward along the lines already approved by the Congress.

The provision of funds for this purpose would not only serve to contribute in a major way to the economic development of the vast subcontinent of Asia but would also contribute materially to the improvement of relations between India and Pakistan. Only the U.S.S.R. and Communist China could benefit from failure of India and Pakistan to settle their disputes. In the absence of a settelement, no one can predict the outcome with certainty, but the possibility of bitter and prolonged dispute and eventual military conflict cannot be excluded. If we do not seize this opportunity to resolve this longstanding source of irritation, it may be years before the opportunity will again arise. We are in a position to make a major contribution to world peace, to strengthen the Western orientation of nearly 500 million people and to secure the participation of other industrialized nations in the financing of the costs. To cast aside this opportunity would be an act of complete irresponsibility and contrary to the political and security interests of the United States.

Mr. LINDSAY. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from New York.

Mr. LINDSAY. Is it not a fact that this would in effect torpedo 10 years of careful work in negotiations on this subject?

Mr. CONTE. Definitely. I have mentioned that. It is a very excellent point.

The CHAIRMAN. The Chair recognizes the gentleman from Connecticut [Mr. BOWLES].

Mr. BOWLES. Mr. Chairman, I strongly oppose section 107 of the mutual security appropriations bill. This section would deny the use of mutual security funds for the Indus Valley project.

I have been in close touch with the development of the Indus Valley project for the last 9 years. I have visited the area on several occasions—most recently in 1957.

In my opinion, it is the single most important example in the world today of a bold, well-planned, internationally coordinated program of economic development.

Once completed it will not only bring a better life to tens of millions of Indians and Pakistanis; it will demonstrate the capacity of the non-Communist nations—both rich and poor—to work in partnership for common ends.

No river valley project in history has been the subject of such long, thoughtful, and meticulous study by the world's most highly trained experts. Indeed the earliest studies were made some 70 years ago. In 1951 the proposal was given a new lift by David Lilienthal of our own TVA in an article in Colliers magazine.

In 1952 while I was U.S. Ambassador to India, it became a subject for consideration by the World Bank.

If the great Indus Valley plan which resulted from these studies collapses at this stage, the impact will be profoundly destructive not only to Pakistan and India, but also among our allies who have watched the growth and development of this project as an unprecedented effort at multinational planning which the Communist nations have not and cannot match.

The Indus Valley situation is highly complex, however, and it represents a new concept in oversea economic development. I can therefore understand the confusion which appears to have arisen in regard to it.

The Indus Basin, with its complex of six great rivers, is one of the most productive agricultural areas in the world. Nearly half of the water flowing through this basin is diverted to an irrigation system which helps provide food for some 50 million people.

In the years before and during World War II the British had developed plans for major dams and canals which would provide a vast expansion of this irrigation system.

When India and Pakistan became free in 1947, the arbitrary border which separates these two countries cut straight across the area which was to be covered by the new program. Although the population division in this area was roughly equal, Pakistan received the bulk of the existing irrigation.

The tension and conflicts which resulted from the breakup of British India inevitably increased the obstacles to this long-planned development.

India, however, decided to move ahead with that section of the irrigation program which lay within her own borders. She was able to do so because most of the technicians and engineers familiar with this program had accepted Indian citizenship.

The result has been the great Bhakra-Nangal power and irrigation project in the Indian Punjab which I visited in 1951, 1952, 1953, 1955, and 1957. This project which is larger than any similar combination effort in the United States, China, or the Soviet Union, will provide irrigation for some 10 million acres of land.

This is an area nearly twice the size of New Jersey. It means two and even three bountiful crops each year.

The system includes some 6,000 miles of canals, varying from manmade rivers 300 or 400 feet wide and 16 feet high, to tributary canals 6 or 8 feet wide. This entire canal system has been completed and is fully lined with concrete.

The Bhakra Dam itself is the highest dam in the world, rising some 800 feet from the riverbed. It will not only control the flow of irrigation waters but will also provide electricity to light most of the city of New Delhi some 250 miles away and a vast network of villages.

Now here is a point which few Americans appreciate. This project was not the result of what some members of this body refer to as "American handouts."

Not one dollar or pound sterling of foreign aid has entered into the construction of this project. The entire capital

investment of nearly $1 billion represents foreign trade earnings of the Indian Government. Most of the earthmoving machinery and electrical equipment for the powerplants was purchased in America.

The chief consulting engineer is Harvey Slocum, designer of our own Grand Coulee Dam and one of the most distinguished engineers of our era.

His salary of $100,000 annually is paid by the Indian Government from its own funds. When I last visited there in 1957 there were also some 15 American engineering assistants all paid by India.

Most of the work however is carried on by highly qualified Indian engineers, many of them trained in American universities.

When the Bhakra-Nangal Dam project is finished on the Indian side of the border, it will produce more than $300 million worth of agricultural products and hydroelectric power each year. This power will make possible a sizable increase in manufactured goods produced in the industrial complex which is expected to develop rapidly.

The Bhakra-Nangal is an extraordinary achievement. However, unless the entire Indus Valley project now is allowed to proceed, it will create a highly delicate situation in this area.

According to the comprehensive original plan put together in the days of British rule, the Bhakra-Nangal Dam was part of a whole series of projects designed to provide additional water not only in this area but also to much of Pakistan as well. The Pakistani, however, have been unable to complete their part of the program because of lack of capital resources and various internal difficulties.

As a result, we now face the danger of a serious upset in the economic balance of the entire area.

According to the original plans, Bhakra-Nangal was expected to divert for use in India some of the water currently flowing into what is now Pakistan. This was to be compensated for by new canals which would substitute other water from the three western rivers that form part of the Indus Valley Basin.

For 9 years, under the patient, brilliant leadership of Eugene Black and his World Bank associates, the Governments of India and Pakistan have been slowly moving toward a common plan for the use of the water in the entire Indus Valley.

As it became clear that agreement could be reached, the World Bank went to work to provide joint financing not only from the United States but also from several other nations as well.

The result has been an Indus Basin Development Fund agreement involving the United Kingdom, Canada, West Germany, Australia, New Zealand, and the United States.

Administered through the World Bank, and in conjunction with substantial investment from both India and Pakistan, this Fund will enable the program to be successfully completed.

Mr. Chairman, I have visited many great irrigation projects in many parts of the world. However, this is by far the most exciting example I have ever seen of man's capacity to master his environment in order to provide a better life for people. The Communists have produced nothing to rival it in their own countries or anywhere else.

It provides heartwarming, reassuring evidence of the capacity of free peoples to work in partnership and to think and act in bold terms.

The specific arguments for our support of the project at this critical stage are overwhelming. Let me list them briefly:

First. The Indus Valley project has been as thoroughly studied as it is possible to imagine. Technical studies on the project began over 75 years ago under British rule.

These studies have been intensified by 8 years of investigations by the extremely capable engineers of the World Bank. The proposal for further study should mislead no one.

Second. The project is of crucial importance to the agricultural development of Pakistan. It is also of exceptional importance to India, opening countless acres in the Punjab to cultivation as part of India's effort to overcome its nutritive food deficit.

Third. The withdrawal of the United States from participation would lead to the abrupt, tragic collapse of the entire project. This is not a project which can be attacked in small bits and pieces, as the long and arduous difficulties with the technical impediments have clearly demonstrated. Our participation is essential to the project's structure.

Fourth. The settlement of the Indus River dispute is a major key to easing the unhappy antagonism between India and Pakistan. Support for, and participation in, the Indus Valley project is the most important single step which the United States can take to ease this conflict.

Fifth. International participation in the financing of the Indus Valley project has been achieved to an exceptional degree. Both the administration and the Congress have been seeking precisely this sort of wide international sharing of the burden of international economic development.

At this stage, the failure of our Government to understand the enormous promise of this project and the complexity of the agreements which made it possible would further undermine worldwide confidence in our leadership, already dangerously shaken by recent events.

Mr. Chairman, in view of these facts, I urge section 107 be struck from the bill.

The CHAIRMAN. The Chair recognizes the gentleman from Wisconsin [Mr. ZABLOCKI].

Mr. ZABLOCKI. Mr. Chairman, I hope this amendment will prevail. India and Pakistan have been negotiating for years in order to bring about the realization of this project. It would be a tragic mistake if we, by our action here today, would disrupt their efforts.

I have followed the developments in India and Pakistan over the last decade with great care. It happens that these two countries are within the area over which the Subcommittee on the Far East and the Pacific, of which I am chairman, has jurisdiction. Hence, I think I have some basis for making an assessment of the importance of the Indus Basin project.

It must be recognized that the division of the Indian subcontinent in 1947 was in itself a real tragedy for the economic development of that area. Be that as it may, it is an accomplished fact that these two nations exist. Much of the animosity between the two nations is based upon differences in culture. Another very real difference that separates them, however, has been the dispute over the use of the Indus River and the waters of its tributaries. These rivers and the canals which connect them had been developed by the British to form an integrated network for irrigation. With the separation of the continent into two countries that integrated system of waterworks collapsed. The result has been that neither nation has been able fully to utilize this tremendous natural asset.

The project which the World Bank has developed is the work of 10 years of laborious political as well as economic negotiations. What we are asked to do in the language of this bill is to reject the careful survey prepared by competent and disinterested experts. It should be remembered that the United States is financing only a portion of the cost of this project. The World Bank itself is putting in a sizable sum as are other countries in the free world.

This is an expression of unity of purpose not only by India and Pakistan, who are the immediate beneficiaries of the project, but also of other capital exporting nations.

I do not accept the argument advanced by the gentleman from Louisiana that the Appropriations Committee language does not stop the project. I think it does. In order that there may be no doubt of the intent of the committee, however, I urge the adoption of the amendment offered by the gentleman from Illinois.

The CHAIRMAN. The Chair recognizes the gentleman from Minnesota [Mr. JUDD].

Mr. JUDD. Mr. Chairman, a great deal has been said during the debate about other countries allegedly not helping as much as they ought to in development programs around the world. Those who have said that certainly ought to support this amendment. It is a project to which Germany, Canada, Australia, New Zealand, and Great Britain as well as India, Pakistan, and the World Bank contribute, all pulling their full share under a general agreement to build this enormously important development project.

The nubbin of the situation is this: Four of the five main rivers in the Indus Basin rise in India or flow through India into Pakistan. How is the water to be divided or diverted in order to be of greatest use in producing food for both? If India were to cut off the water, Pakistan would starve to death, and the Pakistani have feared that. There has been years of conflict and suspicion. Now under the leadership of the World Bank a plan has been agreed to under which

this can be developed to the satisfaction of all.

This is a project of incalculable value to that great subcontinent which has a greater population than that other peninsula known as Europe projecting off the Eurasian Continent. It would be tragic in its effects upon the free world if we did not go ahead wholeheartedly with this agreement now that a solution is in sight after 8 years of effort. I urge adoption of the amendment.

The CHAIRMAN. The Chair recognizes the gentlewoman from Illinois [Mrs. CHURCH].

Mrs. CHURCH. Mr. Chairman, I would like to give the chairman of our Subcommittee on the Far East and Pacific, the gentleman from Wisconsin [Mr. ZABLOCKI] the opportunity to state whether more is not involved in this amendment than even multilateral aid. This marks the first rapprochement between Pakistan and India. Would not the psychological effect of the failure of this amendment be tremendous, not only in the area involved but among all the nations who have agreed to undertake this project?

Mr. ZABLOCKI. The gentlewoman is absolutely correct.

The gentlewoman has asked an incisive question which carries with it an implication in which I share; namely, that the inclusion of the Appropriations Committee language in the law would have a tremendous adverse effect on all the countries of that area, particularly India and Pakistan.

I commend my distinguished colleague for asking this important question.

Mrs. CHURCH. I thank the gentleman.

The CHAIRMAN. The Chair recognizes the gentleman from Pennsylvania [Mr. FULTON].

Mr. FULTON. Mr. Chairman, I rise in wholehearted support of this amendment to insure we, the people of the United States, join with the people of India and Pakistan in developing the vast Indus River Valley with the help of other nations. India and Pakistan together comprise the largest areas of free people in the world. It is to be hoped India and Pakistan can work together as a unit. We must support and encourage these two friendly peoples in this undertaking for the development of the Indus River and the progress of Asia, and Asian peoples.

I hope the limitation can be taken off the President's contingency fund because it will help our good friends the people of Israel to the extent of $7,500,000 in continuing in 1961, the full program for Israel's development.

The use of the contingency fund should be left to the discretion of the President, upon the recommendations of the Department of State and the International Cooperation Administration. The people and the Government of Israel are wonderful democratic friends of America in the Mideast and they are making real progress against difficult odds. We must continue to encourage the people of Israel in their fine progress, and must stand behind them for their security, the security of the United States, as well as of the free world.

The CHAIRMAN. The Chair recognizes the gentleman from Massachusetts [Mr. CURTIS].

Mr. CURTIS of Massachusetts. Mr. Chairman, I would like to ask a question of my distinguished colleague, the former Ambassador to India, the gentleman from Connecticut [Mr. BOWLES]. Is it not true that the passage of this legislation will be helpful in bringing together these two great countries which have had difficulties in the past?

I have even heard that they are holding up their ratification of their treaty relating to the Indus Basin until our own country takes action on this subject. Are there not strong political implications in the present situation?

Mr. BOWLES. The division of India into two nations was in itself tragic. This dam is a most important and very essential project, for it is a step that will pull these two countries together.

The CHAIRMAN. The Chair recognizes the gentleman from Louisiana [Mr. PASSMAN].

Mr. PASSMAN. Mr. Chairman, I want again to make it clear that the budget did not request $1 for this program. Later, it was stated that up to $5 million might possibly be needed. The proviso in the bill does not upset the present project, and it does not prohibit the use of the previously generated local currencies. We put this provision in the bill in order to get these people to come back later and tell us, with some reasonable degree of justification, whether or not the project is stopping at a billion dollars or whether it will eventually cost, say, $2 billion or even more.

The CHAIRMAN. Does any other Member desire to be heard on this amendment?

The question is on the amendment offered by the gentleman from Illinois [Mr. YATES].

The amendment was agreed to.

Mr. CONTE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. CONTE: On page 5, line 11, strike out the colon and strike out lines 12 through 14, inclusive, and insert in lieu thereof a period.

Mr. CONTE. Mr. Chairman, in the brief time allotted to me, may I say that the Appropriations Subcommittee put a limitation on the $150-million contingency fund which is the fund controlled by the President for use in emergencies throughout the world. Under the limitation put on by the Appropriations Subcommittee it would prohibit the use of any money in the contingency fund for any project or for any activity for which an estimate had been submitted to the Congress. In other words, Mr. Chairman, if any estimate for mutual security assistance, defense loans or development loans has been made and if an emergency should arise, if we had a war break out in Laos or had a war break out in Korea, the President could not use any of this money in the contingency fund because an estimate has already been presented to the Congress.

The CHAIRMAN. The time of the gentleman from Massachusetts has expired.

Mr. RHODES of Arizona. Mr. Chairman, I rise in support of the pending amendment.

Mr. CONTE. Mr. Chairman, will the gentleman yield?

Mr. RHODES of Arizona. I yield to the gentleman from Massachusetts.

Mr. CONTE. Mr. Chairman, the contingency fund of the President is only 5 percent of the entire mutual security budget. What you are telling the President is this: Do not come up to the Appropriations Committee and tell us what you are going to do with this money because if you do we are not going to allow you to take any of that money out of that appropriation for any estimates that you told us about. In other words, this is completely contrary to the philosophy of the Appropriations Committee which is against back-door spending.

This is a very serious amendment, and I hope, Mr. Chairman, that the Congress will see fit to eliminate this limitation. It will not add 1 cent to the budget; it simply strikes out the limitation.

Mr. ALFORD. Mr. Chairman, I move to strike out the requisite number of words.

Mr. PASSMAN. Mr. Chairman, will the gentleman yield?

Mr. ALFORD. I yield to the gentleman from Louisiana.

Mr. PASSMAN. I was in hopes that the gentleman from New York [Mr. TABER] who, I believe, proposed the language of this amendment and supported it in committee, would explain it now, and why it is necessary.

Mr. TABER. I do not think I offered it, but the situation is this: It is a very silly thing not to adopt it, that is, not stick by the language that is in the bill because that language simply prevents people from getting money out of the contingency fund where the committee has been presented with an estimate and it has been refused. It lets the cats and dogs get in for another try.

Mr. PASSMAN. The administration has been using the contingency fund to nullify the action of Congress in reducing the authorization requests and also in reducing the budget estimates. That is why the committee adopted this proviso.

Mr. TABER. That is exactly right.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Massachusetts [Mr. CONTE].

The question was taken; and on a division (demanded by Mr. CONTE) there were—ayes 50, noes 82.

So the amendment was rejected.

Mr. SANTANGELO. Mr. Chairman, I offer an amendment.

The clerk read as follows:

Amendment offered by Mr. SANTANGELO: On page 9, after line 11, add new section as follows:

"SEC. 114. None of the funds contained in title I of this Act may be used to enter into any contract with any person, organization, company, or concern or any of its affiliates who has offered or who offers to provide compensation to an employee of the International Cooperation Administration or who

provides compensation to any former employee of the International Cooperation Administration whose annual salary exceeds $5,000 and who has left employment with the International Cooperation Administration within two years of the date of employment with said person, organization, company, or concern, or any of its affiliates."

Mr. GARY. Mr. Chairman, I make the point of order against the amendment on the ground that it is legislation on an appropriation bill.

The CHAIRMAN. The Chair will be glad to hear the gentleman from New York.

Mr. SANTANGELO. Mr. Chairman, this amendment was offered to a bill last year. Similar language was objected to in a different type of bill, and the Chair, at the time the gentleman from New York [Mr. KEOGH], overruled the point of order. This is a limitation upon expenditures. This in no wise is an authorization to do anything except a limitation on funds. I say it does not violate the parliamentary rules.

The CHAIRMAN. Does the gentleman from Virginia desire to be heard further on the point of order?

Mr. GARY. It requires additional duties and certainly is legislation on an appropriation bill, and I insist on the point of order.

The CHAIRMAN (Mr. MILLS). The Chair has had an opportunity to examine the language of the amendment offered by the gentleman from New York [Mr. SANTANGELO] and has had an opportunity also to review what transpired in connection with a similar matter when it was offered as an amendment to an appropriation bill last year. This amendment seems to be similar to the amendment offered last year except for the $5,000 limitation in this amendment. Last year the present occupant of the Chair, when such an amendment was offered, pointed out that the amendment was in order at that time and overruled the point of order made then.

So, the Chair overrules the point of order made by the gentleman from Virginia.

Mr. SANTANGELO. Mr. Chairman, this amendment is designed to eliminate the feather-your-nest practices which have grown up in the ICA under our mutual security program and seeks to eliminate some of the waste, excesses, and corruption. The chairman of the subcommittee, Mr. PASSMAN, detailed a number of instances of underestimates and waste in our program to help the underdeveloped nations of the world.

I am firmly convinced we still believe that it is our duty to bridge the economic gap between the haves and have-nots and that, as world leaders, we have an obligation to assist those nations to develop their resources and to raise the standard of living of their peoples. In the administration of our mutual security program, we have been prodigal, inefficient, and wasteful. Too often excessive costs have been caused by lack of planning and bad administration. Frequently, excessive costs have been caused by corruption and dishonesty. In the Committee on Government Operations, Report No. 7, House Report No. 546, we read of instances of corruption by ICA officials, who after their service of employment with the ICA obtained employment with contractors doing work under the supervision of the ICA.

In the administration in Laos, the committee report indicates several glaring examples. Edwin McNamara, a public works and industry officer of ICA, accepted bribes totaling $13,000 from a construction company known as the Universal Construction Co. through its officers, Willis Bird and Gerald Peabody.

William Kirby, area transportation adviser, aided by one of the ICA directors, Carter dePaul, who circumvented ICA regulations, was instrumental in securing the award of a contract for the supply of ferry barges to the Hong Kong Transportation Co. Shortly thereafter, Mr. Kirby was employed by its affiliate, Pacific Island Shipbuilding Co. While the contract was being negotiated, this gentleman was the recipient of $500 from the Hong Kong Transportation Co.

Lacey V. Murrow, U.S. Army, retired, head of an engineering firm of Transportation Consultants, Inc., was under retainer to Vinnell Co. at the same time he was employed by ICA in Laos as an engineering consultant for the purpose of assisting in the selection of construction projects. During this period Vinnell Co. was seeking to obtain contracts with ICA in Laos.

Norman McKay, an employee of Transportation Consultants, Inc., acting as consultant to the USOM was instrumental in securing the award to Universal Construction Co. of a contract to construct a ferry ramp in Laos. Shortly thereafter, he went to work for Universal as project manager.

Carter dePaul, former USOM director, sold his 1947 Cadillac upon his departure from Laos to Gerald Peabody, the head of the Universal Construction Co., at an inflated price. The car whose value was approximately $600 was sold for over $3,000 and was in an inoperable condition. The story of this USOM director, Carter dePaul, is an ugly one and it shows brazenness by an ICA director and a callous disregard or unconcern by law enforcement officials.

In Thailand, other examples of feather-your-nest practices showed up. These were disclosed by the Committee on Government Operations in its 29th report.

The CHAIRMAN. The time of the gentleman from New York has expired.

The Chair recognizes the gentleman from Illinois [Mr. COLLIER].

Mr. COLLIER. Mr. Chairman, I ask unanimous consent to yield my time to the gentleman from New York [Mr. SANTANGELO].

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. SANTANGELO. Mr. Chairman, I thank the gentleman.

Mr. Chairman, I would like to give the Committee a few instances of what I have been talking about.

Thomas Hill, the Public Works Chief of USOM, Thailand, and one of his subordinate engineers, Herluf Larsen, were desirous of future employment by a construction company, Sverdrup & Parcel. Mr. Hill had overall responsibility for all construction projects in Thailand and was responsible for holding Sverdrup & Parcel to a proper performance of the contract. Larsen was charged with specific responsibility of supervising the Northeast Highway. Hill was hired by Sverdrup & Parcel on July 1, 1957. Larsen applied for a job with Sverdrup & Parcel in January of 1957, and continued to supervise the performance of that firm until October of 1957. Larsen was finally offered a job but because of reasons of health, refused it. Larsen had been invited to submit his application for employment by the firm's president, General Sverdrup, while they both were attending a meeting held in ICA, Washington, the purpose of which was to consider the selection of an engineer for the Bangkok-Saraburi Highway. Sverdrup & Parcel was interested in obtaining the contract. Hill and Larsen both recommended that the contract for the Bangkok-Saraburi road be awarded to Sverdrup & Parcel without the formality of seeking competitive proposals from other firms. This amendment places the burden on the person who profits through the employment of ICA personnel.

I support the mutual security program and desire that it be effective. This mutual security bill appropriates for fiscal year 1961 $3,384,500,000, which reduces the budget's estimate by $790,500,000. I believe there are adequate funds to do an effective job. This appropriation eliminates the fat and the waste and maintains inherent strength of our efforts to help the nations of the world. I trust my amendment will pass and thus eliminate a weakness in the administration of our mutual security program.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York [Mr. SANTANGELO].

The amendment was agreed to.

Mr. MONAGAN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. MONAGAN: On page 6, immediately below line 12, insert the following:

"SEC. 101. None of the funds herein appropriated shall be used to carry out any provision of chapter II, III, or IV of the Mutual Security Act of 1954, as amended, during any period when more than twenty days have elapsed between the request for, and the furnishing of, any document, paper, communication, audit, review, finding, recommendation, report, or other material relating to the administration of such provision by the International Cooperation Administration, to the General Accounting Office or any committee of the Congress, or any duly authorized subcommittee thereof, charged with considering legislation or appropriation for or expenditures of the International Cooperation Administration and the Department of State."

Mr. FORD. Mr. Chairman, I make a point of order against the amendment.

The CHAIRMAN. The gentleman will state it.

Mr. FORD. It is obvious to me, listening to the amendment which has been read, that it puts additional duties on individuals in the executive branch and therefore is subject to a point of order.

The CHAIRMAN. Does the gentleman from Connecticut desire to be heard on the point of order?

Mr. MONAGAN. Mr. Chairman, this same amendment was offered last year. A point of order was raised against it at that time and the point of order was overruled. This is not legislation. It is merely a limitation on the appropriation.

The CHAIRMAN (Mr. MILLS). The Chair is ready to rule. The Chair has had an opportunity to examine the language of the amendment offered by the gentleman from Connecticut and finds that the language offered by the gentleman is similar, if not identical, with the language which was offered to the appropriation bill last year by the gentleman from Virginia [Mr. HARDY] on July 28, 1959.

Mr. MONAGAN. It is identical.

The CHAIRMAN. The amendment is set forth in the CONGRESSIONAL RECORD, volume 105, part 11, page 14530. The Chair on that occasion held that the language was a limitation and in order on the appropriation bill and overruled the point of order.

The Chair is constrained to overrule the point of order now.

The gentleman from Connecticut is recognized.

Mr. MONAGAN. Mr. Chairman, the purpose of this amendment is to withhold the availability of funds to the ICA as long as, after a period of 20 days have elapsed, the ICA refuses to give information to a committee of Congress or a proper subcommittee, or the General Accounting Office. In the Hardy subcommittee investigating the operations of the foreign aid program, we have run many times into the roadblock set up by the executive branch whereby pertinent information has been refused the committee with the result that we were not able to do the job that we were set up to do.

May I say that this language is in the authorization bill this year and it was also in the appropriation bill last year.

If you want the committees of Congress charged with supervising the operations of the foreign aid program to do the job that they are set up to do, they should not be manacled by the executive obstructionism that I have indicated.

I hope that the committees will support this amendment.

Mr. HARDY. Mr. Chairman, I offer a substitute amendment.

The Clerk read as follows:

Amendment offered by Mr. HARDY as a substitute to the amendment offered by Mr. MONAGAN: On page 6, immediately below line 12, insert the following:

"SEC. 101. None of the funds herein appropriated shall be used to carry out any provision of chapter II, III, or IV of the Mutual Security Act of 1954, as amended, with respect to any project or activity, or in any country, during any period when more than thirty-five days have elapsed between the written request (delivered to the office of the head of the appropriate department or agency) for, and the furnishing of, any document, paper, communication, audit, review, finding, recommendation, report, or other material in possession or control of such department or agency relating to the expenditure of funds with respect to such project or activity or in such country, to the General Accounting Office or any committee of the Congress, or any duly authorize subcommittee thereof, charged with considering legislation or appropriations for or expenditures of such department or agency."

Mr. HARDY. Mr. Chairman, the amendment offered by the gentleman from Connecticut is aimed at the very serious problem experienced by congressional committees in seeking to secure the information necessary for them to perform their functions in the mutual security field. I am offering a substitute amendment which I hope the gentleman will accept. I have no objection to his language, which is the same as we put into the bill last year, but I have tried in my substitute to anticipate some of the objections which the Senate raised last year. These objections, as the gentleman recalls, resulted in the insertion by the Senate of language which, as subsequently worked out in conference, differed materially from the House language. We have now had some experience with that language and it has proved to be ineffective for accomplishing the purpose intended.

My purpose is the same as that of my good friend from Connecticut—to secure for the Congress that full, complete and accurate information necessary for an evaluation of the economy and efficiency of expenditures under chapters II, III, and IV of the Mutual Security Act.

Last year the Senate preferred a period of 35 days as against the 20 in the bill as it passed the House and as proposed in the amendment of the gentleman from Connecticut. My amendment would increase the period to 35 days, which conforms to the language in last year's act.

I have worked over this problem seeking to find language to fit the needs of Congress, and yet to avoid any basis for a reasonable contention that the Congress seeks to trespass upon the Executive preserve. I think the substitute which I propose does this. It is not as broad as the language of the amendment which the gentleman has just offered. It is not directed at the total area of administration, but only to information concerning expenditures. If there is one field in which the primacy of the Congress is clearly recognized, it is this field of expenditures. My amendment calls only for information relating to expenditures, as distinguished from policy documents such as memorandums of discussions between heads of states, or confidential memorandums of advice prepared for the President.

At present we have serious difficulties in getting full, complete, and accurate information from the executive branch, and getting it in timely fashion. I believe that this amendment will help us to repair this situation.

I further believe that the substitute language which I have offered will be acceptable to the Senate, since it is limited this year to information on expenditures.

Surely no one could seriously contend that the executive branch has the privilege of denying to the Congress information necessary to determine whether appropriated funds have been, or are being, spent with economy and efficiency, or that the device of "Presidential certification" could be used to conceal pertinent data relating to the expenditure of such funds.

Mr. GARY. Mr. Chairman, will the gentleman yield?

Mr. HARDY. I yield to the gentleman from Virginia.

Mr. GARY. May I say to the gentleman that I am heartily in accord with this amendment and hope it will be adopted.

Mr. HARDY. I am deeply grateful to the gentleman.

Mr. PASSMAN. If the gentleman will yield, I think this is an excellent amendment and I am going to support it also.

Mr. HARDY. I thank the gentleman. May I ask the gentleman from Connecticut if it is agreeable with him?

Mr. MONAGAN. It is agreeable to me and I am happy to accept the substitute. I believe that the language suggested by the gentleman from Virginia will eliminate the objections which were raised last year in the Senate and will at the same time safeguard the right of Congress to full information with respect to expenditures of appropriated funds by the executive branch.

Mr. HARDY. I thank the gentleman for accepting my substitute language, and I wish to express my sincere appreciation for the gentleman's outstanding work as a member of my subcommittee.

The CHAIRMAN. The question is on the substitute amendment offered by the gentleman from Virginia [Mr. HARDY] to the amendment offered by the gentleman from Connecticut [Mr. MONAGAN].

The amendment to the amendment was agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Connecticut [Mr. MONAGAN] as amended.

The amendment was agreed to.

Mr. YATES. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. YATES: Strike out line 25 on page 7 and lines 1, 2, and 3 on page 8.

Mr. YATES. Mr. Chairman, the special program for tropical Africa is an educational program. It is a program to help train personnel to carry on the affairs of government in the new nations of Africa. Their greatest shortage now is in trained personnel, in technicians, in educators, in skilled specialists—in short, of people who know how to conduct the affairs of government. This program proposes to alleviate that shortage of personnel.

And what does the section in the bill do? It proposes to use funds by training personnel, but requires that they be trained in the open air. It will not permit them to construct a building, a quonset hut, or even a thatched leanto. Like the oldtime song, it could require

that the program be carried out "Under the bamboo tree."

This is a ridiculous provision. I hope the Committee will approve the amendment to strike out the section.

Mr. DIGGS. Mr. Chairman, section 109 of the bill prohibits the use of funds appropriated therein for the construction of any building, structure, or other similar facility in connection with the special program for tropical Africa. I hope that the amendment by the gentleman from Illinois prevails, for I fervently believe that the limitation would seriously impair the usefulness of the special program for tropical Africa as an instrument of U.S. policy. It makes it possible on the one hand for the United States to provide educational training, but denies on the other hand the possibility of helping to provide the facilities necessary for such training.

The special program for tropical Africa has as its central purposes the acceleration of African education and training to help meet the pressing and critical need for African leaders and technicians and to encourage regional cooperation.

The problem of education in Africa is a critical one from every point of view. The average literacy rate is only 10 percent compared to 35 percent for the Near East and 65 percent for the Far East. The bulk of its population is not acquainted with modern economic life, its tools and techniques. There is a staggering deficit of trained administrators capable of assuming leadership in the newly independent countries.

In order to accomplish its purpose, the special program must therefore be prepared to initiate projects at various levels of African education. It must, however, be highly selective and concentrate in those areas and on those projects which can have a multiplier effect and which could serve as key training centers for both the country concerned and neighboring areas. A basic principle of its operation, therefore, will be to build on existing African educational institutions. New facilities, such as classrooms and other structures to meet training needs will be undertaken only in support of such projects and will not be used to fill any general gap in a country's educational needs. Thus, any construction cannot be considered as the end purpose of a project but rather as one of several elements including the provision of American teaching staff and the training of an African faculty—all aimed at expanding the opportunity for education for the African people.

African resources to meet its educational needs are severely limited and will require supplements from the United States and other free world sources if the new African nations are to cope with the rapidly growing demand for education and are to fill the serious gaps in their administrative and technical leadership. From the U.S. viewpoint, assistance in the field of education, particularly as it affects future African leadership, is of utmost importance. To demonstrate U.S. interest in a positive manner requires a flexibility in meeting needs as the African leaders see them. This flexibility will be critically limited if the United States is unable to provide for construction costs as part of an effort to develop an important educational institution or training facility. It would indeed be unfortunate if this limitation made it easier for the Sino-Soviet Bloc to gain a preeminent position of influence in such a key field as education. As an example of their efforts, they are constructing and staffing a technical institute in Guinea.

The CHAIRMAN. The Chair recognizes the gentleman from Indiana [Mr. ADAIR].

Mr. ADAIR. Mr. Chairman, I rise in support of the amendment offered by the gentleman from Illinois. This amendment, if adopted, would not add a penny to the cost of this bill or to the cost of this section. As has been stated, the new independent countries of Africa have a great need for trained leaders and for a trained civil service. This amendment would give greater freedom in the training of these people. I think the amendment should be adopted.

Mr. PASSMAN. Mr. Chairman, will the gentleman yield?

Mr. ADAIR. I yield to the gentleman from Louisiana.

Mr. PASSMAN. The proponents of this provision in the authorization bill told us that they did not expect any housing to be provided in the estimate. At their request, the committee considered the program and provided the money, but prohibited the use of any funds for any type of housing.

The CHAIRMAN. The Chair recognizes the gentleman from Illinois [Mr. O'HARA].

Mr. O'HARA of Illinois. Mr. Chairman, as chairman of the African Subcommittee of the Committee on Foreign Affairs I intended to ask unanimous consent to proceed for 10 minutes that adequately to the best of my ability I could meet my responsibility. But the time limitation, to which I objected but in the wisdom of the Committee on motion prevailed, has made that impossible.

I need not remind my colleagues that belatedly there has come a recognition of the importance to us of deep and abiding ties of understanding and of friendship with the peoples of tropical Africa. One has only to read the daily and periodical press to measure the tremendous interest suddenly awakened in a continent that in 1959 was relatively of so little interest to us that a group of members of the Foreign Affairs Committee, circling the world, and the President of the United States, visiting many lands in the promotion of good will, visited very briefly only one country in Africa and that, convenient for the visitors, far to the north of Africa and much nearer Europe than the countries of tropical Africa.

It began to look, even as recently as the year 1959, that we were so bedazzled by the mystic lure of the Far East, fascinated with the dream that the destiny of the United States was far, far away in the Orient, that the Continent of Africa was of no concern to us and to the free world. Indeed even today a large part of Africa still is carried in the organization of the State Department as Europe, just as the Dominion of Canada is treated organizationally as part of Europe, not of the American hemisphere. It is difficult to explain to newly emerging nations this hangover of colonialism in the organizational charts of our State Department based not upon the facts of geography but upon the history of a past era.

I appreciate that there are organizational problems, but I venture the suggestion, which I think is one of common sense, that we will be better understood by the peoples of the world when the State Department puts all of Africa back in Africa and all of America back on the American hemisphere.

I appreciate, also, that our alliance with European colonial powers in very large measure was responsible for the misunderstanding of us by the peoples of Africa who were intent on running their own affairs under the governments of their own determination. The blunt fact is that in Africa we have missed the boat. We now have an opportunity by swimming fast enough to catch up.

When the issue was one of colonialism or national sovereignty we were in a position of embarrassment stemming from our European alliances. That situation has changed. New nations are coming into being in Africa so rapidly that recently Secretary of State Herter told our committee that in the foreseeable future Africa might have as many as 40 seats in the General Assembly of the United Nations. The European colonial powers are giving independence to their former colonies so far ahead of schedule as to knock into a cocked hat the calculations of even a year ago.

In this new phase of the African situation the United States has an opportunity of service that it would be folly to avoid. I can assure my colleagues that the subcommittee on Africa has kept constantly and sympathetically in touch with what is transpiring in Africa. It has been a hard working subcommittee. Mrs. BOLTON is the ranking minority member. Next to my beloved colleague from Illinois, Mr. CHIPERFIELD, she is the top ranking minority member of the full committee. She is dedicated to the cause of Africa. Serving with her on the minority side is the distinguished gentleman from Indiana [Mr. ADAIR], and he has made a large contribution to the work of our subcommittee.

On the majority side is the gentleman from Missouri [Mr. CARNAHAN] who next to our great chairman, Dr. MORGAN, is the ranking majority member of the full committee, the gentleman from Michigan [Mr. DIGGS], who by his visits to Africa and his constant consultations is probably in closer touch with the aspirations of the peoples of Africa than any other Member of this body, and my friend and colleague from Chicago, whose district adjoins the district that I have the honor to represent, the gentleman from Illinois [Mr. MURPHY]. Congressman MURPHY's knowledge of Africa, its peoples and their history, amazes me. He is a most valuable mem-

ber of our subcommittee and a prodigious worker.

That our colleagues may have some measure of the diligence of the Subcommittee on Africa may I say that there has been scarcely a country in Africa that has not been represented at our hearings. On Monday next we will meet here in Washington with the speaker of the Nigerian House of Assembly. Some weeks ago Dr. Banda, shortly after his release from detention in Nyasaland, met with us here in Washington. Not long ago we benefited by getting a first-hand recital from an outstanding delegation, including two women, from the Mali Federation. Some months ago when the President of Guinea was in Chicago he gave 2 hours to a conference with our subcommittee, which was represented by Congressman MURPHY and myself, the other members of the subcommittee, because of the time and distance factors, being unable to attend.

I mention this merely that my colleagues may know that the members of our subcommittee have accepted very seriously their responsibility and have advantaged from every opportunity to get at first hand a better understanding of Africa, the problems of its present and its aspirations for the future.

I would say that the immediate problem of the newly emerging nations of Africa is for trained civil servants. It is not that the Africans do not have the ability, and on that point I might remark that the scholastic record of students in African colleges and universities compares most favorably with that of those in European and American colleges and universities. But naturally, having been denied the opportunity of much participation in government, they lack experience.

It is a situation comparable to that of our own country when we were massing great armed forces to engage in a titanic world conflict. We needed officers, and we did not have the time to send young men to West Point and Annapolis for 4 years of officer training. The need was immediate, and we met the challenge both in World War I and World War II by officers' training schools from which in 90 days of intensive training we built up an officer corps that met every demand of the greatest war in history.

What we did to meet that challenge of war, when the world of freedom was at stake, is a pattern of what can be done in Africa today when the fate of that continent and to a large extent the fate of the free world depends upon the efficiency with which the civil officials of newly emerging nations can function both on high and low levels.

My concept of the way in which the $20 million of the tropical Africa program should be used is along the lines I have suggested. It is a relatively small program measured by dollars. In fiscal 1961 it is estimated that European powers, including the Soviet, will be pouring into tropical Africa from $500 million to a billion dollars. We cannot compete on that scale.

What we are attempting to do with $20 million is to give the new African nations something that they need immediately, something that will help them to keep on their feet and to have even in the humblest of public offices persons who have been reasonably well trained in the performance of the tasks given them. This I think can be done with the $20 million appropriated for this program provided there is wise administration and the objective always kept in mind of meeting the immediate need.

If section 109 remains in H.R. 12619 it will be impossible to proceed with the 90-day training schools for civil servants because obviously some relatively small amounts of money would be necessary for temporary construction. I wish to make it clear that I do not think, in view of the modest amount of the appropriation of $20 million for all tropical Africa, that any large sums should be used in school and college construction but there are places where some construction wisely should be made, and on a necessarily limited scale, because of the largeness of the field to be covered. I can cite one instance, I think it is in Nigeria where there is a very good university, capable of carrying a much larger student body, but handicapped by lack of living quarters for students. If it was proposed, as well it might, to build inexpensive barracks in which students coming from all parts of tropical Africa could live, and no one I think would call that an extravagance, the project could not be entertained because of the prohibition in section 109.

I do not believe the gentleman from Louisiana and his subcommittee realized how far section 109 would go in destroying completely the tropical Africa program. We could not build even the humblest hut to house a teacher or a student. Section 109, I repeat, would completely kill the program and I know it is not the intention of the subcommittee to do that. I trust the amendment of my colleague from Illinois [Mr. YATES], a ranking member of the Appropriations Committee, will be adopted unanimously.

Now is our golden opportunity to win the hearts and the minds of the peoples of Africa by helping them the more efficiently to carry the responsibilities attendant on sovereignty. If we lose Africa, and the binding friendship which properly nurtured will permanently endure between our own country, a child of an early colonialism, and the new nations of Africa, children of colonialism of a later period, we will lose the world.

The CHAIRMAN. The Chair recognizes the gentleman from California [Mr. BALDWIN].

Mr. BALDWIN. Mr. Chairman, I rise in support of the amendment.

Mr. Chairman, the nations of Africa it seems are among the key nations in the world today. I think this program is most essential and, certainly, a training program of this type should be provided, and they should be able to construct whatever may be necessary to carry out the training.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. BALDWIN. I yield to the gentleman from Illinois.

Mr. YATES. The U.S. News & World Report says in an article on Africa:

> This whole vast area of southern Africa, from the Congo to the lower tip of South Africa, is the heartland of the continent's wealth and development. Native blacks preparing to take over almost everywhere except in South Africa are up against tremendous odds. They are short of skilled manpower, trained civil servants, and the capital needed to develop fully the huge potential of lower Africa.

Mr. Chairman, this section, as it stands now, would kill the program. We must cooperate with these nations to help them help themselves.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois [Mr. YATES].

The amendment was agreed to.

Mr. COLMER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

> Amendment offered by Mr. COLMER: On page 6, after line 23, insert the following new section:
>
> "SEC. 103. None of the funds appropriated in this Act shall be available for expenditure in connection with any contract for construction, maintenance, or repair to be carried out in a shipyard located outside the United States."
>
> And renumber the remaining sections of the bill accordingly.

Mr. COLMER. Mr. Chairman, with the parliamentary situation what it is, of course no opportunity is available to present the necessary explanation of and the purpose for the amendment. Briefly, the amendment would prevent what I regard as a continuation of an intolerable situation so far as the shipbuilders is concerned as affected by this program. Under the present law, the administrators of this program allocate these funds to foreign countries; they then can and do authorize the building of ships by one foreign nation to another; sometimes the money is furnished one nation to build ships for itself in its own country. While this comes as no revelation, I wonder how many of our colleagues know that it is practically impossible for American shipbuilders to successfully bid for the construction of these ships. In fact, to all intents and purposes it is impossible. This, for the simple reason that the foreign yards, with their cheap labor and cheaply produced materials can underbid the American yards by as much as one-half and never less than one fourth. Mr. Chairman, this was brought forcefully to my attention recently when the ICA issued invitations for bids for the construction of a hydraulic dredge for Vietnam. Several American yards bid on this ship. It so happened that the Ingalls Shipbuilding Corp. of Pascagoula, Miss., was the lowest qualified bidder among the domestic bidders. However, two Japanese firms submitted much lower bids. The Ingalls bid was $1,394,950 but the Uraga Dock Co., Ltd., Tokyo, Japan, was $916,200.

We have repeatedly had the matter up with ICA officials, but have gotten no encouragement whatever. And it would now appear that this contract will be awarded to this Japanese company.

This presents a pretty difficult picture. It comes at a time when every reputable shipyard in this country is hungry for contracts. They are all engaged in submitting the lowest possible bids in order to have enough work going to keep their yards intact; often bidding below the actual cost of construction. It also comes at a time when the President of the United States and the United States itself are insulted by having the President's invitation to visit that country withdrawn.

But, Mr. Chairman, that is not all. I am sure the facts are that this very foreign yard was either constructed or materially subsidized by the American taxpayers in its construction. Finally, Mr. Chairman, I wonder how the stockholders, the workmen who are being laid off of their jobs for want of contracts, all of whom are taxed to pay for this project, must feel.

Of course, this situation does not apply to the shipbuilding industry alone. It is going on every day in many other industries. And, of course, everyone knows that American industry cannot compete with foreign industry because of the cost of labor and materials.

This amendment should be adopted.

The CHAIRMAN. The Chair recognizes the gentleman from Michigan [Mr. FORD].

Mr. FORD. Mr. Chairman, I do not like to disagree with the fine gentleman from Mississippi, but in this case it is not practical to send ships from Europe or the Mediterranean back to the United States for repair and rehabilitation. This does not make sense and, therefore, I must oppose the amendment offered by the gentleman from Mississippi.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Mississippi [Mr. COLMER].

The question was taken; and on a division (demanded by Mr. COLMER) there were—ayes 52, noes 97.

So the amendment was rejected.

Mr. COFFIN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. COFFIN: On page 4, strike out all on line 22 through line 25.

Mr. COFFIN. Mr. Chairman, I think this amendment should appeal to all of the Members in this Chamber. It takes off the shackles which have been put on the Inspector General, an office which we created last year to help police the foreign-aid program. Admittedly no substitute for the General Accounting Office, it is, nevertheless, an indispensable agency within the executive branch of the Government to keep a day-in, day-out running check on bribery, corruption, and inefficiency.

This involves no new money in the program. What the committee has done is to say to this watchdog: "You cannot use more than $1 million." We should allow them to use $5 million if they thought it was necessary to clean up inefficiency.

Mr. MORGAN. Mr. Chairman, I wish to be recognized on the amendment.

The CHAIRMAN. The gentleman from Pennsylvania is recognized.

Mr. COFFIN. Mr. Chairman, will the gentleman yield?

Mr. MORGAN. I yield to the gentleman from Maine.

Mr. COFFIN. I know the gentleman, the distinguished chairman of the Foreign Affairs Committee, has been most interested in this provision. This affects the Inspector General who has a great deal to do and is doing a good job.

Mr. MORGAN. Mr. Chairman, the bill—page 4, beginning on line 22—sets a ceiling of $1 million on the funds made available to finance the operations of the Inspector General and Comptroller. I feel very strongly that this sum is not enough, and I am sure that the overwhelming majority of the Members of the Committee on Foreign Affairs share my view.

The issue here is not a conflict between the Congress and the Executive as to the amount of money which should be made available. The disagreement is entirely within the Congress. The Executive opposed the establishment of the Inspector General and Comptroller and his staff, and I assume the Executive would prefer to see the entire operation abandoned or its scope of operation curtailed.

The Inspector General and Comptroller, together with the staff necessary to carry out his operations, was established as a result of action initiated by the Foreign Affairs Committee. I personally submitted the amendment creating this organization to the committee, and I feel very strongly that the Inspector General and Comptroller should be given an opportunity to get his program into full operation.

I believe that it is vital to the security of the United States that there be a mutual security program and that the Congress owes it to the American taxpayer to do everything possible to assure that the funds provided to finance the mutual security program not be wasted. This was the basis for setting up the Office of Inspector General and Comptroller.

I borrowed the idea from the armed services. The Army, the Navy, and the Air Force each has an Inspector General. These Inspectors General operate within the organization but report directly to the top commander. What we were trying to do was to create within the executive branch a staff skilled enough and large enough to keep track of what actually is going on in the operation of the mutual security program, to call deficiencies to the attention of Under Secretary Dillon who is the man with overall responsibility for the entire operation, and to see that corrective action is taken before scandals develop to the point where they make headlines or before large sums of money have been wasted.

Our idea was not to duplicate what is being done by the General Accounting Office or by investigating committees of the Congress. The General Accounting Office does review mutual security operations and their findings have been most valuable. Our own committee and other committees have conducted investigations and are continuing to conduct investigations. All of these are important and should continue. The object, however, is not to have people on the outside conduct a post-audit after the damage has been done. It is to have people who are in close and continuous touch with everyday operations who can act to correct and prevent deficiencies and waste before it is too late.

The Foreign Affairs Committee has been very much impressed by the fact that whenever our Members go overseas they encounter a substantial number of Americans in every country who are aware of certain shortcomings of our mutual security operations and who are anxious to have them taken care of. I do not believe that there is generally a conspiracy of silence on the part of personnel engaged in carrying out the mutual security program to hide waste or to cover up mistakes. I realize, however, that it frequently is difficult to get reports of waste and inefficiency transmitted from the working level to the top officials of an organization. It is only human that people whose jobs depend on a particular operation are not inclined to send in reports which might result in that particular operation being closed down. It is also true that people who are responsible for decisions are inclined to be slow in admitting mistakes.

One of the main purposes of the Inspector General and his staff is to provide a means by which information about deficiencies in the operation of the program can be transmitted from the operating level in the field where they become apparent to the top echelon of the organization where remedial action can be taken.

The Appropriations Subcommittee apparently does not agree with the Foreign Affairs Committee approach to this problem. In the printed hearings of the subcommittee there are a number of statements of members, saying that the idea is no good and that it will never work. They apparently believe that the Inspector General idea works out all right in the armed services but that there is something peculiar to the mutual security program which prevents its working here.

By limiting the funds available to the Inspector General to $1 million, the Appropriations Subcommittee is making sure that they will win the argument because there can be no doubt that if that is all the money available to the Inspector General and Comptroller, he cannot do the job he is supposed to do.

The Inspector General in making up his own budget wanted $1,762,000.

One indication of how much money is necessary to carry on this sort of an operation can be derived from figures submitted by the General Accounting Office for its own oversea operations. The General Accounting Office maintains two oversea offices—one in Paris and one in Tokyo. These offices are staffed with officers who travel all over Europe and the Far East respectively. The work is limited entirely to investigating U.S. military expenditures in those areas. These include military assistance expenditures under the mutual security program and the expenditures of our own Armed Forces stationed abroad. Investigations of other oversea operations of the United States, in-

cluding the economic side of the mutual security program, are handled by General Accounting personnel sent directly from Washington.

To operate these two oversea offices, it costs the General Accounting Office $1,434,500 a year for salaries, travel and actual oversea office expenses. This includes nothing for Washington administration or support in connection with the oversea operation.

If it takes $1,400,000 for the General Accounting Office to operate only two oversea offices, limited to military operations in only two areas of the world, it seems clear to me that we cannot expect the Inspector General and Comptroller to keep his eye on the mutual security operations all over the world, including all programs, for an outlay of only $1 million per year.

I personally am disappointed in the progress made by the Inspector General in getting his operation under way, and in my opinion he is not giving the proper emphasis to certain aspects of his operation. I believe that the program which he has in mind and has submitted in some detail to the Appropriations Subcommittee should be revised. For that reason, I favor that a limitation of $1,500,000 be placed on his operation, which is $200,000 less than he has asked for.

A limitation of this kind would make it necessary for him to revise his program, and I believe that such a revision would improve it. A figure of $1,500,000, however, should be enough for him to carry on his work, while a $1 million figure would absolutely prevent his rendering the service which is necessary to improve the efficiency of the mutual security program.

The CHAIRMAN. Does anyone else desire to be heard on this amendment?

Mr. GALLAGHER. I desire to be heard, Mr. Chairman.

The CHAIRMAN. The gentleman from New Jersey is recognized.

Mr. COFFIN. Mr. Chairman, will the gentleman yield?

Mr. GALLAGHER. I yield.

Mr. COFFIN. I will merely state that this amendment seeks to take a limitation off this agency which the committee set up to go into the foreign aid program. It must be remembered that the Inspector General must get approval from the Budget Bureau for his appropriations. In short, we are in the position of the pilot just about ready to take off at the end of the runway who decides to reverse his propellers. I urge that this amendment be adopted.

Mr. PASSMAN. Mr. Chairman, I desire to be heard on the amendment.

The CHAIRMAN. The gentleman is recognized.

Mr. PASSMAN. Mr. Chairman, the section of the bill to which this amendment applies provides for a limitation on the amount of funds the Inspector General may spend. The Inspector General now has no limitation; he may spend as much as he wishes to do, subject only to his own judgment.

I hope the amendment will be defeated.

Mr. FORD. Mr. Chairman, I offer a substitute for the amendment now pending.

The Clerk read as follows:

Amendment offered by Mr. FORD as a substitute for the amendment offered by Mr. COFFIN: On page 4, line 23, strike out "$1,000,000" and insert "$1,250,000."

The CHAIRMAN. The question is on the substitute offered by the gentleman from Michigan [Mr. FORD].

The substitute was rejected.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Maine [Mr. COFFIN].

The question was taken; and on a division (demanded by Mr. COFFIN) there were—ayes 71, noes 126.

So the amendment was rejected.

Mr. GROSS. Mr. Chairman, I offer an amendment. I have four or five of them.

The CHAIRMAN. Does the gentleman ask unanimous consent that the five amendments he offers be considered en bloc?

Mr. GROSS. That is all right with me.

The CHAIRMAN. Is there objection to the request of the gentleman from Iowa?

There was no objection.

The Clerk read as follows:

Amendments offered by Mr. GROSS: Page 4, line 17, strike out the figure "$38,000,000" and insert in lieu thereof "$35,000,000."

Mr. GROSS. Mr. Chairman, the hearings on this mutual security program over the years are replete with examples of inept and wasteful administration. I believe it would be highly beneficial to the program as a whole and to the taxpayers of the Nation to reduce the funds for administration purposes and to indicate the need to fire a few of the starry-eyed dreamers that abound in the administration handling this program.

The Clerk read as follows:

Amendments offered by Mr. GROSS: Page 4, line 25, after the word "amended", insert "none of which shall be used for representation or entertainment."

Mr. GROSS. Mr. Chairman, I wonder if the gentlemen who have been working hard to increase spending under this foreign giveaway program can tell me the amount to be appropriated in this bill for liquor and entertainment?

Mr. Chairman, the hearings on appropriation bills before the House can always be read with profit. For instance, it was enlightening to read recently that the downtrodden taxpayers of this country are underwriting the costs of studies dealing with the "aging of ovaries in cockroaches," "the circulatory physiology of the octopus," a "pictorial test of the intrapersonal and interpersonal relationship of a husband and wife."

Now we learn in these hearings, through a Mr. Crockett, that a cocktail party held in a foreign country is "representation," while the same kind of a fandango staged in this country comes under the heading of "entertainment."

Mr. CROCKETT. Mr. Chairman, "representation" is always used in the connotation of entertainment overseas, while "entertainment" is used in the connotation of domestic entertainment. We do not use "representation" domestically.

Mr. PASSMAN, Chairman of the Appropriations Subcommittee, when he was finally enlightened as to the difference, observed that the fast travelers in the State Department and the ICA probably have as much fun no matter which of the above headings may be used to pick the pockets of the taxpayers.

Now it appears that the ICA requested $198,000 for "representation" and $6,000 for entertainment, while the State Department, although it apparently got $835,000 in another bill, requested another $72,500. It is contended that money is needed for funeral and ceremonial wreaths so Mr. PASSMAN asked for a separation of the scotch and bourbon and from the expenditures for wreaths here is how it looks:

Estimated expenditures for funeral and memorial wreaths under the 411(c) appropriation—representation

Fiscal year 1960	$145
Fiscal year 1959	148
Fiscal year 1958	155

Now the request for liquor and entertainment:

REPRESENTATION AND ENTERTAINMENT EXPENSES IN MUTUAL SECURITY PROGRAM

Fiscal year 1961 estimated representation expenses and entertainment expenses

	Fiscal year 1961	
	Estimated representation expenses	Estimated entertainment expenses
Military assistance	$163,800	
Development Loan Fund	1,000	$5,000
Administrative expenses, ICA (sec. 411(b))	198,000	6,000
Administrative expenses, Department of State (sec. 411(c))	72,500	1,000
Expenses, Inspector General and Comptroller	2,000	600
Total	437,300	12,600

Mr. Chairman, it is beyond belief that any additional request would be made for additional liquor funds, and I hope my amendment will be adopted.

The Clerk read as follows:

Amendment offered by Mr. GROSS: Page 6, line 3, strike out "$550,000,000" and insert in lieu thereof "$450,000,000."

Mr. GROSS. Mr. Chairman, it is to be noted in connection with this Development Loan Fund that, insofar as the taxpayers of the United States are concerned, the contributions to this fund are direct grants that are never returned to the Treasury of the United States.

This was made clear in the following colloquy on page 450 of the House hearings on the mutual security appropriations for 1961:

Mr. PASSMAN. At what time, if ever, does any of this go back in the U.S. Treasury?

Mr. MURPHY. Under existing authority, Mr. Chairman, it is not contemplated that any of the receipts of the Development Loan Fund, whether repayments of principal or interest, would go back into the general fund of the Treasury.

They are made available for the continuing operation of the DLF.

* * * * *

Mr. PASSMAN. We are hoping this program will come to an end one of these days. Let us discuss the present legislation.

There is no provision whereby any of this money will ever come back to the U.S. Treasury to reduce the public debt or to be reappropriated in other fields?

Mr. MURPHY. That is correct, Mr. Chairman.

And again on page 451:

Mr. PASSMAN. I do not believe in being repetitious unless it serves a useful purpose. It is not a matter of disagreeing or quarreling but a matter of setting the record straight.

Under the Development Loan Fund there is no provision in the law, and there is none planned that you know of, whereby the dollars that we are appropriating—come from the taxpayer—will go back into the U.S. Treasury, to be used toward reducing the public debt or to be spent to meet the payrolls of the U.S. Congress, let us say. Is that correct?

Mr. MURPHY. Yes, sir; I believe it is.

It is my belief that we should refuse to make any further grants of the taxpayers' dollars to this Development Loan Fund. As the record will show this is an outright grant of the taxpayers' money to provide funds for constructing projects in foreign countries, with none of the funds ever being repaid to the United States Treasury. At the present time nearly 80 percent of the funds are being made under loan agreements providing for repayment in foreign currency.

Certainly it is time to reduce this drain on the taxpayers' pocketbook. This amendment would be only a token step to what should be done.

The Clerk read as follows:

Amendment offered by Mr. GROSS: On page 6, line 4, strike out the period and insert a colon and the following: *"Provided*, That none of the funds advanced to the Development Loan Fund shall be used to execute loans on which less than 50 percent of the loan is to be repaid in dollars."

Mr. GROSS. Mr. Chairman, the Director of the Development Loan Fund expressed the belief that some repayment should be made in dollars in these words, taken from page 312 of the House hearings on the mutual security appropriations for 1961:

Mr. BRAND. I might mention, Mr. Chairman, that in connection with local currencies, I feel rather strongly that the Development Loan Fund should have built into its loans some repayment in dollars in practically all of the loans.

It seems to me that when the taxpayers of the Nation are called upon to provide billions of dollars to this fund with no provision for repayment to the Treasury that the least we can do is to require that not less than 50 percent of the repayments made by the loanees shall be in dollars. If this is done it should reduce future requests for additional dollar capital to maintain the fund.

In addition, the time may come when it would be desirable to enact new legislation to either repay the taxpayers for the funds advanced or to pay into the Treasury a dividend on the taxpayers' investment. At such time it would be desirable to have a large part of the capital fund in dollars.

The Clerk reads as follows:

Amendment offered by Mr. GROSS. On page 9 after line 11 add the following new section:

"SEC. 114. None of the funds herein appropriated shall be used to implement new contracts or to extend existing contracts for tuition or studies which are in excess of $200 per month per student."

Mr. GROSS. Mr. Chairman, the hearing record shows that the International Cooperation Administration is paying tuitions of $800 or more per student per month. The Office of Education advises that average tuition rates for private universities run slightly over $850 per year. For an 8-month school year this would be slightly over $100 per month.

I cannot conceive how the administration of ICA can justify the exorbitant cost of some of the contracts that came to light in the recent hearings. When the Inspector General of the ICA states that he had no intention of investigating a contract that carried a tuition rate that is around eight times the average tuition rate of our institutes of higher learning, it is time we put some restriction on the use of the taxpayers' funds.

Many of these study courses appear to be primarily for the purpose of advising the ICA personnel new ways to give away the hard-earned taxpayers' dollars. Is it not in order to ask whether they are justified, even if the cost is reduced 75 percent?

Mr. Chairman, when we return to the House, I shall ask permission to include a copy of the proposed schedule of lectures which have been costing the taxpayers such exorbitant amounts.

The CHAIRMAN. The question is on the amendments offered by the gentleman from Iowa.

The amendments were rejected.

Mr. GROSS. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD on each amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. REUSS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. REUSS: On page 7, lines 16 to 18, strike out "section 106" and renumber the later sections accordingly.

Mr. REUSS. Mr. Chairman, I ask unanimous consent to extend my remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. REUSS. Mr. Chairman, the Mutual Security Act of 1960, approved on May 14, directed the President to have a study made of the point 4 Youth Corps, under which young U.S. citizens would have an opportunity to serve abroad in technical cooperation programs. While the principal expenses of this study are to be paid for by a private foundation, up to $10,000 of technical cooperation funds was authorized to help defray the expenses of the study.

Section 106 of the mutual security appropriation bill in effect vetoes the Federal contribution to this study, which Congress ordered only a month ago. My amendment, by striking section 106, would permit the study to go forward as envisaged in the Mutual Security Act of 1960.

One of the criticisms made of our foreign aid program has been that it concentrates to much on military aid and on the more grandiose economic projects, instead of on a person-to-person approach. The point 4 Youth Corps idea would permit at least a study to be made of this person-to-person approach.

The House Committee on Foreign Affairs, in its report on this year's Mutual Security Act, expressed its belief that "there is substantial merit in the proposal." The committee report states—page 29:

The committee believes that the United States is failing to utilize one of its important assets by not developing a program for using such services. If young Americans with farm backgrounds and adequate technical training, who are willing to live in the villages and share in the daily work of the people and would serve with only a minimum salary and subsistence allowance, could be carefully selected and sent to the less developed countries, they could be unusually effective representatives of the United States.

The gentleman from Georgia [Mr. PILCHER], chairman of the Subcommittee on Foreign Economic Policy of the House Committee on Foreign Affairs, reported to the House on June 1, 1960, on the subcommittee's recent six-continent study trip. The gentleman from Georgia reported that he and his subcommittee had found evidence of much "waste and extravagance"; but one outstandingly successful American project had been observed:

It would not be fair to critize the highway program, the radio program and the water program, without stating that in Vietnam we found one of the finest agricultural programs I have ever seen anywhere. Up in the hill country, we visited an experiment station where several young American boys, graduates of agricultural colleges, were living in quonset huts along beside the Vietnamese. This experimental station would do credit to any station in this country. They had planted in experimental plots practically every agricultural crop, including cotton, corn, peanuts, potatoes, grains, all kinds of vegetables, and raefel. In addition to this, they were showing the hill people who had been given 5 acres of land and a water buffalo, how to plant and cultivate in rows. These people also were doing a good job in their way and were very happy. The entire project has not cost as much money as one mile of the superhighway. This kind of program is helping the little people to help themselves.

The point 4 Youth Corps study proposal has been widely endorsed by newspapers, church groups, university faculty and student groups, as well as by both Houses of Congress.

The Christian Science Monitor of January 20, 1960, has the following editorial:

POINT 4 YOUTH CORPS

Representative HENRY REUSS, of Wisconsin, is offering Congress one of the best ideas yet devised for the competitive coexistence era.

He has filed a bill authorizing a study of the feasibility of a point 4 Youth Corps—a

draft-pay, draft-duration, draft-tough alternative to selective service for qualified young Americans who choose to serve their country in foreign rice paddies instead of the drill field.

We urge Congress to unearth and pass this bill speedily.

It will commit no one finally. It will cost little or nothing, since the study would be made by a private university or foundation as a public service. But it concerns a phase of the international struggle—the future gravitation of underdeveloped nations—that never has marked time waiting for Congress.

Although the program cannot be fully spelled out until all possibilities and pitfalls are studied, it would work in roughly this manner:

John Farmer is draft exempt while completing his agricultural course at Texas A. & M. After graduation he applies for a village-level job teaching modern farming methods under the International Cooperation Administration or Ford Foundation.

If he does not meet the qualifications, he reverts to draftable status.

But if he is accepted, John gets perhaps a 3-month stateside training period for his job (as rigorous in its way as Army basic training) and then is sent to a village project in India, where he will be paid the minimal wage and allowances he might have gotten for straight draft service. His hitch, like that of his rifle-toting buddy, is for 2 years.

Let's examine possible objections to the idea:

1. It might provide a haven for draft dodgers.

Since public and private technical assistance agencies would themselves pass on quotas and qualifications, acceptance of "goldbrickers" seems unlikely.

2. It might siphon off top educated talent from the military draft.

Under current low draft quotas only a small percentage of this talent is being called anyway. Mr. REUSS envisions a point 4 Youth Corps of not more than 10,000 to start with.

3. Veterans groups might object to youth corps dischargees being eligible for educational, pension, and medical benefits.

To meet this objection, Mr. REUSS and his analysts incline toward dropping veterans' benefits. We would agree, with the exception of the GI bill educational provisions, which would have even greater value for the Nation if extended to youths whose further study might provide a substantial number of first-rate new diplomats, international businessmen, and foreign service officials.

We would urge, as an additional safeguard, that recruiting posters and brochures for any such program emphasize that it is not a glamor world cruise, but one likely to involve more discomfort (and certainly less PX life) than peacetime Army service.

With these precautions taken, the advantages of the proposed youth corps are enormous.

The "have-not" nations are clearly going to be the battlefront for the world balance of power and for freedom in the coming generation. Money and military aid alone will not win that battle. Moscow and Peiping are carefully training cadres to go out into the villages. The authoritarian control they work under puts them at a disadvantage. But only if there are in sight comparable workers who are both free and technically capable.

Mr. REUSS' plan would help show the emerging peoples in a personal way the American altruism that now is too often lost amidst dollar signs. It would strengthen language training, promote a more professional foreign service, and give enthusiastic young Americans a more mature understanding of the world they will have to face. In short, it merits bipartisan priority treatment.

From the Milwaukee Journal of May 16, 1960:

REUSS YOUTH CORPS

Congress has agreed, in the mutual security bill just passed, that Congressman HENRY REUSS' proposal for a point 4 Youth Corps deserves sympathetic study. The bill urges the President to select a university, foundation or other nongovernmental research group to develop the organization and program for such a corps.

What REUSS proposed, in conjunction with the late Senator Neuberger, Democrat, of Oregon, was that several thousand young Americans serve voluntarily at a soldier's pay in public and private technical assistance missions in the world's newly developing nations.

In a recent article in Commonweal magazine, REUSS suggested these advantages of such a corps:

It offers a possible alternative to military service under the draft. It would assure an adequate supply of young Americans to man technical assistance missions in years to come. It would give our youth "a sense of purpose—the excitement and stimulus of taking part in great events." It would give the world a far better image of a democratic, unmilitaristic, helpful United States. It would help keep our foreign-aid programs effective, flexible, and up to date.

The great challenges of the present decade may be coming in the villages and rural areas of Africa, Asia, and Latin America. Russia and China are training persons for that competition now. The United States had better be preparing its forces to represent freedom. The Reuss Youth Corps plan seems to offer a good starter.

In the May 7, 1960, issue of Ave Maria is the following:

MISSIONERS AT SOLDIER'S PAY

College students dreading graduation day and the subsequent greetings from the President of the United States may soon be in for a pleasant surprise. And the old jokes about the military services' bumbling inability to place their men where they will do the most good may go the way of the Army mule if a bill now pending in Congress is approved.

In brief, the bill, H.R. 9638, introduced in the House by Representative HENRY S. REUSS, would provide for a study looking toward a point 4 Youth Corps, a militia of young Americans willing to serve their country in public and private technical-assistance missions—and at a soldier's pay.

In other words, instead of being drafted to serve in one of the military forces, qualified young men would apply for the point 4 Youth Corps. If they met the required standards they would be trained further in their own fields and sent to an underdeveloped country to contribute to the welfare of that nation in a tangible way. No goldbricker would be accepted; in fact, the work would be much more difficult than the Army—but much more challenging.

Congressman REUSS sees three main objectives in his bill. The first is to benefit governmental and private agencies now afield in foreign countries, agencies desperately in need of additional technical manpower to help carry out economic, medical, educational and community development programs.

The second objective is to aid both those people in other countries and ourselves by an active public relations program. Through close contact with intelligent young American college graduates, the understanding of peoples in other lands will be broadened and enriched by learning and accepting American ideals.

Third, the benefits accruing to the young Americans themselves would be inestimable. Their firsthand experience in underdeveloped nations would undoubtedly intensify their appreciation of life in the United States, not to mention the breadth and depth of outlook that their work would give them.

Representative REUSS' bill offers many constructive possibilities and should certainly receive careful consideration.

The Progressive magazine for May 1960 comments:

POINT 4 REJUVENATION

In his better days, when former President Harry S. Truman laid down a four-point foreign policy program in his inaugural address of January 20, 1949, he wrote into the language a term that has become a world-wide symbol of the generosity, the concern for others, and the creative imagination of the American people. Point 4 of President Truman's proposals was to be a bold, new program which would bring to all the world the benefits of America's great technical and scientific resources. It was conceived as a continuing effort to share our wealth of knowledge and skills with other peoples so that they could more rapidly develop their own human and material resources and improve their standard of living.

In the 11 years since the inauguration of point 4, thousands of American technicians in every conceivable social and scientific field have gone to every part of the earth to train and teach other peoples to help themselves. But the world's needs have scarcely been scratched, and President Truman's bold, new program has been much diluted by excessive caution, a military-minded administration, and a Congress cool toward economic aid.

Now a bold, new idea for implementing the point 4 concept has been introduced by Democratic Representative HENRY S. REUSS. The Wisconsin Congressman has proposed a point 4 Youth Corp for young American men and women to serve in technical assistance missions. The plan would call for 2- or 4-year college students or graduates to enlist for a minimum 2-year period for work overseas under both Government and privately sponsored point 4 programs—work which would utilize their special training and talents.

We concur heartily with the basic objectives of such a Youth Corps. As outlined by Representative REUSS, they are:

First. To make additional technical manpower available to U.S. agencies and to private agencies carrying out economic, medical, educational, and community development programs in underdeveloped friendly foreign countries.

Second. To assist in broadening the understanding by the peoples of other nations of the ideals and aspirations of Americans, through close contact with young Americans participating in the point 4 Youth Corps.

Third. To offer our young people an opportunity to serve their country in a stimulating way, while broadening their understanding of the problems facing other peoples and nations.

The legislation which REUSS has introduced in the House (and an identical bill brought before the Senate by the late Senator Richard L. Neuberger) asks for a nongovernmental study to determine the practicality and advisability of such a corps, with recommendations to be returned to Congress within a year.

It has been suggested that enlistment in the Youth Corps might be an alternative to military service under the present draft law. But this possibility is by no means an essential part of REUSS' proposal and we would hope that any study of the plan would not emphasize this feature as one of its recommendations. A more constructive approach, it seems to us, would be to eliminate the military draft and establish the point 4 Youth Corps as a voluntary peace army bringing new life, new ideas, and new skills to peoples all over the world. We are confident that many thousands of our college

students would be eager to take advantage of the enormous opportunities which would be opened to them by such a program.

Edward P. Morgan, in his May 2, 1960, news broadcast over the American Broadcasting Network, said:

In a Senate speech last week, Chairman WILLIAM FULBRIGHT of the Foreign Relations Committee described the administration's mutual security program, on which final action is pending in Congress, as a "plate of warmed-over grits." Defending the principle of foreign aid as being as necessary to the country as a life insurance policy to a family, FULBRIGHT scored the administration for lack of initiative and long-range planning which he held essential to the program's successful continuity. Still, he conceded, there is nourishment in warmed-over grits and reluctantly he endorsed the legislation as better than nothing.

In this package, however, there is at least one germ of a promising idea. It is to give eligible young Americans a chance to work on foreign-aid projects in the field as an alternative to the military draft. The Senate bill includes a $10,000 item to study the feasibility of recruiting 10,000 youths for a 2-year hitch on technical assistance jobs. This approach was cosponsored by Congressman HENRY REUSS of Wisconsin and the late Senator Richard Neuberger, of Oregon, both Democrats. Minnesota's Senator HUBERT HUMPHREY argues a study is unnecessary; says we already know what the problems are and he is preparing a bill for direct action—if he can take enough time from presidential politicking to introduce it: a 3-year tour (a year longer than the draft but at basic Army pay without veterans' benefits) beginning with 500 the first year and building eventually to 10,000.

The response on various campuses which have caught wind of it has been enthusiastic but the unofficial State Department and International Cooperation Administration reaction so far is something as follows: "It's a nice idea, but, gee, we already have all these other problems."

Interestingly enough, the exciting experiences of a small private outfit in this field called International Voluntary Services, may eventually bring the bureaucrats around. IVS, run largely by exmissionaries on a nonsectarian basis, has contracted with foundations and ICA to man such projects as agricultural experiment stations in Laos and Egypt. Already both governments have requested more of these young un-ugly Americans. The two trying new crops along the Nile are beseeched by Egyptians to teach them English in their spare time. Apparently this person-to-person contact on the grassroots level is one of the secrets of success for IVS, whose candidates are carefully selected not only for their skills but for a kind of pioneering spirit; only 1 in 10 qualifies.

In an article in the current issue of Commonweal magazine on his plan for a point 4 Youth Corps, Congressman REUSS writes that "too often we seem to emphasize military alliances with corrupt or reactionary leaders; furnishing military hardware which all too frequently is turned on the people of the country we are presumably helping." (Shades of Turkey and Korea.) REUSS speaks of "grandiose and massive projects" and "hordes of American officials living aloof in enclaves in the country's capital." And he asks: "Would we not be farther along if we relied more heavily on a group of some thousands of young Americans willing to help with an irrigation project, digging a village well, or setting up a rural school?"

One of the things which steamed up Senator HUMPHREY's enthusiasm originally was this kind of modern pioneering concept. Applicants would have to have three main assets: real skill, real enthusiasm, and a certain political and social maturity with a minimum age of 22. The recruits would take a 1-year training course, half in the United States, half in the country where they were assigned. Their jobs? Teaching literacy, teaching English, basic agricultural and industrial skills, sanitation and health techniques, and many other functions.

Carefully applied, this approach to foreign aid could do a great deal to transform the program from a plate of warmed-over grits to a large nourishing helping of frontiersmanship in a rich American tradition.

This is Edward P. Morgan saying good night from Washington.

The U.S. National Student Association, on May 28, 1960, took the following position in testimony before the Democratic platform committee:

On the domestic scene, the U.S. National Student Association supports an expanded program for bringing foreign students to the United States provided that the program calls for closer planning between the United States and foreign governments to determine manpower needs and greater emphasis on 1 or 2 year special programs oriented toward leadership training and technical fields; we further support the allocation of "soft currency" funds under Public Law 480 as a means of expanding or initiating programs of U.S. educational institutions which would contribute to cultural and educational development in foreign countries with projects such as delegations of U.S. student leaders. We submit, however, that a bolder, more imaginative step is urgently needed. We believe that the House of Representatives bill 9638, introduced by Representative HENRY S. REUSS, Democrat, of Wisconsin, to provide for a study to be conducted by a nongovernmental group on the advisability and practicability of the establishment of a point 4 Youth Corps under which young citizens will be trained and serve in programs of technical cooperation is one effective way to help meet the challenge of the "revolution of rising expectations" as well as Communist infiltration through programs of technical assistance and youth festivals. One of the factors to be considered is whether or not it would be desirable to provide that service in the point 4 Youth Corps shall be considered as satisfying the obligation of the individual to perform training and service in the Armed Forces. The U.S. National Student Association urges this group to provide American youth with this imaginative and constructive alternative way to serve their country.

At least four universities—New York University, Syracuse University, Colorado State University, and Stanford Research Institute—have submitted proposals for comprehensive studies of the point 4 Youth Corps proposal. Moreover, I am informed that several foundations have expressed interest in helping to defray the expenses of such a study.

My amendment is designed to prevent killing the idea of a point 4 Youth Corps before it can even be studied. If you believe in the principle of foreign aid, the point 4 Youth Corps study deserves support because it can help revitalize the aid program. If you are critical of foreign aid, the point 4 Youth Corps proposal offers a way of helping people to help themselves.

I hope the amendment will be adopted.

Mr. REUSS. Mr. Chairman, I ask unanimous consent that the gentleman from Indiana [Mr. BRADEMAS] may extend his remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. BRADEMAS. Mr. Chairman, I rise in support of the amendment offered by the gentleman from Wisconsin to permit the President to arrange for a modest study—to cost no more than $10,000—of the advisability and the practicability of a point 4 Youth Corps.

I hope very much that we will agree to let the President go ahead with this modest provision for the study of a program through which young Americans can be trained to serve in public and private technical missions in the underdeveloped areas of the world.

The amendment does not commit the United States to any program but only asks the President to provide for a nongovernmental research group, university or foundation, to study the advisability of a point 4 Youth Corps.

Shortly after the gentleman from Wisconsin introduced his bill, earlier this year, I met with a group of some 45 church, civic, and university leaders in northern Indiana who had requested me to arrange a special meeting to discuss the prospects of this proposal.

These leaders were deeply impressed by the positive contributions which a group of intelligent and dedicated young Americans could make to lifting the level of life in the underdeveloped areas and to doing so in a practical, down-to-earth, person-to-person way.

There are several reasons why a point 4 Youth Corps could contribute significantly to our mutual security program.

First. The corps would do much to correct the image of the United States which has resulted from undue emphasis on military aid alone under the mutual security program, important though that aspect is.

Second. Such a program would be one way to provide assistance to developing nations directly to the people who need it, and not simply to governments alone, important though that aspect of the mutual security program is. The prospect of a group of intelligent young American college graduates working at the grassroots level with peoples abroad would go far to counteract the image represented in some of the cases set forth in "The Ugly American."

Third. I believe we should not overlook the benefit to the young Americans who would participate in such a program, benefit not purely in terms of their greater understanding of foreign countries but also in terms of their participating in a laudable effort in the interest of their own country. We hear a great deal these days about national purpose. The point 4 Youth Corps is a hardheaded and practical example of the way in which young Americans might show the world the very best that is in the American national purpose.

In short, Mr. Chairman, there is a great deal to be gained and very little to be lost by the investment of $10,000 in the study which the amendment of the gentleman from Wisconsin would make possible.

Mr. DERWINSKI. Mr. Chairman, I am opposed to this mutual security

appropriation and wish to emphasize that those of us who are in the minority opposing this measure are contributing greatly to whatever effectiveness the program might have. For this reason, without effective opposition, pointing out the flaws and inconsistencies of the administration of this program, the cost would skyrocket and the American taxpayers would be unprotected against a monstrous bureaucratic assault upon the U.S. Treasury.

Under present international conditions, the usual controversy surrounding foreign aid has been increased, since it represents such a large portion of the U.S. budget.

I emphasize, however, that the theoretical goals of the foreign aid program are certainly commendable. Certainly we recognize the problem in rebuilding of war-devastated lands, development of backward nations, and the containment of communism. I maintain, however, and it is an undisputed fact, that the program has fallen far short of perfection and the $85 billion invested in it these last 14 years has not returned a proportionate benefit to the American taxpayer.

Mr. Chairman, may I point out that the ill-fated summit conference and the cancellation of the President's visit to Japan emphasize the need for complete evaluation and proper use of funds under the foreign aid program, since, once again, it is obvious the money spent has not produced respect and support of our country by the peoples and governments abroad, nor has it produced the completely sound allies to which we are entitled in view of our great contributions to the free peoples of the world.

Those of us who are voting against the foreign aid appropriations bill are exhibiting complete independence, knowing that both major political parties, the State Department, a great number of national publications, and President Eisenhower all favor the program.

Mr. Chairman, I also feel that foreign competition in producing goods by factories built with foreign aid funds is beginning to have a detrimental effect on our economy and employment, and this factor should undergo immediate and thorough study.

Mr. CARNAHAN. Mr. Chairman, soon after the Second World War, on June 5, 1947, to be exact, Gen. George Marshall, in a speech delivered at Harvard University, set forth a concept, which while it has been most controversial, may probably be credited with saving much of the free world from becoming unwilling satellites of the Soviet Union. This we knew as the Marshall plan.

I need not labor the obvious today that the world situation is very serious. This is apparent to all intelligent people. I think that one difficulty is that the problems of today are of such enormous complexity that the very mass of facts presented to the public by press and radio make it exceedingly difficult for the man in the street to reach a clear appraisement of the situation. Furthermore, we are distant from these really troubled areas of the world and sometimes it is hard to comprehend the plight and consequent reactions of the long-suffering peoples who strive to lift themselves from the quagmire of disease, illiteracy, and economic want.

Back in 1947 when the then Secretary of State Gen. George Marshall gave his address at Harvard, Europe was still in a shambles. There had been terrific losses of life, visible destruction of cities, factories, mines, and railroads. However, it soon became obvious that this visible destruction was probably less serious than the dislocation of the entire fabric of European economy. Into this serious gap stepped the American people with their offer to assist in the recovery of Europe. As a result, long-standing commercial ties have been reestablished, private institutions, banks, insurance and shipping companies have regained their capital. Europe has recovered economically.

It is a different story in Asia and Africa. The emergence of many newly created nations in both Africa and Asia with the subsequent demand for full participation in the fruits of an economic plenty such as we have here in the United States, led to demands on the part of the peoples of these nations which could not be met unaided by their own governments. Into this area of human need stepped the American people with their grants, loans, and offers of technical assistance and guidance.

And as if this were not enough of a problem to be faced and solved, we of the free world found ourselves engaged in a life and death struggle with international communism. This we know as the cold war. The cold war led to the establishment of defense alliances between the United States and its friends in Europe, Asia and the Middle East. As a result, in addition to sheer economic aid to repair the ravages of war and to establish newly emerging economies, we in the United States were faced with helping to equip for defensive purposes only vast military machines to help uphold these friendly governments and assist them in resisting Communist brandishments and aggressions. Thus our program of aid to our allies took on at least the following characteristics: A program of grants to assist in stabilizing various economies; a system of loans through one or more organizations set up for the purpose of economic development; a program of technological assistance to train the peoples of these nations in the ways of a modern industrial society; and, a system of military alliances wherein each partner is pledged to the defense of the other in the event of aggression against it.

This has and continues to be a costly business. Yet, I see no present alternative to this program. To eliminate or even seriously cut back our mutual security program today would be inviting danger, real and imminent, since into such a vacuum would step worldwide communism and America would find itself driven back to its own shores, hemmed in by hostile forces run by capricious dictators.

A major goal of American foreign policy has become a decent standard of living for all peoples. It is not an easily accomplished task and at times is slow, laborious, and oftentimes fraught with disappointment and setbacks. As a member of the Foreign Affairs Committee which first reviewed this mutual security bill this year, I can state that there are two very basic features of the program: First, the preservation of an adequate defensive strength; and second, the encouragement and promotion of human betterment. Here once again is an opportunity to participate in a mutual effort for peace and progress in freedom.

I believe that this appropriations request is tightly budgeted and that the appropriation of the full amount is needed and necessary. This money will be needed if the programs Congress has authorized are to be carried out. Approval of this program will reaffirm the readiness and determination of the United States to meet its responsibilities and to defend and protect its way of life. Such reaffirmation can best be provided at this point through appropriation.

Mr. KASEM. Mr. Chairman, I regret that I will not be able to remain on the floor to vote on final passage of the mutual security appropriations legislation for which we have been considering amendments. Pressing matters in California make it imperative that I leave at this time, but it is apparent that support from both sides of the aisle assures the passage of this important measure.

I would like the RECORD to show, however, that I had intended to offer an amendment for the consideration of this body.

It has come to my attention that in the carrying out of the mutual security program, the original objectives and intent are often lost sight of, and the good results are sometimes only incidental.

My amendment was designed to be completely objective and would impose no appreciable burden on the Executive, but would serve to remind the President, who bears the chief responsibility in the administration of this program, that the program has an objective. It would further insure that a conscious effort toward the attainment of that objective which impelled the program would be maintained.

My amendment is so mild that it does not ask even for substantial progress toward the objective we seek—only substantial effort. The amendment is as follows:

Page 13, line 21, after the words "the purpose hereof", strike out "title IV" and insert: "That no part of the assistance provided in this Act shall be made available to any government or nation until the President shall declare in writing that he finds that such government or nation has made substantial efforts, commensurate with its resources and state of development, to establish and make effective democratic institutions therein and to improve the level of education and standard of living of the general population of said nation; that freedom of expression exists therein or that a program towards the end of establishing freedom of expression exists in said nation and that such program is conscientiously pursued; that peaceful opposition to the government is not prohibited or inhibited by law or other governmental action; and, that the President shall include in said writing

a general statement of the evidence on which he bases said findings." and reinsert at that point the words "Title IV".

Only the temper of this body and my desire to refrain from obstructing final acceptance of the bill as it is restrains me from introducing this amendment at this time in spite of my other commitments.

Mr. ASHLEY. Mr. Chairman, the mutual security appropriation bill before us is one of the most important pieces of legislation which this Congress will consider. This is particularly true in light of recent world events which have made it clear that the position of the United States, and indeed, the entire free world, is extremely insecure. It is for this reason that I am supporting this legislation wholeheartedly and it is also the reason why I will support amendments to strengthen the programs contained in the bill.

In light of the recent sequence of foreign policy setbacks, I think it is well to mention that there is one area where we have made a major gain in our relations abroad. I refer to the agreement reached after 9 years of negotiation by the World Bank and our Foreign Service through which India and Pakistan will share the Indus waters. The United States and five other nations have agreed to make substantial contributions to this vital and imaginative project. It would be an incalculable blow to the United States throughout all of Asia if we were to scuttle the first major attempt to enlist other nations in joint aid efforts. For this reason and for others which my colleague from Connecticut, Mr. BOWLES, will amplify, I intend to support this amendment which will make funds available for U.S. participation.

Most important of all, Mr. Chairman, is the need to restore the funds which have been cut from the military assistance program and from defense support. These cuts, amounting to $400 million and $124 million, respectively, would immediately and directly weaken our defense capability—at a time of heightened tension when few would think of lessening either our capability or resolve. The cut in military assistance, if carried out, would affect the modernization of defense equipment of our major allies, particularly in NATO, but also in the Far East. And if the cut in defense support is not restored we will have to reduce all along the line the strength of the defense maintained by our allies in our common interest, or in order to maintain full strength in some countries we will have to abandon or seriously limit our help in other areas. Either of these courses holds the potential of disaster for our friends and for ourselves.

Mr. ROGERS of Florida. Mr. Chairman, once again, we have before us the foreign aid appropriations bill. We are admonished by some of our colleagues here in the House, by Members of the other body and especially by representatives of the administration, that the substantial reductions recommended in the fiscal 1961 mutual security program by the committee, if acquiesced in by the Congress, will at least do violence to the concept of mutual security. Some carry their protestation a step further and tell us that any cut of consequence would wreck our prestige abroad and provide the proverbial hole in the dike through which would come rushing the flood of Communist imperialism.

These predictions of dire consequences are by no means new. Just as regularly as clockwork they accompany congressional consideration of both the foreign aid authorization and appropriation bills each year.

Permit me to recapitulate for a moment.

For fiscal 1956, the Congress appropriated $2.7 billion for the mutual security program. For fiscal 1957, the President requested $4.9 billion for this program. At the time, there were about $7 billion on hand in unspent and carried-over funds. The House committee reduced the requested amount to $3.665 billion. President Eisenhower appealed to the Congress to restore the cut saying that a refusal to do so "would definitely injure our efforts to help lead the world to peace based on cooperation and justice."

The late Secretary of State Dulles and the then Chief of the Joint Chiefs of Staff Radford went before a closed meeting of the Senate Appropriations Committee with pleas for restoration of the cut. Dulles warned that if the Congress refused, "the world would interpret its action as meaning it believes the Communist danger has passed." He said further that the cuts voted "could have a serious psychological effect upon the nations of the free world who would relax their own great efforts if they felt the United States did not consider further efforts necessary." Radford said the cuts would not only jeopardize the Nation's security but "might well lead to a further weakening of the defense efforts of our allies." A former member of the Senate Foreign Relations Committee was quoted as saying that the cut voted by the House betrayed "complete misunderstanding of what we mean by the so-called foreign-aid program."

For fiscal 1958, the administration requested $3.8 billion for foreign aid. The House reduced this amount by about $400 million. Commenting on the reduction, the President said:

> The cut can be considered as no less than a threat to our Nation's security and that of the free world.

Secretary Dulles, commenting on the reduction in defense support funds, said that it "would be felt at once and would seriously undermine the economics of allied countries." Another spokesman of the administration, while admitting that some of the programs had been badly executed, declared that Congress must take the responsibility "in the event world developments prove those cuts to have been unwise."

In connection with the budget request of over $3.9 billion for fiscal 1959 from which the House pared $872 million, Mr. Walter Robertson of the State Department was quoted as declaring that "no one except the Communists would rejoice" if these cuts were sustained. He also called for patience and perspective with the "shortcomings and failings" in the administration of foreign aid. In an appeal for restoration of the full amount requested Secretary Dulles cited the Middle East crisis, and the powerful "forces of change" then at work in the world.

> These changes will destroy us if we merely sit on the sidelines as observers.

At an earlier news conference, Mr. Dulles called these reductions "a grave threat to the security of the United States." Mr. James Smith, then Director of the International Cooperation Administration, was quoted as saying that congressional cuts in the aid program would be "almost precisely what the Soviet has been hoping for."

For fiscal 1960, the President appealed for support for a $3.930 billion mutual security program as "a tool in our battle for a lessening of tension and some advancement toward peace." When the House reduced this amount by $742.5 million, the President admonished this body for endangering this country's world position and for invading the domain of the executive department by writing into the bill a "freedom of information" provision. Secretary McElroy said the reduction might be interpreted as an indication of a "softening in our attitude." Leonard J. Saccio, Acting Director of ICA, testifying before the Senate Appropriations Committee in support of economic aid programs, challenged advocates of economic aid reduction to show that reduction could be made without, first, "the gravest peril to U.S. foreign policy objectives"; second, "threatening the collapse of some countries heavily dependent on the aid"; third, "undermining the hopes of economic progress in many more countries"; fourth, "greatly strengthening the hand of local totalitarians who offer a desperate alternative to economic disaster"; and, fifth, "inviting the Soviet bloc to move forcefully into the vacuum with offers of economic aids."

Admonitions of a similar nature as in the past are with us again today. Already spokesmen have said that a large reduction in a foreign aid would be "regarded by the world as a headlong retreat by our country, either as an abandonment of collective security or as a withdrawal of our interest in the welfare of friendly peoples struggling to stand with us in freedom."

President Eisenhower has issued a strong public appeal for support of the foreign aid program. The House committee has again voted to substantially reduce the requested amount. If the temper of the House is the same as in past years, a substantial cut in requests will probably be sustained.

Actually, Mr. Chairman, I would point out that in the face of repeated substantial reduced appropriations for the foreign aid program over the last few years, there was still available more money than was spent. In fact, over the last 5 fiscal years, mutual security spending requests have totaled almost $20 billion but only slightly in excess of $19 billion has actually been spent. In only 1 fiscal year in the last 5 has more been actually spent than was requested in the budget. In this 1 fiscal year, 1956, it is signifi-

cant to note that more money was available for expenditure due to the carryover from the previous year of almost $8 billion in unexpended funds. For the benefit of those who might not have these figures available, I would like to include them at this point in my remarks. They follow:

[Billions]

Fiscal year	Requested	Spent
1956	$3.4	$4.256.9
1957	4.9	4.003.4
1958	3.8	3.636.8
1959	3.9	3.866.5
1960	3.9	3.349.9
Total	19.9	19.113.5

Also, I think the record will show that a number of the serious international tensions we face today are totally unrelated to the amount of foreign aid funds we have to spend.

Investigation into the foreign aid program time and time again have led to the conclusion that the major problem is not too little money but too much—that it was not reaching the people. Those who have urged patience and perception with its failures and shortcomings continue to explain away these failures and shortcomings by telling us that corrective action is being taken. Such explanations make one wonder whether remedial action is taken before or after the mistake.

Mr. Chairman, the President himself has gone on record as supporting a greater emphasis on loans and a corresponding deemphasis on direct gift and grant economic assistance. This year, a report on section 503(c) of the Mutual Security Act was submitted to the Congress. This section, added to the bill last year as a result of an amendment sponsored by Senator MANSFIELD and myself, directed the President to cause a study to be made into the gift and grant program and a plan devised to progressively reduce these programs. The report submitted as a result of this study gave reassuring news that this gift and grant program in about half of the countries now receiving this type aid could well be terminated in the next 5 years. I hope that this beginning will mark a rapid switchover from a concept of direct gifts to one of loans—thereby conditioning our aid to recipient nations for their economic development with an obligation of repayment.

To assist in this switchover, there are a number of national and international sources of financing aimed specifically at economic development. The World Bank, with an authorized capitalization of some $21 billion, offers long-term loans to member nations to aid in their industrialization and development. The Bank's membership consists of the governments of 68 nations, each subscribing to its capital stock in accordance to its own economic strength. The lending operations of the World Bank are conducted on the basis of three main principles: One, that the borrowing country must be in a position to repay the loan; two, that the project or program to be financed will be of such benefit to the economy as to justify the borrowing of foreign exchange; and three, that the project is itself well designed and feasible of operation.

I submit, Mr. Chairman, that these principles are such that they might well become the basis of a sound economic aid program. The Bank employs only 600 people; these 600 people have and are supervising some 600 projects in 50 countries. To date, every loan has been met in principal and interest payments. This fact is not happenstance. It has resulted from careful planning and controlled operations. Contrast this to the administration of today's foreign aid program with its more than 43,000 employees, limitless funds and questionable results.

The Export-Import Bank is authorized to borrow up to 8 billion from the U.S. Treasury to loan to foreign nations. Money loaned remains in this country to purchase American goods and machinery and the like thus helping to strengthen the American export trade.

The Inter-American Development Bank, American participation in which was authorized by the Congress last year, has not yet begun operation but nonetheless will serve to encourage development among our friends in Latin America.

In addition, private enterprise is willing and anxious to provide the needed financing for undeveloped countries. This source of aid is too often, I feel, not utilized to the point of its capabilities and willingness. A sound program of providing economic aid to the underdeveloped countries cannot afford to ignore such possibilities.

In sum total, Mr. Chairman, my disagreement is not with the concept of mutual security, as such. I fully realize that our allies must be strengthened militarily. I also appreciate that there are underdeveloped nations in the world in which economic development should be fostered and encouraged. My objection is lodged against the means with which we are striving to attain these desirable ends. The shortcomings and excesses which we are asked to be patient with continue and mount and administering bureaucracies grow larger and larger. We create dependency instead of self-sufficiency and self-respect. In good conscience, Mr. Chairman, I cannot support this program with such large sums on hand and unspent nor until such time as it is reevaluated in terms of a better approach and a greater effort made to reach the people with something they can understand and appreciate.

Mr. MERROW. Mr. Chairman, I wish to point out that the gentleman from Florida [Mr. SIKES] emphasized the importance of Guatemala to the free world. If Guatemala should ever again fall into the hands of the Communists it would be a tragic blow to the course of freedom in the Americas. The gentleman from Florida is a great student of Latin America and is ever alert to the growing menace of communism in that area. I congratulate both him and the distinguished gentleman from Louisiana [Mr. PASSMAN] for highlighting the necessity for consideration of Guatemala in the category of those countries which confront serious situations requiring grant economic aid. All of us realize the importance of Guatemala and of the outstanding contribution she is making to the free world.

Mr. GEORGE. Mr. Chairman, how can the administration of the mutual security program be so intermeshed with corruption, waste, and extravagance as is evidenced by the committee hearings? A year ago much the same condition existed.

When the executive branch of our Government takes no cognizance of such maladministration and permits the situation to grow worse, many Members are tempted to vote against H.R. 12619. If the continuance of our free and democratic form of government did not depend to such a great extent upon the necessary appropriations being made for mutual security, this measure would be defeated overwhelmingly.

Possibly the Democratic majority in Congress has been too meek in dealing with the Republican administration. Criticism has been tempered, especially in the field of foreign policy. For this reason we, the Democratic Party, must accept part of the blame for the failure of our foreign policy to stop Communist expansion.

Since 1952 the only semblance of a bipartisan foreign policy has been the failure of the Democratic leadership to criticize—even to criticize constructively. Not since Harry Truman left the White House—never to be invited to return—has the foreign policy of this country had the advantage of a truly cooperative effort by both political parties. No Democratic leader has had an opportunity to participate in the establishment or administration of our foreign policy.

The bombastic insults hurled by the Russian dictator have apparently succeeded in drawing the American people closer together in support of our President—and therefore in support of a foreign policy that has not been successful. This was no doubt the result expected and intended by the wiley leader of the Communists.

We Americans must not permit our loyalty to the President and our sympathy for him to prevent the piercing of the Communist veil. We must select a President that will not hesitate to depart from the status quo in foreign affairs. We must place a younger man at the head of our Nation—and one who is not tarred with the status quo.

Thankful we should be that the summit meeting was not held. We had nothing to gain and much to lose. Our agreements would have been kept, but only those to her advantage would have been kept by Russia.

With all the sound and fury of the ranting Communist dictator, there is no change in attitudes or objectives. There would have been none if a summit conference had taken place. There will be none.

These events are now behind us, but they and the developing attitudes in other countries definitely establish the

fact that friendship cannot be purchased. Billions of dollars have been spent to create good will abroad, while the very men who expend the funds have incurred through their maladministration of them the scorn and illwill of the people of the nation in which they live so luxuriously.

The next administration must revive the bipartisan foreign policy and breath new life and vigor into it. Our people should forever be grateful that only a few months remain for the present confused and bewildered administration.

In the future our efforts should be confined to negotiations through diplomatic channels—and we should pray that we can soon have trained personnel to do the job. We must remain strong as a Nation, but the wasters and the grafters must be eliminated from our foreign aid and defense programs. Morality must be restored to the Government of the United States.

Through the United Nations we might offer Russia the opportunity to assist underdeveloped countries to come into their own. Or in aiding such countries we could offer to work—at arms length—in a cooperative arrangement with Russia instead of the competitive, expensive plan we are now pursuing. Whatever plan we adopt, a constant vigil must be maintained and our guard must forever be held high.

It is possible that when more is learned about the mysteries of space, all countries on the face of the globe may be glad to cooperate in the interest of self-preservation.

No one nor any nation wants to commit suicide and the individual, in whatever country, desires to have a home and food for his family, dignity for himself and his brother, and above all an honorable and lasting peace. An ironclad arms control agreement should be our immediate and primary objective.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Wisconsin [Mr. REUSS].

The amendment was rejected.

Mr. McDOWELL. Mr. Chairman, I offer an amendment.

The clerk read as follows:

Amendment offered by Mr. McDOWELL: On page 7, line 10, insert "(a)" immediately after "SEC. 105."

On page 7, between lines 15 and 16, insert the following:

"(b) None of the funds appropriated by this Act, and none of the counterpart funds or other foreign currencies generated through the use of funds appropriated by this Act, shall be available for expenditure by any Member of the Senate or House of Representatives (including the Resident Commissioner from Puerto Rico) in connection with travel outside the United States where no full public disclosure itemizing all such expenditures will be made."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Delaware [Mr. McDOWELL].

The amendment was rejected.

Mr. MEADER. Mr. Chairman, I ask unanimous consent to extend my remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Michigan?

There was no objection.

PRIVATE ENTERPRISE IN UNDERDEVELOPED AREAS

Mr. MEADER. Mr. Chairman, the April 1956 edition of Fortune magazine published an editorial entitled "The American Game," a portion of which I want to quote:

The real source of America's strength lies in its own flexible and dynamic system of private enterprise, and in the projection of that system abroad.

I incorporated the editorial in remarks I offered to the House in the CONGRESSIONAL RECORD, volume 102, part 7, pages 8753 to 8754. I regard that editorial, and particularly the paragraph I quote, as identifying the most powerful and effective weapon we possess with which to fight our ideological war against communism. The real contest is for the minds and attitudes of the peoples of the new nations emerging from colonialism, most of them loosely classified as underdeveloped by our standards. In this contest our deeds certainly will speak louder than words. A demonstration that free economic and political institutions are superior to the organized slavery of communism is ideological cash in the bank of world public opinion; high sounding oratory, slogans and headlines without performance are debits against international good will.

I have always felt that our assistance in economic development overseas should be provided by the American business community with their own capital at no cost to the taxpayers, and that the role of our Government is to foster and facilitate private capital investments overseas by using its personnel and diplomatic sanctions and instruments to break down artificial barriers to trade and investment and thus contribute to the attractiveness of private capital investments abroad.

One of the principal efforts of my service in Congress, has been at attempt to direct the efforts of our Government along those lines. In 1951 I urged the creation of a Commission to study the problem and map a course to achieve that goal. That effort, I am unhappy to say, was unsuccessful—CONGRESSIONAL RECORD, volume 97, part 3, pages 4209 to 4213.

In 1956, Congress created the Development Loan Fund. I offered an amendment to the declaration of purposes of the fund to indicate that in assisting underdeveloped areas it was the intent of Congress that we foster free enterprise economies.

As many of you know, that idea was strenuously opposed by both the State Department and the ICA, and it is due, in my judgement, only to the statesmanship and clear thinking and foresight of two of our former colleagues, the Honorable John Vorys, of Ohio, and the Honorable Brooks Hays, of Arkansas, that the free enterprise idea was incorporated into the charter of the Development Loan Fund.

Mr. Chairman, this year there have been two important developments which have given impetus to the movement to enlist American capital to make a greater contribution to economic undertakings overseas. The first is passage by the House of Representatives of the Boggs bill, H.R. 5, providing tax incentives for investments abroad, and the second, the attitude of the new management of the Development Loan Fund under its new Director, Mr. Vance Brand. Mr. Brand assumed office as Director in September 1959. Repeatedly, in appearances before our Foreign Operations and Monetary Affairs Subcommittee of the Committee on Government Operations, he has asserted that he proposes to use the funds and powers of the Development Loan Fund to foster and encourage private capital to make its contribution in economic development abroad and to induce beneficiaries of our assistance to shape their own economies along freely competitive lines.

Mr. Chairman, my attention has been called to an article written by Mr. Brand for the current issue of the General Electric Defense Quarterly in which he not only enunciates this policy, but cites examples where it actually has been carried out. I want to commend Mr. Brand for this forthright espousal of our traditional American principles of free economic institutions, and I believe that not only my colleagues, but the American people, generally, should be aware of this significant and salutary development.

Where economic development abroad can be carried out by the investment of private capital rather than government grants and loans, these significant advantages accrue:

First, and most obvious, is the relief to the taxpayer by reducing the amount he must contribute to foreign aid;

Second, the tax base is broadened by the capital invested and the earnings accrued;

Third, know-how and technology naturally accompany oversea movement of capital, and the resulting training of indigenous personnel, both labor and management, is undoubtedly better than the current forced-draft type of training where our Government hires technically skilled people at taxpayers' expense to provide training in underdeveloped areas;

Fourth, the people-to-people relationship resulting from Americans doing business abroad widens understanding and strengthens economic and social ties between our people and those of other countries; and

Fifth, government - to - government grants or loans for economic development must inevitably encourage government participation and interference in economic and commercial undertakings ranging from socialistic or communistic ownership and operation at one end of the spectrum to price fixing and other types of regulation at the other.

More important than any of the foregoing considerations is that in both advocating and demonstrating the free enterprise system in economic development we are striking our most effective blow against the Communist ideology by showing in actual practice the superiority of a system which leaves the maxi-

mum of discretion to the individual and makes full use of those most important natural resources of all—the energy, the ambition, the courage, and the determination inherent in every human being striving to improve his lot. In this way America will be on the offensive in the ideological combat rather than the defensive.

Mr. Brand's article appropriately points out that the Government cannot draft or compel the American business community to participate in economic development overseas. But our Government can and should pave the way for natural economic forces to operate freely, unhampered by artificial restrictions and inhibitions imposed either by our Government or the governments of the countries we are seeking to assist.

In my judgment all our Government personnel having any relationship to this program should conduct their day-to-day operations and should shape their policies and programs to encourage and facilitate the objective of economic development through private capital investment. Since the Development Loan Fund is one of the most important Government instruments in this area, it is encouraging that its Director, Mr. Brand, has forthrightly and vigorously announced a policy in line with the foregoing objectives.

Mr. Chairman, the Foreign Operations and Monetary Affairs Subcommittee has been conducting a study of the operations of the Development Loan Fund, and on April 19, 1960, filed with the House its report on one aspect of Fund operations ("Operations of the Development Loan Fund," H. Rept. No. 1526). The committee was critical of the practice of earmarking or making advance annual country allocations. The report points out that the period of which the committee was critical were fiscal years 1958 and 1959. As previously noted, Mr. Brand was not appointed Director of the Development Loan Fund until September, 1959, subsequent to the period which the committee study covered. Thus, the criticism contained in the report was not and ought not to be considered as directed against Mr. Brand's administration of the Development Loan Fund.

The subcommittee is continuing its study of the Development Loan Fund, and one of the aspects of that study which is of greatest interest to me is the extent to which the policy announced by Mr. Brand in his article is actually effected in practice.

I incorporate Mr. Brand's article at this point in my remarks:

[From the General Electric Defense Quarterly, April–June 1960]

AMERICAN PRIVATE RESOURCES IN OVERSEA DEVELOPMENT

(By Vance Brand, Managing Director, Development Loan Fund)

The Development Loan Fund represents a new approach to managing U.S. financial resources, in an effort to help bring about economic breakthroughs in underdeveloped countries. The man who controls DLF's worldwide lending program explains what this means to the United States:

Foreign economic development improves American economy.

The DLF opens broad new areas to American private enterprise.

It offers practical encouragement of the American way of life abroad.

It is an approach where we have the jump on the Soviets.

Yesterday the frontiers of opportunity lay in the underdeveloped lands beyond the Mississippi. Today they lie in the underdeveloped lands beyond the seas—in Latin America, Asia, the Near East, Africa, and the Far East. Since Tokyo is now within 15 to 20 hours' flying time of San Francisco, perhaps we should begin speaking not of the Far East but rather of the near West.

Here at home we have been able to make unparalleled use of our human and physical resources because we have a sound, well-motivated economic system based on private enterprise. Similarly, the full development of the resources and opportunities of underdeveloped areas overseas depends upon the establishment and maintenance of sound economic systems in those areas. We can best encourage the growth of such systems by bringing more countries into the natural network of spontaneous business relationships through which most of the Free World's commerce and enterprise are carried out. This in turn will require good management of one of our own most important and least recognized resources—our talent for the organization and management of business entities in a free society—so that it can make the most effective and appropriate contribution to the development task.

OUR ECONOMIC SYSTEM ON TRIAL

Our economic system is now on trial in underdeveloped regions which make up the most populous portions of the world. The people of those regions are fully committed to swift economic progress, but they are not yet committed to our way of achieving progress. Their needs and demands would present a vital problem to our system even if the Soviet Union did not exist. But communism does provide an important yardstick against which our system is being measured by a billion or more people in some 60 nations.

For years the U.S. Government has been devoting considerable resources to the task of guiding underdeveloped nations toward the Western form of civilization. It has participated in international programs and has set up programs of its own, including those of the Export-Import Bank, the International Cooperation Administration, and the agency which I head—the Development Loan Fund.

The Development Loan Fund embodies a new approach, a new way of managing U.S. Government resources, in the effort to help bring about an economic breakthrough in the underdeveloped countries. It is an autonomous Government corporation established under the foreign policy guidance of the Secretary of State to make loans for specific projects or programs, public or private, which contribute to the economic development of underdeveloped countries. It is especially designed and empowered to help overcome one problem revealed by post-war experience to be a basic obstacle to economic development. That problem is the need of the developing nations for foreign-exchange financing, coupled with their inability to carry large burdens of hard currency foreign debt. Since the DLF is authorized to accept local-currency repayment, when appropriate, of its dollar loans, it can provide dollar financing without increasing the dollar debt load.

Congress has appropriated $1,400 million to the Development Loan Fund for lending. The DLF has approved about $1 billion in credit commitments of various kinds for undertakings in 43 countries. It has under consideration projects which will absorb all the remaining $400 million capital availability. President Eisenhower has requested the appropriation of an additional $700 million in his budget for fiscal year 1961.

U.S. ECONOMIC AID TO 60 COUNTRIES

The U.S. Government's efforts to encourage long-term economic development in lesser developed countries constitute a positive program, which was established well before the Soviets entered the field. It is only in the past 5 years that the Soviets have rendered economic assistance to underdeveloped countries outside their own bloc, and their aid so far extends to 18 nations—the bulk of it to only six nations. By contrast, U.S. economic assistance efforts reach into more than 60 countries. This field of economic development is one in which the Soviets have reacted to our efforts, rather than we to theirs.

But Government programs, essential though they are, are not enough to meet the challenges and trials of these times. They are inadequate, not merely because the Government cannot possibly provide all the resources needed, but mainly because the bulk of the job consists of something that no government can do.

The underdeveloped nations possess no such reservoir of trained administrative and technical talent as we found in Europe during Marshall plan days. In restoring the European economy, it was enough to provide the fruits of our economic system, in the form of plant and equipment to replace that destroyed by war. But the developing nations lack not only modern technology but the economic complex needed to use and sustain it and distribute its products. Therefore we must help them obtain not merely the products of a modern system, but the system itself. Naturally, without prejudice to their own beliefs and ambitions, we are eager to see them progress under a system of economic freedom, for we know by experience that free private enterprise calls forth more of the capabilities of a whole people, and contributes more toward the ultimate aim of human self-fulfillment, than any other kind of system yet devised.

FREE ENTERPRISE CANNOT BE IMPOSED

Such a system can be encouraged but it cannot be imposed. It must be demonstrated by example, and we can encourage its growth best by working with the people we aim to assist. Setting up business relationships with the producers of other lands; bringing them into the network of our system, and sharing its benefits with them; demonstrating the use and value of private property, and helping them to obtain it; establishing a middle propertied class with a personal stake in economic and political freedom—these are the things that count, and they are not things that can be done primarily by governments. They must be done mainly by free private enterprise.

Is it not a mistake to think of development assistance only as foreign aid? Rather, it is economic growth. Economic development creates wealth, trade, and opportunities. When new wealth is created anywhere in the world, we Americans have always received our share of it. Just as, a hundred years ago, the development of our western frontier benefited the developed eastern seaboard, so today the development of less developed nations will benefit us in the United States. Our development programs overseas are American programs for—among other people—Americans.

This concept of growth is peculiarly American. Basically, the Soviets assist other countries in order to attract them into the Soviet political orbit. But basically we assist other countries in order to increase the sum total of prosperity in the world. We have learned by experience that it pays to increase the prosperity of the common man. This is the principle that distinguishes the

American type of civilization from past civilizations, and is the basis of our approach to other nations.

PARTNERSHIP WITH PRIVATE ENTERPRISE

Thus it is clear that with respect to the underdeveloped nations, the interests of private enterprise and of the U.S. Government coincide and complement each other. It follows that they should work closely together in the pursuit of their mutual interest. The achievement of a working partnership with American private enterprise is a major drive of the Development Loan Fund.

Private enterprise needs such a partnership just as the Government does. Excluding investments for oil, in recent years new U.S. private investments in Africa, the Near East, South Asia, and the Far East put together have amounted to about $60 million a year. A good many American counties have larger budgets than that. Yet American private enterprise has never been known to turn its back on opportunity without good reason. We believe that the Government can help overcome some of the obstacles that have kept American private enterprise from assisting the opening of the vast potential opportunities that exist in the less developed countries.

Your U.S. Government helps finance basic nonprofit facilities such as roads, railroads, harbors, and communications, which form the foundations for private enterprise, both local and American. It encourages and assists local private enterprise, and thus fosters the principle of private enterprise in societies still being formed. With its own development programs, it helps to guide the growth of the developing countries during the period while American private enterprise has not yet extended its network of relationships into those areas.

Now we believe the time is ripe for more direct measures of cooperation. The Development Loan Fund's unique powers enable it to share risks through joint undertakings with U.S. and local private enterprise. We would like U.S. enterprise to undertake an effort in cooperation with us to make the fullest possible use of our assistance.

BUILDING WITH RICE IN KOREA

Some U.S. enterprises have already found the way to our doors. For example, officials of the Tectum Corp., of Columbus, Ohio, which makes a flexible building material out of wood excelsior and chemical binder, discovered that the greatest economic need of Korea is for building material, and furthermore that their process could be modified to use rice straw instead of wood excelsior. With their assistance a Korean firm has been established to manufacture the rice-straw product, and the Development Loan Fund is providing a relatively small loan of $1,100,000 to procure American-made equipment. We believe this enterprise will grow. When one considers the shortage of lumber and building materials throughout Asia, and the commonness and cheapness of rice straw in the same region, the potentialities of the enterprise appear truly enormous. Here is a case where we have been able to help private American enterprise put over a new idea of great potential economic importance in an underdeveloped area.

DEVELOPING GUATEMALAN COFFEE BAGS

Similarly, we are helping some American researchers and investors join Guatemalan investors in establishing a factory to make coffee bags out of the fibers of the kenaf plant. This enterprise will save Guatemala about $1 million a year in foreign exchange now spent to import jute bags and will provide a new crop for Guatemalan farmers. We are helping some investors in Detroit set up a sawmill in Liberia, in connection with Liberian investors. At present Liberia imports lumber, although it has millions of acres of forest. We have helped a firm with joint American and Chinese ownership expand a shipyard on Taiwan. We are helping an American corporation expand and modernize a meatpacking and ranching operation which is Paraguay's largest earner of dollar exchange. I could cite other examples in which the DLF has helped American capital and talent develop creative opportunities in cooperation with the people of other countries.

We want to see this kind of activity carried out on a larger scale and on a more systematic basis. We would like to see American private enterprise deliberately search out opportunities for joint investment in underdeveloped nations, and then consult with us on the best means of establishing productive industries. This has already begun to happen. We are now considering a transaction in which the Development Loan Fund, certain important American corporations and financial interests, and certain local private investors may join resources to finance, construct, and manage a new industry in the multihundred-million-dollar range of magnitude in a country which has been receiving U.S. development aid. Serious discussions are under way toward forming a similar investment combination to operate in a different underdeveloped country. We have opened discussions toward the formation of a third group interested in petrochemical industries in still another developing country. Thus a pattern for partnership is being formed and implemented in specific actions.

WORLD DEVELOPMENT WORKSHOPS

Furthermore, in cooperation with the Department of Commerce, we plan to hold periodic workshops in which representatives of Government agencies and senior corporation officials will take part. Through these seminars and in every other way we can devise, we shall continuously seek to broaden the participation of American free enterprise in the task which confronts us in the developing regions of the world.

We in the Government mean to play our due part in organizing and carrying out our partnership with enterprise. But we do not believe it should be the kind of partnership in which government forms the program and private enterprise supports it. Both free enterprise and government are essential to the success of the endeavor, but fundamentally I believe that overseas, as at home, in the economic field the government should exist to serve enterprise, rather than the other way around. The latter road leads toward statism, which is the opposite of what we are trying to accomplish.

We in the Development Loan Fund are still learning how to make the best use of this new instrument for economic growth. It will be some time before the projects we are assisting can manifest their full effects. Even after the factories are built and turning out products, and the roads and railroads are complete and carrying traffic, the full story will still remain to be told. For our loans are for creative undertakings that can lead to further enterprise. The transportation arteries will open new areas to settlement and development; the communications systems and commercial facilities will stimulate the flow of trade; the factories and industries will give rise to secondary undertakings of many kinds. Not all of our loans are for spectacular monuments of development, but they all will help bring about ever-increasing well-being in the countries in which they are made. They will contribute to our objective of establishing a prosperous citizenry in each underdeveloped country, who will at once support the continued growth of their own nations, increase the volume and variety of world trade, and form the best possible encouragement of our American way of life among our friends abroad.

This effort merits the finest talent our Nation can put forth. The Soviets are sending their best men into the underdeveloped countries—men capable not only of building and directing projects, but of extending the influence of their system at every opportunity. They must more than meet their match in Americans equally capable of representing and strengthening the system of free private endeavor. We must meet their first team with our first team; and our first team must necessarily include the best talent available in American private enterprise.

The Soviet Government can deploy all the talent of its nation in the service of the state. The United States cannot order its business brains here and there; this would violate our basic principles of freedom. Therefore we must rely on the voluntary efforts of private enterprise—encouraged and supplemented by our Government—to cope with Soviet statism in the pivotal underdeveloped regions. It is up to American firms to come out for the team. Today there are no spectators.

Mr. Chairman, I recently had an exchange of correspondence with Mr. Bryce Harlow of the White House staff concerning reductions in the budget estimates for mutual security appropriations. Because it explains a position I have consistently taken with respect to mutual security, I include that exchange of correspondence at this point in my remarks.

MAY 17, 1960.

The Honorable GEORGE MEADER,
House of Representatives,
Washington, D.C.

DEAR GEORGE: On Saturday last, as he completed preparations for the summit conference in Paris, President Eisenhower requested me to send to you, in his behalf, this note of gratification and appreciation for your support of the mutual security authorization bill. He stressed once again his profound conviction that this program is indispensable to our own and free world defense against Communist imperialism, and indispensable also in encouraging struggling millions in less fortunate nations in their effort to live their lives in freedom. It is a program requiring, he said, unreserved support by all of our informed citizens and officials, and he feels it would be the height of folly to allow isolated administrative shortcomings and disappointments, or local considerations, political or otherwise, to tempt anyone to jettison or cripple the entire undertaking.

Especially the President voiced this hope, and asked that it be communicated to you in his behalf: that your responsible act of support for the mutual security authorization be matched by a determined resistance to any effort to effect massive reductions in the mutual security appropriations soon to be considered by the House. Massive reductions, he pointed out, can be accomplished only by undermining our own security, free world security, and the cause of human freedom everywhere in the world.

The President asked me to explain that he would have advised you himself of these views had his time permitted before leaving for Paris.

With best wishes.

Sincerely,

BRYCE N. HARLOW,
Deputy Assistant to the President.

MAY 25, 1960.

Mr. BRYCE N. HARLOW,
Deputy Assistant to the President,
The White House,
Washington, D.C.

DEAR BRYCE: Thanks for your letter of May 17, conveying the President's views on mutual security.

My study of the foreign aid programs, both as a member of the Subcommittee on Foreign Operations of the House Government Operations Committee and as an individual, has developed a conviction that our foreign aid program should, if it is properly administered, show successive reductions in annual appropriations, as the goal of assisting friendly, foreign countries to achieve economic and political stability is accomplished. In some areas, such as Iran and Laos, excessive spending actually has harmed our program.

It has likewise been my belief that economic stability is best achieved when those we are seeking to assist do their utmost to help themselves—that our aid should simply be an incentive and should not underwrite either unsound and extravagant programs or government owned socialistic economic enterprises.

Accordingly, I am sure the $4 billion figure requested by the administration can be reduced substantially and not weaken but, on the other hand, improve and strengthen the foreign aid program if smaller sums of money are administered in a more efficient and more businesslike manner. On the other hand, I will not support reckless reductions.

Incidentally, I hope you will support efforts to provide that Congress, its committees, and the General Accounting Office have complete access to information relating to foreign aid expenditures.

It was good to hear from you, and I hope we may have an opportunity to discuss the aid program personally and in greater detail.

Sincerely,

GEORGE MEADER.

MAY 31, 1960.

The Honorable GEORGE MEADER,
House of Representatives,
Washington, D.C.

DEAR GEORGE: I warmly appreciate your frank letter responding to mine about mutual security. I recognize that the judgment factor is large in setting the size of this effort, and certainly I respect your feeling that reductions, though not reckless ones, ought to be made. By the same token, I feel sure you have some feeling of receptivity for the very earnest views held on this matter by the Joint Chiefs unanimously, the Secretaries of State and Defense, and the President as well—none of them inclined to spend excessively or beyond our security needs.

A good visit with you is long overdue anyway. Let's do it very soon. With warm regard,

Sincerely,

BRYCE N. HARLOW,
Deputy Assistant to the President.

The CHAIRMAN. Are there any other amendments?

Mr. PASSMAN. Mr. Chairman, I move that the Committee do now rise and report the bill back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. MILLS, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 12619) making appropriations for mutual security and related agencies for the fiscal year ending June 30, 1961, and for other purposes, had directed him to report the bill back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill as amended so pass.

Mr. PASSMAN. Mr. Speaker, I move the previous question on the bill and all amendments thereto to final passage.

The previous question was ordered.

The SPEAKER. Is a separate vote demanded on any amendment?

Mr. PASSMAN. Mr. Speaker, I ask for a separate vote on the Taber amendment.

The SPEAKER. Is a separate vote demanded on any other amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER. The Clerk will report the amendment on which a separate vote has been demanded.

The Clerk read as follows:

Page 2, line 15, strike out "$1,600,000,000" and insert "$1,800,000,000".

The SPEAKER. The question is on the amendment.

Mr. PASSMAN. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 212, nays 173, answered "present" 2, not voting 45, as follows:

[Roll No. 137]

YEAS—212

Addonizio	Dague	Irwin

PRESENT—2

Hoffman, Mich. O'Konski

So the amendment was agreed to.

The Clerk announced the following pairs:

On this vote:

Mr. Taylor for, with Mr. Shipley against.
Mr. Celler for, with Mr. Moulder against.
Mr. Loser for, with Mr. Hull against.
Mr. McGovern for, with Mr. Brown of Missouri against.
Mr. Keogh for, with Mr. Kitchin against.
Mr. King of California for, with Mr. Willis against.
Mr. Shelley for, with Mrs. Blitch against.
Mr. Buckley for, with Mr. Barden against.
Mr. Holifield for, with Mr. Meyer against.
Mr. O'Neil for, with Mr. Thompson of Louisiana against.
Mr. Morrison for, with Mr. Kirwan against.
Mr. Anfuso for, with Mr. Sheppard against.
Mr. Ikard for, with Mr. Kowalski against.
Mr. Arends for, with Mr. O'Konski, against.
Mr. Bow for, with Mr. Denton against.
Mr. Bentley for, with Mr. Hoffman of Michigan against.

Until further notice:

Mr. Johnson of Colorado with Mr. Wainwright.
Mr. Burdick with Mr. Merrow.
Mr. Carnahan with Mr. Keith.
Mr. Durham with Mr. Bass of New Hampshire.
Mr. Boykin with Mr. Wilson.
Mr. Morris of Oklahoma with Mr. Withrow.

Mr. HOFFMAN of Michigan. Mr. Speaker, I have a live pair with the gentleman from Michigan [Mr. BENTLEY]. I voted "nay." Had he been present he would have voted "yea." I withdraw my vote, and vote "present."

Mr. O'KONSKI. Mr. Speaker, I have a live pair with the gentleman from Illinois [Mr. ARENDS]. If present, he would have voted "yea," I voted "nay." Therefore I withdraw my vote and vote "present."

Mr. DENT and Mr. WOLF changed their vote from "nay" to "yea."

The result of the vote was announced as above recorded.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time and was read the third time.

Mr. ANDERSEN of Minnesota. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the bill?

Mr. ANDERSEN of Minnesota. Mr. Speaker, it is entirely too liberal in nondefense items, and I am therefore opposed to the bill.

The SPEAKER. The gentleman qualifies.

The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. ANDERSEN of Minnesota moves to recommit the bill H.R. 12619 to the Committee on Appropriations.

The SPEAKER. Without objection, the previous question is ordered.

There was no objection.

The SPEAKER. The question is on the motion to recommit.

The motion to recommit was rejected.

The SPEAKER. The question is on the passage of the bill.

Mr. GROSS. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas, 257, nays 124, answered "present" 3, not voting 46, as follows:

[Roll No. 138]

YEAS—257

PRESENT—3

Cederberg	Hoffman, Mich.	O'Konski

So the bill was passed.

The Clerk announced the following pairs:

On this vote:

Mr. Celler for, with Mr. Shipley against.
Mr. McCormack for, with Mr. Moulder against.
Mr. Buckley for, with Mr. Hull against.
Mr. Kirwan for, with Mr. Brown of Missouri against.
Mr. Keogh for, with Mr. Kitchin against.
Mr. Sheppard for, with Mr. Willis against.
Mr. King of California for, with Mrs. Blitch against.
Mr. Anfuso for, with Mr. Barden against.
Mr. Ikard for, with Mr. Meyer against.
Mr. O'Neill for, with Mr. Thompson of Louisiana against.
Mr. Arends for, with Mr. O'Konski against.
Mr. Wainwright for, with Mr. Cederberg against.
Mr. Denton for, with Mr. Bow against.
Mr. Bentley for, with Mr. Hoffman of Michigan against.
Mr. Shelley for, with Mr. Morris of Oklahoma against.

Until further notice:

Mr. Durham with Mr. Bass of New Hampshire.
Mr. Holifield with Mr. Taylor.
Mr. Morrison with Mr. Keith.
Mr. Burdick with Mr. Merrow.
Mr. Kowalski with Mr. Wilson.
Mr. Kluczynski with Mr. Withrow.
Mr. Loser with Mr. Randall.

Mr. HOFFMAN of Michigan. Mr. Speaker, I have a live pair with the gentleman from Michigan [Mr. BENTLEY], who had he been present would have

voted "yea." I therefore withdraw my vote of "nay" and vote "present."

Mr. CEDERBERG. Mr. Speaker, I have a live pair with the gentleman from New York [Mr. WAINWRIGHT], who had he been present would have voted "yea." I therefore withdraw my vote of "nay" and vote "present."

Mr. O'KONSKI. Mr. Speaker, I have a live pair with the gentleman from Illinois [Mr. ARENDS], who had he been present would have voted "yea." I therefore withdraw my vote of "nay" and vote "present."

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE TO EXTEND

Mr. PASSMAN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to extend their remarks on the bill just passed.

The SPEAKER. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

Mr. PASSMAN. Mr. Chairman, I ask unanimous consent that all Members who spoke on the bill just passed may have permission to revise and extend their remarks and include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Gown, one of its clerks, announced that the Senate had passed without amendment a bill of the House of the following title:

H.R. 9883. An act to adjust the rates of basic compensation of certain officers and employees of the Federal Government, and for other purposes.

The message also announced that the Senate insists upon its amendment to the bill (H.R. 5888) entitled "An act to authorize the Secretary of the Navy to transfer to the Massachusetts Port Authority, an instrumentality of the Commonwealth of Massachusetts, certain lands and improvements thereon comprising a portion of the so-called E Street Annex, South Boston Annex, Boston Naval Shipyard, in South Boston, Massachusetts, in exchange for certain other lands," disagreed to by the House; agrees to the conference asked by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. RUSSELL, Mr. STENNIS, Mr. JACKSON, Mr. SALTONSTALL, and Mr. CASE of South Dakota to be the conferees on the part of the Senate.

AMENDING AGRICULTURAL ADJUSTMENT ACT OF 1938

Mr. THORNBERRY, from the Committee on Rules, reported the following privileged resolution (H. Res. 564, Rept. No. 1918), which was referred to the House Calendar and ordered printed:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 12261) to amend the Agricultural Adjustment Act of 1938, as amended, and the Agricultural Act of 1949, as amended, with respect to market adjustment and price support programs for wheat and feed grains, to provide a high-protein food distribution program, and for other purposes. After general debate, which shall be confined to the bill, and shall continue not to exceed two hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Agriculture, the bill shall be read for amendment under the five-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

HEARINGS ON BILL TO HELP SMALL BUSINESS

Mr. PATMAN. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD and include extraneous matter, and immediately after my remarks to include a statement by the gentleman from California [Mr. MCFALL] before the committee.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. PATMAN. Mr. Speaker, yesterday, Thursday, June 16, 1960, on the 24th anniversary of the approval of the Robinson-Patman Act by the Congress, a subcommittee of the House Interstate and Foreign Commerce Committee held hearings on bills to help small business by preventing certain discriminatory prices and sales at prices below cost. These bills have been introduced by myself and more than 25 other Members of the House.

During the course of the hearings, I and other sponsors of this proposed legislation testified and presented information about the need for this proposed legislation. I should like at this time to revise and extend my remarks by including a copy of a part of the statement I presented during the course of my testimony.

(The statement is as follows:)

STATEMENT BY HON. WRIGHT PATMAN BEFORE THE COMMITTEE ON INTERSTATE AND FOREIGN COMMERCE, HOUSE OF REPRESENTATIVES, WASHINGTON, D.C., JUNE 16, 1960, ON H.R. 10235, A BILL TO HELP SMALL BUSINESS BY PREVENTING BELOW-COST SALES

H.R. 10235 was introduced February 8, 1960, to provide an amendment to the Federal Trade Commission Act, and, therefore, was referred to the Committee on Interstate and Foreign Commerce for consideration.

OBJECTIVES OF THE BILL

The objectives of the bill are to prohibit by Federal law certain discriminations in price and sales at unreasonably low prices, including those at levels below cost.

These objectives would be accomplished by adding a section to the FTC Act and including in that section the provisions now appearing in section 3 of the Robinson-Patman Act (Public, No. 692, 74th Cong.; U.S.C., title 15, sec. 13a). Under the terms of the bill, some additional language is added to those provisions. It should be noted that the provisions of section 3 of the Robinson-Patman Act constitute a part of the Federal criminal laws. These provisions, when carried over and added to the FTC Act by amendment, do not carry with them the criminal penalties. Instead, they simply would provide for injunctive relief and the right of those injured to sue for treble damages in civil proceedings. Of course, the Federal Trade Commission would be empowered to stop the practices made unlawful by the provisions of this bill.

MANY HOUSE MEMBERS HAVE EXPRESSED INTEREST IN THE BILL

Following the introduction of H.R. 10235, and prior to June 10, 1960, 22 House Members introduced identical bills. Also, a companion bill has been introduced in the Senate. This widespread interest in these legislative proposals stems from the fact that large firms doing a nationwide business have been shown to engage in the practice of selling goods, wares and merchandise at prices below cost in one area and then in another area for short periods of time with the effect of eliminating competition. Information about the use of such practices has been made available to Members of the House. Representatives of small business firms are telling their representatives in Congress about these matters and appealing to them for helpful legislation on the subject.

REASON FOR THE BILL: PRACTICE OF SALES BELOW COST

The practice of making sales at prices below cost was dramatically brought to light during the course of the hearings before the Special Subcommittee on Small Business Problems in the Dairy Industry, under the chairmanship of Hon. TOM STEED, and in hearings before Subcommittee No. 5 on Small Business Problems in the Food Industry, under the chairmanship of Hon. JAMES ROOSEVELT. It will be recalled that during these hearings one witness after another, as officials of big business firms, admitted using the great resources of their companies in making sales at prices below cost to the detriment of small business.

The practice continues unabated with devastating effects. Subsequent to the conclusion of the hearings before the House Small Business Committee's Special Committee on Dairy Problems, we received information that the large firms are continuing to make sales at prices below cost to eliminate small business firms. On May 14, 1960, a representative of small business complained to Members of the House that the National Dairy Products Corp. (Sealtest) was selling dairy products in Kentucky at unreasonably low prices, and, in that connection, stated:

"The unreasonably low price at which these products are being sold would seem to be for the sole purpose of destroying competition, especially independent dairies such as ourselves. This can be very easily done by a large national concern such as Sealtest who operate in many different geographical localities and are able to finance and subsidize a price war against small dairies who sell in competition. * * *

"By using these unfair competitive practices they would in effect force us out of business within 30 to 60 days. Therefore, the urgency for action is of the utmost importance. We ask that you help us eliminate these unfair practices as quickly as possible by contacting Senator LYNDON JOHNSON of Texas and asking him to supply this information to Congressman WRIGHT PATMAN."

These charges by representatives of small firms are similar to complaints received from representatives of other small firms doing business in other parts of the country. In some of the areas where the nationwide distributors have gained monopoly control of prices, the public is paying higher prices than those which prevailed before competition was eliminated. Therefore, it should be emphasized that the proposals we are making for legislation have as their principal objective the maintenance of competition. Only through preservation of competition can the public be assured of the low prices provided through competition. Prices representing sales made temporarily at levels below cost provide the public only with temporary advantages. These advantages are paid for by other members of the public at the same time or by the same members of the public at other times. It is for that and the other reasons we are discussing that we favor legislation which would prohibit sales at prices below cost. We are against that monopolistic practice, because it leads to monopoly controlled prices at high levels. In other words, by fighting for legislation which would prohibit sales at prices below cost, we are fighting against high prices as the inevitable result of monopoly control.

Only a few months ago, the Supreme Court unanimously upheld as constitutional a State law prohibiting sales below cost and noted that one of the chief aims of such law is to put an end to "loss leader" selling—*Safeway Stores, Inc.* v. *Oklahoma Retail Grocers Association, Inc., et al.* (360 U.S. 334). In doing that the Court stated that—

"The selling of selected goods at a loss in order to lure customers into the store is deemed not only a destructive means of competition; it also plays on the gullibility of customers by leading them to expect what generally is not true, that a store which offers such an amazing bargain is full of other such bargains."

This thought about the use of loss leaders in preying on the gullibility of customers by leading them to expect what is generally not true, that is, that a store that offers such an amazing bargain is full of other such bargains, is not one simply based on theory. Not only logic, but also the history of human experience fully supports the thought. If that should not be taken to abundantly support the thought expressed by the Supreme Court to the effect that loss leader selling is an advertising gimmick, then we only need to turn to the words of one who has engaged in loss leader selling for further evidence. Not long ago the Committee on the Judiciary in the course of hearings regarding monopoly power heard a witness who had engaged in loss leader selling. In the course of the testimony and with reference to that practice, he stated:

"What cheaper method of advertising is there if I advertise a commodity that cost me a dime for 5 cents and that customer comes into my store. And my only hope is * * * he will buy something else from me."

The advertising characteristics and any misleading and deceptive effects incident thereto are not necessarily the worst aspects of making sales at prices below cost. Its deadly effect upon small and independent competitors of the loss-leader selling is one of its most dangerous characteristics.

SMALL BUSINESS DENIED RIGHT TO PROCEED UNDER EXISTING LAW

The Supreme Court of the United States on January 20, 1958, by a 5-to-4 decision held that section 3 of the Robinson-Patman Act is not a part of the Federal antitrust laws, and, therefore, is not available for proceedings by persons injured as a result of things forbidden by the antitrust laws. The Court so held in the cases of *Nashville Milk Company* v. *Carnation Company* and *Safeway Stores, Inc.*, v. *Vance* (355 U.S. 373 and 389). The ruling by the Court in these cases means that under existing law small and independent business concerns are not permitted to use section 3 of the Robinson-Patman Act in proceedings against unlawful selling at unreasonable low prices—even at prices below cost—and even though those practices result in the creation of monopoly.

Section 3 of the Robinson-Patman Act, as approved June 19, 1936, was authored by Senators Borah and Van Nuys. It became an amendment to the bills introduced by me and Senator Robinson. I did not discuss with Senators Borah and Van Nuys whether it was their intention to have their amendment apply as an amendment to the Federal antitrust laws. However, I have made it clear on more than one occasion that the definition of antitrust laws as set forth in section 1 of the Clayton Act, should be amended so that there would be no question about section 3 of the Robinson-Patman Act being embraced as a part of the antitrust laws. Indeed, on January 23, 1958, 3 days following the 5-to-4 decision by the Supreme Court in the cases to which I have referred, I introduced H.R. 10243 (85th Cong.) to accomplish that objective. On the same day, Senator SPARKMAN, chairman, Select Committee on Small Business, U.S. Senate, introduced a companion bill. These bills were referred to the Committees on the Judiciary, as are all proposed amendments to the antitrust laws. However, no action was taken. Therefore, at the opening of the 86th Congress, we reintroduced bills for the same purpose. In the House, my bill is H.R. 212. The Judiciary Committee has not considered it.

In the meantime, practices of selling at prices below cost, as I have explained, are continuing unabated. They appear to be in violation of section 3 of the Robinson-Patman Act.

Senator Borah made clear that his purpose in offering the amendment to the Robinson-Patman Act, which became section 3 thereof, was to inhibit conduct as a matter of law "without the intervention of the discretionary power of the Federal Trade Commission or other bureau." He said, "That, it seems to us, should be prohibited as a matter of law and that there need not be any discretion laid anywhere with reference to the execution of that kind of law." Despite the care that was taken in providing for that clear purpose, the Department of Justice—the agency charged with the responsibility for the enforcement of that provision of the law—has done little to enforce it. Now the Supreme Court has informed us that small business firms victimized through violations of that section of the law are not entitled to act in civil litigation to enforce it.

It is common knowledge that the Department of Justice in the past has not enforced and has had little sympathy for section 3 of the Robinson-Patman Act as a criminal law against predatory pricing practices.

Indeed, the group who formulated the majority review for the report of the Attorney General's Committee To Study the Antitrust Laws in 1955, approved the failure of the Department of Justice to enforce section 3 of the Robinson-Patman Act. In that connection, it was argued that:

"Although Congress authorized the Department of Justice and local U.S. attorneys to enforce section 3, public enforcement organs have largely forsaken this law. * * *

"The Government's reluctance to enforce section 3 has relegated its enforcement to private treble damage litigants."

Thus it is clear that section 3 of the Robinson-Patman Act on the one hand, stands unenforced by the only Government agency with the authority to enforce it, and, on the other hand, now has been made otherwise unenforcible. Even those victimized through violations of that section of the law are denied the right to proceed under it for redress.

EXISTING LAW IS INADEQUATE

At the Federal level, what can be expected under existing provisions of other laws to protect small business firms from the ravages and the devastation visited upon them as a result of these predatory practices of large, multiple-market operators in selecting first one area and then another in which to sell at prices below cost until all competition in each of such areas is eliminated? One time there was hope that section 5 of the Federal Trade Commission Act could be relied upon for help in that respect. However, largely because a Federal court in 1919 (see the case of *Sears Roebuck & Co.* v. *Federal Trade Commission* (258 Fed. 307)) held that section 5 of the Federal Trade Commission Act was not applicable to sales at prices below cost, the Federal Trade Commission since that time has been reluctant to attack the practice unless it was shown to be coupled with a showing of intent to destroy competition. In other words, the Commission now considers that in applying that law to the practice we are discussing requires a standard of proof equivalent to the showing of criminal intent to destroy competition. The Commission and the Department of Justice do not consider that under the existing law they are authorized and empowered to proceed against the practice of selling at prices below cost simply upon the showing that the effects and results are the substantial lessening of competition and tendency to create monopoly.

STATES HAVE TRIED TO DEAL WITH PROBLEM

Many of the States have enacted legislation to combat this practice of selling at prices below cost. The courts have upheld the State laws, but due to the fact that the law of any States does not reach beyond the State line, it can have no application to transactions in interstate commerce. The need for Federal legislation on the subject to fill this void is apparent.

This does not mean that a majority of our States have not tried to do their best to meet this problem. More than 30 of the States have laws on this subject. The statutes in only two or three States have been found to contain defects sufficiently for the courts to hold them invalid. Those in the other States which have been upheld have been applied in a number of instances. Officials of the States understand the need for effective action to meet this problem. For example, the legislature of the State of Louisiana, in its action on a statute against sales at prices below cost, in 1958, stated:

"Whereas it is the intent of the legislature to prevent the economic destruction of many dairy farmers, dairy plants, ice cream dealers and resale merchants as a result of discriminatory trade practices by certain business organizations financially strong enough to sell below their own costs for an extended period of time, which presents a situation detrimental to the health, welfare, and economy of the people of this State."

The Legislature of Oklahoma, in passing a similar statute, included the following statement:

"Legislative intent: The practice being conducted by many dairy processing, wholesaling, and distributing plants in Oklahoma, in the subsidization of retail dealers, through secret discounts, and the furnishing of equipment is forcing numerous dairy plants out of business, and is a practice which adversely affects the stable economy of Oklahoma. Such practice tends to reduce the price paid to the dairy producer, increase the price paid by the consumer, and is detrimental to welfare of the State."

Early this year, the Supreme Court of the State of Colorado rejected the contention that the Colorado law prohibiting sales at prices below cost was unconstitutional. It

held that the terms "cost" and "cost of doing business," are not so indefinite and uncertain within the meaning of the appropriate rule as to provide no basis for the adjudication of rights.

On April 14, 1960, in a release from the office of Governor Foster Furcolo, State House, Boston, Mass., with reference to a decision made at that time by the Supreme Judicial Court of Massachusetts, questioning and invalidating the powers of the Massachusetts Milk Control Commission to absolutely "fix" the prices at which dairy products are to be sold, made the following statement:

"The question of the milk control commission's powers has been somewhat clarified, but we cannot sit by and see ruinous price wars destroy the milk dealers, if such price wars are caused by unethical sales below cost. Such price wars inevitably result in monopolies and exorbitant prices to consumers. This has been well established by the Congressional Small Business Subcommittee. We have always maintained that the proper way to end price wars is by proper law enforcement."

Wisconsin's State Attorney General, John W. Reynolds, in referring to criminal actions brought by his State under its own law against three large multiunit dairy processors, commented as follows:

"There are many who feel that unless the illegal practices of some multiunit dairies can be stopped, most, if not all, of the independent dairies in Wisconsin will eventually be forced to sell out.

"Communities which lose their independent dairies end up paying higher prices for milk. Jobs are lost, taxes are lost and the right and power to make decisions which affect the welfare of that community are transferred to the distant centers where the capital of that industry is controlled."

Thus, we are informed by responsible officials who are members of legislatures, the chief legal officers, and high executives of our State governments, that legislation against the practice of selling at prices below cost is in the public interest. They point out that legislation preventing sales at prices below cost can serve producers, small business firms, and consumers through the preservation of our private competitive enterprise system. The House Small Business Committee on July 27, 1959, in House Report No. 714 (85th Cong.), recommended early consideration by the appropriate legislative committees of the Congress of proposals which would, among other things, prohibit price discriminations having the effect of substantially lessening competition or tending to create a monopoly and provide a process under the Federal Trade Commission Act for temporary injunctive relief, pending issuance of final orders in litigated cases. H.R. 10235 and H.R. 8841 before you for consideration, would accomplish what was thus recommended for your consideration.

With this background statement of the reasons for, and the objectives sought by H.R. 10235, I now turn to a discussion of the provisions of the bill.

PROVISIONS OF THE BILL ANALYZED

As stated earlier, the provisions of H.R. 10235 incorporate the provisions now appearing in section 3 of the Robinson-Patman Act. The language of that section of the law is quoted as follows:

"SEC. 3. It shall be unlawful for any person engaged in commerce, in the course of such commerce, to be a party to, or assist in, any transaction of sale, or contract to sell, which discriminates to his knowledge against competitors of the purchaser, in that, any discount, rebate, allowance, or advertising service charge is granted to the purchaser over and above any discount rebate allowance or advertising service charge available at any time of such transaction to said competitors in respect of a sale of goods of like grade, quality, and quantity; to sell, or contract to sell, goods in any part of the United States at prices lower than those exacted by said person elsewhere in the United States for the purpose of destroying competition, or eliminating a competitor in such part of the United States; or, to sell, or contract to sell, goods at unreasonably low prices for the purpose of destroying competition or eliminating a competitor.

"Any person violating any of the provisions of this section shall, upon conviction thereof, be fined not more than $5,000 or imprisoned not more than one year, or both."

As noted earlier, that is a part of the Federal criminal law. Only the Attorney General of the United States, acting through the various U.S. attorneys, is privileged to proceed under that section of the law.

Section 5 of the Federal Trade Commission Act makes unlawful unfair methods of competition and unfair and deceptive acts and practices in commerce. We have previously discussed that the Federal Trade Commission is reluctant to apply this section of the law to sales at prices below cost, even though they did substantially lessen competition, unless it is shown that the sales were made for the purpose of destroying competition.

H.R. 10235 would amend the Federal Trade Commission Act by adding a new section 18 thereto. It would include in that new section all of the provisions now appearing in section 3 of the Robinson-Patman Act which as a Federal criminal law can be applied to prices that are unreasonably low when they are shown to be for the purpose of destroying competition. These provisions, when added to the Federal Trade Commission Act by amendment, do not carry with them the criminal penalties provided for in section 3 of the Robinson-Patman Act. Therefore, additional language is added, which would make the practice of discriminating in prices and selling at unreasonably low prices, a violation of this proposed new Federal civil law, without the necessity of showing that the practices are carried on for the purpose of destroying competition. The Federal Trade Commission would need to show that the practices would have the effect of substantially lessening competition or of injuring, destroying or preventing competition. In other words, the standards of proof of violation would require only the showing of the deleterious effects and results, although it would remain a violation of the law for these practices to be carried on for the purpose of destroying competition.

Also, it should be pointed out that there has been included in the language of H.R. 10235 the words "in or affecting commerce." By including this language, the acts and practices made unlawful would become so when they are shown that they would have the effect of lessening competition or tending to create a monopoly in interstate commerce, although the act of making the sales or carrying on the practice would not have to be "in commerce." This is necessary if we are to have an effective prohibition against the monopolistic practices of large nationwide sellers who operate in many States, but from plants located in each of these States. In many instances, the transactions of such concerns are carried on through the making of purchases and sales on behalf of each of such companies wholly within the boundaries of each of the States. Therefore, these large nationwide concerns are arguing that they are not engaged in interstate commerce and cannot be said to be "in commerce" as that term is defined in the Federal Trade Commission Act. We have included in H.R. 10235 the language of "in or affecting commerce." By so doing we feel that we have provided for the Federal Trade Commission to have jurisdiction over practices violative of this new section 18, proposed by H.R. 10235, equivalent to the jurisdictional commerce feature of the Sherman Antitrust Act. As you know, the Department of Justice may proceed under that law against combinations and monopolies in restraint of trade, which need not be shown to be "in commerce." It is enough if they are shown to adversely "affect commerce."

Lines 13–15 of page 2 of the bill contain language not appearing in the language of section 3 of the Robinson-Patman Act. This added language would prohibit discriminatory pricing practices by these large concerns doing business in many areas and where the discriminatory pricing practices reflect the charging of higher prices in some areas and lower prices in others and where the effect of such pricing practices "have a dangerous tendency unduly to hinder competition or create a monopoly in any section of the country." The language just presented embraced in the quotation marks is the language from lines 13–15 of page 2 of the bill. That does not now appear in section 3 of the Robinson-Patman Act. However, this language is not new in the law. It has been recognized as involved in Federal regulation of commerce for a long time. Since 1914, it has been illegal for any person, partnership, or corporation to engage in any practice or method of competition having "a dangerous tendency to unduly hinder competition or create monopoly." Reference is made to the Federal Trade Commission Act, which became law September 26, 1914, and which since then has made unlawful unfair methods of competition in commerce. That law was interpreted by the Supreme Court of the United States as early as 1920 to prohibit methods of competition having a dangerous tendency to unduly hinder competition or create monopoly (*Federal Trade Commission* v. *Gratz* (253 U.S. 421, decided June 7, 1920) and *Federal Trade Commission* v. *Beech-Nut Packing Co.* (257 U.S. 441, decided January 3, 1922)). In the *Beech-Nut* case the Court stated:

"If the Beech-Nut system of merchandising is against public policy because of its dangerous tendency unduly to hinder competition or create monopoly, it was within the power of the Commission to make an order forbidding its continuance."

This power and authority thus entrusted to the Commission by the Congress has been used rarely. In recent years it has been used not at all.

The prohibitions set forth in lines 20–25, page 2, and lines 1–3, page 3, are patterned from the language appearing in the final substantive provision of section 3 of the Robinson-Patman Act. That provision prohibits the sale of goods at "unreasonably low prices." The difference in the language appearing in section 3 of the Robinson-Patman Act and that appearing in the bill is the fact that the language in section 3 of the Robinson-Patman Act is limited to those situations where the "unreasonably low prices" are shown to have been "for the purpose of destroying competition or eliminating a competitor," whereas the language in the bill would not require the showing that the sales made at "unreasonably low prices" were for the purposes of destroying competition. It would be sufficient to show that they had the effect or resulted in a substantial lessening of competition or tendency to create a monopoly in any line of commerce.

The prohibition set forth in this section of the bill does not forbid sales below cost per se. The only sales which would be prohibited by those sections of the bill are the sales which are made at such "unreasonably low prices" as would "substantially lessen competition or tend to create a monopoly in any line of commerce" or "injure, destroy, or prevent competition with any person who either grants or knowingly receives the benefit of such unreasonably low prices."

From the foregoing it can be seen that this bill would not prohibit sales at prices below cost except where the effect would be a destruction of competition and a tendency to monopoly. In view of that fact, the test of whether a sale is at a level "below cost" is merely incidental to the primary test of whether competition is being destroyed as a result of the "unreasonably low prices."

An important feature of the bill provides that small business concerns injured as a result of the things forbidden in the bill may proceed to enjoin the practices and sue for trouble damages for injuries sustained. Today, small business concerns are not permitted to utilize section 3 of the Robinson-Patman Act against monopolistic pricing practices in private litigation (*Nashville Milk Co.* v. *Carnation Co.* (355 U.S. 373) and *Safeway Stores* v. *Vance* (355 U.S. 389)). Hence the first result through the enactment of H.R. 10235 would be to remedy that situation.

Finally, it should be noted that the language appearing in line 9, page 1, and lines 1–8, page 2 of the bill is exactly the same as the language appearing in the first provision of section 3 of the Robinson-Patman Act. There is no change in language or punctuation, and, therefore, no change in the substantive provision. Therefore, the only thing the bill does regarding that provision of the law is to make it a part of the civil law. Now it appears only in the Federal criminal law. In passing, it should be noted that it is somewhat similar to, though not the same as, the provisions appearing in subsection (d) and (e) of section 2 of the Clayton Act, as amended by the Robinson-Patman Act. The purpose, therefore, of this language would be to strengthen the law against unfair and discriminatory rebates, allowances, advertising service charges and the like.

Some comment has been made about the use of the word "quantity" in this provision of the bill and in section 3 of the Robinson-Patman Act. That term has not been judicially defined in its application to rebates, allowances, advertising service charges and the like. However, it is believed that it could be safely assumed that when it is subjected to judicial interpretation, it will be interpreted to have somewhat the same meaning as the requirement that advertising allowances be made on proportionately equal terms, as now provided for in subsections (d) and (e) of section 2 of the Clayton Act, as amended by the Robinson-Patman Act.

In that connection, it should be noted that the phrase "proportionately equal terms" to which reference has been made, has been interpreted by the Federal Trade Commission and by the courts as being met in its requirements if furnishing of advertising and the payments therefor are made on the basis of a volume of purchases. In other words, on a basis of quantity.

The question has been asked whether the good faith meeting of competition would be accepted as a defense to any charge brought under H.R. 10235. The only answer that can be provided to that inquiry is that the bill does not dispose of any issue regarding good faith meeting of competition. Questions relating to that issue are left open and unanswered by this bill. The bill does not purport to deal with that issue. The extent that good faith meeting of competition would become relevant to any issue in a case arising under the Federal Trade Commission Act as it exists, then it would remain as relevant to an issue in a case arising under this bill.

CONCLUSION

The current, widespread practice of making sales at prices below cost and related discriminatory practices, presents a problem to the Congress. The matter is urgent. It demands serious and immediate consideration. The law must not be left as it is at present, providing that section 3 of the Robinson-Patman Act can be used only in criminal cases prosecuted by the Department of Justice.

The facts dramatically show that the practice of price discrimination is being used by large and powerful monopoly forces to eliminate small and independent business concerns and thereby substantially lessening competition. In that way, the monopoly power over business is entrenched. It results in a heavy concentration of economic power in American industry.

The records show that one nationwide processor and distributor of dairy products has increased its share of the total business in that industry tremendously. It increased its sales between 1932 and 1955 by 38,706.89 percent.

Eight large processors and distributors of dairy products now enjoy more than 50 percent of the sales in that industry.

Concentration in American industry is not peculiar to the distribution of dairy products. Recently, the Federal Trade Commission, in announcing that it would study the matter stated:

"We want to know why the industry is getting so tough on the smaller operator * * * a trend seems to be to eliminate the small man entirely."

The House Small Business Committee and its subcommittees, which have been studying this matter, have an abundance of information. We have made that information available to the Federal Trade Commission, the Department of Justice, and other Government agencies. We shall continue to do so. However, we recognize that their abilities to stop these unwholesome practices are limited to some extent by the law. We need to expand their authority so that they will no longer have the excuse that they are without authority under the law to stop these practices.

Our colleague, the gentleman from California (Mr. ROOSEVELT), as chairman of Subcommittee No. 5 of the House Small Business Committee, has developed evidence showing that less than 35 percent of the 77 chains account for 77 percent of the total food chain sales. Of the 370,000 food stores in existence today, about 12 percent of them do 70 percent of the business. The so-called mom-and-pop stores are disappearing from the neighborhood.

Only a few days ago the Federal Trade Commission released a report on a study it has made regarding concentration in the distribution of food. According to the report, corporate chains increased their share of total food sales in these areas from 29 percent in 1948 to 44 percent in 1958. In the meantime, unaffiliated independent food retailers' share of the market dropped from 58 percent to 25 percent.

Shelf space is one of the keys to success in the grocery business. With perhaps 7,000 items to choose from, the housewife is going to be influenced by the location of items placed at her eye level. Today, the problem is to get your merchandise on the shelf. The great concentration of the distribution of food at the retail level in the hands of a few corporate chains poses great problems for independent businessmen engaged in production, processing, and the sale of food and related items to retail grocery stores. It is getting to the point where the marketplace is the shelf in the stores of a few corporate chain food retailers. Thus, those few chain food retailers are gaining a position from which they are able to make a decision on what shall be made available to consumers in the marketplace, and the goods of what producers shall be offered in the marketplace.

Today, one of the large nationwide chain food retailers enjoys an annual volume of business 1½ times greater than the entire aggregate annual volume of business enjoyed by all of the 194,000 independent small single store food retailers in the United States. Many additional facts could be cited which would further dramatize this alarming concentration of business in the hands of a few, but I shall not take your time and belabor the matter in citing further from the abundance of available statistics. We should be mindful that the significant fact remains that these monopoly conditions preclude competition.

We should aim to stop the practices which create the monopolistic conditions. It is beyond dispute that the most deadly of these practices is the practice of price discrimination. It is through this practice that the large concerns have gathered unto themselves monopoly control over prices and markets of a number of our basic industries and lines of business.

The problem is now up to Congress. We should act to place in the hands of the enforcement agency and in the hands of small business, the tools with which they may be enabled to act to stop or reduce the use of the monopolistic practice of price discrimination. Unless we do, as the years roll by the trust-busters will be calling upon us to appropriate millions and millions of dollars to help break up monopolies and trusts which price discriminations today are building up. It seems quite futile to build up for the sake of break up. Let us act to prevent the buildup of monopoly.

H.R. 10235 is designed to help small business survive. In doing that, it will help us preserve the free and competitive enterprise system. In that way we can help assure the consuming public of the consistent, fair, low, competitive prices attainable only under a system of competition.

The Federal Trade Commission, the Department of Justice, and representatives of big business are known to be in opposition to the proposals for legislation which would prohibit sales at prices below cost having the effect of substantially lessening competition and tending to create monopolies. At the same time, representatives of the Federal Trade Commission and the Department of Justice are telling small businessmen that existing law does not provide those agencies with authority to proceed against sales at prices below cost, merely on the showing that the effect is to substantially lessen competition or tend to create monopolies.

Those of us who want to help small business are unable to understand these attitudes and positions expressed by the Federal Trade Commission and the Department of Justice. If, under existing law, they cannot stop these monopolistic practices, and they do not think we have the appropriate proposals for strengthening the law, then why do not they bring forward proposals of their own which would strengthen the law so as to enable the Federal Trade Commission and the Department of Justice to stop these practices? We think they ought to do that or stand convicted of the charge that they are willing that big business concerns destroy small business firms and competition through these practices of selling at prices below cost.

We are receiving appeals from representatives of many small business firms, pleading for the enactment of this legislation. In some instances, these pleas describe the pitiful plight of small business firms struggling to survive against the practice against which this legislation is directed. We have received a large number of letters and other communications containing these pleas. With your permission, I would like to include in the record at this point a number of those communications as if I had read them to you during the course of my appearance here today.

OBJECTIONS TO H.R. 10235 ANALYZED

The Department of Justice has filed an adverse report on H.R. 10235. In general, its objection to H.R. 10235 appears at the middle of page 2 of its report, where it states that the provisions of H.R. 10235 "generally follow section 3 of the Robinson-Patman Act, there are certain variations and some of the language of the legislation is vague and uncertain."

Thus it is seen that the Department of Justice objects to this effort to help small business on the ground that the language used cannot be understood. What is the language to which reference is made? The Department points out that the bill would be applicable to sales which "have a dangerous tendency unduly to hinder competition or create a monopoly in any section of the country." Then it states that the meaning of the word "dangerous" as thus used can only be a "matter of speculation." Then it states that the world "unduly" is equally vague and speculative and that it is not clear as to exactly what the word "hinder" is intended to mean. It concludes that a combination of these words presents an imprecise test.

What the Department of Justice apparently has overlooked is the fact that for a period of 40 years the Supreme Court of the United States has interpreted the meaning of these terms in applying them to particular situations in cases arising under the Federal Trade Commission Act. Therefore, apparently these words were not overly speculative or without meaning to judges who must interpret the law. Apparently the Court, in appraising and determining the meaning of the words it used, did something the Department of Justice failed to do, namely, make reference to a good dictionary to find a definition for these terms. The businessman does not need to do that. He is aware of dangers—he knows what is due and undue, and he knowns what hinders him. Therefore, the Supreme Court in determining the meaning of these words from the dictionary utilized terms that are well known and are understood by the layman. (See *Federal Trade Commission* v. *Beech Nut Packing Co.*, 257 U.S. 441, and *Federal Trade Commission* v. *Grats*, 253 U.S. 421.)

Also, the Department of Justice objects to the term "unreasonably low price" as used in the bill, noting that it could mean a sale at a price below cost as defined by State law, and that it could also mean other things, depending upon factors not revealed in the bill. In that connection, the Department of Justice failed to point out that H.R. 10235 contains an example of some things included within the term "unreasonably low price," namely, sales prices below cost. Section 3 of the Robinson-Patman Act, in which the term "unreasonably low price" was first used, contains no example or definition of the term.

Despite the fact that section 3 of the Robinson-Patman Act contains no example or definition of the term "unreasonably low price," it has been held sufficiently certain in its meaning to be constitutional by the courts, and has been applied to apt situations by the Department of Justice. Less than 2 years ago, the Department of Justice proceeded under that section of the law against Fairmount Foods, Inc. That proceeding was by way of a grand jury indictment. It was a criminal preceeding where defendants must be well informed of the crimes with which they are charged. Fairmount Foods, Inc., had little difficulty in determining the nature of the crime with which it was charged because it acknowledged its guilt and paid a $25,000 fine during July 1959. The remaining term appearing in the bill, to which the Department of Justice states it would be difficult to assign meaning, is the term "cost." In that connection, it overlooks the fact that many State laws have been challenged on the ground that the word "cost" appearing therein was vague, indefinite and uncertain. Appellate courts have brushed aside those contentions and have upheld State laws. Among those have been the case of *Safeway Stores* v. *Oklahoma Retail Grocers' Assn. et al.*, decided by the Supreme Court of the United States (360 U.S. 334), and the case of *Schwegmann Bros. Giant Super Market* v. *McCrory*, decided by the Supreme Court of the United States, November 23, 1959 (361 U.S. 114). Quite recently, the Supreme Court of the State of Colorado was faced with the challenge that the Colorado law prohibiting sales at prices below cost was unconstitutional because the word "cost" was too indefinite, vague, and uncertain. There the court said: "The terms 'cost' and 'cost of doing business' are not proved to be so indefinite and uncertain within the meaning of the appropriate rule as to provide no basis for the adjudication of rights." (See No. 19,260, *Flank Oil Co.* v. *Tennessee Gas Transmission Co.*, decided by the Supreme Court of Colorado, April 1960.)

The only other objection made to H.R. 10235 by the Department of Justice is that the bill would carry over many of the alleged ambiguities inherent in the present language in section 3 of the Robinson-Patman Act It is not surprising that the Department of Justice has made this objection to this bill because it has not favored the Robinson-Patman Act which was enacted by the Congress overwhelmingly 24 years ago. In fact, today is the 24th anniversary of congressional approval of the Robinson-Patman Act. Only 15 votes were cast against it in the House, and it passed the Senate without objection.

Despite that overwhelming expression of public policy by the Congress, the Department of Justice has expressed its dislike for the policy expressed in the law. The report made by the Attorney General's National Committee To Study the Antitrust Laws, March 31, 1955, suggested that section 3 of the Robinson-Patman Act should be repealed. The Department has done little to enforce it. Therefore, it is repeated that it is not surprising that the Department of Justice is opposed to H.R. 10235, which carries over from the criminal law into Federal civil law the provisions of section 3 of the Robinson-Patman Act.

It should be observed that the officials currently managing the U.S. Department of Justice have seen nothing imprecise in the word "unreasonable" as that term has been used in defining the scope of the Sherman Antitrust Act. Indeed, the present Chief of the Antitrust Division has been associated with efforts to have the provisions of the Sherman Antitrust Act apply to situations only where the restraints of trade involved are shown to be unreasonable. Also, he has been associated with efforts to read into the Sherman Antitrust Act limitations upon its application to a number of situations only where the restraints of trade are shown as unduly foreclosing, suppressing, or eliminating competition. Therefore, it is strange, indeed, that the current objections by the Department of Justice to H.R. 10235 are predicated, in part, upon the fact that it includes the word "unduly." It would seem that if the Department of Justice cannot determine the meaning of the word "unduly" as used in H.R. 10235, it would find it equally difficult to define the meaning of that word or the word "unreasonably" as they would be applied to particular situations arising under the Sherman Antitrust Act.

The Federal Trade Commission has filed an adverse report on H.R. 10235. In general, its objections are twofold: (1) It argues that "the proposed legislation would narrow the authority of the Commission by limiting its activities to situations where sales are made below cost, and (2) it argues that the bill "would result in the Commission being authorized and directed to evaluate price and service-charge differentials under two separate statutes having different, and in some instances, conflicting terms, standards and defenses.

The apparent basis for the first of these objections is found in what is alleged at the middle of page 3 of the Commission's report on the bill, where it is said: "Sales at unreasonably low prices with the effect or purpose stated in the proposed legislation, would appear to constitute an unfair method of competition in violation of section 5 of the Federal Trade Commission Act." This contention of the Federal Trade Commission that it has the authority under section 5 of the Federal Trade Commission Act to proceed against sales at unreasonably low prices, merely on the showing of the effects stated in the proposed legislation, namely, that of substantially lessening competition or tending to create a monopoly, is amazing and startling in view of what it has been telling small businessmen, and in view of its failure to act in that respect.

It is standard practice for the Federal Trade Commission to tell small businessmen who complain about sales at prices below cost, that the Trade Commission is not authorized to proceed unless it is shown that those sales were made for the purpose or intent of destroying competition. In doing so, it frequently cites the case of *Sears Roebuck* v. *Federal Trade Commission* (25 Fed. 307), as decided by the U.S. Circuit Court of Appeals, Seventh Circuit, April 29, 1919, and in that connection, quotes from the opinion of the court where, with reference to the Federal Trade Commission Act, it was stated: "We find in the statute no intent on the part of the Congress, even if it has the power, to restrain an owner of property from selling it at any price that is acceptable to him or from giving it away."

Also, the Commission in the actions it has taken against sales at unreasonably low prices or at price levels below cost, has limited the scope of those actions to challenging prices and sales made "for the purpose or intent and with the effect" of substantially lessening competition or tending to create a monopoly. For example, the most often cited case of the Commission dealing with this problem is the proceeding in the matter of *E. B. Muller and Co. et al.*, Federal Trade Commission docket 3224 (Federal Trade Commission Decisions, vol. 33, p. 24, decided June 11, 1941). In that case, the Commission entered an order which prohibits E. B. Muller and Co. from selling or offering to sell granulated chicory at a price less than cost, but only where it is done "with the purpose or intent, and where the effect may be to insure, suppress, or stifle competition or tend to create a monopoly in production or sale of such products".
